(ii) In the case of parcels addressed in care of banks or other organizations, the second addressee shall be advised concerning the arrival of the parcel, but he shall not have authority to claim delivery except upon written authorization from the first addressee or from the sender. In the latter case, the sender shall take steps, through the administration of the country of origin of the parcel, for its delivery to the second addressee.

(iii) Addressees in Uruguay must obtain import permits for all parcels, regardless of value. As such permits are sometimes denied, senders should be advised to inform the addressees in advance of mailing as to the contents of parcels to be sent, and await confirmation that import permit has been issued before mailing.

(8) *Prohibitions.* (i) Certain plants and plant products are prohibited from importation or are admitted under restrictions. Interested patrons may be informed that information can be obtained from the Bureau of Entomology and Plant Quarantine, Department of Agriculture, Washington 25, D. C., or from one of the offices of that Bureau located at principal ports of entry.

(ii) It is forbidden to import gold or silver coins, except old coins intended for collections, which may be imported up to the maximum number of 10 in each parcel.

(iii) Firearms, war arms.

§ 127.376 *Vatican City State*—(a) *Postal Union mails*—(1) *Classifications, rates, weight limits and dimensions.* See Table No. 1, in § 127.1. Small packets not accepted.

(2) *Registration.* Fee, 55 cents. (See §§ 127.130–127.139.)

(3) *Indemnity.* See Subpart E of this part.

(4) *Special delivery.* No service.

(5) *Air mail service.* Postage rates: Letters, letter packages and post cards, 15 cents per half ounce. Air letter sheets, 10 cents each. Other Postal Union articles, 45 cents for the first 2 ounces and 24 cents for each additional 2 ounces. (See § 127.20.)

(6) *Dutiable articles (merchandise) prepaid at letter rate.* Accepted. (See § 127.3.)

(7) *Prohibitions.* (i) Coins, bank notes, and paper money; manufactured or unmanufactured platinum, gold, or silver; precious stones, jewelry, and other precious articles.

(ii) The articles prohibited or restricted as parcel post are also prohibited or restricted in the Postal Union mails.

(b) *Parcel post*—(1) *Table of rates*—(i) *Surface parcel rates, including surcharges.*

Each air parcel must have affixed the blue Par Avion label (Form 2978). (See § 127.55(b).)

Weight limit: 44 pounds.
Customs declarations: 1 Form 2966.
Dispatch note: No.
Parcel-post sticker: 1 Form 2922.
Sealing: Optional.
Group shipments: No.
Registration: No.
Insurance: No.
C. o. d.: No.

(2) *Indemnity.* No provision.

(3) *Dimensions.* Greatest combined length and girth, 6 feet. Greatest length, 3½ feet, except that parcels may measure up to 4 feet in length, on condition that parcels over 42 and not over 44 inches in length do not exceed 24 inches in girth, parcels over 44 and not over 46 inches in length do not exceed 20 inches in girth, and parcels over 46 inches and up to 4 feet in length do not exceed 16 inches in girth.

(4) *Prohibitions*—(i) *For reasons of public safety.* Books, newspapers, prints, etc., contrary to public order, morals, or religion.

(ii) *For sanitary reasons.* Articles unfit for consumption.

(iii) *For the protection of plants.* Plants and plant products which may bring in diseases.

§ 127.377 *Venezuela*—(a) *Postal Union mails*—(1) *Classifications, rates, weight limits and dimensions.* See Table No. 2, in § 127.1. Small packets accepted. (See § 127.10).

(2) *Registration.* Fee, 40 cents. (See §§ 127.130–127.139.)

(3) *Indemnity.* See Subpart E of this part.

(4) *Special delivery.* No service.

(5) *Air mail service.* Postage rates: Letters and post cards, 10 cents per half ounce. Air letter sheets, 10 cents each. Other Postal Union articles, 38 cents for the first 2 ounces and 18 cents for each additional 2 ounces. (See § 127.20.)

(6) *Diplomatic and consular mail.* See § 127.32.

(7) *Freedom of postage for government correspondence.* See § 127.32 (c).

(8) *Eight-ounce merchandise packages.* Accepted. (See § 127.11.)

(9) *Observations.* (i) Packages containing dutiable printed matter to be sent in the prints mails to Venezuela must have affixed to the wrapper a green customs label (Form 2976–C 1) and be accompanied by the paper form of customs declaration (Form 2976–A) prepared in quadruplicate.

(ii) The customs declaration must be written in Spanish or with an interlinear translation in Spanish and show for each package the number thereof, if any, its classification (such as almanacs and calendars, advertisements with designs not disfigured, advertisements, not otherwise specified, and pamphlets for commercial advertisements), and its net and gross weight; and for each of the articles contained in the package which may be subject to import duties in Venezuela, its net weight, value, and the character of the merchandise in accordance with its exact terminology as used in the Venezuelan customs tariff, as well as the other information required by the customs declaration. A single set of customs declarations may cover as many as 10 packages of prints sent to the same addressee.

(iii) Advertising catalogs are admitted free of duty; all other advertising matter is dutiable.

(iv) It is necessary that a certificate of origin be furnished for merchandise destined for delivery in Venezuela.

(10) *Prohibitions.* (i) Coins, unless sent for collections in which event the customs declaration shall be marked "Objetos para fines numismáticos" (Articles for numismatic purposes).

(ii) Banknotes, paper money, or any instruments of value payable to bearer; manufactured or unmanufactured platinum, gold or silver; precious stones, jewelry, or other precious articles.

(iii) Dutiable articles in letters and packages prepaid at the letter rate.

(iv) The articles prohibited or restricted as parcel post are also prohibited or restricted in the Postal Union mails.

(b) *Parcel post*—(1) *Table of rates*—(i) *Surface parcel rates, including transit charges and surcharges for all places in the State of Bolivar, and for the following places sent via Ciudad Bolivar.*

Each air parcel and the relative dispatch note must have affixed the blue Par Avion label (Form 2978). (See § 127.55 (b).)

Weight limit: 44 pounds.
Customs declarations: 4 Form 2966.
Dispatch note: 1 Form 2972.
Parcel-post sticker: 1 Form 2922.
Sealing: Compulsory.
Group shipments: Limited to 3 ordinary parcels. (See § 127.79.)
Registration: Yes. Fee, 55 cents.
Insurance: No.
C. o. d.: No.

(2) *Indemnity.* See § 127.165.

(3) *Registry service.* For general information see Subpart D.

(4) *Receipts for ordinary parcels.* Receipts are to be issued for ordinary parcels (surface and air). (See § 127.159.)

(5) *Dimensions.* Greatest length, 3½ feet. Greatest length and girth combined, 6 feet.

(6) *Observations.* (i) Senders are required to indicate as a part of the address of all parcels the name of the State or Territory in which the office of destination is located. Customs declarations must be completed to show the exact nature, net weight, and value of each kind of article contained in the parcel, and the gross weight of the parcel. The indication of the net and gross weights must be in the metric system, although it is permissible for such weights to be shown in the avoirdupois system followed by the equivalents in the metric system. (Net weight includes the weight of the merchandise plus the immediate container or wrapper or the board or spool to which the goods are affixed.) Unless a separate certificate of origin is furnished, it is necessary that the origin of the merchandise be shown on the customs declaration. A brief statement such as "Product of U. S. A." is sufficient for this purpose.

(ii) The merchandise should be described according to the classifications of the Venezuelan customs tariff, or simply by the usual commercial designation, including in the latter case the material of which the articles are made and the use or purpose of the articles.

(iii) Fines are imposed when the net weights vary more than 3 percent from those stated on the customs declarations, or when the customs declarations are not complete or do not show the proper classification of the merchandise. However, importers have the privilege of appealing to the Ministry of the Treasury with regard to any fine which may be assessed against them by the customs.

(iv) Parcels containing gold, silver, or other precious articles must be marked "Objetos Preciosos" in letters 1 centimeter (0.39 of an inch) in height.

(v) Importers of parcels may import, by the same ship and for their own account, any number of parcels which suits their convenience.

(vi) In the case of parcels addressed in care of banks or other organizations, the second addressee shall be advised concerning the arrival of the parcel, but he shall not have authority to claim delivery except upon written authorization from the first addressee or from the sender; in the latter case, the sender shall take steps, through the administration of the country of origin of the parcel, for its delivery to the second addressee.

(vii) After the arrival of parcels in Venezuela each addressee is contacted in order to ascertain whether he desires to accept the parcel. If the addressee refuses the parcel it is treated as undeliverable and disposed of in accordance with the instructions of the sender, but if the addressee accepts the parcel it is then submitted for customs treatment. After customs treatment the addressee must either take delivery of the parcel or surrender it to the Venezuelan Customs authorities, since parcels which have been accepted by the addressees cannot be considered as abandoned for purposes of retransmission.

(viii) Air parcels are given air transportation within Venezuela if delivery can be expedited by so doing.

(7) *Prohibitions*—(i) *For sanitary reasons.* (*a*) Impure acetic acid.

(*b*) Pharmaceutical specialties not authorized by the Minister of Health, Agriculture, and Boviculture.

(*c*) Tomatoes, tomato sauce, and foods containing tomato sauce in metal containers.

(*d*) Frozen, dried, and salted meats except frozen birds and sea food.

(*e*) Certificates of origin are required for meat, fish, and preserved foodstuffs.

(*f*) Saccharin and similar substances, except in small amounts if a permit is obtained in advance from the Minister of Health, Agriculture, and Boviculture.

(ii) *For the protection of plants.* Certificates of origin are required for sugarcane seed.

(iii) *Arms, etc.* (*a*) Guns which are not considered as hunting arms; those which are repeater or have rifled barrels for single bullets; revolvers and pistols of all kinds and calibers, small rifles, pistol canes, poniards, daggers, and swords; knives and cutlasses not for domestic, industrial, or agricultural use.

(*b*) Import permits are required for hunting arms and material.

(*c*) War material may be imported only by the National Government.

(iv) *For other reasons.* (*a*) Sea salt; rock salt.

(*b*) Books, magazines, pamphlets, periodicals, and printed matter of all kinds dealing with communist propaganda.

(*c*) Cigarette papers.

(*d*) Apparatus for making money.

(*e*) Copper, nickel, and silver coins may be imported only by collectors with the permission of the Venezuelan Ministry of Finance.

(*f*) Apparatus and equipment destined for telegraphic, telephonic or radiotelegraphic uses, except by special permission obtained in advance by the importer from the Ministry of Fomento.

(*g*) Imitations of official stamps.

§ 127.378 *Viet-Nam (Annam, Cochin-China and Tonkin)*—(a) *Postal Union mails*—(1) *Classifications, rates, weight limits, and dimensions.* See Table No. 1, in § 127.1. Small packets accepted. (See § 127.10.)

(2) *Registration.* Fee, 55 cents. Registry service is limited to the offices of Bang-Hoi, Banmethout, Dalat, Diring, Nhatrang, Phanrang, Phantiet, Tourcham, Hue, and Tourane in Annam, and to Campha-Port, Campha-Mine, Hanoi-Haiphong, Hongay, Langson, Moncay, and Quangyen in Tonkin. (See §§ 127.130-127.139.)

(3) *Indemnity.* See Subpart E of this part.

(4) *Special delivery.* No service.

(5) *Air mail service.* Postage rate, 25 cents per half ounce. Air letter sheets, 10 cents each. (See § 127.20.)

(6) *Dutiable articles (merchandise) prepaid at letter rate.* Accepted. (See § 127.3.)

(7) *Prohibitions.* (i) Coins; manufactured or unmanufactured platinum, gold, or silver; precious stones, jewelry, or other precious articles.

(ii) The articles prohibited or restricted as parcel post are also prohibited or restricted in the Postal Union mails.

(b) *Parcel post*—(1) *Table of rates*—(i) *Surface parcel rates, including transit charges.*

| Pounds | Rate | Pounds | Rate |
|---|---|---|---|
| 1 | $0.78 | 12 | $3.31 |
| 2 | 1.00 | 13 | 3.53 |
| 3 | 1.22 | 14 | 3.75 |
| 4 | 1.44 | 15 | 3.97 |
| 5 | 1.66 | 16 | 4.19 |
| 6 | 1.88 | 17 | 4.41 |
| 7 | 2.10 | 18 | 4.63 |
| 8 | 2.32 | 19 | 4.85 |
| 9 | 2.54 | 20 | 5.07 |
| 10 | 2.76 | 21 | 5.29 |
| 11 | 2.98 | 22 | 5.51 |

Weight limit: 22 pounds.
Customs declarations: 1 Form 2966.
Dispatch note: 1 Form 2972.
Parcel-post sticker: 1 Form 2922.
Sealing: Compulsory.
Group shipments: No.
Registration: No.
Insurance: No.
C. o. d.: No.

(2) *Indemnity.* No provision.

(3) *Dimensions.* Greatest length, 3½ feet. Greatest length and girth combined, 6 feet.

(4) *Prohibitions.* (i) For reasons of public safety: Prints of forms resembling bank notes, postage stamps, and other fiduciary value and all imitation of French or foreign coins. Coins not in circulation. Pistols shooting blank cartridges which have the appearance of automatic pistols. Nonexplosive components of artillery fuses.

(ii) For sanitary reasons: Unverified thermometers. Nursing bottles with tubes. Saccharine and similar products.

(iii) For the protection of plants: Certain plants and plant products are prohibited from importation or are admitted under restrictions. Interested patrons may be informed that information can be obtained from the Bureau of Entomology and Plant Quarantine, Department of Agriculture, Washington 25, D. C., or from one of the offices of that Bureau located at principal ports of entry.

(iv) Arms, munitions, etc.: War arms and war materials.

(v) For other reasons: Products bearing false trademarks or false indications of origin. Boxes or cans of fish, vegetables, or prunes not bearing an indelible indication of their origin. Fish of foreign origin put up in boxes or cans weighing more than 1 kilogram. Works violating the copyright laws. Fancy honey. Certain compound medicines specially mentioned in the customs tariff. Weights and measures not of the metric system. Weights and measure of foreign origin.

(vi) Generally, all articles prohibited to France are likewise prohibited to Viet-Nam.

(vii) A number of varieties of merchandise require special authorization from the Viet-Nam authorities for importation. The list is too long to give in detail; however, senders should be advised in their own interest to ascertain before mailing whether their goods are admissible.

§ 127.379 *Western Samoa (British) Savaii and Upolu Islands and the Tokelau (Union) Group (Atafu, Fakaofo and Nukunonu Islands)*—(a) *Postal Union mails*—(1) *Classifications, rates, weight limits and dimensions.* See Table No. 1, in § 127.1. Small packets accepted at risk of sender. (See § 127.10.)

(2) *Registration.* Fee 55 cents. (See §§ 127.130–127.139.)

(3) *Indemnity.* See Subpart E of this part.

(4) *Special delivery.* No service.

(5) *Air mail service.* Postage rate, 25 cents per half ounce. Air letter sheets, 10 cents each. By ordinary means from New Zealand. (See § 127.20.)

(6) *Dutiable articles (merchandise) prepaid at letter rate.* Accepted at risk of sender. (See § 127.3.)

(7) *Observations.* All imported goods sold, offered for sale, or distributed as advertising matter, which bear any name or trade-mark that might lead the purchaser or receiver to assume they are British products must bear an indication of origin.

(8) *Prohibitions.* Air guns and pistols in addition to other arms, except by authorization of the government.

(b) *Parcel post*—(1) *Table of rates*—(i) *Surface parcel rates.*

| Pounds | Rate | Pounds | Rate |
|---|---|---|---|
| 1 | $0.45 | 7 | $1.77 |
| 2 | .67 | 8 | 1.99 |
| 3 | .89 | 9 | 2.21 |
| 4 | 1.11 | 10 | 2.43 |
| 5 | 1.33 | 11 | 2.65 |
| 6 | 1.55 | | |

Weight limit: 11 pounds.
Customs declarations: 1 Form 2966.
Dispatch note: No.
Parcel-post sticker: 1 Form 2922.
Sealing: Insured parcels must, and ordinary parcels may, be sealed.
Group shipments: Limited to ordinary parcels. (See § 127.79.)
Registration: No.
Insurance: Yes.
C. o. d.: No.

(2) *Indemnity.* See subparagraph (4) of this paragraph.

(3) *Dimensions.* Greatest combined length and girth, 6 feet. Greatest length 3½ feet, except that parcels may measure up to 4 feet in length, on condition that parcels over 42 and not over 44 inches in length do not exceed 24 inches in girth, parcels over 44 and not over 46 inches in length do not exceed 20 inches in girth, and parcels over 46 inches and up to 4 feet in length do not exceed 16 inches in girth.

(4) *Insurance.* (i) Parcel post packages may be insured subject to the following limits of indemnity when prepaid at the postage rate applicable in addition to the insurance fees mentioned hereunder:

| Limit of indemnity: | Fee, cents |
|---|---|
| Not over $10 | 20 |
| From $10.01 to $25 | 25 |
| From $25.01 to $50 | 35 |
| From $50.01 to $100 | 55 |
| From $100.01 to $165 | 60 |

(ii) Each insured parcel shall have printed on the wrapper, in close proximity to (preferably immediately below) the endorsement "Insured" and the insurance number, the amount for which the parcel is insured. This indication shall be shown in arabic figures and in roman letters spelled out in full, in both United States currency and in gold francs, as per the following example:

Insured Value
$25.75 (U. S.)
Twenty-five Dollars and Seventy-five Cents
77.25 Gold Francs
Seventy-seven Gold Francs and Twenty-five Centimes

(iii) See § 127.143 (b), as to method of converting United States currency into gold francs.

(iv) Parcels containing coin, platinum, gold, or silver (whether manufactured or unmanufactured), precious stones, jewels, or other precious articles must be insured.

(v) In the case of parcels for the Tokelau (or Union) Group, indemnity is effective only as far as Apia, Western Samoa, and no indemnity will be paid for loss, rifling, or damage occurring to such parcels after they leave Apia.

(vi) For general information concerning insurance service, see §§ 127.140 to 127.148.

(5) *Observations.* All imported goods sold, offered for sale, or distributed as advertising matter, which bear any name or trade-mark that might lead the purchaser or receiver to assume they are British products must bear an indication of origin.

(6) *Prohibitions.* Same as New Zealand.

(7) *Import restrictions.* Addressees may be required to obtain import licenses in some cases.

§ 127.380 *Windward Islands (Dominica, Grenada, The Grenadines, St. Lucia, and St. Vincent)*—(a) *Postal Union mails*—(1) *Classifications, rates, weight limits and dimensions.* See Table No. 1. in § 127.1. Small packets accepted. (See § 127.10.)

(2) *Registration.* Fee, 55 cents. (See §§ 127.130–127.139.)

(3) *Indemnity.* See Subpart E of this part.

(4) *Special delivery.* No service.

(5) *Air mail service.* Postage rate, 10 cents per half ounce. Air letter sheets, 10 cents each. (See § 127.20.)

(6) *Dutiable articles (merchandise) prepaid at letter rate.* Accepted. (See (See § 127.3.)

(7) *Observations.* Addressees in Dominica and Saint Vincent must obtain import licenses in order to receive merchandise.

(8) *Prohibitions.* The articles prohibited or restricted to the various islands as parcel post are also prohibited or restricted in the Postal Union mails.

(i) *Dominica, Grenada and Grenadines.* (*a*) False or counterfeit money. Fictitious postage stamps. Coins.

(*b*) Parasites and predators of injurious insects, intended for the control of those insects and exchanged between officially recognized institutions, are admitted in the form of samples only.

(ii) *St. Lucia.* Coins. Bees and silkworms. Articles violating the copyright laws. Articles bearing false trade-marks. Shaving brushes from Japan. Tobacco extracts, essences, or other concentrations or mixtures with tobacco base. Detached stems from tobacco leaves, manufactured or not, and powder therefrom, unless mixed with substances which render them unsuitable for any use except industry and horticulture.

(iii) *St. Vincent.* (*a*) Coins. Tobacco and cigarettes in parcels weighing over 11 pounds. Cigars in quantities greater than 3 pounds. (Smaller amounts may be imported for personal use, but not for sale.)

(*b*) Parasites and predators of injurious insects, intended for the control of those insects, and exchanged between officially recognized institutions, are admitted in the form of samples only.

(b) *Parcel post*—(1) *Table of rates*—(i) *Surface parcel rates.*

| Pounds | Rate | Pounds | Rate |
|---|---|---|---|
| 1 | $0.45 | 12 | $2.87 |
| 2 | .67 | 13 | 3.09 |
| 3 | .89 | 14 | 3.31 |
| 4 | 1.11 | 15 | 3.53 |
| 5 | 1.33 | 16 | 3.75 |
| 6 | 1.55 | 17 | 3.97 |
| 7 | 1.77 | 18 | 4.19 |
| 8 | 1.99 | 19 | 4.41 |
| 9 | 2.21 | 20 | 4.63 |
| 10 | 2.43 | 21 | 4.85 |
| 11 | 2.65 | 22 | 5.07 |

Weight limit: 22 pounds.
Customs declarations: 1 Form 2966.
Dispatch note: No.
Parcel-post sticker: 1 Form 2922.
Sealing: Insured parcels must, and ordinary parcels may, be sealed.
Group shipments: Limited to ordinary parcels. (See § 127.79.)
Registration: No.
Insurance: Yes.
C. o. d.: No.

(2) *Indemnity.* See subparagraph (4) of this paragraph.

(3) *Dimensions.* Greatest length, 3½ feet. Greatest length and girth combined, 6 feet.

(4) *Insurance.* (i) Parcel post packages may be insured subject to the following limits of indemnity when prepaid at the postage rate applicable in addition to the fees mentioned hereunder:

| Limit of Indemnity: | *Fee, cents* |
|---|---|
| Not over $10 | 20 |
| From $10.01 to $25 | 25 |
| From $25.01 to $50 | 35 |
| From $50.01 to $100 | 55 |

(ii) Each insured parcel shall have printed on the wrapper, in close proximity to (preferably immediately below) the endorsement "INSURED" and the insurance number, the amount for which the parcel is insured. This indication shall be shown in United States currency (figures only), as per the following example:

Insured Value
$35.50

(iii) Parcels which contain coin, bullion, jewelry, or any other precious article must be insured.

(iv) For general information concerning insurance service, see §§ 127.140 to 127.143.

(5) *Observations.* (i) The outer receptacle of a parcel containing liquids must be of strong wood or metal.

(ii) Every parcel containing jewelry or any other precious articles exceeding $500 in value must be packed in a box measuring not less than 2 feet 6 inches in length and girth combined.

(6) *Prohibitions.* (i) Certain plants and plant products are prohibited from importation or are admitted under restrictions. Interested patrons may be informed that information can be obtained from the Bureau of Entomology and Plant Quarantine, Department of Agriculture, Washington 25, D. C., or from one of the offices of that Bureau located at principal ports of entry.

(ii) The following specific prohibitions apply to the various islands indicated:

(*a*) *Grenada and Grenadines.* (*1*) Shaving brushes from Japan.

(*2*) Articles of gold and silver of foreign manufacture bearing imitations of British assay marks, and such articles whose fineness is lower than that indicated by the marks.

(*3*) Goods of foreign manufacture bearing a name or trade-mark of a manufacturer or merchant in the United Kingdom which are not accompanied by an exact indication of the country of origin.

(*b*) *St. Lucia.* Solid rubber tires for automobiles; lemenone and similar oils.

(*c*) *St. Vincent.* Firearms are admitted only if the importer has obtained a license.

(*c*) *Dominica.* Arms require a permit from the Governor for importation.

(*7*) *Import restrictions.* Addresses may be required to obtain import licenses in some cases.

§ 127.381 *Yemen*—(a) *Postal Union mails*—(1) *Classifications, rates, weight limits and dimensions.* See Table No. 1, in § 127.1. Small packets accepted. (See § 127.10.)

(2) *Registration.* Fee, 55 cents. (See §§ 127.130–127.139.)

(3) *Indemnity.* See Subpart E of this part.

(4) *Special delivery.* No service.

(5) *Air mail service.* Postage rate, 25 cents per half ounce. Air letter sheets, 10 cents each. (See § 127.20.)

(6) *Dutiable articles (merchandise) prepaid at letter rate.* Accepted. (See § 127.3.)

(7) *Prohibitions.* Books, prints, and cards contrary to the Islamic faith.

(b) *Parcel post.* No service.

§ 127.382 *Yugoslavia*—(a) *Postal Union mails*—(1) *Classifications, rates, weight limits and dimensions.* See Table No. 1, in § 127.1. Small packets accepted. (See § 127.10.)

(2) *Registration.* Fee, 55 cents. (See §§ 127.130–127.139.)

(3) *Indemnity.* See Subpart E of this part.

(4) *Special delivery.* Yes. (See § 127.19.)

(5) *Air mail service.* Postage rates: Letters, letter packages, and post cards, 15 cents per half ounce. Air letter sheets, 10 cents each. Other Postal Union articles, 43 cents for the first 2 ounces and 22 cents for each additional 2 ounces. (See § 127.20.)

(6) *Dutiable articles (merchandise) prepaid at letter rate.* Accepted. (See § 127.3.)

(7) *Observations.* (i) Postal Union articles containing merchandise sent for commercial purposes must be accompanied by the original invoice in the same manner as indicated for parcel post in paragraph (b) (6) of this section.

(ii) The Postal Administration of Yugoslavia suggests that specimens, 12 centimeters long and 12 centimeters wide, of the fabrics used in made-up garments accompany each shipment in order that the rate of customs duties applicable to the particular material may be assessed at the time of delivery, otherwise the maximum rate will be imposed in the event that the addressee refuses to permit the customs officials to cut a piece for examination purposes.

(iii) Books, newspapers, and other printed matter for distribution in Yugoslavia are admitted when addressed to distributors authorized by the Yugoslav Ministry of Internal Affairs. Small individual shipments are exempt from that requirement.

(iv) Printed matter whose contents may be contrary to national interest or public morals in Yugoslavia may be confiscated by court action, and repeatedly offending publications may be permanently prohibited from importation.

(v) Gold, silver, and platinum watchcases are to be submitted to analysis and stamping only if they are complete, whether mounted or not. If parcels received from abroad do not contain complete cases, but only detached pieces, such parcels will be delivered to the addressees only after the arrival of the other parts so as to permit of the complete stamping of the cases, after which the analysis and stamping of the metal will be undertaken. If within a reasonable period the other pieces of the watchcases do not arrive, the incomplete parts having already arrived will be returned to the sender.

(8) *Prohibitions.* (i) Advertisements and articles relating to the "snowball" system of selling.

(ii) Various tokens which by their dimensions and color, resemble money of the State.

(iii) Emigration advertisements.

(iv) The importation of postage stamps is restricted in accordance with Yugoslav regulations. Persons desiring to send stamps should consult the addressees to assure compliance with those regulations.

(v) The articles prohibited or restricted as parcel post are also prohibited or restricted in the Postal Union mails.

(b) *Parcel post*—(1) *Table of rates*—(i) *Surface parcel rates, including surcharges.*

| *Pounds* | *Rate* | *Pounds* | *Rate* |

Each air parcel must have affixed the blue Par Avion label (Form 2978). (See § 127.55 (b).)

Weight limit: 44 pounds.
Customs declarations: 1 Form 2966.
Dispatch note: No.
Parcel-post sticker: 1 Form 2922.
Sealing: Insured parcels must, and ordinary parcels may, be sealed.
Group shipments: Limited to ordinary parcels. (See § 127.79.)
Registration: No.
Insurance: Yes.
C. o. d.: No.

(2) *Indemnity.* See subparagraph (5) of this paragraph.

(3) *Dimensions.* Greatest combined length and girth, 6 feet. Greatest length, 3½ feet, except that parcels may measure up to 4 feet in length, on condition that parcels over 42 and not over 44 inches in length do not exceed 24 inches in girth, parcels over 44 but not over 46 inches in length do not exceed 20 inches in girth, and parcels over 46 inches and up to 4 feet in length do not exceed 16 inches in girth.

(4) *Storage charges.* See § 127.96, relative to storage charges on returned parcels.

(5) *Insurance.* (i) Parcel post packages may be insured subject to the following limits of indemnity when prepaid at the postage rate applicable in addition to the insurance fees mentioned hereunder:

| Limit of Indemnity: | *Fee, cents* |
|---|---|
| Not over $10 | 20 |
| From $10.01 to $25 | 25 |
| From $25.01 to $50 | 35 |
| From $50.01 to $100 | 55 |
| From $100.01 to $105 | 60 |

(ii) Each insured parcel shall have printed on the wrapper, in close proximity to (preferably immediately below) the endorsement "INSURED" and the insurance number, the amount for which the parcel is insured. This indication shall be shown in arabic figures and in roman letters spelled out in full, in both United States currency and in gold francs, as per the following example:

Insured Value
$25.75 (U. S.)
Twenty-five Dollars and Seventy-five Cents
77.25 Gold Francs
Seventy-seven Gold Francs and Twenty-five Centimes

(iii) See § 127.143 (b), as to method of converting United States currency into gold francs.

(iv) Parcels containing coin, bank notes, currency notes or any kind of securities payable to bearer; platinum, gold, or silver, whether manufactured or not; precious stones, jewelry, or other precious articles must be insured.

(v) For general information concerning insurance service, see §§ 127.140–127.148, inclusive.

(6) *Observations*—(i) Gift parcels to be admitted free in Yugoslavia may not exceed 11 pounds in weight or 10,000 dinars (about $33) in value, and the contents must consist solely of articles designated as duty free by the Yugoslav authorities. Interested mailers can obtain further information from the Office of International Trade, Department of Commerce, Washington 25, D. C., or any field office of that Department. Gift parcels even when duty free are subject to a delivery fee of 200 dinars in Yugoslavia. It is suggested that gift parcels be marked "Gift (Poklon)."

(ii) Parcels containing merchandise sent for commercial purposes, for which the senders are to receive payment, must be accompanied by the original invoice. Packages not accompanied by the original invoice will be cleared through the customs in Yugoslavia and delivered to the addressees, but the latter will be unable to make payment to the sender for the merchandise involved, since the Yugoslav authorities will grant the means for payment only if packages are accompanied by the original invoice. Senders should endorse the wrappers of such packages to indicate that the original invoice is enclosed.

(iii) It shall be recommended to senders that, in order to facilitate customs handling, a copy of the ordinary invoice, signed by the senders, be transmitted to the addressees by letter mail, giving notice of the mailing of the parcels. The invoice copy is submitted by the addressees to the customs authorities and serves as a basis for collecting the import duties.

(iv) Certificates of origin shall be furnished for parcels addressed for delivery in Yugoslavia. However, in lieu thereof, it is permissible for senders to indicate on the customs declarations of their parcels the country of origin of the merchandise contained therein, the said indication taking the place of the certificate of origin so far as the Yugoslav customs authorities are concerned.

(v) Parcels not accompanied by certificates of origin or whose customs declarations do not bear an indication of the country of origin of the merchandise contained in the parcel will be assessed with duty at the maximum rate.

(vi) The Postal Administration of Yugoslavia suggests that specimens, 12 centimeters long and 12 centimeters wide, of the fabrics used in made-up garments accompany each shipment in order that the rate of customs duties applicable to the particular material may be assessed at the time of delivery, otherwise the maximum rate will be imposed in the event that the addressee refuses to permit the customs official to cut a piece for examination purposes.

(vii) Gold, silver, and platinum watchcases are to be submitted to analysis and stamping only if they are complete, whether mounted or not. If parcels received from abroad do not contain complete cases, but only detached pieces, such parcels will be delivered to the addressees only after the arrival of the other parts so as to permit of the complete stamping of the cases, after which the analysis and stamping of the metal will be undertaken. If within a reasonable period, the other pieces of the watchcases do not arrive, the incomplete parts having already arrived will be returned to the sender.

(7) *Prohibitions*—(i) *For reasons of public safety.* (*a*) Newspapers, magazines, pamphlets, books, and other prints in general whose circulation is prohibited.

(*b*) Hunting arms, but not those in use in the Army; empty cartridges and projectiles for those arms.

(*c*) Wireless and telegraph and telephone apparatus.

(*d*) Lithographic copies of plans, except those on the scale of 1: 25,000 and below.

(ii) *For reasons of sanitary policy.* (*a*) Concentrated acetic acid having a strength of over 15 per cent.

(*b*) Grains and fruits.

(*c*) Serums and vaccines for veterinary use.

(*d*) Adulterated and dangerous foodstuffs.

(iii) *For the protection of plants or animals.* (*a*) Poisonous herbs for fishing.

(*b*) The exotic nut "acajou" (cashew nut).

(c) Special authorization is required for the importation of silkworm eggs; grapevines, plants and cuttings, with or without roots; enological preparations and means for combating diseases of grapevines and fruit trees; meats.

(iv) *Arms, munitions, etc.* (a) All kinds of firearms used in the Army and their detached parts.

(b) Playing cards made of metal.

(c) Foreign military uniforms.

(v) *State monopolies, etc.* (a) All articles placed under the regime of the monopoly. Tobacco seed and plants destined for reproduction or transplanting.

(b) Valid dinars. If found in the mails they will be confiscated and deposited in blocked accounts in the National Bank of Yugoslavia, which will credit the confiscated sums to the interested parties only after a certain delay.

(vi) *For other reasons.* (a) Foreign merchandise in general bearing any marks indicating Yugoslav origin.

(b) Samples of medicines, unless addressed to national or provincial hospitals, university clinics, or national medical institutions.

(8) *Import restrictions.* Commercial shipments may be received only by licensed importing firms in Yugoslavia.

§ 127.383 *Zanzibar and Pemba*—(a) *Postal Union mails*—(1) *Classifications, rates, weight limits and dimensions.* See Table No. 1, in § 127.1. Small packets accepted. (See § 127.10.)

(2) *Registration.* Fee 55 cents. (See §§ 127.130–127.139.

(3) *Indemnity.* See Subpart E of this part.

(4) *Special delivery.* No service.

(5) *Air mail service.* Postage, 25 cents per half ounce. Air letter sheets, 10 cents each. (See § 127.20.)

(6) *Dutiable articles (merchandise) prepaid at letter rate.* Accepted. (See § 127.3.)

(7) *Prohibitions.* (i) Coins, manufactured and unmanufactured platinum, gold and silver, precious stones, jewelry, and other precious articles.

(ii) Parasites and predators of injurious insects, intended for the control of those insects and exchanged between officially recognized institutions, are admitted in the form of samples only.

(iii) The articles prohibited or restricted as parcel post are also prohibited or restricted in the Postal Union mails.

(b) *Parcel post*—(1) *Table of rates*—(i) *Surface parcel rates, including transit charges and surcharges.*

| Pounds | Rate | Pounds | Rate |
|---|---|---|---|
| 1 | $1 01 | 7 | $2 75 |
| 2 | 1 23 | 8 | 3 30 |
| 3 | 1 52 | 9 | 3 52 |
| 4 | 2 09 | 10 | 3 74 |
| 5 | 2 31 | 11 | 3 96 |
| 6 | 2 53 | | |

Weight limit: 11 pounds.
Customs declarations: 1 Form 2966.
Dispatch note: No.
Parcel-post sticker: 1 Form 2922.
Sealing: Optional.
Group shipments: No.
Registration: No.
Insurance: No.
C. o. d.: No.

(2) *Indemnity.* No provision.

(3) *Dimensions.* Greatest length, 3½ feet. Greatest length and girth combined, 6 feet.

(4) *Observations.* Parcels may be accepted for any place in the Zanzibar Protectorate, including Pemba; but delivery is confined to the town of Zanzibar and to Chaki-Chaki and Weti in the island of Pemba; and the addressees of parcels for other places in the Protectorate must arrange accordingly.

(5) *Prohibitions*—(i) *For sanitary reasons.* (a) Shaving brushes, tooth brushes, and other brushes for body use, manufactured in or exported from Japan.

(b) Condensed milk containing less than nine percent of butter fat.

(c) Exhausted tea.

(ii) *Arms, etc.* All arms or parts of arms, except under permit of the British Resident or person authorized by him.

(iii) *For other reasons.* (a) Manufactured articles bearing names, addresses, trademarks or names of places intended to give the false impression that they are British products.

(b) Any coins not of the legal standard of weight or fineness.

(c) Imitation paper money or coins.

(6) *Import restrictions.* Addressees may be required to obtain import licenses in some cases.

[SEAL] ROSS RIZLEY,
*Solicitor.*

## TITLE 12—BANKS AND BANKING

### Chapter II—Federal Reserve System

#### Subchapter A—Board of Governors of the Federal Reserve System

[Reg. F]

#### PART 206—TRUST POWERS OF NATIONAL BANKS

#### INTERNAL AUDITS OF TRUST DEPARTMENT

§ 206.111 *Internal audits of trust department.* (a) The Board of Governors has been requested for an interpretation of the language contained in § 206.8 that a committee of directors shall "at least once during each period of twelve months" make or have made an audit of the trust department of each national bank.

(b) The specific question is whether this provision means that such audits must be made at intervals of not more than twelve months or may be made at least once during each calendar year.

(c) The language "at least once during each period of twelve months" also appears in paragraph (c) of § 206.6 relating to the review of trust assets by trust investment committees, and in paragraph (c) (3) of § 206.17 relating to audits of common trust funds. It is the Board's opinion that the correct interpretation of this language in each instance is that not more than twelve months shall elapse without the required action being taken.

(Sec. 11 (i), 38 Stat. 262; 12 U. S. C. 248 (i). Interpret or apply secs. 2–4, 24 Stat. 18, 19, sec. 1, 40 Stat. 1043, as amended, sec. 1, 44 Stat. 1225, as amended, sec. 11 (k), 38 Stat. 261, as amended, 53 Stat. 68, as amended. 12 U. S. C. 30-33, 34 (a), 248 (k), 26 U. S. C. 169)

BOARD OF GOVERNORS OF THE FEDERAL RESERVE SYSTEM,
[SEAL] S. R. CARPENTER,
*Secretary.*

[F. R. Doc. 53-10465; Filed Dec. 16, 1953; 8:46 a. m.]

## TITLE 38—PENSIONS, BONUSES, AND VETERANS' RELIEF

### Chapter I—Veterans' Administration

#### PART 36—SERVICEMEN'S READJUSTMENT ACT OF 1944

#### SUBPART A—TITLE III; LOAN GUARANTY

#### PROVISIONAL REGULATIONS

Immediately below § 36.4324 add the centerhead "Provisional Regulations" and insert new § 36.4901.

§ 36.4901 *Suspension of lenders from loan guaranty activities—Notice of suspension.* (1) Whenever the regional manager is of the opinion from available facts and evidence, that any lender or holder should be suspended from making or acquiring loans guaranteed or insured by the Veterans' Administration he shall submit such facts and evidence, together with his recommendations, to the Deputy Administrator for Veterans Benefits (hereinafter referred to as the Deputy Administrator) and await instructions before proceeding further.

(2) If the Deputy Administrator concurs in the manager's recommendation that a lender or holder be suspended and so advises the manager, formal notice of such suspension, in form approved by the chief attorney, shall be given by letter signed by the manager, which shall be dispatched to the lender or holder concerned by registered mail. The notice will advise the lender or holder in substance of the facts and circumstances which have resulted in the suspension action. This advice will be in the form of a specification of the section or sections of the act or regulations which have been violated by the lender or holder and shall set forth certain of those instances or cases wherein the acts of omission or commission by the lender are considered to be in violation of the act or regulations or both. A complete listing of all such cases known to the Veterans' Administration will not be necessary if there are many. The letter transmitting the suspension notice will inform the lender or holder that on and after a date designated to coincide with the probable date of receipt of the notice, it will be barred from obtaining the guaranty or insurance on loans except as to those types of cases which may otherwise be provided for in the notice of suspension, e. g., loans as to which the Veterans' Administration has issued Certificates of Commitment and which are determined to be eligible for guaranty (or insurance), in all respects. Loans upon which the Veterans' Administration has issued Certificates of Commitment prior to the effective date of the suspension may and ordinarily should be approved by the Veterans' Administration for guaranty or insurance after the date of the suspension if the loan is otherwise entitled to evidence of guaranty or insurance under Veterans' Administration Regulations. The lender or holder will also be advised that it is barred from acquiring loans by assignment or otherwise after the date of suspension unless acceptable evidence is produced that such acquisition was pursuant to a prior contract to take such loans and the suspension would thereby be prejudicial to a veteran or to an original lender; and that if a claim should arise on any loan acquired contrary to the foregoing notice, the Administrator would be precluded, in the absence of release of such suspension, from paying the claim or any part thereof. The notice will also advise the lender or holder of his right then or thereafter to request a hearing. A copy of the notice of suspension will be forwarded to the Deputy Administrator.

(3) The suspension of a firm, company, corporation, partnership, or other institution will be effective as to its agents, representatives, or correspondents when acting for or on behalf of the suspended lender or holder.

(b) *Application for hearing.* (1) The lender or holder may, after receipt of the notice of suspension, apply for a hearing at which it shall be afforded full opportunity to introduce evidence showing why such suspension should be terminated or modified. Upon receipt of a request for a hearing the manager will advise the Deputy Administrator of such request, the date thereof, and ask that a hearing board be appointed, or set forth his contrary recommendations, stating such facts as may bear upon the proper action for the central office to take in the circumstances. Upon receipt of the request for appointment of a hearing board the Deputy Administrator will appoint the members of the hearing board from available Veterans' Administration officers, selected preferably from offices other than that from which the suspension originated, and will advise the manager concerned of the names of the members and a period of time during which they will be available for such service. The manager will arrange a date, agreeable to the lender or holder involved and falling within the period during which the hearing board members will be available. The Deputy Administrator will be advised of the date finally established for the hearing and the place where such hearing will be conducted, and will arrange to have the members of the board available at the specified time and place. The lender or holder will be officially advised by the manager of the time and place for the hearing, said notice to be given at least 10 days prior to the date set for the hearing. The hearing date established by the manager will be within 60 days of the receipt of the lender or holder's request for such hearing, except that the manager shall postpone the hearing beyond such 60-day period for any of the following reasons:

(i) The lender or holder requests postponement and presents a reasonable basis for such request;

(ii) The Veterans' Administration requires additional time to conclude its investigation of all pertinent activities of the lender or holder in connection with the charges.

(2) In cases which have been or shall have been referred to a United States Attorney or the Department of Justice for consideration of criminal prosecution or in cases in which criminal prosecution has been initiated but has not been concluded, the manager will not fix a time and place for a hearing until advised by the chief attorney or the General Counsel whether the United States Attorney or the Department of Justice, as the case may be, has any objection to a hearing in the particular case. In the event that an objection to a hearing is made by the United States Attorney, the chief attorney will report the facts to the General Counsel who will consider the matter and render such advice as he considers appropriate under the circumstances of the particular case.

(c) *Hearing board.* One member of the board will be designated chairman of the board by the Deputy Administrator, which member shall have the authority to administer oaths or affirmations. The hearing board shall receive evidence of the charges made against the lender or holder. In this regard it is incumbent upon the manager to make known to the chief attorney all of the facts and circumstances which constituted the basis of his suspension of the lender or holder to the end that those facts and circumstances are introduced into the record by means of a stipulation between the lender or holder and the Veterans' Administration or by direct testimony. The lender or holder shall have the right to appear and participate in such hearing in person or by counsel or other representative of his choice and to introduce such evidence on his behalf as may be proper. Such hearing may be open or closed to the public, in line with the preference of the suspended person, unless it is determined by a majority of the members of the hearing board that the public interest requires the contrary. Representatives of any other agency or department of the Government that may be interested shall be allowed to attend. A transcript of evidence adduced before such board will be made and upon request of the lender or holder concerned a copy thereof shall be furnished to such party. Upon the conclusion of the hearing and the receipt of such other evidence as the board deems appropriate, the board will make findings of fact and recommendations to the Deputy Administrator as to the appropriate action to be taken in the case; that is, the hearing board will determine and recommend whether the suspension as originally imposed by the notice of suspension should be confirmed, reduced, lengthened, or terminated, and what terms and conditions, if any, should be imposed for the termination of the suspension. The board shall notify the lender or holder in writing of the board's findings of fact and its recommendations to the Deputy Administrator and the lender or holder will have 14 days from the date of such notification in which to file with the Deputy Administrator a brief of either, or both, facts and law.

(d) *Review and decision.* Upon receipt of the transcript of the hearing and the recommendations of the hearing board, and the brief of the lender or holder if one is filed, the Deputy Administrator will cause the same to be reviewed and on the basis of such review shall make a determination in the case; i. e., whether the suspension as originally imposed upon the lender or holder is confirmed, reduced, lengthened, or terminated, and what terms and conditions, if any, are imposed for the termination of the suspension. Notice of such decision shall be given to such lender or holder by registered mail addressed to the lender or holder at his usual place of business or addressed to his attorney of record. The lender or holder shall have the right to appeal such decision within 30 days from the date thereof. Such appeal shall be addressed to the Administrator of Veterans Affairs and may be in letter form, accompanied by such supporting brief of facts and law as the lender or holder may desire to submit, except that facts not brought out in the hearing shall not be considered. Upon receipt of the lender's or holder's appeal the Administrator of Veterans Affairs shall request the Deputy Administrator to deliver to him the entire file on the case and on the basis of such file, together with such brief as the lender or holder may have submitted, shall consider the soundness of the decision rendered by the Deputy Administrator and the Administrator shall proceed to render a final decision. Advice of such decision will be furnished the lender or holder by registered mail.

(Sec. 504, 58 Stat. 293, as amended, 38 U. S. C. 694d)

This regulation is effective December 17, 1953.

[SEAL] H. V. STIRLING,
*Deputy Administrator.*

[F. R. Doc. 53-10552; Filed, Dec. 16, 1953; 8:52 a. m.]

## TITLE 15—COMMERCE AND FOREIGN TRADE

### Chapter III—Bureau of Foreign Commerce, Department of Commerce

#### Subchapter B—Export Regulations

[6th General Rev. of Export Regs., Amdt. 76[1]]

#### PART 370—SCOPE OF EXPORT CONTROL BY DEPARTMENT OF COMMERCE

#### PART 373—LICENSING POLICIES AND RELATED SPECIAL PROVISIONS

#### PART 380—AMENDMENTS, EXTENSIONS, TRANSFERS

#### PART 384—GENERAL ORDERS

#### MISCELLANEOUS AMENDMENTS

1. Section 370.1 *Definitions* is amended in the following particulars:

[1] This amendment was published in Current Export Bulletin No. 720, dated December 10, 1953, and in the reprint pages, dated December 10, 1953.

a. The unnumbered introductory sentence is amended to read as follows: "When used in the export regulation:".

b. Paragraph (c) *Export control law* is amended to read as follows:

(c) *Export control law and export regulations.* (1) "Export control law" means Export Control Act of 1949, as amended, and includes section 6 of the act of July 2, 1940, 54 Stat. 714, as amended.

(2) "Export regulations" refers to and means the regulations set forth in Parts 368 to 399, inclusive, of this chapter.

c. In paragraph (j) *General license* the words "in the export regulations" are substituted for the words "in Parts 370 to 399, inclusive".

2. Section 373.71 *Supplement 1; Time schedules for submission of applications for licenses to export certain Positive List commodities* is amended to read as follows:

TIME SCHEDULE FOR SUBMISSION OF APPLICATIONS FOR LICENSES TO EXPORT CERTAIN POSITIVE LIST COMMODITIES

| Dept. of Commerce Schedule B No. | Commodity | Submission dates | |
|---|---|---|---|
| | | Fourth quarter, 1953 | First quarter, 1954 |
| 61910 | Selenium powder | Sept. 14–Sept. 28, 1953 | Nov. 30–Dec. 14, 1953 |
| 61920 | Selenium metal | | |
| 85770 | Selenium salts of organic compounds | | |
| 85780 | Selenium salts and compounds, including selenium dioxide | Sept. 14–Sept. 28, 1953 | Dec. 16–Dec. 31, 1953 |
| 85790 | Selenium-containing pigments | | |

[1] Applications for licenses to export commodities for which no specified filing dates are announced may be submitted at any times. (See § 372.3 (a) of this subchapter.) Export applications for commodities requiring a validated license which moving in transit through the United States may be submitted at any time and are not subject to specified filing dates (see § 372.4 of this subchapter).

3. In § 380.2 *Amendments or alterations of licenses* paragraph (f) (3) *Amendment requests on which field offices may not take action,* subdivisions (v) and (vi) are renumbered (iii) and (iv), respectively.

4. Section 384.8 *Orders modifying validity of certain export licenses* paragraph (e) *Extension of validity period of licenses outstanding on April 9, 1953* is deleted.

This amendment shall become effective as of December 10, 1953, except for Item 3 which shall become effective as of December 3, 1953.

(Sec. 3, 63 Stat. 7; 65 Stat. 43; 67 Stat. 62; 50 U. S. C. App. Sup. 2023. E. O. 9630, Sept. 27, 1945, 10 F. R. 12245, 3 CFR, 1945 Supp.; E. O. 9919, Jan. 3, 1948, 13 F. R. 59, 3 CFR, 1948 Supp.)

## TITLE 49—TRANSPORTATION

### Chapter I—Interstate Commerce Commission

Subchapter B—Carriers by Motor Vehicle

PART 211—SCOPE OF OPERATING AUTHORITY: ROUTES

USE OF TURNER TURNPIKE (AN OKLAHOMA TOLL HIGHWAY) BY COMMON AND CONTRACT MOTOR CARRIERS AUTHORIZED TO OPERATE OVER PARALLEL HIGHWAY (U. S. 66)

At a session of the Interstate Commerce Commission, Division 5, held at its office in Washington, D. C., on the 7th day of December A. D. 1953.

It appearing, that the order of the Commission, Division 5, dated January 7, 1953, authorizing the use of Turner Turnpike as an alternate route by common and contract motor carriers holding authority from this Commission to operate over U. S. Highway 66 between Tulsa and Oklahoma City, Okla., through inadvertence was designated as § 211.6, and so appeared at page 321 of the January 15, 1953, issue of the FEDERAL REGISTER (18 F. R. 321), rather than § 211.7 as was intended; therefore,

*It is ordered,* That the referred-to order of January 7, 1953, be, and it is hereby, redesignated as § 211.7.

(49 Stat. 546, as amended; 49 U. S. C. 304. Interprets or applies 49 Stat. 552, as amended; 553, as amended; 49 U. S. C. 308, 309)

By the Commission, Division 5.

[SEAL] GEORGE W. LAIRD,
*Secretary.*

# PROPOSED RULE MAKING

## DEPARTMENT OF AGRICULTURE

### Production and Marketing Administration

[ 7 CFR Part 927 ]

[Docket No. AO-71-A-28]

HANDLING OF MILK IN NEW YORK METROPOLITAN MARKETING AREA

DECISION WITH RESPECT TO PROPOSED MARKETING AGREEMENT, AND TO PROPOSED ORDER AMENDING ORDER, AS AMENDED

Pursuant to the provisions of the Agricultural Marketing Agreement Act of 1937, as amended (7 U. S. C. 601 et seq.), and the applicable rules of practice and procedure, as amended, governing the formulation of marketing agreements and marketing orders (7 CFR, Part 900), a public hearing was conducted at Elmira, New York on March 10–13, April 20–24, and April 28–May 1; at Malone, New York on March 18; at Ogdensburg, New York on March 19; at Watertown, New York on March 20; and at New York City on May 5 and 6, all in 1953, pursuant to notices thereof issued on January 8, 1953 (18 F. R. 256), and February 27, 1953 (18 F. R. 1249).

The material issues presented on the record of the hearing relate to:

1. Provisions of the order applicable to milk and milk products entering the marketing area either from unrevealed sources or from sources not fully subject to the pricing and equalization provisions of the order.

2. The pricing and pooling of milk received on bulk farm tank pickup routes.

3. Definition of a plant and related duties of the market administrator.

4. Verification of the payment of minimum class prices to cooperative associations.

5. Extension of time allowed for establishing that cream has not entered the marketing area.

6. Elimination of requirement for submission of a signed statement of non-pool plant operators in connection with handler reports of utilization.

7. Procedure for assignment of pool and non-pool milk.

8. The territory within which milk and cream may be classified at plants other than those from which it is shipped.

9. Skim milk to which the fluid skim differential should be applied and the amount of the differential.

10. The classification and pricing of milk for fluid use outside the marketing area.

11. Revision of provisions for the designation of plants at which the handling of milk is fully subject to the pricing and equalization provisions of the order.

12. The revision of transportation and location differentials applicable both to minimum class prices paid by handlers and to the uniform price paid to producers.

The findings and conclusions hereinafter set forth relate only to the above listed issues numbered 1 through 10 and are based upon the evidence in the record of the hearing. Findings and conclusions concerning the remaining issues (numbered 11 and 12), and also concerning a portion of Issue No. 10, are deferred pending further consideration.

Upon the basis of the evidence introduced at the hearing and the record thereof the Assistant Administrator, Production and Marketing Administration, on September 15, 1953, filed with the Hearing Clerk, United States Department of Agriculture his recommended decision and opportunity to file written exceptions thereto, which was published in the FEDERAL REGISTER on September 18, 1953 (18 F. R. 5595). Within the period reserved therefor, interested parties filed exceptions to certain of the findings, conclusions and actions recommended by the Assistant Administrator. In arriving at the findings, conclusions, and regulatory provisions of this decision, each of such exceptions was carefully and fully considered in conjunction with the record evidence pertaining thereto. Certain of the findings and conclusions contained in the recommended decision have been modified after consideration of the exceptions filed.

*Rulings.* To the extent that findings, conclusions and actions decided upon herein are at variance with any of the exceptions filed to the recommended decision, such exceptions are overruled. Rulings contained in the recommended decision upon proposed findings and conclusions submitted by interested persons are affirmed except as modified by the findings and conclusions set forth herein. To the extent that findings and conclusions proposed by interested persons and not ruled upon in the recommended decision are inconsistent with the findings and conclusions contained herein, the specific or implied requests to make such findings and reach such conclusions are denied on the basis of the facts found and stated in connection with the conclusions herein set forth.

On May 14 and 19, 1953, public announcements were made by officials of the United States Department of Agriculture and the New York State Department of Agriculture and Markets to the effect that a committee was being appointed to study and make recommendations with respect to current problems in the New York milkshed, including the subject matter of Issues 11 and 12. The announcements also stated that judgment was being deferred temporarily on the procedure to be followed on the problem of pricing milk sold outside the marketing area (Issue No. 10).

Interested parties thereafter filed motions requesting that the issues which had been referred to the committee be severed from the remaining issues considered at the hearing; that no action be taken with respect to such severed issues until the committee had reported; that the hearing be reopened following such report; and that the briefing time with respect to such issues be extended accordingly. The motions also requested similar handling of Issue No. 10 pending further clarification of the procedure to be followed concerning such issue.

On May 28, 1953 (18 F. R. 3174) the Presiding Officer granted an indefinite extension of time to file briefs on the issues referred to the committee (Issues 11 and 12) but denied an extension of briefing time with respect to the issue dealing with the pricing of milk sold outside the marketing area (Issue No. 10). All other requests in the motions were referred by the Presiding Officer to the Secretary and were thereafter referred by the Secretary to the Assistant Administrator.

On September 21, 1953 that portion of Issue No. 10 on which decision is being deferred at this time was referred for study and recommendations to the same milkshed committee, above mentioned, to which the subject matter of Issues 11 and 12 was previously referred.

As indicated elsewhere in this decision, Issues 11 and 12 have been severed from the remaining issues and decision thereon is being deferred. Ruling on the applications to reopen the hearing and for further proceedings with respect to these issues likewise is being deferred at this time.

The motions for reopening and for further proceedings as to Issue No. 10 are denied insofar as they pertain to that portion of Issue No. 10 on which proposed findings and conclusions are being made at this time. As stated elsewhere herein, decision is being deferred at this time with respect to the remainder of Issue No. 10 and rulings on such motions likewise are deferred insofar as they relate to the deferred portion of this issue.

*Findings and conclusions.* The following findings and conclusions on the issues decided herein are based on the evidence introduced at the hearing and the record thereof:

*Issue No. 1.* The order should continue to provide for payments by handlers into the producer settlement fund on milk from non-pool and unrevealed sources when such milk enters the marketing area or is received at a pool plant outside the marketing area as milk or in milk products classified in Class I–A and Class II and as skim milk which is subject to the fluid skim differential. Present provisions of the order (§ 927.78), however, should be amended for purposes of clarification and to change the rates of such payments as indicated herein.

If the non-pool milk originates at a plant where it is not classified and paid for at minimum class prices pursuant to another Federal order, the rate of payment should be the difference between the class price of use under the New York order, as adjusted for the location of the plant of origin, and (1) the Class III price if such plant of origin is within or nearer than the 421–425 mile zone, or (2) the Midwestern condensery price if the plant of origin is more distant from the market. However, if the volume of pool milk used for butter and cheese exceeds 15 percent of the volume of pool milk in Classes I–A and II the minimum price established for pool milk used for butter and cheese should be used instead of the price for other Class III milk.

If the non-pool milk originated at a plant where it was priced and paid for under another Federal milk marketing order, the rate of payment should be the plus difference, if any, between the class price of use under the New York order, as adjusted for the location of the plant of origin, and the class price paid for it under the other order. However, if the other Federal order permits deductions of the payments to the New York pool from the handler's obligation under the other order, the payments should be computed at the same rate as if the milk originated at a plant not subject to another order.

If the volume of Class III milk in the New York pool for the month is less than 15 percent of the volume of Class I–A and Class II milk, no payments on non-pool milk from non-pool sources should be required.

The present order provisions with respect to payments on milk and milk products as to which the handler fails to establish the plant of origin (unrevealed source) should also be revised and separately stated. The payments on such milk should continue to be computed at the full class price for the class of use.

The need for a provision in the order under which payments are required on milk and certain milk products from non-pool sources (hereinafter referred to as "compensation payments") arises directly from the fact that under the pooling structure of the order, as effective since 1945, some milk and milk products not primarily produced for the marketing area and therefore not pooled under the order may be distributed in the marketing area as Class I and Class II milk (principally fluid milk and cream) without being subject to minimum class prices and pooling at source. In contrast, pooled milk necessarily is subject to minimum class prices and pooling at its source, namely the pool plants subject to the order. Classified pricing of pool milk requires that in order to secure an adequate supply of milk meeting the requirements of the market the minimum class prices for fluid uses in the marketing area must be fixed at levels higher than prices for surplus classifications and the average utilization value of all pool milk. Non-pool milk thus has an advantage over pool milk when distributed as Class I–A and Class II milk because it has not been subject to such high level classified pricing at its source. This disparity between pool and non-pool milk must, in some manner and by some device, be neutralized or compensated for if the integrity of the classified price structure for pool milk under the order is to be maintained and the declared purposes of the act achieved with respect to the New York marketing area.

Non-pool milk which originates at a plant not subject to a market-wide equalization pooling plan has a substantial advantage over pool milk in addition to the price advantage. The handler who receives pool milk from producers and uses or sells it for Class I–A purposes is charged the Class I–A price but is not permitted to pay that full price to his own producers. Instead he must pay a substantial part of it into the equalization fund under the order for distribution through the pool to all pool producers. A non-pool plant operator is not so burdened and limited for he can pay his own farmers the full Class I–A price or any part of it as he believes necessary to retain his supply of milk or outbid pool plant competitors for milk. Unless this condition is dealt with, the non-pool dealer can always outbid a similarly located pool plant competitor for milk supplies without cost to himself.

The pool plant competitor obviously cannot afford to pay his own producers the full Class I–A price and also pay equalization to the pool on the same milk. This condition results in disorderly marketing in the milkshed by placing otherwise similarly situated handlers in an unequal cost position for milk sold for fluid purposes in the marketing area.

It is, of course, apparent that if the order were to price and pool all milk received from all farmers at any plant from which any milk or milk products enter the marketing area for Class I–A and Class II use these disparities would not exist because all such milk would then be pool milk and would be subject to pricing and pooling under the order. Drafting of the order in such manner, however, has been found from experience not to be feasible or practical, and an order so drafted did not and could not now effectively accomplish the declared purposes of the act.

Market-wide equalization of producer returns is an essential and indispensable provision of an order regulating the handling of milk for the New York market. Orderly marketing of milk in the market is virtually inconceivable in the absence of provisions for a market-wide pool under which the price required to be paid to producers is based on the utilization of milk by all handlers receiving milk from producers. Without market-wide pooling the inevitable scramble of each handler and producer for his share of the fluid market would render the order ineffective. Minimum class prices at a level necessary to insure an adequate supply of pure and wholesome milk for the market could not be maintained.

Factors primarily associated with the size and complexity of the market preclude the uniformity in utilization among individual handlers which in the absence of market-wide pooling would have to prevail in order to obtain a workable degree of uniformity in prices paid to producers. The milk supply for the market originates on approximately 50,000 farms scattered over a vast production area (milkshed) extending more than 400 miles from the marketing area. Practically all of the milk is delivered from the farms to approximately 400 country plants outside the marketing area. Only about 200 producers deliver their milk directly to plants located in the marketing area. Accordingly, most of the milk consumed in the marketing area is shipped in bulk by tank car or tank truck from country plants to pasteurizing and bottling plants in the marketing area.

These country plants are located generally throughout most of the State of New York, in 23 counties of Pennsylvania, in 4 counties of New Jersey, in 3 counties of Vermont, and 1 county of Massachusetts. The greater part of the milk received at these plants is from farms located within a radius of 10 or 15 miles from the country plant. Although new technological developments are now making it possible for milk to be hauled long distances from farm to plant, it is expected that most producers will continue for some time to deliver their milk to a local plant. Producers, therefore, in general have a limited choice of handlers to whom they may sell their milk and little assurance of how their milk will be utilized by the handler to whom it is delivered.

There are approximately 130 different handlers engaged in the operation of country plants at which milk is received from producers. Only about 50 of these handlers operate or are directly connected with a milk distribution operation in the marketing area. Milk supplied to the marketing area by the balance of the handlers operating country plants is marketed by other handlers engaged in marketing area distribution.

There is a great deal of specialization in the handling of milk at country plants. More than 275 plants are equipped only for the receiving of milk from farmers, cooling the milk, and shipping it to other plants. Such shipments may be made either to milk distributors in the marketing area, milk distributors in other areas, or to manufacturing plants. There are more than 100 country plants which are equipped for separating milk into cream and manufacturing skim milk or for manufacturing whole milk, in addition to being equipped for receiving milk from farmers and shipping it as fluid milk. Some of these manufacturing plants are operated by handlers who have other fluid receiving plants and marketing area distribution facilities. Other manufacturing plants, although operated by handlers who are principally in the business of manufacturing milk, constitute a reserve supply available to the marketing area whenever such milk is needed.

Scattered throughout the area in which these country plants are located are many other plants. These consist of plants for local markets such as Syracuse, Utica, Binghamton, Lancaster, Harrisburg, and many others, country plants supplying the metropolitan area of Northern New Jersey, country plants for Philadelphia, country plants for New England, and a few cheese factories and other manufacturing plants which do not normally supply milk to fluid markets. Also, there are many plants located nearer the New York market than the most distant New York country plant but which are located outside of the territory from which the New York market normally draws its supply. These are plants which regularly supply markets in New England, Philadelphia, Baltimore, and Washington, D. C., together with a few plants not approved for fluid distribution but at which milk received from farmers is utilized in manufactured dairy products.

A considerable number of the plants now in the New York pool are plants which withdrew from the pool during the middle 1940's to supply other fluid markets during a period of relatively short supplies of milk in the Northeast in relation to fluid requirements, but which have returned to the New York pool during the past four years as production increased generally in the Northeast in relation to fluid sales. Other plants have entered the pool during the past three or four years which have no previous history of supplying milk for the New York market. The volume of pool milk in relation to marketing area sales of fluid milk and fluid cream has increased materially since 1948. Abundant supplies from sources not presently designated as pool plants remain, however, which are qualified and eligible for sale in the marketing area and which could readily come into the marketing area in amounts which are substantial. Many of the plants now engaged principally in supplying other markets in or surrounding the milkshed are approved by marketing area health authorities as sources of milk for the marketing area, and many more could readily obtain such approval.

On the distribution end there are about 160 dealers in New York City licensed for the distribution of milk on wholesale and retail routes or to subdealers. A large proportion of these dealers, about 123, have no facilities of their own for receiving milk directly from producers at country plants. These dealers purchase their milk from other dealers who do operate country plants. Some of them obtain their supply or a considerable proportion of it by making contracts with country dealers, such contracts frequently being yearly contracts. Other milk dealers make no long term commitments for milk or make long term commitments for only a part of their requirements and rely on buying milk on a day to day or week to week basis. Sales of this latter type are generally known in the market as "spot sales." Buyers of spot milk naturally buy their milk at the lowest price at which it is obtainable at the time they are making their purchases. Dealers who depend on spot milk for all or a major part of their supply, however, do not provide the only market for spot milk in the marketing area. Many of the dealers engaged in marketing area distribution also operate manufacturing facilities in the country. When spot milk becomes available in the city at low prices, those dealers are willing to buy such spot milk to supply their city distributing business and will divert their regular milk to their country manufacturing facilities. Thus, there is always a large market for spot milk in the marketing area if the price is sufficiently low. The market price for spot milk varies considerably from week to week and month to month. Such variation during the same year has ranged from a price insufficient to cover the class price for the milk plus the cost of transportation to the marketing area to a price yielding a margin for the selling handler of 75 cents a hundredweight over the class price plus transportation.

The order contains provisions (definitions of "pool plant" and "producer") identifying the milk which is within the scope of the pricing and equalization provisions of the order. Such provisions contain the standards and requirements which must be met if the milk is to be considered to be producer milk and therefore priced and pooled under the order. One of the basic purposes of such provisions is to include in the market-wide pool all of the milk and yet only

that milk which is primarily produced for and at all times is available for use in the marketing area. Any plant wherever located may become a pool plant and consequently fully subject to the pricing and equalization provisions of the order by meeting the specified performance requirements. Conditions are specified in the order under which a plant may be expressly designated as a pool plant. A plant may also become eligible for participation in the pool on the basis of shipment to the marketing area of prescribed proportions of its receipts from farmers. Continuing eligibility for pool participation is made contingent upon shipping fluid milk to the marketing area when it is needed to meet marketing area requirements.

Prior to 1945 all milk received from farmers at all plants approved by marketing area health authorities as sources of fluid milk for the marketing area was included in the pool and was therefore class priced at its source under the order. Under that plan there was no problem of unpriced milk, because all milk which was lawfully distributed in the marketing area for fluid purposes as well as all other milk at the plant from which it originated automatically was in the pool and subject to classified pricing at its source. Because of serious weaknesses which developed under this loose plan of pooling, the order was amended in 1945 to limit the pool, insofar as possible, to milk which was primarily associated with the New York fluid market either as regular or reserve supplies and to exclude from the pool milk which was primarily associated with some other fluid market or manufacturing outlet even though it had the health approval of one of the marketing area health authorities. This necessarily left out of the pool, and not subject to class pricing at source, quantities of non-pool milk which could enter the marketing area for fluid use because of its health approval.

The performance standards contained in the order for pool participation recognize and are intended to offset insofar as possible certain inherent weaknesses or disadvantages of market-wide equalization. It was in recognition of such disadvantages that the present pool plant provisions were adopted in 1945. Market-wide equalization largely eliminates the economic incentive which many handlers receiving milk from producers otherwise have for supplying the market with fluid milk since the utilization of the handler's milk is not reflected directly in the price which he pays to his producers. The price received by producers depends upon the utilization of milk by all handlers rather than on the utilization made by a single handler. Market-wide equalization has the further disadvantage of tending to encourage participation in the pool by handlers and producers whose milk otherwise would be and historically has been utilized for manufacturing purposes. Pool participation in such instances is not for the purpose of actually furnishing milk for the marketing area but solely for the purpose of qualifying for equalization payments from the pool as a means of maintaining or increasing their supplies of milk for manufacturing purposes by increasing the return to the farmers delivering their milk to such a plant but at no extra cost to themselves. Such handlers may at times ship milk to the marketing area if such shipments are required as a condition for maintenance of eligibility to receive equalization payments from the pool.

Market-wide equalization also creates a situation under which dealers primarily engaged in furnishing milk for fluid markets outside the marketing area are encouraged to operate in such a way that their reserve supply of fluid milk and their milk supply for other uses becomes subject to the marketing order with market-wide equalization. Such a handler operating a number of country plants attempts to qualify for pool participation only those plants with low fluid utilization while at the same time leaving unregulated the plants from which he obtains his fluid milk requirements. Market-wide pools are also susceptible of being loaded with seasonal surpluses accomplished by qualifying plants for pool participation during the season of high production when the milk is not needed for fluid milk outside the marketing area and by withdrawing plants from the pool during seasons of the year when the milk is utilized for fluid purposes in other markets. It is inconsistent with the basic purposes of the act and the order to consider that a farmer is a producer for whom the minimum class prices should apply if his milk is not available when needed by consumers in the marketing area. Such farmers include those whose milk is not available because it is primarily associated with some other fluid market as a regular or reserve supply for that market and is actually so utilized at times when it is needed in the marketing area. Similarly a farmer should not be a producer under the order if his milk is delivered to a handler utilizing the milk primarily for manufacturing purposes but which is caused by the handler to be approved by marketing area health authorities or to be shipped in token amounts to the marketing area only as a means of claiming equalization payments from the pool on large quantities of milk which the handler continues to utilize for manufacturing purposes even though needed for fluid uses in the marketing area.

When provision is made for market-wide equalization of payments to producers it is essential that the benefits of such equalization accrue only to those farmers who are engaged in the production of a supply of milk which is primarily produced for and always available for use when needed in the marketing area. Otherwise, the money paid by consumers for fluid milk would in part be distributed among farmers delivering milk to plants which do not constitute a part of the regular and dependable supply of milk for the market. Such distribution of the returns from the sale of milk in the marketing area would not be in the best interest of either consumers or producers since the money which is intended to provide producers with an incentive to produce an adequate and dependable supply of pure and wholesome milk for the marketing area would be dissipated through distribution to farmers only incidentally engaged in the business of supplying the marketing area with milk.

At the hearing in this proceeding consideration was given to a number of proposed amendments to the present requirements for participation in the pool. There was no proposal, however, or suggestion made that changes should be made which would result in extending the pool to include all milk received at all plants from which any milk may be disposed of in the marketing area. On the contrary, each of the hearing proposals were to tighten existing pool plant requirements so as to obtain greater assurance that only milk which is produced primarily for the marketing area is to be included in the pool. Such changes, if effected, would intensify the problem of non-pool milk in the marketing area for it would further expand the volume of milk that potentially could enter the area without being subject to pricing and pooling under the order. Although findings and conclusions concerning such proposed modifications to the pooling provisions are being deferred at this time, it is concluded that such proposals would in no way minimize the need for including in the order provisions for payments on non-pool milk.

Having defined producers and pooled milk as heretofore and herein found to be necessary, in a way which does not include all milk which may enter the marketing area, it automatically and inevitably follows that an opportunity exists for the sale of unpriced and unpooled milk in the marketing area since the minimum class prices and pooling established under the order pursuant to sections 8c (5) (A) and (B) of the Agricultural Marketing Agreement Act of 1937, as amended, are applicable only to milk received from producers as defined in the order. Such minimum class prices and pooling do not and cannot apply to milk received from farmers who are not pool milk producers. If that milk which is available and eligible for sale in the marketing area from farmers who are not producers and which consequently is unpriced and unpooled under the order is not regulated in some manner, however, the minimum class pricing and equalization provisions of the order would be rendered ineffective. In the absence of some suitable form of regulation of such unpriced milk there is always an artificial economic incentive for milk from non-producer sources to enter the marketing area and displace milk from producers. Such non-producer milk would be milk which would not have entered the marketing area in the absence of a class price plan but would be induced to come in for use in the relatively high valued fluid outlets solely because of the competitive advantage created for it by the classified pricing and pooling of producers' milk. The exclusion of such milk from the marketing area is not authorized or desirable. The only alternative method or device which has been suggested or proposed for deal-

ing with the situation is to impose a suitable charge on such unpriced milk in an amount sufficient to neutralize, compensate for and eliminate the artificial economic advantage for non-pool milk which necessarily is created by the classified pricing and pooling of pool milk under the order.

It is concluded that provisions in the order for imposing such a charge (compensation payments) on non-pool milk are not only incidental to the provisions establishing class prices and market-wide equalization but are necessary to effectuate such provisions, and are not inconsistent with the terms and conditions specified in sections 8c (5) and 8c (7) of the act. It is further concluded that the rates of payment herein specified are those which are necessary and appropriate to accomplish the purpose indicated.

Having determined that a suitable charge on non-pool milk is needed to place pool and non-pool milk used for fluid uses in the marketing area on substantially similar competitive positions at source, a proper rate of charge or a formula for ascertaining such a rate must be established which will be adequate to accomplish the desired purposes and yet not penalize the non-pool milk. If the charge is to be susceptible of effective administration and not subject to abuse and manipulation, it should, if possible, be based on factors which are readily computable or ascertainable, not within the control of individual handlers, well known to all handlers who might be affected by the charge, and uniform in application to all handlers similarly situated. Analysis of the economic factors concerning the relationship of pool and non-pool milk which enters the market for fluid purposes indicates that it is possible to establish a formula which meets these standards, and which closely approximates the theoretically desirable rate which would be sufficient to offset the artificial advantages in favor of non-pool milk which are created by the basic provisions of the order itself.

A proper compensatory formula should adequately evaluate the difference between the class price, at source, which would be charged for pool milk used for marketing area fluid uses (the minuend) and the cost or value, also at source, of the non-pool milk thus used (the subtrahend). The difference should represent the advantage which non-pool milk has over pool milk because of its freedom from classified pricing and equalization at source.

No problem is presented as to the minuend. It clearly and necessarily always must be the Class I–A or the Class II price, depending on the actual use classification of the non-pool milk. That is the class price required to be paid for pool milk at source. The class price should be adjusted, however, for butterfat content and location of the originating plant, just as if that originating plant had been a pool plant.

The establishment of a proper subtrahend presents greater difficulty and requires careful analysis of the different economic factors which apply at source, to non-pool milk from various sources and at different times. It is apparent that no single subtrahend is suitable for all non-pool milk from all sources at all times.

As stated earlier herein, all milk which is established to be primarily associated with the New York milk marketing area under the standards prescribed by the order is included in the New York pool. Conversely, the non-pool milk which enters the marketing area for fluid use originates from plants which are not sufficiently associated with the New York market to have their milk in the pool. Such plants have their primary interests in other fluid markets or specialized manufacturing uses and frequently have more milk than is required for these primary purposes. It is this surplus milk at non-pool plants which can be "dumped" into the New York market for fluid use, provided only that the plant and the milk has marketing area health approval. The operator of such a non-pool plant has a choice of using the excess milk for surplus uses (ordinarily in the manufacture of various milk products) or of sending it to the New York marketing area for fluid uses. In making this decision he will compare the respective net returns to him for this surplus milk and will naturally select the fluid alternative, for it will yield the greater return. In the absence of classified pricing, his cost, at source, for the excess milk remains exactly the same whether he uses it for surplus disposition or for fluid use. The pool plant operator on the other hand has no such advantage for he pays a higher classified price, at source, if he sells the milk in the market area for fluid use (Class I–A or II) than if he disposes of it for surplus manufacturing uses (Class III).

If this artificial advantage in favor of surplus non-pool milk at the plant of origin is to be effectively removed, as it must be, the milk must be treated and evaluated for what it actually is, namely, surplus milk in the milkshed. If New York marketing area disposition were not available for this surplus, the non-pool handler could derive from it only its surplus value. This surplus value is its true value or "opportunity cost" and such surplus value should be used as the subtrahand in the formula for compensation payments on non-pool milk from plants not subject to a Federal order.

The Class III price under the New York order is the class price which is payable, at source, for pool milk under the New York order when used for most surplus uses. It is expressly designed to fix a proper classified value, at source, for surplus milk. The Class III price closely approximates the amount paid in the Northeast to farmers not under the New York order for so much of their milk as is used for general manufacture.

It is therefore a dependable indicator of the value of surplus milk at source. If a non-pool handler, for his own reasons, chooses to pay more than its true market value, at source, for surplus milk which he sends to the New York area, the pool should not underwrite this unnecessary cost, particularly since the premium can be used to outbid pool handlers for milk, as previously shown.

At times, however, when supplies of milk are exceptionally high in the Northeast, the only available alternative outlets for surplus milk, both pool and non-pool, are in the manufacture of butter and cheese. The quantity of milk in the New York pool used in butter and cheese exceeds 15 percent of the quantity in Class I–A and II only when other manufacturing outlets in the Northeast are not generally available for surplus milk. Under these conditions the subtrahend should be the class price established by the order for pool milk used for butter and cheese. Such amount more nearly represents the price paid to farmers in the Northeast for nonpool milk used for butter and cheese.

The only area outside of the Northeast from which there appears to be a probability that unregulated non-pool milk might enter the marketing area is from the Midwest. Here the alternative outlets for milk are the same products as in the Northeast. However, the best indicator or measure of the price paid to the farmer for milk so used in the Midwest as a whole is the Midwestern condensary price. This should be used as the subtrahend in the compensation payment formula applicable to milk originating at such plants.

There is likely to be a general shortage of milk in the Northeast whenever the reserve supply of milk in the New York pool (milk in Class III) is less than 15 percent of the volume of milk utilized in Class I–A and Class II. Should such a shortage develop, some individual handlers in the marketing area might at times during the month experience some difficulty in readily obtaining pool milk to cover their full fluid needs. Moreover, at such times, because of the general shortage of milk, alternative outlets in other fluid markets probably would exist for non-pool milk and the order would not be the means of providing artificial economic advantage for such milk to displace producer milk for fluid uses in the marketing area. Accordingly, there should be no payments on non-pool milk whenever the quantity of pool milk in Class III is less than 15 percent of the total volume of milk classified in Class I–A and Class II.

Milk disposed of in the marketing area for Class I–A or Class II use from plants at which the handling of milk is regulated by another Federal order would be milk for which a minimum class price is fixed under such other order. The price advantage which such milk would have over pool milk priced under the New York order would be the amount by which the class price under the other order is less than the New York order class price at the plant where the milk is received from farmers. Consequently, this amount is the appropriate rate of compensation payment in instances where the other order also provides for market-wide equalization of prices to producers or where the class price established for such milk under the other order reflects its value for manufacturing the same as for surplus milk otherwise disposed of by the non-pool handler. However, in instances where the other order, as in the case of Order No. 61 regulating the handling of milk in Philadelphia, makes no provision for market-wide equalization and prices such milk at the full Class I or New York Class I–A price, it is essential that provision be made for the economic benefit of such fluid sale to accrue to New York pool producers and for the value of the milk for manufacturing to be returned to producers delivering to the handler under the other order. This result can and should be accomplished by collecting into the New York pool from the handler under the other order the difference between the established class price for milk used for manufacturing and the established class price for milk used for fluid purposes in the New York market. In order that the combined application of the two orders does not result in a total charge for milk disposed of by the other order handler which is greater than the price (Class I–A) required to be paid by a New York pool handler, the payment required to be made by him into the New York pool should be further contingent upon provision having been made in the other order for deducting the amount of such payment from the amount he otherwise would be required to pay to his own producers. Such a provision is necessary to eliminate the incentive which otherwise would prevail for handlers under other orders without market-wide equalization to dump their surplus into the New York pool. This is not merely a potential problem. Plant operators with milk approved for sale both in Philadelphia and in New York already have employed the practice of making token shipments of milk to Philadelphia, thus qualifying the milk for regulation under the Philadelphia order, and of simultaneously making much larger shipments to New York but in amounts insufficient to qualify the plant for full regulation under the New York order. Such a handler has been required by provisions of the Philadelphia order to pay the full Class I–A price for such milk. Such a sale has the same undesirable effects on New York pool producers as previously indicated with respect to fluid sales in the market from completely unregulated plants. The purposes of market-wide equalization under the New York order are defeated by such a practice. Provision for market-wide equalization can be maintained only if sufficient safeguards are provided to prevent distribution of the returns from fluid sales in the market to farmers other than those for whom the minimum class prices are established under the order.

Under the terms of this decision and of the companion decision for Philadelphia issued December 9, 1953, payments to the New York pool on Class I–A and Class II milk originating at Philadelphia order plants will be the difference between the Class I–A or Class II price and the applicable surplus price. The economic considerations involved with respect to milk for which minimum class prices are established by state agencies are substantially the same as in the case of milk from plants subject to the Philadelphia order and other Federal orders not providing for market-wide equalization. Accordingly, the amount of the payment into the New York pool should be the same except that, as to state regulated milk, the payment into the pool of the difference between the Class I–A or Class II and the applicable surplus price should not be contingent upon provision having been made in the state regulation for deducting the amount of such payment from the amount otherwise required to be paid to farmers under the state regulation. With respect to milk for which a state agency fixes producer prices the burden of adjusting prices so as to avoid a total charge on the handler higher than the Class I–A price must be assumed by the state agency. Such an adjustment is outside the jurisdiction of the Secretary. The only apparent alternative of restricting the amount of payment into the pool to the difference between the Class I–A price and the class price fixed by the state would result in failure of the provision to accomplish one of its basic purposes, since the originating plant would still retain the economic advantage associated with payment of the fluid value to its own farmers, without equalization to any pool, and there would be no assurance that returns from the sale of milk in the marketing area would go to producers relied upon to supply the market. Furthermore, the degree to which class prices fixed by state agencies are enforced, particularly as to interstate shipments, varies from occasional spot checking in some states to more complete audits in other states. Under these circumstances the state fixed prices could not be relied upon as actually having been paid to farmers.

Methods of computing a rate of compensation payment on non-pool milk other than the method herein found to be appropriate were explored and analyzed. Such other methods of computation involved use, as a rate of compensation payment, of the amount by which the class price (Class I–A or II) exceeds (1) the price paid by the receiving handler in the marketing area f. o. b. the market for non-pool milk, (2) the price actually paid to farmers by the handler of the non-pool milk, or (3) the uniform price payable to producers under the order. All of such other methods are rejected as being unsatisfactory and unacceptable, however, because the rates of compensation payment so calculated do not eliminate the artificial economic advantage afforded unpriced incidental supplies of milk over fully regulated producer milk.

The act requires that prices fixed under the order for milk purchased from producers or associations of producers be uniform as to all handlers, subject only to usual adjustments, such as those for butterfat content and location of the milk. The only prices fixed under the order are those for producer milk. Class prices for pool milk under the order are for raw milk, at source, as received from farmers.

No valid comparison can be made of prices to farmers with the necessarily higher prices of milk or milk products at any later point in the marketing process. The prices between dealers must necessarily reflect, in addition to such initial farm level cost or price, subsequent handling costs, such as those incurred in receiving, weighing, testing, cooling, hauling between plants, processing, and selling, as well as profits. Consequently, the compensatory charges do not purport to assure that the cost or price of non-pool milk or milk products, as bought and sold from dealer to dealer, will be no higher than the minimum class prices for raw, unassembled pool milk, f. o. b. initial plant. A handler selling pool milk or milk products could not sell it at levels as low as the minimum class price without loss to himself. Compensatory charges at a rate which would assure a total maximum cost to a handler of only the minimum class price for non-pool milk and milk products received from a non-pool plant would clearly discriminate against pool milk and milk products.

The price actually paid to farmers by the first handler of non-pool milk also is not a suitable or adequate measure for purposes of the compensation payment formula. Such a subtrahend would fail to recognize the true nature of non-pool sales in the marketing area, namely, that they represent the surplus of non-pool plants, and must be treated as such if the payments are to be adequate. Moreover, even if the full Class I–A price were paid to farmers for all milk at the plant of origin the non-pool plant would nevertheless have a marked advantage over an immediately adjacent pool plant which must pay equalization payments into the pool on its Class I–A sales. Without extra cost to himself, the non-pool plant operator can pay as much as the full Class I–A price to his own farmers, whereas the pool plant operator cannot do so because he must pay part of the Class I–A price to the equalization fund for distribution to all producers in the pool. The non-pool plant can thus actually outbid the pool plant for milk by paying more to its own farmers without extra cost to itself. This is particularly true where the non-pool milk originates from a plant which primarily serves other fluid markets and which can send its entire surplus into the New York market for fluid use, thus resulting in 100 percent fluid use of all milk in the non-pool plant. This unfair competitive advantage compels the operator of the pool plant to pay a further premium if he is to retain his milk supply, thus disturbing the price relationships established by the order, creating an unfair initial cost disparity in favor of the non-pool plant and promoting disorderly marketing in the milkshed.

It is also administratively impossible in most cases to determine what was the actual rate of payment to farmers for that part of the non-pool milk at the plant of origin which came into the marketing area as distinguished from the price paid for that part which was disposed of elsewhere, or for other than fluid purposes. Milk at such plants is usually not subject to use classification and audit and is purchased from farmers and paid for it without regard to its utilization. It is not realistic to assume that the purchase price for each use is actually the same.

When non-pool milk originates from a plant which is not subject to pricing and equalization under another Federal

order, the Class I–A price is the appropriate subtrahend. Such a subtrahend would fail to recognize the true nature of non-pool sales in the marketing area, namely, that they represent the surplus of non-pool plants, and must be treated as such if the payments are to be adequate. Moreover, even if the full Class I–A price were paid to farmers for all milk at the plant of origin the non-pool plant would nevertheless have a marked advantage over an immediately adjacent pool plant which must pay equalization payments into the pool on its Class I–A sales. Without extra cost to himself, the non-pool plant operator can pay as much as the full Class I–A price to his own farmers, whereas the pool plant operator cannot do so because he must pay part of the Class I–A price to the equalization fund for distribution to all producers in the pool. The non-pool plant can thus actually outbid the pool plant for milk by paying more to its own farmers without extra cost to itself. This is particularly true where the non-pool milk originates from a plant which primarily serves other fluid markets and which can send its entire surplus into the New York market for fluid use, thus resulting in 100 percent fluid use of all milk in the non-pool plant. This unfair competitive advantage compels the operator of the pool plant to pay a further premium if he is to retain his milk supply, thus disturbing the price relationships established by the order, creating an unfair initial cost disparity in favor of the non-pool plant and promoting disorderly marketing in the milkshed.

It is also administratively impossible in most cases to determine what was the actual rate of payment to farmers for that part of the non-pool milk at the plant of origin which came into the marketing area as distinguished from the price paid for that part which was disposed of elsewhere, or for other than fluid purposes. Milk at such plants is usually not subject to use classification and audit and is purchased from farmers and paid for it without regard to its utilization. It is not realistic to assume that the purchase price for each use is actually the same.

When non-pool milk originates from a plant which is not subject to pricing and equalization under another Federal order, the Class I–A price is the appropriate subtrahend. Such a subtrahend would fail to recognize the true nature of non-pool sales in the marketing area, namely, that they represent the surplus of non-pool plants, and must be treated as such if the payments are to be adequate. Moreover, even if the full Class I–A price were paid to farmers for all milk at the plant of origin the non-pool plant would nevertheless have a marked advantage over an immediately adjacent pool plant which must pay equalization payments into the pool on its Class I–A sales. Without extra cost to himself, the non-pool plant operator can pay as much as the full Class I–A price to his own farmers, whereas the pool plant operator cannot do so because he must pay part of the Class I–A price to the equalization fund for distribution to all producers in the pool. The non-pool plant can thus actually outbid the pool plant for milk by paying more to its own farmers without extra cost to itself. This is particularly true where the non-pool milk originates from a plant which primarily serves other fluid markets and which can send its entire surplus into the New York market for fluid use, thus resulting in 100 percent fluid use of all milk in the non-pool plant. This unfair competitive advantage compels the operator of the pool plant to pay a further premium if he is to retain his milk supply, thus disturbing the price relationships established by the order, creating an unfair initial cost disparity in favor of the non-pool plant and promoting disorderly marketing in the milkshed.

It is also administratively impossible in most cases to determine what was the actual rate of payment to farmers for that part of the non-pool milk at the plant of origin which came into the marketing area as distinguished from the price paid for that part which was disposed of elsewhere, or for other than fluid purposes. Milk at such plants is usually not subject to use classification and audit and is purchased from farmers and paid for it without regard to its utilization. It is not realistic to assume that the purchase price for each use is actually the same.

When non-pool milk originates from a plant which is not subject to pricing and equalization under another Federal

order, it is also administratively not feasible to determine what were the exact prices actually paid to farmers for their milk. The various payment plans which might be and are used in paying farmers for non-pool milk would make the determination of pay rates to each farmer an extremely difficult task. Unregulated milk dealers may use varying rates of butter-fat differentials, different types of payment plans, varying premium payments, make varying deductions from all or part of the farmers for various kinds of service and so on. Payments to non-pool farmers also are not subject to audit by the market administrator and are subject to manipulation by an interested handler. Stated prices can be illusory because they may readily be inflated and the excess then neutralized by offsetting overcharges for hauling the milk and for all kinds of supplies and services customarily provided to the farmer. In some cases actual cash rebates might be made but not recorded. If a use classification plan of some kind is employed the farmer may be paid too much for the surplus milk which enters the marketing area and too little for other milk which is used elsewhere. If the non-pool milk originates from the plant of a cooperative it is frequently impossible to ascertain the rate of payment for the milk sold as distinguished from membership profits or losses on operations and plant investment, and frequently a part of the proceeds for milk are distributed to members as a lump sum "dividend" at the end of the year, or may be held back for reinvestment in the cooperative enterprise.

For these many reasons the use, as the subtrahend, of the price actually paid to farmers for non-pool milk is neither administratively practicable nor is it adequate for purposes of the compensation payment formula.

The use of the uniform price under the New York order as the subtrahend for unregulated milk also is not suitable or adequate. As previously shown, the milk in question is actually surplus milk with a surplus value. If the uniform price were used as the subtrahend it would only partially reduce the advantage in favor of non-pool milk, but would still leave outstanding so much of the advantage as is represented by the difference between the blend price and the surplus value of the milk.

Compensation payments at the rates herein found to be essential should be made on milk classified in Class I–A and Class II since it is milk in these classes for which minimum producer prices higher than those for milk otherwise utilized are established. Milk utilized for fluid cream in the marketing area (Class II) is required by marketing area health authorities to come exclusively from plants approved by them for shipment of fluid milk and other Class I–A products to the marketing area. This situation is recognized under the order by fixing a minimum Class II price considerably higher than the minimum price established for milk used as cream elsewhere. Although the class price for milk used for cream in the marketing area is lower than for milk in Class I–A, it is enough higher than the value at the producer level for surplus utilization outside the marketing area to provide an incentive for non-pool handlers to utilize their surplus non-pool milk for this purpose in the absence of compensation payments.

Non-pool milk so utilized would displace and force into Class III an equivalent amount of producer milk, thus precluding distribution of the returns from sales in the marketing area to those producers relied upon to produce an adequate supply of milk and cream for use in the marketing area.

Non-pool milk may occasionally be received at a country pool plant and be there classified as Class I–A or Class II milk. Such transactions present substantially the same problems as a direct marketing area receipt and should similarly be made subject to compensation payments.

The considerations which require that compensation payments be made on Class I–A and II non-pool milk distributed in the marketing area apply with equal force to non-pool skim milk which is used or distributed in such manner as to have been subject to the fluid skim differential had it been from pool sources. Since this differential is itself the difference between skim milk for fluid use and skim milk for manufacture, the full differential should be applied on such non-pool skim milk.

In addition to milk from known non-pool sources, suitable payments must also be required on milk for which the source is not established. Such milk, in the absence of evidence to the contrary, must be presumed to be milk for which no payment has been made, at source, either to producers or to non-pool farmers. Consequently, the rate of payment which must be required on such milk is the full amount of the minimum price established for producer milk in the class in which it is utilized.

The payments on non-pool milk and on milk from unestablished sources should be added to the producer settlement fund and distributed to producers as a part of the uniform price which pool handlers are required to pay to producers. As previously indicated in this decision, it is not the primary purpose of compensation payments to compensate pool producers for a lost sale. However, when non-pool milk is distributed in the marketing area as Class I–A or II milk an equivalent quantity of pool milk is displaced from these classes and falls into the lowest valued surplus class utilizations then in the pool, usually that for butter and cheese. The compensation payments do not purport to restore to the pool the full amount of such displacement loss. Thus, the amount of the charge on milk from unregulated non-pool sources is ordinarily only the difference between the Class I–A or II price and the Class III price—rather than the price for butter and cheese. Likewise, when the non-pool milk is from a source at which the milk is adequately priced and pooled under another Federal order, the charge is only the difference between the fluid class prices under the two others and not the much greater charge which would have to be obtained if the displacement loss to the pool were to be fully recovered (Class I–A minus butter—cheese).

The fact that this displacement loss to the pool does occur whenever non-pool milk is used in Class I–A or II does, however, provide an additional reason for imposing some charge on the non-pool milk and clearly justifies the addition of such payments to the common pool as partial compensation for the displacement loss suffered by the pool. It is highly important that this displacement loss to the pool be compensated for to the fullest extent possible, consistent with the primary reasons for compensation payments previously stated in this decision. A fundamental purpose of the order is to fix a schedule of prices for pool milk which will (1) insure that a sufficient and dependable supply of quality milk will be available for Class I–A and Class II needs of the market, and (2) be in the public interest. To the extent that such sales are displaced through the disposition of surplus milk from unpriced sources, producers lose income from sales in the market which they are expected to supply. Producers would not realize the income from the sale of their milk which the order is designed to provide at the class prices established. Such loss of income unless otherwise compensated for would necessitate higher class prices, at the ultimate expense of consumers. Otherwise, the maintenance of an adequate supply of milk for the market would be jeopardized. The addition of compensation payments to the producer settlement fund is an appropriate method of compensating, insofar as possible, producers relied upon to supply the market for a loss of income which they would otherwise incur. Such disposition of the funds does not constitute a means of returning more to producers than contemplated at the class prices established under the order since no compensation payments are required to be made when supplies of producer milk are not sufficient to meet market requirements in uses to which compensation payments apply. An additional reason for adding compensation payments to the producer settlement fund is that no alternative disposition of such funds is suitable, feasible, or authorized under the act.

There remains the question of proper incidence of the payments. If the operator of the non-pool plant is the same person who distributes the milk in the marketing area, he clearly should make the payment. Where the source is not established, the charge necessarily must be imposed on the order handler in whose possession it is found. However, much of the non-pool milk on which payments are required is handled by more than one handler, and it is necessary that provision be made in the order specifically identifying the handler on whom the obligation to make the payment is imposed. From the standpoint of the economics involved, the incidence of the charge makes no difference since the amount of the payment is the same regardless of who makes it. From the standpoint of administration and enforcement, however, it is much easier and simpler for the payment to be made by the regulated handler operating the pool plant outside the marketing area or by the handler operating a plant in the marketing area, depending upon whether the non-pool milk is first received at a pool plant or is received directly from a country non-pool plant at a plant in the marketing area.

It is these handlers with whom the market administrator regularly deals. Such handlers would be expected to know and understand the terms and provisions of the order. It is these handlers who would be responsible for distributing the milk or milk products in the regulated market. Making the operator of the pool plant responsible for compensation payments also results in minimizing such payments since producer milk is first assigned to Class I–A and Class II milk at the plant. Where milk is shipped directly from a non-pool plant to a plant in the marketing area, it is the handler operating the plant in the marketing area who should make the payment.

The purchasing handler, being in direct contact with the order and aware of its provisions, can readily protect himself against double payment by deducting the known compensatory charge from the price he otherwise would pay for non-pool milk; and it is contemplated that a reasonable person will do so in the circumstances. This procedure will result in his paying, for the non-pool milk, its market value as surplus and paying to the pool the difference between its fluid and its surplus values. The non-pool source will thereby receive the true value of the non-pool milk, namely, its surplus value, thus achieving the purpose of the compensation charges. A marketing area handler who pays more than its full value for the non-pool milk, or who fails to take into consideration the charge to the pool has paid too much to the non-pool seller of the milk. His position is no different than if he had paid too much, i. e., more than other handlers, for pool milk similarly purchased, because of poor business judgment or other reasons.

It might appear that the charge should more properly be imposed at source because it is intended to prevent undue advantages for non-pool milk at that level of marketing. Such a plan would present serious administrative and practical difficulties. The non-pool plant (source) operator might not be aware that a compensation payment is required until long after the sale has been consummated. He might not even know at the time of the sale, particularly if made through a broker, that his milk was being moved to the New York market for distribution. In some cases the milk or milk product may be resold several times before entering the New York market, so that the first plant operator would have no control over its disposition. In such circumstances it would be unequitable to charge the originating handler. Moreover, if enforcement proceedings were to be required, it would be more convenient and logical to bring the action in the area of the regulated market where the problem arose. Where distribution is made on wholesale or retail routes in the marketing area from the non-pool plant without going to a plant in the marketing area, there is, of course, no alternative to imposing the charge on the operator of the non-pool plant.

The compensation payments herein provided will not prohibit the marketing of milk nor limit the marketing of milk products from any production area of the United States. The rates of payment required are uniform rates subject only to adjustment resulting from application of the same transportation differentials used in adjusting minimum producer prices to reflect distance from the market of the plant at which the milk is received from farmers.

The quantity of milk and milk products which may be sold in any regulated market is dependent to a considerable extent upon the price fixed under the order for the particular class of utilization. Such influence should not be construed, however, as a limitation of the type precluded under the act. No price can be fixed without influencing, to some extent, the quantity of milk and milk products which may be sold from either regulated or unregulated sources. No quantitative limitations are imposed under the order on the amounts of unpriced milk which may be disposed of in the marketing area nor do they prohibit such use or any other use of unpriced non-pool milk or milk products. The compensation payment herewith provided will not discriminate against producers by areas, nor deprive suppliers of unpriced milk of a high priced market which they would otherwise enjoy. Rather the payments tend to maintain the natural economic advantages accruing to specific plants and farmers by reason of such economic factors as location, quality of milk and efficiency of operation. Without such payments regulated milk would be at a distinct competitive disadvantage compared to unpriced milk similarly located. Without such charges the order would tend to limit and reduce the marketing area sales of pool milk which in the absence of regulation for the market would be thus sold and utilized. The balancing compensatory charge removes the artificial advantage created which otherwise exists for non-pool milk. The net effect is to preserve insofar as possible the balance which would prevail with respect to milk from various sources in the absence of an order.

It is necessary in seeking an overall solution to problems of this nature to adopt provisions which will be reasonable and be liberal as possible, and at the same time will still guarantee the integrity of regulation. Commerce in milk is entirely at the option of handlers. They are free to complete only those transactions which are most favorable to themselves. Order provisions must recognize this fact. They must recognize, also, that the varying conditions under which milk transactions occur give rise to great complexity in the regulatory problem and that, at times, individuals may be inconvenienced or even suffer hardship by reason of provisions necessarily adopted for the common good of the public and the industry at large.

*Issue No. 2.* Consideration was given at the hearing to changes which should be made in the order relative to the pricing and pooling of milk which is assembled from farms by transferring the milk in bulk directly from a farm tank to a tank truck, such milk commonly, and herein, referred to as bulk tank pickup milk.

There is at present only a relatively small volume of bulk tank pickup milk in the New York milkshed. At the time of the hearing there was only one tank pickup route in operation, a 350 can tank which in April 1953 was picking up about 310 cans of milk from 17 farms located in counties of Columbus, Dutchess, Rensselaer, and Ulster. This truck was traveling a round trip distance of about 400 miles daily including the pickup from farms and delivery to a plant in the marketing area. While additional bulk tank pickup routes were reported to be in the process of formation or under consideration, it appears that the current development of such groups is largely on an experimental basis. The proposed amendments contained in the recommended decision relative to bulk tank pickup milk were designed primarily for the purposes of (1) pricing bulk tank pickup milk on a f. o. b. farm basis, and (2) to provide a means of determining the time and circumstances under which such milk would be considered to be pool milk and when it would be considered to be nonpool milk. Numerous exceptions were filed to the findings and conclusions contained in the recommended decision and to the proposed effectuating amendments largely on the basis that various aspects of the problem were not sufficiently explored at the hearing. After consideration of such exceptions, it is concluded that the proposed amendments concerning bulk tank pickup milk should be abandoned pending further consideration at another hearing. No serious problems appear to exist or to be in prospect immediately resulting from failure to adopt such amendments at this time.

*Issue No. 3.* The order should be amended to clarify and eliminate the possibility of misunderstanding with reference to the definition of a plant and related duties and functions of the market administrator. It was indicated that the present provisions are susceptible of different interpretations. The changes proposed (proposals Nos. 21, 22, and 23) were for the purpose of making it clear that application of the plant definition by the market administrator is not contingent upon first having notified the handler of his determination as to what constitutes a plant and its equipment except in instances where there is a revision by the market administrator of a prior determination of which the handler has been notified, and that the order imposes no duty upon the market administrator to notify handlers of his determinations under the plant definition except upon receipt of written request therefor received from a handler. The accompanying amendments hereinafter set forth to §§ 927.8, 927.18 (j) and 927.54 are designed to accomplish those purposes.

There was considerable discussion on the record of the prospect of administrative complications and potential controversy concerning that part of proposal No. 22 under which § 927.18 (j) would be expanded to make the duties imposed on the market administrator apply to written requests received from persons other than handlers. In view of these potential difficulties and because there was no showing of the necessity for such a requirement, it is concluded that the order should not be amended to impose specific duties on the market administrator with respect to inquiries received from persons other than handlers. Failure to include such a specific provision, however, does not preclude persons other than handlers from obtaining such information as is available concerning determinations which have been made as to whether or not a plant exists at a specified location.

*Issue No. 4.* Proposal No. 31 of the notice of hearing was to deal with the administrative problems experienced in determining compliance with existing provisions of the order (§ 927.40) under which handlers are required to pay minimum class prices for milk received from cooperative associations of producers. It was demonstrated that the proposal was confined to only one aspect or fragment of the problem involved. The proposed procedure for determining whether or not minimum class prices had been paid would apply only to transactions covered by a written contract. It was also indicated that adoption of the proposal might readily create additional administrative problems including the interpretation of inter-handler contracts and whether or not the market administrator would become involved in enforcement of contracted obligations between handlers to pay items other than class prices.

An alternate proposal, made for the first time at the hearing, was to eliminate from the order the second sentence of § 927.40 under which a time limit is established for the payment of minimum class prices to a cooperative association which is also a handler. It appears that the effect of this proposal would merely be to eliminate the currently specified time in which payment must be made, a result more limited than the intended purpose of the proposal. The record indicates considerable uncertainty as to the extent, if any, to which the requirement for payment by handlers for minimum class prices to cooperatives would be changed by adoption of the proposal, and also some question as to whether the alternate proposal is within the scope of the hearing notice. Accordingly, it is concluded that neither the proposal contained in the notice nor the alternate proposal made at the hearing should be adopted.

*Issue No. 5.* Section 927.77 should be amended by adding a new paragraph (c) to permit handlers to obtain a refund of the difference between the Class II and Class III prices, applicable for the month in which the milk is received from producers, when such milk is held in the form of cream longer than the period for establishing classification if claim for such refund is filed by the handler together with evidence of disposition of the cream outside the marketing area in a manner under which it would have been eligible for classification in Class III pursuant to § 927.37 (c) (1) (3) (5) or (6) had such disposition been made during the period for establishing classification. Such opportunity for refund, however, should not apply to cream utilized in the marketing area since to do so would tend to render inoperative the procedures and safeguards now associated with the verification of claimed uses of cream in the marketing area. Provisions of the order for the classification in Class III of cream stored in licensed cold storage warehouses appear to provide ample and appropriate opportunity for classification in Class III of cream held beyond the period for establishing classification for use in the marketing area.

It is concluded that the ultimate charge to the handler for such milk at the Class III price should be effectuated by the process of making a refund rather than by reclassification, thus avoiding a complete reapplication of the accounting procedure relative to assignment of classifications between handlers and between pool and non-pool milk. Reclassification would involve unnecessary administrative complications. Such opportunity for refund should be applicable to cream utilized in butter outside the marketing area but this provision for refund is not intended to qualify such cream for the butter-cheese adjustment, and does not so qualify it since the butter-cheese adjustment continues to be applicable only to milk classified as Class III pursuant to § 927.37 (e) (6).

It is further concluded that it is not necessary to impose the same time limit for the filing of such claims for refund as is imposed in connection with claims for storage cream payments. Storage cream payments are contingent upon evidence of use in a particular product or form, whereas in this instance it is necessary only for the market administrator to determine that the cream was finally disposed of outside the marketing area. Accordingly, under the recommended amendment, the time for filing claims for refund would be limited only as set forth in § 927.85.

*Issue No. 6.* The order should be amended by deleting from paragraph (c) of § 927.50 the requirement for submission of a signed statement of the operator of a non-pool plant at which disposition of milk is claimed by the reporting handler as the basis of classification. Such requirement no longer serves any essential purpose.

*Issue No. 7.* Section 927.35 of the order (accounting procedure) should be amended virtually as set forth in hearing notice proposal No. 28. The words "which is classified as Class I–B or I–C" appearing in the proposed paragraph (b) of proposal No. 28, however, should not be included in the amended provision since to include such language would constitute a change not shown to be justified. Inclusion of these words in the proposal was shown to be inadvertent.

Under existing provisions of § 927.35 (b) and (c) the procedure for assignment of whole milk receipts to classifications of whole milk shipments at plants where there are receipts both from pool and non-pool sources has been unduly complicated in many instances. Adoption of the proposal to provide for proration of whole milk receipts against whole milk disposition in terms of pounds of whole milk before receipts of whole milk are prorated to other products will constitute a less complicated procedure for arriving at the same result as at present, and will tend to facilitate the mechanics involved in interhandler settlements for milk.

*Issue No. 8.* No amendment should be made in § 927.38 (e) of the order for the purpose of limiting the territory within which milk and cream may be classified at plants other than those from which the milk or cream is shipped. The evidence indicates that the present provision has tended to facilitate the economical disposition of pool milk for other than fluid purposes, and provides no basis for restricting the extent to which milk and cream may now be classified at plants in the territory surrounding the milkshed.

*Issue No. 9.* Evidence in the record does not justify any change in the fluid skim differential either with reference to the skim milk to which the differential should be applied or as to the amount of the differential. The proposal contained in the notice of hearing was to make the fluid skim differential at the present rate applicable not only to skim milk disposed of in the marketing area in the form of milk, fluid skim milk, and cultured milk drinks but also to skim milk utilized in such forms outside the marketing area. Modifications of the hearing notice proposal were presented at the hearing including a proposal not to apply the fluid skim differential to skim milk disposed of to food processing plants within the marketing area or under some circumstances to skim milk not shown to have been disposed of outside the marketing area for other than fluid purposes. The evidence submitted concerning these various proposals was little more than exploratory in nature and does not constitute an adequate basis for determining precisely what changes, if any, should be made in the amount or application of the fluid skim differential. Several exceptions were filed to the failure to recommend amendment of the order to make the fluid skim differential applicable to skim milk for certain fluid uses outside the marketing area. In the interest of clarification, it is pointed out that failure to make such amendment is due to the absence in the record of sufficient evidence rather than on a conclusion that the evidence definitely shows such amendment to be without merit. Acordingly, the exceptions are denied.

Companion proposals relating to the plant with which classification of skim milk would be determined for purposes of application of the fluid skim differential were also contained in the hearing notice but their adoption is unnecessary unless the fluid skim differential is applied to

fluid skim utilization outside the marketing area.

*Issue No. 10.* The issue considered at the hearing was what changes, if any, should be made in the classification and pricing of all or certain portions of the milk utilized in fluid form (fluid milk, concentrated fluid milk, fluid milk products, and cultured or flavored milk drinks) outside the defined marketing area. Such milk sold in other Federally regulated markets is now classified in Class I–B and priced the same as milk for fluid use within the marketing area (Class I–A). Milk sold outside the defined marketing area and outside other Federally regulated markets is now classified in Class I-C and priced at 20 cents over the blend or uniform price.

Although technically within the scope of the hearing, the classification and pricing of milk now classified in Class I-B was given only superficial and incidental consideration at the hearing. Accordingly, it is concluded that no change should be made in such provisions. Primary consideration was given at the hearing to the classification and pricing of milk which is now classified in Class I-C. For purposes of this decision and for reasons hereinafter set forth, the milk now classified in Class I-C is divided into three separate categories as follows:

(1) Milk disposed of within the State of New York outside the marketing area;

(2) Milk disposed of in Northern New Jersey; and

(3) Milk disposed of in other areas.

It is concluded that as to the milk in categories 1 and 2, a decision on changes in the classification and pricing provisions of the order should be deferred pending further consideration, and as to milk in category 3, the minimum price established under the order should be changed to the price established for Class I–A milk. This price change should be accomplished by revision of the Class I-B definition to include such milk.

The principal markets where Class I–C milk is now sold have long relied for a substantial part of their fluid milk requirements upon sources of supply which, upon issuance of the order in 1938, became regulated under the order. Instead of including such markets in the defined marketing area under the order as originally promulgated, special pricing provisions were adopted recognizing the historic dependence both of such markets and the defined marketing area, upon a common source of supply. When the order was first made effective in 1938, milk now classified as I–C milk was unpriced. Beginning on March 1, 1941, such milk was priced at 20 cents over the price established for milk used for fluid cream in the marketing area (Class II–A). Since July 1, 1941, the price established for Class I–C milk has been the uniform price plus 20 cents.

The pricing of milk sold outside the marketing area, as defined, is a problem which not only was considered during promulgation of the original order in 1938, but which has been considered on several later occasions at public hearings on proposals to amend the order. The problem as presented at this hearing, insofar as the pricing of milk disposed of in Upstate New York and Northern New Jersey is concerned, is one which cannot properly be decided independent of other issues on which public hearings have been held. Such other issues include revisions of transportation and location differentials and the question of whether minimum producer prices should be established under Federal regulation for all milk produced for Northern New Jersey. These are issues on which public hearings have been held but on which decision has been deferred pending further consideration. Since these issues are directly associated with the pricing of I-C milk in Upstate New York and Northern New Jersey, a decision on that question likewise is being deferred.

For the past 4 years, the Class I-C price has been lower than the Class I-A price by amounts ranging (on an annual average basis) from 66 cents (in 1952) to 93 cents (in 1949). The differences were smaller prior to 1949. By months in 1952 the Class I-A price exceeded the Class I-C price by varying amounts ranging from 54 cents in February to 84 cents in March. During the last 5 years the Class I-C price has averaged $1.33 higher than the Class III price and 63 cents higher than the Class II price.

Ever since the order has been in effect substantial quantities of milk have been utilized in Class I–C. The annual volumes of Class I–C milk have varied some from year to year ranging since 1942 from a low of 372 million pounds (in 1948) to 528 million pounds (in 1952). Prior to 1948, the years of highest volume were 1946 with 500 million pounds and 1948 with 508 million pounds. Annual percentages of pool milk used in Class I–C have ranged from about 6 percent in 1942 and 1949 to about 9 percent in 1943 and 1946. During the past 3 years the percentages have been 7.0, 7.6, and 7.4, respectively.

Substantial volumes of Class I–C milk are sold in each month during the year. Highest volume months usually are July and August while lowest volume months usually are April and May. In 1952 the volume varied from about 27 million pounds in May to 62 million pounds in July.

The various categories (as herein set forth) of Class I–C milk are distinguished by differences in the competitive factors and marketing conditions related to sale of such milk in the various markets where it is sold. Such differences were recognized by many of the principal witnesses who testified at the hearing. By far the largest market for Class I–C milk is, and always has been, Northern New Jersey. Sales of Class I–C milk in Northern New Jersey have constituted over 40 percent of the total consistently over the 15-year period in which the order has been in effect. Such sales were 44 and 47 percent, respectively, of total Class I–C sales in 1951 and 1952. Next to Northern New Jersey, the largest proportion of Class I–C sales is in the State of New York, with such sales accounting for about 35 percent of the total. About 20 percent of all Class I–C sales are in the six New York counties nearest the marketing area. The balance of the Class I–C sales (aggregating about 18 percent of the total in 1952) are in other areas, principally southern New England and Pennsylvania. Some Class I–C sales were made in 1952, however, in areas farther South, including Washington, D. C., North and South Carolina and Florida.

In the markets of Upstate New York, where over a third of the Class I–C milk is sold, virtually all competition is with milk from unregulated sources. For other milk sold in such markets there are no minimum producer prices established by either State or Federal regulation. Minimum producer prices are established under marketing orders of the State of New York for the Rochester and Niagara Frontier marketing areas but no Class I–C milk is sold in such areas. Dealers in Upstate New York markets pay producers for milk on the basis of the uniform price established under the New York order. Most of these markets are located in the area from which the New York metropolitan milk marketing area draws its milk supply. Abundant supplies of non-pool milk are available for these markets at prices approximating, and closely related to, the New York uniform price. Dealers in most Upstate New York markets are at liberty either to purchase milk from nearby pool plants (Class I–C) or from completely unregulated sources. Premiums in amounts not to exceed 20 cents per hundredweight over the uniform price appear to be sufficient to induce farmers to transfer directly from pool plants to local unregulated dealers as a means of augmenting short season supplies from local farmers from whom the dealer regularly buys milk or to expand regular volume in the local market.

In some Upstate New York markets Class I–C milk constitutes a relatively small proportion of the total fluid sales in the market. In others, however, particularly in the six New York counties nearest the marketing area where about 55 percent of the total I–C milk sold in Upstate New York was sold in 1952, the volume of Class I–C milk constitutes a substantial proportion (ranging up to 70 percent) of the total fluid milk requirements.

The conditions in Northern New Jersey also differ materially from most of the other markets in which Class I–C milk is sold. The fluid milk consumed in Northern New Jersey is obtained from three types of sources: (1) Milk from farmers located within the State of New Jersey and for which minimum producer prices are established by the New Jersey Office of Milk Industry; (2) milk from plants and farmers located outside the State of New Jersey and for which no minimum prices to producers are established either by State or Federal regulation; and (3) milk from various New York order pool plants which is classified and priced under the order at the Class I–C price.

About 50 percent of the milk sold for fluid use in Northern New Jersey now comes from New Jersey producers. During the period 1940–1951 the volume supplied by New Jersey producers increased about 20 percent. Total sales of fluid milk in Northern New Jersey increased about 44 percent during the same

period, however, with the result that the proportion of the total supplied by New Jersey producers declined from over 61 percent in 1940 to about 50 percent in 1951.

About 60 percent of the remainder of the Northern New Jersey fluid supply (about 30 percent of the total) is obtained from plants or farmers outside the State of New Jersey and for which no minimum producer prices are established by either State or Federal agencies. The plants are scattered throughout a large part of the territory in which New York pool plants are located. Substantially all of the milk received from farmers at such non-pool plants is used as fluid milk primarily in Northern New Jersey but in some instances for fluid use elsewhere. The farmers delivering milk to such plants, however, usually are paid a price approximating the New York uniform price rather than a price reflecting its high fluid utilization. During the period from 1940 to 1951 the volume of this milk from unregulated sources outside the State of New Jersey which comes into Northern New Jersey for fluid use has increased 277 percent. Such unregulated milk as a proportion of the total Northern New Jersey supply has increased from about 11 percent in 1940 to about 30 percent in 1951.

The balance of the fluid milk consumed in Northern New Jersey comes from New York pool plants (I–C). Milk from this source constitutes about 40 percent of that part of the supply which comes from outside the State of New Jersey and about 20 percent of the total volume of fluid milk consumed in Northern New Jersey. During the period 1940–1951 the volume of I–C milk sold in Northern New Jersey increased about 5 percent. As a proportion of the total, however, the volume of I–C milk declined from about 29 percent in 1940 to approximately 20 percent in 1951. Class I–C milk as now priced has lost ground in relation to other sources of supply for Northern New Jersey particularly in relation to milk from unregulated sources purchased from farmers at a price approximating the New York order uniform price but for which no official minimum producer price is established.

Opponents of proposals to increase the Class I–C price contend that such action would not result in a higher return for milk to New York pool producers or to other farmers and that it would contribute nothing toward more orderly marketing in the markets in which I–C milk is sold. The arguments appear to be particularly pertinent insofar as Northern New Jersey is concerned.

The remainder of the Class I–C milk (other than for Upstate New York and Northern New Jersey) is sold primarily in markets where much larger proportions of the competing supplies of milk are subject to minimum producer prices established either by a State agency or under another Federal order. Class I prices established by State agencies in New England and Pennsylvania are usually as high as the New York Class I–A price, and the price established under other Federal orders for milk sold in the markets where I–C milk is sold is generally the same as for milk for fluid use in the marketing area defined in such other orders.

Only about 18 percent of the total volume of Class I–C milk in 1952 was sold in markets outside of Upstate New York and Northern New Jersey. Such sales were less than 1.5 percent of the total receipts from producers in 1952, but nevertheless constituted a rather substantial proportion of the total sales in some of the markets where Class I–C milk was sold. Next to Northern New Jersey and Upstate New York, Connecticut was the most important outlet for I–C milk in 1952. While milk so utilized constituted less than 0.7 percent of the volume of New York pool milk, it amounted to between 5 and 10 percent of the fluid milk sales in Connecticut. Approximately 75 percent of the milk supply for Connecticut came from farmers in Connecticut and thus was fully subject to minimum producer prices established by the State of Connecticut. Another 10 to 12 percent of the supply was received by Connecticut dealers directly from farmers located outside the state but for which payment was made on a basis comparable to that applicable within the state. Unlike Northern New Jersey and Upstate New York Class I–C milk sold in Connecticut is not sold in competition with major portions of the supply purchased at prices substantially below the Class I–A price.

While data in the record does not afford a basis for precise calculation of the relative volumes of various sources of milk in other markets where Class I–C milk is sold, it is apparent that nowhere else in the Northeast are there volumes of unregulated milk comparable to those sold in Upstate New York and Northern New Jersey. Substantial proportions of the supply for most other areas in the Northeast, including New England and Pennsylvania, come from sources which are subject to regulation either by State agencies or under other Federal marketing orders.

The pricing of milk at the Class I–A level which is now classified in Class I–C and disposed of outside New York and Northern New Jersey will not necessarily protect such outside markets from the competition of out-of-state milk. Supplies of milk may be available which are not subject to State or Federal regulation. The Class I–A price established under the New York order applies only to milk received from producers as defined in the order.

Testimony was presented at the hearing concerning a proposal to establish a price of Class I–C milk in the short production months somewhat higher than the Class I–A price. This proposal was a part of an integrated plan designed either to compensate the New York pool for the cost of carrying the surplus for outside markets or to encourage milk to leave the New York pool and to carry with it the associated surplus. The amount of added return to the New York pool on the small part of the Class I–C milk which is sold in the areas outside of New York and Northern New Jersey would not materially affect the total returns under the New York pool. Since no decision is being made at this time with respect to the other parts of the integrated plan, prices for fluid milk sold in those areas outside of New York and Northern New Jersey should not at this time be set at a level higher than for Class I–A milk.

Exceptions were filed to the failure to make provision in the recommended decision for an opportunity for handlers to withdraw plants from the pool in the event of a change in the pricing of Class I–C milk. Proposals to make such provision were considered at the hearing. Decision heretofore made by handlers as to whether they desired to have one or more of their plants designated as pool plants necessarily have been made on the basis of the Class I–C pricing provision currently in effect. The price for such milk is one of the major considerations in such decision. It appears only fair and reasonable therefore that, with the change in the Class I–C price herein provided, there be opportunity for handlers to withdraw plants from the pool coincident with the change in the Class I–C price. Accordingly, it is concluded that § 927.24 (a) should be amended to provide for cancellation of pool designations effective either as of February 1, 1954 or March 1, 1954 upon application submitted to the market administrator prior to the requested effective date of cancellation.

*General findings.* (a) The proposed marketing agreement and the order, as amended, and as hereby proposed to be further amended, and all of the terms and conditions thereof will tend to effectuate the declared policy of the act;

(b) The parity prices of milk produced for sale in the said marketing area as determined pursuant to section 2 of the act are not reasonable in view of the price of feeds, available supplies of feeds and other economic conditions which affect market supply of and demand for such milk, and the minimum prices specified in the proposed marketing agreement and in the order, as amended, and as hereby proposed to be further amended, are such prices as will reflect the aforesaid factors, insure a sufficient quantity of pure and wholesome milk, and be in the public interest; and

(c) The proposed marketing agreement and the order, as amended and as hereby proposed to be further amended, will regulate the handling of milk in the same manner as, and are applicable only to persons in the respective classes of industrial and commercial activity specified in the said marketing agreement upon which a hearing has been held.

*Marketing agreement and order.* Annexed hereto and made a part hereof are two documents entitled "Marketing Agreement Regulating the Handling of Milk in the New York Metropolitan Milk Marketing Area" and "Order Amending the Order, as Amended Regulating the Handling of Milk in the New York Metropolitan Milk Marketing Area" which have been decided upon as the appropriate and detailed means of effectuating the foregoing conclusions. These documents shall not become effective unless and until the requirements of § 900.14 of the rules of practice and procedure governing proceedings to formulate marketing agreements and marketing orders have been met.

*Order of the Secretary Directing That a Referendum Be Conducted; Determination of a Representative Period; and Designation of an Agent To Conduct Such Referendum*

Pursuant to section 8c (19) of the Agricultural Marketing Agreement Act of 1937, as amended (7 U. S. C. 608 (c) (19)), it is hereby directed that a referendum be conducted among the producers (as defined in the order, as amended, and as hereby proposed to be further amended, regulating the handling of milk in the New York metropolitan milk marketing area) who, during the month of July 1953, were engaged in the production of milk for sale in the marketing area specified in the aforesaid order, as amended, and as hereby proposed to be further amended, to determine whether such producers favor the issuance of the order amending the order, as amended, which is a part of this decision.

The month of July 1953 is hereby determined to be a representative period for the conduct of such referendum.

C. J. Blanford is hereby designated as agent of the Secretary to conduct such referendum, and except as set forth herein, such referendum shall be conducted in accordance with the procedure for the conduct of referenda to determine producer approval of milk marketing orders as published in the FEDERAL REGISTER on August 10, 1950 (15 F. R. 5177), and shall be completed on or before January 22, 1954.

As a means of effectuating certain policies jointly adopted by the Secretary and the Commissioner of Agriculture and Markets of the State of New York in a memorandum of cooperation dated August 26, 1938, the above designated agent of the Secretary shall, at the same time he transmits his report to the Secretary, also transmit a similar report to the Commissioner of Agriculture and Markets of the State of New York.

The above designated agent of the Secretary shall not be required to transmit with his report to the Secretary a copy of each statement concerning the referendum as it appeared in each newspaper, but he shall transmit with his report a copy of the release which he presented to newspapers generally distributed in the area along with a summary of the numbers and types of newspapers to which it was presented.

The time within which the complete detailed report of the above designated agent shall be transmitted to the Secretary is hereby extended to five days after the close of the referendum, but a preliminary report based on the information then available shall be transmitted to the Secretary within two days after the close of the referendum.

*It is hereby ordered*, That all of this decision, except the attached marketing agreement, be published in the FEDERAL REGISTER. The regulatory provisions of said marketing agreement are identical with those contained in the attached order amending the order, as amended, which will be published with the decision.

This decision filed at Washington, D. C., this 14th day of December 1953.

[SEAL] JOHN H. DAVIS,
*Assistant Secretary of Agriculture.*

*Order[1] Amending the Order, as Amended, Regulating the Handling of Milk in the New York Metropolitan Milk Marketing Area*

§ 927.0 *Findings and determinations.* The findings and determinations hereinafter set forth are supplementary and in addition to the findings and determinations previously made in connection with the issuance of the aforesaid order and of each of the previously issued amendments thereto; and all of said previous findings and determinations are hereby ratified and affirmed, except insofar as such findings and determinations may be in conflict with the findings and determinations set forth herein.

(a) *Findings upon the basis of the hearing record.* Pursuant to the provisions of the Agricultural Marketing Agreement Act of 1937, as amended (7 U. S. C. 601 et seq.), and the applicable rules of practice and procedure, as amended, governing the formulation of marketing agreements and marketing orders (7 CFR Part 900), a public hearing was held upon certain proposed amendments to the tentative marketing agreement and to the order, as amended, regulating the handling of milk in the New York metropolitan milk marketing area. Upon the basis of the evidence introduced at such hearing and the record thereof, it is found that:

(1) The said order, as amended, and as hereby further amended, and all of the terms and conditions thereof, will tend to effectuate the declared policy of the act;

(2) The parity prices of milk produced for sale in the said marketing area as determined pursuant to section 2 of the act are not reasonable in view of the price of feeds, available supplies of feeds and other economic conditions which affect market supply of and demand for such milk, and the minimum prices specified in the order, as amended, and as hereby further amended, are such prices as will reflect the aforesaid factors, insure a sufficient quantity of pure and wholesome milk and be in the public interest; and

(3) The said order, as amended, and as hereby further amended, regulates the handling of milk in the same manner as and is applicable only to persons in the respective classes of industrial and commercial activity specified in a marketing agreement upon which a hearing has been held.

*Order relative to handling.* It is therefore ordered that on and after the effective date hereof, the handling of milk in the New York metropolitan milk marketing area shall be in conformity to and in compliance with the terms and conditions of the aforesaid order, as amended and as hereby further amended; and the aforesaid order, as amended, is hereby further amended to read as follows:

1. Amend § 927.8 by deleting the words "pursuant to § 927.18 (j)."

2. Amend § 927.18 (j) to read as follows:

(j) Promptly notify a handler, upon receipt of the handler's written request therefor, of his determination: as to whether one or more plants exist at a specified location, as to whether any specified item constitutes a part of the handler's plant, or as to which plant a specified item is a part in the event that the particular premises in question constitutes more than one plant: *Provided*, That, if the request of the handler is for revision or affirmation of a previous determination, there is set forth in the request a statement of what the handler believes to be the changed conditions which make a new determination necessary. If a handler has been notified in writing of a determination with respect to an establishment operated by him, any revision of such determination shall not be effective prior to the date on which such handler is notified of the revised determination.

3. Amend § 927.24 (a) by adding the following immediately preceding the first proviso: "and in addition, the designation shall be cancelled effective either on the first day of February or on the first day of March 1954 upon application submitted by the handler to the market administrator prior to the requested effective date of cancellation."

4. Amend § 927.31 by changing the last sentence thereof to read: "The burden rests upon the handler who receives in the marketing area or at a pool plant, or distributes in the marketing area, milk, concentrated fluid milk, fluid milk products, cultured or flavored milk drinks, cream, fluid cream products, or fluid skim milk to establish the source of all of his milk and milk products, and in the absence of such proof such milk and the milk equivalent of such enumerated products shall be subject to the provisions of § 927.79."

5. Amend § 927.35 by renumbering paragraph (c) as paragraph (e) and by substituting for paragraph (b) the following:

(b) After the assignments prescribed in paragraph (a) of this section, the remaining whole milk received at a plant from producers or from pool plants and in like form from dairy farmers not producers or from non-pool plants shall be assigned pro rata to the total classification of all milk on hand at or leaving such plant as whole milk.

(c) After the assignments prescribed in paragraphs (a) and (b) of this section, the then remaining milk or cream received from producers or from pool plants and the milk or cream received from dairy farmers not producers or from non-pool plants shall be assigned pro rata to the total remaining classification of such products received in like form.

(d) After the assignment of skim milk prescribed in paragraph (a) of this section, skim milk received from non-pool plants shall be assigned to the remaining skim milk subject to the fluid skim differential.

[1] This order shall not become effective unless and until the requirements of § 900.14 of the rules of practice and procedure, as amended, governing proceedings to formulate marketing agreements and orders have been met.

6. Amend § 927.37 (b) to read as follows:

(b) Class I–B milk shall be all milk, except as provided in subparagraphs (3) and (5) of paragraph (e) of this section, the butterfat from which leaves the plant in the form of milk, concentrated fluid milk, fluid milk products, or of cultured or flavored milk drinks containing 3.0 percent or more but not more than 5.0 percent of butterfat, and which is delivered to a plant or a purchaser outside of the State of New York and outside of Northern New Jersey, but which at no time (1) is received, other than directly from producers, at a plant in the marketing area, or (2) otherwise enters the marketing area except as an incident to its transportation and delivery to a point outside of the marketing area: *Provided*, That use aboard a ship or other carrier shall not constitute such delivery.

7. Amend § 927.37 (c) to read as follows:

(c) Class I–C milk shall be all milk, except as provided in subparagraphs (3) and (5) of paragraph (e) of this section, the butterfat from which leaves the plant in the form of milk, concentrated fluid milk, fluid milk products, or as cultured or flavored milk drinks containing 3.0 percent or more but not more than 5.0 percent of butterfat, and which is delivered to a plant or a purchaser in the State of New York or Northern New Jersey, but which at no time (1) is received, other than directly from producers, at a plant in the marketing area, or (2) otherwise enters the marketing area except as an incident to its transportation and delivery to a point outside of the marketing area: *Provided*, That use aboard a ship or other carrier shall not constitute such delivery.

8. Amend § 927.42 by changing (1) that portion preceding the schedule to read as follows:

§ 927.42 *Transportation differentials.* The market administrator shall determine and publicly announce a freight zone for each pool plant and he shall determine the freight zone for each plant at which milk or milk products subject to the provisions of § 927.78 or § 927.79 is received from dairy farmers or is first found. Such freight zone shall be based on the shorter of (a) the railroad mileage distances from the railroad shipping point nearest the plant to New York City railroad terminals, and (b) the shortest highway mileage from the plant to Columbus Circle, New York City, as computed (without using supplements issued thereto, from Mileage Guide No. 5 issued on July 20, 1949, effective August 21, 1949, by the Household Goods Carrier's Bureau, Agent, Washington, D. C. The freight zone for plants located in the marketing area shall be the 1–10 mile zone. The class prices set forth in § 927.40 and the fluid skim differential set forth in § 927.44 shall be plus or minus the amount set forth in the following schedule:

and (2) by changing the last freight zone in the schedule from "491–500" to "491 and over."

9. Amend § 927.50 as follows:

a. Add references to "§ 927.79" wherever reference is now made to "§ 927.78."

b. Delete from paragraph (c) the following: "such disposition to be covered by a signed statement of the plant operator if such other plant is not a pool plant."

10. Amend § 927.46 to change the time for announcing the average of prices paid in the preceding month by Midwestern condenseries from not later than the 25th day of each month to the 5th day of each month by making subparagraph (8) of paragraph (a) subparagraph (10) of paragraph (b) and renumbering subparagraph (9) in (a) to (8).

11. Amend § 927.54 by adding in paragraph (d) thereof a reference to "§ 927.32", and by adding a new paragraph (e) as follows:

(e) Make inspection of buildings and their surroundings, facilities, and equipment for verification purposes and to ascertain what constitutes a plant.

12. Amend § 927.61 by adding to paragraph (c) thereof "and § 927.79."

13. Amend § 927.77 by changing the title thereof to "Cream payments" and by adding a new paragraph (c) as follows:

(c) With respect to Class II milk the butterfat from which is on hand at the plant in the form of cream, or having left the plant in the form of cream had not been delivered to a plant or purchaser by the end of the period for establishing classification, but subsequent to the end of the period for establishing classification such cream is so handled that it would have been classified at a plant outside the marketing area in Class III pursuant to § 927.37 (e) (1) (3) (5) or (6) had such handling occurred during the period for establishing classification, the handler who received the milk from producers may claim a refund by filing a report giving the facts with respect to such handling. On the basis of verification of such report, the market administrator shall make payment out of the producer settlement fund to such handler or issue credit against any balance due from such handler to the producer settlement fund in an amount equal to the difference between the Class II and Class III prices applicable for the month when the milk was received from producers.

14. Delete § 927.78 and substitute in lieu thereof the following:

§ 927.78 *Payments on milk received from dairy farmers at non-pool plants.* Payments shall be made by handlers to producers, through the producer settlement fund, for milk and milk products under conditions, in amounts and by the handler pursuant to paragraphs (a) through (d) of this section: *Provided*, That for any month in which the volume of Class III milk used in the computation of the uniform price is less than 15 percent of the combined volume of the Class I–A and Class II milk used in such computation, the payments set forth in this section shall not be required.

(a) Payments shall be made for milk, concentrated fluid milk, fluid milk products, cultured or flavored milk drinks, cream, fluid cream products, and skim milk, which milk or milk product meets each of the following conditions:

(1) It was derived from milk received at a non-pool plant from dairy farmers other than the plant operator.

(2) It was shipped to, received in or distributed in the marketing area, or was received at a pool plant outside the marketing area.

(3) The milk or milk equivalent of the butterfat is classified as Class I–A or Class II, or the skim milk would be subject to the fluid skim differential if it were derived from pool milk.

(b) The amounts of payment for the products set forth in paragraph (a) of this section shall be as follows:

(1) If the milk or the milk equivalent of the butterfat, or the skim milk is classified and paid for under another order issued pursuant to the act, the amount of payment on such products, except skim milk, shall be any plus amount obtained by subtracting the value of the milk or the milk equivalent of the butterfat at the class price or prices under such order from the value computed in accordance with the classification and pricing set forth in this subpart: *Provided*, That the payment shall be at the rates set forth in subparagraph (2) of this paragraph if the other order permits the deduction of such payment from the amount otherwise due for such milk pursuant to such other order. The amount of payments on skim milk shall be an amount computed pursuant to § 927.44 adjusted for the location of the plant.

(2) If the milk or milk product is derived from milk received from dairy farmers at a non-pool plant in the 421–425 mile zone, or in some other zone nearer the marketing area, the handling of which is not regulated by an order issued pursuant to the act or is regulated by another order as specified in the proviso of subparagraph (1) of this paragraph, the amount of payment, except as otherwise specified in subparagraph (4) of this paragraph, shall be the difference between its classified value at the Class I–A or the Class II price, depending upon its classification, and its value at the Class III price, such class prices to be adjusted for butterfat test and the location of the plant at which the non-pool milk was originally received from farmers: *Provided*, That for concentrated fluid milk, cream, fluid cream products, and cultured or flavored milk drinks containing less than 3.0 percent or more than 5.0 percent butterfat, the payment shall be computed on the milk equivalent thereof as so classified. The amount of the payment on skim milk (either as skim milk or in cultured milk drinks) shall be the amount computed pursuant to § 927.44 as similarly adjusted for location.

(3) If the milk or milk product is derived from milk received from dairy farmers at a non-pool plant farther from the marketing area than the 421–425 mile zone, the handling of which is not regulated by another order issued pursuant to the act, or is regulated by another order as specified in the proviso of subparagraph (1) of this paragraph, the amount of payments shall be the difference between the value of its milk equivalent at the Class I–A or Class II price, depending upon its classification, and the value of such milk at the Midwestern condensery price announced pursuant to § 927.46 (6) (10), such class prices to be adjusted for the location of the plant at which the non-pool milk was originally received from dairy farmers: *Provided*, That for milk, fluid milk products and cultured or flavored milk drinks containing 3.0 percent or more but not more than 5.0 percent of butterfat, the payment shall be the difference between the value of such milk or milk product at the Class I–A price for milk containing 3.5 percent butterfat, adjusted for location of the plant, and the condensery price. The amount of the payment on skim milk (either as skim milk or in cultured milk drinks) shall be the amount computed pursuant to § 927.44 similarly adjusted for location.

(4) For any month in which the volume of milk subject to the butter-cheese adjustment used in the computation of the uniform price is more than 15 percent of the combined volume of the Class I–A and Class II milk used in such computation, the payment required by subparagraph (2) of this paragraph shall be increased by the value of the milk or milk equivalent at the rate of the butter-cheese adjustment at the plant where the milk was received from dairy farmers.

(5) In computing the milk equivalent value of milk or milk products as specified in this paragraph, such value shall be computed on the basis of milk containing 3.5 percent of butterfat.

(c) Payment for any milk or milk product pursuant to this section shall be made, on behalf of the handler receiving the milk from dairy farmers, by the appropriate handler as set forth in subparagraphs (1) through (3) of this paragraph: *Provided*, That if the milk is received from a handler under another order issued pursuant to the act, which order provides that the payment to the producer settlement fund may be deducted from the handler's obligation under the other order, the payment shall be made by the handler subject to the other order regardless of the provisions of subparagraphs (1) through (3) of this paragraph:

(1) By the handler first receiving the milk or milk product at a pool plant outside the marketing area.

(2) By the handler operating the plant where the milk or milk product is first received in the marketing area if the milk or milk product is not received at a pool plant outside the marketing area.

(3) By the handler operating the plant from which the milk or milk product was moved into the marketing area if such milk or milk product is neither received at a pool plant outside the marketing area nor at a plant in the marketing area.

(d) The amount due pursuant to this section shall be entered on the handler's account as a debit immediately after the filing of the report pursuant to § 927.50, or if the handler fails to file such report, such amount shall be entered on the handler's account in accordance with § 927.75.

15. Add a new § 927.79 as follows:

§ 927.79 *Payments on milk or milk products the source of which is not established.* Payments shall be made by handlers to producers through the producer settlement fund, for milk and milk products under conditions, in amounts and by the handler pursuant to paragraphs (a) through (d) of this section.

(a) Payments shall be made for milk, concentrated fluid milk, fluid milk products, cultured or flavored milk drinks, cream, fluid cream products, and skim milk which milk or milk product meets each of the following conditions:

(1) It was derived from milk for which the farm source is not established.

(2) It was shipped to, received in or distributed in the marketing area, or was received at a pool plant.

(3) If first found at a non-pool plant, the milk or milk equivalent of the butterfat is classified as Class I–A or Class II, or the skim milk is subject to the fluid skim differential.

(b) The amounts of payment for the product set forth in paragraph (a) of this section shall be as follows:

(1) For milk, concentrated fluid milk, fluid milk products, or cultured or flavored milk drinks containing 3.0 percent or more but not more than 5.0 percent of butterfat, the value of such milk, fluid milk products, cultured or flavored milk drinks or the milk equivalent of such concentrated fluid milk at the class price at the plant where first found.

(2) For cream, fluid cream products, or cultured or flavored milk drinks containing less than 3.0 percent or more than 5.0 percent of butterfat, the value of the milk equivalent of such product at a rate per hundredweight computed pursuant to § 927.40 (e) (1) adjusted by the differentials set forth in column C in the table in § 927.42 for the zone of the plant at which first found.

(3) For skim milk in a form subject to the fluid skim milk differential, the value at a rate per hundredweight computed as follows: Divide the amount computed pursuant to § 927.40 (e) (2) by 0.9125, add an amount computed pursuant to § 927.44 and adjust the result by the differentials set forth in column B in the table in § 927.42 for the zone of the plant where first found.

(4) For skim milk in a form not subject to the fluid skim milk differential, the value at a rate per hundredweight computed as follows: Divide the amount computed pursuant to § 927.40 (e) (2) by 0.9125.

(5) In computing the milk equivalent value of products as specified in this paragraph, such value shall be computed on the basis of milk containing 3.5 percent of butterfat.

(c) Payment for any milk or milk product pursuant to this section shall be made, on behalf of the handler receiving the milk from dairy farmers, by the appropriate handler as set forth in subparagraphs (1) through (3) of this paragraph:

(1) By the handler first receiving the milk or milk product at a pool plant outside the marketing area.

(2) By the handler operating the plant where the milk or milk product is first received in the marketing area if the milk or milk product is not received at a pool plant outside the marketing area.

(3) By the handler operating the plant from which the milk or milk product was moved into the marketing area if such milk or milk product is neither received at a pool plant outside the marketing area nor at a plant in the marketing area.

(d) The amount due pursuant to this section shall be entered on the handler's account as a debit immediately after the filing of the report pursuant to § 927.50, or if the handler fails to file such report, such amount shall be entered on the handler's account in accordance with § 927.75.

## DEPARTMENT OF LABOR

### Wage and Hour Division

### [ 29 CFR Part 779 ]

RETAIL OR SERVICE ESTABLISHMENT AND RELATED EXEMPTIONS

APPLICATION OF CERTAIN EXEMPTIONS TO FEED DEALERS

Retail or service establishment and related exemptions under section 13 (a) (2), (3), and (4) of the Fair Labor Standards Act of 1938, as amended.

Notice is hereby given that the Administrator of the Wage and Hour Division of the United States Department of Labor, proposes to amend Interpretative Bulletin, Part 779 (29 CFR Part 779) by the addition of a new § 779.31 to read as follows:

§ 779.31 *Application of the 13 (a) (2) and 13 (a) (4) exemptions to feed dealers.* (a) It is the purpose of this section to show generally how the principles governing the application of the 13 (a) (2) and the 13 (a) (4) exemptions apply to feed dealers' establishments, particularly where the establishment is engaged in performing certain processing operations on the feed it sells.

(b) In applying the tests of the 13 (a) (2) exemption all sales of feed to feeders will be considered to be retail sales except sales of a carload quantity or more of feed and sales made at a wholesale price, that is, at a price comparable to the prevailing price to dealers for resale. The custom grinding and mixing of feed (including the addition of supplements) for feeders from the grain they themselves bring in will be regarded as the performance of a retail service, and not the making or processing of goods under section 13 (a) (4), and the revenue derived therefrom will be included with the retail receipts of the establishment. Where the establishment meets the tests of the 13 (a) (2) exemption (see § 779.6) all employees employed by the establishment, except any employees who are engaged in the making or processing of feed, will be exempt. The status of employees who are engaged in the making or processing of feed must be determined under section 13 (a) (4), discussed in paragraph (c) of this section.

(c) Employees employed in the grinding and mixing of feed for sale (as distinguished from the grinding and mixing services discussed in paragraph (b) of this section) are engaged in the making or processing of goods and are therefore not exempt under section 13 (a) (2). In order for these employees to be exempt, the establishment by which they are employed must meet the tests of the 13 (a) (4) exemption (see § 779.18). One of the requirements of that exemption is that the establishment must be recognized as a retail establishment in the particular industry. The typical small feed mill engaged in selling goods to farmers appears to be recognized as retail in the industry. There are, of course, large mills which are essentially factories which are not so recognized. As an enforcement policy an establishment will be considered to have met this requirement (1) if less than 50 percent of its sales are composed of feed manufactured at the establishment; (2) if its sales of feeds manufactured at the establishment constitute more than 50 percent of the total sales of the establishment but do not exceed 2,000 tons a year. In determining the applicability of the exemption, computation of the sales of feed manufactured will be made on the basis of the annual (12 calendar months) period which immediately precedes the current calendar quarter in the same manner as set forth in § 779.17 for the period of time for the computation of sales.

Prior to the final adoption of the proposed amendment set forth above consideration will be given to any views, arguments or date pertaining thereto which are submitted in writing to the Administrator, Wage and Hour Division, United States Department of Labor, Washington 25, D. C., within 30 days from the date of publication of this notice in the FEDERAL REGISTER.

(52 Stat. 1060, as amended, 29 U. S. C. 1001 et seq.)

Signed at Washington, D. C., this 14th day of December 1953.

WM. R. MCCOMB,
*Administrator,*
*Wage and Hour Division.*

## POST OFFICE DEPARTMENT

### ORDERS RELATING TO THE TRANSFER OF CERTAIN ACTIVITIES AND FUNCTIONS, AND DELEGATIONS OF AUTHORITY

The following orders affecting the organization of the Post Office Department and relating to delegations of final authority with respect to matters affecting the public are, for the convenience of interested persons and in compliance with section 3 (a) (1) of the Administrative Procedure Act (60 Stat. 238; 5 U. S. C. 1002), consolidated for publication at one time (for order delegating authority with respect to leases, see 18 F. R. 1187):

[Order No. 55064]

DELEGATION OF AUTHORITY TO CERTAIN OFFICERS OF THE POST OFFICE DEPARTMENT

MARCH 5, 1953.

Pursuant to authority of section 1 (b) of Reorganization Plan No. 3 of 1949, authority is hereby delegated as follows:

(1) To the Assistant Postmaster General, Bureau of the Post Office Operations, to take final action in his own name with respect to all transactions relating to personnel of the field postal service and contractors paid from appropriation allotments of the Bureau of Post Office Operations, including the certification of all necessary Personnel forms, postmasters' salary transactions, and related journals, including journals relating to the appointment of postmasters and acting postmasters, the establishment and discontinuance of post offices, and change of sites;

(2) To the Assistant Postmaster General, Bureau of Transportation, to take final action in his own name with respect to the handling of matters relating to the transportation of mail by railroads, star routes, mail-messenger routes, powerboat and steamship routes, electric and cable-car service, side service, and foreign and domestic air-mail service paid from appropriation allotments of the Bureau of transportation, and the certification of all related orders and journals, including the certification of travel allowances to transportation clerks and journals relating thereto; and

(3) To the Solicitor, to take final action in his own name with respect to the consideration, settlement, and certification of all claims of postmasters for losses by fire, burglary, theft, or other unavoidable casualty.

[Order No. 55112]

PERMITS TO MAIL DISEASED TISSUES; DELEGATION OF AUTHORITY

APRIL 14, 1953.

Pursuant to authority of section 1 (b) of Reorganization Plan No. 3 of 1949 (63 Stat. 1066), authority is hereby delegated to the Solicitor of the Post Office Department to issue in his name the permits to receive, by mail, specimens of diseased tissues as provided for in § 35.17, Postal Laws and Regulations of 1948.

[Order No. 55140]

TRANSFER OF CERTAIN ACTIVITIES AND FUNCTIONS FROM CHIEF CLERK AND DIRECTOR OF PERSONNEL, POST OFFICE DEPARTMENT, TO BUREAU OF FACILITIES

MAY 1, 1953.

Pursuant to authority of section 1 (b) of Reorganization Plan No. 3 of 1949, responsibility for the following activities and functions are transferred from the Chief Clerk and Director of Personnel, Post Office Department, to the Bureau of Facilities, effective May 1, 1953:

1. The board of inspection which receives and inspects all supplies delivered at Washington, D. C.

2. All procurement and furnishing of supplies and equipment, as well as control of surplus property, as are performed by the Chief Clerk and Director of Personnel.

3. Assignment and control of space in the Departmental Building at Washington, D. C.

[Order No. 55141]

TRANSFER OF CERTAIN ACTIVITIES AND FUNCTIONS FROM BUREAU OF FACILITIES TO BUREAU OF TRANSPORTATION

MAY 1, 1953.

Pursuant to authority of section 1 (b) of Reoganization Plan No. 3 of 1949, responsibility for the preparation of advertisements inviting proposals for the transportation of the mails in cities by means of screen wagon service, and the drafting of orders awarding such service, including the preparation of contracts therefor, is transferred from the Bureau of Facilities to the Bureau of Transportation, effective May 1, 1953.

[Order No. 55142]

TRANSFER OF CERTAIN ACTIVITIES AND FUNCTIONS FROM BUREAU OF FACILITIES TO BUREAU OF POST OFFICE OPERATIONS

MAY 1, 1953.

Pursuant to authority of section 1 (b) of Reorganization Plan No. 3 of 1949, responsibility for the following activities and functions, and control of the necessary funds allotted for the operation of these activities and functions, are transferred from the Bureau of Facilities to the Bureau of Post Office Operations, effective May 1, 1953:

1. Operation of Government-owned vehicles and all personnel engaged in such operation (chief dispatchers, dispatchers, route supervisors, and driver-mechanics, and such substitute garagemen-drivers as are not fully engaged in vehicle maintenance work), including appointment and disciplining of such personnel.

2. Administration and operation of the pneumatic tube service, and all personnel employed in such service, including appointment and disciplining of such personnel.

3. Administration and operation of Government-owned post office buildings, and all custodial personnel, including appointment and disciplining of such personnel.

4. Cleaning of leased and rented quarters at first- and second-class post offices (job cleaners).

[Order No. 55143]

TRANSFER OF CERTAIN ACTIVITIES AND FUNCTIONS FROM BUREAU OF TRANSPORTATION TO BUREAU OF POST OFFICE OPERATIONS

MAY 1, 1953.

Pursuant to authority of section 1 (b) of Reorganization Plan No. 3 of 1949, responsibility for the following activities and functions are transferred from the Bureau of Transportation to the Bureau of Post Office Operations, effective May 1, 1953:

1. Preparation of instructions regarding the admissibility to the mails of matter liable to damage the mails or injure personnel, regarding the preparation and packing of such matter if admissible, and regarding the packing of other parcel post matter in the proper manner to withstand ordinary handling in transit.

[Order No. 55151]

DELEGATION OF AUTHORITY TO AUTHENTICATE COPIES OF DEPARTMENTAL DOCUMENTS

MAY 11, 1953.

Pursuant to authority of section 1 (b) of Reorganization Plan No. 3 of 1949 (63 Stat. 1066), authority is hereby delegated to the head of each bureau and office of the Department to (1) execute in his own name, and (2) affix the Seal of the Post Office Department to, all certificates necessary to authenticate copies or transcripts of any books, records, papers, or other documents under his custody and control, including certificates as to the authenticity of signatures of officers and employees under his jurisdiction, which the Post Office Department and Field Postal Service may be requested to provide.

[Order No. 55157]

SECURITY PROGRAM OF THE POST OFFICE DEPARTMENT DELEGATION OF AUTHORITY

MAY 18, 1953.

Pursuant to authority of section 1 (b) of Reorganization Plan No. 3 of 1949 (63 Stat. 1066), Executive Order No. 10450 (18 F. R. 2489), and the act of August 26, 1950, 64 Stat. 476, I do hereby—

1. Appoint the Chief Post Office Inspector as the Personnel Security Officer, and the Solicitor as the legal officer for personnel security matters, for the Post Office Department and Field Postal Service; and

2. Delegate to the Chief Post Office Inspector and to the Solicitor, acting jointly, authority to take such final action (including the promulgation of regulations) in their own names as may be necessary to effectuate the purposes of the act of August 26, 1950, 64 Stat. 476, and Executive Order No. 10450 and instructions of the President. The Chief Post Office Inspector and the Solicitor each is hereby authorized to delegate the authority vested in him by this order to any officer or employee under his jurisdiction as he may designate.

[Order No. 55159]

REORGANIZATION OF BUREAU OF FINANCE

MAY 20, 1953.

Pursuant to authority of section 1 (b) of Reorganization Plan No. 3 of 1949, the following changes will become effective as of the date of this order:

1. The responsibility and authority for the study and analysis of the postal rate structure (not including transportation rates), which were assigned to the Administrative Assistant to the Postmaster General under § 1.9 (e), Postal Laws and Regulations, 1948, as amended by Order No. 43339, dated June 9, 1950, are transferred to the Assistant Postmaster General, Bureau of Finance.

2. There shall be in the Bureau of Finance a Division of Postal Rates, a Division of Philately, a Division of Postal Funds, a Division of Money Orders, a Division of Postal Savings, and the positions of Executive Director and Administrative Aide. Each Division shall be under the supervision of a Director. The Directors of the said Divisions, the Executive Director, the Administrative Aide, and the other personnel of the Bureau of Finance, shall perform such duties as are assigned by the Assistant Postmaster General in charge of the Bureau.

3. The Division of Letter and Miscellaneous Mail, the Division of Newspaper and Periodical Mail, and the Division of Registered, Insured, and C. O. D. Mails, and all functions thereof except those pertaining to postal rates, are transferred from the jurisdiction of the Assistant Postmaster General, Bureau of Finance, to the Assistant Postmaster General, Bureau of Post Office Operations.

4. All postal rate functions now performed by the Divisions transferred to the Bureau of Post Office Operations by paragraph 3 hereof are transferred to the Division of Postal Rates, Bureau of Finance.

5. All functions pertaining to the Philatelic Agency, the Philatelic Exhibition Room, and philatelic matters, now assigned to the Division of Stamps and Philately, Bureau of Finance, are transferred to the Division of Philately, Bureau of Finance; and all remaining functions of the Division of Stamps and Philately are transferred to the Division of Postal Funds, Bureau of Finance.

6. All functions now assigned to the Division of Postal Finance, Bureau of Finance, are transferred to the Division of Postal Funds, Bureau of Finance.

[Order No. 55208]

REORGANIZATION OF BUREAU OF ACCOUNTS AND CHANGE OF NAME TO BUREAU OF THE CONTROLLER

JUNE 12, 1953.

Pursuant to authority of section 1 (b) of Reorganization Plan No. 3 of 1949, the following changes will become effective as of the date of this order:

1. The name of the Bureau of Accounts is changed to Bureau of the Controller. The position of comptroller is replaced by the position of controller.

2. The controller shall perform such duties as are assigned by the Postmaster General.

3. There shall be in the Bureau of the Controller, in addition to the controller, two assistant controllers, the administrative assistant to the controller, a Division of Accounting, a Division of Budget, a Division of Cost Analysis, a Division of Systems and Procedures, a Division of Internal Audit, and 12 regional accounting offices. Each division shall be under the supervision of a director.

4. All functions pertaining to budget, appropriation, financial and accounting matters now assigned to the Division of Budget and Planning, Office of the Administrative Assistant to the Postmaster General, are transferred to the Bureau of the Controller.

5. All accounting research functions now assigned to the Division of Research, Office of Administrative Assistant to the Postmaster General, are transferred to the Bureau of the Controller.

6. All functions assigned to the Division of Cost Ascertainment, Bureau of Accounts, are transferred to the Division of Cost Analysis, Bureau of the Controller.

7. All functions assigned to the Division of Accounts, Bureau of Accounts, are transferred to the Division of Accounting, Bureau of the Controller.

[Order No. 55239]

REMISSION OF FINES, PENALTIES, FORFEITURES, CLAIMS; DELEGATION OF AUTHORITY

JUNE 26, 1953.

Pursuant to authority of section 1 (b) of Reorganization Plan No. 3 of 1949 (63 Stat. 1066), authority is hereby delegated to the Controller (including any officer acting as such), to take final action, in his own name, with respect to all matters covered by § 18.52 of the Postal Laws and Regulations of 1948 (5 U. S. C. 383, 384).

[Order No. 55244]

CONTRACTS FOR ENVELOPES; DELEGATION OF AUTHORITY

JULY 1, 1953.

Pursuant to authority of section 1 (b) of Reorganization Plan No. 3 of 1949 (63 Stat. 1066), authority is hereby delegated to the Assistant Postmaster General, Bureau of Facilities (including any officer acting as such), to take final action, in his own name, with respect to all matters pertaining to contracts for all envelopes (including stamped envelopes, and envelopes for the departments and independent establishments of the Government).

[Order No. 55380]

ESTABLISHMENT OF BUREAU OF PERSONNEL; TRANSFER OF CERTAIN PERSONNEL, ACTIVITIES AND FUNDS FROM CHIEF CLERK AND DIRECTOR OF PERSONNEL TO BUREAU OF PERSONNEL; CHANGE OF NAME OF OFFICE OF CHIEF CLERK AND DIRECTOR OF PERSONNEL TO OFFICE OF CHIEF CLERK

SEPTEMBER 24, 1953.

Pursuant to authority of section 1 (b) of Reorganization Plan No. 3 of 1949 and

P. L. 140, the following changes will become effective as of the date of this order.

1. There is established the Bureau of Personnel under the Assistant Postmaster General, Bureau of Personnel. This Bureau will be responsible for providing specialized staff advice, service, control, and leadership in personnel administration throughout the Postal Establishment.

2. Until the Assistant Postmaster General, Bureau of Personnel, is designated, the Deputy Postmaster General, in addition to his regular duties, shall direct the Bureau of Personnel.

3. There shall be in the Bureau of Personnel a Personnel Planning and Practices Division, a Departmental Personnel Division, and Employee Organizations Division and a Field Coordination Division.

4. The Departmental Personnel Division of the Bureau of Personnel shall be activated immediately. The Departmental Personnel Division shall be responsible for administration of personnel functions affecting the departmental service, including Employment and Placement; Classification and Awards; Training and Development; Employee Relations; and Processing and Records.

5. All personnel, functions and records of the Classification Division, Placement Office, Personnel Division and such other personnel and functions of the Office of the Chief Clerk and Director of Personnel as may be designated by the Deputy Postmaster General are transferred to the Departmental Personnel Division of the Bureau of Personnel.

6. The Office of the Chief Clerk and Director of Personnel shall hereafter be designated the Office of the Chief Clerk. The position of Chief Clerk and Director of Personnel is redesignated as Chief Clerk.

7. The Office of the Chief Clerk shall be attached to the Office of the Postmaster General and shall retain supervision of such personnel, and control of such functions and records as are not transferred by this Order to the Bureau of Personnel.

[Order No. 55424]

ESTABLISHMENT OF THE OFFICE OF THE CHIEF INDUSTRIAL ENGINEER; TRANSFER OF CERTAIN PERSONNEL, ACTIVITIES AND FUNDS FROM THE OFFICE OF ADMINISTRATIVE ASSISTANT TO THE POSTMASTER GENERAL TO THE OFFICE OF THE CHIEF INDUSTRIAL ENGINEER

NOVEMBER 3, 1953.

Pursuant to authority of section 1 (b) of Reorganization Plan No. 3 of 1949, the following changes will become effective as of November 1, 1953:

1. There is established within the Post Office Department the Office of the Chief Industrial Engineer. Operating under the direction of the Assistant Postmaster General, Bureau of Post Office Operations, the Office of the Chief Industrial Engineer shall be responsible to the Postmaster General for providing throughout the Postal Establishment staff industrial engineering advice and services, and for conducting equipment and work methods research and development programs.

2. There shall be a Chief Industrial Engineer who shall direct the Office of the Chief Industrial Engineer. Until further notice, there shall be under the Chief Industrial Engineer four Directors to provide supervision over the following Divisions: Development; Procedures; Training and Instruction; and Drafting, Statistical and Clerical. Each division shall be under the supervision of one of the Directors.

3. All personnel, functions, and records of the Office of Administrative Assistant to the Postmaster General pertaining to equipment research and development, work procedures and methods, work performance standards, layout, work simplification, flow charts, technical evaluation of suggestions, drafting, reports and statistics related to the foregoing, and writing of standard practice instructions and manuals are transferred to the Office of the Chief Industrial Engineer.

4. Funds for the payment of salaries and travel of personnel transferred in accordance with this order, and for other fiscal requirements now included in Allotment Account No. 102, are ordered to be transferred from the Office of Administrative Assistant to the Postmaster General to the Office of the Chief Industrial Engineer.

[Order No. 55423]

DECENTRALIZATION OF POST OFFICE OPERATIONS, EMBRACING THE STATES OF OHIO, KENTUCKY, AND INDIANA, AND THE ESTABLISHMENT OF THE REGIONAL HEADQUARTERS AT CINCINNATI, OHIO

NOVEMBER 10, 1953.

Pursuant to authority of section 1 (b) of Reorganization Plan No. 3 of 1949, the following changes will become effective on November 24, 1953:

1. On the effective date there will be established a regional headquarters at Cincinnati, Ohio, under a Regional Operations Manager. Geographically this region will embrace the States of Ohio, Kentucky, and Indiana (excluding Lake County). The Regional Operations Manager will be responsible to the Assistant Postmaster General, Bureau of Post Office Operations, for the direction of post office operations in this region. The Regional Operations Manager will also be subject to all policies affecting regional operations prescribed by the Department in Washington. Functions, such as those listed below, which were formerly discharged by the Bureau of Post Office Operations in Washington, will now be discharged by the Regional Headquarters.

A. Personnel functions, including such items as recruitment, selection and placement of personnel; training activities; labor relations; safety and health programs; classification of positions; awards and efficiency rating systems; review and disposition of disciplinary actions; and liaison with the Civil Service Commission in the region.

B. Service functions, including recommendations to the Department for the establishment or discontinuance of post offices, classified stations and branches; approval of requests for allowances of funds; maintenance of high standards of service in all post offices; and effective control of costs.

C. Postal engineering functions, including administration of cost reduction programs; improvement in work methods; endorsement of requests for capital expenditures; maintenance of work standards; layout of facilities; provision of work simplification methods and training; and development of systems and procedures, other than accounting and fiscal procedures.

D. Budget functions, including preparation of estimates; review of overall utilization of funds; approval of contracts from the standpoint of availability of funds; and conduct of cost analysis studies.

E. Public information functions, including encouragement of public cooperation and participation in improving postal methods; and maintaining good relations with federal, state, and municipal officials.

2. Decentralization at this time is limited to Bureau of Post Office Operations activities. Other bureaus and offices will be unaffected by this order, but all concerned are expected to coordinate and cooperate with this new regional organization. Decentralization of other Departmental functions and the placing of activities already decentralized into the regional organization will be carried forward as soon as possible. Orders effectuating these changes will be issued from time to time.

Previous orders or instructions concerning the routing of communications from postmasters to the Bureau of Post Office Operations in Washington are hereby superseded. All communications with respect to the functions set forth in this order will be directed to the appropriate district manager.

3. The region will be divided into nine Districts. District headquarters cities, and the counties included in each District, are as follows:

DISTRICT OFFICE

*Cincinnati, Ohio*

Indiana Counties: Dearborn, Franklin, Ohio, Ripley, Switzerland, Union.

Kentucky Counties: Boone, Bracken, Campbell, Carroll, Fleming, Gallatin, Grant, Greenup, Harrison, Kenton, Lewis, Mason, Owen, Pendleton, Robertson.

Ohio Counties: Adams, Brown, Butler, Champaign, Clark, Clermont, Clinton, Darke, Greene, Hamilton, Highland, Miami, Montgomery, Pike, Preble, Scioto, Shelby, Warren.

*Cleveland, Ohio*

Ohio Counties: Ashtabula, Ashland, Carroll, Columbiana, Crawford, Cuyahoga, Erie, Geauga, Holmes, Huron, Lake, Lorain, Mahoning, Medina, Portage, Richland, Stark, Summit, Trumbull, Tuscarawas, Wayne.

*Columbus, Ohio*

Ohio Counties: Athens, Belmont, Coshocton, Delaware, Fairfield, Fayette, Franklin, Gallia, Guernsey, Harrison, Hocking, Jackson, Jefferson, Knox, Lawrence, Licking, Madison, Marion, Meigs, Monroe, Morgan, Morrow, Muskingum, Noble, Perry, Pickaway, Ross, Union, Vinton, Washington.

*Toledo, Ohio*

Ohio Counties: Allen, Auglaize, Defiance, Fulton, Hancock, Hardin, Henry, Logan, Lucas, Mercer, Ottawa, Paulding, Putnam, Sandusky, Seneca, Van Wert, Williams, Wood, Wyandot.

*Evansville, Ind.*

Indiana Counties: Dubois, Gibson, Pike, Posey, Spencer, Vanderburgh, Warrick.

Kentucky Counties: Ballard, Caldwell, Calloway, Carlisle, Christian, Crittenden, Daviess, Fulton, Graves, Hancock, Henderson, Hickman, Hopkins, Livingston, Lyon, McCracken, McLean, Marshall, Muhlenberg, Ohio, Trigg, Union, Webster.

*Fort Wayne, Ind.*

Indiana Counties: Adams, Allen, Blackford, Cass, De Kalb, Elkhart, Fulton, Huntington, Jay, Kosciusko, Lagrange, La Porte, Marshall, Miami, Noble, Porter, Pulaski, Saint Joseph, Starke, Steuben, Wabash, Wells, Whitley.

*Indianapolis, Ind.*

Indiana Counties: Bartholomew, Benton, Boone, Brown, Carroll, Clay, Clinton, Daviess, Decatur, Delaware, Fayette, Fountain, Grant, Greene, Hamilton, Hancock, Hendricks, Henry, Howard, Jackson, Jasper, Jennings, Johnson, Knox, Lawrence, Madison, Marion, Martin, Monroe, Montgomery, Morgan, Newton, Owen, Parke, Putnam, Randolph, Rush, Shelby, Sullivan, Tippecanoe, Tipton, Vermillion, Vigo, Warren, Wayne, White.

*Lexington, Ky.*

Kentucky Counties: Bath, Bell, Bourbon, Breathitt, Boyd, Boyle, Carter, Clark, Clay, Elliott, Estill, Fayette, Floyd, Garnard, Harlan, Jackson, Jessamine, Johnson, Knott, Knox, Laurel, Lawrence, Lee, Leslie, Letcher, Lincoln, Madison, Magoffin, Martin, Menifee, Mercer, Montgomery, Morgan, Nicholas, Owsley, Perry, Pike, Powell, Rockcastle, Rowan, Scott, Whitley, Wolfe, Woodford.

*Louisville, Ky.*

Kentucky Counties: Adair, Allen, Anderson, Barren, Breckinridge, Bullitt, Butler, Casey, Clinton, Cumberland, Franklin, Edmonson, Grayson, Green, Hardin, Hart, Henry, Jefferson, Larue, Logan, McCreary, Marion, Meade, Metcalfe, Monroe, Nelson, Oldham, Pulaski, Russell, Shelby, Simpson, Spencer, Taylor, Trimble, Todd, Warren, Washington, Wayne.

Indiana Counties: Clark, Crawford, Floyd, Harrison, Jefferson, Orange, Perry, Scott, Washington.

4. District Managers will be designated in a separate announcement. They will act for and be responsible to the Regional Operations Manager on post office matters within their Districts. Each District Manager will be responsible for functions delegated to him by the Regional Operations Manager, including such things as: Making major operating decisions within his District; recommending action on all supervisory appointments; recommending action on requests for funds; advising Regional Operations Manager on District matters and conditions, and carrying out regional policies in the District; interpreting departmental and regional policies and recommending changes; coordinating with other bureaus and government agencies in the District; taking necessary actions on complaints; directing the control of expenditures in the District; and maintaining essential personnel records.

[Order No. 55441]

ESTABLISHMENT OF POSITIONS OF EXECUTIVE ASSISTANT TO THE DEPUTY POSTMASTER GENERAL AND ADMINISTRATIVE ASSISTANT TO THE DEPUTY POSTMASTER GENERAL; TRANSFER OF CERTAIN FUNCTIONS, PERSONNEL AND FUNDS TO THESE OFFICES AND TO THE BUREAU OF PERSONNEL AND THE BUREAU OF THE CONTROLLER; ABOLITION OF OFFICE OF THE ADMINISTRATIVE ASSISTANT TO THE POSTMASTER GENERAL AND OF THE OFFICE OF THE CHIEF CLERK

NOVEMBER 18, 1953.

Pursuant to the authority of sections 1 (a) and 1 (b) of Reorganization Plan No. 3 of 1949, the following changes in the organization of the Post Office Department will take effect on November 18, 1953.

1. There is established and attached to the Office of the Postmaster General an Executive Assistant to the Deputy Postmaster General. He shall be responsible to the Deputy Postmaster General and have the following duties and responsibilities:

(a) He shall represent the Deputy Postmaster General on matters of staff coordination, planning, and reporting;

(b) He shall be responsible for the control and release of all official regulations, manuals, reports and bulletins of the Post Office Department; and

(c) He shall perform such other and further duties as the Deputy Postmaster General may prescribe.

The Executive Assistant to the Postmaster General shall have such staff and clerical assistance as the Deputy Postmaster General directs.

2. There is established and attached to the Office of the Postmaster General an Administrative Assistant to the Deputy Postmaster General. He shall be responsible to the Deputy Postmaster General and shall have responsibility for the following duties and functions in addition to such other duties and functions as may hereafter in this or in subsequent orders be assigned to him:

(a) Supply and other office services for the Post Office Department in Washington, D. C.;

(b) Civilian Defense activities within the postal establishment;

(c) Mail distribution, messenger service, for the Post Office Department in Washington, D. C.;

(d) Space control, utilization, parking privileges, building maintenance and all matters in connection with the operation of the Post Office Department Building in Washington, D. C.

All personnel currently engaged in mail distribution, messenger service and office supply functions in the bureaus and offices of the Post Office Department shall be transferred to the Administrative Assistant to the Deputy Postmaster General, together with appropriate equipment and funds. Where a full-time messenger or supply clerk is needed in any bureau or office such personnel will be detailed by the Administrative Assistant to the Deputy Postmaster General.

The Hearing Examiners and their staff are hereby transferred to the administrative direction of the Administrative Assistant to the Deputy Postmaster General who shall operate under such delegations of authority as may separately be issued.

Administration of post office libraries for the Department, other than the Law Library, is assigned to the Administrative Assistant to the Deputy Postmaster General. All personnel currently engaged in such functions in the Bureau of the Chief Post Office Inspector shall be transferred to the Administrative Assistant to the Deputy Postmaster General, together with appropriate equipment and funds.

The Administrative Assistant to the Deputy Postmaster General is hereby designated to act as—

(a) Records Disposal Officer and as liaison with the General Services Administration with respect to matters arising under the Federal Records Act of 1950;

(b) Liaison Officer with the General Services Administration on matters affecting the Post Office Department building in Washington, D. C.;

(c) Liaison Officer with Government Services, Inc., on all matters affecting the cafeteria and dining rooms in the Post Office Department building in Washington, D. C.

All previous designations for the performance of these functions are rescinded.

The Administrative Assistant to the Deputy Postmaster General shall have such administrative, technical and clerical assistance as the Deputy Postmaster General shall direct. Such assistance shall be organized into a Division of Headquarters Services and a Division of Special Assignments. Each Division shall be headed by a Director who shall be responsible to the Administrative Assistant to the Deputy Postmaster General.

3. The Office of Administrative Assistant to the Postmaster General is abolished. The functions of that office are transferred as follows:

(a) The study and analysis of mail transportation rates to the Assistant Postmaster General, Bureau of Transportation;

(b) All other duties, not previously transferred to the Bureau of Finance, the Bureau of Personnel, the Bureau of the Controller or the Office of the Chief Industrial Engineer, to the Administrative Assistant to the Deputy Postmaster General together with personnel and funds currently assigned and allocated therefor.

4. The Office of the Chief Clerk is abolished. The functions and duties of that office are transferred as follows:

(a) The functions of the Safety Division and the Health Unit to the Bureau of Personnel;

(b) The functions of the Budget Control Section, the Forms Control Clerk and responsibility for recording and disseminating communications from the Comptroller General, to the Bureau of the Controller;

(c) All other functions of the Office of the Chief Clerk to the Administrative Assistant to the Deputy Postmaster General.

Personnel, records, equipment and funds of the Office of the Chief Clerk shall be reassigned or reallocated as mutually agreed upon by the Controller, Assistant Postmaster General, Bureau of Personnel and Administrative Assistant to the Deputy Postmaster General or upon failure of agreement as the Deputy Postmaster General shall direct.

The personnel statistical reports heretofore prepared by the Budget Control and Payroll Sections of the Office of the Chief Clerk will be prepared in the Bureau of the Controller for the Bureau of Personnel until such time as the heads of those Bureaus shall mutually agree to the transfer of responsibility therefor, together with appropriate personnel, records, equipment and funds.

5. The Assistant Postmaster General, Bureau of Personnel, is designated (with power to redelegate within the Bureau of Personnel) Fair Employment Officer and Chairman of the Grievance Board of the Post Office Department. Previous designations are rescinded.

[Order No. 55458]

DELEGATION OF AUTHORITY WITH RESPECT TO MAINTENANCE, OPERATION, PROTECTION, MANAGEMENT, AND DISPOSAL OF POST OFFICE SITES AND ADDITIONS THERETO

DECEMBER 3, 1953.

The functions and authority delegated to the Postmaster General under date of November 6, 1953, by the Administrator of General Services (18 F. R. 7259), are hereby delegated to the Assistant Postmaster General, Bureau of Facilities (including the person acting as such officer), and to such officers or employees under his jurisdiction as he shall designate.

(R. S. 161, 396; secs. 304, 309, 42 Stat. 24, 25, sec. 1 (b), 63 Stat. 1066; 5 U. S. C. 22, 133z–15, 369)

[SEAL] ROSS RIZLEY, *Solicitor.*

## DEPARTMENT OF THE INTERIOR

### Bureau of Land Management

ALASKA

NOTICE OF FILING OF PLAT OF SURVEY

DECEMBER 10, 1953.

Notice is given that the plat of original survey of the following described lands, accepted March 8, 1951 will be officially filed in the Land Office, Fairbanks, Alaska, effective at 10:00 a. m. on the 35th day after the date of this notice:

COPPER RIVER MERIDIAN

T. 18 N., R. 13 E.,
Sections 18, 19, and 20.

The area described contains 1,884.68 acres.

Of the land described Sections 18 and 19 and Lots 5 and 6 and the SW¼ of Section 20 are withdrawn by Public Land Order No. 386 of July 31, 1947, "for classification and survey". (Tok Junction Reserve.)

The lands are located at or near Tok Junction and are traversed by the Alaska Highway. The terrain is quite level and covered with small birch, spruce, and alder, suitable only for fuel. The land is covered by a heavy blanket of moss, and the soil consists of silt loam underlain in the gravel.

At the hour and date specified above the said lands shall, subject to valid existing rights and the provisions of existing withdrawals, become subject to application, petition, location, or selection as follows:

(a) *Ninety-one day period for preference-right filings.* For a period of 91 days, commencing at the hour and on the day specified above, the public lands affected by this notice shall be subject only to (1) application under the Homestead or the Small Tract Act of June 1, 1938 (52 Stat. 609, 43 U. S. C. 682a), as amended, home or headquarter site under the act of May 26, 1934 (48 Stat. 809, 48 U. S. C. 461), by qualified veterans of World War II and other qualified persons entitled to preference under the act of Sept. 27, 1944 (58 Stat. 747, 43 U. S. C. 279–284), as amended, subject to the requirements of applicable law, and (2) applications under any applicable public land law, based on prior existing valid settlement rights and preference rights conferred by existing laws or equitable claims subject to allowance and confirmation. Applications under subdivision (1) of this paragraph shall be subject to applications and claims of the classes described in subdivision (2) of this paragraph. All applications filed under the paragraph either at or before 10:00 a. m. on the 35th day after the date of this notice shall be treated as though filed simultaneously at that time. All applications filed under this paragraph after 10:00 a. m. on the said 35th day shall be considered in the order of filing.

(b) *Date for non-preference-right filings.* Commencing at 10:00 a. m. on the 126th day after the date of this notice, any lands remaining unappropriated shall become subject to such application, petition, location, selection, or other appropriation by the public generally as may be authorized by the public-land laws. All such applications filed either at or before 10:00 a. m. on the 126th day after the date of this notice, shall be treated as though filed simultaneously at the hour specified on such 126th day. All applications filed thereafter shall be considered in the order of filing.

A veteran shall accompany his application with a complete photostatic, or other copy (both sides), of his certificate of honorable discharge, or of an official document of his branch of the service which shows clearly his honorable discharge as defined in § 181.36 of Title 43 of the Code of Federal Regulations, or constitutes evidence of other facts upon which the claim for preference is based and which shows clearly the period of service. Other persons claiming credit for service of veterans must furnish like proof in support of their claims. Persons asserting preference rights, through settlement or otherwise, and those having equitable claims, shall accompany their applications by duly corroborated statement in support thereof, setting forth in detail all facts relevant to their claims.

Applications for these lands, which shall be filed in the Land Office at Fairbanks, Alaska, shall be acted upon in accordance with the regulations contained in § 295.8 of Title 43 of the Code of Federal Regulations to the extent such regulations are applicable. Applications under the homestead and homesite laws shall be governed by the regulations contained in Parts 64, 65 and 166 of Title 43 of the Code of Federal Regulations and applications under the Small Tract Act of June 1, 1938, shall be governed by the regulations contained in Part 257 of that title.

Inquiries concerning these lands shall be addressed to the Manager, Land Office.

CHESTER W. MCNALLY, *Acting Manager.*

## DEPARTMENT OF COMMERCE

### Bureau of Foreign Commerce

DEUTSCHE NOVOCILLIN G. M. B. H. ET AL.

ORDER REVOKING LICENSES AND TEMPORARILY DENYING EXPORT PRIVILEGES

In the matter of Deutsche Novocillin G. m. b. H., Kurt Heinz Bendixen, Bendixen Company, Landbergerstrasse 336, Munich 42, Germany; and Funcke & Company G. m. b. H. Chemische Fabrik, Helmut Funcke, Thiemann Str. 1-11, Berlin, Germany; Respondents.

Pursuant to the provisions of § 382.11 (b) of the Export Control Regulations (15 CFR Part 382), the Director of the Investigation Staff of the Bureau of Foreign Commerce, United States Department of Commerce, filed with Compliance Commissioner Paul M. Greene, an ex parte application dated November 23, 1953, requesting that the above-named persons and firms be temporarily suspended from all United States export privileges pending the determination and disposition of administrative compliance proceedings now being formulated against said persons and firms, or any of them, on the ground that such temporary suspension is necessary to protect the public interest until administrative proceedings are completed.

The Director of the Investigation Staff alleges in said application that Deutsche Novocillin G. m. b. H., through its owner-director, Kurt Heinz Bendixen, has violated the Export Control Law and regulations by having knowingly made false representations to and concealed material facts from United States Government officials abroad for the purpose of causing exportations of $341,000 worth of dihydrostreptomycin sulphate from the United States; that such misrepresentations and concealments were made with relation to two proposed export transactions in which applications for export licenses were submitted in October and December 1952 accompanied by end-use and destination statements in which Deutsche Novocillin was designated as the processor of the dihydrostreptomycin; that during the period October 1952 through May 1953 Deutsche Novocillin unlawfully diverted and transshipped to unauthorized countries nine separate shipments of United States antibiotics worth $80,000, contrary to the terms and provisions of export licenses issued in reliance upon the representations and certifications of the company, and in contravention of the destination control notice on each of the shipping documents relating to said shipments; and that there is reason to believe that Deutsche Novocillin has diverted other shipments of United States origin antibiotics to unauthorized countries whose interests are inimical to the United States and that Bendixen has sought to hamper the investigation of these transactions by his uncooperative and evasive attitude toward United States investigative officers.

The Compliance Commissioner has reviewed the evidentiary material presented in support of the application and, in addition to having reached the conclusion that the allegations in the application are sustained by the evidence, has concluded further that unless the export transactions of the named persons and firms are temporarily suspended pending final administrative determination of the charges now being formulated, irreparable injury may be done to the integrity of the export control system and to the security of the United States.

The Compliance Commissioner has, accordingly, recommended that the application be granted and that an order issue against the persons and firms designated (all of whom are related to Bendixen by ownership or control), temporarily denying them all export privileges until the administrative compliance proceedings are finally concluded. He has based this recommendation also upon his finding that Bendixen and the other firms and persons named herein have been, and may continue to be, associated in various transactions involving United States origin antibiotics and other commodities with firms in Holland known to have engaged in transshipments of United States commodities in wilful, deliberate violation of United States Export Control Law and regulations, for which such firms have been denied all United States export privileges for the duration of export controls (18 F. R. 7179).

The Compliance Commissioner has also pointed out that Bendixen has refused, without justification, to disclose pertinent information to United States investigative officers about his participation in previously licensed antibiotics transactions which there is reason to believe have been diverted to unfriendly countries. By this attitude of noncooperation Bendixen hampers and impedes the investigation and thus would not appear to be entitled to participate in future export transactions, especially where evidence already in the possession of Bureau of Foreign Commerce shows that the commodities involved in nine previously licensed transactions did not go to their authorized declared destinations. The serious question as to Bendixen's trustworthiness in export transactions thus emphasizes the need for a temporary order of the kind sought herein.

It appears from the foregoing, and from the fact that Deutsche Novocillin G. m. b. H. has appeared as a party to applications for export licenses and may be a party to further exportations of commodities from the United States, that it would be contrary to the public interest to permit the company, and the others named herein, to participate in exportations from the United States until the charges now under formulation have been determined; that there is reasonable cause to believe from the foregoing that said persons and firms may have made, or caused to be made, to the Bureau of Foreign Commerce material misrepresentations as to the ultimate destination of other exportations of commodities from the United States, and that such commodities may likewise be diverted to unauthorized destinations contrary to United States Export Control Law and regulations unless said persons and firms are prohibited from export privileges and from participating in exportations from the United States. It accordingly appears that the temporary suspension of their export privileges as hereinbelow provided is fair and reasonable, and in accord with the evidence presented, and is necessary to protect the public interest pending the ultimate determination of the Administrative compliance proceedings now in preparation.

Now, therefore, it is ordered as follows:

(1) All outstanding validated export licenses in which Deutsche Novocillin G. m. b. H., Bendixen Company, Kurt Heinz Bendixen, Funcke & Company G. m. b. H. Chemische Fabrik, and Helmut Funcke (hereinafter referred to as Respondents), or any of them, appear or participate as purchaser, intermediate or ultimate consignee, or otherwise, are hereby revoked and shall be forthwith returned to the Bureau of Foreign Commerce for cancellation, and delivery of any shipment of commodities from the United States which may be now or during the term of this order, or any amendment or extension thereof, intended for said Respondents, or any of them, pursuant to validated export licenses, or under general license, are prohibited.

(2) Respondents, their successors or assigns, directors, officers, associates, partners, representatives, agents, and/or employees are hereby denied the privileges of exporting, receiving, or otherwise participating in any manner, directly or indirectly, in any exportation of any commodity, or of technical data, from the United States to any destination, including Canada, and of participating, directly or indirectly, in the financing, forwarding, transporting, or other servicing of such exports.

(3) Such denial of export privileges shall apply not only to the named Respondents and those persons or firms which may be connected with them as set forth in paragraph (2) above, but also to any person, firm, corporation, or business organization with which they, or any of them, may be now or hereafter related by ownership, control position of responsibility, or other connection in the conduct of trade involving exports of commodities from the United States, or the receiving of such exports.

(4) This order shall be effective from the date of its issuance and shall remain in effect until the administrative compliance proceedings now under formulation against said Respondents, or any of them, shall be ultimately determined and disposed of, except in so far as their order may be hereafter extended, amended, or modified in accordance with the provisions of the export control regulations.

(5) A certified true copy of this order shall be served upon the named Respondents, and each of them, service by mail being deemed sufficient.

(6) In accordance with the provisions of § 382.11 (c) of the export control regulations, the Respondents may at any time move to vacate or modify this temporary suspension order by filing an appropriate motion therefor with the Compliance Commissioner and may request oral hearing thereon, which, if requested, shall be held before the Compliance Commissioner at the earliest possible date.

Dated: December 14, 1953.

JOHN C. BORTON, *Director, Office of Export Supply.*

[F. R. Doc. 53-10479; Filed, Dec. 16, 1953; 8:50 a. m.]

## FEDERAL POWER COMMISSION

[Docket Nos. G-1277, G-1335, G-1407, G-1411, G-1620, G-1633, G-1650, G-1747, G-1800]

TRANSCONTINENTAL GAS PIPE LINE CORP. ET AL.

ORDER MODIFYING, SUPPLEMENTING, AND AFFIRMING AS MODIFIED AND SUPPLEMENTED, INITIAL DECISION OF PRESIDING EXAMINER, REOPENING AND CONSOLIDATING PROCEEDINGS, ORDER TO SHOW CAUSE AND FIXING DATE OF HEARING

In the matters of Transcontinental Gas Pipe Line Corporation, Docket Nos. G-1277, G-1650; Atlantic Seaboard Corporation, Docket Nos. G-1621, G-1747; the Manufacturers Light and Heat Company, Docket No. G-1633; United Fuel Gas Company, Docket No. G-1800; and in the matters of Carolina Natural Gas Corporation, Docket No. G-1335; Public Service Company of North Carolina, Inc., Docket No. G-1407; Trancontinental Gas Pipe Line Corporation, Docket No. G-1411.

The matters of Docket Nos. G-1277 (Reopened), G-1650, G-1621, G-1633, G-1747, and G-1800 are before the Commission for its disposition on appeal from the Presiding Examiner's decision and accompanying orders of November 28, 1952, as a result of exceptions filed by various parties, and the Commission's rules of practice and procedure. By such decision and orders, among other things, the Presiding Examiner, subject to review by the Commission on appeal or on its own motion as provided by its rules of practice and procedure, issued certificates of public convenience and

necessity to Transcontinental Gas Pipe Line Corporation (Transcontinental), Docket Nos. G–1277 and G–1650, Atlantic Seaboard Corporation (Atlantic), Docket No. G–1621, the Manufacturers Light and Heat Company (Manufacturers), Docket No. G–1633, and United Fuel Gas Company (United Fuel), Docket No. G–1800.

Several interveners, in connection with their appeal from the Examiner's Decision, moved from oral argument concerning the matters and issues which were the subject matter of their appeal. In addition, Long Island Lighting Company requested in its motion for oral argument that it be afforded an opportunity to file a brief in support thereof.

Subsequent to the appeals filed by the various interveners, the Public Service Electric and Gas Company on July 8, 1953 filed a petition in Docket No. G–1277 (Reopened) to reopen said proceeding for the purpose of taking additional evidence reflecting, according to said petition, material changes in gas requirements and economic conditions, and to permit oral argument, if the Commission deemed it necessary, in support of its petition. The petition was opposed by various interveners.

The matters of our order issued June 7, 1951, in Docket Nos. G–1335, G–1407, G–1411 and our previous order in Docket No. G–1277, issued April 28, 1950, are before us on our own motion due to the fact that the evidence of record in Docket No. G–1277 (Reopened) has strikingly illustrated the inability of Transcontinental's present system adequately to provide full gas service in its present market area.

The Commission by its order issued April 28, 1950, at Docket No. G–1277, authorized Transcontinental to supply natural gas to the following communities, among others, and in the volumes set forth in the following tabulation:

| | *Mcf per day* |
|---|---|
| Maplesville, Ala | 101 |
| Ashland, Ala | 280 |
| Lineville, Ala | 244 |
| Morganza, La | 125 |

The allocations above referred to were based in part upon the several communities executing service agreements with reference to the supply of natural gas from Transcontinental within 6 months from the date of the tender thereof,[1] or forfeit their right to receive service. An examination of the Commission's files discloses that the above-named communities, with the exception of Maplesville, have not executed service agreements as provided by our order of April 28, 1950, nor have any of them ever purchased gas from Transcontinental.

By our order issued June 7, 1951, Carolina Natural Gas Corporation (Carolina Natural) at Docket No. G–1335 was authorized to construct and operate facilities for the purpose of supplying natural gas in various communities in North Carolina. By said order, it was provided that Carolina Natural report to the Commission in writing, under oath, the commencement dates of construction of the facilities authorized and further, that it report the completion dates of the construction, together with the dates of commencement of the operations thereof. From the information at hand, including the testimony submitted during the course of the proceedings at Docket No. G–1277 (Reopened), it is clear that no such reports have ever been filed, nor construction commenced as authorized at Docket No. G–1335, although over two years have elapsed.

The Commission's order of June 7, 1951, also authorized the Public Service Company of North Carolina, Inc. (Public Service), at Docket No. G–1407, to construct and operate facilities for the supplying of natural gas to various communities in North Carolina, including Shelby and Kings Mountain. The authorization to Public Service, by said order, was granted upon the condition that Public Service should receive from the cities it proposed to serve in North Carolina such authorization as may be required for the construction and operation of the distribution systems necessary to render service in the various communities. The order further provided that evidence of such authorization be filed with the Commission within 6 months from the date of the issuance of said order (June 7, 1951) unless extended by further order of the Commission. And, further, that in the event Public Service failed to obtain such authorization, its allocation of gas from Transcontinental in Docket No. G–1411 was subject to being reduced in proportion to the requirements of the communities for which authorization was not received.

The certificate issued to Transcontinental in Docket No. G–1411 was conditioned to require it to supply natural gas to Carolina Natural and Public Service as shown in the tabulation below:

| | *Mcf per day* |
|---|---|
| Carolina Natural [1] | 3,235 |
| Public Service [2] | 16,385 |

[1] The volume of 3,235 Mcf included service to Lexington, N. C.

[2] The volume of 16,385 Mcf included service to Shelby and Kings Mountain, N. C.

In the circumstances, in view of the market demands on Transcontinental's pipe-line system and the limited volume of gas presently available thereon and the failure of the above-named communities and companies to take full delivery of the volumes of natural gas made available to them by our orders of April 28, 1950, at Docket No. G–1277, and June 7, 1951, at Docket No. G–1411, it is desirable and in the public interest that Transcontinental show cause why the said orders referred to should not be modified as to the allocations contained therein. Similarly good cause exists and it is in the public interest to require Carolina Natural to show cause why its certificate of public convenience and necessity, issued June 7, 1951, at Docket No. G–1335, should not be vacated, and to require Public Service to show cause why its certificate of public convenience and necessity, also issued June 7, 1951, in Docket No. G–1407, should not be modified so as to delete therefrom its authorization to supply natural gas for ultimate distribution in the communities of Shelby and Kings Mountain, North Carolina.

The evidence of record in Docket No. G–1277 (Reopened) supports the conclusion that there is not only a need for natural gas on the part of existing customers, but also that public convenience and necessity require the allocation of natural gas from Transcontinental's system for ultimate distribution in various new communities. Nevertheless, the evidence is insufficient to support the conclusion of the Examiner that the proposed projects of the following named interveners are either economically or financially feasible:

Belton, S. C.
Greenwood, S. C.
Woodruff, S. C.
Fort Hill Natural Gas Authority, S. C.
Kings Mountain, N. C.
Shelby, N. C.

On the basis of the present record it is, therefore, concluded that the above-named interveners should be afforded further opportunity to establish the economic and financial feasibility of their projects.

The Examiner, however, concludes that the communities of Greer and Fountain Inn, South Carolina, and also Bogart, Georgia, have not sufficiently discharged their burden of proof as to the feasibility of their proposed projects, and therefore that public convenience and necessity do not require that natural gas be allocated or reserved for the benefit of the aforementioned intervening communities. We cannot subscribe to this view inasmuch as it is clear, from an examination of the record, that there has been some showing as to the need for natural gas as well as the potential economic and financial feasibility of the minimum projects submitted by Greer, Fountain Inn, and Bogart. In the light of the showing made by the aforementioned communities, they should be afforded further opportunity to establish the economic and financial feasibility of their projects.

The evidence of record clearly shows, as the Examiner concluded, that the communities of Simpsonville, South Carolina, Comer, Danielsville, Statham, Stockbridge, Dacula, and Flowery Branch, Georgia, have not demonstrated that the projects proposed by them are economically feasible or that public convenience and necessity require that Transcontinental provide natural gas service to them, and we so find.

The Presiding Examiner further concluded that an allocation of additional volumes of natural gas to Public Service Company of North Carolina, Inc., Carolina Natural Gas Corporation and Carolina Central Gas Company had not been justified, and that public convenience and necessity do not require the allocation of any further volumes of gas to any of them at this time. We affirm that conclusion.

We have reached a point in the consideration of the matters and issues involved in these proceedings where there must be a definite finality. Accordingly we will reserve 16,953 Mcf of natural gas which will be available to the interveners named below in the amounts set opposite each, upon the full and proper showing by them, at a further hearing as hereinafter provided, that public convenience and necessity require that Transcontinental make specified volumes of gas available to them and that their respective projects are economically and financially feasible.

| | *Mcf per day* |
|---|---|
| Kings Mountain | 1,374 |
| Shelby | 2,156 |
| Greer | 1,707 |
| Belton | 744 |
| Greenwood | 5,471 |
| Fort Hill Natural Gas Authority | 3,801 |
| Fountain Inn | 429 |
| Woodruff | 1,080 |
| Bogart | 191 |
| Total | 16,953 |

The total volume of gas with which we are concerned in these proceedings is made up of 64,000 Mcf in Docket No. G–1277 (Reopened) and 5,019 Mcf as follows:

Docket No. G–1277 (initial proceeding):

| | *Mcf per day* |
|---|---|
| Maplesville, Ala | 101 |
| Ashland, Ala | 280 |
| Lineville, Ala | 244 |
| Morganza, La | 125 |
| | 750 |

Docket No. G–1411:

| | |
|---|---|
| Shelby, N. C | 718 |
| Kings Mountain, N. C | 316 |
| Carolina Natural Gas Co | 3,235 |
| | 4,269 |
| Total | 5,019 |

Reserving for future determination the allocation of 16,953 Mcf, required to provide service in the areas respecting which rehearing is to be provided, there remains 47,047 Mcf for allocation and disposal to the following customers of Transcontinental upon a firm basis. Upon full consideration of the record herein, the volume of 47,047 Mcf is allocated as follows:

| | *Mcf per day* |
|---|---|
| The United Gas Improvement Co | 1,322 |
| South Jersey Gas Co | 1,189 |
| Consolidated Edison Co. of New York, Inc | 9,846 |
| The Brooklyn Union Gas Co | 9,582 |
| Long Island Lighting Co | 529 |
| Elizabethtown Consolidated Gas Co | 661 |
| Public Service Electric and Gas Co | 3,502 |
| Philadelphia Electric Co | 2,973 |
| | 29,604 |
| Delaware Power & Light Co. (commencing Apr. 1, 1954) | 10,900 |
| The City of Danville, Va | 752 |
| South Carolina Gas Co | 257 |
| Georgia Gas Co | 748 |
| Atlanta Gas Light Co | 1,278 |
| City of Lexington, N. C | 3,508 |
| | 6,543 |
| Total | 47,047 |

From the allocation listed above Philadelphia Electric Company shall make available to United States Steel Company the firm daily requirements of its Fairless Works up to a maximum of 2,643 Mcf per day. Our order will so provide.

It is fully recognized that no substantial portion of the 16,953 Mcf of natural gas reserved for future allocation will be required by the communities for which it has been tentatively reserved until after the hearing herein provided, the allocation thereof by further order of the Commission to the various interveners named above, and the construction of required facilities to utilize such gas. We will therefore require Transcontinental to deliver such volumes of natural gas on a temporary firm basis to the following customers:

| | *Mcf per day temporary firm basis* |
|---|---|
| Consolidated Edison Co. of New York, Inc | 5,475 |
| The Brooklyn Union Gas Co | 5,329 |
| Elizabethtown Consolidated Gas Co | 367 |
| South Jersey Gas Co | 662 |
| The United Gas Improvement Co | 736 |
| Philadelphia Electric Co | 1,541 |
| Long Island Lighting Co | 294 |
| Public Service Electric & Gas Co | 1,949 |
| Delaware Power & Light Co. (Commencing April 1, 1954) | 600 |
| Total | 16,953 |

From the allocation listed above Philadelphia Electric Company shall make available to United States Steel Company on a temporary firm basis the additional firm daily requirements of its Fairless Works in excess of 2,643 Mcf per day up to a maximum of 1,357 Mcf of such additional requirements. Our order will so provide.

In this regard we wish to make it abundantly clear in connection with the delivery of the volumes of natural gas on a temporary firm basis to the above-named customers of Transcontinental in the amount specified, that if, in the future, any portion of the 16,953 Mcf set forth above remains after final allocation, as may be provided by further order of the Commission, the first 600 Mcf of such volume is to be allocated by Transcontinental to Delaware Power & Light Company and the remaining capacity is to be allocated to the present firm customers north of Danville, Virginia (exclusive of Delaware Power & Light Company), in the proportion which the total available bears to the total of firm gas allocated herein (29,604 Mcf) to such customers.

It is apparent that during the winter of 1953–1954 and until April 1, 1954, an additional volume of natural gas will be available on Trancontinental's system arising from volumes previously allocated but which the distributors, to whom the allocation was made, will not be able to utilize. This quantity, including 5,019 Mcf hereinbefore set forth, with an allowance for required system flexibility, will be approximately 8,000 Mcf per day. Because Philadelphia Electric Company wil continue service to Delaware Power & Light Company throughout the forthcoming winter heating season, we will allocate 4,000 Mcf per day on a temporary firm basis to Philadelphia Electric Company until April 1, 1954, as representing the approximate volume of natural gas which will be received from Transcontinental and used as a natural-gas component for service by Philadelphia Electric Company to Delaware Power & Light Company. Therefore, to the quantity of 8,000 Mcf set forth above, there will be added 6,900 Mcf of the amount herein allocated to Delaware Power & Light Company on a firm basis, which that company cannot utilize in the areas which it presently serves until April 1, 1954. We will therefore allocate such total quantity of 18,900 Mcf of natural gas on a temporary firm basis until April 1, 1954 to the companies listed below in the amounts shown.

| | *Mcf per day 1953–1954 temporary firm basis* |
|---|---|
| Consolidated Edison Co. of New York, Inc | 5,509 |
| The Brooklyn Union Gas Co | 5,361 |
| Elizabethtown Consolidated Gas Co | 370 |
| South Jersey Gas Co | 665 |
| The United Gas Improvement Co | 740 |
| Philadelphia Electric Co | 4,000 |
| Long Island Lighting Co | 296 |
| Public Service Electric & Gas Co | 1,959 |
| Total | 18,900 |

The delivery of natural gas to Transcontinental's existing customers on a temporary firm basis shall be made under appropriate rate schedules satisfactory to the Commission. Our order will so provide.

The Presiding Examiner's conclusion and order in Docket No. G–1747 is supported by the record, no exceptions have been filed in connection therewith, and it is accordingly affirmed as hereinafter ordered.

The Commission is not persuaded by the requests for oral argument, either in support of the exceptions filed or the reopening of the proceeding for the purposes outlined in the petition filed by the Public Service Electric and Gas Company, as to the need thereof or any further briefs, in connection with the proceeding at Docket No. G–1277 (Reopened), et al. Accordingly, such requests will be denied.

In addition to the findings specifically set forth above, the Commission further finds:

(1) It is desirable and in the public interest that the initial decision of the Presiding Examiner, filed November 28, 1952, at Docket No. G–1277, et al., be modified to conform to the views of the Commission expressed above.

(2) To the extent that the exceptions above referred to are inconsistent with the Commission's order herein, they should be denied.

(3) The related issues at Docket Nos. G–1277, G–1335, G–1407, and G–1411 require that the said proceedings be consolidated and reopened for further hearing as herein provided.

Upon consideration of the record in these proceedings, the initial decision of the Presiding Examiner and the exceptions and motions filed herein, the Commission orders:

(A) The initial decision of the Presiding Examiner issued November 28, 1952, in these proceedings as hereinafter modified and supplemented shall become ef-

[1] Opinion No. 191 and accompanying order issued in the matter of Transcontinental Gas Pipe Line Corporation, Docket No. G–1277.

fective as the decision of the Commission as of the date of the issuance of this order.

(B) The said initial decision be and it is hereby modified in the following respects:

(i) Ordering paragraph (A) appearing at page 140 of the decision is hereby modified to read as follows:

(A) The authorization heretofore issued to Transcontinental in Docket No. G–1277 be and it is hereby amended to authorize Transcontinental, upon the terms and conditions of this order, to make the following deliveries and sales of natural gas in addition to those authorized by the Commission's order issued April 28, 1950, and November 8, 1950:

| | Firm Mcf per day | Temporary firm Mcf per day |
|---|---|---|
| Consolidated Edison Co. of New York, Inc. | 9,886 | 5,475 |
| The Brooklyn Union Gas Co. | 9,582 | 5,929 |
| Elizabethtown Consolidated Gas Co. | 661 | 367 |
| South Jersey Gas Co. | 1,189 | 662 |
| The United Gas Improvement Co. | 1,322 | 736 |
| Philadelphia Electric Co. | 2,973 | 1,541 |
| Long Island Lighting Co. | 529 | 294 |
| Public Service Electric & Gas Co. | 3,502 | 1,949 |
| The City of Danville, Va. | 792 | - |
| Total | 30,356 | 16,953 |

From the firm allocation listed above Philadelphia Electric Company is hereby required to make available to United States Steel Company the firm daily requirements of its Fairless Works up to a maximum of 2,643 Mcf per day. From the temporary firm allocation listed above Philadelphia Electric Company is hereby required to make available to United States Steel Company on a temporary firm basis the additional firm daily requirements of its Fairless Works in excess of 2,643 Mcf per day up to a maximum of 1,357 Mcf of such additional requirements; provided that the volume so made available by Philadelphia Electric Company to United States Steel Company on a temporary firm basis shall be reduced in direct proportion to any reduction in the temporary firm allocation to Philadelphia Electric Company. If all or any part of the said temporary firm allocation shall be made available to Philadelphia Electric Company on a firm basis, Philadelphia Electric Company shall make available on a firm basis to United States Steel Company for its Fairless Works a proportionate share thereof.

(ii) Ordering paragraph (B) appearing at page 140 of the decision is hereby modified to read as follows:

(B) The permission herein granted is conditioned to require Transcontinental to make the following deliveries and sales of natural gas on a firm basis in addition to those presently authorized by the Commission's orders issued April 28, 1950, and August 2, 1950, as the case may be, in Docket No. G–1277:

| | Mcf per day |
|---|---|
| South Carolina Gas Co. | 257 |
| Georgia Gas Co. | 748 |
| Atlanta Gas Light Co. | 1,278 |

(iii) Ordering paragraphs (C) (1), (C) (2), and (C) (3) appearing at pages 140, 141, and 142 of the decision be and the same are hereby deleted and in lieu thereof a new paragraph (C) is substituted reading as follows:

(C) The authorization herein granted is further conditioned to require Transcontinental to reserve 16,953 Mcf on a firm basis for possible future allocation to the interveners named below: *Provided*, That such interveners shall, at a public hearing, at a time herein designated submit proof satisfactory to the Commission of the economic feasibility of their individual projects, of their ability to finance such projects and that public convenience and necessity require that Transcontinental make the following specified volumes of gas available to them:

| | Mcf per day |
|---|---|
| City of Kings Mountain | 1,374 |
| City of Shelby | 2,156 |
| City of Greer | 1,707 |
| City of Belton | 744 |
| City of Greenwood | 5,471 |
| Fort Hill Natural Gas Authority | 3,801 |
| Town of Fountain Inn | 429 |
| Town of Woodruff | 1,080 |
| Town of Bogart | 191 |
| Total | 16,953 |

(iv) Paragraph (D) (1) appearing at page 142 of the decision is hereby modified to read as follows:

(D) (1) The authorization herein granted is further conditioned to require Transcontinental to make available to Delaware Power & Light Company 10,900 Mcf of natural gas per day on a firm basis commencing April 1, 1954; to make available to said company, from any capacity, which may remain, in the future, after final allocation as may be provided by further order of the Commission, the first 600 Mcf of such capacity on a firm basis; to make available to Delaware Power & Light Company up to 600 Mcf per day on a temporary firm basis commencing April 1, 1954, and to tender to said company within 45 days of the date upon which this decision becomes final, a service agreement under which such volumes of gas are to be delivered to Delaware Power & Light Company for ultimate distribution in the area presently served by said company, subject, however, to the condition that Delaware Power & Light Company shall make application to the Commission within 30 days of the date this decision becomes final, for such certificate authority as it may require, if any, under the Natural Gas Act and the rules and regulations of the Commission.

(v) The decision is further supplemented by adding a new paragraph designated as (D) (3), reading as follows:

(D) (3) The authorization herein granted is further conditioned to require Transcontinental to make available to the City of Lexington, North Carolina, 3,508 Mcf of natural gas per day and to tender thereto within 45 days of the date of final order herein, a service agreement for such service, provided, however, that the firm allocation of natural gas to the City of Lexington shall become null and void unless the City shall commence taking deliveries of natural gas from Transcontinental within 8 months of the date of the issuance of our order herein.

(vi) Paragraph (E) appearing on page 143 of the decision is hereby modified to read as follows:

(E) The authorization herein granted is further conditioned to require that Philadelphia Electric Company shall make application to the Commission within 30 days of the date this decision becomes final, unless such time is extended by the Commission for good cause shown, for such authority as may be necessary under the Natural Gas Act and the rules and regulations of the Commission to enable Philadelphia Electric to effect the transportation and sale to United States Steel Company as ordered in Paragraph (B) (i) hereof.

(vii) Paragraphs (G) and (H), appearing at pages 143 and 144 of the decision, in view of our action herein taken in related dockets, are deleted and paragraph (I) be and the same is hereby designated as paragraph (G), and is modified to read as follows:

(G) The authorization heretofore issued to Transcontinental in Docket No. G–1277 be and it is hereby further amended, under the conditions set forth in paragraphs (C) and (D) of this order, to authorize Transcontinental to construct and operate such metering and regulating stations, valves and nipples, as shall be necessary to make the firm deliveries of natural gas herein authorized.

(viii) The decision is further supplemented by adding a new paragraph (H) reading as follows:

(H) The authorization herein granted is further conditioned to require Transcontinental to make available the 8,000 Mcf per day heretofore referred to, plus the 10,900 Mcf per day to be made available on a firm basis commencing April 1, 1954, to Delaware Power & Light Company, or a total of 18,900 Mcf per day, during the winter of 1953–1954 up to and including April 1, 1954, to the following companies on a temporary firm basis in the volumes set forth in the tabulation below:

| | Mcf per day 1953–1954 Temporary firm basis |
|---|---|
| Consolidated Edison Co. of New York, Inc. | 5,509 |
| The Brooklyn Union Gas Co. | 5,361 |
| Elizabethtown Consolidated Gas Co. | 370 |
| South Jersey Gas Co. | 665 |
| The United Gas Improvement Co. | 740 |
| Philadelphia Electric Co. | 4,000 |
| Long Island Lighting Co. | 295 |
| Public Service Electric & Gas Co. | 1,959 |
| Total | 18,900 |

(ix) The decision is further supplemented by adding a new paragraph (I) reading as follows:

(I) Any portion of the 16,953 Mcf per day reserved in paragraph (B) (iii) of this order which is not allocated to the nine intervenors named in said paragraph (B) (iii) by the final decision of the Commission in the further proceedings provided for in paragraph (C) of this order shall be made available by Transcontinental, on a firm basis, as follows:

The first 600 Mcf per day of such volume shall be made available by Transcontinental to Delaware Power & Light Company, and the remainder shall be made available by Transcontinental to its present firm customers listed in paragraph (B) (i) of this order, exclusive of the City of Danville, Virginia, in the proportion which the firm gas allocated to each of them in said paragraph (B) (i) bears to the total of 29,604 Mcf and shall so advise the Commission by filing revised service agreements before delivery of such natural gas is undertaken.

*Docket Nos. G–1650, G–1621, G–1633, and G–1800*

Docket No. G–1650:

(x) Paragraph (A) appearing at page 145 of the decision is modified to read as follows:

(A) A certificate of public convenience and necessity be and the same is hereby issued subject to the following terms and conditions authorizing Transcontinental to operate at its interconnection with Manufacturers at Dowingtown, Pennsylvania, and its interconnections with Seaboard at Elliott City, Maryland, certain facilities hereinbefore described and more fully described in paragraphs (B), (C), and (D) of Transcontinental's supplement to application filed June 8, 1951, and to make deliveries of natural gas subject to the jurisdiction of the Commission to Manufacturers as set forth in Transcontinental's application filed May 7, 1951, and to make deliveries of natural gas to United Fuel as set forth in Transcontinental's second supplement to application filed September 11, 1951: *Provided, however*, That such deliveries shall be made pursuant to Transcontinental's new Rate Schedule E and its new Rate Schedule EX accepted for filing and permitted to become effective as of October 1, 1952, in substitution for Transcontinental's previous Rate Schedule EM–1, EX–1 and E, by the Commission's order issued November 25, 1952, In the Matter of Transcontinental Gas Pipe Line Corporation, Docket No. G–1710.

Docket No. G–1621:

(xi) Paragraph (A) appearing at page 146 of the decision is modified to read as follows:

(A) A certificate of public convenience and necessity be and the same is hereby issued subject to the following terms and conditions authorizing Seaboard:

(a) To operate at its interconnection with Transcontinental at Rockville, Maryland, and Ellicott City, Maryland, certain facilities hereinbefore described and as more fully described in Paragraph (C) of Seaboard's application filed February 26, 1951, and to receive from and to deliver to Transcontinental natural gas subject to the jurisdiction of the Commission for the account of United Fuel.

Docket No. G–1633:

(xii) Paragraph (A) appearing at page 147 of the decision is modified to read as follows:

(A) A certificate of public convenience and necessity be and the same is hereby issued, subject to the following terms and conditions, authorizing Manufacturers to operate at its interconnection with Transcontinental at a point south of Manufacturers' Eagle Compressor Station (Downingtown, Pennsylvania), certain of its facilities hereinbefore described, and more fully described in paragraph (3) of Manufacturers' application filed March 9, 1951, and to make deliveries of natural gas, subject to the jurisdiction of the Commission, to Transcontinental.

Docket No. G–1800:

(xiii) The authorization appearing at page 148 of the decision is modified to read as follows:

(b) A certificate of public convenience and necessity be and the same is hereby issued subject to the following terms and conditions authorizing United Fuel to deliver natural gas to Transcontinental on an exchange basis in the manner hereinbefore described and more fully set forth in United Fuel's application filed October 2, 1951, provided United Fuel shall file, within 30 days after this decision becomes final, an appropriate exchange gas rate schedule and service agreement entered into by and between Transcontinental and United Fuel and consistent with Transcontinental's Rate Schedule EX accepted for filing and permitted to become effective as of October 1, 1952.

(C) In view of our action herein, the above-entitled proceedings at Docket Nos. G–1277, G–1335, G–1407, and G–1411 are hereby reopened and consolidated for the purpose of hearing but limited to the specific purposes hereinafter set forth:

(i) To afford Transcontinental and interveners, Maplesville, Ashland, Lineville, Alabama, and Morganza, Louisiana, an opportunity to show cause why the authorization contained in the Commission's order issued April 28, 1950, in Docket No. G–1277, to supply natural gas to the interveners of Maplesville, Ashland, Lineville, Alabama, and to Morganza, Louisiana, should not be rescinded.

(ii) In addition, Transcontinental and Carolina Natural shall be further afforded an opportunity to show cause why its authorization contained in the Commission's order issued June 7, 1951, in Docket No. G–1411, whereby Transcontinental was authorized to sell and deliver certain volumes of natural gas to the Carolina Natural Gas Corporation should not be rescinded to the extent of such deliveries thereby authorized to Carolina Natural and also to afford the Transcontinental and Public Service an opportunity to show cause why its authorization to supply natural gas to the Public Service Company of North Carolina, Inc., should not be reduced in proportion to the volumes of gas which Public Service originally proposed to sell and deliver to Shelby and Kings Mountain, North Carolina, for ultimate distribution in said communities.

(iii) To afford Carolina Natural Gas Corporation an opportunity to show cause why its certificate of public convenience and necessity, issued June 7, 1951, at Docket No. G–1335, should not be vacated.

(iv) To afford Public Service Company of North Carolina, Inc., an opportunity to show cause by its certificate of public convenience and necessity, issued June 7, 1951, at Docket No. G–1407, should not be modified to the extent of deleting therefrom authorization to provide natural gas service to the communities of Kings Mountain and Shelby, North Carolina.

(v) The proceedings heretofore designated as Docket No. G–1277 (Reopened), are reopened to afford the interveners, Kings Mountain and Shelby, North Carolina, Belton, Greenwood (System), Woodruff, Greer, Fountain Inn, South Carolina, and the Fort Hill Natural Gas Authority which proposes to supply gas to several communities in South Carolina; and Bogart, Georgia, an opportunity to submit further evidence as to the economic and financial feasibility of their proposed projects.

(D) The records in these consolidated proceedings be and they hereby are remanded to the Presiding Examiner heretofore designated as the Presiding Examiner in Docket No. G–1277 (Reopened), for the limited and sole purpose of hearing and taking of additional evidence on the matters described in paragraph (C) above, and for the rendering of an appropriate decision thereon unless the Commission should otherwise provide by subsequent order.

(E) Transcontinental is hereby authorized to make the additional firm deliveries set forth in paragraphs (B) (i) and (B) (ii) under its Rate Schedules CD–2, G–1 or G–2, whichever may be applicable, pending the execution, filing and aceptance by the Commission of new service agreements reflecting such additional firm deliveries. The new service agreements shall be filed within 30 days from the issuance of this order and when accepted by the Commission, shall be effective as of the date of issuance of this order.

(F) Transcontinental shall submit rate schedules and service agreements satisfactory to the Commission within 30 days from the date of the issuance of our order herein relating to its authorized sales of natural gas on a temporary firm basis.

(G) Exceptions filed with respect to the Presiding Examiner's Decision, which are inconsistent with our action herein, are denied. Therefore the request for oral argument in connection with such exceptions, filing of further briefs and the petition filed by Public Service Electric and Gas Company for reopening the proceeding at Docket No. G–1277 (Reopened), et al. are denied.

(H) Each and every reference to the Allentown-Bethlehem Gas Company, The Harrisburg Gas Company and the Philadelphia Gas Works Company shall

be deemed to be referring to the United Gas Improvement Company.[4]

(I) Pursuant to the authority contained in and by virtue of the jurisdiction conferred upon the Federal Power Commission by sections 7 and 15 of the Natural Gas Act and the Commission's rules of practice and procedure, a hearing will be held commencing on February 8, 1954, at 10:00 a. m., e. s. t., in the Hearing Room of the Federal Power Commission, 441 G Street NW., Washington, D. C., concerning the matters involved and the issues referred to in paragraph (C) above.

(J) Interested State commissions may participate as provided by §§ 1.8 and 1.37 (f) (18 CFR 1.8 and 1.37 (f)) of the said rules of practice and procedure.

Adopted: December 9, 1953.

Issued: December 11, 1953.

By the Commission.[5]

[SEAL] LEON M. FUQUAY, *Secretary.*

[F. R. Doc. 53-10461; Filed, Dec. 16, 1953; 8:45 a. m.]

[Docket Nos. G-2258, G-2259]

UNITED GAS PIPE LINE CO.

ORDER CONSOLIDATING PROCEEDINGS AND FIXING DATE OF HEARING

United Gas Pipe Line Company (Applicant) filed applications on September 24, 1953, and supplements thereto on October 9, 1953, for certificates of public convenience and necessity to construct and operate facilities to enable it to sell natural gas to United Gas Corporation, an affiliate, for resale by the latter in five Mississippi (Docket No. G-2258) and five Louisiana communities (Docket No. G-2259), all as more fully described in the applications on file with the Commission and open to public inspection.

Applicant has requested that its applications be heard under the shortened procedure provided by § 1.32 (b) of the Commission's rules of practice and procedure (18 CFR 1.32 (b)) for non-contested proceedings.

Notice of the filing of such applications has been given, including publication in the FEDERAL REGISTER on October 20, 1953 (18 F. R. 6653-54).

The Commission finds:

(1) Good cause exists to consolidate the above-entitled applications for the purpose of hearing and disposition.

(2) These proceedings are proper ones for disposition under the provisions of § 1.32 (b) (18 CFR 1.32 (b)) of the Commission's rules of practice and procedure.

The Commission orders:

(A) The proceedings in Docket Nos. G-2258 and G-2259 be and the same hereby are consolidated for purposes of hearing and disposition.

(B) Pursuant to the authority contained in and subject to the jurisdiction conferred upon the Federal Power Commission by sections 7 and 15 of the Natural Gas Act, and the Commission's rules of practice and procedure, a public hearing be held on December 29, 1953, at 9:30 a. m., e. s. t., in a Hearing Room of the Federal Power Commission, 441 G Street NW., Washington, D. C., concerning the matters involved and issues presented by such applications: *Provided, however,* That the Commission may, after a noncontested hearing, forthwith dispose of the proceedings pursuant to the provisions of § 1.32 (b) of the Commission's rules of practice and procedure.

(C) Interested State commissions may participate as provided by §§ 1.8 and 1.37 (f) (18 CFR 1.8 and 1.37 (f)) of such rules of practice and procedure.

Adopted: December 9, 1953.

Issued: December 11, 1953.

By the Commission.

[SEAL] LEON M. FUQUAY, *Secretary.*

[F. R. Doc. 53-10462; Filed, Dec. 16, 1953; 8:46 a. m.]

[Docket No. G-2272]

BLACKSTONE VALLEY GAS AND ELECTRIC CO.

ORDER FIXING DATE OF HEARING

Blackstone Valley Gas and Electric Company (Applicant), a Rhode Island corporation having its principal place of business in Pawtucket, Rhode Island, filed, on October 12, 1953, an application, pursuant to section 7 (c) of the Natural Gas Act, for a certificate of public convenience and necessity authorizing the use, maintenance and operation of certain existing facilities for the purpose of transporting, delivering and selling natural gas to Blackstone Gas Company at several points on the Rhode Island-Massachusetts state border for resale within the town of Blackstone, Massachusetts.

The application, made in accordance with the Commission's Opinion No. 259 and accompanying order issued August 6, 1953, in Docket Nos. G-1568, et al., and setting forth in detail a description of the use and operation of the facilities involved, is on file with the Commission and open to public inspection.

It further appears that Northeastern Gas Transmission Company will be ready to serve Applicant with natural gas on or about December 16, 1953.

The Commission finds:

(1) This proceeding is a proper one for disposition under the provisions of § 1.32 (b) (18 CFR 1.32 (b)) of the Commission's rules of practice and procedure, Applicant having requested that its application be heard under the shortened procedure provided by the aforesaid rule for noncontested proceedings, and no request to be heard, protest or petition having been filed subsequent to the giving of due notice of the filing of the application, including publication in the FEDERAL REGISTER on November 3, 1953 (18 F. R. 6948-49).

(2) It is reasonable and in the public interest and good cause exists for fixing the date of hearing in this proceeding less than 15 days after publication of this order in the FEDERAL REGISTER.

The Commission orders:

(A) Pursuant to the authority contained in and subject to the jurisdiction conferred upon the Federal Power Commission by sections 7 and 15 of the Natural Gas Act, and the Commission's rules of practice and procedure, a hearing be held on December 22, 1953, at 9:30 a. m., e. s. t., in the Hearing Room of the Federal Power Commission, 441 G Street NW., Washington, D. C. concerning the matters involved in and the issues presented by the application: *Provided, however,* That the Commission may, after a noncontested hearing, forthwith dispose of the proceedings pursuant to the provisions of § 1.32 (b) of the Commission's rules of practice and procedure.

(B) Interested State commissions may participate as provided by §§ 1.8 and 1.37 (f) (18 CFR 1.8 and 1.37 (f)) of the said rules of practice and procedure.

Adopted: December 9, 1953.

Issued: December 11, 1953.

By the Commission.

[SEAL] LEON M. FUQUAY, *Secretary.*

[Docket No. G-2324]

PANHANDLE EASTERN PIPE LINE CO.

NOTICE OF APPLICATION

DECEMBER 10, 1953.

Take notice that Panhandle Eastern Pipe Line Company (Applicant), a Delaware corporation, address 1221 Baltimore Avenue, Kansas City 5, Missouri, filed on December 2, 1953, an application for a certificate of public convenience and necessity pursuant to section 7 of the Natural Gas Act authorizing the construction and operation of certain transmission pipeline facilities hereinafter described.

Applicant proposes to construct and operate two additional 330 horsepower compressor engines at its Bartonville, Illinois, Compressor Station. These additional compressor engines are stated to enable Panhandle to increase its deliveries of gas to Central Illinois Public Service Company at Canton, Illinois, from 4,520 Mcf per day to 8,000 Mcf per day, while at the same time insuring deliveries of 13,400 Mcf of gas per day to Illinois Power Company at Galesburg, Illinois. No increase in the aggregate contract demand of Central Illinois Public Service Company is presented inasmuch as it is proposed that deliveries to Central Illinois Public Service Company at Mattoon, Illinois be reduced from 9,000 Mcf to 5,520 Mcf per day.

The estimated cost of the proposed facilities is $170,000, and Applicant proposes to finance the project out of cash on hand.

Protests or petitions to intervene may be filed with the Federal Power Commission, Washington 25, D. C., in accordance with the rules of practice and procedure (18 CFR 1.8 or 1.10) on or before the 31st day of December 1953. The application is on file with the Commission for public inspection.

[SEAL] LEON M. FUQUAY, *Secretary.*

[F. R. Doc. 53-10464; Filed, Dec. 16, 1953; 8:46 a. m.]

---

[4] The Commission, by its order issued April 21, 1953, substituted the United Gas Improvement Company as intervener for the Allentown-Bethlehem Gas Company, the Harrisburg Gas Company and the Philadelphia Gas Works Company, which were merged with and into the United Gas Improvement Company on December 31, 1952.

[5] Commissioner Draper dissented and stated that he favors affirming the Examiner's decision.

## SECURITIES AND EXCHANGE COMMISSION

[File No. 31-561]

TENNESSEE NATURAL GAS LINES, INC.

NOTICE OF FILING OF APPLICATION FOR EXEMPTION

DECEMBER 11, 1953.

Notice is hereby given that Tennessee Natural Gas Lines, Inc. ("Tennessee Lines") has filed an application with this Commission, pursuant to section 3 (a) (1) of the Public Utility Holding Company Act of 1935 ("act"), requesting that it be granted an exemption on behalf of itself and its public-utility subsidiary, Nashville Gas Company ("Nashville Gas"), from the provisions of the act.

Notice is further given that any interested person may, not later than December 28, 1953, at 5:30 p. m., e. s. t., request the Commission in writing that a hearing be held on such matter, stating the nature of his interest, the reason for such request, and the issues, if any, of fact or law raised by said application which he desires to controvert, or may request that he be notified if the Commission orders a hearing thereon. Any such request should be addressed: Secretary, Securities and Exchange Commission, 425 Second Street NW., Washington 25, D. C. At any time after such date, said application, as filed or as amended, may be granted, or the Commission may take such other action as it deems appropriate.

All interested persons are referred to the application on file at the office of this Commission for a statement of the facts contained therein.

Tennessee Lines is organized under the laws of Tennessee and is engaged in the purchase, transmission and sale of natural gas to Nashville Gas for retail distribution in the City of Nashville and environs, and to the plant of E. I. DuPont de Nemours in the vicinity of Nashville. Its operations are wholly within the State of Tennessee. Nashville Gas is organized under the laws of Tennessee and is engaged in the sale and distribution of natural gas in the City of Nashville and environs, wholly within the State of Tennessee.

As of December 31, 1952, the total consolidated assets of the system aggregated $11,070,621. For the 12 months ended December 31, 1952, the consolidated revenues aggregated $5,251,303 and the consolidated net income amounted to $478,417.

By the Commission.

[SEAL] ORVAL L. DUBOIS, *Secretary.*

[File No. 70-3163]

ELECTRIC BOND AND SHARE CO.

ORDER REGARDING SALE BY PARENT OF SECURITIES OF SUBSIDIARY

DECEMBER 11, 1953.

Electric Bond and Share Company ("Bond and Share"), a registered holding company, having filed a declaration pursuant to section 12 (d) of the Public Utility Holding Company Act of 1935 ("act"), and Rule U-44 (a) promulgated thereunder with respect to a proposed transaction which is summarized as follows:

Bond and Share heretofore filed with the Commission its Final Comprehensive Plan as finally amended July 7, 1953 (the "Plan") under section 11 (e) of the act. The Plan was approved by orders of the Commission dated February 20, 1953, and July 15, 1953, and by order of the United States District Court for the Southern District of New York dated July 16, 1953.

The Plan proposed, among other things, that Bond and Share would dispose of certain of its holdings of common stock of United Gas Corporation ("United Gas"), a public-utility subsidiary, by capital distribution, dividend distributions and rights offerings to the Bond and Share stockholders. Provision was also made that the remainder of the shares of United Gas stock to be disposed of under the Plan should be disposed of by Bond and Share in such manner and on such terms as it deemed appropriate within two years after the effective date of the Plan which was July 16, 1953. Bond and Share now holds 1,765,053 shares of United Gas common stock (being approximately 13.7 percent of the outstanding shares of such stock).

By the present declaration, Bond and Share proposed to sell 100,000 shares of United Gas common stock for cash upon the basis of a negotiated private sale to a person or persons who would acquire such shares for investment and not for distribution under circumstances which would not involve any "public offering" as contemplated by the Securities Act of 1933.

Bond and Share having filed an amendment reciting that it proposes to accept an offer of Merrill Lynch, Pierce, Fenner & Beane, as broker, for the purchase of 10,000 shares of the common stock at a price of $28.25 per share and having requested withdrawal of its declaration with respect to the balance of the 100,000 shares of United originally proposed to be sold;

Declarant having requested that the Commission exempt the proposed sale of 10,000 shares of United Gas stock from the provisions of Rule U-50 promulgated under the act on the basis of a finding contemplated by subsection (a) (5) of such rule;

Said amendment having further recited that Bond and Share has agreed to pay a commission of 40 cents per share, or $4,000, to Merrill Lynch, Pierce, Fenner & Beane, and that its other expenses, including attorneys' fees, have not yet been determined;

Due notice having been given of the filing of the declaration, and a hearing not having been requested of or ordered by the Commission; and the Commission finding that the applicable provisions of the act and rules promulgated thereunder are satisfied and that no adverse findings are necessary, that compliance with the competitive bidding requirements of Rule U-50 is not necessary or appropriate in the public interest or for the protection of investors or consumers to assure the maintenance of competitive conditions, the receipt of adequate consideration or the reasonableness of any fees or commissions to be paid, and deeming it appropriate in the public interest and the interest of investors and consumers that said declaration, as amended, be permitted to become effective, subject to the terms and conditions prescribed in Rule U-24 and to the further condition that jurisdiction is reserved over all fees and expenses relating to said sale other than the commission as aforesaid;

*It is ordered,* Pursuant to Rule U-24 and the applicable provisions of the act that said declaration, as amended, be and hereby is, permitted to become effective forthwith, subject to the terms and conditions prescribed in Rule U-24, and to the further condition that jurisdiction is reserved over all fees and expenses relating to said sale other than the commission thereon.

*It is further ordered and recited,* That the sale and transfer by Bond and Share of 10,000 shares of common stock of United Gas is necessary or appropriate to the integration or simplification of the holding company system of which Bond and Share is a member and is necessary or appropriate to effectuate the provisions of section 11 (b) of the act, all in accordance with the meaning and requirements of the Internal Revenue Code, as amended, including section 1808 (f) and Supplement R thereof.

By the Commission.

## INTERSTATE COMMERCE COMMISSION

[4th Sec. Application 28738]

POTATOES FROM MAINE AND NEW BRUNSWICK TO ANACOSTIA, D. C.

APPLICATION FOR RELIEF

DECEMBER 11, 1953.

The Commission is in receipt of the above-entitled and numbered applica-

tion for relief from the long-and-short-haul provision of section 4 (1) of the Interstate Commerce Act.

Filed by: C. W. Boin and I. N. Doe, Agents, for carriers parties to schedule listed below.

Commodities involved: Potatoes, carloads.

From: Points in Maine and New Brunswick.

To: Anacostia, D. C.

Grounds for relief: Competition with rail carriers, circuitous routes, and additional destination.

Schedules filed containing proposed rates: I. N. Doe, Agent, I. C. C. No. 611, supp. 14.

Any interested person desiring the Commission to hold a hearing upon such application shall request the Commission in writing so to do within 15 days from the date of this notice. As provided by the general rules of practice of the Commission, Rule 73, persons other than applicants should fairly disclose their interest, and the position they intend to take at the hearing with respect to the application. Otherwise the Commission, in its discretion, may proceed to investigate and determine the matters involved in such application without further or formal hearing. If because of an emergency a grant of temporary relief is found to be necessary before the expiration of the 15-day period, a hearing, upon a request filed within that period, may be held subsequently.

By the Commission.

[4th Sec. Application 28739]

PETROLEUM PRODUCTS FROM NEW JERSEY TO THE SOUTH

APPLICATION FOR RELIEF

DECEMBER 11, 1953.

The Commission is in receipt of the above-entitled and numbered application for relief from the long-and-short-haul provision of section 4 (1) of the Interstate Commerce Act.

Filed by: C. W. Boin, Agent, for carriers parties to schedule listed below.

Commodities involved: Petroleum products.

From: Weehawken, North Bergen, Edgewater, and Vreeland Ave. (Paterson), N. J.

To: Points in southern territory.

Grounds for relief: Competition with rail carriers, circuity, to maintain grouping and additional origins.

Schedules filed containing proposed rates: C. W. Boin, Agent, I. C. C. No. A-599, supp. 152.

Any interested person desiring the Commission to hold a hearing upon such application shall request the Commission in writing so to do within 15 days from the date of this notice. As provided by the general rules of practice of the Commission, Rule 73, persons other than applicants should fairly disclose their interest, and the position they intend to take at the hearing with respect to the application. Otherwise the Commission, in its discretion, may proceed to investigate and determine the matters involved in such application without further or formal hearing. If because of an emergency a grant of temporary relief is found to be necessary before the expiration of the 15-day period, a hearing, upon a request filed within that period, may be held subsequently.

[4th Sec. Application 28740]

ANIMAL OR POULTRY FEED BETWEEN POINTS IN FLORIDA, AND FROM SAVANNAH AND PORT WENTWORTH, GA., TO FLORIDA

APPLICATION FOR RELIEF

DECEMBER 11, 1953.

The Commission is in receipt of the above-entitled and numbered application for relief from the long-and-short-haul provision of section 4 (1) of the Interstate Commerce Act.

Filed by: R. E. Boyles, Jr., Agent, for carriers parties to schedule listed below.

Commodities involved: Animal or poultry feed, carloads and less-than-carloads.

From: Points in Florida, Savannah, and Port Wentworth, Ga.

To: Points in Florida.

Grounds for relief: Competition with rail carriers and circuitous routes.

Schedules filed containing proposed rates: C. A. Spaninger, Agent, I. C. C. No. 1308, supp. 12.

Any interested person desiring the Commission to hold a hearing upon such application shall request the Commission in writing so to do within 15 days from the date of this notice. As provided by the general rules of practice of the Commission, Rule 73, persons other than applicants should fairly disclose their interest, and the position they intend to take at the hearing with respect to the application. Otherwise the Commission, in its discretion, may proceed to investigate and determine the matters involved in such application without further or formal hearing. If because of an emergency a grant of temporary relief is found to be necessary before the expiration of the 15-day period, a hearing, upon a request filed within that period, may be held subsequently.

[4th Sec. Application 28741]

METHANOL FROM OHIO AND WEST VIRGINIA TO CHICAGO, ILL.

APPLICATION FOR RELIEF

DECEMBER 14, 1953.

The Commission is in receipt of the above-entitled and numbered application for relief from the long-and-short-haul provision of section 4 (1) of the Interstate Commerce Act.

Filed by: H. R. Hinsch, Alternate Agent, for carriers parties to his tariff I. C. C. No. 4175.

Commodities involved: Methanol (methyl alcohol), in tank-car carloads.

From: South Point, Ohio, Morgantown, W. Va., and Charleston, W. Va., and points grouped therewith.

To: Chicago, Ill.

Grounds for relief: Competition with rail carriers, circuity, competition with water carriers, and market competition.

Any interested person desiring the Commission to hold a hearing upon such application shall request the Commission in writing so to do within 15 days from the date of this notice. As provided by the general rules of practice of the Commission, Rule 73, persons other than applicants should fairly disclose their interest, and the position they intend to take at the hearing with respect to the application. Otherwise the Commission, in its discretion, may proceed to investigate and determine the matters involved in such application without further or formal hearing. If because of an emergency a grant of temporary relief is found to be necessary before the expiration of the 15-day period, a hearing, upon a request filed within that period, may be held subsequently.

VOLUME 18 — 1934 — NUMBER 246

*Washington, Friday, December 18, 1953*

## TITLE 3—THE PRESIDENT

### EXECUTIVE ORDER 10509

[illegible] AN EMERGENCY BOARD TO IN[illegible] OF A DISPUTE BETWEEN THE [illegible] EXPRESS AGENCY, INC. [illegible] OF ITS EMPLOYEES

WHEREAS a dispute exists between the Railway Express Agency, Inc., and certain of its employees represented by the Brotherhood of Railway and Steamship Clerks, Freight Handlers, Express and Station Employes, a labor organization; and

WHEREAS this dispute has not been adjusted under the provisions of the Railway Labor Act, as amended; and

WHEREAS this dispute, in the judgment of the National Mediation Board, threatens substantially to interrupt interstate commerce to a degree such as to deprive a section of the country of essential transportation service:

NOW, THEREFORE, by virtue of the authority vested in me by section 10 of the Railway Labor Act, as amended (44 Stat. 577; 45 U.S.C. 160), I hereby create a board of three members to be appointed by me to investigate the said dispute. No member of the said board shall be pecuniarily or otherwise interested in any organization of railway employees or any carrier.

The board shall report its findings to the President with respect to the said dispute within thirty days from the date of this order.

As provided by section 10 of the Railway Labor Act, as amended, from this date and for thirty days after the board shall have made its report to the President (except by agreement), neither the Railway Express Agency, Inc., nor any of its employees, in the craft or class of which the said dispute arose,

DWIGHT D. EISENHOWER

### Chapter VII—Production and Marketing Administration (Agricultural Adjustment), Department of Agriculture

[Amdt. 1]

### PART 713—COUNTY AND COMMUNITY COMMITTEES

SUBPART—SELECTION AND FUNCTIONS OF PRODUCTION AND MARKETING ADMINISTRATION COUNTY AND COMMUNITY COMMITTEES

LEAVE

By virtue of the authority vested in the Secretary of Agriculture by the Soil Conservation and Domestic Allotment Act, as amended, the regulations pertaining to the Selection and Functions of Production and Marketing Administration County and Community Committees, as published in 18 F. R. 1699, are hereby amended by changing § 713.32, effective January 1, 1954, to read as follows:

§ 713.32 *Leave.* All employees of a county office who have a regular tour of duty established in advance, except temporary employees, shall be granted annual and sick leave with pay. A temporary employee, for the purposes of this section, is defined as one who serves during a continuous period of less than 90 days, on either a full-time or a part-time basis. Leave with pay shall not be granted to members of county or community committees. The county committee shall provide for the maintenance in the county office of accurate employment and leave records, and shall make such records available, upon request, to the PMA State Committee or the PMA Administrator or any representative of such committee or officer.

(a) *Annual leave.* Leave of absence with pay shall not be granted until earned and shall be earned at the rate of one and one quarter days for each 20 days of service rendered. An employee may be credited on January 1 with any unused leave which may have been earned by him during the preceding year, provided that in no case shall the amount of leave so credited exceed 12 days. The amount of leave so credited may be used by the employee in addition to the leave earned by him during the year.

(b) *Sick leave.* Leave of absence with pay because of illness shall be earned at the rate of one day for each 20 days of service rendered. Leave of absence with pay because of illness may at the discretion of the county committee be granted prior to its having been earned in an amount not to exceed 12 days during any one calendar year. Any leave which has been advanced shall be deducted from sick leave which may be earned at a later date. An employee may be credited on January 1 with any unused sick leave which may have been earned by him during preceding years, provided that in no case shall the amount to leave so credited exceed 36 days.

(Sec. 4, 49 Stat. 164; 16 U. S. C. 590d. Interprets or applies 49 Stat. 1148, as amended; 16 U. S. C. 590h)

Done at Washington, D. C., this 15th day of December 1953. Witness my hand and the seal of the Department of Agriculture.

[SEAL] JOHN H. DAVIS,
*Assistant Secretary of Agriculture.*

[F. R. Doc. 53-10538; Filed, Dec. 17, 1953; 8:56 a. m.]

### PART 727—MARYLAND TOBACCO

PROCLAMATION OF THE RESULTS OF MARKETING QUOTA REFERENDUM

§ 727.503 *Basis and purpose.* Sections 727.503 and 727.504 are issued to announce the results of the Maryland tobacco marketing quota referendum for the marketing year beginning October 1, 1954, and for the three-year period beginning October 1, 1954. Under the provisions of the Agricultural Adjustment Act of 1938, as amended, the Secretary proclaimed a national marketing quota for Maryland tobacco for the 1954–55 marketing year (18 F. R. 6446). The Secretary announced (18 F. R. 6502) that a referendum would be held on October 29, 1953, to determine whether Maryland tobacco producers were in favor of or opposed to marketing quotas for the marketing year beginning October 1, 1954, and to determine whether Maryland tobacco producers were in favor of or opposed to marketing quotas for the three-year period beginning October 1, 1954. Since the only purpose of this proclamation is to announce the results of the referendum, it is hereby found and determined that with respect

to this proclamation, application of the notice and procedure provisions of the Administrative Procedure Act (5 U. S. C. 1003) is unnecessary.

§ 727.504 *Proclamation of the results of the Maryland tobacco marketing quota referendum for the marketing year beginning October 1, 1954, and for the three-year period beginning October 1, 1954.* In a referendum of farmers engaged in the production of the 1953 crop of Maryland tobacco held on October 29, 1953, 5,171 farmers voted. Of those voting, 2,655 or 51.3 percent favored quotas for a period of three years beginning October 1, 1954; 659 or 12.8 percent favored quotas for only the one year beginning October 1, 1954; and 1,857 or 35.9 percent were opposed to quotas. Since more than one-third of the farmers voting opposed quotas, the national marketing quota for Maryland tobacco for the marketing year beginning October 1, 1954, proclaimed on October 7, 1953 (18 F. R. 6446) becomes ineffective. Therefore, marketing quotas will not be in effect on Maryland tobacco for the marketing year beginning October 1, 1954.

(Sec. 375, 52 Stat. 66, 7 U. S. C. 1375. Interpret or apply Sec. 312, 52 Stat. 46, as amended; 7 U. S. C. 1312)

Done at Washington, D. C., this 15th day of December 1953. Witness my hand and the seal of the Department of Agriculture.

[SEAL] JOHN H. DAVIS,
*Assistant Secretary of Agriculture.*

[F. R. Doc. 53-10539; Filed, Dec. 17, 1953; 8:56 a. m.]

---

PART 723—CIGAR-FILLER TOBACCO, AND CIGAR-FILLER AND BINDER TOBACCO

PROCLAMATION OF THE RESULTS OF MARKETING QUOTA REFERENDA

Sec.
723.504 Basis and purpose.
723.505 Proclamation of the results of the cigar-filler tobacco marketing quota referendum for the marketing year beginning October 1, 1954, and for the three-year period beginning October 1, 1954.
723.506 Proclamation of the results of the cigar-filler and cigar-binder tobacco marketing quota referendum for the marketing year beginning October 1, 1954, and for the three-year period beginning October 1, 1954.

AUTHORITY: §§ 723.504 to 723.506 issued under sec. 375, 52 Stat. 66, 7 U. S. C. 1375. Interpret or apply sec. 312, 52 Stat. 46, as amended; 7 U. S. C. 1312.

§ 723.504 *Basis and purpose.* Sections 723.504 to 723.506 are issued to announce the results of the cigar-filler tobacco and cigar-filler and cigar-binder tobacco marketing quota referenda for the marketing year beginning October 1, 1954, and for the three-year period beginning October 1, 1954. Under the provisions of the Agricultural Adjustment Act of 1938, as amended, the Secretary proclaimed a national marketing quota for cigar-filler tobacco and for cigar-filler and cigar-binder tobacco for the 1954-55 marketing year (18 F. R. 6443). The Secretary announced (18 F. R. 6502) that referenda would be held on October 29, 1953, to determine whether cigar-filler tobacco producers and cigar-filler and cigar-binder tobacco producers were in favor of or opposed to marketing quotas for the marketing year beginning October 1, 1954, and to determine whether cigar-filler tobacco producers and cigar-filler and cigar-binder tobacco producers were in favor of or opposed to marketing quotas for the three-year period beginning October 1, 1954. Since the only purpose of this proclamation is to announce the results of the referenda, it is hereby found and determined that with respect to this proclamation, application of the notice and procedure provisions of the Administrative Procedure Act (5 U. S. C. 1003) is unnecessary.

§ 723.505 *Proclamation of the results of the cigar-filler tobacco marketing quota referendum for the marketing year beginning October 1, 1954, and for the three-year period beginning October 1, 1954.* In a referendum of farmers engaged in the production of the 1953 crop of cigar-filler tobacco held on October 29, 1953, 1,479 farmers voted. Of those voting, 258 or 17.4 percent favored quotas for a period of three years beginning October 1, 1954; 103 or 7.0 percent favored quotas for only the one year beginning October 1, 1954; and 1,118 or 75.6 percent were opposed to quotas. Since more than one-third of the farmers voting opposed quotas, the national marketing quota for cigar-filler tobacco for the marketing year beginning October 1, 1954, proclaimed on October 7, 1953 (18 F. R. 6443), becomes ineffective. Therefore, marketing quotas will not be in effect on cigar-filler tobacco for the marketing year beginning October 1, 1954.

§ 723.506 *Proclamation of the results of the cigar-filler and cigar-binder tobacco marketing quota referendum for the marketing year beginning October 1, 1954, and for the three-year period beginning October 1, 1954.* In a referendum of farmers engaged in the production of the 1953 crop of cigar-filler and cigar-binder tobacco held on October 29, 1953, 3,896 farmers voted. Of those voting, 3,000 or 77.0 percent favored quotas for a period of three years beginning October 1, 1954; 492 or 12.6 percent favored quotas for only the one year beginning October 1, 1954; and 404 or 10.4 percent were opposed to quotas. Therefore, the national marketing quota of 74,600,000 pounds proclaimed on October 7, 1953 (18 F. R. 6443), for cigar-filler and cigar-binder tobacco for the 1954-55 marketing year will be in effect for such year and marketing quotas on cigar-filler and cigar-binder tobacco will be in effect for three marketing years beginning October 1, 1954.

Done at Washington, D. C., this 15th day of December 1953. Witness my hand and the seal of the Department of Agriculture.

[SEAL] JOHN H. DAVIS,
*Assistant Secretary of Agriculture.*

[F. R. Doc. 53-10540; Filed, Dec. 17, 1953; 8:57 a. m.]

## Chapter VIII—Production and Marketing Administration (Sugar Branch), Department of Agriculture

Subchapter H—Determination of Wage Rates

[Sugar Det. 861.7]

PART 861—SUGAR BEETS: CALIFORNIA, SOUTHWESTERN ARIZONA, SOUTHERN OREGON AND WESTERN NEVADA: 1954 CROP

FAIR AND REASONABLE WAGE RATES

Pursuant to the provisions of section 301 (c) (1) of the Sugar Act of 1948, as amended (herein referred to as "act"), after investigation, and consideration of the evidence obtained at the public hearing held in Oakland, California, on October 6, 1953, the following determination is hereby issued.

§ 861.7 *Fair and reasonable wage rates for persons employed in the production, cultivation, or harvesting of the 1954 crop of sugar beets in California, southwestern Arizona, southern Oregon and western Nevada*—(a) *Requirements.* The requirements of section 301 (c) (1) of the act shall be deemed to have been met with respect to the production, cultivation, or harvesting of the 1954 crop of sugar beets in California, southwestern Arizona, southern Oregon and western Nevada if the producer complies with the following:

(1) *Wage rates.* All persons employed on the farm, or part of the farm covered by a separate labor agreement, shall have been paid in full for all such work and shall have been paid wages in cash therefor at rates as agreed upon between the producer and the laborer but, after the beginning of work on the 1954 crop of sugar beets or the date of issuance of this determination, whichever is later, not less than the following:

(i) *When employed on a time basis.* (*a*) For thinning, hoeing, or weeding; 70 cents per hour.

(*b*) For pulling, topping or loading; 75 cents per hour.

(*c*) For the operations specified above performed by workers certified by the local County Production and Marketing Administration Committee to be handicapped because of age or physical or mental deficiency, or by workers between 14 and 16 years of age, the above rates may be reduced by not more than one-third. Maximum employment per day for workers between 14 and 16 years of age, without deduction from Sugar Act payments to the producer, is 8 hours.

(*d*) For operating mechanical equipment, irrigating and all other operations in the production, cultivation, or harvesting of sugar beets for which a rate is not specified herein, the rate shall be as agreed upon between the producer and laborer.

(ii) *When employed on a piecework basis.* For work performed on a piecework basis the rate shall be as agreed upon between the producer and the laborer: *Provided*, That for the operations of thinning, hoeing, weeding, pulling, topping or loading, the average hourly rate of earnings for each worker for the time involved on each separate unit of work for which a piecework rate is agreed upon shall be not less than the applicable hourly rate provided under subdivision (i) of this subparagraph.

(2) *Perquisites.* In addition to the foregoing, the producer shall furnish to the laborer, without charge, the perquisites customarily furnished by him, such as a house, garden plot, and similar items.

(b) *Subterfuge.* The producer shall not reduce the wage rates to laborers below those determined herein through any subterfuge or device whatsoever.

(c) *Claim for unpaid wages.* Any person who believes he has not been paid in accordance with this determination may file a wage claim with the local County Production and Marketing Administration Committee against the producer on whose farm the work was performed. Such claim must be filed within two years from the date the work with respect to which the claim is made was performed. Detailed information and wage claim forms are available at the offices of the local County PMA Committees. Upon receipt of a wage claim the County PMA Committee shall thereupon notify the producer against whom the claim is made concerning the representation made by the laborer, and, after making such investigation as it deems necessary, notify the producer and laborer in writing of its recommendation for settlement of the claim. If either party is not satisfied with the recommended settlement an appeal may be made to the State Committee of the Production and Marketing Administration in which is located the farm where the work was performed. The address of the State Committee will be furnished by the office of the local County Committee. Upon receipt of the appeal the State Committee shall likewise consider the facts and notify the producer and laborer in writing of its recommendation for settlement of the claim. If the recommendation of the State Committee is not acceptable, either party may file an appeal with the Director of the Sugar Branch, Production and Marketing Administration, U. S. Department of Agriculture, Washington 25, D. C. All such appeals shall be filed within 15 days after receipt of the recommended settlement of the respective committee, otherwise such recommended settlement will be applied in making payment under the act. If a claim is appealed to the Director of the Sugar Branch, his decision shall be binding on all parties insofar as payments under the act are concerned.

STATEMENT OF BASES AND CONSIDERATIONS

(a) *General.* The foregoing determination provides fair and reasonable wage rates which a producer must pay, as a minimum, for work performed by persons employed on the farm in the production, cultivation, or harvesting of the 1954 crop of sugar beets in California, southwestern Arizona, southern Oregon and western Nevada, as one of the conditions for payment under the act.

(b) *Requirements of the act and standards employed.* In determining fair and reasonable wage rates, it is required under the act that a public hearing be held, that investigations be made and that consideration be given to (1) the standards formerly established by the Secretary of Agriculture under the Agricultural Adjustment Act, as amended, and (2) the differences in conditions among various sugar producing areas.

A public hearing was held in Oakland, California, October 6, 1953, at which interested persons presented testimony with respect to fair and reasonable wage rates for the production, cultivation or harvesting of the 1954 crop of sugar beets in California, southwestern Arizona, southern Oregon and western Nevada. In addition, investigations have been made of conditions affecting wage rates in this region. In this determination the primary factors which have been considered are (1) cost of living; (2) prices of sugar and by-products; (3) income from sugar beets; and (4) cost of production. Other economic influences also have been considered.

(c) *1954 wage determination.* The 1954 wage determination continues unchanged the wage rates and other provisions of the 1953 determination.

At the public hearing a representative of the sugar beet growers' association recommended (1) no change in wage rates for the 1954 crop; (2) the continuance of the provision permitting the payment of a reduced rate to workers 14 to 16 years of age and, under certain conditions, to handicapped workers; and (3) through a supplementary brief that the wage determination not include specifications suggested in the notice of hearing with respect to compensable working time or the furnishing of equipment necessary to perform work assignments. A representative of a sugar beet harvesting machine operators' association at the hearing and by supplemental brief recommended the inclusion in the wage determination of specific rates for custom harvesting machine operators who, as a condition of their employment, furnish necessary machinery and equipment. There was no direct testimony by workers or their representatives.

In this determination, consideration has been given to recommendations made at the public hearing, to data reflecting the returns, costs and profits of sugar beet producers and to other factors customarily considered in wage determinations. An examination of the several factors does not indicate a basis for altering the wage rate structure of the prior wage determination. Provisions for compensable working time and the furnishing to workers of tools and apparel necessary to work assignments are not included in this determination since there has been no evidence or testimony introduced which indicates a current need for either of these provisions in this region. The recommendation for the specific inclusion of machine harvester contractors has not been accepted because it is considered that persons furnishing to one or more growers heavy equipment, such as harvesting machines, on a fee or price basis are independent contractors and not wage earners furnishing principally their personal services as employees.

After consideration of all factors, the wage rates and other provisions in this determination are deemed to be fair and reasonable.

Accordingly, I hereby find and conclude that the foregoing wage determination will effectuate the wage provisions of the act.

(Sec. 403, 61 Stat. 932; 7 U. S. C. Sup. 1153. Interprets or applies sec. 301, 61 Stat. 929; 7 U. S. C. Sup. 1131)

Issued this 15th day of December 1953.

[SEAL] JOHN H. DAVIS,
*Assistant Secretary of Agriculture.*

## Chapter IX—Production and Marketing Administration (Marketing Agreements and Orders), Department of Agriculture

[Tangerine Reg. 142]

PART 933—ORANGES, GRAPEFRUIT, AND TANGERINES GROWN IN FLORIDA

LIMITATION OF SHIPMENTS

§ 933.654 *Tangerine Regulation 142*—(a) *Findings.* (1) Pursuant to the marketing agreement, as amended, and Order No. 33, as amended (7 CFR Part 933), regulating the handling of oranges, grapefruit, and tangerines grown in the State of Florida, effective under the applicable provisions of the Agricultural Marketing Agreement Act of 1937, as amended, and upon the basis of the recommendations of the committees established under the aforesaid amended marketing agreement and order, and upon other available information, it is hereby found that the limitation of shipments of tangerines, as hereinafter provided, will tend to effectuate the declared policy of the act.

(2) It is hereby further found that it is impracticable and contrary to the public interest to give preliminary notice, engage in public rule-making procedure, and postpone the effective date of this section until 30 days after publication thereof in the FEDERAL REGISTER (60 Stat. 237; 5 U. S. C. 1001 et seq.) because the time intervening between the date when information upon which this section is based became available and the time when this section must become effective in order to effectuate the declared policy of the act is insufficient; a reasonable time is permitted, under the circumstances, for preparation for such effective time; and good cause exists for making the provisions hereof effective not later than December 18, 1953. Shipments of tangerines grown in the State of Florida, are presently subject to regulation by grades and sizes, pursuant to the amended marketing agreement and order, and, unless sooner terminated, will so continue until December 21, 1953; the recommendation and supporting information for regulation subsequent to December 17, 1953, and in the manner herein provided, was promptly submitted to the Department after an open meeting of the Grow-

ers Administrative Committee on December 15; such meeting was held to consider recommendations for regulation, after giving due notice of such meeting, and interested persons were afforded an opportunity to submit their views at this meeting; the provisions of this section, including the effective time hereof, are identical with the aforesaid recommendation of the committee, and information concerning such provisions and effective time has been disseminated among handlers of such tangerines; it is necessary, in order to effectuate the declared policy of the act, to make this section effective during the period hereinafter set forth so as to provide for the continued regulation of the handling of tangerines; and compliance with this section will not require any special preparation on the part of persons subject thereto which cannot be completed on or before the effective time hereof.

(b) *Order.* (1) Tangerine Regulation 141 (7 CFR 933.651; 18 F. R. 7583) is hereby terminated as of the effective time of this section.

(2) During the period beginning at 12:01 a. m., e. s. t., December 18, 1953, and ending at 12:01 a. m., e. s. t., January 4, 1954, no handler shall ship:

(i) Any tangerines, grown in the State of Florida, that do not grade at least U. S. No. 1; or

(ii) Any tangerines, grown in the State of Florida, that are of a size smaller than $2^{5}/_{16}$ inches in diameter, measured midway at a right angle to a straight line running from the stem to the blossom end of the fruit, except that a tolerance of 10 percent, by count, of tangerines, smaller than such minimum size shall be permitted, which tolerance shall be applied in accordance with the provisions for the application of tolerances, specified in the revised United States Standards for Florida Tangerines (§§ 51.1810 to 51.1836 of this title).

(3) As used in this section, "handler," "ship," and "Growers Administrative Committee" shall have the same meaning as when used in said amended marketing agreement and order; and "U. S. No. 1," shall have the same meaning as when used in the revised United States Standards for Florida Tangerines (51.1810–1836) (§§ 51.1810 to 51.1836 of this title).

(Sec. 5, 49 Stat. 753, as amended; 7 U. S. C. and Sup. 608c)

Done at Washington, D. C., this 16th day of December 1953.

[SEAL] S. R. SMITH,
*Director, Fruit and Vegetable Branch, Production and Marketing Administration.*

[F. R. Doc. 53-10554; Filed, Dec. 17, 1953; 8:57 a. m.]

---

[Lemon Reg. 515]

PART 953—LEMONS GROWN IN CALIFORNIA AND ARIZONA

LIMITATION OF SHIPMENTS

*Correction*

In Federal Register Document 53-10425, published at page 8172 of the issue for Saturday, December 12, 1953, § 953.626 should have been designated "§ 953.622".

## TITLE 8—ALIENS AND NATIONALITY

### Chapter II—Office of Alien Property, Department of Justice

PART 502—RULES OF PROCEDURE FOR CLAIMS

REFERENCES TO "CHIEF OF CLAIMS SECTION"

Part 502 contains certain rules which require amendment to conform to the current organization of the Office of Alien Property. Since no additional requirements are imposed, it is hereby found that notice, hearing and suspension of applicability are unnecessary.

The Claims Branch of the Office of Alien Property has been redesignated as the Claims Section of that office. The Claims Section is under the supervision of the Chief of the Claims Section whose functions are the same as those of the former Chief of the Claims Branch. Accordingly:

Sections 502.2 (j) and (n), 502.3, 502.6 (b), 502.7 (a), 502.21 (a), 502.25 (a), (c) and (i), 502.26 (b), 502.29, 502.102 (a), (d) and (e), 502.201 (a) and (d), and 502.202 (b), (c), and (d) are hereby amended by deleting reference therein to the "Chief of the Claims Branch" and substituting therefor reference to the "Chief of the Claims Section."

(40 Stat. 411, 55 Stat. 839, 60 Stat. 50, 925, 64 Stat. 1079, 50 U. S. C. App. and Sup. 1–40; 60 Stat. 418, 64 Stat. 1116, 22 U. S. C. and Sup. 1382; E. O. 8389, April 10, 1940, 5 F. R. 1400, as amended, 3 CFR, 1943 Cum. Supp.; E. O. 9142, April 21, 1942, 7 F. R. 2985, 3 CFR, 1943 Cum. Supp.; E. O. 9193, July 6, 1942, 7 F. R. 5205, 3 CFR, 1943 Cum. Supp.; E. O. 9567, June 8, 1945, 10 F. R. 6917, 3 CFR, 1945 Supp.; E. O. 9725, May 16, 1946, 11 F. R. 5381, 3 CFR, 1946, Supp.; E. O. 9788, October 14, 1946, 11 F. R. 11981, 3 CFR, 1946 Supp.; E. O. 9818, January 1, 1947, 12 F. R. 133, 3 CFR, 1947 Supp.; E. O. 9921, January 10, 1948, 13 F. R. 171, 3 CFR, 1948 Supp.; E. O. 9989, August 20, 1948, 13 F. R. 4981, 3 CFR, 1948 Supp.; Proc. 2914, December 16, 1950, 15 F. R. 9029, 3 CFR, 1950 Supp.; E. O. 10244, May 17, 1951, 16 F. R. 4639, 3 CFR, 1951 Supp.; E. O. 10254, June 15, 1951, 16 F. R. 5829, 3 CFR, 1951 Supp.; E. O. 10348, April 26, 1952, 17 F. R. 3769, 3 CFR, 1952 Supp.)

Executed at Washington, D. C., on December 11, 1953.

[SEAL] DALLAS S. TOWNSEND,
*Assistant Attorney General, Director, Office of Alien Property.*

## TITLE 21—FOOD AND DRUGS

### Chapter I—Food and Drug Administration, Department of Health, Education, and Welfare

PART 146—CERTIFICATION OF BATCHES OF ANTIBIOTIC AND ANTIBIOTIC-CONTAINING DRUGS

MISCELLANEOUS AMENDMENTS

By virtue of the authority vested in the Secretary by the provisions of the Federal Food, Drug, and Cosmetic Act (sec. 507, 59 Stat. 463, as amended by 61 Stat. 11, 63 Stat. 409, 67 Stat. 389; sec. 701, 52 Stat. 1055; 21 U. S. C. 357, 371; 67 Stat. 18), the regulations for certification of batches of antibiotic and antibiotic-containing drugs (21 CFR, 1952 Supp., Part 146; 18 F. R. 6773) are amended as indicated below:

Section 146.1 *Definitions and interpretations* is amended as follows:

1. The following new paragraph, numbered (b–1), is inserted after the second sentence in paragraph (b):

(b–1) Each of the antibiotic substances produced by hydrogenation of streptomycin and each of the same substances produced by any other means is a kind of dihydrostreptomycin.

2. The third sentence in paragraph (b), beginning "Wherever the term 'dihydrostreptomycin' appears * * *" is transposed to the new paragraph (b–1), and becomes the second sentence in that paragraph.

3. The following new paragraph, numbered (c–1), is inserted following paragraph (c):

(c–1) Each of the several antibiotic substances produced by the hydrogenation of chlortetracycline and each of the same substances produced by any other means is a kind of tetracycline.

4. The following new paragraph, numbered (j–1), is inserted after paragraph (j):

(j–1) The term "tetracycline master standard" means a specific lot of crystalline tetracycline hydrochloride which is designated by the Commissioner as the standard of comparison in determining the potency of the tetracycline working standard.

5. Paragraph (n) is amended by inserting after the third sentence the following new sentence: "The term 'microgram' applied to tetracycline means the tetracycline activity (potency) contained in 1.0 microgram of the tetracycline master standard."

6. Paragraph (o) is amended by inserting the following new clause following the clause beginning "the term 'chlortetracycline working standard' means * * *": "the term 'tetracycline working standard' means a specific lot of a homogeneous preparation of one or more tetracycline salts;".

Notice and public procedure are not necessary prerequisites to the promulgation of this order, and I so find, since it was drawn in collaboration with interested members of the affected industry and since it would be against public interest to delay providing for the amendments set forth above.

This order shall become effective upon publication in the FEDERAL REGISTER, since both the public and the affected industry will benefit by the earliest effective date, and I so find.

(Sec. 701, 52 Stat. 1055; 21 U. S. C. 371)

Dated: December 14, 1953.

[SEAL] OVETA CULP HOBBY,
*Secretary.*

[F. R. Doc. 53-10519; Filed, Dec. 17, 1953; 8:51 a. m.]

PART 146—CERTIFICATION OF BATCHES OF ANTIBIOTIC AND ANTIBIOTIC-CONTAINING DRUGS

PROCAINE PENICILLIN IN OIL

By virtue of the authority vested in the Secretary by the provisions of the Federal Food, Drug, and Cosmetic Act (sec. 507, 59 Stat. 463, as amended by 61 Stat. 11, 63 Stat. 409, 67 Stat. 389; sec. 701, 52 Stat. 1055; 21 U. S. C. 357, 371; 67 Stat. 18), the regulations for certification of batches of antibiotic and antibiotic-containing drugs (21 CFR, 1952 Supp., Part 146; 18 F. R. 6773) are amended as indicated below:

Section 146.45 *Procaine penicillin in oil* is amended as follows:

1. Paragraph (a) *Standards of identity* * * * is amended by deleting the period at the end of the second sentence and adding the words "or adrenocorticotropic hormone (ACTH)."

2a. In paragraph (c) *Labeling*, subparagraph (1) (v) is amended by inserting the words "or adrenocorticotropic hormone" between the words "nitrofurazone" and "is used".

b. Paragraph (c) (2) is amended by renumbering subdivision (ii) as (iii) and inserting the following new subdivision (ii) between subdivision (i) and renumbered subdivision (iii):

(ii) If it is intended solely for veterinary use and contains adrenocorticotropic hormone, the statement "Caution: Federal law restricts this drug to sale by or on the order of a licensed veterinarian."

c. Paragraph (c) (3) is amended to read:

(3) On the circular or other labeling within or attached to the package, if it is packaged for dispensing and it is intended solely for veterinary use and is conspicuously so labeled:

(i) If it contains adrenocorticotropic hormone, adequate directions and warnings for its use by veterinarians licensed by law to administer such drug.

(ii) If it does not contain adrenocorticotropic hormone, adequate directions and warnings for the veterinary use of such drug by the laity.

Such circular or other labeling may also bear a statement that a brochure or other printed matter containing information for other veterinary uses of such drug by a veterinarian licensed by law to administer it will be sent to such veterinarian on request.

(Sec. 701, 52 Stat. 1055; 21 U. S. C. 371)

Notice and public procedure are not necessary prerequisites to the promulgation of this order, and I so find, since it was drawn in collaboration with interested members of the affected industry and since it would be against public interest to delay providing for the amendments set forth above.

This order shall become effective upon publication in the FEDERAL REGISTER, since both the public and the affected industry will benefit by the earliest effective date, and I so find.

Dated: December 14, 1953.

[SEAL] OVETA CULP HOBBY,
*Secretary.*

[F. R. Doc. 53-10521; Filed, Dec. 17, 1953; 8:51 a. m.]

## TITLE 22—FOREIGN RELATIONS

### Chapter I—Department of State

[Departmental Reg. 108.205]

PART 97—OCEAN SHIPMENT OF SUPPLIES BY VOLUNTARY NON-RELIEF AGENCIES

PART 98—REGISTRATION OF AGENCIES FOR VOLUNTARY FOREIGN AID

WITHDRAWAL

The following parts in Chapter I, Title 22, Code of Federal Regulations, are withdrawn from publication:

Part 97—Ocean Shipment of Supplies by Voluntary Non-Relief Agencies which was superseded by regulations prescribed in 22 CFR 202 (18 F. R. 5382) by the Director, Foreign Operations Administration.

Part 98—Registration of Agencies for Voluntary Foreign Aid which was superseded by regulations prescribed in 22 CFR 203 (18 F. R. 5383) by the Director, Foreign Operations Administration.

Dated: December 14, 1953.

For the Secretary of State.

EDWARD T. WAILES,
*Assistant Secretary.*

[F. R. Doc. 53-10523; Filed, Dec. 17, 1953; 8:52 a. m.]

## TITLE 43—PUBLIC LANDS: INTERIOR

### Chapter I—Bureau of Land Management, Department of the Interior

Subchapter S—Rights-of-Way

[Circular 1866]

PART 244—RIGHTS-OF-WAY OTHER THAN FOR RAILROAD PURPOSES AND FOR LOGGING ROADS ON THE OREGON AND CALIFORNIA AND COOS BAY REVESTED LANDS

SUBPART I—RIGHTS-OF-WAY THROUGH PUBLIC LANDS AND RESERVATIONS FOR OIL AND NATURAL GAS PIPELINES AND PUMPING PLANT SITES UNDER THE MINERAL LEASING ACT

STATUTORY AUTHORITY; COMMON CARRIER STIPULATION

By the act of August 12, 1953 (67 Stat. 557, Pub. Law 253, 83d Cong.), section 28 of the act of February 25, 1920, as amended (41 Stat. 449, 49 U. S. C. 678; 30 U. S. C. 185), was further amended so as to except certain natural gas pipeline rights-of-way from the operation of the common carrier provisions of that section. In order to show such amendment, §§ 244.60 and 244.62 are amended to read as follows:

§ 244.60 *Statutory authority.* (a) Section 28 of the act of February 25, 1920 (41 Stat. 449), as amended by the acts of August 21, 1935 and August 12, 1953 (49 Stat. 678; 67 Stat. 557; 30 U. S. C. 185), authorizes the Secretary to grant rights-of-way through public lands, including the forest reserves of the United States, for pipeline purposes for the transportation of oil or natural gas to any applicant possessing the qualifications provided in section 1 of the act (41 Stat. 437; 30 U. S. C. 22, 48, 181) to the extent of the ground occupied by the said pipeline and 25 feet on each side of the same under such regulations and conditions as to survey, location, application, and use as may be prescribed by him, and upon the express conditions that such pipeline, if for oil, or for natural gas and not excepted from the common carrier provisions of section 28 of the act of February 25, 1920, as amended, as stated in paragraph (b) of this section, shall be constructed, operated and maintained as a common carrier and that every pipeline holder shall accept, convey, transport, or purchase without discrimination oil or natural gas produced from Government lands in the vicinity of the pipeline in such proportionate amount as the Secretary of the Interior may, after a full hearing, with due notice thereof to the interested parties, and a proper finding of facts, determine to be reasonable.[1]

(b) The amendatory act of August 12, 1953, cited in paragraph (a) of this section provides that the common carrier provisions of section 28 of the act of February 25, 1920, shall not apply to any natural gas pipeline operated by any person subject to regulation under the Natural Gas Act (52 Stat. 821; 15 U. S. C. 717w) or by any public utility subject to regulation by a State or municipal regulatory agency having jurisdiction to regulate the rates and charges for the sale of natural gas to consumers within the State or municipality.

§ 244.62 *Common carrier stipulation.* Each application for a pipeline right-of-way, if for oil, or for natural gas and the pipeline has not been excepted from the common carrier provisions of section 28 of the act of February 25, 1920, as amended, as stated in § 244.60 (b), must include the following stipulation:

The applicant agrees to operate the pipeline as a common carrier in accordance with the provisions of the Mineral Leasing Act, and, within 30 days after the request of the Secretary of the Interior, to file rate schedule and tariff for the transportation of oil or gas, as the case may be, as such common carrier with any regulatory agency having jurisdiction over such transportation, as the Secretary may prescribe.

(R. S. 161, 453, 2478; 5 U. S. C. 22, 43 U. S. C. 2, 1201. Interpret or apply sec. 28, 41 Stat. 449, 67 Stat. 557; 30 U. S. C. 185)

DOUGLAS MCKAY,
*Secretary of the Interior.*

DECEMBER 11, 1953.

[F. R. Doc. 53-10490; Filed, Dec. 17, 1953; 8:45 a. m.]

[1] By opinion of the Attorney General of January 3, 1941 (40 Op. Atty. Gen. 9), and departmental decision, Chiles P. Plummer, A-23988, February 24, 1945, this statute was construed as not applying to purchased or acquired lands as they are not considered public lands within the meaning of the act.

# TITLE 26—INTERNAL REVENUE

## Chapter I—Internal Revenue Service, Department of the Treasury

### Subchapter C—Miscellaneous Excise Taxes

[Regulations 19]

### PART 195—PRODUCTION OF VINEGAR BY THE VAPORIZING PROCESS

*Preamble.* 1. These regulations, Regulations 19, "Production of Vinegar by the Vaporizing Process" (26 CFR Part 195), are a republication of Regulations 19, 1940 edition (26 CFR Part 195), as amended to date by approved Treasury decisions.

2. These regulations, except for the addition of several new definitions and the revision of several sections to conform with the delegation of authority made in IR-Mimeograph No. 232, dated July 6, 1953, consist only of previously approved material but the text has been rearranged and renumbered to conform to the Federal Register Regulations (13 F. R. 5929).

3. This republication of these regulations shall not affect or limit any act done or any liability previously incurred, or any suit, action, or proceeding had or commenced in any civil, administrative, or criminal cause and proceeding prior to the date of republication, nor shall this republication release, acquit, affect, or limit any offense committed in violation of these regulations prior to republication, or any penalty, liability or forfeiture incurred prior to such date.

4. It is found that compliance with notice and public rule making procedure of section 4 (a) and the effective date limitations of section 4 (c) of the Administrative Procedure Act (5 U. S. C. 1001 et seq.) is unnecessary in connection with the republication of the regulations in this part for the reason that the changes made relate merely to form and not substance.

Sec.
195.0 Statutory provisions.
195.0–1 Departmental regulations.
195.0–2 Registry of stills.
195.0–3 Notice of manufacture of and permit to set up still.
195.0–4 Entry and examination of distillery.
195.0–5 Distillers and rectifiers to furnish facilities and give assistance for examination of premises.
195.0–6 Installation of meters, tanks, and other apparatus.
195.0–7 Officer's authority to break up grounds or walls.
195.0–8 Mash, wort, and vinegar; vinegar factories.
195.0–9 Vinegar factories operated prior to March 1, 1879.
195.0–10 Transfer and delegation of powers.
195.0–11 Rules and regulations.
195.0–12 Issue of instructions, regulations, and forms.

Subpart A—Scope of Regulations

195.1 Production of vinegar by the vaporizing process.
195.2 Instruments and papers.

Subpart B—Definitions

195.5 Meaning of terms.
195.6 Assistant Regional Commissioner.
195.7 Commissioner.
195.8 Distilling materials.
195.9 District Director.
195.10 Gallon.
195.11 Including.
195.12 Inclusive language.
195.13 I. R. C.
195.14 Person, proprietor, vinegar maker.
195.15 Proof.
195.16 Proof gallon.
195.17 Secretary.
195.18 U. S. C.
195.19 Vinegar factory.

Subpart C—Location and Use

195.30 Restrictions.
195.31 Use of premises.

Subpart D—Construction

195.35 Buildings or rooms.
195.36 Means of ingress or egress.
195.37 Doors, windows, and other openings.
195.38 Distilling department.

Subpart E—Sign

195.45 Posting of sign.

Subpart F—Equipment

195.50 Fermenting material storage tanks.
195.51 Mash tubs and fermenters.
195.52 Mash tub coils.
195.53 Stills.
195.54 Pipes for conveying vapor.
195.55 Presence of worm forbidden.
195.56 Spray tanks or condensers.
195.57 Closed condensers.
195.58 Artificial means of condensing vapors.
195.59 Contrivance for cooling liquid.
195.60 Low wine receiving tanks.
195.61 Low wine storage tanks.
195.62 Pipe lines.
195.63 Colors for pipe lines.
195.64 Details of construction and equipment not specified.
195.65 Vinegar factories heretofore established.

Subpart G—Qualifying Documents

195.75 Notice, Form 27–F.
195.76 Description of premises.
195.77 Description of distilling department.
195.78 Description of apparatus and equipment.
195.79 Capacity.
195.80 Amended and supplemental notices.
195.81 Corporate documents.
195.82 Power of attorney, Form 1534.
195.83 Execution of power of attorney.
195 84 Duration of power of attorney.
195.85 Registry of stills, Form 26.
195.86 Plat and plans.
195.87 Additional information.

Subpart H—Plats and Plans

195.95 Plat and plans required.
195.96 Preparation.
195.97 Depiction of premises.
195.98 Contiguous premises.
195.99 Floor plan of distilling department.
195.100 Elevational plans of distilling equipment.
195.101 Pipe lines and colors.
195.102 Location of valves, flanges, etc.
195.103 Direction of flow.
195.104 Certificate of accuracy.
195.105 Supplemental, superseding, and additional plats and plans.

Subpart I—Requirements Governing Changes in Name, Proprietorship, Control, Location, Premises and Equipment

195.110 General requirement.

CHANGE IN INDIVIDUAL, FIRM, OR CORPORATE NAME

195.111 Amended notice, Form 27–F.
195.112 Sign.
195.113 Records.

CHANGE IN PROPRIETORSHIP, SUSPENSION

195.114 General.
195.115 Notice, Form 27–F.
195.116 Registry of stills.
195.117 Notice of suspension.
195.118 Records.

CHANGE IN PROPRIETORSHIP, QUALIFICATION OF SUCCESSOR

195.119 General.
195.120 Nonfiduciary successor.
195.121 Fiduciary.
195.122 Adoption of plat and plans.
195.123 Sign.
195.124 Materials and low wines.

OTHER CHANGES IN PROPRIETORSHIP OR CONTROL

195.125 Changes in partnership.
195.126 Changes in stockholders, officers, and directors of corporation.
195.127 Reincorporation.

CHANGES IN LOCATION, PREMISES, AND EQUIPMENT

195.128 Change in location.
195.129 Changes in premises.
195.130 Changes in equipment.

Subpart J—Action by Assistant Regional Commissioner

ORIGINAL ESTABLISHMENT

195.140 Examination of qualifying documents.
195.141 Inspection of premises.
195.142 Report of inspection.
195.143 Inaccurate documents.
195.144 Defective construction.
195.145 Approval of qualifying documents.
195.146 Disapproval of qualifying documents.
195.147 Disposition of qualifying documents.

CHANGES SUBSEQUENT TO ORIGINAL ESTABLISHMENT

195.148 Procedure applicable.
195.149 Applications and reports covering changes.

Subpart K—Action by Commissioner

ORIGINAL ESTABLISHMENT

195.155 Review of documents.
195.156 Registry numbers.

CHANGES SUBSEQUENT TO ORIGINAL ESTABLISHMENT

195.157 Procedure applicable.

Subpart L—Plant Operation

GENERAL

195.165 Compliance with requirements of law and this part.
195.166 Inspection of premises and records.

COMMENCEMENT OF OPERATIONS

195.167 Fermenting and distilling materials.
195.168 Removal of fermenting material from premises.

MASHING AND FERMENTING

195.169 Production of mash.
195.170 Quantity of mash and beer determined.

DISTILLATION

195.171 Production of low wines.
195.172 Conversion of vapor into distilled spirits forbidden.
195.173 Test of condensing material.
195.174 Deposit of low wines in receiving tanks.
195.175 Gauge prior to removal.

LOSSES

195.176 In receiving or storage tanks.
195.177 Allowance for loss.
195.178 Losses not cumulative.
195.179 Time for filing application.
195.180 Tax must be paid on illegally diverted low wines.

REMOVAL AND TESTING OF VINEGAR

195.181 Removal.
195.182 Test of vinegar.

Subpart M—Proprietor's Records and Reports

Sec.
195.190 General.
195.191 Execution.
195.192 Permanent record.
195.193 Monthly report, Form 1623.

Subpart N—Suspension and Resumption of Operations

195.200 Suspension.
195.201 Registry of stills, Form 26.
195.202 Resumption.

Subpart O—Registry of Stills "For Use" and "Not for Use"

195.210 Registry on Form 26.
195.211 Alternate use of stills.

Subpart P—Change of Persons Interested in Business

195.220 Completion of operations required.
195.221 Requirements as to predecessor.
195.222 Reports and records.
195.223 Succession by fiduciary.

Subpart Q—Discontinuance of Business

195.230 Discontinuance.
195.231 Notice, Form 27–F.
195.232 Registry of stills, Form 26.

Subpart R—General Provisions Relating to Vinegar Factories

195.240 Production of mash, wort, or wash.
195.241 Sale or removal of mash, wort, or wash; distillation.
195.242 Inspection of records and premises.
195.243 Samples may be taken by officers.

Subpart S—Instructions Concerning Government Officers

INSPECTION OF VINEGAR FACTORIES

195.250 Entry of vinegar factory or premises used in connection therewith.
195.251 Authority to break up grounds or walls.
195.252 Proprietors to furnish assistance.
195.253 Officers to keep themselves informed.
195.254 Frequency of inspection.
195.255 Scope of inspection.
195.256 Examination of records.
195.257 Examination of distilling equipment.
195.258 Materials.
195.259 Test of low wines and vinegar.
195.260 Storage of low wines.
195.261 Additional inquiries.
195.262 Inspection reports.

Subpart T—Instructions to Assistant Regional Commissioners

LOSSES

195.270 Investigation by Assistant Regional Commissioners.
195.271 Examination of reports of proprietors.
195.272 Use of materials not reported.
195.273 Determining low wines produced.
195.274 Notice to proprietor.
195.275 Nature of evidence.
195.276 Consideration of response.
195.277 Evidence of loss.
195.278 Proprietor's failure to respond.
195.279 Examination of evidence.
195.280 Assistant Regional Commissioner's credit for losses.

AUDIT OF REPORTS

195.281 Audit of reports of vinegar manufacturers.

ASSISTANT REGIONAL COMMISSIONER'S REPORT

195.282 Assistant Regional Commissioner's report, Form 1624.

Subpart U—Rules for Computing Capacity of Stills

195.290 Pot or kettle stills.
195.291 Charge chamber stills.
195.292 Continuous stills.

AUTHORITY: §§ 195.1 to 195.292 issued under 53 Stat. 375; 26 U. S. C. 3176. Other statutory provisions interpreted or applied are cited to the text in parentheses.

§ 195.0 *Statutory provisions.* The provisions of law having more common application to the production of vinegar by the vaporizing process are contained in §§ 195.0–1 to 195.0–12.

§ 195.0–1 *Departmental regulations.*

5 U. S. C. 22 DEPARTMENTAL REGULATIONS. The head of each department is authorized to prescribe regulations, not inconsistent with law, for the government of his department, the conduct of its officers and clerks, the distribution and performance of its business, and the custody, use, and preservation of the records, papers, and property appertaining to it.

§ 195.0–2 *Registry of stills.*

26 U. S. C. 2810 REGISTRY OF STILLS.

(a) *Requirement.* Every person having in his possession or custody, or under his control, any still or distilling apparatus set up, shall register the same with the collector of the district in which it is, by subscribing and filing with him duplicate statements, in writing, setting forth the particular place where such still or distilling apparatus is set up, the kind of still and its cubic contents, the owner thereof, his place of residence, and the purpose for which said still or distilling apparatus has been or is intended to be used; one of which statements shall be retained and preserved by the collector, and the other transmitted by him to the Commissioner. Stills and distilling apparatus shall be registered immediately upon their being set up.

Every still or distilling apparatus not so registered, together with all personal property in the possession or custody, or under the control of such person, and found in the building, or in any yard or inclosure connected with the building in which the same may be set up, shall be forfeited.

And every person having in his possession or custody, or under his control, any still or distilling apparatus set up which is not so registered, shall pay a penalty of $500, and shall be fined not less than $100, nor more than $1,000, and imprisoned for not less than one month, nor more than two years.

* * * * *

(b) *Transfer of duties.* For transfer of powers and duties of Commissioner and his agents, see section 3170.

§ 195.0–3 *Notice of manufacture of and permit to set up still.*

26 U. S. C. 2818 NOTICE OF MANUFACTURE OF AND PERMIT TO SET UP STILL.

(a) *Requirement.* Any person who manufactures any still, boiler, or other vessel to be used for the purpose of distilling, shall, before the same is removed from the place of manufacture, notify in writing the collector of the district in which such still, boiler, or other vessel is to be used or set up, by whom it is to be used, its capacity, and the time when the same is to be removed from the place of manufacture; and no such still, boiler, or other vessel shall be set up without the permit in writing of the said collector for that purpose; and

(b) *Penalty for setting up still without permit.* Any person who sets up any such still, boiler, or other vessel, without first obtaining a permit from the said collector of the district in which such still, boiler, or other vessel is intended to be used, or who fails to give such notice, shall pay in either case the sum of $500, and shall forfeit the distilling apparatus thus removed or set up in violation of law.

(c) *Transfer of duties.* For transfer of powers and duties of Commissioner and his agents, see section 3170.

§ 195.0–4 *Entry and examination of distillery.*

26 U. S. C. 2827 ENTRY AND EXAMINATION OF DISTILLERY.

(a) *Power of revenue officers.* It shall be lawful for any revenue officer at all times, as well by night as by day, to enter into any distillery or building or place used for the business of distilling, or used in connection therewith for storage or other purposes, and to examine, gauge, measure, and take an account of every still or other vessel or utensil of any kind, and of all low-wines, and of the quantity and gravity of all mash, wort, or beer, and of all yeast, or other compositions for exciting or producing fermentation in any mash or beer, of all spirits and of all materials for making or distilling spirits, which may be in any such distillery or premises, or in possession of the distiller.

And whenever any internal revenue officer, or any person called by him to his aid, is hindered, obstructed, or prevented by any distiller or by any workman, or other person acting for such distiller, or in his employ, from entering into any such distillery or building or place as aforesaid; or any such officer is by the distiller, or his workman, or any person in his employ, prevented or hindered from, or opposed, or obstructed, or molested in the performance of his duty under the internal revenue laws, in any respect, the distiller shall forfeit the sum of not exceeding $1,000.

And whenever any officer, having demanded admittance into a distillery or distillery premises, and having declared his name and office, is not admitted into such distillery or premises by the distiller or other person having charge thereof, it shall be lawful for such officer at all times, as well by night as by day, to break open by force any of the doors or windows, or to break through any of the walls of such distillery or premises necessary to be broken open or through, to enable him to enter the said distillery or premises; and the distiller shall forfeit the sum of not exceeding $1,000.

(b) *Transfer of duties.* For transfer of powers and duties of Commissioner and his agents, see section 3170.

§ 195.0–5 *Distillers and rectifiers to furnish facilities and give assistance for examination of premises.*

26 U. S. C. 2828 DISTILLERS AND RECTIFIERS TO FURNISH FACILITIES AND GIVE ASSISTANCE FOR EXAMINATION OF PREMISES.

(a) *Power of revenue officers.* On the demand of any internal revenue officer or agent, every distiller or rectifier shall furnish strong, safe, and convenient ladders of sufficient length to enable the officer or agent to examine and gauge any vessel or utensil in such distillery or premises; and shall, at all times when required, supply all assistance, lights, ladders, tools, staging, or other things necessary for inspecting the premises, stock, tools, and apparatus belonging to such person, and shall open all doors, and open for examination all boxes, packages, and all casks, barrels, and other vessels not under the control of the revenue officer in charge, under a penalty of $500 for every refusal or neglect so to do.

(b) *Transfer of duties.* For transfer of powers and duties of Commissioner and his agents, see section 3170.

§ 195.0–6 *Installation of meters, tanks, and other apparatus.*

26 U. S. C. 2829 INSTALLATION OF METERS, TANKS, AND OTHER APPARATUS.

(a) *Power of the Commissioner.* The Commissioner, with the approval of the Secretary, is authorized to require at distilleries, breweries, rectifying houses, and wherever else in his judgment such action may be deemed advisable, the installation of meters, tanks, pipes, or any other apparatus for the purpose of protecting the revenue, and such

meters, tanks, and pipes and all necessary labor incident thereto shall be at the expense of the person on whose premises the installation is required. Any such person refusing or neglecting to install such apparatus when so required by the Commissioner shall not be permitted to conduct business on such premises.

(b) *Transfer of duties.* For transfer of powers and duties of Commissioner and his agents, see section 3170.

§ 195.0–7 *Officer's authority to break up grounds or walls.*

26 U. S. C. 2830 OFFICER'S AUTHORITY TO BREAK UP GROUNDS OR WALLS.

(a) *Power of revenue agent.* It shall be lawful for any revenue officer, and any person acting in his aid, to break up the ground on any part of a distillery, or premises of a distiller or rectifier, or any ground adjoining or near to such distillery or premises, or any wall or partition thereof, or belonging thereto, or other place, to search for any pipe, cock, private conveyance, or utensil; and, upon finding any such pipe or conveyance leading therefrom or thereto, to break up any ground, house, wall, or other place through or into which such pipe or other conveyance leads, and to break or cut away such pipe or other conveyance, and turn any cock, or to examine whether such pipe or other conveyance conveys or conceals any mash, wort, or beer, or other liquor, which may be used for the distillation of low-wines or spirits, from the sight or view of the officer, so as to prevent or hinder him from taking a true account thereof.

(b) *Transfer of duties.* For transfer of powers and duties of Commissioner and his agents, see section 3170.

§ 195.0–8 *Mash, wort, and vinegar; vinegar factories.*

26 U. S. C. 2834 MASH, WORT, AND VINEGAR; VINEGAR FACTORIES.

No mash, wort, or wash, fit for distillation or for the production of spirits or alcohol, shall be made or fermented in any building or on any premises other than a distillery duly authorized according to law; and no mash, wort, or wash so made and fermented shall be sold or removed from any distillery before being distilled; and no person, other than an authorized distiller, shall, by distillation, or by any other process, separate the alcoholic spirits from any fermented mash, wort, or wash; and no person shall use spirits or alcohol in manufacturing vinegar or any other article, or in any process of manufacture whatever, unless the spirits or alcohol so used shall have been produced in an authorized distillery and (except in the case of vinegar) the tax thereon paid. Every person who violates any provision of this section shall be fined for each offense not less than $500 nor more than $5,000, and be imprisoned not less than six months nor more than two years. Nothing in this section shall be construed to apply to fermented liquors, or to fermented liquids used for the manufacture of vinegar exclusively. But no worm, goose-neck, pipe, conductor, or contrivance of any description whatsoever whereby vapor might in any manner be conveyed away and converted into distilled spirits, shall be used or employed or be fastened to or connected with any vaporizing apparatus used for the manufacture of vinegar; nor shall any worm be permitted on or near the premises where such vaporizing process is carried on.

Nor shall any vinegar factory, for the manufacture of vinegar as aforesaid, be permitted, except as provided in section 2835, within six hundred feet of any distillery or rectifying house. But it shall be lawful for manufacturers of vinegar to separate, by a vaporizing process, the alcoholic property from the mash produced by them, and condense the same by introducing it into the water of other liquid used in making vinegar.

No person, however, shall remove, or cause to be removed, from any vinegar factory or place where vinegar is made, any vinegar or other fluid or material containing a greater proportion than 2 per centum of proof spirits. Any violation of this provision shall incur a forfeiture of the vinegar, fluid, or material containing such proof spirits, and shall subject the person or persons guilty of removing the same to the punishment provided for any violation of this section.

And sections 2827, 2828, and 2830 shall apply to all premises whereon vinegar is manufactured, to all manufacturers of vinegar and their workmen or other persons employed by them.

§ 195.0–9 *Vinegar factories operated prior to March 1, 1879.*

26 U. S. C. 2835 VINEGAR FACTORIES OPERATED PRIOR TO MARCH 1, 1879.

(a) *Regulations.* Any vinegar factory for the manufacture of vinegar, established and operated as a vinegar factory prior to March 1, 1879, may be operated for the manufacture of vinegar by the use of alcoholic vapor within such distance less than six hundred feet of any distillery or rectifying house under such regulations as the Commissioner may prescribe with the approval of the Secretary.

(b) *Transfer of duties.* For transfer of powers and duties of Commissioner and his agents, see section 3170.

§ 195.0–10 *Transfer and delegation of powers.*

26 U. S. C. 3170 TRANSFER AND DELEGATION OF POWERS.

The Secretary is authorized to confer and impose upon the Commissioner and any of his assistants, agents, or employees, and upon any other officer, employee, or agent of the Treasury Department, any of the rights, privileges, powers, duties, and protection conferred or imposed upon the Secretary, or any officer or employee of the Treasury Department, or by any law now or hereafter in force relating to the taxation, exportation, transportation, manufacture, possession, or use of, or traffic in, distilled spirits, wine, fermented liquors, or denatured alcohol.

§ 195.0–11 *Rules and regulations.*

26 U. S. C. 3176 RULES AND REGULATIONS.

(a) *Power of Commissioner.* The Commissioner, with the approval of the Secretary, shall prescribe and publish all needful rules and regulations for the enforcement of this chapter.

(b) *Transfer of duties.* For transfer of powers and duties of Commissioner and his agents, see section 3170.

§ 195.0–12 *Issue of instructions, regulations, and forms.*

26 U. S. C. 4041 ISSUE OF INSTRUCTIONS, REGULATIONS, AND FORMS.

(a) *In general.* The Secretary shall prescribe forms of entries, oaths, bonds, and other papers, and rules and regulations, not inconsistent with law, to be used under and in the execution and enforcement of the various provisions of the internal revenue laws; and he shall give such directions to collectors and prescribe such rules and forms to be observed by them as may be necessary for the proper execution of the law.

### Subpart A—Scope of Regulations

§ 195.1 *Production of vinegar by the vaporizing process.* These regulations, Regulations 19, "Production of Vinegar by the Vaporizing Process" (26 CFR Part 195), contain the procedural and substantive requirements relative to the production of vinegar by the vaporizing process. The regulations cover requirements governing the location, construction, equipment, qualifying documents, and changes in premises, equipment and proprietorship; action by Assistant Regional Commissioner and Commissioner; plant operations; and records and reports of operations at vinegar plants.

§ 195.2 *Instruments and papers.* The terms, conditions, and instructions contained in instruments and papers required to be furnished by law or regulations are hereby made a part as fully and to the same extent as if incorporated in this part.

(53 Stat. 495; 26 U. S. C. 4041)

### Subpart B—Definitions

§ 195.5 *Meaning of terms.* As used in this part, unless the context otherwise requires, terms shall have the meanings ascribed in this subpart.

§ 195.6 *Assistant Regional Commissioner.* "Assistant Regional Commissioner" shall mean the Assistant Regional Commissioner, Alcohol and Tobacco Tax.

§ 195.7 *Commissioner.* "Commissioner" shall mean the Commissioner of Internal Revenue.

§ 195.8 *Distilling materials.* "Distilling materials" shall mean the fermented mash of grain, molasses, or other materials produced for distillation.

§ 195.9 *District Director.* "District Director" shall mean the District Director of Internal Revenue.

§ 195.10 *Gallon.* "Gallon" or "wine gallon" shall mean a United States gallon of liquid measure equivalent to the volume of 231 cubic inches.

§ 195.11 *Including.* The term "including" shall not be deemed to exclude things other than those enumerated which are in the same general class.

§ 195.12 *Inclusive language.* Words in the plural form shall include the singular, and vice versa, and words in the masculine gender shall include females, a trust or estate, associations, copartnerships, and corporations.

§ 195.13 *I. R. C.* "I. R. C." shall mean the Internal Revenue Code.

§ 195.14 *Person, proprietor, vinegar maker.* "Person," "proprietor," or "vinegar maker," shall include natural persons, associations, copartnerships, and corporations.

§ 195.15 *Proof.* "Proof" shall mean the ethyl alcohol content of a liquid at 60 degrees Fahrenheit, stated as twice the percent of ethyl alcohol by volume.

§ 195.16 *Proof gallon.* "Proof gallon" shall mean the alcoholic equivalent of a United States gallon at 60 degrees Fahrenheit, containing 50 percent of ethyl alcohol by volume.

§ 195.17 *Secretary.* "Secretary" shall mean Secretary of the Treasury.

§ 195.18 *U. S. C.* "U. S. C." shall mean the United States Code.

§ 195.19 *Vinegar factory.* "Vinegar factory" shall mean a vinegar factory using the vaporizing process in the manufacture of vinegar, established or operated under this part, and as described in the notice, Form 27–F.

### Subpart C—Location and Use

§ 195.30 *Restrictions.* Vinegar factories producing vinegar by the vaporizing process may not be located on board of any vessel or boat, or in any building or on any premises where beer, lager beer, ale, porter, or other fermented liquors, or ether, are manufactured or produced, or sugars or sirups are refined, or where any liquors of any description are stored or retailed, or where any other business is carried on, or within 600 feet in a direct line of a registered distillery, fruit distillery, industrial alcohol plant, or rectifying plant. If the vinegar factory is in the same building in which is located a taxpaid bottling house, or in which denatured alcohol is produced, stored, or used, there must be no means of communication within the building between the vinegar factory and such premises.

§ 195.31 *Use of premises.* The premises of a vinegar factory using the vaporizing process shall be used exclusively for the manufacture of vinegar by the use of an alcoholic vapor separated from a fermented mash on such premises. The production at vinegar factories of low wines exceeding 30 degrees in proof will not be permitted.

### Subpart D—Construction

§ 195.35 *Buildings or rooms.* The vinegar factory must be so constructed and equipped as to be suitable for the production of vinegar by the use of the vaporizing process, and must be completely separated from contiguous buildings or rooms, which are not used in conjunction with the vinegar factory, by solid, unbroken, partitions or floors of substantial construction. Such partitions shall extend from the ground to the roof, or from the floor to the ceiling if a room is used: *Provided*, That necessary openings for the passage of approved water, steam, fuel, or similar lines may be permitted in the walls or partitions.

§ 195.36 *Means of ingress or egress.* Except as provided in § 195.35, the doors and other openings must lead into the yard connected with the vinegar factory or a public street: *Provided*, That where a room or floor is used, the door may open into an elevator shaft, or a common passageway partitioned off from other businesses, leading either directly or through another elevator shaft or similar passageway to the street or yard. Where the door of the vinegar factory opens into a common passageway, as provided above, the partitions forming the common passageway shall be substantially constructed of solid materials or expanded metal or woven wire of not less than 9 gauge nor more than 2-inch mesh, and shall extend from the floor to the ceiling or roof, but doors may be permitted therein. Common passageways must be used exclusively as means of communication.

§ 195.37 *Doors, windows, and other openings.* The doors, windows, or other openings in the room or building comprising the distilling department must be so arranged and constructed that they may be securely fastened. No door, window, or other opening will be permitted in the walls or floors leading into another room or building which is not a part of the vinegar factory.

§ 195.38 *Distilling department.* A room or rooms must be provided in which will be located the stills and low wine tanks. Such room or rooms shall be known as the distilling department and shall be used exclusively for the production and storage of low wines. A sign must be posted over the door to the distilling department bearing the words "Distilling Department," and if more than one room is used, such rooms shall be given alphabetical designations, as "A," "B," "C," etc.

### Subpart E—Sign

§ 195.45 *Posting of sign.* The proprietor shall place and keep conspicuously on the outside and at the front of the vinegar factory or over the front entrance thereto, where it can be plainly seen, a sign exhibiting, in plain and legible letters, not less than 3 inches in height and of a proper and proportionate width, the name of the proprietor and the words "Vinegar Factory No. ——," followed by the registry number assigned by the Commissioner.

### Subpart F—Equipment

§ 195.50 *Fermenting material storage tanks.* Each fermenting material storage tank shall have plainly and legibly painted thereon the words "Fermenting Material Storage Tank," followed by its serial number and capacity in gallons.

(53 Stat. 318; 26 U. S. C. 2829)

§ 195.51 *Mash tubs and fermenters.* Mash tubs and fermenters shall be located in the distilling department or in a separate room or building and must be so placed as to be accessible to examination by Government officers. Each such mash tub or fermenter must have painted thereon its designated use, as "Mash Tub" or "Fermenter," followed by its serial number and capacity in gallons.

(53 Stat. 318; 26 U. S. C. 2829)

§ 195.52 *Mash tub coils.* A closed coil cannot be maintained in a mash tub on the premises of a vinegar factory using the vaporizing process except under the following conditions: If a coil is employed for the conveyance of water for the purpose of cooling the mash, the upper portion of the coil must be open, with flanges projecting upward, so as to prevent overflow making the upper ring of the coil, in effect, an open trough; or the coil within the tub may be closed on condition that the pipe is left open for a distance of several feet immediately after it leaves the tub and is properly protected by flanges so as to form, in effect, an open trough several feet in length.

(53 Stat. 318; 26 U. S. C. 2829)

§ 195.53 *Stills.* The stills must have a clear space of not less than 1 foot around them. Every still must be numbered, commencing with number 1, and shall have painted thereon the word "Still," followed by its serial number and spirit-producing capacity in proof gallons in 24 hours, computed in accordance with the rules set forth in Subpart U of this part. Where the still is insulated or the manufacturer's serial number is otherwise obscured, such number will likewise be painted on the covering of the still. No reflux line, worm, gooseneck, pipe, conductor, or contrivance of any description whatever whereby vapor might in any manner be conveyed away and converted into distilled spirits, shall be used or employed or be fastened to or connected with any vaporizing apparatus used for the manufacture of vinegar.

(53 Stat. 318, 319; 26 U. S. C. 2829, 2834)

§ 195.54 *Pipes for conveying vapor.* The alcoholic vapor which the vinegar maker is authorized to separate from the mash shall be conducted to the liquid receiving it by the shortest and most direct line practicable. The pipes used for this purpose must be constructed of metal and exposed to view throughout their entire lengths and must not be surrounded with water.

(53 Stat. 318; 26 U. S. C. 2829)

§ 195.55 *Presence of worm forbidden.* The law specifically provides that no worm shall be permitted on or near premises used for the manufacture of vinegar by the vaporizing process.

(53 Stat. 319; 26 U. S. C. 2834)

§ 195.56 *Spray tanks or condensers.* The spray tanks or condensers must be so constructed that the alcoholic vapor cannot be condensed by itself and so become distilled spirits. Spray tanks are to be so constructed that the vapors will be conveyed into the water or other liquid used in making vinegar for condensation. The alcoholic vapor must be mingled with the water or other liquid used in the manufacture of vinegar. The spray tank or condenser shall be so constructed that the water or other liquid used in the manufacture of vinegar is sprayed through the top of the tank to condense the alcoholic vapors, or a constant level of water of such liquid must be maintained in the tank or condenser at all times so that the end of the vapor pipe will be completely immersed therein. The vapors must not be condensed before or without infusion into such water or other liquid.

(53 Stat. 318, 319; 26 U. S. C. 2829, 2834)

§ 195.57 *Closed condensers.* Closed or covered condensers may be used only where the alcoholic vapor is condensed simply by being introduced into the water or other liquid used in the production of vinegar without the use of artificial means for cooling the liquid. The condensers in such cases must be provided with a manhole which will permit ready examination of the whole interior of the condensing vessel.

(53 Stat. 318, 319; 26 U. S. C. 2829, 2834)

§ 195.58 *Artificial means of condensing vapors.* Where artificial means are employed for condensing alcoholic vapor at vinegar factories, the condensing ves-

sels shall be open and uncovered and the condensing apparatus shall be simple in construction.

(53 Stat. 318, 319; 26 U. S. C. 2829, 2834)

§ 195.59 *Contrivance for cooling liquid.* No contrivance may be used for cooling the liquid which receives the vapors to such a degree that a small or limited quantity of water or liquid would be enabled to receive and condense an unlimited quantity of alcohol.

(53 Stat. 318, 319; 26 U. S. C. 2829, 2834)

§ 195.60 *Low wine receiving tanks.* The proprietor must provide one or more low wine receiving tanks which shall be equipped with a suitable measuring device whereby the actual contents will be correctly indicated. The tanks must be so constructed as to permit examination of every part thereof, and so arranged as to leave an open space of not less than 3 feet between the top and the roof or floor above. All openings in tanks and other distilling apparatus and equipment, which are not absolutely necessary, and which can be permanently closed without interference with operations, shall be closed by brazing, welding, or otherwise securely fastening and sealing. Each such tank shall have painted thereon the words "Low Wine Receiving Tank," followed by its serial number and capacity in gallons. The pipe lines connecting the tanks with stills or other apparatus must be constructed in accordance with § 195.62. The receiving tanks must be located in the distilling department.

(53 Stat. 318; 26 U. S. C. 2829)

§ 195.61 *Low wine storage tanks.* If it is desired to store low wines prior to the use thereof in the manufacture of vinegar, storage tanks for such purpose must be provided in the distilling department. Each such tank shall be constructed and equipped as provided in § 195.60 for receiving tanks, and shall have painted thereon the words "Low Wine Storage Tank," followed by its serial number and capacity in gallons.

(53 Stat. 318; 26 U. S. C. 2829)

§ 195.62 *Pipe lines.* The distilling apparatus and equipment must be closed and continuous (except as otherwise provided in this part), and commencing with the still in which the vapors rise and continuing with securely closed pipes to the low wine receiving tanks in which the product is deposited. All such pipe lines must be of a fixed and permanent character, constructed of metal, and so arranged as to be exposed to view throughout their entire lengths. All valves, unions, flanges, and other detachable connections in the pipe lines of the distilling equipment from the point where the vapors rise in the still to the receiving tanks and from the receiving tanks to storage tanks (if provided) must be so secured by brazing, welding, fastening, and sealing as to effectually prevent disconnection and access to the low wines.

(53 Stat. 318; 26 U. S. C. 2829)

§ 195.63 *Colors for pipe lines.* The pipe lines connected with the stills and low wine tanks used for conveying the following substances shall be kept painted in the colors indicated:

| | |
|---|---|
| Black | Low wines. |
| Blue | Vapor. |
| Red | Mash, beer, or other distilling material. |
| Brown | Spent beer or slop. |
| White | Water. |
| Aluminum | Steam. |

These colors are intended for such pipe lines only, and are prescribed for the purpose of distinguishing such pipe lines from each other and from all other pipe lines on the premises which are painted but for which colors are not prescribed. The painting of one of the pipe lines indicated above in a color other than prescribed for it, or the painting in one of the prescribed colors, or a color similar thereto, of a pipe line for which a color is not prescribed is prohibited. Pipe lines for which colors are not prescribed may be painted in other colors or in sections of not more than 3 feet in contrasting colors.

(53 Stat. 318; 26 U. S. C. 2829)

§ 195.64 *Details of construction and equipment not specified.* Where details of construction and equipment are not covered by this part, such construction and equipment must afford adequate supervision and control. The Commissioner may approve details of construction and equipment in lieu of those specified in this part where it is shown that it is impracticable to conform to the prescribed specifications, and the proposed construction and equipment will afford adequate supervision and control. Where it is proposed to substitute construction and equipment for that for which specifications are prescribed, approval of the Commissioner should be first obtained.

(53 Stat. 318, 319; 26 U. S. C. 2829, 2834)

§ 195.65 *Vinegar factories heretofore established.* Vinegar factories heretofore established may continue to operate if the equipment and method used for condensing the alcoholic vapors from the stills conform to that prescribed in this part, and the other construction and equipment afford adequate security and protection to the revenue. The Commissioner or Assistant Regional Commissioner may at any time require the proprietor to make changes in construction and equipment conforming to the provisions of this part, if deemed necessary to safeguard the revenue or to permit more economical and efficient supervision and control by Government officers. All vinegar factories hereafter established, and changes in existing vinegar factories, must be in conformity with this part.

(53 Stat. 318, 319; 26 U. S. C. 2829, 2834)

### Subpart G—Qualifying Documents

§ 195.75 *Notice, Form 27–F.* Every person desiring to establish a vinegar factory must, before engaging in the business, file notice on Form 27–F, in triplicate, with the Assistant Regional Commissioner. Except as provided in section 195.80, in the case of amended and supplemental notices, all of the information indicated by the lines of the form and instructions printed thereon, or issued in respect thereto, and as required by this part, shall be furnished. Notices on Form 27–F must be signed in accordance with the instructions printed on the form and sworn to before an officer authorized to administer oaths. Such notices must be numbered serially, commencing with number 1 and continuing in regular sequence for all notices thereafter filed, whether amended or supplemental.

(53 Stat. 495; 26 U. S. C. 4041)

§ 195.76 *Description of premises.* The notice, Form 27–F, shall contain a complete description of the building constituting the vinegar factory, including the height, width, and length, the materials of which constructed, and the number of stories.

(53 Stat. 495; 26 U. S. C. 4041)

§ 195.77 *Description of distilling department.* All rooms comprising the distilling department of the vinegar factory shall be described on Form 27–F. The description shall include the designated name of each room which shall be according to its use, such as, still room, fermenting room, etc., and the dimensions thereof. If more than one room is used for the same purpose, the same shall include an alphabetical designation to distinguish them, as "Still Room A," "Still Room B," etc.

(53 Stat. 495; 26 U. S. C. 4041)

§ 195.78 *Description of apparatus and equipment.* There must be described on Form 27–F in the space provided therefor the number of fermenting material storage tanks (if any), mash tubs, fermenters, stills, spray tanks, condensers, low wine receiving tanks, and low wine storage tanks which shall be listed separately as to serial number and capacity in gallons. All other regular and permanent equipment must be described on Form 27–F.

(53 Stat. 495; 26 U. S. C. 4041)

§ 195.79 *Capacity.* The kind of fermenting materials to be used, the maximum quantity of low wines, in proof gallons, that can be produced in 24 hours, and the proof at which the low wines will be produced, must be stated on Form 27–F.

(53 Stat. 495; 26 U. S. C. 4041)

§ 195.80 *Amended and supplemental notices.* Amended and supplemental notices on Form 27–F may be executed in skeleton form, except as to the items amended or supplemented. All other items which are correctly set forth in prior notices, and in which there has been no change since the last preceding notice, may be incorporated in the amended or supplemental notice by reference to the respective notice previously filed. Such incorporation by reference shall be made by entering for each such item in the space provided therefor the statement, "No change since filing Form 27–F, Serial No. ---------" (the number being inserted), and the date of such form.

(53 Stat. 495; 26 U. S. C. 4041)

§ 195.81 *Corporate documents.* There must be submitted with, and made a part of, the original or initial notice on Form 27–F, given by a corporation to engage in the business of manufacturing vinegar by the vaporizing process, properly certified copies, in triplicate, of the following documents:

(a) Extracts of the minutes of meetings of the board of directors authorizing certain officers or other persons to sign for the corporation.

(b) List of the names and addresses of the officers and directors.

(53 Stat. 495; 26 U. S. C. 4041)

§ 195.82 *Power of attorney, Form 1534.* If the notice or other qualifying documents are signed by an attorney in fact for an individual, partnership, association, or corporation, or by one of the members for a copartnership or association, or, in the case of a corporation, by an officer or other person not authorized to sign by the corporate documents described in § 195.81, such notice or other qualifying documents must be supported by a duly authenticated copy of the power of attorney conferring authority upon the person signing the document to execute the same. Such powers of attorney will be executed on Form 1534, in triplicate, and submitted to the Assistant Regional Commissioner.

(53 Stat. 495; 26 U. S. C. 4041)

§ 195.83 *Execution of power of attorney.* Where the principal giving the power of attorney is an individual, it must be executed by him in person, and not by an agent. In the case of a copartnership or association, powers of attorney authorizing one or more of the members, or another person, to execute documents on behalf of the copartnership or association must be executed by all of the members constituting the copartnership or association. However, if one or more members less than the whole number constituting the copartnership or association have been delegated the authority to appoint agents or attorneys in fact, the power of attorney may be executed by such member or members, provided it is supported by a duly authenticated copy, in triplicate, of the document conferring authority upon the member or members to execute the same. Where, in the case of a corporation, powers of attorney are executed by an officer thereof, such documents must be supported by triplicate copies of the authorization of such officer so to do, certified by the secretary or assistant secretary of the corporation, under the corporate seal, if any, to be true copies.

(53 Stat. 495; 26 U. S. C. 4041)

§ 195.84 *Duration of power of attorney.* Powers of attorney authorizing the execution of documents on behalf of a person engaged in, or intending to engage in, the business of a vinegar maker shall continue in effect until written notice, in triplicate, of the revocation of such authority is received by the Assistant Regional Commissioner, unless terminated by operation of law.

(53 Stat. 495; 26 U. S. C. 4041)

§ 195.85 *Registry of stills, Form 26.* Every person having in his possession or custody, or under his control, any still or distilling apparatus set up must register the same with the Assistant Regional Commissioner for the region in which the still is located, on Form 26, immediately it is set up. The Form 26 shall be executed in triplicate in accordance with the headings of the various columns and lines, and the instructions printed thereon or issued in respect thereto and as required by this part.

(53 Stat. 308 as amended; 26 U. S. C. 2810)

§ 195.86 *Plat and plans.* Every person intending to engage in the business of manufacturing vinegar by the use of the vaporizing process must submit to the Assistant Regional Commissioner with his notice, Form 27–F, an accurate plat of the vinegar factory premises and accurate plans of the distilling apparatus and equipment, in triplicate, conforming to the requirements of Subpart H of this part.

(53 Stat. 495; 26 U. S. C. 4041)

§ 195.87 *Additional information.* The Commissioner or the Assistant Regional Commissioner may at any time, in his discretion, require the proprietor to furnish such additional information as he may deem necessary.

(53 Stat. 495; 26 U. S. C. 4041)

### Subpart H—Plats and Plans

§ 195.95 *Plat and plans required.* Every person intending to engage in the business of manufacturing vinegar by the use of the vaporizing process must, as provided in § 195.86, file an accurate plat of the vinegar factory premises, and accurate plans of the distilling apparatus and equipment, in triplicate, with the Assistant Regional Commissioner.

(53 Stat. 495; 26 U. S. C. 4041)

§ 195.96 *Preparation.* Each sheet of the plat and plan shall bear a distinctive title, and the complete name and address of the proprietor, enabling ready identification. Each sheet of the original plat and plans shall be numbered, the first being designated number 1 and the other sheets numbered in consecutive order. The dimensions of plats and plans shall be 15 by 20 inches, outside measurement, with a clear margin of at least 1 inch on each side of the drawing, lettering, and writing. Plats and plans may be original drawings, or reproductions made by the "Ditto Process" or by blue or brown line lithoprint, if such reproductions are clear and distinct.

(53 Stat. 495; 26 U. S. C. 4041)

§ 195.97 *Depiction of premises.* Plats must show the outer boundaries of the vinegar factory premises, in feet and inches, in a color contrasting with those used for other drawings on the plat, and must contain an accurate depiction of the building or buildings comprising the premises. The depiction of the premises should agree with the description in the notice, Form 27–F. If two or more buildings are to be used, they must be shown in their relative positions and the designated name or use of each indicated. Where two or more buildings are used for the same purpose, the name of each such building shall include an alphabetical designation, beginning with "A". All first floor openings of each building on the premises will be shown on the plat. If the vinegar factory consists of a room or a floor of a building, an outline of the building, the precise location and dimensions of the room or floor, and the means of ingress from and egress to a public street or yard shall be shown.

(53 Stat. 495; 26 U. S. C. 4041)

§ 195.98 *Contiguous premises.* The plat must show the relative location of any distillery, internal revenue bonded warehouse, industrial alcohol plant, industrial alcohol bonded warehouse or denaturing plant, rectifying plant, or taxpaid bottling house, or other premises on which beer, lager beer, ale, porter, or other fermented liquors, or ether or denatured alcohol are manufactured or produced, stored, used, or sold, contiguous to the vinegar factory premises, and all pipe lines and other connections, if any, between them, and the distance they are from each other. The outlines of such contiguous premises and the vinegar factory premises must be shown in contrasting colors.

(53 Stat. 495; 26 U. S. C. 4041)

§ 195.99 *Floor plan of distilling department.* A floor plan of the distilling department shall be submitted, showing the location of all apparatus and equipment and pipe lines therein. The serial number and capacity of each still and tank shall be indicated on the plan.

(53 Stat. 495; 26 U. S. C. 4041)

§ 195.100 *Elevational plans of distilling equipment.* Vertical, sectional, or elevational plans of the distilling apparatus and equipment shall be submitted, and such plans shall clearly depict the construction of all equipment and all pipe lines and other connections of the distilling equipment and the location of valves, flanges (except as provided in § 195.102), measuring devices, etc. The plans must be so drawn that all such pipe lines may be traced from beginning to end.

(53 Stat. 495; 26 U. S. C. 4041)

§ 195.101 *Pipe lines and colors.* The fixed pipe lines connected with the stills and low wine tanks must be shown on the plans in the colors in which they are required to be painted, as follows:

| | |
|---|---|
| Black | Low wines. |
| Blue | Vapor. |
| Brown | Spent beer and slop. |
| Red | Distilling material. |
| White | Water. |
| Aluminum | Steam. |

(53 Stat. 495; 26 U. S. C. 4041)

§ 195.102 *Location of valves, flanges, etc.* All valves, flanges, and other connections and pipe lines in the distilling equipment must be properly indicated on the plans: *Provided*, That where flanges, unions, or other connections in pipe lines are brazed, welded, or otherwise permanently secured in such a manner as to constitute a continuous single pipe line, the location of such flanges, unions, or other connections, and the manner of se-

curing the same, need not be shown on the plans.

(53 Stat. 495; 26 U. S. C. 4041)

§ 195.103 *Direction of flow.* The direction of the flow of the distilling material, vapor, low wines, etc., through pipe lines connected with the stills and low wine tanks must be indicated on the plans by arrows.

(53 Stat. 495; 26 U. S. C. 4041)

§ 195.104 *Certificate of accuracy.* Every sheet of every plat and plan, whether original, supplemental, or superseding, shall bear a certificate of accuracy dated and signed by the draftsman, proprietor, and Assistant Regional Commissioner. The certificate shall be placed in the lower right hand corner of each sheet and shall be in the following form:

------ region, ----------, 19----.

It is hereby certified that this is an accurate ---------- sheet No.
(Original, supplemental, or superseding)
------ of the ---------- of Vinegar
(Plat or plan)
Factory No. ------, of ----------
(Name of proprietor)
----------
(Street and number) (City and State)
in this region.

----------
(Draftsman)

----------
(Proprietor)

----------
(Assistant Regional Commissioner)

Date of Assistant Regional Commissioner's approval.

----------, 19----.
(Date)

(53 Stat. 495; 26 U. S. C. 4041)

§ 195.105 *Supplemental, superseding, and additional plats and plans.* The sheets of superseding plats or plans shall bear the same numbers as the sheets superseded. The sheets of supplemental plats or plans shall bear the same numbers as the sheets supplemented, and will be further identified by letter designations, as "1–A," "5–B," etc. Additional sheets of plans, filed to cover extensions of the vinegar factory premises, will be given the next number in sequence to the last sheet of the plan on file. Additional sheets of plats, filed to cover extensions of the vinegar factory premises, will be given the same number as the last sheet of the plat on file, further identified by an additional number, as 1–1, 2–1, etc.

(53 Stat. 495; 26 U. S. C. 4041)

**Subpart I—Requirements Governing Changes in Name, Proprietorship, Control, Location, Premises and Equipment**

§ 195.110 *General requirement.* Notice in writing must be given, in the form prescribed in this subpart, to the Assistant Regional Commissioner in case of any change in the location, form, capacity, ownership, agency, superintendency, or in the persons interested in the business of the vinegar factory.

(53 Stat. 495; 26 U. S. C. 4041)

CHANGE IN INDIVIDUAL, FIRM, OR CORPORATE NAME

§ 195.111 *Amended notice, Form 27–F.* Where there is a change in the individual, firm, or corporate name, the proprietor must submit to the Assistant Regional Commissioner an amended notice on Form 27–F, in triplicate, covering the new name, which notice must be approved before operations may be commenced under the new name.

(53 Stat. 495; 26 U. S. C. 4041)

§ 195.112 *Sign.* Where there is a change in the individual, firm, or corporate name, the proprietor must change the vinegar factory sign to conform to the provisions of § 195.45.

(53 Stat. 495; 26 U. S. C. 4041)

§ 195.113 *Records.* Where there is a change in the individual, firm, or corporate name, the proprietor must keep records and submit reports covering operations under the new name as provided in Subpart M of this part.

(53 Stat. 495; 26 U. S. C. 4041)

CHANGE IN PROPRIETORSHIP, SUSPENSION

§ 195.114 *General.* Where there is to be a change in the proprietorship of the vinegar factory, the outgoing proprietor must, preparatory to transfer of the business to the successor, comply with the requirements of §§ 195.115–195.118.

(53 Stat. 495; 26 U. S. C. 4041)

§ 195.115 *Notice, Form 27–F.* If the outgoing proprietor is to discontinue permanently the business of manufacturing vinegar by the vaporizing process, he must file with the Assistant Regional Commissioner Form 27–F, in triplicate, stating thereon the purpose to be "Discontinuance of business," and giving the date of the discontinuance.

(53 Stat. 495; 26 U. S. C. 4041)

§ 195.116 *Registry of stills.* Where there is to be a change in proprietorship, the outgoing proprietor must register the stills "Not for use" on Form 26, in triplicate, in accordance with § 195.210.

(53 Stat. 495; 26 U. S. C. 4041)

§ 195.117 *Notice of suspension.* Where there is to be a change in proprietorship, the outgoing proprietor must file with the Assistant Regional Commissioner a written notice, in triplicate, in accordance with Subpart N of this part.

(53 Stat. 495; 26 U. S. C. 4041)

§ 195.118 *Records.* Where there is to be a change in proprietorship, the outgoing proprietor must make appropriate entries in the vinegar factory records and submit reports in accordance with the provisions of Subpart P of this part.

(53 Stat. 495; 26 U. S. C. 4041)

CHANGE IN PROPRIETORSHIP, QUALIFICATION OF SUCCESSOR

§ 195.119 *General.* Where there is a change in proprietorship, and the successor intends to continue the operation of the premises as a vinegar factory, he must comply with the requirements of §§ 195.120–195.124.

(53 Stat. 495; 26 U. S. C. 4041)

§ 195.120 *Nonfiduciary successor.* If the change in proprietorship is brought about by any means, except by the appointment of an administrator, executor, receiver, trustee, assignee, or other fiduciary, the successor must qualify in the same manner as the proprietor of a new vinegar factory, except that he may adopt the plat and plans of his predecessor as provided in § 195.122.

(53 Stat. 495; 26 U. S. C. 4041)

§ 195.121 *Fiduciary.* If the successor is an administrator, executor, receiver, trustee, assignee, or other fiduciary, and intends to produce low wines, or to possess or dispose of low wines on hand in the vinegar factory, he must comply with the provisions of Subpart G of this part to the extent that such provisions are applicable, except that in lieu of filing a new plat and plans, the fiduciary may adopt the plat and plans of such predecessor in accordance with § 195.122. The fiduciary must also furnish certified copies, in triplicate, of the order of the court or other pertinent documents showing his qualification as such fiduciary. The effective date of the qualifying documents filed by a fiduciary must be the same as the date of the court order, or the date specified therein, for him to assume control.

(53 Stat. 495; 26 U. S. C. 4041)

§ 195.122 *Adoption of plat and plans.* The plat and plans of the vinegar factory may be adopted by a successor where they correctly describe and depict the premises and the buildings, apparatus, and equipment thereon, to be taken over by the successor. The adoption by a successor of the plat and plans of his predecessor shall be in the form of a certificate, in triplicate, in which shall be set forth the name of the predecessor, the address and number of the vinegar factory, a description of the vinegar factory premises, the number of each sheet comprising each plat and plan covered by such certificate, and a statement that the vinegar factory premises, and the buildings, apparatus, and equipment thereon, are correctly described and depicted on such plat and plans.

(53 Stat. 495; 26 U. S. C. 4041)

§ 195.123 *Sign.* The successor, if other than a fiduciary temporarily operating the vinegar factory, must change the vinegar factory sign to conform to the requirements of § 195.45.

(53 Stat. 495; 26 U. S. C. 4041)

§ 195.124 *Materials and low wines.* If distilling materials and low wines are received by transfer from the predecessor, the successor must comply with the requirements of Subpart P of this part.

(53 Stat. 495; 26 U. S. C. 4041)

OTHER CHANGES IN PROPRIETORSHIP OR CONTROL

§ 195.125 *Changes in partnership.* The withdrawal of one or more members of a partnership or the taking in of a new partner, whether active or silent, shall constitute a change in proprietorship. Likewise, the death, bankruptcy or adjudicated insolvency of one or more of the copartners results in a dissolution of the partnership and, consequently, a change in proprietorship. Where such a change in proprietorship of the vinegar factory occurs, the successor must qualify in the same manner as a new proprietor of a vinegar factory, except that the successor may adopt the plat and plans of the predecessor as provided in § 195.122.

(53 Stat. 495; 26 U. S. C. 4041)

§ 195.126 *Changes in stockholders, officers, and directors of corporation.* The sale or transfer of the capital stock of a corporation operating a vinegar factory does not constitute a change in the proprietorship of the vinegar factory. However, where the sale or transfer of capital stock results in a change in the control or management of the business, or where there is a change in the officers or directors, the proprietor must give notice thereof, in triplicate, to the Assistant Regional Commissioner. Mere changes in stockholders of corporations not constituting a change in control need not be so reported.

(53 Stat. 495; 26 U. S. C. 4041)

§ 195.127 *Reincorporation.* Where a corporation operating a vinegar factory is reorganized and a new charter or certificate of incorporation is secured, the new corporation must qualify in the same manner as a new proprietor of the vinegar factory, except that the new corporation may adopt the plat and plans of the predecessor as provided in § 195.122.

CHANGES IN LOCATION, PREMISES, AND EQUIPMENT

§ 195.128 *Change in location.* Where there is a change in the location of the vinegar factory, the proprietor must comply with all applicable provisions of Subparts C–H of this part.

§ 195.129 *Changes in premises.* Where the vinegar factory premises are to be extended or curtailed, the proprietor must file with the Assistant Regional Commissioner an amended notice, Form 27–F, and an amended plat of the premises as extended or curtailed. If the plans are affected by the extension or curtailment, they must also be amended.

(53 Stat. 495; 26 U. S. C. 4041)

§ 195.130 *Changes in equipment.* Where changes are to be made in the apparatus and equipment of the distilling department, the proprietor shall first secure approval thereof by the Assistant Regional Commissioner pursuant to application, in triplicate, setting forth specifically the proposed changes: *Provided*, That emergency repairs may be made without prior approval of the Assistant Regional Commissioner. Where such emergency repairs are made, the proprietor shall file immediately a report thereof, in triplicate, with the Assistant Regional Commissioner. Upon completion of changes in equipment, the proprietor must file an amended notice and amended plans, except that in the case of minor changes, such as general repairs, changes in pipe lines, or the addition or removal of a tank, an amended notice and amended plans need not be filed immediately: *Provided further*, That the Commissioner or the Assistant Regional Commissioner may, at any time, in his discretion, require the filing of an amended notice and amended plans covering such minor changes. Where an amended notice and amended plans are not filed immediately upon completion of minor changes in equipment, the proprietor must include such changes in the next amended notice and plans filed by him.

(53 Stat. 495; 26 U. S. C. 4041)

**Subpart J—Action by Assistant Regional Commissioner**

ORIGINAL ESTABLISHMENT

§ 195.140 *Examination of qualifying documents.* Upon receipt of notice, plat, plans, and other documents required by this part of persons now engaged, or intending to engage, in the business of manufacturing vinegar by the vaporizing process, the Assistant Regional Commissioner will examine the same to determine whether they have been properly executed, and whether they reflect compliance with the requirements of the law and this part. Where any required document has not been filed, or where errors or discrepancies are found in those filed, or where the documents filed do not reflect compliance with this part, action thereon will be held in abeyance until the omission, or error, or discrepancy, has been rectified, and there has been full compliance with all requirements.

§ 195.141 *Inspection of premises.* When the required documents have been filed in proper form, the Assistant Regional Commissioner will assign an inspector to examine the premises, building, apparatus, and equipment, and determine whether they conform with the description thereof in the notice, plat and plans, and whether the apparatus and equipment and measures of protection afforded meet the requirements of the law and this part. The inspector will observe particularly the manner in which the rooms or buildings on the premises are separated from other premises, means of communication, ingress and egress, and the construction of the distilling apparatus and equipment. Where the inspection discloses minor irregularities in the qualifying documents or in the construction, the inspector will, at the time of their discovery, direct the attention of the proprietor to the same in order that the proprietor may correct the defects before completion of the inspection. Upon completion of the inspection, a report thereof will be submitted to the Assistant Regional Commissioner.

§ 195.142 *Report of inspection.* The report of the inspection shall describe separately all irregularities and discrepancies found during the course of the inspection, and shall include a complete statement describing all unusual or special conditions. Where irregularities are corrected during the inspection, the report will indicate the corrections so made. The report need not describe in detail each description as set forth in the notice, plat, and plans. The description of buildings and equipment in the report should be general and brief. However, construction, equipment, signs, etc., which are not in conformity with this part, will be completely described. If there are any pipe lines or other connections or openings between the vinegar factory premises and other premises, the same shall be described in detail. There shall be further embodied in the report a statement as to whether or not another business is being conducted, or is intended to be conducted, on the vinegar factory premises or in buildings thereon.

§ 195.143 *Inaccurate documents.* Where the Assistant Regional Commissioner's examination, or the inspector's report, discloses discrepancies in the qualifying documents, the inaccurate or incomplete documents will be returned to the proprietor for correction.

§ 195.144 *Defective construction.* Where it is found that the construction of the distilling apparatus and equipment does not conform to the requirements of the law and this part, the Assistant Regional Commissioner will inform the proprietor concerning the defects, and further action will be held in abeyance pending correction thereof.

§ 195.145 *Approval of qualifying documents.* If the Assistant Regional Commissioner finds, upon examination of the inspection report and the qualifying documents, that the person seeking to qualify as proprietor of the vinegar factory has complied in all respects with the requirements of the law and this part, he will note his recommendation for approval on all copies of the notice, and his approval on all copies of the plat and plans, and will forward all copies of the notice, and the original copy of the plat, plans, and other documents, together with a copy of all inspection reports, to the Commissioner for final action.

§ 195.146 *Disapproval of qualifying documents.* If the Assistant Regional Commissioner finds that the applicant has not complied in all respects with the requirements of the law and this part, or that the situation of the vinegar factory is such as would enable the proprietor to defraud the United States, he will not recommend approval of the notice, or approve the plat and plans, and will forward to the Commissioner for final action such copies of the qualifying documents as are required to be so forwarded by the preceding section in the case of recommendation of approval, together with a copy of all inspection reports. Where a notice is not recommended for approval, the Assistant Regional Commissioner will furnish the Commissioner with a full statement of the reasons therefor.

§ 195.147 *Disposition of qualifying documents.* Where the notice, Form 27–F, is approved by the Commissioner, the Assistant Regional Commissioner will, upon receipt of approved copies thereof from the Commissioner, as provided in Subpart K of this part, forward one copy of the notice, plat, plans, and other qualifying documents to the proprietor and will retain one copy of such qualifying documents for the file of the proprietor. If the notice is disapproved, the Assistant Regional Commissioner will, upon receipt from the Commissioner of the disapproved copies thereof and

other qualifying documents submitted therewith, return all copies of the qualifying documents to the proprietor, with advice as to the reasons for disapproval.

CHANGES SUBSEQUENT TO ESTABLISHMENT

§ 195.148 *Procedure applicable.* The provisions of §§ 195.140–195.147 respecting the action required of Assistant Regional Commissioners in connection with the establishment of vinegar factories will be followed, to the extent applicable, where there is a change in the individual, firm, or corporate name of the proprietor, or where there is a change in the proprietorship, location, premises, distilling apparatus and equipment, of the vinegar factory, or where operations are permanently discontinued.

§ 195.149 *Applications and reports covering changes.* Where an application covering changes in the distilling apparatus or equipment is approved by the Assistant Regional Commissioner, he will retain one copy of the application and forward one copy to the proprietor and one copy to the Commissioner. Similar disposition will be made of reports received from the proprietor covering emergency repairs of the apparatus and equipment in the distilling department.

**Subpart K—Action by Commissioner**

ORIGINAL ESTABLISHMENT

§ 195.155 *Examination of qualifying documents.* The Commissioner will review the notice, plat, plans, and other qualifying documents upon their receipt from the Assistant Regional Commissioner. If the Commissioner approves the vinegar factory construction and equipment, and the notice, plat, plans, and other qualifying documents, he will assign a registry number to the vinegar factory, in accordance with § 195.156, note his approval on all copies of the notice, retain the original copy of the notice, and plat, plans, and other qualifying documents, and will return two copies of the approved notice to the Assistant Regional Commissioner with advice as to his action on the qualifying documents. If the Commissioner disapproves the notice, he will note his disapproval thereon and will return all copies thereof to the Assistant Regional Commissioner, accompanied by the other qualifying documents submitted therewith, and a statement of the reasons for disapproval of the notice.

§ 195.156 *Registry numbers.* Vinegar factories will be numbered serially in the order of their establishment. A separate series will be used for each State. Registry numbers heretofore assigned will be retained and new vinegar factories will be assigned numbers in sequence thereto. Registry numbers previously assigned to discontinued vinegar factories will not be reassigned to other vinegar factories. In the case of a successor taking over the vinegar factory, the same registry number will be retained. In the case of a change in location of the vinegar factory within the same State, the same registry number may be retained.

CHANGES SUBSEQUENT TO ORIGINAL ESTABLISHMENT

§ 195.157 *Procedure applicable.* The provisions of §§ 195.155–195.156 respecting the action of the Commissioner in connection with the establishment of vinegar factories will be followed, to the extent applicable, where there is a change in the individual, firm, or corporate name, or where there is a change in the proprietorship, location, premises, or distilling apparatus and equipment, of the vinegar factory.

**Subpart L—Plant Operation**

GENERAL

§ 195.165 *Compliance with requirements of law and this part.* Under no circumstances will a person conduct any operations in connection with the production of low wines to be used in the manufacture of vinegar until compliance with all the requirements of law and this part, and the required notice, Form 27–F, and supporting documents have been approved in accordance with the provisions of this part.

§ 195.166 *Inspection of premises and records.* All persons manufacturing vinegar by use of the vaporizing process shall permit any internal revenue officer to inspect at any reasonable hour the premises, equipment, stocks and records, as required by law and this part.

COMMENCEMENT OF OPERATIONS

§ 195.167 *Fermenting and distilling materials.* Low wines may be produced at a vinegar factory using the vaporizing process under the provisions of this part from any kind of raw materials suitable for the production of low wines. Fermenting and distilling materials must be weighed or, in the case of liquids, weighed or measured, when brought upon the premises, and when used. The receipt and use of the materials will be recorded by the proprietor on Form 1623.

(53 Stat. 495; 26 U. S. C. 4041)

§ 195.168 *Removal of fermenting material from premises.* If fermenting material is stored on the premises, and it is desired to remove the same, or any portion thereof, from the premises for any purpose whatsoever, the proprietor will enter on Form 1623 the kind and quantity to be removed, and the reasons therefor.

(53 Stat. 495; 26 U. S. C. 4041)

MASHING AND FERMENTING

§ 195.169 *Production of mash.* Proprietors at vinegar factories may, under the provisions of law, produce on such premises fermented mash or fermented liquors to be used for the manufacture of vinegar exclusively. The proprietor may mash molasses, grain, or other fermentable material, in any quantity, proportion, or strength that he may desire.

(53 Stat. 495; 26 U. S. C. 4041)

§ 195.170 *Quantity of mash and beer determined.* The proprietor will determine the number of gallons of mash in each fermenter at the time of filling, and the quantity of beer in each fermenter after fermentation is complete, and will enter the same on Form 1623.

(53 Stat. 495; 26 U. S. C. 4041)

DISTILLATION

§ 195.171 *Production of low wines.* All processes of distillation shall be conducted in the distilling department of the vinegar factory. The alcoholic vapor separated from the mash produced must be condensed by introducing the vapor into the water or other liquid used in making vinegar. The vapor must not be condensed before or without infusion into such water or other liquid. Under no circumstances will the low wines be used as a condensing medium.

(53 Stat. 319; 26 U. S. C. 2834)

§ 195.172 *Conversion of vapor into distilled spirits forbidden.* No worm, gooseneck, pipe, reflux line, conductor, or contrivance of any description whatever, whereby vapor might in any manner be conveyed away and converted into distilled spirits, shall be used or employed, or be fastened to, or connected with, any vaporizing apparatus used for the manufacture of vinegar. The alcoholic vapor shall not be conducted in any manner, or by any contrivance, into a receptacle where it could be condensed by itself or with a small or limited quantity of water and so become distilled spirits.

(53 Stat. 319; 26 U. S. C. 2834)

§ 195.173 *Test of condensing material.* The water or other liquid used as the recipient of the alcoholic vapor should be frequently tested to see that the proof of the liquid is not raised above 30 degrees.

§ 195.174 *Deposit of low wines in receiving tanks.* All low wines produced shall be promptly conveyed to the receiving tanks. The receiving tanks must be so arranged that each day's production may be ascertained, and the amount shall be recorded daily on Form 1623, as indicated by the headings of the columns and the instructions printed on the form. Where the production of more than one day is run into the same tank the operation must be so conducted that the production of a full day or more may be measured. The quantity noted as the production of a particular date must be the quantity actually produced on that date.

(53 Stat. 495; 26 U. S. C. 4041)

§ 195.175 *Gauge prior to removal.* The low wines may be transferred by pipe line from the receiving tanks to low wine storage tanks, or direct to the vinegar factory proper for use in the manufacture of vinegar: *Provided*, That the quantity thus removed or used is first accurately ascertained, and recorded on Form 1623.

(53 Stat. 495; 26 U. S. C. 4041)

LOSSES

§ 195.176 *In receiving or storage tanks.* The quantity of low wines lost in receiving or storage tanks must be determined and reported monthly. The extent of the losses for each month shall be established by comparison of the

quantity shown by inventory with the amount carried in the receiving or storage tank accounts as remaining therein at the end of the month. The actual quantity in the tanks must be ascertained.

§ 195.177 *Allowance for loss.* Where the loss of low wines during any calendar month does not exceed 1 percent of the aggregate quantity of low wines on hand the 1st of the month and produced during the month, application for the allowance of such loss will not be required to be filed by the proprietor, provided there are no circumstances indicating that the low wines lost, or any part thereof, were unlawfully used or were unlawfully removed. Where such loss exceeds 1 percent, application under oath for remission of tax on the total losses during the month shall be filed by the proprietor with the Assistant Regional Commissioner. Such allowance of 1 percent shall apply to the losses for each month, which must be determined separately.

§ 195.178 *Losses not cumulative.* The allowance of 1 percent during any one month on account of losses of low wines in receiving and storage tanks shall not be cumulative.

§ 195.179 *Time for filing application.* Application for allowance on account of losses must be made within 10 days after the end of the month during which the losses occurred for which allowance is requested. Each application for allowance of losses must set out all the material facts relating to the loss, and must state particularly the nature and cause thereof; i. e., whether by leakage, evaporation, theft, casualty, or other unavoidable cause, as well as the extent of the loss. The application must be accompanied by affidavits of persons having personal knowledge of the facts.

§ 195.180 *Tax must be paid on illegally diverted low wines.* The internal revenue tax must be paid on all low wines diverted to illegal uses on the premises of the vinegar factory and on all low wines removed therefrom contrary to law or this part.

REMOVAL AND TESTING OF VINEGAR

§ 195.181 *Removal.* No person shall remove, or cause to be removed, from any vinegar factory any vinegar or other fluid or material containing a greater proportion than 2 percent of proof spirits.

(53 Stat. 319; 26 U. S. C. 2834)

§ 195.182 *Test of vinegar.* The vinegar removed from vinegar factories should be tested from time to time to ascertain if it contains any greater proportion of proof spirits than is permitted by law.

**Subpart M—Proprietor's Records and Reports**

§ 195.190 *General.* The proprietor of every vinegar factory shall keep monthly records and render reports on Form 1623 as provided in § 195.193. Entries shall be made as indicated by the headings of the various columns and lines of the form, and in accordance with the instructions printed thereon or issued in respect thereto, and as required by this part. The entries shall be made before the close of the business day next succeeding the day on which the transactions occur. Where the making of the entries is deferred to the next business day, as authorized in this section, appropriate memoranda shall be maintained for the purpose of making the entries correctly. At the close of the month, but in no case later than the fifth day of the succeeding month, the proprietor shall prepare and forward two copies of Form 1623 to the Assistant Regional Commissioner.

(53 Stat. 495; 26 U. S. C. 4041)

DERIVATION: T. D. 5722.

§ 195.191 *Execution.* The monthly report, Form 1623, must be subscribed and sworn to before an officer authorized to administer oaths by the proprietor or his authorized agent at the vinegar factory. Where the reports are signed by an agent, proper power of attorney authorizing the agent to execute the reports for the proprietor must be filed, in triplicate, with the Assistant Regional Commissioner.

(53 Stat. 495; 26 U. S. C. 4041)

§ 195.192 *Permanent record.* One copy of Form 1623 will be retained by the proprietor as a permanent record, in bound form, and such bound record shall be kept on the premises available for inspection by Government officers at all reasonable hours.

(53 Stat. 495; 26 U. S. C. 4041)

§ 195.193 *Monthly report, Form 1623.* The kind and quantity of materials received, and fermented or mashed, each day will be entered separately on the Form 1623, and the saccharine content of molasses mashed must be entered when the same is available. The quantity of low wines produced, and the quantity used in the manufacture of vinegar daily, will be entered on the Form 1623. The quantity of vinegar produced, and the quantity removed from the vinegar factory, must also be reported daily. The summaries of the form will be completed at the end of the month, and the losses and other information as required by the headings and lines of the summaries will be correctly indicated on the form.

(53 Stat. 495; 26 U. S. C. 4041)

**Subpart N—Suspension and Resumption of Operations**

§ 195.200 *Suspension.* Any proprietor of a vinegar factory desiring to suspend operations in connection with the production and use of low wines for an indefinite period, or for a definite period exceeding 15 days, shall give notice to such effect, in triplicate, to the Assistant Regional Commissioner, stating when he will suspend operations. The giving of such notice will not be required where operations are temporarily suspended. The proprietor will fix in the notice the time when all fermented distilling material will be distilled and all low wines will be used.

(53 Stat. 495; 26 U. S. C. 4041)

§ 195.201 *Registry of stills, Form 26.* When operations are suspended, the stills used for the production of low wines must be registered on Form 26, in triplicate, "Not for use" in accordance with the provisions of § 195.210.

(53 Stat. 308, as amended, 495; 26 U. S. C. 2810, 4041)

§ 195.202 *Resumption.* No proprietor of a vinegar factory may carry on the business of distilling low wines after the time stated in his notice of suspension until he shall have given another notice, in triplicate, to the Assistant Regional Commissioner, stating the time when he will resume work. The stills must be registered "For use" in conformity with § 195.210.

**Subpart O—Registry of Stills "for Use" and "Not for Use"**

§ 195.210 *Registry on Form 26.* Every person having in his possession or custody or under his control any still set up, must register the same with the Assistant Regional Commissioner for the region in which it is located. The registry must be made on Form 26, in triplicate, immediately the still is set up. When the proprietor intends to use the still, he must register it "For use" and when he intends to discontinue the use of the still he must register it "Not for use." This registry will be made on Form 26, in triplicate, with the Assistant Regional Commissioner, as in the case of original registry. The Assistant Regional Commissioner will, upon approval of the form, retain one copy, forward the original copy to the Commissioner, and return the remaining copy to the proprietor. The proprietor will retain his copy on the premises available for inspection by Government officers.

(53 Stat. 308, as amended; 26 U. S. C. 2810)

§ 195.211 *Alternate use of stills.* Where the proprietor has two or more stills, and intends to discontinue the use of one or more of them, and to continue the use of one or more stills, he must immediately register as "Not for use" the still or stills he does not intend to use. It will not be necessary to register the still or stills "Not for use" because of temporary suspension.

(53 Stat. 308, as amended; 26 U. S. C. 2810)

**Subpart P—Change of Persons Interested in Business**

§ 195.220 *Completion of operations required.* When a succession, or actual change, in the person or persons operating the vinegar factory shall take place, other than a change brought about by operation of law, as by the appointment of an administrator, executor, receiver, trustee, assignee, or other fiduciary, the business of producing and using low wines must be completely finished by the person or persons who have been carrying on the business, and the operations suspended before the business shall be undertaken or begun by the successor, unless by agreement of the predecessor and the successor it shall be arranged to transfer from the former to the latter at midnight on a certain day all low wines and all materials to be used in the manufacture of low wines in the vinegar factory at that hour; and provided that in either case the notice and other qualifying documents of the successor prescribed by this part have been approved,

to take effect on the day next succeeding that at the close of which the transfer is made. Such documents should, therefore, be submitted to the Assistant Regional Commissioner in sufficient time to permit such approval for the date desired. The successor shall not commence operations until all documents required for his qualification have been approved by the Commissioner.

§ 195.221 *Requirements as to predecessor.* In accordance with the provisions of Subpart Q of this part the predecessor must file Form 27–F, notice of suspension, and Form 26, registering the stills "Not for use" in his name, and there shall be stated the name of the successor in proprietorship in accordance with the instructions printed on the forms.

[53 Stat. 308, as amended; 26 U. S. C. 2810)

§ 195.222 *Reports and records.* The predecessor shall enter on his record, Form 1623, all fermenting or distilling materials, materials in process and low wines, transferred to his successor, who shall in turn enter such items on his record, Form 1623, as received from his predecessor. The predecessor will make appropriate notation on all forms and records required to be kept by him showing the change in proprietorship of the vinegar factory and the date thereof.

(53 Stat. 495; 26 U. S. C. 4041)

§ 195.223 *Succession by fiduciary.* Where a change in proprietorship is brought about by operation of law, the administrator, executor, receiver, trustee, assignee, or other fiduciary, may not commence or complete operations until the required qualifying documents have been filed and approved. In the case of such change, the fiduciary will make appropriate notation on Form 1623 of his succession, and the date thereof.

(53 Stat. 495; 26 U. S. C. 4041)

### Subpart Q—Discontinuance of Business

§ 195.230 *Discontinuance.* Upon permanent discontinuance of business, and prior to the filing of Form 27–F, Form 26, and notice of suspension, as prescribed in §§ 195.200–195.201, all distilling materials, low wines, and vinegar must have been disposed of. All fermenting and distilling materials, low wines, and vinegar must be accounted for on Form 1623, which must be submitted to the Assistant Regional Commissioner, in triplicate, and be marked "Final report, permanent discontinuance of business."

(53 Stat. 495; 26 U. S. C. 4041)

§ 195.231 *Notice, Form 27–F.* When all distilling materials, low wines, and vinegar have been lawfully disposed of, the proprietor shall file Form 27–F, in triplicate, with the Assistant Regional Commissioner, stating the purpose of the filing thereof to be "Permanent discontinuance of business." The Assistant Regional Commissioner will forward the original of the Form 27–F to the Commissioner.

(53 Stat. 495; 26 U. S. C. 4041)

§ 195.232 *Registry of stills, Form 26.* All distilling apparatus must be registered on Form 26 "Not for use" with an explanatory note that the proprietor is permanently discontinuing business. Some essential portion of the distilling apparatus shall be removed to a safe place of storage pending the final dismantling and disposition of the apparatus.

(53 Stat. 308, as amended; 26 U. S. C. 2810)

### Subpart R—General Provisions Relating to Vinegar Factories

§ 195.240 *Production of mash, wort, or wash.* No mash, wort, or wash fit for distillation or for the production of spirits or alcohol shall be made or fermented in any building or on any premises other than a distillery or industrial alcohol plant duly authorized according to law, except for the manufacture of fermented liquors or for the manufacture of vinegar.

(53 Stat. 319; 26 U. S. C. 2834)

§ 195.241 *Sale or removal of mash, wort, or wash; distillation.* No mash, wort, or wash made and fermented in any distillery, industrial alcohol plant, or vinegar factory shall be sold or removed therefrom before being distilled; and no person other than an authorized distiller or proprietor of an industrial alcohol plant shall by distillation or by any other process separate the alcoholic spirits from any fermented mash, wort, or wash, except for the manufacture of vinegar.

(53 Stat. 319; 26 U. S. C. 2834)

§ 195.242 *Inspection of records and premises.* All records and reports kept and filed under the provisions of this part and all liquid or property to which such records or reports relate shall be subject to inspection at any reasonable hour by any official or officer of the Internal Revenue Service.

§ 195.243 *Samples may be taken by officers.* Officers of the Internal Revenue Service may take samples of low wines and vinegar, or of products manufactured with vinegar, whether at the place of manufacture or on trucks or other conveyances leaving the place of manufacture.

### Subpart S—Instructions Concerning Government Officers

#### Inspection of Vinegar Factories

§ 195.250 *Entry of vinegar factory or premises used in connection therewith.* Under the law, any internal revenue officer may at all times, as well by night as by day, enter any vinegar factory or building or place used for the business of distilling or used in connection therewith for storage or other purposes, and, if not admitted upon demand, having declared his name and office, he may break open any doors or windows or break through any of the walls of such premises necessary to be broken to enable him to enter.

(53 Stat. 317; 26 U. S. C. 2827)

§ 195.251 *Authority to break up grounds or walls.* Under the law, any internal revenue officer, and any persons acting in his aid, may break up the ground on any part of the vinegar factory or premises of a vinegar maker, or any wall or partition thereof or belonging thereto, or other place, to search for any pipe, cock, private conveyance, or utensil, and upon finding any pipe or conveyance leading from or to the vinegar factory premises, to break up any ground, house, wall, or other place through or into which such pipe or conveyance leads, and to break or cut away such pipe or other conveyance.

(53 Stat. 316; 26 U. S. C. 2830)

§ 195.252 *Proprietors to furnish assistance.* Under the law, on demand of any internal revenue officer, every vinegar maker shall furnish convenient ladders to enable the officer to examine any vessel or utensil in his vinegar factory, and shall furnish all assistance, lights, tools, or other things necessary for inspecting the premises and apparatus, and shall open all doors, boxes, packages, and all casks, barrels, tanks, and other vessels.

(53 Stat. 317; 26 U. S. C. 2828)

§ 195.253 *Officers to keep themselves informed.* Inspectors must inform themselves fully of the limitations and requirements of the internal revenue laws and this part. They should familiarize themselves with the theory and practice of fermentation and distillation, the making of such simple chemical determinations as are requisite for a check of the yield of low wines at vinegar factories, the proper use of instruments, the gauging and testing of low wines and vinegar, the records that proprietors are required to keep, and the reports they are required to render.

§ 195.254 *Frequency of inspection.* Assistant Regional Commissioners will cause the premises of vinegar factories to be inspected at irregular and unexpected intervals, in accordance with the prevailing inspection policy as determined by the Commissioner from time to time.

§ 195.255 *Scope of inspection.* The scope of the inspection will likewise be in accordance with the prevailing inspection policy as determined by the Commissioner from time to time. It is not intended that all of the following provisions respecting points to be covered shall necessarily apply in the case of each inspection. Such provisions are set forth for the guidance of the inspectors when within the scope of the inspection required by their assignments.

§ 195.256 *Examination of records.* The inspectors will see that the records of the proprietor are properly kept, but will not audit such records, or take an inventory, unless conditions indicate the necessity for a complete inspection. When a record is checked the inspector will note such fact on the margin thereof with the date of checking and his initials so that other officers on subsequent visits need not verify the record for the period covered by such inspection.

§ 195.257 *Examination of distilling equipment.* The inspectors will ascertain whether the distilling equipment in vinegar factories conforms to the plans and will trace the equipment, including

pipe lines, to determine whether the flow of alcoholic vapor and low wines conform to the requirements of this part, and whether the low wines on storage are adequately protected against diversion. The inspector will require correction of any unsafe condition discovered by him.

§ 195.258 *Materials.* The inspectors should inquire into the kind and quantities of distilling materials used, and any abnormal differences between the actual yield and the normal yield of low wines therefrom.

§ 195.259 *Test of low wines and vinegar.* The inspecting officer will examine the process of manufacture, test the low wines in the spray tank or condenser to see to what proof it is raised, and the proof of the low wines in the receiving tanks and storage tanks. He will also determine the proof at which the low wines are acetified. The inspector shall also test vinegar and other fluids or materials to be removed from the vinegar factory premises to determine that such material does not contain a greater proportion than 2 percent of proof spirits, which is the maximum proportion permitted by law.

§ 195.260 *Storage of low wines.* The means of storing the low wines and the security thereof should be ascertained by inspectors. When low wines are stored in storage tanks the officer should ascertain the contents of the tanks and compare the same with the quantity carried in the records as on hand in the tanks. Any deficiency found should be thoroughly inquired into at the time. The proprietor should be called upon for an explanation of any shortage, unless the inspectors deem it advisable to inquire further into the matter before advising him of their discovery of the shortage.

§ 195.261 *Additional inquiries.* The inspectors will make such further inquiries as may be necessary to determine whether the mode of operations followed by the proprietor, particularly in respect to the receipt, storage, and use of fermenting or distilling materials, the distilling process employed, the transfer of low wines to receiving tanks, and from such tanks to storage tanks, and to the vinegar factory proper to be used in the manufacture of vinegar, is in conformity with the intendment of the law and this part.

§ 195.262 *Inspection reports.* Inspectors will promptly render reports of their inspection to Assistant Regional Commissioners. They will call the attention of the proprietor to any condition or mode of operation which is unsatisfactory or irregular, and will describe fully the unsatisfactory or irregular condition or mode of operation in their reports, and state what steps have been taken or ought to be taken to remedy the same. Any unusual conditions discovered in the course of inspection should be noted by the inspectors and covered fully by their reports. Any cases of irregular removal of low wines, or other unlawful acts coming to the knowledge of inspectors, should be immediately reported to the Assistant Regional Commissioner.

### Subpart T—Instructions to Assistant Regional Commissioners

#### Losses

§ 195.270 *Investigation by Assistant Regional Commissioners.* Where large losses of low wines are reported by the proprietors of vinegar factories, the Assistant Regional Commissioner will immediately make such investigation and require such evidence to be submitted as he may deem necessary, and will allow or disallow the loss in accordance with existing law and regulations.

§ 195.271 *Examination of reports of proprietors.* Upon receipt of a report rendered by a proprietor of a vinegar factory for the month the Assistant Regional Commissioner will examine such report to determine whether the proprietor has accounted for all the low wines produced by him during the month. If the Assistant Regional Commissioner finds that the proprietor apparently has not accounted for all the low wines produced by him, he shall make such investigation as he may deem necessary and determine, from all the evidence he can obtain, the quantity of low wines actually produced by the proprietor.

§ 195.272 *Use of materials not reported.* If the Assistant Regional Commissioner should find that the proprietor has received on his premises materials which have not been accounted for, or has used materials which have not been reported as used, and has produced low wines which have not been reported, the quantity of low wines produced and not reported should be determined from all the evidence that can be obtained, including evidence of the normal actual yield of low wines from such materials at the particular vinegar factory.

§ 195.273 *Determining low wines produced.* If it is determined that all materials received have been accounted for and all materials used have been reported, but that the proprietor has not accounted for all the low wines produced, the quantity actually produced should be determined from all the evidence that can be obtained. The evidence that low wines have been produced from materials reported used and that have not been accounted for by the proprietor should be direct and positive. The fraudulent removal of low wines will not be assumed from the mere fact that the quantity of low wines reported is not equal to the number of gallons which the materials reported used will ordinarily produce.

§ 195.274 *Notice to proprietor.* If it is determined that the proprietor has not accounted for all the low wines produced by him, the Assistant Regional Commissioner will, unless the interests of the Government require an immediate assessment, notify the proprietor of the proposed assessment and afford him an opportunity to submit within 30 days, or such further time as the Assistant Regional Commissioner may consider reasonable, evidence showing why the proposed assessment should not be made.

§ 195.275 *Nature of evidence.* The evidence submitted by the proprietor should be in the form of affidavits and certified documents.

§ 195.276 *Consideration of response.* If the proprietor responds to the notice and submits evidence bearing on the merits of the proposed assessment, the Assistant Regional Commissioner will give due consideration thereto and make such further investigation as he may deem advisable. If, after consideration of all the facts, the Assistant Regional Commissioner finds that the tax is due, an assessment will be made in accordance with prescribed procedure.

§ 195.277 *Evidence of loss.* Where the proprietor claims, pursuant to notice of proposed assessment, that the low wines produced and not accounted for were actually lost, without any fraud or collusion on his part, and were not illegally used or removed from the premises, he will submit evidence in support thereof.

§ 195.278 *Proprietor's failure to respond.* If the proprietor fails to respond to the notice of proposed assessment within the time specified, an assessment will be made for the amount found due in accordance with the prescribed procedure.

§ 195.279 *Examination of evidence.* When such evidence of loss is received by the Assistant Regional Commissioner, he will carefully examine the same to see that all the required information has been furnished, and will cause such investigation to be made, or require such additional evidence to be submitted, as he may deem necessary. Upon completion of his investigation, if any, the Assistant Regional Commissioner will allow or disallow the loss in accordance with existing law and regulations.

§ 195.280 *Assistant Regional Commissioner's credit for losses.* Upon receipt of Forms 1623 the Assistant Regional Commissioner will take credit on his Form 1624 for the quantity of low wines reported lost in receiving and storage tanks within the 1 percent allowance provided for in this part. Losses in excess of the authorized allowance will be reported as unaccounted for on the first and last of the month on Form 1624 until it is determined what disposition has been made of the low wines, or until the loss is tax-paid or is allowed.

#### Audit of Reports

§ 195.281 *Audit of reports of vinegar manufacturers.* The Assistant Regional Commissioner will, after audit and not later than the last day of the month succeeding that for which the reports are rendered, forward one copy of Form 1623 to the Commissioner and retain the remaining copy.

#### Assistant Regional Commissioner's Report

§ 195.282 *Assistant Regional Commissioner's report, Form 1624.* Assistant Regional Commissioners will prepare Form 1624, in duplicate, from the monthly returns rendered in their regions on Form 1623. A separate report

will be made for each State in the region. Entries shall be made as indicated by the headings of the various columns and lines and in accordance with the instructions printed on the form, and as set forth in this part. One copy will be retained by the Assistant Regional Commissioner for his files and the other copy will be forwarded to the Commissioner not later than the last day of the month succeeding that for which the form is rendered.

**Subpart U—Rules for Computing Capacity of Stills**

§ 195.290 *Pot or kettle stills.* The estimated maximum quantity in proof gallons of distilled spirits capable of being produced every 24 hours, which is required to be shown on the proprietor's notice, will be computed as follows for pot or kettle stills:

The working capacity of pot or kettle stills will be determined by multiplying 80 percent of the cubic capacity of the still by the maximum number of boilings that can be made in 24 hours and then multiplying this result by the percent of alcohol by volume contained in the highest yielding material to be used in distillation. This result will represent the quantity of wine gallons of absolute alcohol that can be distilled in 24 hours. This quantity, when multiplied by 2, will represent the number of proof gallons. For example, if a pot still having a cubic capacity of 2,000 gallons is used, and such still can be charged three times in eight hours, and the highest percentage of alcohol by volume in the distilling material to be used is 8 percent, the spirit-producing capacity of the still will be computed as follows: $2{,}000\times0.8\times9\times0.08\times2=2{,}304$ proof gallons. (The quantity that can be distilled in 24 hours.)

§ 195.291 *Charge chamber stills.* The estimated maximum quantity in proof gallons of distilled spirits capable of being produced every 24 hours, which is required to be shown on the proprietor's notice, will be computed as follows for charge chamber stills:

Where a charge chamber still is used, the estimated maximum quantity of distilled spirits in proof gallons capable of being produced will be determined by multiplying 80 percent of the cubic capacity of the top or charge chamber of the still by the number of times the same can be filled and emptied in 24 hours. This result will represent the total number of gallons of distilling material that can be distilled in 24 hours, which quantity will be multiplied by the percent of alcohol by volume contained in the highest yielding material to be used. The result of such computation will represent the number of wine gallons of absolute alcohol that can be distilled in 24 hours. This quantity, when multiplied by 2, will represent the number of proof gallons. For example, if a charge still is used having a charge chamber of a cubic capacity of 600 gallons which can be charged three times in one hour, and the highest percentage of alcohol by volume in the distilling material to be used is 8 percent, the spirit-producing capacity will be computed as follows: $600\times0.8\times3\times24\times0.08\times2=5{,}529.6$ proof gallons. (The quantity that can be distilled in 24 hours.)

§ 195.292 *Continuous stills.* The estimated maximum quantity in proof gallons of distilled spirits capable of being produced every 24 hours, which is required to be shown on the proprietor's notice, will be computed as follows for continuous stills:

If continuous stills are used, the maximum spirit-producing capacity in proof gallons of such stills will be computed on the area of the column in square feet. The first step will be to determine the inside diameter of the still at its base and the diameter will then be divided by 2 to ascertain the radius. The diameter may be determined (1) by accurately measuring the inside width of the still with a rod or tape, or (2) by measuring the outside circumference of the still and dividing the same by 3.1416 and deducting from the quotient twice the thickness of the sides of the still. The radius (in feet) will be squared and then multiplied by 3.1416 (Pi) to ascertain the area of the column in square feet. The area in square feet will be multiplied by the factor, 40 (the number of gallons of 100 proof spirits that can be distilled in one hour per square foot of plate area), and the result will represent the total number of gallons of 100 proof spirits that can be distilled in one hour. This quantity will be multiplied by 24 to determine the number of gallons of 100 proof spirits that can be distilled in one day. For example, if a continuous still having a diameter of 4 feet is used, the spirit-producing capacity will be computed as follows: $2\times2\times3.1416\times40\times24=12{,}063.74$ proof gallons. (The quantity that can be produced in 24 hours.)

*Effect.* These regulations shall be effective as of December 1, 1953.

[SEAL] T. COLEMAN ANDREWS,
*Commissioner of Internal Revenue.*

Approved: December 14, 1953.

M. B. FOLSOM,
*Acting Secretary of the Treasury.*

[F. R. Doc. 53-10518; Filed, Dec. 17, 1953; 8:51 a. m.]

## TITLE 32—NATIONAL DEFENSE

### Chapter V—Department of the Army

**Subchapter A—Aid of Civil Authorities and Public Relations**

PART 502—RELIEF ASSISTANCE

MISCELLANEOUS AMENDMENTS

1. In § 502.2, the opening statement and paragraph (b) are rescinded and the following substituted therefor:

§ 502.2 *Responsibility of armed forces.* Over a number of years, the Army among the military services has been employed most often by the President to render aid to the States and local Governments in disasters and similar emergencies which have assumed such proportions as to be beyond the capabilities of local authorities. However, the capabilities of the Navy and the Air Force have similarly been utilized in rendering disaster assistance and, in some instances, they are more appropriately organized and equipped for particular types of operations. The Department of the Army has primary responsibility among the services for provision of disaster relief, with the Navy and the Air Force having collateral responsibility. The Department of the Army is also charged with the responsibility for coordination of disaster relief activities of the military services.

* * * * *

(b) *Corps of Engineers.* (1) The prevention and control of floods is by statute the responsibility of the Corps of Engineers. When a flood of dangerous proportions is foreseen, district engineers will keep the Department of the Army and army commanders informed of developments, including the Corps of Engineers statutory flood fighting activities as conditions warrant. The closest cooperation between district and division engineers, continental army commanders, the Red Cross, and other relief agencies is necessary to mitigate the results of disastrous floods. Efforts incident to the repair, restoration, and maintenance of flood control works and rescue of flood victims are performed by the Corps of Engineers. Army assistance in the relief of human suffering is the responsibility of the continental army commander.

(2) Whenever, in connection with flood disasters, assistance beyond the statutory authority of the Corps of Engineers is requested of the Corps of Engineers by the Federal agency designated to coordinate Federal relief activities (§ 502.1 (a)), the continental army commander concerned will be informed by the division or district engineer and his concurrence will be obtained before such assistance is furnished. Request for an allotment of funds required therefor, will be made simultaneously by the division or district engineer to the army commander, who will make the allotment provided such funds are available. In any case where funds from military appropriations cannot be made available by the army commander and where the Federal agency designated to coordinate Federal relief activities certifies that funds therefor are available under the provisions of the act of September 30, 1950, the Corps of Engineers may provide the requested assistance using any available civil funds pending reimbursement.

2. In § 502.3, paragraph (a) (1) is amended to read as follows:

§ 502.3 *Department of the Army policies.* (a) * * *

(1) The overruling demands of humanity compel immediate action to prevent starvation and extreme suffering, in which event continental army commanders will use personnel, supplies, and equipment under their control within their own discretion, and notify the Department of the Army, and

## TITLE 47—TELECOMMUNICATION

### Chapter I—Federal Communications Commission

PART 10—PUBLIC SAFETY RADIO SERVICES

REVISION OF RULES

Pursuant to authority contained in sections 4 (i), 5 (d) (1), and 303 (r) of the Communications Act of 1934, as amended, and paragraph F-6 of the Commission's Order Defining the Functions and Establishing the Organizational Structure of the Office of the Secretary, dated February 14, 1952, as amended, the following editorial changes are made in Part 10, "Rules Governing Public Safety Radio Services;"

1. The table of contents is amended to reflect the revision of the text.

2. Amend § 10.3 to read as follows:

§ 10.3 *Organization and applicability of rules.* The rules in this part are divided into eleven subparts, of which Subparts A through E, inclusive, contain general rules which apply to every station authorized under this part, while Subparts F through K, inclusive, are specific and apply only to the stations authorized under the particular subject.

3. Amend last sentence of § 10.6 to read as follows: "Requests for authority to transfer or assign a station authorization may be submitted in accordance with § 10.55 (b) or (d), whichever is applicable."

4. Amend § 10.7 by changing the title to "Cooperative arrangements."

5. Amend last sentence of § 10.68 to read as follows: "If authorized, such international communication must be conducted in accordance with Article 5 of the Inter-American Radio Agreement—Washington, D. C., 1949 (see Appendix A)."

6. Amend §§ 10.255 (g), 10.305 (f), 10.355 (d), 10.405 (e), and 10.462 (e), to delete the frequency band entry of 454.05 to 455.95 Mc, and substitute therefor, for base and mobile stations, subject to limitation 1, the following frequencies:

| | | | |
|---|---|---|---|
| 453.05 | 453.55 | 458.05 | 458.55 |
| 453.15 | 453.65 | 458.15 | 458.65 |
| 453.25 | 453.75 | 458.25 | 458.75 |
| 453.35 | 453.85 | 458.35 | 458.85 |
| 453.45 | 453.95 | 458.45 | 458.95 |

7. Amend § 10.355 (d) to delete limitation note 8 opposite the frequencies 171.475 and 172.275 Mc and to add limitation note 15 to these same frequencies.

8. Amend § 10.355 (e) to add limitation note 15 to read as follows:

15. In addition to agencies responsible for forest fire prevention, detection and suppression this frequency may be assigned to conservation agencies which do not have forest fire responsibilities: *Provided,* That such assignment is necessary to permit mobile relay operation by such agencies: *And provided,* That such operation will cause no harmful interference to any U. S. Government station.

9. Amend Section 10.404 (c) to read as follows:

§ 10.404 *Station limitations.* * * *

(c) Each operator of a station in the Highway Maintenance Radio Service when employing a frequency shared with the Special Emergency Radio Service and designated by limitation note 6 in § 10.405 (e) shall listen on the licensed frequency of the station prior to transmitting and shall not transmit until it has been reasonably determined that harmful interference will not be caused to any authorized communication in progress on the frequency.

10. Amend Appendix A to delete Article 7 Inter-American Radio Agreement—Santiago, Chile 1940. Substitute therefor Article 5 Inter-American Radio Agreement—Washington, D. C., 1949.

In view of the fact that the amendments adopted herein are editorial in nature, prior publication of Notice of Proposed Rule Making under the provisions of section 4 of the Administrative Procedure Act is unnecessary.

It is noted that since Part 10 was last published in the FEDERAL REGISTER (April 27, 1949) a large number of amendments have been made to these provisions. Accordingly, for administrative convenience, *It is ordered,* This 14th day of December 1953, that effective December 18, 1953, Part 10, "Rules Governing Public Safety Radio Services," is revised to include the foregoing editorial changes, and all outstanding amendments adopted as of this date.

FEDERAL COMMUNICATIONS COMMISSION,
[SEAL] WM. P. MASSING,
*Acting Secretary.*

SUBPART A—GENERAL INFORMATION

Sec.
10.1 Basis and purpose.
10.2 Definitions.
10.3 Organization and applicability of rules.
10.4 General limitation on use.
10.5 General citizenship restrictions.
10.6 General restrictions on transfer and assignment of station authorization.
10.7 Cooperative arrangements.
10.8 Frequency coordination.

SUBPART B—APPLICATIONS AND LICENSES

10.51 Station authorization required.
10.52 Procedure for obtaining a radio station license.
10.53 Filing of applications.
10.54 Who may sign applications.
10.55 Standard forms to be used.
10.56 Request for special temporary authority.
10.57 Deleted.
10.58 Supplementary information to be submitted with application.
10.59 [Reserved].
10.60 Partial grant.
10.61 Defective applications.
10.62 Amendment or dismissal of applications.
10.63 Construction period.
10.64 License term.
10.65 Changes in authorized stations.
10.66 Discontinuance of station operation.
10.67 [Reserved].
10.68 International police radio communication.

SUBPART C—TECHNICAL STANDARDS

10.101 Frequencies.
10.102 Frequency stability.
10.103 Types or emission.
10.104 Emission limitations.
10.105 Modulation requirements.
10.106 Power and antenna height.
10.107 Transmitter control requirements.
10.108 Transmitter measurements.
10.109 [Reserved].

SUBPART D—OPERATING REQUIREMENTS

10.151 Operating procedure.
10.152 Station identification.
10.153 Suspension of transmission required.
10.154 Mobile installations in vehicles not under the continuous control of the licensee.
10.155 Operator requirements.
10.156 Posting of operator license.
10.157 Transmitter identification card and posting of station license.
10.158 Inspection of stations.
10.159 Inspection of tower lights and associated control equipment.
10.160 Answers to notices of violations.
10.161 Content of station records.
10.162 Form of station records.
10.163 Retention of station records.
10.164 Emergency operation of mobile stations at fixed locations.
10.165 Communication with other stations.

Subpart E—Developmental Operation

10.201 Eligibility.
10.202 Showing required.
10.203 Limitations on use.
10.204 Frequencies available for assignment.
10.205 Interference.
10.206 Special provisions.
10.207 Change or cancellation of authorization without hearing.
10.208 Report of operation.

SUBPART F—POLICE RADIO SERVICE

10.251 Eligibility.
10.252 Permissible communications.
10.253 Points of communication.
10.254 Station limitations.
10.255 Frequencies available to the Police Radio Service.

SUBPART G—FIRE RADIO SERVICE

10.301 Eligibility.
10.302 Permissible communications.
10.303 Points of communication.
10.304 Station limitations.
10.305 Frequencies available to the Fire Radio Service.

SUBPART H—FORESTRY-CONSERVATION RADIO SERVICE

10.351 Eligibility.
10.352 Permissible communications.
10.353 Points of communication.
10.354 Station limitations.
10.355 Frequencies available to the Forestry-Conservation Radio Service.

SUBPART I—HIGHWAY MAINTENANCE RADIO SERVICE

10.401 Eligibility.
10.402 Permissible communications.
10.403 Points of communication.
10.404 Station limitations.
10.405 Frequencies available to the Highway Maintenance Radio Service.

SUBPART J—SPECIAL EMERGENCY RADIO SERVICE

10.451 Availability of service.
10.452 Disaster relief organizations.
10.453 Physicians and veterinarians.
10.454 Ambulances and rescue organizations.
10.455 Beach patrols.
10.456 School buses.
10.457 Communication standby facilities.
10.458 Establishments in isolated areas.
10.459 Emergency repair of public communication facilities.
10.460 Points of communication.
10.461 Station limitations.
10.462 Frequencies available to the Special Emergency Radio Service.

SUBPART K—STATE GUARD RADIO SERVICE

Sec.
10.501 Eligibility.
10.502 Permissible communications.
10.503 Points of communication.
10.504 Station limitations.
10.505 Frequencies available to the State Guard Radio Service.

Appendix A—Article 5, Inter-American Radio Agreement (Washington, 1949).

AUTHORITY: §§ 10.1 to 10.505 issued under sec. 4, 48 Stat. 1066, as amended; 47 U. S. C. 154. Interpret or apply sec. 303, 48 Stat. 1082, as amended, sec. 5, 66 Stat. 713; 47 U. S. C. 303, 155.

SUBPART A—GENERAL INFORMATION

§ 10.1 *Basis and purpose.* (a) The basis for this part is the Communications Act of 1934, as amended, and applicable treaties and agreements to which the United States is a party. This part is issued pursuant to authority contained in Title III of the Communications Act of 1934, as amended, which vests authority in the Federal Communications Commission to regulate radio transmissions and to issue licenses for radio stations.

(b) This part is designed to provide a service of radiocommunication essential either to the discharge of non-federal governmental functions relating to the public safety or the alleviation of an emergency endangering life or property.

§ 10.2 *Definitions.* For the purpose of this part the following definitions shall be applicable. (For other definitions, refer to Part 2 of this chapter.)

(a) *Public Safety Radio Services.* Any service of radiocommunication, essential either to the discharge of non-federal governmental functions relating to public safety responsibilities or to the alleviation of an emergency endangering life or property, the radio transmitting facilities of which are defined as fixed, land, or mobile stations.

(b) *Police Radio Service.* A Public Safety service of radiocommunication essential to official police activities.

(c) *Fire Radio Service.* A Public Safety service of radiocommunication essential to official fire activities.

(d) *Forestry-Conservation Radio Service.* A Public Safety service of radiocommunication essential to official forestry-conservation activities.

(e) *Highway Maintenance Radio Service.* A Public Safety service of radiocommunication essential to official highway maintenance activities.

(f) *Special Emergency Radio Service.* A Public Safety service of radiocommunication essential to the alleviation of an emergency endangering life or property

(g) *Radio service.* An administrative subdivision of the field of radiocommunication. In an engineering sense the subdivisions may be made according to the method of operation, as, for example, mobile service and fixed service. In a regulatory sense, the subdivisions may be descriptive of particular groups of licensees, as, for example, the groups and subgroups of persons licensed under this part.

(h) *Fixed service.* A service of radiocommunication between specified fixed points.

(i) *Mobile service.* A service of radiocommunication between mobile and land stations, or between mobile stations.

(j) *Fixed stations.* A station in the fixed service.

(k) *Operational fixed station.* A fixed station, not open to public correspondence, operated by and for the sole use of those agencies operating their own radiocommunication facilities in the Public Safety, Industrial, Land Transportation, Marine, or Aviation Service.

(l) *Control station.* An operational fixed station the transmissions of which are used to control, automatically, the emissions or operation of another radio station at a specified location.

(m) *Repeater station.* An operational fixed station established for the automatic retransmission of radiocommunications received from one or more mobile stations and directed to a specified location.

(n) *Fixed relay station.* An operational fixed station established for the automatic retransmission of radiocommunications received from either one or more fixed stations or from a combination of fixed and mobile stations and directed to a specified location.

(o) *Zone station.* A fixed station in the police radio service using radiotelegraphy (A1 emission) for communication with other similar stations in the same zone and with an interzone station.

(p) *Interzone station.* A fixed station in the police radio service using radiotelegraphy (A1 emission) for communication with zone stations within the zone and with interzone stations in other zones.

(q) *Land station.* A station in the mobile service not intended for operation while in motion. (Of the various types of land stations, only the base station is pertinent to this part and will be used interchangeably with land station.)

(r) *Base station. See* "Land Station."

(s) *Mobile station.* A station in the mobile service intended to be used while in motion or during halts at unspecified points.

(t) *Mobile relay station.* A base station established for the automatic retransmission of mobile service communications which originate on the transmitting frequency of the mobile stations and which are retransmitted on the receiving frequency of the mobile stations.

(u) *Harmful interference.* Any radiation or any induction which endangers the functioning of a radionavigation service or of a safety service or obstructs or repeatedly interrupts a radio service operating in accordance with the regulations in this part. (For purposes of this definition only, a safety service is any radio service whose operation is directly related, whether permanently or temporarily, to the safety of human life and the safeguarding of property.)

(v) *Landing area.* A landing area means any locality, either of land or water, including airports and intermediate landing fields, which is used, or approved for use,[1] for the landing and take-off of aircraft whether or not facilities are provided for the shelter, servicing, or repair of aircraft, or for receiving or discharging passengers or cargo.

(w) *Station authorization.* Any construction permit, license, or special temporary authorization issued by the Commission.

(x) *Carrier frequency.* The frequency of the carrier.

(y) *Assigned frequency.* The frequency appearing on a station authorization, from which the carrier frequency may deviate by an amount not to exceed that permitted by the frequency tolerance.

(z) *Authorized bandwidth.* The frequency band, specified in kilocycles and centered on the carrier frequency, containing those frequencies upon which a total of 99 percent of the radiated power appears, extended to include any discrete frequency upon which the power is at least 0.25 percent of the total radiated power.

(aa) *Antenna structures.* The term "antenna structures" includes the radiating system and its supporting structures.

§ 10.3 *Organization and applicability of rules.* The rules in this part are divided into eleven subjarts, of which Subparts A through E, inclusive, contain general rules which apply to every station authorized under this part, while Subparts F through K, inclusive, are specific and apply only to the stations authorized under the particular subject.

§ 10.4 *General limitation on use.* The radio facilities authorized under this part shall not be used to carry program material of any kind for use in connection with radio broadcasting and shall not be used to render a communications common carrier service except for stations in the Special Emergency Radio Service while being used to bridge gaps in common carrier wire facilities.

§ 10.5 *General citizenship restrictions.* A station license shall not be granted to or held by:

(a) Any alien or the representative of any alien;

(b) Any foreign government or the representative thereof;

(c) Any corporation organized under the laws of any foreign government;

(d) Any corporation of which any officer or director is an alien;

(e) Any corporation of which more than one-fifth of the capital stock is owned of record or voted by: Aliens or their representatives; a foreign government or representative thereof; or any corporation organized under the laws of a foreign country;

(f) Any corporation directly or indirectly controlled by any other corporation of which any officer or more than one-fourth of the directors are aliens, if the Commission finds that the public interest will be served by the refusal or revocation of such license; or

(g) Any corporation directly or indirectly controlled by any other corporation of which more than one-fourth of the capital stock is owned of record or voted by: Aliens or their representatives; a foreign government or representative thereof; or any corporation organized under the laws of a foreign country, if the Commission finds that the public interest will be served by refusal or revocation of such license.

[1] Consideration to aeronautical facilities not in existence at the time of the filing of the application for radio facilities will be given only when proposed airport construction or improvement plans are on file with the CAA as of the filing date of the application for such radio facilities.

§ 10.6 *General restrictions on transfer and assignment of station authorization.* A station authorization; the frequencies authorized to be used by the grantee of such authorization; and the rights therein granted by such authorization shall not be transferred, assigned, or in any manner either voluntarily or involuntarily disposed of, or indirectly by transfer of control of any corporation holding such authorization to any person, unless the Commission shall, after securing full information, decide that said transfer is in the public interest, and shall give its consent in writing. Requests for authority to assign or transfer control of a station authorization may be submitted in accordance with § 10.55 (b) or (d), whichever is applicable.

§ 10.7 *Cooperative arrangements.* Arrangements may be made between two or more persons for the cooptrative use of radio station facilities provided all persons sharing in the use of a station are eligible to hold licenses to operate the particular type of station shared. Such cooperative arrangements shall be governed by the following.

(a) *Agreements relating to control.* (1) A group of persons eligible for a license in the same public safety radio service may share the use of a base station or a base and mobile station licensed to one member of the group provided there is on file with the Commission, and maintained with the records of the station, a copy of the agreement, under which such shared operation shall take place. Such agreement should provide that the licensee of the station shall be in control of the operation of the station and that all use of its facilities shall take place only under the direction and supervision of an employee of the licensee.

(2) Subscribers to such service may either obtain a separate license to cover the mobile transmitters which they use or the mobile transmitters may be included in the license of the base station from which service is rendered. In the latter case the coordinated service agreement should specifically cover use of such mobile units and indicate that the licensee would be in control of such units.

(b) *Contributions to operating costs.* Coordinated service may be rendered without cost to subscribers or contributions to capital and operating expenses may be accepted by the licensee. Such contributions must be on a cost-sharing basis and pro-rated on an equitable basis among all persons who are parties to the cooperative arrangement. Records which reflect the cost of the service and its non-profit, cost-sharing nature shall be maintained by the base station licensee and held available for inspection by a Commission representative.

(c) Each application for a mobile station proposing to receive coordinated service shall be accompanied by a letter from the licensee of the base station concerned indicating that the proposed coordinated service will be rendered.

§ 10.8 *Frequency coordination procedures.* (a) Except for application in the Special Emergency Radio Service, each application requesting assignment of a frequency not previously authorized for use by the applicant shall be accompanied by information in the form required by either paragraph (b) or (c) of this section.

(b) (1) A statement under oath that all existing licensees in the same service located within a radius of 75 miles of the proposed station and operating on frequencies within the band proposed to be used by the applicant have been notified of the applicant's intention to request the particular frequency; and

(2) A report based on a field study covering an area within a radius of 75 miles of the proposed station, indicating the probable interference to existing stations operating in the same service in the band requested.

(c) In lieu of the statement and report described in paragraph (b) of this section, the applicant may submit a statement from a frequency advisory committee commenting upon the frequency requested and giving the opinion of the committee regarding the probable interference to existing stations. The frequency advisory committee must be so organized that it is representative of all persons involved who are eligible for radio facilities in the service concerned in the area the committee purports to represent and for which recommendations are made. The functions of such committees are purely advisory in character and their comments and recommendations are not binding upon the Commission.

SUBPART B—APPLICATIONS, AUTHORIZATIONS AND NOTIFICATIONS

§ 10.51 *Station authorization required.* No radio transmitter shall be operated in the Public Safety Radio Services except under and in accordance with a proper station authorization granted by the Federal Communications Commission.

§ 10.52 *Procedure for obtaining a radio station authorization and for commencement of operation.* (a) Persons desiring to install and operate radio transmitting equipment should first submit an application for a radio station authorization in accordance with § 10.55 (a).

(b) When construction permit only has been issued for a base, fixed or mobile station and installation has been completed in accordance with the terms of the construction permit and the applicable rules of the Commission, the permittee shall proceed further as follows:

(1) Notify the Engineer-in-Charge of the local radio district of the date on which the transmitter will first be tested in such manner as to produce radiation, giving name of the permittee, station location, call sign, and frequencies on which tests are to be conducted. This notification shall be made in writing at least two days in advance of the test date. FCC Form 456 may be used for this purpose. No reply from the radio district office is necessary before the tests are begun.

(2) After testing, but on or before the date when the station is first used for operational purposes, mail to the Commission in Washington, D. C., an application on FCC Form 400 for license or modification of license, as appropriate in the particular case. The station may thereafter be used as though licensed, pending Commission action on the license application.

(c) When a construction permit and license for a new base, fixed or mobile station are issued simultaneously the licensee shall notify the Engineer-in-Charge of the local radio district of the date on which the transmitter will be placed in operation, giving name of licensee, station location, call sign, and operating frequencies. This notification shall be made in writing on or before the day on which operation is commenced. FCC Form 456 may be used for this purpose.

(d) When a construction permit and modification of license for a base, fixed or mobile station are issued simultaneously, operation may be commenced without notification to the Engineer-in-Charge of the local radio district, except where operation on a new or different frequency results by reason of such modification, in which event the notification procedure set forth in paragraph (c) of this section must be observed.

§ 10.53 *Filing of applications.* (a) To assure that necessary information is supplied in a consistent manner by all persons, standard forms are prescribed for use in connection with the majority of applications and reports submitted for Commission consideration. Standard numbered forms applicable to the Public Safety Radio Services are discussed in § 10.55, and may be obtained from the Washington, D. C., office of the Commission, or from any of its engineering field offices. Concerning matters where no standard form is applicable, the procedure outlined in § 10.56 should be followed.

(b) Any application for radio station authorization and all correspondence relating thereto shall be submitted to the Commission's office at Washington 25, D. C., directed to the attention of the Secretary. An application for commercial radio operator permit or license may be submitted to any of the Commission's engineering field offices, or to the Commission's office at Washington 25, D. C.

(c) Unless otherwise specified, an application shall be filed at least sixty days prior to the date on which it is desired that Commission action thereon be completed. In particular, applications involving the installation of new equipment shall be filed at least sixty days prior to the contemplated installation.

(d) Failure on the part of the applicant to provide all the information required by the application form or to supply the necessary exhibits or supplementary statements may constitute a defect in the application.

(e) Applications involving operation at temporary locations:

(1) When a base station or a fixed station is to remain at a single location for

less than one year, the location is considered to be temporary. An application for authority to operate at temporary locations shall specify the general geographic area within which the operation will be confined. The area specified may be a city, a county or counties, a state or states, "Gulf Coast area," "Eastern U. S.", etc.

(2) When a base station or fixed station authorized to operate at temporary locations remains at a single location for more than one year, an application for modification of the station authorization to specify the permanent location shall be filed within thirty days after expiration of the one year period.

§ 10.54 *Who may sign applications.* (a) One copy of each application for an authorization shall be signed under oath or affirmation in accordance with the following:

(1) Applications filed on behalf of eligible governmental entities such as states and territories of the United States and political subdivisions thereof, the District of Columbia, and units of local government including incorporated municipalities, shall be signed by such duly elected or appointed officials as may be competent to do so under the law of the jurisdiction.

(2) Applications filed on behalf of applicants other than governmental entities shall be signed by the individual, or any one of the partners if the applicant be a partnership, or by an officer if the applicant be a corporation, or by a member who is an officer if the applicant be an unincorporated association.

§ 10.55 *Standard forms to be used.* (a) A separate application shall be submitted on FCC Form 400 for the following:

(1) New station authorization for a base or fixed station.

(2) New station authorization for any required number of mobile units (including hand-carried or pack-carried units) to be operated in the same service.

NOTE: An application for mobile units may be combined with an application for a single base station in those cases where the mobile units will operate with that base station in a single radio communication system.

(3) License for any class of station upon completion of construction or installation in accordance with the terms and conditions set forth in the construction permit.

(4) Modification of combined construction permit and station license for changes outlined in § 10.65 (a).

(5) Modification of construction permit.

(6) Modification of station license.

Any of the foregoing applications will, upon approval and authentication by the Commission, be returned to the applicant as a specifically designated type of authorization.

(b) When the holder of a station authorization desires to assign to another person the privilege to construct or use a radio station, he shall submit to the Commission a notarized letter setting forth his desire to assign all right, title, and interest in and to such authorization, stating the file number and expiration date of his authorization and the call sign and location of station. This letter shall also include a statement that the assignor will submit his current station authorization for cancellation upon completion of the assignment. Enclosed with this letter shall be an application for Assignment of Authorization on FCC Form 400 prepared by and in the name of the person to whom the station is being assigned.

(c) A separate application may be submitted on FCC Form 400–A for certain changes to authorized stations as specified in § 10.65 (b).

(d) A separate application shall be submitted on FCC Form 703 whenever it is proposed to change, as by transfer of stock-ownership, the control of a corporate permittee or licensee.

(e) An application not submitted on a standard form prescribed by the Commission is considered to be an informal application. Each informal application shall be submitted in duplicate, normally in letter form, and with the original signed under oath or affirmation. Each application shall be clear and complete within itself as to the facts presented and the action desired.

(f) FCC Form 456 "Notification of Completion of Radio Station Construction" may be used to advise the Engineer-in-Charge of the local district office that construction of the station is complete and that operational tests will begin.

(g) Application for renewal of station license shall be submitted on FCC Form 405–A. Unless otherwise directed by the Commission, each application for renewal of station license shall be filed during the last 60 days of the license term. In any case in which the licensee has, in accordance with the Commission's rules made timely and sufficient application for renewal of license, no license with reference to any activity of a continuing nature shall expire until such application shall have been finally determined.

§ 10.56 *Request for special temporary authority.* (a) In circumstances requiring immediate or temporary use of facilities, request may be made for special temporary authority to install and operate new equipment or to operate licensed equipment in a manner different from that authorized in the station license. Any such request may be in letter form, submitted in duplicate, and signed under oath: *Provided,* That in cases of emergency involving danger to life or property or due to damage to equipment, such request may be made by telephone or telegraph, and in the event that the Commission finds that such an emergency exists temporary authorization may be granted for the duration of the emergency. Any such request shall be clear and complete within itself as to the facts presented and the action desired.

(b) Special temporary authority may also be requested for the purpose of conducting a field survey to determine necessary data in connection with the filing of formal applications for installation of a radio system under this part. In this case, the authority, if issued, will be for developmental operation only and the applicable sections of Subpart E hereof shall also apply to the grant.

(c) Request for special temporary authority shall contain the following information:

(1) Name, address, and citizenship status of applicant.

(2) Need for special action, including a description of any emergency or damage to equipment.

(3) Type of operation to be conducted.

(4) Purpose of operation.

(5) Time and date of operation desired.

(6) Class of station and nature of service.

(7) Location of station.

(8) Equipment to be used, specifying manufacturer, model number and number of units.

(9) Frequency(s) desired.

(10) Plate power input to final radio frequency stage.

(11) Type of emission.

(12) Description of antenna to be used, including height.

(d) Except in emergencies involving safety of life or property or due to damage to equipment, request for special temporary authority shall be submitted to the Commission at least ten days prior to the date of proposed operation, or it must be accompanied by a statement of reasons for the delay in submitting such request.

§ 10.57 [Reserved].

§ 10.58 *Supplementary information to be submitted with application.* Each application for station authorization shall be accompanied by such supplemental information listed below as may be required:

(a) Statement with respect to frequency selection and coordination:

(1) Any statements or showings, required by the applicable subpart of these rules, in connection with the use of the frequency requested.

(2) Evidence of frequency coordination as required by § 10.8.

(b) Statements justifying the need when more frequencies are desired than are normally assigned to a single applicant under the applicable subpart of this part.

(c) Statement describing the type of emission to be used if it cannot be described as "8A3" or "40F3" pursuant to Subpart C of this part.

(d) Description of the antenna system, on FCC Form 401–A in triplicate in all cases when:

(1) The antenna structure proposed to be erected will exceed an over-all height of 170 feet above ground level: *Provided, however,* That FCC Form 401–A is not required when the antenna is mounted on top of an existing man-made structure and does not increase the over-all height of such man-made structure by more than 20 feet; or

(2) The antenna structure proposed to be erected will exceed an over-all height of one foot above the established airport (landing area) elevation for each 200 feet of distance, or fraction thereof, from the nearest boundary of such landing area: *Provided, however,* That FCC Form 401–A is not required when the antenna does not exceed 20 feet above the ground or is mounted on top of an existing man-made structure or natural formation and does not increase the over-all height of such man-made structure or natural formation by more than 20 feet.

(e) A functional system diagram and a detailed description of the manner in which the interrelated stations will operate when the station is, or will be, part of a system involving two or more stations at different fixed locations, in accordance with the instructions accompanying Form 400.

(f) Copies of all agreements and statements which may be required under § 10.7 if operation is desired in connection with any cooperative use of the proposed radio communication facilities.

(g) Statements required by the rules in this part in connection with developmental operations. See §§ 10.202, 10.203, 10.207.

(h) Description of any equipment, proposed to be used, which does not appear on the Commission's List of Equipment Acceptable for Licensing and designated for use in the Public Safety, Industrial and Land Transportation Radio Services.

(i) Any statements or other data required under special circumstances as set forth in the applicable subpart of this part, or required upon request by the Commission.

§ 10.59 [Reserved].

§ 10.60 *Partial grant.* Where the Commission, without a hearing, grants an application in part, or with any privileges, terms or conditions other than those requested, the action of the Commission shall be considered as a grant of such application unless the applicant shall, within 20 days from date on which grant is made, or from its effective date if a later date is specified, file with the Commission a written request, rejecting the grant as made. Upon receipt of such request, the Commission will vacate its original action upon the application and set the application for hearing in the same manner as other applications are set for hearing.

§ 10.61 *Defective applications.* (a) An application which is not prepared in accordance with the Commission's Rules or other requirements will be considered defective.

(b) If an applicant is requested by the Commission to file any documents or information not included in the prescribed application form, a failure to comply with such request will constitute a defect in the application.

(c) When an application is considered to be incomplete or defective, the Secretary of the Commission will return it to the applicant, unless the Commission may otherwise direct.

§ 10.62 *Amendment or dismissal of applications.* Any application may be amended or dismissed without prejudice upon request of the applicant prior to the time the application is granted or designated for hearing. Each amendment to, or request for dismissal of an application shall be signed, authenticated, and submitted in the same manner and with the same number of copies as required for the original application. All related correspondence or other material which is to be considered as a part of an application already filed shall be submitted in the form of an amendment to the application concerned.

§ 10.63 *Construction period.* (a) Each radio station construction permit issued by the Commission will specify the date of grant as the earliest date of commencement of construction and installation, and a maximum of eight months thereafter as the time within which construction shall be completed and the station ready for operation, unless otherwise determined by the Commission in any particular case.

(b) In cases where the station is not ready for operational use on or before the expiration date of the construction permit, application for extension of time to construct shall be filed on FCC Form 400–A.

§ 10.64 *License term.* (a) For all stations in the Public Safety Radio Services, except those engaged in developmental operation, the license period shall be as follows:

(1) Each station license will be issued for a term of from one to five years from the effective date of grant, the term varying as may be necessary to permit the orderly scheduling of renewal applications.

(2) Each station license normally will be renewed, upon proper application, for a term of four years from the effective date of renewal.

(b) Authorization for stations engaged in developmental operation will be made upon a temporary basis for a specific period of time, but in no event to extend beyond one year from date of grant.

§ 10.65 *Changes in authorized stations.* Authority for certain changes in authorized stations must be obtained from the Commission before these changes are made, while other changes do not require prior Commission approval. The following paragraphs describe the conditions under which prior Commission approval is or is not necessary.

(a) Proposed changes which will result in operation inconsistent with any of the terms of the current authorization require that an application for modification of construction permit and/or license be submitted to the Commission and, except as set forth in paragraph (b) of this section, shall be on Form 400 and shall be accompanied by exhibits and supplementary statements as required by § 10.58.

(b) Any of the following changes to authorized stations may be made upon approval by the Commission of a "Request for Amendment of Radio Station Authorization" submitted on FCC Form 400–A.

(1) Change in presently authorized location of transmitter control point.

(2) Addition or deletion of control point(s) for presently authorized transmitter.

(3) Reduction in antenna height. If painting and/or lighting of the antenna supporting structure is required, FCC Form 401–A must also be submitted.

(4) A reduction in the over-all number of transmitters authorized for mobile use.

(5) An increase in the over-all number of transmitters authorized for mobile use. This form may be used only when adding mobile transmitters which are included in the Commission's "List of Equipment Acceptable for Licensing" and designated for use in the Public Safety, Industrial, and Land Transportation Radio Services.

(6) An extension of the time limit specified in a construction permit.

(c) Proposed changes which will not depart from any of the terms of the outstanding authorization for the station involved may be made without prior Commission approval. Included in such changes is the substitution of various makes of transmitting equipment at any station provided the particular equipment to be installed is included in the Commission's "List of Equipment Acceptable for Licensing" and designated for use in the Public Safety, Industrial, and Land Transportation Radio Services and provided the substitute equipment employs the same type of emission and does not exceed the power limitations as set forth in the station authorization.

§ 10.66 *Discontinuance of station operation.* In case of discontinuance of operation for a period of one year or more of a base or fixed station in these services, or in case of discontinuance for a period of one year or more of operation of all transmitter units listed in the license for a mobile station in these services, the licensee shall forward the station license to the Washington, D. C., office of the Commission for cancellation. A copy of the request for cancellation of the license shall be forwarded to the Commission's Engineer in Charge of the district in which the station is located.

§ 10.67 [Reserved].

§ 10.68 *International police radio communication.* Police radio licensees which are located in close proximity to the borders of the United States may be authorized to communicate internationally. Request for such authority shall be submitted in duplicate and be signed under oath. The request shall include information as to the station with which communication will be conducted, frequency, power, emission, etc., that will be used. If authorized, such international communication must be conducted in accordance with Article 5 of the Inter-American Radio Agreement, Washington, D. C., 1949 (see Appendix A).

### SUBPART C—TECHNICAL STANDARDS

§ 10.101 *Frequencies.* (a) The frequencies available for assignment are listed in the applicable subpart of this part. All applicants for, and licensees of, stations in these services shall cooperate in the selection and use of the designated frequencies to minimize interference and to make effective use of the frequencies assigned. Frequencies listed in this part will not be assigned exclusively to any one applicant. The use of any frequency may be restricted to one or more specified geographical areas.

(b) Frequencies assigned to government radio stations under Executive Or-

der of the President may be authorized for use of stations in these services upon appropriate showing by the applicant that such assignment is necessary for inter-communication with government stations or required for coordination with activities of Federal Government, and where the Commission finds, after consultation with the appropriate government agency or agencies, that such assignment is necessary.

§ 10.102 *Frequency stability.* (a) A permittee or licensee in these services shall maintain the carrier frequency of each authorized transmitter within the following percentage of the assigned frequency, except as provided in paragraphs (b) and (c) of this section:

| Frequency range: | Frequency tolerance (percent) |
|---|---|
| Below 50 Mc | 0.01 |
| 50–220 Mc | .005 |
| Above 220 Mc | (1) |

[1] To be specified in the authorization.

(b) Licensees of mobile units using amplitude modulation may, until July 1, 1950, maintain the carrier frequency of such units within the following percentage of the assigned frequency in lieu of the requirements of paragraph (a) of this section:

| Frequency range: | Frequency tolerance (percent) |
|---|---|
| Below 30 Mc | 0.02 |
| 30–40 Mc | .03 |

(c) For transmitters authorized to operate with a maximum plate power input to the final radio frequency stage of 3 watts or less, the frequency may be maintained as shown in the table below in lieu of the requirements in paragraph (a) of this section:

| Frequency range: | Frequency tolerance (percent) |
|---|---|
| Below 50 Mc | 0.02 |
| 50–220 Mc | .01 |
| Above 220 Mc | (1) |

[1] To be specified in the authorization.

§ 10.103 *Types of emission.* (a) Except as provided in paragraphs (c) and (d) of this section, stations in these services will be authorized to use only A3 or F3 emission for radiotelephony. The authorization to use A3 or F3 emission will be construed to include the use of tone signals or signaling devices whose sole function is to establish and maintain communication between stations.

(b) The use of F3 emission in these services will be authorized only on frequencies above 30 Mc.

(c) Zone and interzone stations will be authorized to use only A1 emission.

(d) Other types of emission not described in paragraphs (a) or (c) of this section may be authorized upon a satisfactory showing of need therefor. An application requesting such authorization shall fully describe the emission desired, shall indicate the bandwidth required for satisfactory communication, and shall state the purpose for which such emission is required. For information regarding the classification of emissions and the calculation of the bandwidth, reference should be made to Part 2 of this subchapter.

§ 10.104 *Emission limitations.* (a) Each authorization issued to a station operating in these services will show, as the prefix to the emission classification, a figure specifying the maximum authorized bandwidth in kilocycles to be occupied by the emission. The specified band shall contain those frequencies upon which a total of 99 percent of the radiated power appears, extended to include any discrete frequency upon which the power is at least 0.25 percent of the total radiated power. Any radiation in excess of the limits specified in paragraph (c) of this section is considered to be an unauthorized emission.

(b) The emission prefix figures referred to in paragraph (a) of this section for the types of emission covered by § 10.103 (a) and (c) are listed in the table below:

| Type of emission: | Authorized bandwidth (kc) |
|---|---|
| A1 | 0.1 |
| A3 | 8 |
| F3 | 40 |

(c) For purpose of demonstrating compliance with paragraph (a) of this section, the following limits apply:

(1) Any emission appearing on any frequency removed from the carrier frequency by at least 50 percent, but not more than 100 percent, of the maximum authorized bandwidth shall be attenuated not less than 25 db below the unmodulated carrier.

(2) Any spurious or harmonic emission appearing on any frequency removed from the carrier frequency by at least 100 percent of the maximum authorized bandwidth shall be attenuated below the unmodulated carrier by not less than the amount indicated in the following table:

| Maximum authorized plate power input to the final radio frequency stage: | Attenuation (db) |
|---|---|
| 3 watts or less | 40 |
| Over 3 watts and including 25 watts | 50 |
| Over 25 watts and including 150 watts | 60 |
| Over 150 watts and including 600 watts | 70 |
| Over 600 watts | 80 |

(d) When an unauthorized emission results in harmful interference, the Commission may, in its discretion, require appropriate technical changes in equipment to alleviate the interference.

§ 10.105 *Modulation requirements.* (a) When amplitude modulation is used for telephony, the modulation percentage shall be sufficient to provide efficient communication and shall be normally maintained above 70 percent on peaks, but shall not exceed 100 percent on negative peaks.

(b) When phase or frequency modulation is used for telephony, the deviation arising from modulation shall not exceed plus or minus 15 kc from the unmodulated carrier.

(c) Each transmitter first authorized or installed after July 1, 1950, shall be provided with a device which will automatically prevent modulation in excess of that specified in paragraphs (a) and (b) of this section which may be caused by greater than normal audio level: *Provided, however,* That this requirement shall not be applicable to transmitters authorized to operate as mobile stations with a maximum plate power input to the final radio frequency stage of 3 watts or less.

§ 10.106 *Power and antenna height.* (a) The power which may be used by a station in these services shall be no more than the minimum required for satisfactory technical operation commensurate with the size of the area to be served and local conditions which affect radio transmission and reception. In cases of harmful interference, the Commission may order a change in power or antenna height, or both.

(b) Except where the maximum power that may be used on a particular frequency is specifically designated in connection with the use of such frequency, plate power input to the final radio frequency stage in excess of the following tabulation will not be authorized:

| Frequency range: | Maximum plate power input to the final radio frequency stage (watts) |
|---|---|
| 1.6 to 3 Mc | 2,000 |
| 3 to 25 Mc | 1,000 |
| 25 to 100 Mc | 500 |
| 100 to 450 Mc | 600 |
| Above 450 Mc | (1) |

[1] In accordance with developmental authorization.

§ 10.107 *Transmitter control requirements.* (a) Each transmitter shall be so installed and protected that it is not accessible to or capable of operation by persons other than those duly authorized by the licensee.

(b) A control point is an operating position which must meet all of the following conditions:

(1) The position must be under the control and supervision of the licensee;

(2) It is a position at which the monitoring facilities required by this section are installed; and

(3) It is a position at which an operator responsible for the operation of the transmitter is stationed.

(c) Each station which is not authorized for unattended operation shall be provided with a control point, the location of which will be specified in the license. Unattended stations may be provided with a control point if authorized by the Commission. In urban areas the location will be specified "same as transmitter" unless the control point is at a street address different from that of the transmitter. In rural areas the location will be specified "same as transmitter" unless the control point is more than 500 feet from the transmitter, in which case the approximate location will be specified in distance and direction from the transmitter in terms of feet and geographical quadrant, respectively. It will be assumed that the location of the control point is the same as the location of the transmitter unless the application includes a request for a different location described in appropriate terms as indicated in this paragraph. Authority must be obtained from the Commission for the installation of additional control points.

(d) A dispatch point is a position from which messages may be transmitted under the supervision of a control point operator. Dispatch points may be installed without authorization.

(e) At each control point the following facilities shall be installed:

(1) A carrier operated device which will provide continuous visual indication when the transmitter is radiating; or, in lieu thereof, a pilot lamp or meter which will provide continuous visual indication when the transmitter control circuits have been placed in a condition to produce radiation: *Provided however,* That the provisions of this subparagraph shall not apply to hand-carried or pack-carried transmitters or to transmitters installed on motorcycles.

(2) Equipment to permit the operator to aurally monitor all transmissions originating at dispatch points under his supervision;

(3) Facilities which will permit the operator either to disconnect the dispatch point circuits from the transmitter or to render the transmitter inoperative from any dispatch point under his supervision; and

(4) Facilities which will permit the operator to turn the transmitter carrier on and off at will.

§ 10.108 *Transmitter measurements.* (a) The licensee of each station shall employ a suitable procedure to determine that the carrier frequency of each transmitter, authorized to operate with a plate input power to the final radio frequency stage in excess of 3 watts, is maintained within the tolerance prescribed in this part. This determination shall be made, and the results thereof entered in the station records, in accordance with the following:

(1) When the transmitter is initially installed;

(2) When any change is made in the transmitter which may affect the carrier frequency or the stability thereof;

(3) At intervals not to exceed six months, for transmitters employing crystal-controlled oscillators;

(4) At intervals not to exceed one month, for transmitters not employing crystal-controlled oscillators.

(b) The licensee of each station shall employ a suitable procedure to determine that the plate power input to the final radio frequency stage of each base station or fixed station transmitter, authorized to operate with a plate input power to the final radio frequency stage in excess of 3 watts, does not exceed the maximum figure specified on the current station authorization. Where the transmitter is so constructed that a direct measurement of plate current in the final radio frequency stage is not practicable, the plate input power may be determined from a measurement of the cathode current in the final radio frequency stage. When the plate input to the final radio frequency stage is determined from a measurement of the cathode current, the required entry shall indicate clearly the quantities that were measured, the measured values thereof, and the method of determining the plate power input from the measured values. This determination shall be made, and the results thereof entered in the station records, in accordance with the following:

(1) When the transmitter is initially installed;

(2) When any change is made in the transmitter which may increase the transmitter power input;

(3) At intervals not to exceed six months.

(c) The licensee of each station shall employ a suitable proccdure to determine that the modulation of each transmitter, authorized to operate with a plate input power to the final radio frequency stage in excess of 3 watts, does not exceed the limits specified in this part. This determination shall be made and the results thereof entered in the station records, in accordance with the following:

(1) When the transmitter is initially installed;

(2) When any change is made in the transmitter which may affect the modulation characteristics;

(3) At intervals not to exceed six months.

(d) The determinations required by paragraphs (a), (b) and (c) of this section may, at the option of the licensee, be made by any qualified engineering measurement service, in which case, the required record entries shall show the name and address of the engineering measurement service as well as the name of the person making the measurements.

(e) In the case of mobile transmitters, the determinations required by paragraphs (a) and (c) of this section may be made at a test or service bench; provided, the measurements are made under load conditions equivalent to actual operating conditions, and provided further, that after installation the transmitter is given a routine check to determine that it is capable of being satisfactorily received by an appropriate receiver.

§ 10.109 [Reserved].

SUBPART D—OPERATING REQUIREMENTS

§ 10.151 *Operating procedure.* (a) All communications, regardless of their nature, shall be restricted to the minimum practical transmission time.

(b) Continuous radiation of an unmodulated carrier is prohibited except when required for test purposes.

(c) Zone and interzone stations shall employ the standard operating procedure prescribed by the Commission. Copies of such procedure are available for distribution to persons having a legitimate need therefor. Requests for copies should be addressed to the Secretary, Federal Communications Commission, Washington, 25, D. C.

(d) The Commission expects each licensee to take reasonable precautions to prevent unnecessary interference. If harmful interference develops, the Commission may require any or all stations to monitor the transmitting frequency prior to transmission.

(e) Tests may be conducted by any licensed station as required for proper station and system maintenance, but such tests shall be kept to a minimum and precautions shall be taken to avoid interference to other stations.

§ 10.152 *Station identification.* (a) The required identification for stations in these services shall be the assigned call signal.

(b) Nothing in this section shall be construed as prohibiting the transmission of additional station or unit identifiers which may be necessary for systems operation: *Provided, however,* Such additional identifiers shall not be composed of letters or letters and digits arranged in a manner which could be confused with an assigned radio station call signal.

(c) Except as indicated in paragraphs (d), (e), and (f) of this section, each station in these services shall transmit the required identification at the end of each transmission or exchange of transmissions, or once each thirty minutes of the operating period, as the licensee may prefer.

(d) A mobile station authorized to the licensee of the associated base station and which transmits only on the transmitting frequency of the associated base station is not required to transmit any identification.

(e) A mobile station which is either separately licensed to a different licensee, transmits on any frequency other than the transmitting frequency of the associated base station, or which has no associated base station shall transmit the required identification at the end of each transmission or exchange of transmissions, or once each thirty minutes of the operating period, as the licensee may prefer. Where election is made to transmit the required identification at thirty-minute intervals, a single mobile unit in each general geographic area may be assigned the responsibility for such transmission and thereby eliminate any necessity for every unit of the mobile station to transmit the required identification. For the purpose of this paragraph, the term "each general geographic area" means an area not smaller than a single city or county and not larger than a single district of a State where the district is administratively established for the service in which the radio system operates.

(f) Stations which are entirely automatic in their operation will be considered for exemption from the requirements of paragraph (c) of this section.

§ 10.153 *Suspension of transmission required.* The radiations of the transmitter shall be suspended immediately upon detection or notification of a deviation from the technical requirements of the station authorization until such deviation is corrected, except for transmissions concerning the immediate safety of life or property, in which case the transmissions shall be suspended as soon as the emergency is terminated.

§ 10.154 *Mobile installations in vehicles not under the continuous control of the licensee.* A mobile radio station licensed in these services may not be installed or maintained in a vehicle, aircraft, or vessel, which is not at all times controlled exclusively by the licensee, unless precautions have been taken to eliminate effectively the possibility of the licensed transmitter being operated during the period that the vehicle, aircraft, or vessel is not under the control of the licensee.

§ 10.155 *Operator requirements.* (a) All transmitter adjustments or tests during or coincident with the installation, servicing, or maintenance of a radio station, which may affect the proper operation of such station, shall be made by or under the immediate supervision and responsibility of a person holding a first or second class commercial radio operator license, either radiotelephone or radiotelegraph, who shall be responsible for the proper functioning of the station equipment: *Provided, however,* That only persons holding a first or second class commercial radiotelegraph operator license shall perform such functions at radiotelegraph stations transmitting by any type of the Morse Code.

(b) Except under the circumstances specified in paragraph (a) of this section, only a person holding a commercial radiotelegraph operator license or permit of any class issued by the Commission shall operate a station during the course of normal rendition of service when transmitting radiotelegraphy by any type of the Morse Code.

(c) Except under the circumstances specified in paragraphs (a) and (b) of this section, and except as limited by paragraph (g) through (j) of this section, an unlicensed person may operate a mobile station during the course of normal rendition of service when transmitting on frequencies above 25 Mc. after being authorized to do so by the station licensee.

(d) Except under the circumstances specified in paragraphs (a) and (b) of this section, and except as limited by paragraphs (g) through (j) of this section, only a person holding a commercial radio operator license or permit of any class issued by the Commission shall operate a mobile station during the course of normal rendition of service when transmitting on frequencies below 25 Mc.: *Provided, however,* That an unlicensed person, after being authorized to do so by the station licensee, may operate such a mobile station during the course of normal rendition of service when transmitting on frequencies below 25 Mc. while it is associated with and under the operational control of a base station of the same station licensee.

(e) Except under the circumstances specified in paragraphs (a) and (b) of this section, and except as limited by paragraphs (g) through (j) of this section, base stations and fixed stations shall be operated in accordance with the following when transmitting during the course of normal rendition of service:

(1) From a control point, only a person holding a commercial radio operator license or permit of any class issued by the Commission shall operate a base station or fixed station.

(2) From a dispatch point, an unlicensed person may operate a base station or fixed station after being authorized to do so by the station licensee: *Provided, however,* That such operation shall be under the direct supervision and responsibility of a person who holds a commercial radio operator license or permit of any class issued by the Commission, and who is on duty at a control point meeting the requirements of Subpart C of this part.

(f) Except under the circumstances specified in paragraph (a) of this section, and except as limited by paragraphs (g) through (j) of this section, no person, whether or not a licensed operator, is required to be in attendance at a station when transmitting during the course of normal rendition of service and when either:

(1) Transmitting for telemetering purposes or

(2) Retransmitting by self-actuating means a radio signal received from another radio station or stations.

(g) The provisions of this section authorizing certain unlicensed persons to operate certain stations when transmitting during the course of normal rendition of service, shall be applicable only to stations in the domestic service except that the provisions of paragraph (e) (2) of this section shall be applicable to stations in either the domestic or international service. For the purposes of this section, a station in the domestic service is one which is located within the United States, its territories or possessions and which, when communicating with other stations, is in communication exclusively with one or more other United States stations which are also located in the United States, its territories or possessions; a station in the international service is one which is not in the domestic service as just defined.

(h) The provisions of this section authorizing certain unlicensed persons to operate mobile stations shall not be construed to change or diminish in any respect the responsibility of station licensees to have and to maintain control over the stations licensed to them (including all transmitter units thereof), or for the proper functioning and operation of those stations (including all transmitter units thereof) in accordance with the terms of the licenses of those stations.

(i) Notwithstanding any other provisions of this section, unless the transmitter is so designed that none of the operations necessary to be performed during the course of normal rendition of service may cause off-frequency operation or result in any unauthorized radiation, such transmitter shall be operated by a person holding a first or second class commercial radio operator license (either radiotelephone or radiotelegraph as may be appropriate for the type of emission being used), issued by the Commission.

(j) Any reference in this section to a commercial radio operator license or permit of any class issued by the Commission shall not be construed to include Aircraft Radiotelephone Operator Authorizations.

§ 10.156 *Posting of operator license.* (a) The original license of each base or fixed station operator, other than an operator exclusively performing service and maintenance duties, shall be posted or kept immediately available at the place where he is on duty as an operator: *Provided, however,* That if an operator who is on duty holds a restricted radiotelephone operator permit of the card form (as distinguished from such document of the diploma form) or holds a valid license verification card (FCC Form 758–F) attesting to the existence of any other valid commercial radio operator license, he may have such permit or verification card, as the case may be, in his personal possession.

(b) Whenever a licensed operator is required for a mobile station, the original license of each such operator, other than an operator exclusively performing service and maintenance duties, shall be kept in his personal possession whenever he performs the duties of an operator at such station: *Provided,* That in lieu of an original license of the diploma form (as distinguished from such document of the card form) he may have in his personal possession a valid verification card attesting to its existence.

(c) The original license of every station operator who exclusively performs service and maintenance duties at that station shall be posted at the transmitter involved whenever the transmitter is in actual operation while service or maintenance work is being performed by him or under his immediate supervision and responsibility: *Provided,* That in lieu of posting his license, he may have on his person either his license or a valid verification card.

§ 10.157 *Transmitter identification card and posting of station license.* (a) The current authorization for each mobile station shall be retained as a permanent part of the station record, but need not be posted. An executed Transmitter Identification Card (FCC Form 452–C) shall be affixed to each mobile transmitter or associated control equipment. When the transmitter is not in view of and readily accessible to the operator, it is preferred that the Identification Card be affixed to the control equipment at the transmitter operating position. The following information shall be entered on the card by the permittee or licensee:

(1) Name of permittee or licensee;

(2) Station call signal assigned by the Commission;

(3) Exact location or locations of the transmitter records;

(4) Frequency or frequencies on which the transmitter to which attached is adjusted to operate; and

(5) Signature of the permittee or licensee, or a designated official thereof.

(b) The current authorization for each base or fixed station at a fixed location shall be posted at the principal control point of that station. At all other control points listed on the station authorization, a photocopy of the authorization shall be posted. In addition, an executed Transmitter Identification Card (FCC Form 452–C) shall be affixed to each transmitter operated at a fixed location, when such transmitter is not in view of, and readily accessible to, the operator at the principal control position.

(c) The current authorization for each base or fixed station authorized to operate at temporary locations, shall be either posted at the control point of the station or retained in an envelope or other container affixed to the transmitting apparatus, either inside or outside of the transmitter cabinet.

(d) In lieu of the Transmitter Identification Card, FCC Form 452–C, Revised, as required by paragraphs (a) and (b) of this section, a permittee or licensee may at his option employ a plate of metal or other substantial material which shall bear the title "Radio Transmitter Identification," and shall clearly display all the information required to be shown on the FCC Form 452–C, Revised, with the exception of the signature.

§ 10.158 *Inspection of stations.* All stations and records of stations in these services shall be made available for inspection at any time while the station is in operation or shall be made available for inspection upon reasonable request of an authorized representative of the Commission.

§ 10.159 *Inspection and maintenance of tower marking and associated control equipment.* The licensee of any radio station which has an antenna structure required to be painted or illuminated pursuant to the provisions of section 303 (q) of the Communications Act of 1934, as amended, and/or Part 17[1] of this chapter shall comply with the provisions of this section in the operation and maintenance of such tower marking as follows:

(a) Shall make an observation of the tower lights at least once each 24 hours either visually or by observing an automatic and properly maintained indicator designed to register any failure of such lights, to insure that all such lights are functioning properly as required; or alternatively,

(b) Shall provide and properly maintain an automatic alarm system designed to detect any failure of such lights and to provide indication of such failure to the licensee.

(c) Shall report immediately by telephone or telegraph to the nearest Airways Communication Station or office of Civil Aeronautics Administration any observed or otherwise known failure of a code or rotating beacon light or top light not corrected within thirty minutes, regardless of the cause of such failure. Further notification by telephone or telegraph shall be given immediately upon resumption of the required illumination.

(d) Shall inspect at intervals not to exceed three months all automatic or mechanical control devices, indicators and alarm systems associated with the tower lighting to insure that such apparatus is functioning properly.

(e) Shall exhibit all lighting from sunset to sunrise unless otherwise specified.

(f) Shall maintain a supply of spare bulbs sufficient for immediate replacement purposes at all times.

(g) Shall clean and repaint all towers as often as necessary to maintain good visibility.

[1] Section 303 (q) of the Communications Act of 1934, as amended, and Part 17 of this chapter contain, respectively, the Commission's authority and basic rules concerning the construction, marking or lighting of antenna towers or their supporting structures. Reference should be made to Part 17 for prescribed procedures and standards with respect to the Commission's consideration of proposed antenna structures.

§ 10.160 *Answers to notices of violations.* Any licensee receiving official notice of a violation of the terms of the Communications Act of 1934, as amended, any legislative act, treaty to which the United States is a party, or the rules and regulations of the Federal Communications Commission, shall, within 3 days from such receipt, send a written answer to the office of the Commission originating the official notice. If an answer cannot be sent, or an acknowledgment made within such 3-day period, acknowledgment and answer shall be made at the earliest practicable date with a satisfactory explanation of the delay. The answer to each notice shall be complete in itself and shall not be abbreviated by reference to other communications or answers to other notices. The reply shall set forth the steps taken to prevent a recurrence of such lack of attention or improper operation.

§ 10.161 *Content of station records.* Each licensee of a station in these services shall maintain records in accordance with the following:

(a) For all stations, the results and dates of the transmitter measurements required by these rules and the name of the person or persons making the measurements.

(b) For all stations, when service or maintenance duties are performed, the responsible operator shall sign and date an entry in the station record giving:

(1) Pertinent details of all duties performed by him or under his supervision;

(2) His name and address, and

(3) The class, serial number and expiration date of his license; *Provided,* That the information called for by subparagraphs (2) and (3) of this paragraph, so long as it remains the same, need be entered only once in the station record at any station where the responsible operator is regularly employed on a full time basis and at which his license is properly posted.

(c) For all base and fixed stations, the name or names of persons responsible for the operation of the transmitting equipment each day, together with the period of their duty. Each such person shall sign, not initial, the record both when coming on and when going off duty.

(d) For stations in the special emergency service a record showing the nature and time of each communication: *Provided, however,* That such stations, when operated by communications common carriers for line break bridging purposes, need merely record the hours of operation and the purpose for which used.

(e) For stations whose antenna or antenna supporting structure is required to be illuminated, a record in accordance with the following:

(1) The time the tower lights are turned on and off each day if manually controlled.

(2) The time the daily check of proper operation of the tower lights was made.

(3) In the event of any observed or otherwise known failure of a tower light:

(i) Nature of such failure.

(ii) Date and time the failure was observed, or otherwise noted.

(iii) Date, time and nature of the adjustments, repairs, or replacements that were made.

(iv) Identification of Airways Communication Station (CAA) notified of the failure of any code or rotating beacon light not corrected within thirty minutes, and the date and time such notice was given.

(v) Date and time notice was given to the Airways Communication Station (CAA) that the required illumination was resumed.

(4) Upon the completion of the periodic inspection required at least once each three months:

(i) The date of the inspection and the condition of all tower lights and associated tower lighting control devices, indicators and alarm systems.

(ii) Any adjustments, replacements, or repairs made to insure compliance with the lighting requirements and the date such adjustments, replacements, or repairs were made.

§ 10.162 *Form of station records.* (a) The records shall be kept in an orderly manner and in such detail that the data required are readily available. Key letters or abbreviations may be used if proper meaning or explanation is set forth in the record.

(b) Each entry in the records shall be signed by a person qualified to do so having actual knowledge of the facts to be recorded.

(c) No record or portion thereof shall be erased, obliterated, or willfully destroyed within the required retention period. Any necessary correction may be made only by the persons originating the entry who shall strike out the erroneous portion, initial the correction made and indicate the date of the correction.

§ 10.163 *Retention of station records.* Records required to be kept by this part shall be retained by the licensee for a period of at least one year.

§ 10.164 *Emergency operation of mobile stations at fixed locations.* During an emergency requiring a local communication center, any authorized mobile transmitter may be operated temporarily as a base station at a fixed location for a period not to exceed ten days. If operation for a longer period is required, such operation must be specifically authorized.

§ 10.165 *Communication with other stations.* In those cases which require cooperation or coordination of activities, stations in the Public Safety Radio Services may communicate with stations in other services and with U. S. Government stations.

SUBPART E—DEVELOPMENTAL OPERATION

§ 10.201 *Eligibility.* An authorization for developmental operation in any of the services under this part will be issued only to those persons who are eligible to operate stations in such service on a regular basis.

§ 10.202 *Showing required.* (a) Except as provided in paragraph (b) of this section, each application for developmental operation shall be accompanied by a showing that:

(1) The applicant has an organized plan of development leading to a specific objective;

(2) A point has been reached in the program where actual transmission by radio is essential to the further progress thereof;

(3) The program has reasonable promise of substantial contribution to the expansion or extension of the radio art, or is along lines not already investigated;

(4) The program will be conducted by qualified personnel;

(5) The applicant is legally and financially qualified, and possesses adequate technical facilities for conduct of the program as proposed; and

(6) The public interest, convenience, or necessity will be served by the proposed operation.

(b) The provisions of paragraph (a) of this section do not apply when an application is made for developmental operation solely for the reason that the frequency requested is restricted to such developmental use.

§ 10.203 *Limitations on use.* Stations used for developmental operation shall be constructed and used in such a manner as to conform with all of the technical and operating requirements of Subparts C and D of this part, unless deviation therefrom is specifically provided for in the station authorization.

§ 10.204 *Frequencies available for assignment.* Stations engaged in developmental operation may be authorized to use a frequency, or frequencies, available for the service in which they propose to operate. The number of channels assigned will depend upon the specific requirements of the developmental program itself, and the number of frequencies available in the particular area where the station will be operated.

§ 10.205 *Interference.* All developmental operation shall be subject to the condition that no harmful interference is caused to the operation of stations licensed on a regular basis under any part of the Commission's rules.

§ 10.206 *Special provisions.* (a) The developmental program as described by the applicant in the application for authorization shall be substantially followed unless the Commission shall otherwise direct.

(b) Where some phases of the developmental program are not covered by general rules of the Commission and the rules in this part, the Commission may specify supplemental or additional requirements or conditions in each case, as deemed necessary in the public interest, convenience, or necessity.

(c) The Commission may, from time to time, require a station engaged in developmental work to conduct special tests which are reasonable and desirable to the authorized developmental program.

§ 10.207 *Change or cancellation of authorization without hearing.* Every application for authority to engage in developmental operation shall be accompanied by a statement signed by the applicant in which it is agreed that any authorization issued pursuant thereto will be accepted with the express understanding of the applicant that it is subject to change in any of its terms or to cancellation in its entirety at any time, upon reasonable notice but without a hearing, if, in the opinion of the Commission, circumstances should so require.

§ 10.208 *Report of operation.* A report on the results of the developmental program shall be filed with and made a part of each application for renewal of authorization, or in cases where no renewal is requested, such report shall be filed within 60 days of the expiration of such authorization. Matters which the applicant does not wish to disclose publicly may be so labeled; they will be used solely for the Commission's information, and will not be publicly disclosed without permission of the applicant. The report shall include comprehensive and detailed information on the following:

(a) The final objective.
(b) Results of operation to date.
(c) Analysis of the results obtained.
(d) Copies of any published reports.
(e) Need for continuation of the program.
(f) Number of hours of operation on each frequency.

SUBPART F—POLICE RADIO SERVICE

§ 10.251 *Eligibility.* (a) Authorizations for stations in the Police Radio Service will be issued only to states, territories, possessions and other governmental subdivisions including counties, cities, towns and similar governmental entities.

(b) The eligibility set forth in paragraph (a) of this section includes governmental institutions in those cases where such institution is authorized by law to provide its own police protection.

§ 10.252 *Permissible communications.* (a) Stations in the Police Radio Service are primarily authorized to transmit:

(1) Communications directly relating to public safety and the protection of life or property.

(2) Communications essential to official police activities.

(b) Stations in the Police Radio Service are secondarily authorized to transmit communications essential to other official activities of the licensee pertaining to the public safety.

§ 10.253 *Points of communication.* (a) Police base stations are primarily authorized to intercommunicate with police mobile stations. Police mobile stations are primarily authorized to intercommunicate with base and other police mobile stations.

(b) Police base and mobile stations are secondarily authorized to intercommunicate with other stations in the Public Safety Radio Services and to transmit to receivers at fixed locations provided that no harmful interference will be caused to the service of any station transmitting to a point of communication for which that station is primarily authorized.

(c) Police fixed stations are authorized to intercommunicate with other fixed stations in the Public Safety Radio Services and to transmit to receivers at fixed locations.

(d) Police zone and interzone stations are authorized to intercommunicate in accordance with the operating procedure prescribed by the Commission. Copies of such procedure are available for distribution to persons having a legitimate need therefor. Requests for copies should be addressed to the Secretary, Federal Communications Commission, Washington, D. C.

§ 10.254 *Station limitations.* (a) Mobile relay stations in the Police Radio Service will be authorized only on frequencies above 152 Mc. and only where a showing of need can be made in accordance with either or both of the following conditions:

(1) Where a police radio system cannot function satisfactorily without communication between mobile units over a distance in excess of that which can be obtained by direct car-to-car communication.

(2) Where an integrated system of radiocommunication is desirable between two or more police licensees and where by the use of a mobile relay station, the integrated system provides an actual reduction in the number of frequencies needed in the area as compared to the number of frequencies which would be required if the same number of licensees operate separate systems.

(b) Subject to the provisions of § 10.154, communication units of a licensed police mobile station may be installed in any vehicle which in an emergency would require cooperation or coordination with police activities. This provision includes fire department vehicles, ambulances, emergency units of public utilities, lifeguard emergency units and rural school buses.

(c) Authorizations for interzone stations in the Police Radio Service will not be issued for more than one station within a zone. A zone is normally considered to be a single state. Any request for the rezoning of any state for the purpose of providing more than one interzone station shall be accompanied by a showing of need based either upon the volume of traffic or upon the necessity for more expeditious handling of traffic. In either event such a request shall be accompanied by comments thereon from all zone stations affected.

§ 10.255 *Frequencies available to the Police Radio Service.* (a) The frequencies or bands of frequencies listed herein are available for assignment to stations in the Police Radio Service subject to the conditions and limitations of this section.

(b) The frequencies listed in this section for mobile stations may be authorized for use at base stations only after coordination with other licensees in the area is effected and subject to the condition that no harmful interference will be caused to the service of any mobile station using the particular frequency. Evidence of the required coordination shall be submitted with any request for such use.

(c) Normally only one base and one mobile station frequency will be assigned to a licensee for mobile service operations. Additional frequencies may be assigned provided the request therefor is adequately supported by a satisfactory showing of need.

(d) The amount of separation between assignable frequencies listed in this section does not necessarily indicate the amount of frequency separation required for systems operation; accordingly, grants of adjacent channel assignments in all bands shall be in the discretion of the Commission.

(e) In addition to the frequencies assigned for mobile service operation, one base station frequency above 152 Mc. may be assigned as a common frequency to all licensees in a particular area to permit intersystem communication between base stations or mobile stations or both. This frequency use will not be authorized in any area where all available frequencies are required for independent systems.

(f) Control and repeater stations in the Police Radio Service may be authorized on a temporary basis to operate on frequencies available for base and mobile stations above 152 Mc., provided an adequate showing is made why such operations cannot be conducted on frequencies allocated to the Operational Fixed Service. Such operation on base or mobile frequencies will not be authorized initially nor renewed for periods in excess of one year. Any such authorization shall be subject to immediate termination if harmful interference is caused to the Mobile Service, or if the particular frequency is required for mobile service operations in the area concerned.

(g) The following tabulation indicates the frequency or bands of frequencies, the class of station(s) to which they are normally available and the specific assignment limitations, which are developed in paragraph (h) of this section.

| Frequency or band | Class of station(s) | Limitations |
|---|---|---|
| *Kc.* | | |

(h) Explanation of assignment limitations appearing in the frequency tabulation of paragraph (g) of this section:

(1) Limited to developmental operation only with the assigned frequency and particulars of operation specified in each authorization.

(2) Subject to no protection from interference due to the operation of industrial, scientific, and medical devices in this band.

(3) Assignable frequencies spaced by 40 kc. beginning with the frequencies 72.02 and 75.42 Mc. and ending with the frequencies 74.58 and 75.98 Mc. respectively, are available on a shared basis to operational fixed stations in the Police Radio Service on the condition that no harmful interference will be caused to the reception of television stations on Channels 4 or 5.

(4) Assignable frequencies spaced by 60 kc, beginning with the frequency 159.51 Mc. and ending with the frequency 161.79 Mc., are available on a shared basis to base and mobile stations in the Police Radio Service upon an adequate showing of need and upon the condition that no harmful interference will be

caused to the service of any existing or future station operating in the Railroad Radio Service.

(5) The use of this frequency may be authorized to base and mobile stations in the Police Radio Service on the condition that no harmful interference will be caused to the Maritime Mobile Service. Police operations at points within 150 miles of coastal areas and navigable gulfs, bays, rivers and lakes may be authorized only after a factual finding indicates that, on an engineering basis, no harmful interference will be caused to the Maritime Mobile Service.

(6) The use of this frequency is subject to the condition that no harmful interference will be caused to the service of any Canadian station.

(7) This frequency is available for assignment only in accordance with a geographical assignment plan.

(8) This frequency is reserved primarily for assignment to state police licensees. Assignment to other police licensees will be made only where the frequency is required for coordinated operation with the state police system to which the frequency is assigned. Any request for such assignment must be supported by a statement from the state police system concerned indicating that the assignment is necessary for coordination of police activities.

(9) This frequency is available for assignment to zone and interzone stations in the Police Radio Service for use with type A1 emission only and a maximum plate input power of 1000 watts to the final radio frequency stage of the transmitter.

(10) This frequency is authorized for use as a calling frequency; however, the transmission of operating signals or a single short radio telegram is permissible provided no harmful interference will be caused to any calling signals.

(11) This frequency may be used only during that period of time between 2 hours after local sunrise and 2 hours before local sunset.

(12) This frequency may be subject to change when the Atlantic City table of frequency allocations below 27.50 Mc. comes into force.

(13) Subject to the restrictions contained in paragraph (a) of § 10.106, base stations operating on this frequency and rendering service to state police mobile units may be authorized to use a maximum plate input power to the final radio frequency stage in excess of the maximum indicated in paragraph (b) of § 10.106 but, not in excess of 10,000 watts: *Provided*, That such operation will cause no harmful interference to the service of other stations.

(14) This frequency may be assigned to fixed stations in the Police Radio Service in Alaska for point to point radiotelephone communication, using type A3 emission and a maximum plate input power of 1000 watts to the final radio frequency stage of the transmitter.

(15) This frequency may be assigned to fixed stations in the Police Radio Service in Alaska for point-to-point radiotelephone communications, using type A3 emission with a maximum plate input power of 1,000 watts to the final radio frequency stage of the transmitter, subject to the condition that no harmful interference is caused to the service of any police station employing type A1 emission on this frequency including any operations conducted in accordance with outstanding regional agreements and further subject to the condition that no harmful interference is caused to the service of any station, which in the discretion of the Commission may have priority on the frequency with which interference results.

SUBPART G—FIRE RADIO SERVICE

§ 10.301 *Eligibility.* (a) Authorizations for stations in the Fire Radio Service will be issued only to states, territories, possessions and other governmental subdivisions including counties, cities, towns and similar governmental entities, and persons or organizations charged with specific fire protection activities.

(b) Applications from persons or organizations other than governmental subdivisions must be accompanied by a statement from the governmental subdivision having legal jurisdiction over the area to be served, supporting the request.

§ 10.302 *Permissible communications.* Stations in the Fire Radio Service are authorized to transmit:

(a) Communications directly relating to public safety and the protection of life or property.

(b) Communications essential to official Fire Department activities.

§ 10.303 *Points of communication.* (a) Fire base stations are primarily authorized to intercommunicate with fire mobile stations. Fire mobile stations are primarily authorized to intercommunicate with base and other fire mobile stations.

(b) Fire base and mobile stations are secondarily authorized to intercommunicate with other stations in the Public Safety Radio Services and to transmit to receivers at fixed locations provided that no harmful interference will be caused to the service of any station transmitting to a point of communication for which that station is primarily authorized.

(c) Fire fixed stations are authorized to intercommunicate with other fixed stations in the Public Safety Radio Services and to transmit to receivers at fixed locations.

§ 10.304 *Station limitations.* (a) Mobile relay stations in the Fire Radio Service will be authorized only on frequencies above 152 Mc. and only where a showing of need can be made in accordance with either or both of the following conditions:

(1) Where a fire radio system cannot function satisfactorily without communication between mobile units over a distance in excess of that which can be obtained by direct car-to-car communication.

(2) Where an integrated system of radiocommunication is desirable between two or more fire licensees and where, by the use of a mobile relay station, the integrated system provides an actual reduction in the number of frequencies needed in the area as compared to the number of frequencies which would be required if the same number of licensees operate separate systems.

(b) Subject to the provisions of § 10.154 communication units of a licensed fire mobile station may be installed in emergency vehicles, other than fire department vehicles, which may be alerted during a fire emergency. This provision includes emergency units of public utilities and water departments.

§ 10.305 *Frequencies available to the Fire Radio Service.* (a) The frequencies or bands of frequencies listed in this section are available for assignment to stations in the Fire Radio Service subject to the conditions and limitations of this section.

(b) The frequencies listed in this section for mobile stations may be authorized for use at base stations only after coordination with other licensees in the area is effected and subject to the condition that no harmful interference will be caused to the service of any mobile station using the particular frequency. Evidence of the required coordination shall be submitted with any request for such use.

(c) Normally, only one base and one mobile station frequency will be assigned to a licensee for mobile service operations. Additional frequencies may be assigned provided the request therefor is adequately supported by a satisfactory showing of need.

(d) The amount of separation between assignable frequencies listed in this section does not necessarily indicate the amount of frequency separation required for systems operation; accordingly, grants of adjacent channel assignments in all bands shall be in the discretion of the Commission.

(e) Control and repeater stations in the Fire Radio Service may be authorized on a temporary basis to operate on frequencies available for base and mobile stations above 152 Mc., provided an adequate showing is made why such operation cannot be conducted on frequencies allocated to the Operational Fixed Service. Such operation on base or mobile frequencies will not be authorized initially nor renewed for periods in excess of one year. Any such authorization shall be subject to immediate termination if harmful interference is caused to the Mobile Service or if the particular frequency is required for mobile service operations in the area concerned.

(f) The following tabulation indicates the frequency or bands of frequencies, the class of station(s) to which they are normally available, and the specific assignment limitations, which are developed in paragraph (g) of this section:

| Frequency or band | Class of station(s) | Limitations |

| 26000 to 30000 | do | 1 |

(g) Explanation of assignment limitations appearing in the frequency tabulation of paragraph (f) of this section:

(1) Limited to developmental operation only with the assigned frequency and particulars of operation specified in each authorization.

(2) Subject to no protection from interference due to the operation of industrial, scientific, and medical devices in this band.

(3) Assignable frequencies spaced by 40 kc. beginning with the frequencies 72.02 and 75.42 Mc. and ending with frequencies 74.58 and 75.98 Mc., respectively, are available on a shared basis to operational fixed stations in the Fire Radio Service on the condition that no harmful interference will be caused to the reception of television stations on Channels 4 or 5.

(4) Assignable frequencies spaced by 60 kc., beginning with the frequency 159.51 Mc. and ending with the frequency 161.79 Mc., are available on a shared basis to base and mobile stations in the Fire Radio Service, upon an adequate showing of need and upon the condition that no harmful interference will be caused to the service of any existing or future station in the Railroad Radio Service.

(5) This frequency may be assigned to stations in the Fire Radio Service, only at points within 150 miles of New York, N. Y.

(6) The maximum plate power input to the final radio frequency stage of any transmitter authorized to operate on this frequency shall not exceed 3 watts.

(7) This frequency may be subject to change when the Atlantic City table of frequency allocations below 27.50 Mc. comes into force.

SUBPART H—FORESTRY-CONSERVATION RADIO SERVICE

§ 10.351 *Eligibility.* (a) Authorizations for stations in the Forestry-Conservation Radio Service will be issued only to states, territories, possessions and other governmental subdivisions including counties, cities, towns and similar governmental entities and persons or organizations charged with specific forestry-conservation activities.

(b) Applications from persons or organizations other than governmental subdivisions must be accompanied by a statement from the governmental subdivision having legal jurisdiction over the area to be served, supporting the request.

§ 10.352 *Permissible communications.* Stations in the Forestry-Conservation Radio Service are authorized to transmit:

(a) Communications directly relating to public safety and the protection of life or property including communications essential to the prevention, detection and suppression of forest fires.

(b) Communications essential to official forestry-conservation activities.

§ 10.353 *Points of communication.* (a) Forestry-Conservation base stations are primarily authorized to intercommunicate with forestry-conservation mobile stations. Forestry-conservation mobile stations are primarily authorized to intercommunicate with base and other forestry-conservation mobile stations.

(b) Forestry-Conservation base and mobile stations are secondarily authorized to intercommunicate with other stations in the Public Safety Radio Services and to transmit to receivers at fixed locations provided that no harmful interference will be caused to the service of any station transmitting to a point of communication for which that station is primarily authorized.

(c) Forestry-Conservation fixed stations are authorized to intercommunicate with other fixed stations in the Public Safety Radio Services and to transmit to receivers at fixed locations.

§ 10.354 *Station limitations.* (a) Mobile relay stations in the Forestry-Conservation Radio Service will be authorized only on frequencies above 152 megacycles and only where a showing of need can be made in accordance with either or both of the following conditions:

(1) Where a forestry-conservation radio system cannot function satisfactorily without communication between mobile units over a distance in excess of that which can be obtained by direct car-to-car communication.

(2) Where an integrated system of radiocommunication is desirable between two or more forestry-conservation licensees and where by the use of a mobile relay station, the integrated system provides an actual reduction in the number of frequencies needed in the area as compared to the number of frequencies which would be required if the same number of licensees operate separate systems.

(b) Subject to the provisions of § 10.154 communications units of a licensed forestry-conservation mobile station may be installed in vehicles of forestry cooperators, or other persons having a direct responsibility in the prevention, detection and suppression of forest fires.

§ 10.355 *Frequencies available to the Forestry-Conservation Radio Service.* (a) The frequencies or bands of frequencies listed in this section are available for assignment to stations in the Forestry-Conservation Radio Service subject to the conditions and limitations of this section.

(b) The amount of separation between assignable frequencies listed in this section does not necessarily indicate the amount of frequency separation required for systems operation; accordingly, grants of adjacent channel assignments in all bands shall be in the discretion of the Commission.

(c) Control and repeater stations in the Forestry-Conservation Radio Service may be authorized on a temporary basis to operate on frequencies available for base and mobile stations above 152 Mc., provided an adequate showing is made why such operation cannot be conducted on frequencies allocated to the Operational Fixed Service. Such operation on base or mobile frequencies will not be authorized initially nor renewed for periods in excess of one year. Any such authorization shall be subject to immediate termination if harmful interference is caused to the Mobile Service or if the particular frequency is required for mobile service operations in the area concerned.

(d) The following tabulation indicates the frequency or bands of frequencies, the class of stations to which they are normally available, and the specific assignment limitations, which are developed in paragraph (e) of this section:

| Frequency or band | Class of station(s) | Limitations |
|---|---|---|
| *Kc.* | | |
| 2212 | Base and mobile | 6, 12 |
| 2228 | do | 6, 12 |
| 2236 | do | 6, 12 |
| 2244 | do | 6, 12 |
| *Mc.* | | |
| 30.86 | do | 11 |
| 30.90 | do | 11 |
| 30.94 | do | 11 |
| 30.98 | do | 7, 9, 10, 11 |
| 31.02 | do | 7, 9, 10, 11 |
| 31.06 | do | 7, 9, 10, 11 |
| 31.10 | do | 7, 9, 10, 11 |
| 31.14 | do | 7, 9, 10 |
| 31.18 | do | 7, 9, 10 |
| 31.22 | do | 7, 9, 10 |
| 31.26 | do | 7, 9, 10 |
| 31.30 | do | 7, 9, 10 |
| 31.34 | do | 7, 9, 10 |
| 31.38 | do | 7, 9, 10 |
| 31.42 | do | 7, 9, 10 |
| 31.46 | do | 7, 9, 10 |
| 31.50 | do | 7, 9, 10 |
| 31.54 | do | 7, 9, 10 |
| 31.58 | do | 7, 9, 10 |
| 31.62 | do | 7, 9, 10 |
| 31.66 | do | 7, 9, 10 |

UNIVERSITY OF MICHIGAN LIBRARIES

| Frequency or band | Class of station(s) | Limitations |
|---|---|---|
| *Mc.* | | |
| 31.70 | Base and mobile | 7, 9, 10 |
| 31.74 | do | 7, 9, 10 |
| 31.78 | do | 7, 9, 10 |
| 31.82 | do | 7, 9, 10 |
| 31.86 | do | 7, 9, 10 |
| 31.90 | do | 7, 9, 10 |
| 31.94 | do | 7, 9, 10 |

| 890 to 940 | Operational fixed | 1, 2 |
| 952 to 960 | do | 1 |
| 1850 to 1990 | do | 1 |
| 2110 to 2200 | do | 1 |
| 2450 to 2500 | Base and mobile and operational fixed. | 1, 2 |
| 2500 to 2700 | Operational fixed | 1 |
| 3500 to 3700 | Base and mobile | 1 |
| 6425 to 6575 | do | 1 |
| 6575 to 6875 | Operational fixed | 1 |
| 9800 to 9900 | do | 1 |
| 11700 to 12200 | Base and mobile | 1 |
| 12200 to 12700 | Operational fixed | 1 |
| 16000 to 18000 | do | 1, 2 |
| 26000 to 30000 | do | 1 |

(e) Explanation of assignment limitations appearing in the frequency tabulation of paragraph (d) of this section:

1. Limited to developmental operation only with the assigned frequency and particulars of operation specified in each authorization.

2. Subject to no protection from interference due to the operation of industrial scientific, and medical devices in this band.

3. Assignable frequencies spaced by 40 kc. beginning with the frequencies 72.02 and 75.42 Mc. and ending with the frequencies 74.58 and 75.98 Mc. respectively, are available on a shared basis to operational fixed stations in the Forestry-Conservation Radio Service on the condition that no harmful interference will be caused to the reception of television stations on Channels 4 or 5.

4. Assignable frequencies spaced by 60 kc. beginning with the frequency 159.51 Mc. and ending with the frequency 161.79 Mc. are available on a shared basis to base and mobile stations in the Forestry-Conservation Radio Service upon an adequate showing of need and upon the condition that no harmful interference will be caused to the service of any existing or future station operating in the Railroad Radio Service.

5. The use of this frequency may be authorized to base and mobile stations in the Forestry Conservation Radio Service on the condition that no harmful interference will be caused to the Maritime Mobile Service. Forestry-Conservation operations at points within 150 miles of coastal areas and navigable gulfs, bays, rivers and lakes may be authorized only after a factual finding indicates that, on an engineering basis, no harmful interference will be caused to the Maritime Mobile Service.

6. The use of this freuency is subject to the condition that no harmful interference will be caused to the service of any Canadian station.

7. This frequency is available for assignment only in accordance with a geographical assignment plan.

8. This frequency will be assigned only to licensees directly responsible for the prevention, detection, and suppression of forest fires, subject to the condition that no harmful interference will be caused to the service of any U. S. Government station.

9. This frequency may be used for conservation activities upon the condition that no harmful interference will be caused to the service of any station using the frequency for forest fire prevention, detection and suppression.

10. This frequency is reserved primarily for assignment to state licensees. Assignments to other licensees will be made only where the frequency is required for coordinated operation with the state system to which the frequency is assigned. Any request for such assignment must be supported by a statement from the state system concerned, indicating that the assignment is necessary for coordination of activities.

11. This frequency is shared with the Urban Transit Radio Service.

12. This frequency may be subject to change when the Atlantic City table of frequency allocations below 27.50 Mc. comes into force.

13. This frequency will be assigned for use only in areas east of the Mississippi River.

14. This frequency will be assigned for use only in areas west of the Mississippi River.

15. In addition to agencies responsible for forest fire prevention, detection and suppression, this frequency may be assigned to conservation agencies which do not have forest fire responsibilities: *Provided*, That such assignment is necessary to permit mobile relay operation by such agencies: *And provided*, That such operation will cause no harmful interference to any U. S. Government station.

SUBPART I—HIGHWAY MAINTENANCE RADIO SERVICE

§ 10.401 *Eligibility.* Authorizations for stations in the Highway Maintenance Radio Service will be issued only to states, territories, possessions, and other governmental subdivisions including counties, cities, towns and similar governmental entities.

§ 10.402 *Permissible communications.* Stations in the Highway Maintenance Radio Service are authorized to transmit:

(a) Communications directly relating to public safety and the protection of life or property.

(b) Communications essential to official activities directly relating to the maintenance, supervision and operation of public highways.

§ 10.403 *Points of communication.* (a) Highway Maintenance base stations are primarily authorized to intercommunicate with Highway Maintenance mobile stations. Highway Maintenance mobile stations are primarily authorized to intercommunicate with base and other Highway Maintenance mobile stations.

(b) Highway Maintenance base and mobile stations are secondarily authorized to intercommunicate with other stations in the Public Safety Radio Services and to transmit to receivers at fixed locations provided that no harmful interference will be caused to the service of any station transmitting to a point of communication for which that station is primarily authorized.

(c) Highway Maintenance fixed stations are authorized to intercommunicate with other fixed stations in the Public Safety Radio Services and to transmit to receivers at fixed locations.

§ 10.404 *Station limitations.* (a) Mobile relay stations in the Highway Maintenance Radio Service will be authorized only on frequencies above 152 megacycles and only where a showing of need can be made in accordance with either or both of the following conditions:

(1) Where a Highway Maintenance radio system cannot function satisfactorily without communication between mobile units over a distance in excess of that which can be obtained by direct car-to-car communication.

(2) Where an integrated system of radio-communication is desirable between two or more Highway Maintenance licensees and where by the use of a mobile relay station, the integrated system provides an actual reduction in the number of frequencies needed in the area as compared to the number of frequencies which would be required if the same number of licensees operate separate systems.

(b) Subject to the provisions of § 10.154, communication units of a licensed Highway Maintenance mobile station may be installed in vehicles of contractors or other persons having a direct responsibility for maintenance, supervision or operation of public highways.

(c) Each operator of a station in the Highway Maintenance Radio Service when employing a frequency shared with the Special Emergency Radio Service and designated by limitation note 6 in § 10.405 (e) shall listen on the licensed frequency of the station prior to transmitting and shall not transmit until it has been reasonably determined that harmful interference will not be caused to any authorized communication in progress on the frequency.

§ 10.405 *Frequencies available to the Highway Maintenance Radio Service.* (a) The frequencies or bands of frequencies listed in this section are available for assignment to stations in the Highway Maintenance Radio Service subject to the conditions and limitations of this section.

(b) The amount of separation between assignable frequencies listed in this section does not necessarily indicate the amount of frequency separation required for systems operation; accordingly, grants of adjacent channel assignments in all bands shall be in the discretion of the Commission.

(c) Normally, not more than two frequencies will be assigned to a licensee for mobile service operations. Additional frequencies may be assigned provided the request therefor is adequately supported by a satisfactory showing of need.

(d) Control and repeater stations in the Highway Maintenance Radio Service may be authorized on a temporary basis to operate on frequencies available for base and mobile stations above 152 Mc., provided an adequate showing is made why such operation cannot be conducted on frequencies allocated to the Operational Fixed Service. Such operation on base or mobile frequencies will not be authorized initially, nor renewed for periods in excess of one year. Any such authorization shall be subject to immediate termination if harmful interference is caused to the mobile service or if the particular frequency is required for mobile service operations in the area concerned.

(e) The following tabulation indicates the frequency or bands of frequencies, the class of station(s) to which they are normally available, and the specific assignment limitations, which are developed in paragraph (f) of this section:

| Frequency or band | Class of station(s) | Limitations |
|---|---|---|
| *Mc.* | | |
| 33.02 | Base and mobile | 6 |
| 33.06 | do | 6 |
| 33.10 | do | 6 |
| 37.90 | do | 6 |
| 37.94 | do | 6 |
| 37.98 | do | 6 |
| 46.88 | do | 7, 8 |
| 46.90 | do | 7, 8 |
| 46.94 | do | 7, 8 |
| 46.98 | do | 7, 8 |
| 47.02 | do | 7, 8 |
| 47.06 | do | 7, 8 |
| 47.10 | do | 7, 8 |
| 47.14 | do | 7, 8 |
| 47.18 | do | 7, 8 |
| 47.22 | do | 7, 8 |
| 47.26 | do | 7, 8 |
| 47.30 | do | 7, 8 |
| 47.34 | do | 7, 8 |
| 47.38 | do | 7, 8 |
| 72.02 to 74.58 | Operational fixed | 3 |
| 75.42 to 75.98 | do | 3 |
| 156.99 | Base and mobile | 5 |
| 157.05 | do | 9 |
| 157.11 | do | 9 |
| 157.29 | do | 5 |
| 157.35 | do | 5 |
| 157.11 | do | 5 |
| 159.51 to 161.79 | do | 4 |
| 453.05 | do | 1 |
| 453.15 | do | 1 |
| 453.25 | do | 1 |
| 453.35 | do | 1 |
| 453.45 | do | 1 |
| 453.55 | do | 1 |
| 453.65 | do | 1 |
| 453.75 | do | 1 |
| 453.85 | do | 1 |
| 453.95 | do | 1 |
| 458.05 | do | 1 |
| 458.15 | do | 1 |
| 458.25 | do | 1 |
| 458.35 | do | 1 |
| 458.45 | do | 1 |
| 458.55 | do | 1 |
| 458.65 | do | 1 |
| 458.75 | do | 1 |
| 458.85 | do | 1 |
| 458.95 | do | 1 |
| 890-940 | Operational fixed | 1, 2 |
| 952 to 960 | do | 1 |
| 1850 to 1990 | do | 1 |
| 2110 to 2200 | do | 1 |
| 2450 to 2500 | Base and mobile and operational fixed. | 1, 2 |
| 2500 to 2700 | Operational fixed | 1 |
| 3500 to 3700 | Base and mobile | 1 |
| 6425 to 6575 | do | 1 |
| 6575 to 6875 | Operational fixed | 1 |
| 9800 to 9900 | do | 1 |
| 11700 to 12200 | Base and mobile | 1 |
| 12200 to 12700 | Operational fixed | 1 |
| 16000 to 18000 | do | 1, 2 |
| 26000 to 30000 | do | 1 |

(f) Explanation of assignment limitations appearing in the frequency tabulation of paragraph (e) of this section:

(1) Limited to developmental operation only with the assigned frequency and particulars of operation specified in each authorization.

(2) Subject to no protection from interference due to the operation of industrial, scientific, and medical devices in this band.

(3) Assignable frequencies spaced by 40 kc beginning with the frequencies 72.02 and 75.42 Mc, and ending with the frequencies 74.58 and 75.98 Mc, respectively, are available on a shared basis to operational fixed stations in the Highway Maintenance Radio Service on the condition that no harmful interference will be caused to the reception of television stations on Channels 4 or 5.

(4) Assignable frequencies spaced by 60 kc, beginning with the frequency 159.51 Mc. and ending with the frequency 161.79 Mc. are available on a shared basis to base and mobile stations in the Highway Maintenance Radio Service upon an adequate showing of need and upon the condition that no harmful interference will be caused to the service of any existing or future station operating in the Railroad Radio Service.

(5) The use of this frequency may be authorized to base and mobile stations in the Highway Maintenance Radio Service on the condition that no harmful interference will be caused to the Maritime Mobile Service. Highway Maintenance operations at points within 150 miles of coastal areas and navigable gulfs, bays, rivers and lakes may be authorized only after a factual finding indicates that, on an engineering basis, no harmful interference will be caused to the Maritime Mobile Service.

(6) This frequency is shared with the Special Emergency Radio Service.

(7) This frequency will be assigned only in accordance with a geographical assignment plan.

(8) This frequency is reserved primarily for assignment to Highway Maintenance systems operated by states. The use of this frequency by other Highway Maintenance licensees will be authorized only where such use is necessary to coordinate activities with the particular state to which the frequency is assigned. Any request for such use must be supported by a statement from the state concerned.

(9) This frequency will not be assigned to stations in the Highway Maintenance Radio Service after April 28, 1952. Highway Maintenance stations licensed to use this frequency prior to April 28, 1952, may continue such use provided that no harmful interference is caused to any government or non-government radio operation.

SUBPART J—SPECIAL EMERGENCY RADIO SERVICE

§ 10.451 *Availability of service.* Special Emergency Radio Service is available only to the extent and for the purposes described in succeeding sections of this subpart. The eligibility requirements, classes of stations available to each eligible group, permissible communications in accordance with eligibility, and other applicable conditions of use are set forth as separate sections of this subpart.

§ 10.452 *Disaster relief organizations*—(a) *Eligibility.* Organizations established for disaster relief purposes and which have an emergency communications plan involving the use of radio are eligible in this service.

(b) *Eligibility showing.* The initial application from a disaster relief organization shall be accompanied by a copy of the charter or other authority under which the organization was established and a copy of the communications plan with a full explanation as to how the requested radio facilities would be used under such plan and integrated into any other communication facilities which normally would be available to assist in the alleviation of the emergency condition.

(c) *Class and number of stations available.* Disaster relief organizations may be authorized to operate an unlimited number of base, mobile and fixed stations.

(d) *Permissible communications.* Except for transmissions which are necessary for drills and tests as permitted by § 10.151 (e), stations licensed to disaster relief organizations may be used only for the transmission of communications relating to the safety of life or property, the establishment and maintenance of temporary relief facilities, and the alleviation of the emergency situation during periods of actual or impending emergency, or disaster, and until substantially normal conditions are restored.

§ 10.453 *Physicians and veterinarians*—(a) *Eligibility.* Physicians and veterinarians are eligible in this service: *Provided*, That the applicant can qualify under the following conditions:

(1) The applicant is a physician or veterinarian having a regular practice in a rural area.

(2) For the purpose of this part a rural area is considered to be any area outside of the established or accepted boundaries of towns or communities having a population in excess of 2,500 inhabitants.

(b) *Eligibility showing.* The initial application from a physician or veterinarian shall be accompanied by a statement in sufficient detail to permit a ready determination of the applicant's eligibility. Any subsequent application may refer to information previously filed if there has been no change in the status of the applicant's eligibility. In the event changes have occurred which affect the original eligibility statements, a new showing must accompany the application. The initial eligibility showing must contain as a minimum the information indicated below:

(1) A physician or veterinarian desiring to establish eligibility based on a rural area practice shall describe the radio communication facilities desired and the rural area to be served.

(c) *Class and number of stations available.* Each physician or veterinarian normally may be authorized to operate not more than one base station and two mobile units. Additional base stations or mobile units will be authorized only in exceptional circumstances when the applicant can show a specific need therefor.

(d) *Permissible communications.* Except for test transmissions as permitted by § 10.151 (e), stations licensed to physicians or veterinarians may be used only for the transmission of messages pertaining to the safety of life or property and urgent messages relating to the medical duties of the licensee.

§ 10.454 *Ambulance operators and rescue organizations*—(a) *Eligibility.* Persons or organizations operating an emergency ambulance service or rescue squad are eligible in this service.

(b) *Eligibility showing.* The initial application from a person or organization operating an ambulance service or rescue squad shall be accompanied by a statement describing the radio communication facilities desired and indicating how they would be used to enhance the safety of human life in the service being rendered. The statements also shall indicate the number of vehicles actually engaged in the emergency operation.

(c) *Class and number of stations available.* Each ambulance operator or rescue squad normally may be authorized to operate not more than one base station and a number of mobile units, excluding mobile units of the hand or pack carried type, not in excess of the number of vehicles actually engaged in the emergency operation. Mobile units of the hand carried or pack carried type may be authorized to an extent not to exceed two such units for each radio equipped ambulance or rescue squad vehicle. Additional base stations or mobile units will be authorized only in exceptional circumstances when the applicant can show a specific need therefor.

(d) *Permissible communications.* Except for test transmissions as permitted by § 10.151 (e), stations licensed to ambulance operators or rescue squads may be used only for the transmission of messages pertaining to the safety of life or property and urgent messages necessary for the rendition of an efficient ambulance or emergency rescue service.

§ 10.455 *Beach patrols*—(a) *Eligibility.* Persons or organizations operating beach patrols having responsibility for life-saving activities are eligible in this service.

(b) *Eligibility showing.* The initial application from a person or organization operating a beach patrol shall be accompanied by a statement describing the radio communication facilities desired and the area served by the beach patrol. The statement shall also clearly indicate the proposed method of operation and the number and classes of stations required.

(c) *Class and number of stations available.* Eligibles in this category will be authorized to operate base, mobile, and fixed stations in the stated area served by the beach patrol. The number of such stations requested shall be fully justified in the eligibility showing.

(d) *Permissible communications.* Except for test transmissions as permitted by § 10.151 (e) stations licensed to persons or organizations operating beach patrols may be used only for the transmission of messages pertaining to the safety of life or property.

§ 10.456 *School buses*—(a) *Eligibility.* Persons or organizations operating school buses having regular routes into rural areas are eligible in this service.

(b) *Eligibility showing.* The initial application from a person or organization operating a school bus service shall be accompanied by a statement describing the radio communication facilities desired. The statement shall also indicate the school or schools being served and describe the area in which the service is operated. If the applicant is not a government sub-division the statement shall indicate the authority under which the school buses are being operated and the tenure of any contractual agreement in effect.

(c) *Class and number of stations available.* Each school bus operator normally may be authorized to operate not more than one base station and a number of mobile units not in excess of the total of the number of buses and maintenance vehicles regularly engaged in the school bus operation. Additional base stations or mobile units will be authorized only in exceptional circumstances when the applicant can show a specific need therefor.

(d) *Permissible communications.* Except for test transmissions as permitted by § 10.151 (e), stations licensed to school bus operators may be used only for the transmission of messages pertaining to the safety of life or property or urgent messages relating to buses which have become inoperative on regular runs.

§ 10.457 *Communication standby facilities*—(a) *Eligibility.* Persons or organizations operating communication circuits are eligible for standby radio facilities in this service: *Provided,* That the applicant can qualify under either of the following conditions:

(1) The applicant is a communications common carrier.

(2) The applicant is a person or organization operating communications circuits which normally carry essential communications of such a nature that any disruption thereof will endanger life or public property.

(b) *Eligibility showing.* The initial application from an eligible in this category proposing to operate a radio standby facility for other normal communication circuits shall be accompanied by a statement describing the radio communication facilities desired and the proposed method of operation. When appropriate, the statement shall include a description of the messages normally being carried and explain how a disruption thereof will endanger life or public property.

(c) *Class and number of stations available.* Eligibles in this category may be authorized to operate an unlimited number of fixed stations as standby radio facilities. Any such fixed station may be licensed for operation either at a specified location or at any temporary location within a specified area. In the latter case the area of desired operation must be specified by the applicant.

(d) *Permissible communications.* Except for test transmission as permitted by § 10.151 (e), stations licensed for communication circuit standby facilities may be used only during periods when the normal circuits are inoperative due to circumstances beyond the control of the user. During such periods the radio facilities may be used to transmit any communication which would normally be carried by the regular circuits.

§ 10.458 *Establishments in isolated areas*—(a) *Eligibility.* Persons or organizations maintaining establishments in isolated areas where public communication facilities are not available and where the use of radio is the only feasible means of establishing communication with a center of population, or other point from which emergency assistance might be obtained if needed, are eligible in this service.

(b) *Eligibility showing.* The initial application requesting a station authorization for an establishment in an isolated area shall be accompanied by a statement describing the radio communication facilities desired, the applicant's need therefor, and the proposed method of operation, including the location, class of station and name of licensee of the station with which communication is requested. The statement shall also describe the status of public communication facilities in the area of the applicant's establishment and indicate the results of any attempts the applicant may have made to obtain public communication service. In the event radio communications service is to be furnished the proposed station by another station which is not licensed to the applicant, a statement shall be submitted from the licensee of the station involved indicating that the proposed service will be rendered.

(c) *Class and number of stations available.* Persons or organizations in this category may be authorized to operate not more than one fixed station at any isolated establishment and in addition not more than one fixed station in a center of population.

(d) *Permissible communications.* Except for test transmissions as permitted by § 10.151 (e), stations licensed for use at establishments in isolated areas may be used only during an actual or impending emergency endangering life, health or property for the transmission of essential communications arising from the emergency. The transmission of routine or non-emergency communications is strictly prohibited.

(e) *Communication service rendered and received.* (1) The licensee of a fixed station at an establishment in an isolated area shall make the communication facilities of such station available at no charge to any person desiring the transmission of any communication permitted by paragraph (d) of this section.

(2) For the purpose of providing the communications link desired the licensee of a fixed station at an establishment in an isolated area either may be the licensee of a similar station at another location or may obtain communication service under a mutual agreement from the licensee of any station in the Public Safety Radio Services or any other station which is authorized to communicate with the special emergency fixed station.

§ 10.459 *Emergency repair of public communications facilities.* (a) Communications common carriers are eligible in this service for radio facilities to be used in effecting expeditious repairs to interruptions of public communications facilities where such interruptions have resulted in disabling intercity circuits or service to a multiplicity of subscribers in a general area.

(b) *Eligibility showing.* The initial application from a communications common carrier under the provisions of this section shall be accompanied by a statement describing the radio communication facilities desired and the proposed method of use under such emergency conditions as the applicant expects to arise. The statement shall also clearly indicate the number and classes of stations required in the proposed operation.

(c) *Class and number of stations available.* Eligibles in this category may be authorized to operate base, mobile and fixed stations. The number of such stations requested shall be fully justified in the eligibility showing.

(d) *Permissible communications.* Except for test transmissions as permitted by § 10.151 (e) stations authorized under the eligibility provisions of this section may be used only, when no other means of communication is readily available, for the transmission of messages relating to the safety of life and property and messages which are necessary for the efficient restoration of the public communication facilities which have been disrupted.

§ 10.460 *Points of communication.* (a) Special emergency base stations are primarily authorized to intercommunicate with special emergency mobile stations. Special emergency mobile stations are primarily authorized to intercommunicate with base and other special emergency mobile stations.

(b) Special emergency base and mobile stations are secondarily authorized to intercommunicate with other stations in the Public Safety Radio Services and to transmit to receivers at fixed locations: *Provided,* That no harmful interference will be caused to the service of any station transmitting to a point of communication for which that station is primarily authorized.

(c) Special emergency fixed stations are authorized to intercommunicate with other stations in the Public Safety Radio Services and to transmit to receivers at fixed locations. Such stations are also authorized to intercommunicate with any other station which is authorized to communicate with the special emergency fixed station.

§ 10.461 *Station limitations.* (a) Mobile relay stations will not be authorized in the Special Emergency Radio Service.

(b) Except for fixed stations operating on frequencies assigned under the provisions of limitation note 10 of § 10.462 (f), each operator of a station in the Special Emergency Radio Service shall listen on the licensed frequency of the station prior to transmitting and shall not transmit until it has been reasonably determined that harmful interference will not be caused to any authorized communication in progress on the frequency.

(c) Where a radio station authorization in the Special Emergency Radio Service is held by a person or organization engaging in activities beyond the scope of those indicated in the eligibility provisions of this service the operation of such station shall be strictly confined to those activities on which the eligibility was established except for messages relating to the safety of life.

§ 10.462 *Frequencies available to the Special Emergency Radio Service.* (a) The frequencies or bands of frequencies listed herein are available for assignment to stations in the Special Emergency Radio Service subject to the conditions and limitations of this section.

(b) The amount of separation between assignable frequencies listed in this section does not necessarily indicate the amount of frequency separation required for systems operation; accordingly, grants of adjacent channel assignments in all bands shall be in the discretion of the Commission.

(c) The operation of mobile systems in the Special Emergency Radio Service will be restricted to the use of only one frequency per system.

(d) Frequencies indicated normally for base and mobile stations in the Special Emergency Radio Service will be authorized to fixed stations also subject to the condition that harmful interference will not be caused to the mobile service.

(e) The following tabulation indicates the frequency or bands of frequencies, the class of station(s) to which they are normally available, and the specific assignment limitations, which are developed in paragraph (f) of this section:

| Frequency or band | Class of station(s) | Limitations |
|---|---|---|
| *Kc.* | | |
| 2726 | Base and mobile | 10 |
| 3201 | do | 9 |
| 2000 to 3000 | Fixed | 9 |
| *Mc.* | | |
| 33.02 | Base and mobile | 6 |
| 33.06 | do | 6 |
| 33.10 | do | 6 |
| 37.90 | do | 6 |
| 37.94 | do | 6 |
| 37.98 | do | 7 |
| 47.42 | do | |
| 47.46 | do | |
| 47.50 | do | |
| 47.54 | do | |
| 47.58 | do | |
| 47.62 | do | |
| 47.66 | do | |
| 72.02 to 74.58 | Operational fixed | 3 |
| 75.42 to 75.98 | do | |
| 157.47 | Base and mobile | 5, 8 |
| 159.51 to 161.79 | do | 4 |
| 161.85 | do | 5, 8 |
| 161.91 | do | 5, 8 |
| 161.97 | do | 5, 8 |
| 453.05 | do | 1 |
| 453.15 | do | 1 |
| 453.25 | do | 1 |
| 453.35 | do | 1 |
| 453.45 | do | 1 |
| 453.55 | do | 1 |
| 453.65 | do | 1 |
| 453.75 | do | 1 |
| 453.85 | do | 1 |
| 453.95 | do | 1 |
| 458.05 | do | 1 |
| 458.15 | do | 1 |
| 458.25 | do | 1 |
| 458.35 | do | 1 |
| 458.45 | do | 1 |
| 458.55 | do | 1 |
| 458.65 | do | 1 |
| 458.75 | do | 1 |
| 458.85 | do | 1 |
| 458.95 | do | 1 |
| 460 to 940 | Operational fixed | 1, 2 |
| 952 to 960 | do | 1 |
| 1850 to 1900 | do | 1 |
| 2110 to 2200 | do | 1 |
| 2450 to 2500 | Base and mobile and operational fixed. | 1, 2 |
| 2500 to 2700 | Operational fixed | 1 |
| 3500 to 3700 | Base and mobile | 1 |
| 6425 to 6575 | do | 1 |
| 6575 to 6875 | Operational fixed | 1 |
| 8800 to 9000 | do | 1 |
| 11,700 to 12,200 | Base and mobile | 1 |
| 12,200 to 12,700 | Operational fixed | 1 |
| 16,000 to 18,000 | do | 1, 2 |
| 26,000 to 30,000 | do | 1 |

(f) Explanation of assignment limitations appearing in the frequency tabulation of paragraph (e) of this section:

(1) Limited to developmental operation only with assigned frequency and particulars of operation specified in each authorization.

(2) Subject to no protection from interference due to the operation of industrial, scientific and medical devices in this band.

(3) Assignable frequencies spaced by 40 kc beginning with the frequencies 72.02 and 75.42 Mc and ending with the frequencies 74.58 and 75.98 Mc, respectively, are available on a shared basis to operational fixed stations in the Special Emergency Radio Service on the condition that no harmful interference will be caused to the reception of television stations on Channels 4 or 5.

(4) Assignable frequencies spaced by 60 kc beginning with the frequency 159.51 Mc and ending with the frequency 161.79 Mc are available on a shared basis to base and mobile stations in the Special Emergency Radio Service upon an adequate showing of need and upon the condition that no harmful interference will be caused to the service of any existing or future station operating in the Railroad Radio Service.

(5) The use of this frequency may be authorized to base and mobile stations in the Special Emergency Radio Service on the condition that no harmful interference will be caused to the Maritime Mobile Service. Special emergency operations at points within 150 miles of coastal areas and navigable gulfs, bays, rivers, and lakes may be authorized only after a factual finding indicates that, on an engineering basis, no harmful interference will be caused to the Maritime Mobile Service.

(6) This frequency is shared with the Highway Maintenance Radio Service.

(7) This frequency is reserved for assignment only to National organizations established for disaster relief purposes.

(8) This frequency will not be assigned to stations in the Special Emergency Radio Service at any point within 150 miles of Chicago, Illinois.

(9) Appropriate frequencies in the band 2000–3000 kilocycles which are designated in Part 8 of this chapter as available to Public Ship Stations for telephone communication with Public Coast Stations may be assigned on a secondary basis to special emergency fixed stations for communication with Public Coast Stations only, provided such stations are located in the United

States and the following conditions are met:

(i) That such fixed station is established pursuant to the eligibility provisions of § 10.458 and that the isolated area involved is an island or other location not more than 300 statute miles removed from the desired point of communication and isolated from that point by water.

(ii) That evidence is submitted showing that an arrangement has been made with the coast station licensee for the handling of emergency communications permitted by § 7.302 (b) of this chapter and § 10.458 (d).

(iii) That operation of the special emergency fixed station shall at no time conflict with any provision of Part 8 of this chapter and further, that such operation in general shall conform to the practices employed by Public Ship Stations for radiotelephone communication with the same Public Coast Station.

(10) This frequency is shared with the State Guard Radio Service.

### SUBPART K—STATE GUARD RADIO SERVICE

§ 10.501 *Eligibility.* (a) Authorizations for stations in the State Guard Radio Service will be issued only to the official state guard or comparable organization of a state, territory, possession, or the District of Columbia and only where such organization has been duly created by law and is completely subject to the control of the Governor, or highest official of the creating governmental entity.

(b) To facilitate a determination of eligibility, the first application from each organization for a new station in the State Guard Radio Service shall be accompanied by a statement citing the statute, executive order, or other legal authority under which the guard was created and definitely indicating whether or not the guard is under the absolute authority of the Governor or highest official of the governmental entity.

§ 10.502 *Permissible communications.* (a) Stations in the State Guard Radio Service are primarily authorized to transmit emergency communications directly relating to public safety and the protection of life and property.

(b) Stations in the State Guard Radio Service are secondarily authorized to transmit essential nonemergency communications necessary for training and maintaining an efficient organization: *Provided,* That all communications authorized by this paragraph shall be kept to an absolute minimum and shall cause no harmful interference to stations in other services or to other stations in the State Guard Radio Service when such stations are transmitting communications authorized by paragraph (a) of this section.

(c) The transmission of nonessential communications is strictly prohibited.

§ 10.503 *Points of communication.* (a) State guard base, mobile and fixed stations are primarily authorized to intercommunicate with all other state guard stations authorized to the same licensee.

(b) State guard base, mobile and fixed stations are secondarily authorized to intercommunicate with other stations in the Public Safety Radio Services and to transmit to receivers at fixed locations: *Provided,* That no harmful interference will be caused to the service of any station transmitting to a point of communication for which that station is primarily authorized.

§ 10.504 *Station limitations.* (a) Mobile relay stations will not be authorized in the State Guard Radio Service.

(b) Each operator of a station in the State Guard Radio Service shall listen on the licensed frequency of the station prior to transmitting and shall not transmit until it has been reasonably determined that harmful interference will not be caused to any authorized communication in progress on the frequency.

§ 10.505 *Frequencies available to the State Guard Radio Service.* (a) The frequency 2726 kilocycles is available for assignment to base and mobile stations in the State Guard Radio Service for use on a shared basis with stations in the Special Emergency Radio Service.

(b) In instances where circumstances in a particular state appear to warrant the use of a second frequency in the band 2505–3500 kilocycles and where a frequency can be made available through appropriate arrangements, with Government agencies if necessary, for restricted area use on a shared basis with other assignments such additional frequency may be assigned. The maximum power input, emission and hours of operation authorized for use on any frequency assigned under the provisions of this paragraph will be determined on the basis of the technical conditions involved in using the selected frequency in the particular area.

(c) The frequencies indicated in paragraphs (a) and (b) of this section will also be assigned to fixed stations in the State Guard Radio Service subject to the condition that harmful interference will not be caused to the mobile service.

APPENDIX A—ARTICLE 5, INTER-AMERICAN RADIO AGREEMENT (WASHINGTON 1949)

ARTICLE 5. *Police radio stations.* When the American countries authorize their police radio stations to exchange emergency information by radio with similar stations of another country, the following rules shall be applied:

(a) Only police radio stations located close to the boundaries of contiguous countries shall be allowed to exchange this information.

(b) In general, only important police messages shall be handled, such as those which would lose their value because of slowness and time limitations if sent on other communication systems.

(c) Frequencies used for radiotelephone communications with mobile police units shall not be used for radiotelegraph communications.

(d) Radiotelephone communications shall be conducted only on frequencies assigned for radiotelephony.

(e) Radiotelegraph communications shall be conducted on the following frequencies:

| | |
|---|---|
| 2804 kc. calling | 5195 kc.[1] day calling |
| 2808 kc. working | 5135 kc.[1] day working |
| 2812 kc. working | 5140 kc.[1] day working |

(f) The characteristics of police radio stations authorized to exchange information shall be notified to the International Telecommunication Union, Geneva, Switzerland.

(g) The abbreviations contained in Appendix 9 of the Atlantic City Radio Regulations shall be used to the greatest possible extent. Service indications are as follows: "P", priority, for messages that are to be sent immediately, regardless of the number of other messages on file. If no service indication is given, the messages are to be transmitted in the order of receipt.

(h) The message shall contain the preamble, address, text, and signature, as follows:

*Preamble.* The preamble of the message shall consist of the following: the serial number preceded by the letters "NR"; service indications, as appropriate; the group count according to standard cable count system; the letters "CK" followed by numerals indicating the number of words contained in the text of the message; office and country of origin (not abbreviations); day, month, and hour of filing:

*Address.* The address must be as complete as possible and shall include the name of the addressee with any supplementary particulars necessary for immediate delivery of the message;

*Text.* The text may be either in plain language or code;

*Signature.* The signature shall include the name and title of the person originating the message.

[F. R. Doc. 53-10480; Filed, Dec. 17, 1953; 8:45 a. m.]

## TITLE 16—COMMERCIAL PRACTICES

### Chapter I—Federal Trade Commission

#### Subchapter B—Trade Practice Conference Rules

[File No. 21-441]

#### PART 218—PHOTOENGRAVING INDUSTRY OF THE SOUTHEASTERN STATES (VIRGINIA, NORTH CAROLINA, SOUTH CAROLINA, GEORGIA, FLORIDA, TENNESSEE, ALABAMA, AND MISSISSIPPI)

Due proceedings having been held under the trade practice conference procedure in pursuance of the act of Congress approved September 26, 1914, as amended (Federal Trade Commission Act), and other provisions of law administered by the Commission;

*It is now ordered,* That the trade practice rules as hereinafter set forth, which have been approved by the Commission in this proceeding, be promulgated as of December 18, 1953.

*Statement by the Commission.* Trade practice rules for the Photoengraving Industry of the Southeastern States (Virginia, North Carolina, South Carolina, Georgia, Florida, Tennessee, Alabama, and Mississippi), as hereinafter set forth, are promulgated by the Federal Trade Commission under the trade practice conference procedure.

[1] Since the frequencies 5195, 5135, and 5140 kc/s are outside the regional bands, their assignment for this purpose must be confirmed by the Provisional Frequency Board and the Special Administrative Radio Conference.

The rules are directed to the maintenance of free and fair competition in the industry and to the elimination and prevention of unfair methods of competition, unfair or deceptive acts or practices, and other trade abuses. To this end they afford helpful guidance to all members of the industry.

The industry for which such trade practice rules are established is composed of persons, firms, corporations, and organizations engaged in the business of photoengraving, including the production of art work, halftones, line etchings, process color plates, and plate work and illustrations used by printers. The products of this industry, which are used in the printing of newspapers, books, periodicals, and other types of publications, as well as in the production of advertising, letterheads, and related matter, have made possible a major part of modern printing and depiction, both in color and in black and white. The annual gross sales of the industry in this area is in excess of $5,000,000.

Proceedings leading to the establishment of rules were instituted upon application made on behalf of industry members. A general industry conference was held under Commission auspices in Atlanta, Georgia, at which proposals for rules were submitted for consideration of the Commission. Thereafter, a draft of proposed rules was released by the Commission and public hearing thereon was held in Washington, D. C., at which all interested or affected parties were afforded opportunity to present their views, suggestions, or objections regarding the rules.

Following such hearing, and upon consideration of the entire matter, final action was taken by the Commission whereby it approved the trade practice rules as hereinafter appearing.

Such rules become operative thirty (30) days from the date of promulgation.

*The rules.* The rules in this part promulgated by the Commission are designed to foster and promote the maintenance of fair competitive conditions in the interest of protecting industry, trade, and the public. It is to this end, and to the exclusion of any act or practice which fixes or controls prices through combination or agreement, or which unreasonably restrains trade or suppresses competition, or otherwise unlawfully injures, destroys, or prevents competition, that the rules are to be applied.

*General statement.* The unfair trade practices embraced in the rules in this part are considered to be unfair methods of competition, unfair or deceptive acts or practices, or other illegal practices, prohibited under laws administered by the Federal Trade Commission; and appropriate proceedings in the public interest will be taken by the Commission to prevent the use, by any person, partnership, corporation, or other organization subject to its jurisdiction, of such unlawful practices in commerce.

Sec.

218.0 Definitions: The industry and its products defined.
218.1 Enticing away employees of competitors.
218.2 Defamation of competitors or false disparagement of their products.
218.3 Imitation or simulation of trade-marks, trade names, etc.
218.4 Prohibited discrimination.
218.5 Inducing breach of contract.
218.6 Misrepresentation of products (general).
218.7 Coercing the purchase of one product as a prerequisite to the purchase of other products.
218.8 Fictitious prices.
218.9 Use of the word "free", etc.
218.10 Substitution of products.
218.11 Commercial bribery.
218.12 Procurement of competitors' confidential information.
218.13 Misrepresentation as to character of business.
218.14 Misbranding of products.
218.15 False invoicing.
218.16 Selling below cost.
218.17 Prohibited forms of trade restraints (unlawful price fixing, etc.).

AUTHORITY: §§ 218.0 to 218.17 issued under sec. 6, 38 Stat. 722; 15 U. S. C. 46. Interpret or apply sec. 5, 38 Stat. 719, as amended; 15 U. S. C. 45.

§ 218.0 *Definitions: The industry and its products defined.* Industry membership in the area covered by the rules consists of persons, firms, corporations, and organizations engaged in the business of photoengraving, including the production of art work, halftones, line etchings, process color plates, and plate work and illustrations used by printers. Products of the industry are used in the printing of newspapers, books, periodicals, and other types of publications, and in the production of advertising, letterheads, and related matter.

§ 218.1 *Enticing away employees of competitors.* Knowingly enticing away employees or sales representatives of competitors under any circumstance having the capacity and tendency or effect of substantially injuring or lessening present or potential competition is an unfair trade practice: *Provided,* That nothing in this section shall be construed as prohibiting employees from seeking more favorable employment, or as prohibiting employers from hiring or offering employment to employees of competitors in good faith and not for the purpose of injuring, destroying, or preventing competition. [Rule 1]

§ 218.2 *Defamation of competitors or false disparagement of their products.* The defamation of competitors by falsely imputing to them dishonorable conduct, inability to perform contracts, questionable credit standing, or by other false representations, or the false disparagement of the grade, quality, or manufacture of the products of competitors, or of their business methods, selling prices, values, credit terms, policies, services, or conditions of employment, is an unfair trade practice. [Rule 2]

§ 218.3 *Imitation or simulation of trade-marks, trade names, etc.* The imitation or simulation of trade-marks, trade names, brands, or labels of competitors, with the capacity and tendency or effect of misleading or deceiving purchasers, prospective purchasers, or the consuming public, is an unfair trade practice. [Rule 3]

§ 218.4 *Prohibited discrimination*[1]—(a) *Prohibited discriminatory prices, or rebates, refunds, discounts, credits, etc., which effect unlawful price discrimination.* It is an unfair trade practice for any member of the industry engaged in commerce, in the course of such commerce, to grant or allow, secretly or openly, directly or indirectly, any rebate, refund, discount, credit, or other form of price, differential, where such rebate, refund, discount, credit, or other form of price differential effects a discrimination in price between different purchasers of goods of like grade and quality, where either or any of the purchases involved therein are in commerce, and where the effect thereof may be substantially to lessen competition or tend to create a monopoly in any line of commerce, or to injure, destroy, or prevent competition with any person who either grants or knowingly receives the benefit of such discrimination, or with customers of either of them: *Provided, however*—

(1) That the goods involved in any such transaction are sold for use, consumption, or resale within any place under the jurisdiction of the United States;

(2) That nothing contained in this paragraph shall prevent differentials which make only due allowance for differences in the cost of manufacture, sale, or delivery resulting from the differing methods or quantities in which such commodities are to such purchasers sold or delivered;

(3) That nothing contained in this paragraph shall prevent persons engaged in selling goods, wares, or merchandise in commerce from selecting their own customers in bona fide transactions and not in restraint of trade;

(4) That nothing contained in this paragraph shall prevent price changes from time to time where made in response to changing conditions affecting the market for or the marketability of the goods concerned, such as but not limited to obsolescence of seasonal goods, distress sales under court process, or sales in good faith in discontinuance of business in the goods concerned.

(b) *Prohibited brokerage and commissions.* It is an unfair trade practice for any member of the industry engaged in commerce, in the course of such commerce, to pay or grant, or to receive or accept, anything of value as a commission, brokerage, or other compensation, or any allowance or discount in lieu thereof, except for services rendered in connection with the sale or purchase of goods, wares, or merchandise, either to the other party to such transaction or to an agent, representative, or other

[1] As used in § 218.4, the term "commerce" means "trade or commerce among the several States and with foreign nations, or between the District of Columbia or any Territory of the United States and any State, Territory, or foreign nation, or between any insular possessions or other places under the jurisdiction of the United States, or between any such possession or place and any State or Territory of the United States or the District of Columbia or any foreign nation, or within the District of Columbia or any Territory or any insular possession or other place under the jurisdiction of the United States."

intermediary therein where such intermediary is action in fact for or in behalf, or is subject to the direct or indirect control, of any party to such transaction other than the person by whom such compensation is so granted or paid.

(c) *Prohibited advertising or promotional allowances, etc.* It is an unfair trade practice for any member of the industry engaged in commerce to pay or contract for the payment of advertising or promotional allowances or any other thing of value to or for the benefit of a customer of such member in the course of such commerce as compensation or in consideration for any services or facilities furnished by or through such customer in connection with the processing, handling, sale, or offering for sale of any products or commodities manufactured, sold, or offered for sale by such member, unless such payment or consideration is available on proportionally equal terms to all other customers competing in the distribution of such products or commodities.

(d) *Prohibited discriminatory services or facilities.* It is an unfair trade practice for any member of the industry engaged in commerce to discriminate in favor of one purchaser against another purchaser or purchasers of a commodity bought for resale, with or without processing, by contracting to furnish or furnishing, or by contributing to the furnishing of, any services or facilities connected with the processing, handling, sale, or offering for sale of such commodity so purchased upon terms not accorded to all competing purchasers on proportionally equal terms.

(e) *Inducing or receiving an illegal discrimination in price.* It is an unfair trade practice for any member of the industry engaged in commerce, in the course of such commerce, knowingly to induce or receive a discrimination in price which is prohibited by the foregoing provisions of this section.

(f) *Exemptions.* The inhibitions of this section shall not apply to purchases of their supplies for their own use by schools, colleges, universities, public libraries, churches, hospitals, and charitable institutions not operated for profit.

NOTE: In complaint proceedings charging discrimination in price or services or facilities furnished, and upon proof having been made of such discrimination, the burden of rebutting the prima facie case thus made by showing justification shall be upon the person charged; and unless justification shall be affirmatively shown, the Commission is authorized to issue an order terminating the discrimination: *Provided, however,* That nothing herein contained shall prevent a seller rebutting the prima facie case thus made by showing that his lower price or the furnishing of services or facilities to any purchaser or purchasers was made in good faith to meet an equally low price of a competitor, or the services or facilities furnished by a competitor. See section 2–b, Clayton Act.

[Rule 4]

§ 218.5 *Inducing breach of contract.* (a) Knowingly inducing or attempting to induce the breach of existing lawful contracts between competitors and their customers or their suppliers, or interfering with or obstructing the performance of any such contractual duties or services, under any circumstance having the capacity and tendency or effect of substantially injuring or lessening present or potential competition, is an unfair trade practice.

(b) Nothing in this section is intended to imply that it is improper for an industry member to solicit the business of a customer of a competing industry member; nor is the section to be construed as in anywise authorizing any agreement, understanding, or planned common course of action by two or more industry members not to solicit business from the customers of either of them, or from customers of any other industry member. [Rule 5]

§ 218.6 *Misrepresentation of products (general).* Making, or causing or permitting to be made or published, any false, misleading, or deceptive statements or representations, by way of advertisement or otherwise, concerning the cost, grade, quality, quantity, substance, character, nature, origin, size, or preparation of any product of the industry, or in any other material respect, is an unfair trade practice. [Rule 6]

§ 218.7 *Coercing the purchase of one product as a prerequisite to the purchase of other products.* The practice of coercing the purchase of one or more products as a prerequisite to the purchase of one or more other products, where the effect may be substantially to lessen competition or tend to create a monopoly or unreasonably to restrain trade, is an unfair trade practice. [Rule 7]

§ 218.8 *Fictitious prices.* It is an unfair trade practice to sell or offer for sale industry products at prices purported to be reduced from what are in fact fictitious prices, or to sell or offer for sale such products at a purported reduction in price when such purported reduction is in fact fictitious or is otherwise misleading or deceptive. [Rule 8]

§ 218.9 *Use of the word "free".* In connection with the sale, offering for sale, or distribution of industry products, it is an unfair trade practice to use the word "free," or any other word or words of similar import, in advertisements or in other offers to the public, as descriptive of an article of merchandise, or service, which is not an unconditional gift, under the following circumstances:

(a) When all the conditions, obligations, or other prerequisites to the receipt and retention of the "free" article of merchandise or service offered are not clearly and conspicuously set forth at the outset so as to leave no reasonable probability that the terms of the offer will be misunderstood; and, regardless of such disclosure:

(b) When, with respect to any article of merchandise required to be purchased in order to obtain the "free" article or service, the offerer (1) increases the ordinary and usual price of such article of merchandise, or (2) reduces its quality, or (3) reduces the quantity or size thereof.

NOTE: The disclosure required by paragraph (a) of this section shall appear in close conjunction with the word "free" (or other word or words of similar import) wherever such word first appears in each advertisement or offer. A disclosure in the form of a footnote, to which reference is made by use of an asterisk or other symbol placed next to the word "free," will not be regarded as compliance.

[Rule 9]

§ 218.10 *Substitution of products.* The practice of shipping or delivering products which do not conform to the samples submitted, to specifications upon which the sale is consummated, or to representations made prior to securing the order, without the consent of the purchasers to such substitutions and with the capacity and tendency or effect of deceiving or misleading purchasers, prospective purchasers, or the consuming public, is an unfair trade practice. [Rule 10]

§ 218.11 *Commercial bribery.* It is an unfair trade practice for a member of the industry, directly or indirectly, to give, or offer to give, or permit or cause to be given, money or anything of value to agents, employees, or representatives of customers or prospective customers, or to agents, employees, or representatives of competitors' customers or prospective customers, without the knowledge of their employers or principals, as an inducement to influence their employers or principals to purchase or contract to purchase products manufactured or sold by such industry member or the maker of such gift or offer, or to influence such employers or principals to refrain from dealing in the products of competitors or from dealing or contracting to deal with competitors. [Rule 11]

§ 218.12 *Procurement of competitors' confidential information.* It is an unfair trade practice for any member of the industry to obtain information concerning the business of a competitor by bribery of an employee or agent of such competitor, by false or misleading statements or representations, by the impersonation of one in authority, or by any other unfair means, and to use the information so obtained so as substantially to injure competition or unreasonably restrain trade. [Rule 12]

§ 218.13 *Misrepresentation as to character of business.* For any person, firm, or corporation to represent or hold himself or itself out as being a photoengraver when not engaged in the manufacture of photoengravings, or in any other manner to misrepresent the character, extent, or type of his or its business, is an unfair trade practice. [Rule 13]

§ 218.14 *Misbranding of products.* The false or deceptive marking or branding of the products of the industry with regard to the grade, quality, quantity, use, size, material, content, origin, preparation, manufacture, or distribution of such products, or in any other material respect, is an unfair trade practice. [Rule 14]

§ 218.15 *False invoicing.* Withholding from or inserting in invoices or order tickets any statements or information by reason of which omission or insertion a false record is made, wholly or in part, of the transactions represented on the face of such invoices or order tickets, with the capacity and tendency or effect of thereby misleading or deceiving purchasers, prospective purchasers, or the consuming public, is unfair trade practice. [Rule 15]

§ 218.16 *Selling below cost.* (a) The practice of selling products of the industry at a price less than the cost thereof to the seller, with the intent or purpose, and where the effect may be, to injure, suppress, or stifle competition or tend to create a monopoly in the production or sale of such products, is an unfair trade practice.

(b) As used in this section the term "cost" means the total cost to the seller, including the costs of acquisition, processing, preparation for marketing, sale, and delivery. All elements recognized by good accounting practice as proper elements of such cost shall be included in determining cost under this section. The costs referred to in the section are actual costs of the respective seller and not some other figure or average costs in the industry determined by an industry cost survey or otherwise.

(c) This section is not to be construed as prohibiting all sales below cost, but only such selling below the seller's cost as is resorted to and pursued with the wrongful intent or purpose referred to and where the effect may be to injure, destroy, or prevent competition, or tend to create a monopoly. [Rule 16]

§ 218.17 *Prohibited forms of trade restraints (unlawful price fixing, etc.).*[1] It is an unfair trade practice for any member of the industry, either directly or indirectly, to engage in any planned common course of action, or to enter into or take part in any understanding, agreement, combination, or conspiracy, with one or more members of the industry, or with any other person or persons, to fix or maintain the price of any goods or otherwise unlawfully to restrain trade; or to use any form of threat, intimidation, or coercion to induce any member of the industry or other person or persons to engage in any such planned common course of action, or to become a party to any such understanding, agreement, combination, or conspiracy. [Rule 17]

[1] The inhibitions of this section are subject to Public Law 542, approved July 14, 1952, 66 Stat. 632 (the McGuire Act) which provides that with respect to a commodity which bears, or the label or container of which bears, the trade-mark, brand, or name of the producer or distributor of such commodity and which is in free and open competition with commodities of the same general class produced or distributed by others, a seller of such a commodity may enter into a contract or agreement with a buyer thereof which establishes a minimum or stipulated price at which such commodity may be resold by such buyer when such contract or agreement is lawful as applied to intrastate transactions under the laws of the State, Territory, or territorial jurisdiction in which the resale is to be made or to which the commodity is to be transported for such resale, and when such contract or agreement is not between manufacturers, or between wholesalers, or between brokers, or between factors, or between retailers, or between persons, firms, or corporations in competition with each other.

Issued: December 15, 1953.

Promulgated by the Federal Trade Commission December 18, 1953.

[SEAL] ALEX. AKERMAN, Jr., *Secretary.*

## TITLE 24—HOUSING AND HOUSING CREDIT

### Chapter I—Home Loan Bank Board, Housing and Home Finance Agency

#### Subchapter D—Federal Savings and Loan Insurance Corporation

[No. 6645]

PART 163—OPERATIONS

WITHDRAWABLE SHARES NOT TO BE ISSUED WITHOUT APPROVAL WHILE DEPOSITS ARE OUTSTANDING

DECEMBER 15, 1953.

Resolved That, pursuant to Part 108 of the General Regulations of the Home Loan Bank Board (24 CFR Part 108) and § 167.1 of the Rules and Regulations for Insurance of Accounts (24 CFR 167.1), notice and public procedure having been duly afforded (18 F. R. 6739), § 163.1 of the Rules and Regulations for Insurance of Accounts (24 CFR 163.1) is amended, effective December 18, 1953, by inserting immediately preceding the last sentence of such section the following sentence: "Except with the written approval of the Corporation, no insured institution may issue or have outstanding any class of insured account having preference, either as to time or amount in the event of liquidation, over any other class of insured account: *Provided* that, where there may be a change from one type of account to another, a reasonable time, to be determined by the Corporation, may be allowed to effect such change."

so that said section, as amended, will read as follows:

§ 163.1 *Forms of certificates and passbooks; approval of forms of investment contracts and bylaws; furnishing members with copy of charter and bylaws.* At the time of the application for insurance, every applicant (except a Federal savings and loan association) shall submit to the Corporation for approval copies of all savings account, share, membership, stock and deposit certificates, passbooks, and other forms of investment contracts proposed to be issued by the applicant as an insured institution; it shall also submit for such approval its charter, constitution, and bylaws, and all amendments thereto, affecting its securities and investment contracts. No insured institution (except a Federal savings and loan association) shall issue any form of savings account, share, stock, membership or deposit certificate, passbook, or other investment contract which has not been approved in writing by the Corporation. No insured institution except a Federal savings and loan association shall amend its charter, constitution, or bylaws affecting its securities or investment contracts, without the prior written approval of the Corporation. Except with the written approval of the Corporation, no insured institution may issue or have outstanding any class of insured account having preference, either as to time or amount in the event of liquidation, over any other class of insured account: *Provided* that, where there may be a change from one type of account to another, a reasonable time, to be determined by the Corporation, may be allowed to effect such change. Each insured institution shall cause a true copy of its charter and bylaws and all amendments thereto to be available to members at all times in each office of the institution, and shall upon request deliver to any member a copy of such charter, constitution, bylaws, and amendments.

(Sec. 402, 48 Stat. 1256; 12 U. S. C. 1725)

By the Home Loan Bank Board.

[SEAL] J. FRANCIS MOORE, *Secretary.*

## TITLE 46—SHIPPING

### Chapter I—Coast Guard, Department of the Treasury

#### Subchapter C—Uninspected Vessels

[CGFR 53–55]

PART 25—REQUIREMENTS

SUBPART 25.30—FIRE EXTINGUISHING EQUIPMENT

FIRE EXTINGUISHING EQUIPMENT REQUIRED FOR MOTORBOATS

A notice regarding the proposed change in the regulations regarding fire extinguishing equipment for motorboats was published in the FEDERAL REGISTER dated September 9, 1953, 18 F. R. 5432, as Item VI on the agenda to be considered by the Merchant Marine Council, and a public hearing was held on September 29, 1953, in Washington, D. C. An oral comment favoring the proposed action was received at the public hearing. The amendment to 46 CFR 25.30–20 will require all outboard motorboats not carrying passengers for hire to carry hand-portable fire extinguishers, except for outboard motorboats of the rowboat or canoe type which are less than 26 feet in length. At present many motorboats are being built with cabins and other enclosed spaces and such motorboats are propelled by outboard motors. In addition, many of these motorboats are carrying portable auxiliary gasoline tanks as part of the outboard motor accessories. This requirement is considered necessary in the interests of promoting safety of life because of the fire and explosion hazards which may be present on board these motorboats.

By virtue of the authority vested in me as Commandant, United States Coast Guard, by Treasury Department Order

No. 120, dated July 31, 1950 (15 F. R. 6521), to promulgate the rules and regulations in accordance with the statutes cited with the regulations below, the following amendment to the text of § 25.30–20 (a) (1) is prescribed, but no change shall be made in Table 25.30–20 (a) (1), which amendment shall become effective thirty days after the date of publication of this document in the FEDERAL REGISTER:

§ 25.30–20 *Fire extinguishing equipment required*—(a) *Motorboats.* (1) All motorboats shall carry at least the minimum number of hand-portable fire extinguishers set forth in Table 25.30–20 (a) (1), except that motorboats less than 26 feet in length of open construction, propelled by outboard motors, not carrying passengers for hire need not carry such portable fire extinguishers.

(R. S. 4405, as amended, 4462, as amended, sec. 17, 54 Stat. 166, as amended; 46 U. S. C. 375, 416, 526p. Interprets or applies sec. 2, 54 Stat. 1028, as amended; 46 U. S. C. 463a)

Dated: December 14, 1953.

[SEAL] MERLIN O'NEILL,
*Vice Admiral, U. S. Coast Guard, Commandant.*

# PROPOSED RULE MAKING

## DEPARTMENT OF HEALTH, EDUCATION, AND WELFARE

### Bureau of Federal Credit Unions, Social Security Administration

[ 45 CFR Parts 301, 310 ]

ORGANIZATION AND OPERATION OF FEDERAL CREDIT UNIONS; VOLUNTARY LIQUIDATION OF FEDERAL CREDIT UNIONS

NOTICE OF PROPOSED RULE MAKING

Notice is hereby given, pursuant to the Administrative Procdure Act, approved June 11, 1946 (60 Stat. 238, 5 U. S. C. 1003) that the regulations set forth in tentative form below are proposed to be prescribed by the Director of the Bureau of Federal Credit Unions with approval of the Commissioner of Social Security and the Secretary of Health, Education, and Welfare in lieu of §§ 301.7 and 301.8 and Part 310 of the present regulations of the Bureau of Federal Credit Unions (45 CFR 301.7, 16 F. R. 5175; 45 CFR 301.8, 15 F. R. 2760; and 45 CFR Part 310, 13 F. R. 7364). The proposed regulations are designed to amend the existing regulations concerning examination fees and voluntary liquidation.

Prior to the official adoption of the proposed regulations, consideration will be given to any data, views, or arguments pertaining thereto which are submitted in writing in duplicate to the Director of the Bureau of Federal Credit Unions, Department of Health, Education, and Welfare, Washington 25, D. C., within a period of fifteen days from the date of publication of this notice in the FEDERAL REGISTER. The proposed regulations are to be issued under authority contained in section 16 (a) of the Federal Credit Union Act, as amended.

(48 Stat. 1221, 12 U. S. C. 1766, and section 2 of the Act of June 29, 1948 (62 Stat. 1091))

Dated: November 24, 1953.

[SEAL] J. DEANE GANNON,
*Director, Bureau of Federal Credit Unions.*

Approved:

Dated: December 9, 1953.

JOHN W. TRAMBURG,
*Commissioner of Social Security.*

Approved:

Dated: December 14, 1953.

O. C. HOBBY,
*Secretary of Health, Education and Welfare.*

In Part 301—Organization and Operation of Federal Credit Unions, §§ 301.7 and 301.8 are hereby amended to read as follows:

§ 301.7 *Fee for examination.* (a) Each Federal credit union shall pay the Bureau of Federal Credit Unions a fee for each examination in accordance with the schedule of fees fixed from time to time by the Director.

(b) In establishing such fees, the Director shall consider the anticipated aggregate cost of the examination program including supervision, salaries, travel and all other items which affect the cost of the examination program.

(c) The fee for examinations of Federal credit unions with assets of less than $25,000 shall not exceed 50 cents per hundred dollars of assets as of the effective date of the examination. The Director may establish a minimum fee for examination which shall not exceed $25.00. The Director may waive the fee for an examination within twelve months after the date a charter is approved if the payment would, in the opinion of the Director, cause a hardship.

(d) Each Federal credit union shall be notified at least 30 days prior to the effective date of any schedule of fees fixed pursuant to this section. Upon receipt of such notification interested persons may submit written data, views, or arguments for consideration by the Director, and the Director may, after consideration, make such revisions in the proposed schedule or such change in the effective date as he deems appropriate. Each Federal credit union shall be notified of such revision or change not less than 15 days prior to the final effective date.

(e) The check in payment of the examination fee shall be made payable to the Treasurer of the United States and the check shall be delivered to the examiner at the completion of the examination.

§ 301.8 *Fee for examination of Federal credit unions in liquidation.* Federal credit unions in liquidation may be examined prior to or following completion of liquidation. A fee assessed in accordance with the most recent schedule of examination fees prescribed by the Director of the Bureau of Federal Credit Unions as provided in § 301.7 shall be paid for each such examination.

Part 310—Voluntary Liquidation of Federal Credit Unions is hereby amended to read as follows:

Sec.
310.1 Approval of liquidation.
310.2 Notice of liquidation to Bureau of Federal Credit Unions.
310.3 Transaction of business during liquidation.
310.4 Notice of liquidation to members.
310.5 Notice of liquidation to creditors.
310.6 Report at commencement of liquidation.
310.7 Reports during period of liquidation.
310.8 Examinations of Federal credit unions in voluntary liquidation.
310.9 Responsibility for conduct of voluntary liquidations.
310.10 Completion of liquidation.
310.11 Distribution of assets.
310.12 Final report.
310.13 Retention of records.
310.14 Cancellation of charter.
310.15 Further instructions and information.

§ 310.1 *Approval of liquidation.* A Federal credit union may go into voluntary liquidation on approval of a majority of its members in writing or by a vote in favor of such liquidation by a majority of the members of the credit union at a regular meeting of the members or at a special meeting called for that purpose. Where authorization for liquidation is to be obtained at a meeting of members, notice in writing shall be given to each member at least seven days before such meeting and the minutes of the meeting shall show the number of members present and the number that voted for and against liquidation. If approval by a majority of all members is not obtained at the meeting of members, authorization for voluntary liquidation shall be obtained by having a majority of members sign a statement in substantially the following form:

We the undersigned members of the ---- ---- Federal Credit Union, Charter No. ----, hereby request the dissolution of our credit union.

§ 310.2 *Notice to Bureau of Federal Credit Unions.* When the board of directors of a Federal credit union decides to submit the question of liquidation to the members, the president shall notify within 10 days the Regional Representative of the Bureau of Federal Credit Unions by letter in which the reasons for the proposed liquidation are set forth in detail. The president of the Federal credit union shall notify the Regional Representative of the Bureau of Federal Credit Unions within 10 days after the vote is taken as to whether the members approved or disapproved the proposed liquidation.

§ 310.3 *Transaction of business during liquidation.* Immediately on decision by the board of directors of a Federal credit union to seek approval of members for liquidation, payments on shares, withdrawal of shares, and granting of loans shall be suspended pending action by members on the proposal to liquidate, and on approval by members of such proposal, payments on shares, withdrawal of shares, and the making of loans shall be permanently discontinued.

§ 310.4 *Notice to members of liquidation.* When voluntary liquidation of a Federal credit union has been decided upon, a notice of such decision shall be handed to each member or mailed to his last known address together with a request that the member furnish his passbook or confirm in writing the shares held by him in the Federal credit union and the loans owed by him to the Federal credit union.

§ 310.5 *Notice of liquidation to creditors.* On approval of the members of a Federal credit union of a proposal to liquidate, the board of directors of the Federal credit union shall immediately cause to be prepared and mailed to all creditors a notice of liquidation and to present claims to the Federal credit union within ninety days.

§ 310.6 *Report at commencement of liquidation.* At the commencement of voluntary liquidation of a Federal credit union, the treasurer or agent conducting the liquidation shall file with the Regional Representative of the Bureau of Federal Credit Unions a financial and statistical report on form FCU 109 rev.

§ 310.7 *Reports during period of liquidation.* Federal credit unions in the process of voluntary liquidation shall forward to the Regional Representative of the Bureau of Federal Credit Unions a copy of the monthly financial and statistical report on form FCU 109 rev. for June 30 and December 31 within 10 days after the close of the month to which the reports apply. Additional reports, as determined by the Regional Representative of the Bureau of Federal Credit Unions to be necessary, shall be furnished promptly on request.

§ 310.8 *Examinations of Federal credit unions in voluntary liquidation.* When deemed advisable by the Regional Representative of the Bureau of Federal Credit Unions, an examination of the books and records of a Federal credit union may be made prior to, during, or following completion of voluntary liquidation. A fee for each such examination shall be assessed at the rate currently in effect for examinations of operating Federal credit unions.

§ 310.9 *Responsibility for conduct of voluntary liquidation.* The board of directors of a Federal credit union in voluntary liquidation shall be responsible for conserving the assets, for expediting the liquidation, and for equitably distributing the assets to members at the completion of liquidation. The board of directors shall determine that all persons handling or having access to funds of the Federal credit union are adequately covered by surety bond. The board of directors shall appoint a custodian for the Federal credit union's records that are to be retained for 5 years after the charter is canceled. The board of directors may appoint a liquidating agent and delegate part or all of these responsibilities to him and may authorize reasonable compensation for his services; any such liquidating agent shall be bonded for the faithful performance of his duties. The supervisory committee shall be responsible for making periodic audits of the credit union's records, at least quarterly, during the period of liquidation.

§ 310.10 *Completion of liquidation.* As soon as all assets of the Federal credit union have been converted to cash or found to be worthless and all loans and debts owing to it have been collected or found to be uncollectible and all obligations of the Federal credit union have been paid, with the exception of amounts due its members, the books shall be closed and the pro rata distribution to members computed. The amount of gain or loss shall be entered in each member's share account and should be entered in his passbook or statement of account.

§ 310.11 *Distribution of assets.* Checks shall then be drawn for the amounts to be distributed to each member who has surrendered his passbook or statement of account or has given a written confirmation of his balance. The checks shall be mailed to such members at their last known address or handed to them in person. The passbooks on hand shall be retained with the credit union records. The Regional Representative of the Bureau of Federal Credit Unions shall be notified promptly of the date final distribution of assets to the members is instituted.

§ 310.12 *Final report.* Within 120 days after the final distribution to members is instituted, the Federal credit union shall furnish to the regional office of the Bureau of Federal Credit Unions the following:

(a) A schedule of unpaid claims, if any, due members who failed to surrender their passbooks or confirm their balances in writing during liquidation or due members or creditors who failed to cash final distribution checks within the time limit which shall be prepared on form FCU 61d or its equivalent; this schedule shall be accompanied by a certified check or money order payable to the Treasurer of the United States in the exact amount of the total unpaid claims. The Bureau of Federal Credit Unions will deposit said funds in a special account with the Chief Disbursing Office of the Treasury of the United States where they will be held for the account of the Director of the Bureau of Federal Credit Unions as trustee for the individuals named on said schedule. Such individuals, or any persons making claims on their behalf, may submit to the Bureau their claim in writing for such funds.

(b) A copy of a schedule showing the name, book number, share balance at the commencement of liquidation, pro rata share of gain or loss, and the amount distributed to each member.

(c) A summary report on liquidation in duplicate on form FCU 61f.

(d) The Certificate of Dissolution and Liquidation on form FCU 61e signed under oath by the board of directors or agent who conducted the liquidation and made the final distribution of assets to the members.

(e) The name and address of the custodian of the Federal credit union's records.

(f) The charter of the Federal credit union.

§ 310.13 *Retention of records.* All records of the liquidated credit union necessary to establish that creditors were paid and that members' shareholdings were equitably distributed shall be retained by a custodian appointed by the board of directors of said Federal credit union for a period of 5 years following the date of cancellation of the charter.

§ 310.14 *Cancellation of charter.* On proof that distribution of assets has been made to members and within one year after receipt of the Certificate of Dissolution and Liquidation (form FCU 61e), the Director of the Bureau of Federal Credit Unions shall cancel the charter of the Federal credit union concerned.

§ 310.15 *Further instructions and information.* Further detailed instructions and information pertaining to voluntary liquidations may be obtained from the Washington or regional offices of the Bureau of Federal Credit Unions.

### Office of the Secretary

SETTLEMENT OF CLAIMS ARISING FROM ACTIVITIES OF MILITARY ASSISTANCE ADVISORY GROUPS

By virtue of the authority vested in me as Secretary of Defense, I hereby direct that claims against the United States, except claims cognizable by foreign governments under the provisions of existing treaties and agreements, which have arisen since January 30, 1953, or may hereafter arise from the activities of Military Assistance Advisory Groups, or of the military personnel or civilian employees thereof which are otherwise cognizable under such acts, shall be settled in accordance with the provisions of the Foreign Claims Act (act of January 2, 1942, 55 Stat., 880), as amended, or of the act of July 3, 1943 (57 Stat. 372), as amended, and the regulations of the responsible department implementing such acts. Foreign Claims Commissions of the Department

of the Army, Navy, or Air Force, shall be responsible for the processing and settlement of such claims arising in foreign countries in which they respectively have been made responsible for the processing of claims under the NATO Status of Forces Agreement or other pertinent treaties or agreements in areas in which they have the predominant interest.

C. E. WILSON,
*Secretary of Defense.*

### Office of the Secretary

SHOSHONE AND ARAPAHOE TRIBES OF WYOMING

FEDERAL INDIAN LIQUOR LAWS

Pursuant to the act of August 15, 1953 (Pub. Law 277, 83d Cong., 1st Sess.), I certify that the following ordinance relating to the application of the Federal Indian liquor laws on the Wind River Reservation was duly adopted by the Shoshone and Arapahoe Tribes of Wyoming, which tribes have jurisdiction over the area of Indian country included in the resolution:

Whereas, Public Law 277, 83d Congress, approved August 15, 1953, provides that sections 1154, 1156, 3113, 3488, and 3618 of Title 18, United States Code, commonly referred to as the Federal Indian liquor laws, shall not apply to any act or transaction within any area of Indian country provided such act or transaction is in conformity with both the laws of the State in which such act or transaction occurs and with an ordinance duly adopted by the tribe having jurisdiction over such area of Indian country, certified by the Secretary of the Interior, and published in the FEDERAL REGISTER.

Therefore, be it resolved that the introduction, sale or possession of intoxicating beverages shall be lawful within the Indian country under the jurisdiction of the Shoshone and Arapahoe Tribes: *Provided*, That such introduction, sale or possession is in conformity with the laws of Wyoming.

Be it further resolved that any tribal laws, resolutions or ordinance heretofore enacted which prohibit the sale, introduction or possession of intoxicating beverages are hereby repealed.

FRED G. AANDAHL,
*Assistant Secretary of the Interior.*

## DEPARTMENT OF LABOR

### Wage and Hour and Public Contracts Divisions

EMPLOYMENT OF HANDICAPPED CLIENTS BY SHELTERED WORKSHOPS

ISSUANCE OF SPECIAL CERTIFICATES

Notice is hereby given that special certificates authorizing the employment of handicapped clients at hourly wage rates lower than the minimum wage rates applicable under section 6 of the Fair Labor Standards Act of 1938, as amended, and section 1 (b) of the Walsh-Healey Public Contracts Act, as amended, have been issued to the sheltered workshops hereinafter mentioned, under section 14 of the Fair Labor Standards Act of 1938, as amended (sec. 14, 52 Stat. 1068; 29 U. S. C. 214, as amended, 63 Stat. 910), and Part 525 of the regulations issued thereunder, as amended (29 CFR Part 525), and under sections 4 and 6 of the Walsh-Healey Public Contracts Act (secs. 4, 6, 49 Stat. 2038; 41 U. S. C. 38, 40) and Article 1102 of the regulations issued pursuant thereto (41 CFR 201.1102).

The names and addresses of the sheltered workshops, wage rates and the effective and expiration dates of the certificates are set forth below. In each case, the wage rates are established at rates not less than the piece rate paid non-handicapped employees engaged in the same occupation in regular commercial industry maintaining approved labor standards, or at wage rates stipulated in the certificate, whichever is higher.

Association for the Help of Retarded Children, Inc., 724 Nostrand Street, Brooklyn, 16, New York, at a rate of not less than 10 cents per hour. Certificate is effective October 12, 1953 and expires September 30, 1954.

Goodwill Industries of New York Inc., 317-325 East 118th Street, New York, New York; at a rate of not less than 35 cents per hour. Certificate is effective November 1, 1953 and expires October 31, 1954.

Goodwill Industries of New York, Inc., 123 East 124th Street, New York, New York; at a rate of not less than 35 cents per hour. Certificate is effective November 1, 1953 and expires October 31, 1954.

The Nassau County Branch of the Goodwill Industries of New York, Inc., Greenvale, Long Island, New York; at a rate of not less than 35 cents per hour. Certificate is effective November 1, 1953 and expires October 31, 1954.

The Baltimore League for Crippled Children and Adults, Inc., 827 St Paul Street, Baltimore, Maryland; at a rate of not less than 20 cents per hour for a training period of 120 hours and 40 cents thereafter. Certificate is effective November 1, 1953 and expires October 31, 1954.

Goodwill Industries of Wilmington, Inc., 214-216 Walnut Street, Wilmington, Delaware; at a rate of not less than 25 cents per hour for a training period of 120 hours and 45 cents thereafter. Certificate is effective November 1, 1953 and expires October 31, 1954.

The Volunteers of America, Room 1208, 1211 Chestnut Street, Philadelphia 7, Pennsylvania; at a rate of not less than 40 cents per hour. Certificate is effective November 1, 1953 and expires October 31, 1954.

Cleveland Rehabilitation Center, 2239 East 55th Street, Cleveland, Ohio; at a rate of not less than 2 cents per hour for a training period of 160 hours and 10 cents thereafter. Certificate is effective October 12, 1953 and expires September 30, 1954.

Cleveland Society for the Blind, 2275 East 55th Street, Cleveland, Ohio; at a rate of not less than 10 cents per hour for a training period of 120 hours in the Contract Shop and 20 cents thereafter and at a rate of not less than 10 cents per hour for a training period of 120 hours, in the Serving and Broom Departments and 40 cents thereafter. Certificate is effective October 1, 1953, and expires September 30, 1954.

Flint Goodwill Industries, Inc., 2410 North Saginaw Street, Flint 5, Michigan; at a rate of not less than 25 cents per hour for a training period of 40 hours and 35 cents thereafter. Certificate is effective October 8, 1953, and expires September 30, 1954.

Michigan Veterans Facility, Soldiers' Home, 3000 Monroe Avenue, Grand Rapids 5, Michigan; at a rate of not less than 19 cents per hour. Certificate is effective October 1, 1953, and expires September 30, 1954.

Volunteers of America, 377-379 West Broad Street, Columbus 8, Ohio; at a rate of not less than 15 cents per hour for a training period of 40 hours and 30 cents thereafter. Certificate is effective October 5, 1953, and expires September 30, 1954.

Gary Goodwill Industries, Inc., 1224 Broadway, Gary, Indiana; at a rate of not less than 50 cents per hour. Certificate is effective November 1, 1953 and expires October 31, 1954.

Goodwill Industries of Fort Wayne, Inc., 112 East Columbia Street, Fort Wayne, Indiana; at a rate of not less than 40 cents per hour for a training period of 160 hours and 45 cents thereafter. Certificate is effective November 1, 1953 and expires October 31, 1954.

Minnesota Homecrafters, Inc., 1324 East First Street, Duluth, Minnesota; at a rate of not less than 10 cents per hour for a training period of 160 hours and 20 cents thereafter. Certificate is effective November 1, 1953 and expires October 31, 1954.

Minnesota Homecrafters, Inc., 3938 Minnehaha Avenue, Minneapolis, Minnesota; at a rate of not less than 10 cents per hour for a training period of 160 hours and 20 cents thereafter. Certificate is effective November 1, 1953 and expires October 31, 1954.

The Volunteers of America, Peoria Post, 823 South Jefferson Avenue, Peoria 6, Illinois; at a rate of not less than 50 cents per hour. Certificate is effective October 12, 1953, and expires September 30, 1954.

Wisconsin Workshop for the Blind, 2385 North Lake Drive, Milwaukee 11, Wisconsin; at a rate of not less than 35 cents per hour for a training period of 160 hours in the Cocoa Mat Shop and 50 cents thereafter. Certificate is effective October 1, 1953, and expires September 30, 1954.

Adult Training Center of the New Mexico School for the Blind, 408 Pennsylvania Avenue, Alamogordo, New Mexico; at a rate of not less than 40 cents per hour for a training period of 160 hours and 50 cents thereafter. Certificate is effective October 1, 1953, and expires September 30, 1954.

Goodwill Industries of San Antonio, Inc., 3822 Pleasanton Road, San Antonio 4, Texas; at a rate of not less than 40 cents per hour for a training period of 160 hours and 50 cents thereafter. Certificate is effective October 1, 1953 and expires September 30, 1954.

Goodwill Industries of Santa Clara County, Inc., 351 Lincoln Avenue, San Jose 25, California; at a rate of not less than 65 cents per hour. Certificate is effective October 20, 1953 and expires October 15, 1954.

The Volunteers of America, 2323 Kern Street, Fresno 1, California; at a rate of not less than 50 cents per hour for a training period of 80 hours and 65 cents thereafter. Certificate is effective October 1, 1953 and expires September 30, 1954.

The employment of handicapped clients in the above-mentioned sheltered workshops under these certificates is limited to the terms and conditions therein contained and is subject to the provisions of Part 525 of the regulations, as amended. These certificates have been issued on the applicants' representations that they are sheltered workshops as defined in the regulations and that special services are provided their handicapped clients. A sheltered workshop is defined as, "A charitable organization or institution conducted not for profit, but for the purpose of carrying out a recognized program of rehabilitation for individuals whose earning capacity is impaired by age or physical or mental deficiency or injury, and to provide such individuals with remunerative employment or other occupational rehabilitating activity of an educational or therapeutic nature."

These certificates may be cancelled in the manner provided by the regulations, as amended. Any person aggrieved by the issuance of any of these certificates may seek a review or reconsideration thereof within fifteen days after publication of this notice in the FEDERAL REGISTER.

Signed at Washington, D. C., this 14th day of December 1953.

JACOB I. BELLOW,
*Assistant Chief of Field Operations.*

## FEDERAL COMMUNICATIONS COMMISSION

[Docket Nos. 8873, 10766]

RADIO DIABLO, INC. AND KXOB, INC.

ORDER CONTINUING HEARING

In re applications of Radio Diablo, Inc., Stockton, California, Docket No. 8873, File No. BPCT-368; KXOB, Inc., Stockton, California, Docket No. 10766, File No. BPCT-1091; for construction permits for new television stations.

The Commission having under consideration a joint petition of the parties in the above matter for a continuance of the hearing presently scheduled for December 24, 1953; and

It appearing that counsel for the Chief of the Broadcast Bureau has no objection to the requested continuance; and that all the parties hereto have consented to a waiver of § 1.745 of the Commission's rules of practice and procedure so the matter may be considered immediately.

*It is ordered*, This 11th day of December 1953, that the joint petition of the parties to this proceeding for continuance of the above matter now scheduled for December 24, 1953, is granted, and the hearing is continued to 10:00 a. m., Monday, January 11, 1954, in Washington, D. C.

FEDERAL COMMUNICATIONS COMMISSION,
[SEAL] WM. P. MASSING,
*Acting Secretary.*

[Docket Nos. 8936, 10795, 10796]

LOYOLA UNIVERSITY ET AL.

ORDER CONTINUING HEARING

In re applications of Loyola University, New Orleans, Louisiana, Docket No. 8936, File No. BPCT-359; the Times-Picayune Publishing Company, New Orleans, Louisiana, Docket No. 10795, File No. BPCT-648; James A. Noe, Harry Allsman, Raymond F. Hufft, and James A. Noe, Jr., d/b as James A. Noe and Company, New Orleans, Louisiana, Docket No. 10796, File No. BPCT-1588; for construction permits for new television stations.

The Commission having under consideration a motion filed December 8, 1953, by James A. Noe and Company, requesting (1) that the hearing in the above-entitled proceeding, presently scheduled to commence December 31, 1953, be continued to January 4, 1954; and (2) that the date for the exchange of certain information among the applicants be continued until December 21, 1953, fifteen days prior to the proposed commencement of hearing; and

It further appearing that counsel for the other two applicants in the above-entitled proceeding and counsel for the Broadcast Bureau have agreed to a grant of such motion; and good cause has been shown for the grant thereof;

*It is ordered*, This 11th day of December 1953, that the motion for continuance be and it is hereby granted; and the hearing in the above-entitled proceeding be and it is hereby continued to January 4, 1954, and the date for exchange of information is continued to December 21, 1953.

FEDERAL COMMUNICATIONS COMMISSION,
[SEAL] WM. P. MASSING,
*Acting Secretary.*

[F. R. Doc. 53-10527; Filed, Dec. 17, 1953; 8:53 a. m.]

[Docket Nos. 8959, 10641]

RADIO WISCONSIN, INC. AND BADGER TELEVISION CO., INC.

ORDER RE ISSUES

In re applications of Radio Wisconsin, Incorporated, Madison, Wisconsin, Docket No. 8959, File No. BPCT–410; Badger Television Company, Inc., Madison, Wisconsin, Docket No. 10641, File No. BPCT–1472; for construction permits for new television broadcast stations.

At a session of the Federal Communications Commission held at its offices in Washington, D. C., on the 14th day of December 1953;

The Commission having under consideration a petition filed December 4, 1953, by Radio Wisconsin, Inc., seeking expeditious consideration of subject petitioner's "Supplemental Petition to Revise Hearing Issues and for Alternative Relief" filed November 16, 1953; and

It appearing that subject petitioner's supplemental petition filed November 16, 1953, requests as an alternative to the relief sought in said petition that the Commission modify its order of designation released August 14, 1953, to include an issue giving the Examiner discretionary authority to determine whether the funds available to Badger Television Company give reasonable assurance that the proposals set forth in said company's application will be effectuated; and

It further appearing that no objections to that part of the petition for alternative relief have been raised, provided the requested enlargement of the hearing issue also permits the Examiner to inquire into the issue of the sufficiency of the funds available to Radio Wisconsin, Inc.; and

It further appearing that the instant proceeding was designated for hearing on August 14, 1953; and

It further appearing that the question of whether or not the available funds of Radio Wisconsin, Inc., and Badger Television Company will be sufficient to effectuate their proposals, and hence whether or not the issues should be broadened to permit the receipt of evidence on this question, is a matter best left to the discretion of the Examiner after his receipt of allegations sufficiently particularized and material so that, if proved, they would establish significant differences between the competing proposals, all as set out in our Memorandum Opinion and Order In re South Central Broadcasting Corporation, et al., released October 7, 1953, Docket Nos. 10461–10464;

*It is ordered*, That the above-described petition of Radio Wisconsin, Inc., filed December 4, 1953, is granted to the extent that it requests enlargement of the issues in this proceeding by the Examiner upon sufficient allegations of fact made in support of said enlargement, by the addition of the following issue: To determine whether the funds available to the applicants will give reasonable assurance that the proposals set forth in their applications will be effectuated.

Released: December 14, 1953.

FEDERAL COMMUNICATIONS COMMISSION,

[Docket Nos. 10507, 10508]

HILLTOP MANAGEMENT CORP. AND NORTHERN ALLEGHENY BROADCASTING CO.

MEMORANDUM OPINION AND ORDER STAYING HEARING

In re applications of Hilltop Management Corporation, Kane, Pennsylvania, Docket No. 10507, File No. BP–8577; Northern Allegheny Broadcasting Co., Kane, Pennsylvania, Docket No. 10508, File No. BP–8671; for construction permits.

1. The Commission has under consideration a petition filed November 17, 1953, by Northern Allegheny Broadcasting Co. for review of certain of the Hearing Examiner's rulings in the above-entitled proceeding and for an order by the Commission staying the hearing scheduled to commence November 18, 1953.

2. Briefly stated, the circumstances which generated the request now under consideration are pertinently as follows: Each of the above-named parties applied for identical broadcast facilities in the same community and their applications were designated for hearing to begin November 18, 1953. Northern Allegheny on November 4, 1953, petitioned for leave to amend its application to another frequency and for removal from the hearing docket. On November 16, 1953, Northern Allegheny supplemented its November 4 petition to urge that both applications be removed from hearing upon acceptance of its amendment to specify another frequency. Northern Allegheny explains that it was prompted to file its supplemental petition by the allegedly surprise informal advice from the Examiner, several days before the scheduled hearing date, that retention of the Hilltop application in hearing was contemplated. The November 16 pleading urging that both applications be removed from hearing was coupled with a further petition by Northern Allegheny asking that the Examiner continue the November 18 scheduled hearing date for a reasonable period of time to permit resolution of the substantive question. On November 17 oral argument on these matters was held before the Examiner who ruled that the Northern Allegheny application be removed from hearing, that the Hilltop application be retained in hearing, and that the hearing go forward on November 18, as scheduled. From these rulings Northern Allegheny on the same day took its subject appeal.

3. At the outset, it should be noted that we are here addressing ourselves only to the Northern Allegheny request that the Examiner's refusal to continue the hearing be reviewed and a stay order issued, leaving for treatment at another place the merits of the substantive question. It is Northern Allegheny's position that the proposal of the Examiner to go forward on the next day with the scheduled hearing and, under the circumstances of the case, to issue an initial decision shortly thereafter, effectively abates the significance of its appeal. With this view we are in agreement. We do not interfere with the exercise of an Examiner's discretion on such matters as continuances, unless it appears in a given case that the action was arbitrary. In view of the provisions of paragraph (g) of Commission rule 1.373 [1] and under the circumstances of this case, it is our judgment that we should restrain the scheduled hearing to save the full significance of the substantive question.

4. *Accordingly, it is ordered*, This 18th day of November 1953, that the hearing on the above-entitled applications scheduled to commence November 18, 1953, is stayed until further notice from the Commission.

Released: December 8, 1953.

FEDERAL COMMUNICATIONS COMMISSION,
[SEAL] WM. P. MASSING,
*Acting Secretary.*

[Docket Nos. 10525, 10526]

LORAIN JOURNAL CO. AND ELYRIA-LORAIN BROADCASTING CO.

ORDER RE ISSUES

In re applications of the Lorain Journal Company, Lorain, Ohio, Docket No. 10525, File No. BPCT–1116; Elyria-Lorain Broadcasting Company, Elyria, Ohio, Docket No. 10526, File No. BPCT–1124; for construction permits for new televison broadcast station.

At a session of the Federal Communications Commission held at its offices in Washington, D. C., on the 11th day of December 1953;

The Commission having under consideration a petition filed on July 31, 1953, by Elyria-Lorain Broadcasting Company requesting that the financial and technical issues concerning the petitioner be deleted from the Commission's order of May 27, 1953, released June 1, 1953, designating the above-entitled applications for hearing; an opposition to the petition and motion to strike filed by The Lorain Journal Company on August 14, 1953; and a reply by the Chief of the Commission's Broadcast Bureau filed on August 10, 1953;

It appearing that in its order of May 27, 1953, the Commission designated the application of Elyria for hearing on financial and technical issues [1] as well as the standard comparative issues; and

It further appearing that by an amendment to its application, accepted on June 29, 1953, Elyria-Lorain showed the following changes: (1) Letters from the two banks which had made loan commitments to petitioner stating that each knew of the existence of the other's commitment; (2) a $42,500 increase in capital; (3) a letter from the equipment manufacturer deferring payments on equipment by an additional $25,000, thereby reducing cash requirements for equipment by $25,000; and (4) the selection of a new antenna site to alleviate the re-radiation problem to an existing AM station; and

It further appearing that Lorain Journal contends that in spite of Elyria's amended application it is not financially qualified, and that Elyria has not, in any event, shown "good cause" to permit late filing of its petition; and

It further appearing that Elyria by its amended application has made a prima facie showing it is financially qualified to construct, own and operate its proposed television broadcast station; and

It further appearing that the public interest will be served by permitting the Examiner on his own motion or on petition by one of the parties to the proceedings, to admit evidence designed to controvert the fact that available funds will be sufficient to effectuate the proposals of the applicants, In re South Central Broadcasting Co. (9 RR 1035); and

It further appearing that Elyria's new antenna site will resolve the re-radiation problem originally raised; and

It further appearing that Elyria-Lorain Broadcasting Company is financially qualified to the extent indicated herein and is technically qualified to construct, own and operate a television broadcast station; and

It further appearing that a grant of Elyria's petition would not be unfair to the competing applicant and that Elyria has made a convincing showing why it was not possible to file its motion within 15 days after the issues were published in the FEDERAL REGISTER as required by § 1.389 of the Commission's rules and regulations;

*It is ordered*, That the request for deletion of issues by Elyria-Lorain Broadcasting Co. is granted and that the motion to strike by the Lorain Journal Company is denied.

*It is further ordered*, That the Commission's order of May 27, 1953, released June 1, 1953, designating for hearing the above described applications is modified by the deletion of the issues with respect to the financial and technical qualifications of Elyria-Lorain Broadcasting Co.

*It is further ordered*, That the issues in the above-entitled proceeding may be enlarged by the Examiner, on his own motion or on petition properly filed by a party to the proceeding and upon sufficient allegations of fact in support thereof, by the addition of the following issue: To determine whether the funds available to the applicant will give reasonable assurance that the proposals set forth in the application will be effectuated.

Released: December 14, 1953.

FEDERAL COMMUNICATIONS COMMISSION,
[SEAL] WM. P. MASSING,
*Acting Secretary.*

[F. R. Doc. 53 10530; Filed, Dec. 17, 1953; 8:53 a. m.]

[1] Section 1.373 (g) reads in pertinent part as follows: "Frequently, when two cases are designated for hearing because they are mutually exclusive, one of the applicants amends and removes the conflict. Where this occurs the appropriate procedure is to petition for leave to amend and remove from the hearing docket. Such motions will be considered promptly and if it appears that the conflict which caused the case originally to be set for hearing has been removed and there is no other obvious conflict, the two cases will be removed from the hearing docket and placed back in their proper position (as determined by the file numbers) in the processing line."

[1] The financial and technical issues were based on the following questions raised in the Commission's "McFarland" letter of April 23, 1953:

(a) Whether the two banks which were going to loan $100,000 each to the petitioner knew of the existence of the other's commitment.

(b) Whether the sum of $240,000 cash available would be sufficient to meet cash requirements during the first year of approximately $251,091.

(c) Whether their proposed antenna site, which was 2,521 feet from the WEOL (AM) antenna structure, would affect the operation of WEOL.

---

[Docket Nos. 10799, 10800, 10801]

HAMPTON ROADS BROADCASTING CORP. ET AL.

ORDER DESIGNATING APPLICATIONS FOR CONSOLIDATED HEARING ON STATED ISSUES

In re applications of Hampton Roads Broadcasting Corporation, Newport News, Virginia, Docket No. 10799, File No. BPCT–502; Beachview Broadcasting Corporation, Norfolk, Virginia, Docket No. 10800, File No. BPCT–1605; Portsmouth Radio Corporation, Portsmouth, Virginia, Docket No. 10801, File No. BPCT–1750; for construction permits for new television stations.

At a session of the Federal Communications Commission held at its offices in Washington, D. C., on the 9th day of December 1953;

The Commission having under consideration the above-entitled applications, each requesting a construction permit for a new television broadcast station to operate on Channel 10 assigned to Norfolk-Portsmouth-Newport News, Virginia; and

It appearing that the above-entitled applications are mutually exclusive in that operation by more than one applicant would result in mutually destructive interference; and

It further appearing that pursuant to section 309 (b) of the Communications Act of 1934, as amended, the above-named applicants were advised by letters of the fact that their applications were mutually exclusive, of the necessity for a hearing and of all objections to their applications; and were given an opportunity to reply; and

It further appearing that Portsmouth Radio Corporation proposes an antenna of 1,000 feet above average terrain; that because of said antenna height, it may be necessary to specify special appropriate hazard markings; and that a grant, if made, of the aforementioned application should be subject to the following condition: "That the obstruction markings shall be in accordance with such hazard markings as the Commission may find necessary and appropriate."

It further appearing that upon due consideration of the above-entitled applications, the amendments filed thereto, and the replies to the above letters, the Commission finds that under section 309 (b) of the Communications Act of 1934, as amended, a hearing is mandatory; that Hampton Roads Broadcasting Corporation is technically qualified to construct, own and operate a television broadcast station except as to those matters specified in the issues below; that Beachview Broadcasting Corporation is legally and financially qualified to construct, own and operate a television broadcast station and is technically so qualified except as to the matter referred to in issue "6" below; and that Portsmouth Radio Corporation is legally, financially and technically qualified to construct, own and operate a television broadcast station.

*It is ordered*, That pursuant to section 309 (b) of the Communications Act of 1934, as amended, the above-entitled applications are designated for hearing in a consolidated proceeding to commence at 10:00 a. m. on the 8th of January 1954 in Washington, D. C., upon the following issues:

1. To determine whether Hampton Roads Broadcasting Corporation is authorized under its articles of incorporation to construct, own and operate its proposed television broadcast station.

2. To determine whether Hampton Roads Broadcasting Corporation is financially qualified to construct, own and operate its proposed television broadcast station.

3. To determine, in accordance with § 3.684 of the Commission's rules, the antenna height above average terrain proposed by Hampton Roads Broadcasting Corporation in its above-entitled application.

4. To determine whether the transmitter type specified by Hampton Roads Broadcasting Corporation in its above-entitled application is appropriate for operation on Channel 10.

5. To determine the power gain and power distribution of the antenna system proposed by Hampton Roads Broadcasting Corporation in its above-entitled application, and the effect thereof on the calculated effective radiated power.

6. To determine whether the installation of the station proposed by Beachview Broadcasting Corporation in its above-entitled application would constitute a hazard to air navigation.

7. To determine on a comparative basis which of the operations proposed in the above-entitled applications would best serve the public interest, convenience or necessity in the light of the record made with respect to the significant differences among the applications as to:

(a) The background and experience of each of the above-named applicants having a bearing on its ability to own

and operate the proposed television station.

(b) The proposals of each of the above-named applicants with respect to the management and operation of the proposed station.

(c) The programming service proposed in each of the above-entitled applications.

*It is further ordered*, That the issues in the above-entitled proceeding may be enlarged by the Examiner, on his own motion or on petition properly filed by a party to the proceeding and upon sufficient allegations of fact in support thereof, by the addition of the following issue: To determine whether the funds available to the applicant will give reasonable assurance that the proposals set forth in the application will be effectuated.

Released: December 14, 1953.

FEDERAL COMMUNICATIONS COMMISSION,

[Docket No. 10803]

VERI-TRIM PRODUCTS CO.

ORDER SCHEDULING MATTER FOR HEARING

In the matter of Cease and Desist Order to be directed to Arthur Cohen and Allen S. Finkelstein, tr/as Veri-Trim Products Company, 990 Myrtle Avenue, Brooklyn, N. Y.

The Commission having under consideration the issuance of an order pursuant to section 312 (b) of the Communications Act of 1934, as amended, to Arthur Cohen and Allen S. Finkelstein, tr/as, Veri-Trim Products Company (hereinafter referred to as Veri-Trim Products Company) to cease and desist from violating Part 18 of the Commission's rules by operating electronic heating equipment which (1) is the source of interference to authorized radio services, and (2) is not certified or licensed in accordance with the Commission's rules;

It appearing that Veri-Trim Products Company operates in its plant at 990 Myrtle Avenue, Brooklyn, N. Y., certain industrial heating equipment operating on approximately 30 Mc which is subject to the requirements of §§ 18.1, 18.2 (c), 18.3, 18.4, 18.21, 18.22, 18.23, 18.24 and 18.41 through 18.49 of the Commission's rules; and

It further appearing that the aforementioned equipment causes interference to an authorized radio communication system operated by the United States Army in the vicinity of New York, N. Y.; and

It further appearing that the aforementioned equipment has not been certified by a duly qualified engineer or the manufacturer of the equipment as required by § 18.22 of the Commission's rules, nor has the equipment been licensed pursuant to § 18.41 of the Commission's rules; and

It further appearing that the above facts have been called to the attention of the Veri-Trim Products Company by the Commission both orally and in writing, and that the company has been accorded an opportunity to demonstrate or achieve compliance with all lawful requirements but such demonstration has not been made and such compliance has not been accomplished;

*It is ordered*, This 11th day of December 1953, pursuant to section 312 (c) of the Communications Act of 1934, as amended, and pursuant to the Commission's order of September 30, 1953, delegating authority to the Chief, Field Engineering and Monitoring Bureau to issue orders to show cause why cease and desist orders should not be issued with respect to Industrial, Scientific, and Medical Equipment, that the Veri-Trim Products Company be and is hereby directed to show cause why there should not be issued an order commanding it to cease and desist from violating the provisions of Part 18 of the Commission's rules by operating industrial heating equipment without the certification or license required by Part 18 of the Commission's rules, and by operating such equipment in a manner which causes interference to authorized radio services; and

*It is further ordered*, That a hearing in this matter be held in New York, N. Y., at 10:00 a. m. on the 20th day of January 1954, in order to determine whether said cease and desist order should be issued and that Veri-Trim Products Company is herewith called upon to appear at this hearing and give evidence upon the matters specified herein; and

*It is further ordered*, Pursuant to § 1.402 of the rules, that said Veri-Trim Products Company is directed to file with the Commission within thirty days of the receipt of this order a written appearance in triplicate, stating that the Company will appear and present evidence on the matter specified in this order if the Company desires to avail itself of its opportunity to appear before the Commission. If said Veri-Trim Products Company does not desire to appear before the Commission and give evidence on the matter specified herein, it shall, within thirty days of the receipt of this order, file with the Commission, in triplicate, a written waiver of hearing. Such waiver may be accompanied by a statement of reasons why Veri-Trim Products Company believes that a cease and desist order should not be issued, and

*It is further ordered*, That failure of said Veri-Trim Products Company timely to respond to this order or failure to appear at the hearing designated herein will be deemed a waiver of hearing.

Released: December 14, 1953.

FEDERAL COMMUNICATIONS COMMISSION,

## FEDERAL POWER COMMISSION

[Docket Nos. G-2110, G-2329]

AMERE GAS UTILITIES CO.

ORDER PERMITTING CERTAIN TARIFF SHEETS TO TAKE EFFECT BY SUBSTITUTION AND SUSPENDING CERTAIN OTHER TARIFF SHEETS

On November 16, 1953, Amere Gas Utilities Company (Amere) tendered for filing its Second Revised Sheets Nos. 4 and 6 to its FPC Gas Tariff, First Revised Volume No. 1, proposing increases in its demand-commodity and transportation components of its Rate Schedule CDS-1 applicable to sales of gas to Bluefield Gas Company (Bluefield), its only resale customer.

On November 18, 1953, Amere tendered in substitution of its filing of November 16 its Second Revised Sheets Nos. 4 and 6 and Third Revised Sheet No. 4. The tendered filings make no substantive change from the tender of November 16, 1953, but are submitted so that the increase in the transportation component of the rate, which is claimed to be based upon presently experienced increased costs, might be considered separately from the proposed increase in the demand and commodity components which are based upon anticipated increased costs.

The substituted Second Revised Sheet No. 4 provides for an increase in the transportation component from 3 cents to 5 cents per Mcf and would result in an increase of $4,183 per year. The proposed 5 cents per Mcf charge is based on an allocation of costs for the lateral serving Bluefield during the 12-month period which ended September 30, 1953. Amere proposes that its Second Revised Sheet No. 4 become effective December 17, 1953. Such Second Revised Sheet would replace First Revised Sheet No. 4 now in effect under bond in Docket No. G-2110.

Amere requests that its Second Revised Sheet No. 6 and Third Revised Sheet No. 4, providing for changes in the demand and commodity components, and reflecting a revised heat content adjustment, which would result in a net increase of $2,237 per year, to become effective on such date as the Commission may determine, but in any event not later than March 1, 1954. This proposed increase is in addition to the proposed increase of $32,662 in effect under bond in Docket No. G-2110, which the Commission found has not been shown to be justified and may be unjust or unreasonable, or otherwise unlawful. Likewise, the rates and charges provided in Amere's Second Revised Sheet No. 6 and Third Revised Sheet No. 4, as filed on November 18, 1953, have not been shown to be justified and may be unjust or unreasonable, or otherwise unlawful.

Amere states that the proposed Second Revised Sheet No. 6 and Third Revised Sheet No. 4 reflect a proposed increase in rates from Atlantic Seaboard Corporation now under suspension in Docket No. G-2275, pursuant to Commission orders issued October 13 and 26, 1953.

On December 7, 1953, Bluefield filed protests and objections to the proposed increase in rates. A protest has also been received from the Public Service Commission of West Virginia.

The Commission finds:

(1) Good cause exists to permit the aforesaid Second Revised Sheet No. 4 to Amere's FPC Gas Tariff, First Revised Volume No. 1, to take effect as of December 17, 1953, as hereinafter ordered.

(2) It is necessary and proper in the public interest, and in aid of the enforcement of the provisions of the Natural Gas Act, that the Commission enter upon a hearing, pursuant to the authority contained in section 4 of such act, concerning the lawfulness of Amere's FPC Gas Tariff, First Revised Volume No. 1 as proposed to be amended by Second Revised Sheet No. 6 and Third Revised Sheet No. 4, and that such sheets be suspended as hereinafter provided and the use thereof be deferred pending hearing and decision thereon.

The Commission orders:

(A) Amere's Second Revised Sheet No. 4 to its FPC Gas Tariff, First Revised Volume No. 1, tendered for filing on November 18, 1953, is hereby permitted to take effect as of December 17, 1953. Said Second Revised Sheet No. 4 shall be substituted for Amere's First Revised Sheet No. 4 to its FPC Gas Tariff, First Revised Volume No. 1, and shall be subject to review in the proceedings in Docket No. G-2110 and the terms and conditions of the bond posted pursuant to the order issued July 16, 1953.

(B) Pursuant to the authority contained in section 4 of the Natural Gas Act, a public hearing be held in Docket No. G-2329 upon a date to be fixed by further order of the Commission concerning the lawfulness of the rates, charges and classifications contained in Amere's FPC Gas Tariff, First Revised Volume No. 1, as amended by Second Revised Sheet No. 6 and Third Revised Sheet No. 4.

(C) Pending hearing and decision in Docket No. G-2329, Amere's Second Revised Sheet No. 6 and Third Revised Sheet No. 4 to its FPC Gas Tariff, First Revised Volume No. 1, be and the same are hereby suspended, and the use thereof is deferred until March 1, 1954, and until such further time thereafter as said proposed tariff sheets may be made effective in the manner prescribed by the Natural Gas Act.

(D) Interested State commissions may participate as provided by §§1.8 and 1.37 (f) [18 CFR 1.8 and 1.37 (f)] of the Commission's rules of practice and procedure.

Adopted: December 9, 1953.

Issued: December 14, 1953.

By the Commission.

[SEAL] LEON M. FUQUAY,
*Secretary.*

[Docket No. G-2141]

SOUTHERN NATURAL GAS CO.

ORDER FIXING DATE FOR RESUMPTION OF HEARING

On December 1, 1953, the hearing in this proceeding was recessed to reconvene on January 5, 1954. Staff Counsel had requested, on the record, a recess until February 8, 1954, alleging, among other matters, prior commitments of the Staff in other proceedings. The parties to the proceeding indicated that they did not object to Staff Counsel's request.

On December 4, 1953, Staff Counsel filed a motion for postponement of the hearing from January 5, 1954, to February 8, 1954, for the reasons above stated.

The Commission finds: Good cause exists for reconvening of the hearing in this proceeding as hereinafter ordered and it is desirable that all parties be notified as soon as practicable of the postponement granted herein.

The Commission orders: The public hearing in this proceeding be resumed on February 15, 1954, at 10:00 a. m., e. s. t., in the Hearing Room of the Federal Power Commission, 441 G Street, NW., Washington, D. C.

Adopted: December 9, 1953.

Issued: December 14, 1953.

By the Commission.

[SEAL] LEON M. FUQUAY,
*Secretary.*

[Docket Nos. G-2290, G-2304, G-2325]

TENNESSEE GAS TRANSMISSION CO. ET AL.

NOTICE OF APPLICATIONS

DECEMBER 14, 1953

In the matters of Tennessee Gas Transmission Company, Docket No. G-2290; The Manufacturers Light and Heat Company, Docket No. G-2304; The Ohio Fuel Gas Company, Docket No. G-2325.

Take notice that on October 21, 1953, Tennessee Gas Transmission Company (Tennessee), a Delaware corporation, address, Houston, Texas, filed an application in Docket No. G-2290, for a certificate of public convenience and necessity pursuant to section 7 of the Natural Gas Act, authorizing the delivery of up to 15,300 Mcf (at 14.73 p. s. i. a.) of natural gas per day to The Ohio Fuel Gas Company (Ohio Fuel Gas) for the account of The Manufacturers Light and Heat Company (Manufacturers), at a new delivery point to be located in Guernsey County, Ohio, and authorizing the construction and operation at said new delivery point of metering and regulating facilities required for such delivery. The estimated cost of the proposed facilities is $16,500, which Tennessee proposes to pay for from cash on hand.

On November 9, 1953, Manufacturers, a Pennsylvania corporation, address, Pittsburgh, Pennsylvania, filed an application in Docket No. G-2304, requesting authorization pursuant to section 7 of the Natural Gas Act to release and assign to its affiliate, Ohio Fuel Gas, the right to purchase up to 15,300 Mcf (at 14.73 p. s. i. a.) of natural gas per day from The Chicago Corporation, and to have said gas transported and delivered by Tennessee to Ohio Fuel Gas at said new delivery point to be constructed by Tennessee, as hereinbefore described. On December 3, 1953, Manufacturers filed an amendment to said application in which it is stated that Manufacturers proposes to transfer to Ohio Fuel Gas all Manufacturers' right, title and interest in the gas proposed to be delivered into the facilities of Ohio Fuel Gas by Tennessee simultaneously with such delivery so that full title thereto shall then be in Ohio Fuel Gas, and as part of its FPC Gas Tariff, Manufacturers proposes to file a letter agreement with Ohio Fuel Gas providing for release and assignment to Ohio Fuel Gas of Manufacturers' title to such volumes of gas. No new facilities are proposed to be constructed by Manufacturers in connection with said proposal.

On December 3, 1953, Ohio Fuel Gas, an Ohio corporation, address, Columbus, Ohio, filed an application in Docket No. G-2325, for a certificate of public convenience and necessity pursuant to section 7 of the Natural Gas Act authorizing the construction and operation of (1) approximately 1.3 miles of $10^{3}/_{4}$ inch natural-gas transmission pipe line connecting an existing 26-inch transmission pipe line of Tennessee with Applicants $12^{3}/_{4}$ inch Line O-389 in Cambridge Township, Guernsey County, Ohio, and (2) facilities required in connection with the expansion of underground storage by the conversion of a natural gas producing pool to storage service in Guernsey and Coshocton Counties, Ohio, said facilities including approximately 3.3 miles of $8^{5}/_{8}$ inch connecting line, 24.1 miles of $3^{1}/_{2}$ inch and $12^{3}/_{4}$ inch project piping, together with measurement facilities, auxiliary equipment, valves and incidental facilities.

Ohio Fuel Gas proposes, by means of said facilities, to receive into its system up to 15,300 Mcf (at 14.73 p. s. i. a.) of natural gas per day from the facilities of Tennessee in accordance with the proposals set forth in the applications filed in Docket Nos. G-2290 and G-2304, hereinbefore described. Ohio Fuel Gas proposes to utilize said gas (1) to protect service in Applicant's retail markets in eastern Ohio, in the areas of Coshocton, Zanesville, and Cambridge, Ohio, during current and future winter periods, by maintaining sufficient capacity to avoid pressure drops at town border stations, particularly at Cambridge, and (2) to activate and operate a storage pool in Guernsey and Coshocton Counties, in Ohio, designated as Guernsey 8-A, which project heretofore was denied by the Commission in its order issued on February 6, 1953 in Docket No. G-1985, because of the dependency of such project upon facilities and operations for which no applications had been filed by Manufacturers and Tennessee. The facilities for which authorization was denied by the Commission's order are the same facilities at those for which certification is sought herein.

The estimated total overall capital cost of the facilities proposed by Ohio Fuel Gas is $564,200. Ohio Fuel Gas proposes to pay for such cost with funds to be provided by its parent, The Columbia Gas System, Inc., which will purchase the notes and common stock of Ohio Fuel

Gas as funds are required to meet construction costs.

Protests or petitions to intervene may be filed with the Federal Power Commission, Washington 25, D. C., in accordance with the rules of practice and procedure (18 CFR 1.8 or 1.10) on or before the 6th day of January 1954. The applications are on file with the Commission for public inspection.

[Project No. 2146]

ALABAMA POWER CO.

NOTICE OF APPLICATION FOR PRELIMINARY PERMIT

DECEMBER 14, 1953.

Public notice is hereby given that Alabama Power Company, of Birmingham, Alabama, has filed application under the Federal Power Act (16 U. S. C. 791a–825r) for preliminary permit for proposed Project No. 2146 to be located on the Coosa River in Elmore, Shelby, Talladega, St. Clair, Calhoun, Etowah and Cherokee Counties, Alabama, and in Floyd County, Georgia, and affecting lands of the United States occupied by navigation locks and dams and by Alabama Ordnance Works near Childersberg, Alabama. The proposed project would include several dams in Coosa River to develop about 200 feet of undeveloped power head of which about 35 feet of head is below the existing Jordan Dam and the balance is in the 180-mile reach of the river between the existing Lay Reservoir and Rome, Georgia. The initial proposed installation of generating facilities would have a capacity of about 321,000 horsepower and would produce about 1,155 million kwh annually. The energy would be utilized through the applicant's transmission system in Alabama and through interconnections with utilities operating in Georgia, Florida and Mississippi and with the Tennessee Valley Authority. The preliminary permit, if issued, shall be for the sole purpose of maintaining priority of application for license under the terms of the Federal Power Act for the proposed project.

Protests or petitions to intervene may be filed with the Federal Power Commission, Washington 25, D. C., in accordance with the rules of practice and procedure of the Commission (18 CFR 1.8 or 1.10) on or before January 25, 1954. The application is on file with the Commission for public inspection.

## DEPARTMENT OF AGRICULTURE

### Commodity Credit Corporation

SALES OF CERTAIN COMMODITIES AT FIXED PRICES

DECEMBER 1953 DOMESTIC AND EXPORT PRICE LISTS

Pursuant to the Pricing Policy of Commodity Credit Corporation issued March 22, 1950, as amended January 9, 1953 (15 F. R. 1593, 18 F. R. 176) and subject to the conditions stated therein, the following commodities are available for sale in the quantities and at the prices stated:

DECEMBER 1953 EXPORT PRICE LIST

| Commodity and approximate quantity available (subject to prior sale) | Export price list |
|---|---|
| Cottonseed oil, refined, 796,000,000 pounds.[1] | Bid basis f. o. b. tankcars or tankwagons at points of storage locations. Available New Orleans CSS Commodity Office. (A recent sale was made by CCC to a new export outlet at 12.5 cents per pound, basis p. b. s. y. ex tank at storage location.) |
| Cottonseed oil, crude, 15,000,000 pounds.[1] | Bid basis f. o. b. tankcars or tankwagons at producer's mills. Available New Orleans CSS Commodity office. |
| Linseed oil, raw, 143,300,000 pounds.[1] | Bid basis f. o. b. tankcars at points of storage locations. Available Chicago, Dallas, New Orleans, Portland, and Minneapolis CSS Commodity offices. (A recent large export sale was made by CCC at 8.5 cents per pound, basis ex Lank at storage location.) |
| Olive oil, edible, 202,825 gallons [1]--- | Bid basis in 50/55 gallon drums f. o. b. points of storage locations. Available Portland CSS Commodity office. |
| Peanuts, shelled, bagged (for crushing). | Bid basis, f. a. s. vessel at specified ports, subject to terms and conditions of USDA Announcement FO-29-53. Peanuts may be 1953 crop peanuts acquired by calling loans, as well as CCC stocks from previous crops. (These peanuts are also available as farmer's stock for export on bid basis, f. o. b. points of storage locations subject to the terms and conditions of USDA Announcements CCC Peanut Forms 34 and 40.) Available Fats and Oils Branch, CSS, USDA, Washington 25, D. C., and New Orleans CSS Commodity office. |
| Baby lima beans, bagged, 1950 and 1951 crops, 68,918 hundredweight | U. S. No. 1 Grade, $4 per 100 pounds, basis f. a. s. San Francisco Bay area. For other grades, adjust by market differentials. Available Portland CSS Commodity office. |
| Wheat, bulk---------- | As stated in USDA press release of November 19, 1953, wheat will be made available at export prices as wheat or flour under separate announcement. Available Chicago, Minneapolis, Kansas City, New Orleans, Dallas, and Portland CSS Commodity offices. |
| Corn, bulk, 50,000,000 bushels[1]--- | Market price on date of sale at point of delivery, provided delivery takes place within 15 days unless otherwise agreed upon. |

[1] These same lots also are available at domestic sales prices announced today.

DECEMBER 1953 DOMESTIC PRICE LIST

| Commodity and approximate quantity available (subject to prior sale) | Domestic sales price |
|---|---|
| Nonfat dry milk solids, in carload lots only, 345,000,000 pounds, spray; 75,000,000 pounds, roller. | Spray process, U. S. Extra Grade, 17 cents per pound. Roller process, U. S. Extra Grade, 15 cents per pound. Prices apply "in store" at location of stocks in any State ("in store" means at the processor's plant or in storage at warehouse, but with any prepaid storage and outhandling charges for the benefit of the buyer). |
| Salted creamery butter (in carload lots only), 250,000,000 pounds. | U. S. Grade A and higher: All States except those listed below, 68.75 cents per pound New York, New Jersey, Pennsylvania, New England and other States bordering the Atlantic Ocean and Gulf of Mexico, 69.50 cents per pound. California, Oregon, and Washington, 69.75 cents per pound. U. S. Grade B: 2 cents per pound less than Grade A prices. Prices apply "in store" at location of stocks in those States where butter is stored ("in store" means at the processor's plant or warehouse but with any prepaid storage and outhandling charges for the benefit of the buyer.) |
| Cheddar cheese, cheddar and twin styles (standard moisture basis, in carload lots only), 200,000,000 pounds. | U. S. Grade A and higher: All States except those listed below, 39 cents per pound: New York, New Jersey, Pennsylvania, New England and other States bordering the Atlantic and Pacific Oceans and Gulf of Mexico, 40 cents per pound. U. S. Grade B: 1 cent per pound less than Grade A prices. Prices apply "in store" at location of stocks in those States where cheese is stored. All prices are subject to usual adjustment for moisture content. ("In store" means at the processor's plant or warehouse but with any prepaid storage and outhandling charges for the benefit of the buyer). |
| Cottonseed oil, refined, 796,000,000 pounds.[1] | Market price but not less than the minimum grade price, with appropriate adjustments for refining, location and quality f. o. b. tankcars or tankwagons at points of storage locations. Available New Orleans CSS Commodity office. Price will not be reduced during period ending August 31, 1954. |
| Cottonseed oil, crude, 15,000,000 pounds.[1] | Market price but not less than 15 cents per pound, prime, Valley basis, f. o. b. tankcars or tankwagons at producer's mills subject to premiums or discounts comparable to Bulletin 3 of the 1953 crop cottonseed price support program. Available New Orleans CSS Commodity office. Price will not be reduced during period ending August 31, 1954. |

[1] These same lots also are available at export sales prices announced today.

DECEMBER 1953 DOMESTIC PRICE LIST—Continued

| Commodity and approximate quantity available (subject to prior sale) | Domestic sales price |
|---|---|
| Slender wheatgrass seed (uncertified), bagged, 280 hundredweight. | Market price on date of sale, but not less than equivalent of the 1953 price support level for Idaused. Price will not be reduced during period ending July 31, 1954. Available Chicago, Dallas, New Orleans, Portland, and Minneapolis CSS Commodity offices. |
| Primar slender wheatgrass seed (certified), bagged, 297 hundredweight. | Market price or $24.98 per gallon in 55-gallon drums, whichever is higher, f. o. b. points of storage locations. Available Portland CSS Commodity office. |
| Alfalfa seed, northern, bagged, 176,768 hundredweight. | Bid basis, f. o. b. points of storage locations, subject to terms and conditions of Announcement FO-29-53. In addition, farmer's stock peanuts are also available as farmer's stock for export on bid basis, f. o. b. points of storage locations subject to the terms and conditions of USDA Announcements CCC Peanut Forms 34 and 40. Available New Orleans CSS Commodity office. |
| Alfalfa seed, central, bagged, 36,436 hundredweight. | On all beans, for areas other than those shown below, adjust price upward or downward by an amount equal to the price support level differential between areas. Where no price support level differential has been announced for the type of beans listed will apply. For other types of beans, adjust by market differentials. Prices are f. o. b. point of production. Amount of paid-in freight to be added, as applicable. |
| Alfalfa seed, southern, bagged, 4,470 hundredweight. | $12.74 per 100 pounds for U. S. No. 1 basis California points of production. Available Portland CSS Commodity office. |
| Alfalfa seed (certified), bagged, Ranger, 8,245 hundredweight; Ladak, 9,196 hundredweight; Grimm, 7,688 hundredweight; Buffalo, 43,692 hundredweight; Atlantic, 6,155 hundredweight; Hardigan, 1,823 hundredweight; Indian, 1,180 hundredweight. | On all seeds except lading: Offers will not be accepted for less than the minimum carlot weight as prescribed by railroad carrier's tariff governing the point of storage, however, if quantity available at any location is less than carlot, offers will be accepted for such lesser quantity. |
| Alfalfa seed (certified), bagged, Atlantic, 6,155 hundredweight. | $6.25 per 100 pounds, f. o. b. point of production, plus any paid-in freight as applicable basis current freight rate at time of sale. Price will not be reduced during period ending June 30, 1954. Available Portland, Dallas, Chicago, and Minneapolis CSS Commodity offices. |
| Red clover seed (uncertified), bagged, 110,400 hundredweight. | $36.75 per 100 pounds, f. o. b. point of production, plus any paid-in freight as applicable basis current freight rate at time of sale. Price will not be reduced during period ending June 30, 1954. Available Portland, Chicago, Kansas City, Minneapolis, and New Orleans CSS Commodity offices. |
| Red clover seed (certified), bagged, Cumberland, 1,000 hundredweight; Midland, 625 hundredweight. | $36.75 per 100 pounds, f. o. b. point of production, plus any paid-in freight as applicable basis current freight rate at time of sale. Price will not be reduced during period ending June 30, 1954. Available Portland, Kansas City, and Minneapolis CSS Commodity offices. |
| Red clover seed (Kenland certified), bagged, 140 hundredweight. | $43 per 100 pounds, f. o. b. point of production, plus any paid-in freight as applicable basis current freight rate at time of sale. Price will not be reduced during period ending June 30, 1954. Available Portland CSS Commodity office. |
| White clover seed, bagged, 1,000 hundredweight. | $83.50 per 100 pounds, f. o. b. area of production, plus any paid-in freight as applicable basis current freight rate at time of sale. Price will not be reduced during period ending June 30, 1954. Available New Orleans CSS Commodity office. |
| Ladino clover seed, bagged (certified), 144,810 hundredweight. | $65 per 100 pounds, basis f. o. b. point of production, plus any paid-in freight, as applicable, $60 in lots of 60,000 pounds, or more. Available Portland and Minneapolis, and Kansas City, CSS Commodity offices. |
| Crimson clover seed, bagged, 1,040 hundredweight. | $18 per 100 pounds, f. o. b. point of production, plus any paid-in freight as applicable basis current freight rate at time of sale. Available Portland and New Orleans CSS Commodity offices. |
| Biennial sweet clover seed, bagged, 25,960 hundredweight. | $9.45 per 100 pounds, f. o. b. point of production, plus any paid-in freight as applicable basis current freight rate at time of sale. Price will not be reduced during period ending June 30, 1954. Available Kansas City, Minneapolis, Chicago, and Portland CSS Commodity offices. |
| Alsike clover seed, bagged, 19,220 hundredweight. | $27 per 100 pounds, f. o. b. point of production, plus any paid-in freight as applicable basis current freight rate at time of sale. Price will not be reduced during period ending June 30, 1954. Available Portland, Kansas City, and Chicago CSS Commodity offices. |
| Smooth bromegrass seed (uncertified), bagged, 770 hundredweight. | $15.75 per 100 pounds, f. o. b. point of production, plus any paid-in freight as applicable basis current freight rate at time of sale. Price will not be reduced during period ending June 30, 1954. Available Portland CSS Commodity office. |
| Smooth bromegrass seed (Manchar certified), bagged, 345 hundredweight. | $22.50 per 100 pounds, f. o. b. point of production, plus any paid-in freight as applicable basis current freight rate at time of sale. Price will not be reduced during period ending June 30, 1954. Available Portland CSS Commodity Office. |
| Mountain bromegrass seed (Bromar certified), bagged, 530 hundredweight. | $21 per 100 pounds, f. o. b. point of production, plus any paid-in freight as applicable basis current freight rate at time of sale. Price will not be reduced during period ending June 30, 1954. Available Portland CSS Commodity office. |
| Hairy vetch seed, bagged, 199,800 hundredweight. | $1 plus 1953 support price per 100 pounds, f. o. b. point of production plus any $1 plus in freight as applicable basis current freight rate at time of sale. Available Portland and New Orleans CSS Commodity offices. |
| Birdsfoot trefoil seed, bagged, 826 hundredweight. | $78.75 per 100 pounds, f. o. b. point of production, plus any paid-in freight as applicable basis current freight rate at time of sale. Price will not be reduced during period ending June 30, 1954. Available Portland CSS Commodity office. |

[1] These same lots also are available at export sales prices announced today.

[1] The above prices will not be applicable to sales made in connection with drought relief programs carried out in disaster areas.

(Sec. 407, 63 Stat. 1051)

Issued: December 14, 1953.

## GENERAL SERVICES ADMINISTRATION

PRESIDENT, VIRGIN ISLANDS CORP.

DELEGATION OF AUTHORITY WITH RESPECT TO DISPOSAL OF DISTILLERY PROPERTY LOCATED IN ST. CROIX, VIRGIN ISLANDS

1. Pursuant to authority vested in me by the Federal Property and Administrative Services Act of 1949, as amended, (hereinafter referred to as "the act") I hereby authorize the President of the Virgin Islands Corporation, a wholly owned Government corporation created by the act of June 30, 1949 (63 Stat. 350, 48 U. S. C., sec. 1407 et seq.) to determine that the distillery property located on the Island of St. Croix, owned by the Corporation, is not required for the needs and responsibilities of Federal agencies, and to dispose of such property by negotiated sale, or lease with option to purchase upon such terms as may be deemed advantageous to the United States.

2. Prior to such determination and disposal of the property, the President of the Virgin Islands Corporation shall take such steps as may be appropriate to determine whether any Federal agency has need therefor, and, if so, shall transfer the property to such agency upon such terms as to reimbursement as may be prescribed in accordance with the provisions of section 202 (a) of the act, as amended by section 1 (f) of Public Law 522, 82d Congress.

3. The President of the Virgin Islands Corporation shall submit to the appropriate Committees of Congress an explanatory statement of the type required by section 203 (e) of the act, as amended by section 1 (i) of Public Law 522, 82d Congress, at least thirty (30) days prior to the consummation of any sale or lease negotiated hereunder. A copy of each such statement shall be furnished to this Administration.

4. This delegation of authority shall be effective as of the date hereof.

EDMUND F. MANSURE,
*Administrator.*

## SECURITIES AND EXCHANGE COMMISSION

[File No. 70-3164]

NEW YORK STATE NATURAL GAS CORP.

ORDER DISMISSING APPLICATION

DECEMBER 14, 1953.

New York State Natural Gas Corporation ("New York Natural"), a nonutility subsidiary of Consolidated Natural Gas Company, a registered holding company, having filed an application pursuant to section 10 of the Public Utility Holding Company Act of 1935 requesting approval of its proposed acquisition from The Manufacturers Light and Heat Company, a non-affiliated public-utility company, for a cash consideration of $63,150.73, of certain properties to be incorporated into and to become a part of New York Natural's Oakford Storage Area, in Westmoreland County, Pennsylvania; and

The Commission having considered the application and having entered its Memorandum Opinion herein concluding that it has no jurisdiction over the proposed acquisition and that no application in connection therewith is required:

*It is ordered*, That said application be, and hereby is, dismissed for lack of jurisdiction.

By the Commission.

[SEAL] ORVAL L. DUBOIS,
*Secretary.*

## INTERSTATE COMMERCE COMMISSION

[4th Sec. Application 28742]

GROUND LIMESTONE FROM ILLINOIS AND MISSOURI TO SOUTHERN POINTS

APPLICATION FOR RELIEF

DECEMBER 15, 1953.

The Commission is in receipt of the above-entitled and numbered application for relief from the long-and-short-haul provision of section 4 (1) of the Interstate Commerce Act.

Filed by: R. G. Raasch, Agent, for carriers parties to schedule listed below.

Commodities involved: Limestone, ground, carloads.

From: Marblehead and Quincy, Ill., Hannibal, White Bear and Louisiana, Mo.

To: Specified points in Florida, Kentucky, North Carolina, Tennessee and Virginia.

Grounds for relief: Competition with rail carriers and circuitous routes.

Schedules filed containing proposed rates: R. G. Raasch, Agent, I. C. C. No. 784, supp. 7.

Any interested person desiring the Commission to hold a hearing upon such application shall request the Commission in writing so to do within 15 days from the date of this notice. As provided by the general rules of practice of the Commission, Rule 73, persons other than applicants should fairly disclose their interest, and the position they intend to take at the hearing with respect to the application. Otherwise the Commission, in its discretion, may proceed to investigate and determine the matters involved in such application without further or formal hearing. If because of an emergency a grant of temporary relief is found to be necessary before the expiration of the 15-day period, a hearing, upon a request filed within that period, may be held subsequently.

By the Commission.

[SEAL] GEORGE W. LAIRD,
*Secretary.*

[F. R. Doc. 53-10505; Filed, Dec. 17, 1953; 8:49 a. m.]

[4th Sec. Application 28743]

CLASS AND COMMODITY RATES FROM AND TO VINSON, TEXAS, AND BETWEEN SOUTHWESTERN, SOUTHERN, OFFICIAL, WESTERN TRUNK-LINE, ILLINOIS TERRITORIES AND ADJACENT POINTS

APPLICATION FOR RELIEF

DECEMBER 15, 1953.

The Commission is in receipt of the above-entitled and numbered application for relief from the long-and-short-haul provision of section 4 (1) of the Interstate Commerce Act.

Filed by: F. C. Kratzmeir, Agent, for carriers parties to schedules listed below.

Commodities involved: Class and commodity rates.

Between: Vinson, Texas, on the one hand and points in southwestern, southern, official, western trunk-line and Illinois territories, and adjacent points, on the other.

Grounds for relief: Competition with rail carriers, circuitous routes, and to maintain grouping.

Schedules filed containing proposed rates: F. C. Kratzmeir, Agent, I. C. C. No. 3912, supp. 230; F. C. Kratzmeir, Agent, I. C. C. No. 3967, supp. 293.

Any interested person desiring the Commission to hold a hearing upon such application shall request the Commission in writing so to do within 15 days from the date of this notice. As provided by the general rules of practice of the Commission, Rule 73, persons other than applicants should fairly disclose their interest, and the position they intend to take at the hearing with respect to the application. Otherwise the Commission, in its discretion, may proceed to investigate and determine the matters involved in such application without further or formal hearing. If because of an emergency a grant of temporary relief is found to be necessary before the expiration of the 15-day period, a hearing, upon a request filed within that period, may be held subsequently.

By the Commission.

[SEAL] GEORGE W. LAIRD,
*Secretary.*

[F. R. Doc. 53-10506; Filed, Dec. 17, 1953; 8:49 a. m.]

[4th Sec. Application 28744]

VERMICULITE FROM FRANKLIN, N. C., TO OFFICIAL TERRITORY

APPLICATION FOR RELIEF

DECEMBER 15, 1953.

The Commission is in receipt of the above-entitled and numbered application for relief from the long-and-short-haul provision of section 4 (1) of the Interstate Commerce Act.

Filed by: R. E. Boyle, Jr., Agent, for carriers parties to schedule listed below.

Commodities involved: Vermiculite, in carloads.

From: Franklin, N. C.

To: Points in official and Illinois territories.

Grounds for relief: Rail competition, circuity, to apply rates constructed on the basis of the short line distance formula and additional origin.

Schedules filed containing proposed rates: C. A. Spaninger, Agent, I. C. C. No. 1346, supp. 32.

Any interested person desiring the Commission to hold a hearing upon such application shall request the Commission in writing so to do within 15 days from the date of this notice. As provided by the general rules of practice of the Commission, Rule 73, persons other than applicants should fairly disclose their interest, and the position they intend to take at the hearing with respect to the application. Otherwise the Commission, in its discretion, may proceed to investigate and determine the matters involved in such application without further or formal hearing. If because of an emergency a grant of temporary relief is found to be necessary before the expiration of the 15-day period, a hearing, upon a request filed within that period, may be held subsequently.

By the Commission.

[SEAL] GEORGE W. LAIRD,
*Secretary.*

[F. R. Doc. 53-10507; Filed, Dec. 17, 1953; 8:49 a. m.]

[4th Sec. Application 28745]

MOTOR-RAIL RATES IN THE EAST; SUBSTITUTED SERVICE

APPLICATION FOR RELIEF

DECEMBER 15, 1953.

The Commission is in receipt of the above-entitled and numbered application for relief from the long-and-short-haul provision of section 4 (1) of the Interstate Commerce Act.

Filed by: The New York, New Haven and Hartford Railroad Company and Schuster's Express, Inc.

Commodities involved: Semi-trailers, loaded or empty, on flat cars.

Between: Boston, Mass., Hartford and New Haven, Conn., Springfield and Worcester, Mass., on the one hand, and Harlem River, N. Y., Elizabeth and Edgewater, N. J., on the other.

Grounds for relief: Competition with motor carriers.

Any interested person desiring the Commission to hold a hearing upon such application shall request the Commission in writing so to do within 15 days from the date of this notice. As provided by the general rules of practice of the Commission, Rule 73, persons other than applicants should fairly disclose their interest, and the position they intend to take at the hearing with respect to the application. Otherwise the Commission, in its discretion, may proceed to investigate and determine the matters involved in such application without further or formal hearing. If because of an emergency a grant of temporary relief is found to be necessary before the expiration of the 15-day period, a hearing, upon a request filed within that period, may be held subsequently.

By the Commission.

[SEAL] GEORGE W. LAIRD,
*Secretary.*

[4th Sec. Application 28746]

ALUMINUM BILLETS FROM LA FAYETTE, IND., TO ST. LOUIS, MO.

APPLICATION FOR RELIEF

DECEMBER 15, 1953.

The Commission is in receipt of the above-entitled and numbered application for relief from the long-and-short-haul provision of section 4 (1) of the Interstate Commerce Act.

Filed by: H. R. Hinsch, Alternate Agent, for carriers parties to schedules listed in appendix A of the application pursuant to fourth-section order No. 17220.

Commodities involved: Aluminum billets, blooms, ingots, pigs or slabs, carloads.

From: La Fayette, Ind.

To: St. Louis, Mo.

Grounds for relief: Competition with rail carriers and circuitous routes.

Any interested person desiring the Commission to hold a hearing upon such application shall request the Commission in writing so to do within 15 days from the date of this notice. As provided by the general rules of practice of the Commission, Rule 73, persons other than applicants should fairly disclose their interest, and the position they intend to take at the hearing with respect to the application. Otherwise the Commission, in its discretion, may proceed to investigate and determine the matters involved in such application without further or formal hearing. If because of an emergency a grant of temporary relief is found to be necessary before the expiration of the 15-day period, a hearing, upon a request filed within that period, may be held subsequently.

[Drought Order 51, Amdt. 1]

UTAH AND WYOMING

ORDER AMENDING ORDER TO INCLUDE PROVISION FOR TRANSPORTATION AND RETURN OF LIVESTOCK

In the matter of relief under section 22 of the Interstate Commerce Act.

Upon consideration of a request by the Under Secretary of Agriculture dated December 11, 1953, to include the movement of livestock within the terms of the order:

*It is ordered*, That the order of December 3, 1953, be, and it is hereby, amended to include within its provisions, the transportation of livestock from Utah and Wyoming and the subsequent return of the livestock to those states.

*It is further ordered*, That notice to the affected railroads and the general public shall be given by depositing a copy of this order in the office of the Secretary of the Commission and by filing a copy with the Director, Division of the Federal Register; and that copies be mailed to the Chairman of the Traffic Executive Association-Eastern Railroads, New York, N. Y., the Chairman of the Southern Freight Association, Atlanta, Georgia, the Chairman of the Executive Committee, Western Traffic Association, Chicago, Ill., the Traffic Vice-President of the Association of American Railroads, Washington, D. C., and to the President of the American Short Line Railroad Association, Washington, D. C.

Dated at Washington, D. C., this 14th day of December 1953.

By the Commission.

## TITLE 3—THE PRESIDENT

### EXECUTIVE ORDER 10510

ESTABLISHING A SEAL FOR THE DEPARTMENT OF HEALTH, EDUCATION, AND WELFARE

WHEREAS the Secretary of Health, Education, and Welfare has adopted and has recommended that I approve a seal of office for the Department of Health, Education, and Welfare, the design of which accompanies and is hereby made a part of this order, and which is described in heraldic terms as follows:

SHIELD: Argent an open book with sanguine binding charged overall with a staff of Aesculapius paleways within an annulet of chain all proper.

CREST: On a wreath argent and sanguine an American bald eagle displayed and wings partially inverted proper.

Below the shield a white scroll inscribed with the motto "SPES ANCHORA VITAE" in black letters, all on a circular sanguine background within a white band, inner edge white, outer edge sanguine, and inscribed "DEPARTMENT OF HEALTH, EDUCATION, AND WELFARE U. S. A.";

AND WHEREAS it appears that such seal is of suitable design and appropriate for adoption as the official seal of the Department of Health, Education, and Welfare:

NOW, THEREFORE, by virtue of the authority vested in me as President of the United States, I hereby approve such seal as the official seal of the Department of Health, Education, and Welfare.

DWIGHT D. EISENHOWER

THE WHITE HOUSE,
*December 17, 1953.*

## RULES AND REGULATIONS

## TITLE 49—TRANSPORTATION

### Chapter I—Interstate Commerce Commission

#### Subchapter A—General Rules and Regulations

PART 120—ANNUAL, SPECIAL OR PERIODICAL REPORTS

FORM PRESCRIBED FOR SMALL STEAM RAILWAYS AND SWITCHING AND TERMINAL COMPANIES

At a session of the Interstate Commerce Commission, Division 1, held at its office in Washington, D. C., on the 18th day of November A. D. 1953.

The matter of annual reports from steam railway companies and switching and terminal companies of Class III being under consideration, and it appearing that the changes in existing regulations to be effectuated by this order are only minor changes with respect to the data to be furnished, and that public rule-making procedures are unnecessary.

*It is ordered*, That the order of January 12, 1953, in the matter of annual reports from steam railway companies, and switching and terminal companies, of Class III (49 CFR 120.12) be, and it is hereby modified with respect to annual reports for the year ended December 31, 1953, and subsequent years, as follows:

PART 120—ANNUAL, SPECIAL OR PERIODICAL REPORTS

FORM PRESCRIBED FOR CARRIERS BY PIPE LINE

At a session of the Interstate Commerce Commission, Division 1, held at its office in Washington, D. C., on the 18th day of November A. D. 1953.

The matter of annual reports from carriers by pipe line being under consideration, and it appearing that the changes in existing regulations to be effectuated by this order are only minor changes with respect to the data to be furnished, and that public rule-making procedures are unnecessary;

*It is ordered*, That the order dated December 10, 1952, in the matter of annual reports from carriers by pipe line (49 CFR 120.61) be, and it is hereby modified with respect to annual reports for the year ended December 31, 1953, and subsequent years, as follows:

§ 120.61 *Form prescribed for carriers by pipe line.* All carriers by pipe line subject to the provisions of section 20, part I of the Interstate Commerce Act, are hereby required to file annual reports for the year ended December 31, 1953, and for each succeeding year until further order, in accordance with Annual Report Form P (Carriers by Pipe Line),[1] which is hereby approved and made a part of this section. The annual report shall be filed, in duplicate, in the Bureau of Transport Economics and Statistics, Interstate Commerce Commission, Washington 25, D. C., on or before March 31 of the year following the one to which it relates.

(Sec. 12, 24 Stat. 383, as amended, sec. 201, 54 Stat. 933; 49 U. S. C. 12, 904. Interprets or applies sec. 20, 24 Stat. 386, as amended, 54 Stat. 944; 49 U. S. C. 20, 913)

NOTE: Budget Bureau No. 60–R108.10.

By the Commission, Division 1.

[SEAL] GEORGE W. LAIRD, *Secretary.*

Subchapter C—Carriers by Water

PART 301—REPORTS

ANNUAL REPORT FORM PRESCRIBED FOR CARRIERS BY INLAND AND COASTAL WATERWAYS OF CLASS A AND CLASS B

At a session of the Interstate Commerce Commission, Division 1, held at its office in Washington, D. C., on the 10th day of December A. D. 1953.

The matter of annual reports from carriers by water being under consideration, and it appearing that the changes in existing regulations to be effectuated by this order are only minor changes with respect to the data to be furnished, and that public rule-making procedures are unnecessary;

*It is ordered*, That the order dated December 10, 1952, In the matter of annual reports from carriers by water of Class A and of Class B (49 CFR 301.10) be, and it is hereby modified with respect to annual reports for the year ended December 31, 1953, and subsequent years, as follows:

§ 301.10 *Annual report form prescribed for carriers by inland and coastal waterways of Class A and Class B.* All Inland and Coastal Waterways of Class A and Class B (49 CFR 126.2) subject to the provisions of section 313, Part III of the Interstate Commerce Act, are hereby required to file annual reports for the year ended December 31, 1953, and for each succeeding year until further order, in accordance with Annual Report Form K–A (Inland and Coastal Waterways of Class A and Class B),[1] which is hereby approved and made a part of this section. The annual report shall be filed, in duplicate, in the Bureau of Transport Economics and Statistics, Interstate Commerce Commission, Washington 25, D. C., on or before March 31 of the year following the one to which it relates.

(54 Stat. 933; 49 U. S. C. 904. Interprets or applies 54 Stat. 944; 49 U. S. C. 913)

NOTE: Budget Bureau No. 60–R105.10.

By the Commission, Division 1.

## TITLE 7—AGRICULTURE

### Chapter I—Production and Marketing Administration (Standards, Inspections, Marketing Practices), Department of Agriculture

PART 51—FRESH FRUITS, VEGETABLES AND OTHER PRODUCTS (INSPECTION, CERTIFICATION, AND STANDARDS)

SUBPART—U. S. STANDARDS FOR BRUSSELS SPROUTS[2]

On October 31, 1953, a notice of proposed rule making was published in the FEDERAL REGISTER (F. R. Doc. 53-9224, 18 F. R. 6887) regarding proposed

[2] Packing of the product in conformity with the requirements of these standards shall not excuse failure to comply with the provisions of the Federal Food, Drug and Cosmetic Act.

United States Standards for Brussels Sprouts.

A period of thirty days was allowed for submitting written data, views and arguments for consideration in connection with the proposed standards. After consideration of all relevant matters presented including the proposals set forth in the aforesaid notice of rule making the following United States Standards for Brussels Sprouts are hereby promulgated under the authority contained in the Agricultural Marketing Act of 1946 (60 Stat. 1087; 7 U. S. C. 1621 et seq.) and the Department of Agriculture Appropriation Act 1954 (Pub. Law 156, 83d Cong., approved July 28, 1953).

GRADES

Sec.
51.2250 U. S. No. 1.
51.2251 U. S. No. 2.

UNCLASSIFIED

51.2252 Unclassified.

APPLICATION OF TOLERANCES

51.2253 Application of tolerances.
51.2254 Basis for calculating percentages.

DEFINITIONS

51.2255 Well colored.
51.2256 Firm.
51.2257 Seedstems.
51.2258 Damage.
51.2259 Diameter.
51.2260 Fairly well colored.
51.2261 Fairly firm.
51.2262 Serious damage.

AUTHORITY: §§ 51.2250 to 51.2262 issued under sec. 205, 60 Stat. 1090, Pub. Law 156, 83d Cong.; 7 U. S. C. 1621.

GRADES

§ 51.2250 *U. S. No. 1.* U. S. No. 1 consists of Brussels sprouts which are well colored, firm, not withered or burst, which are free from soft decay and seedstems, and free from damage caused by discoloration, dirt or other foreign material, freezing, disease, insects, or mechanical or other means.

(a) Unless otherwise specified, the diameter of each Brussels sprout shall be not less than one inch, and the length shall be not more than 2¾ inches.

(b) In order to allow for variations incident to proper grading and handling, other than for size, not more than a total of 10 percent, by weight, of the Brussels sprouts in any lot may fail to meet the requirements of the grade: *Provided,* That not more than one-fifth of this amount, or 2 percent, shall be allowed for soft decay. In addition, not more than a total of 5 percent, by weight, of the Brussels sprouts in any lot may be smaller than the specified minimum diameter, and not more than 10 percent may be longer than the specified maximum length.

§ 51.2251 *U. S. No. 2.* U. S. No. 2 consists of Brussels sprouts which are fairly well colored, fairly firm, not withered or burst, which are free from soft decay and seedstems, and free from damage caused by insects, and free from serious damage caused by discoloration, dirt or other foreign material, freezing, disease or mechanical or other means.

(a) Unless otherwise specified, the diameter of each Brussels sprout shall be not less than one inch, and the length shall be not more than 2¾ inches.

(b) In order to allow for variations incident to proper grading and handling, other than for size, not more than a total of 10 percent, by weight, of the Brussels sprouts in any lot may fail to meet the requirements of the grade: *Provided,* That not more than one-fifth of this amount, or 2 percent, shall be allowed for soft decay. In addition, not more than a total of 5 percent, by weight, of the Brussels sprouts in any lot may be smaller than the specified minimum diameter, and not more than 10 percent may be longer than the specified maximum length.

UNCLASSIFIED

§ 51.2252 *Unclassified.* Unclassified consists of Brussels sprouts which have not been classified in accordance with the foregoing grades. The term "unclassified" is not a grade within the meaning of these standards but is provided as a designation to show that no grade has been applied to the lot.

APPLICATION OF TOLERANCES

§ 51.2253 *Application of tolerances.* (a) The contents of individual packages in the lot based on sample inspection, are subject to the following limitations: *Provided,* That the averages for the entire lot are within the tolerances specified for the grade:

(1) For a tolerance of 10 percent or more, individual packages in any lot may contain not more than one and one-half times the tolerance specified; and,

(2) For a tolerance of less than 10 percent, individual packages in any lot may contain not more than double the tolerance specified, except that at least one defective and one off-size specimen may be permitted in any package.

§ 51.2254 *Basis for calculating percentages.* Percentages shall be calculated on the basis of weight or an equivalent basis.

DEFINITIONS

§ 51.2255 *Well colored.* "Well colored" means that the Brussels sprout has a light green or a darker shade of green color characteristic of well-grown Brussels sprouts.

§ 51.2256 *Firm.* "Firm" means that the Brussels sprout is of reasonable solidity and is fairly compact but may yield slightly to moderate pressure.

§ 51.2257 *Seedstems.* "Seedstems" means Brussels sprouts which have seedstalks showing or in which the formation of seedstalks has plainly begun.

§ 51.2258 *Damage.* "Damage" means any defect which materially affects the appearance, or the edible or shipping quality of the Brussels sprout. Any one of the following defects, or any combination of defects, the seriousness of which exceeds the maximum allowed for any one defect, shall be considered as damage:

(a) Discoloration when the appearance is materially affected by discolored leaves or parts of leaves; and.

(b) Insects when there is more than slight aphis infestation within the compact portion of the head, or when the outer leaves are badly infected by them; or when slugs, worms or worm frass are present, or when the appearance is materially affected by slug or worm injury.

§ 51.2259 *Diameter.* "Diameter" means the greatest dimension measured at right angles to a line running from the stem to the apex of the Brussels sprout.

§ 51.2260 *Fairly well colored.* "Fairly well colored" means that the Brussels sprout shall not be lighter than yellowish-green color.

§ 51.2261 *Fairly firm.* "Fairly firm" means that the Brussels sprout is not soft or puffy and is of reasonable weight for its size but may have considerable open spaces between the leaves in the lower portion of the head.

§ 51.2262 *Serious damage.* "Serious damage" means any defect which seriously affects the appearance, or the edible or shipping quality of the Brussels sprout.

*Effective time.* The United States Standards for Brussels Sprouts contained in this section shall become effective thirty days after the date of publication in the FEDERAL REGISTER.

Done at Washington, D. C., this 15th day of December 1953.

[SEAL] GEORGE A. DICE,
*Deputy Assistant Administrator, Production and Marketing Administration.*

[F. R. Doc. 53-10551; Filed, Dec. 18, 1953; 8:48 a. m.]

## Chapter IV—Federal Crop Insurance Corporation, Department of Agriculture

### PART 420—MULTIPLE CROP INSURANCE

### SUBPART—REGULATIONS FOR THE 1950 AND SUCCEEDING CROP YEARS

The following riders for the 1953 and succeeding crop years are hereby published pursuant to § 420.34, as amended, of the above-identified regulations (14 F. R. 5303, 6787; 15 F. R. 2485, 4161, 9033; 16 F. R. 579, 4300; 17 F. R. 2110, 2385, 5082, 5933, 8206, 10537; 18 F. R. 440, 3634, 4418, 6992). Any riders for these counties which have been published previously, except riders for the 1954 and succeeding crop years (14 F. R. 7827; 15 F. R. 2622, 3077, 9271; 16 F. R. 4829, 12111, 12765; 17 F. R. 3265, 3671, 11257, 11379; 18 F. R. 151, 6282, 7222), are hereby superseded for the 1953 and succeeding crop years.

(Secs. 506, 516, 52 Stat. 73, as amended, 77, as amended; U. S. C. 1506, 1516)

[SEAL] C. S. LAIDLAW,
*Manager, Federal Crop Insurance Corporation.*

### § 420.59 *Georgia.*

### § 420.59–1 *Colquitt County.*

RIDER NO. 1 TO THE MULTIPLE CROP INSURANCE POLICY

(Applicable in Colquitt County, Ga., Beginning With the 1953 Crop Year)

1. *Insurable crops.* For the purpose of the multiple crop insurance program the insurable crops are:

(a) Cotton, restricted to American upland cotton and not including cotton planted primarily for experimental purposes.

(b) Peanuts, Spanish and runner planted for harvest as nuts (excluding acreage of less than one acre on an insurance unit).

(c) Tobacco, type 14.

2. *Coverage per acre.* (a) The coverage per acre for each insured crop, except cotton, shall be reduced 50 percent for any acreage released by the Corporation and planted to a substitute crop.

(b) The coverage per acre for cotton shall be reduced as follows: (1) 60 percent for any acreage which is released by the Corporation because of damage occurring prior to laying by the crop, and (2) 25 percent for any acreage on which the crop is laid by and not harvested.

3. *Insurance period.* Insurance shall attach at the time of planting to any insured acreage of any insured crop. Insurance shall cease with respect to (a) any portion of the tobacco crop upon weighing-in at the tobacco warehouse, transfer of interest in the tobacco after harvest, removal of the tobacco from the insurance unit (except for curing, packing or immediate delivery to the tobacco warehouse), or weighing of the tobacco for casing, (b) any portion of the cotton crop upon picking, the peanut crop upon threshing, or with respect to any portion of any crop (except tobacco) upon removal from the field, whichever is earlier. However, in no event shall insurance remain in effect (a) with respect to tobacco later than October 31 unless such time is extended in writing by the Corporation, (b) with respect to any other crop later than the earlier of (i) the end of the normal harvest period for such crop or (ii) December 10, unless such time is extended in writing by the Corporation, and (c) with respect to any insurance unit later than the date of submission of a claim for indemnity.

4. *Predetermined price for valuing production.* In determining any loss under the contract, production of each insurable crop shall be evaluated at the predetermined price established by the Corporation for that crop and shown on the county actuarial table. The predetermined prices for the 1953 crop year are on file in the county office and for any subsequent crop year shall be on file in the county office at least 15 days prior to the cancellation date. However, any production of peanuts which will not meet the latest available requirements for a Commodity Credit Corporation loan or support because of poor quality due to insurable causes, and would not meet these requirements if properly handled, shall be evaluated at a value per unit determined by the Corporation.

5. *Released crop.* Notwithstanding any other provision of the policy any crop on any insured acreage may be released by the Corporation subject to an appraisal by the Corporation of the yield that would be realized if the crop were harvested.

6. *Amount of loss.* (a) The amount of loss with respect to any insurance unit shall be determined by (1) multiplying the insurable acreage (exclusive of any acreage to which insurance did not attach) planted to each insured crop by the applicable coverage per acre, and the result by the insured interest and (2) subtracting from the total thereof the insured interest in the value (based on the predetermined price) of the total production on such acreage of all insured crops. However, the amount of loss so determined shall be reduced if the premium computed for the insurance unit on the basis of the acreage and interest approved by the Corporation on the acreage report is less than the premium computed for the planted acreage on the insurance unit. This reduction shall be made on the basis of the ratio of the premium computed for the acreage and interest as approved by the Corporation on the acreage report to the premium computed for the planted acreage. The total production for each insured crop on the insurance unit shall include all production determined in accordance with the production schedule below.

The Corporation reserves the right to determine the amount of production on the basis of an appraisal of any unharvested crop standing in the field.

PRODUCTION SCHEDULE

| Crop | Acreage classification | Total production [1] |
|---|---|---|
| 1. Each insured crop except cotton. | Acreage released by the Corporation and planted to a substitute crop. | That portion of the appraised production for such acreage which is in excess of the number of pounds determined by (1) subtracting the total coverage for such acreage from what the total coverage for such acreage would be if it were not planted to a substitute crop, and (2) dividing the result thus obtained by the predetermined price for the crop. |
| 2. Each insured crop except cotton. | Acreage not planted to a substitute crop. | The appraised production or the actual production. |
| 3. Cotton | Acreage released by the Corporation because of damage occurring prior to laying by the crop. | That portion of the appraised production for such acreage which is in excess of the number of pounds determined by (1) subtracting the total coverage for such acreage from what the total coverage for such acreage would be if it were harvested and (2) dividing the result thus obtained by the predetermined price. |
| 4. Cotton | Acreage on which the crop is laid by and not harvested. | That portion of the appraised production for such acreage which is in excess of the number of pounds determined by (1) subtracting the total coverage for such acreage from what the total coverage for such acreage would be if it were harvested and (2) dividing the result thus obtained by the predetermined price. |
| 5. Cotton | Acreage harvested | Production, including an appraisal of production left in the field after harvest. |
| 6. Each insured crop | Acreage put to another use without the consent of the Corporation. | Appraised production for such acreage but not less than the product of (1) such acreage and (2) the pound equivalent of the coverage per acre on the basis of the predetermined price for the crop. |
| 7. Each insured crop | Acreage with reduced yield due solely to cause(s) not insured against. | Appraised number of pounds by which production for such acreage has been reduced but not less than the product of (1) such acreage and (2) the applicable pound equivalent of the coverage per acre, on the basis of the predetermined price for the crop, minus the number of pounds harvested. |
| 8. Each insured crop | Acreage with reduced yield due partially to cause(s) not insured against and partially to cause(s) insured against. | Appraised number of pounds by which production for such acreage has been reduced because of cause(s) not insured against. |

[1] Production shall be in pounds for cotton, peanuts and tobacco.

[1] Riders for these counties herein published are superseded by riders for the 1954 and succeeding crop years (18 F. R. 6282, 7222).

Notwithstanding the other provisions of this paragraph (a) regarding the determination of the total production of cotton, in any case where the quality of any cotton production is reduced solely by insured causes to the extent that the value per pound, as determined by the Corporation, is less than 75 percent of the predetermined price, the number of pounds of such poor quality cotton shall be adjusted downward to the number of pounds obtained by dividing the total value of such cotton, as determined by the Corporation, by 75 percent of the predetermined price.

(b) If production from two or more insurance units is commingled and the insured fails to establish and maintain separate acreage and production records satisfactory to the Corporation, the Corporation may allocate the commingled production between the units involved in any manner it deems appropriate or void the insurance on the insurance units involved and declare the premium(s) for such units forfeited by the insured. If production from uninsured acreage and insured acreage is commingled and the insured fails to establish and maintain separate acreage and production records satisfactory to the Corporation, all such production which is commingled shall be considered to have been produced on the insured acreage or the Corporation may void the insurance on the insurance unit(s) involved and declare the premium(s) for such unit(s) forfeited by the insured.

7. *Date table.*

Discount date: June 30.
Maturity date: July 31.
Interest date: October 31.
Cancellation date: February 15.

8. *Definitions.* "Harvest" with respect to any acreage of cotton means the removal (by manual or mechanical means) of an amount of cotton from the stalk which is equal in value (based on the predetermined price) to 10 percent or more of the coverage for such acreage.

9. *Reduction of premium based on good experience.* The insured's annual premium for any year may be reduced 25 percent if he has had seven consecutive years of insured crop(s) under a Federal Crop Insurance contract without a loss for which an indemnity was paid. Credit for consecutive years of good experience under any other existing Federal Crop Insurance contract will not be transferred to the multiple crop contract if the insured is eligible to receive a premium discount based on consecutive years of good experience or based on an accumulated balance of premiums over indemnities under such existing contract. Nothing in this paragraph shall create in the insured any right to a reduced premium.

Approved: Beginning with the 1953 crop year.

[SEAL] FEDERAL CROP INSURANCE CORPORATION.

§ 420.61 *Illinois.*

§ 420.61–3 *Johnson County.*

RIDER NO. 1 TO THE MULTIPLE CROP INSURANCE POLICY

(Applicable in Johnson County, Ill., Beginning With the 1953 Crop Year)

1. *Insurable crops.* For the purpose of the multiple crop insurance program the insurable crops are:

(a) Corn normally regarded as field corn. The contract will not provide insurance for true type silage corn, corn planted thick for silage or fodder purposes, sweet corn, popcorn, broom, corn, corn planted for the development of hybrid seed corn, or any type of corn other than that normally regarded as field corn.

(b) Soybeans planted for harvest as beans.

(c) Winter wheat planted for harvest as grain.

2. *Coverage per acre.* The coverage per acre for each insured crop shall be reduced 50 percent for any acreage released by the Corporation and planted to a substitute crop.

3. *Insurance period.* Insurance shall attach at the time of planting to any insured acreage of any insured crop. Insurance shall cease with respect to any portion of the corn crop upon harvesting (picking the corn from the stalk either by hand or machine or cutting the corn for fodder or ensilage), all other insured crops upon threshing, or with respect to any portion of any crop upon removal from the field, whichever is earlier. However, in no event shall insurance remain in effect (a) with respect to any crop later than the earlier of (i) the end of the normal harvest period for such crop or (ii) December 10, unless such time is extended in writing by the Corporation, and (b) with respect to any insurance unit later than the date of submission of a claim for indemnity.

4. *Predetermined price for valuing production.* In determining any loss under the contract, production of each insurable crop shall be evaluated at the predetermined price established by the Corporation for that crop and shown on the county actuarial table. The predetermined prices for the 1953 crop year are on file in the county office and for any subsequent crop year shall be on file in the county office at least 15 days prior to the applicable cancellation date. However, any production of corn, soybeans, or wheat which will not meet the latest available requirements for a Commodity Credit Corporation loan or support because of poor quality due to insurable causes, and would not meet these requirements if properly handled, shall be evaluated at a value per unit determined by the Corporation.

5. *Released crop.* Notwithstanding any other provision of the policy any crop on any insured acreage may be released by the Corporation subject to an appraisal by the Corporation of the yield that would be realized if the crop were harvested, except that any corn may be used for ensilage or fodder without a release by the Corporation if the insured leaves a number of rows considered by the Corporation to be an adequate representative sample for appraising the yield.

6. *Amount of loss.* (a) The amount of loss with respect to any insurance unit shall be determined by (1) multiplying the insurable acreage (exclusive of any acreage to which insurance did not attach) planted to each insured crop by the applicable coverage per acre, and the result by the insured interest, and (2) subtracting from the total thereof the insured interest in the value (based on the predetermined price) of the total production on such acreage of all insured crops. However, the amount of loss so determined shall be reduced if the premium computed for the insurance unit on the basis of the acreage and interest approved by the Corporation on the acreage report is less than the premium computed for the planted acreage on the insurance unit. This reduction shall be made on the basis of the ratio of the premium computed for the acreage and interest as approved by the Corporation on the acreage report to the premium computed for the planted acreage. The total production for each insured crop on the insurance unit shall include all production determined in accordance with the production schedule below. Where any small grains are seeded with an insured growing small grain crop on acreage not released by the Corporation, all production shall be counted as the insured small grain on a weight basis. In the case of a volunteer crop produced with an insured crop, the production of such volunteer crop shall be included in determining the production of the insured crop.

The Corporation reserves the right to determine the amount of production on the basis of an appraisal of any unharvested crop standing in the field.

PRODUCTION SCHEDULE

| Crop | Acreage classification | Total production [1] |
|---|---|---|
| 1. Each insured crop... | Acreage released by the Corporation and planted to a substitute crop. | That portion of the appraised production for such acreage which is in excess of the number of bushels determined by (1) subtracting the total coverage for such acreage from what the total coverage for such acreage would be if it were not planted to a substitute crop, and (2) dividing the result thus obtained by the predetermined price for the crop. |
| 2. Each insured crop... | Acreage not planted to a substitute crop. | The appraised production or the actual production, including an appraisal of corn left in the field after harvest and an appraisal of corn used for ensilage or fodder. |
| 3. Each insured crop... | Acreage put to another use without the consent of the Corporation. | Appraised production for such acreage but not less than the product of (1) such acreage and (2) the bushel equivalent of the coverage per acre on the basis of the predetermined price for the crop. |
| 4. Each insured crop... | Acreage with reduced yield due solely to cause(s) not insured against. | Appraised number of bushels by which production for such acreage has been reduced but not less than the product of (1) such acreage and (2) the applicable bushel equivalent of the coverage per acre on the basis of the predetermined price for the crop, minus the number of bushels harvested. |
| 5. Each insured crop... | Acreage with reduced yield due partially to cause(s) not insured against and partially to cause(s) insured against. | Appraised number of bushels by which production for such acreage has been reduced because of cause(s) not insured against. |

[1] Production shall be in bushels for all crops.

sured crop(s) under a Federal Crop Insurance contract without a loss for which an indemnity was paid. Credit for consecutive years of good experience under any other existing Federal Crop Insurance contract will not be transferred to the multiple crop contract if the insured is eligible to receive a premium discount based on consecutive years of good experience or based on an accumulated balance of premiums over indemnities under such existing contract. Nothing in this paragraph shall create in the insured any right to a reduced premium.

Approved: Beginning with the 1953 crop year.

[SEAL] FEDERAL CROP INSURANCE CORPORATION.

§ 420.63 *Iowa.*

§ 420.63–1 *Emmet County.*

RIDER NO. 1 TO THE MULTIPLE CROP INSURANCE POLICY

(Applicable in Emmet County, Iowa, Beginning With the 1953 Crop Year)

1. *Insurable crops.* For the purpose of the multiple crop insurance program the insurable crops are:

(a) Corn normally regarded as field corn. The contract will not provide insurance for true-type silage corn, corn planted thick for silage or fodder purposes, sweet corn, popcorn, broom corn, corn planted for the development of hybrid seed corn, or any type of corn other than that normally regarded as field corn.

(b) Flax planted for harvest as seed.

(c) Oats planted for harvest as grain.

(d) Soybeans planted for harvest as beans.

2. *Coverage per acre.* The coverage per acre for each insured crop shall be reduced 50 percent for any acreage released by the Corporation and planted to a substitute crop.

3. *Insurance period.* Insurance shall attach at the time of planting to any insured acreage of any insured crop. Insurance shall cease with respect to any portion of the corn crop upon harvesting (picking the corn from the stalk either by hand or machine or cutting the corn for fodder or ensilage), all other insured crops upon threshing, or with respect to any portion of any crop upon removal from the field, whichever is earlier. However, in no event shall insurance remain in effect (a) with respect to any crop later than the earlier of (i) the end of the normal harvest period for such crop or (ii) December 10, unless such time is extended in writing by the Corporation, and (b) with respect to any insurance unit later than the date of submission of a claim for indemnity.

4. *Predetermined price for valuing production.* In determining any loss under the contract, production of each insurable crop shall be evaluated at the predetermined price established by the Corporation for that crop and shown on the county actuarial table. The predetermined prices for the 1953 crop year are on file in the county office and for any subsequent crop year shall be on file in the county office at least 15 days prior to the cancellation date. However, any production of corn, flax, oats or soybeans which will not meet the latest available requirements for a Commodity Credit Corporation loan or support because of poor quality due to insurable causes, and would not meet these requirements if properly handled, shall be evaluated at a value per bushel determined by the Corporation.

5. *Released crop.* Notwithstanding any other provision of the policy any crop on any insured acreage may be released by the Corporation subject to an appraisal by the Corporation of the yield that would be realized if the crop were harvested, except that any corn may be used for ensilage or fodder without a release by the Corporation if the insured leaves a number of rows considered by the Corporation to be an adequate representative sample for appraising the yield.

6. *Amount of loss.* (a) The amount of loss with respect to any insurance unit shall be determined by (1) multiplying the insurable acreage (exclusive of any acreage to which insurance did not attach) planted to each insured crop by the applicable coverage per acre, and the result by the insured interest, and (2) subtracting from the total thereof the insured interest in the value (based on the predetermined price) of the total production on such acreage of all insured crops. However, the amount of loss so determined shall be reduced in the premium computed for the insurance unit on the basis of the acreage and interest approved by the Corporation on the acreage report is less than the premium computed for the planted acreage on the insurance unit. This reduction shall be made on the basis of the ratio of the premium computed for the acreage and interest as approved by the Corporation on the acreage report to the premium computed for the planted acreage. The total production for each insured crop on the insurance unit shall include all production determined in accordance with the production schedule below. Where any small grains are seeded with an insured growing small grain crop on acreage not released by the Corporation, all production shall be counted as the insured small grain on a weight basis. In the case of a volunteer crop produced with an insured crop, the production of such volunteer crop shall be included in determining the production of the insured crop.

The Corporation reserves the right to determine the amount of production on the basis of an appraisal of any unharvested crop standing in the field.

PRODUCTION SCHEDULE

| Crop | Acreage classification | Total production [1] |
|---|---|---|
| 1. Each insured crop... | Acreage released by the Corporation and planted to a substitute crop. | That portion of the appraised production for such acreage which is in excess of the number of bushels determined by (1) subtracting the total coverage for such acreage from what the total coverage for such acreage would be if it were not planted to a substitute crop, and (2) dividing the result thus obtained by the predetermined price for the crop. |
| 2. Each insured crop... | Acreage not planted to a substitute crop. | The appraised production or the actual production, including an appraisal of corn left in the field after harvest and an appraisal of corn used for ensilage or fodder. |
| 3. Each insured crop... | Acreage put to another use without the consent of the Corporation. | Appraised production for such acreage but not less than the product of (1) such acreage and (2) the bushel equivalent of the coverage per acre on the basis of the predetermined price for the crop. |
| 4. Each insured crop... | Acreage with reduced yield due solely to cause(s) not insured against. | Appraised number of bushels by which production for such acreage has been reduced but not less than the product of (1) such acreage and (2) the applicable bushel equivalent of the coverage per acre on the basis of the predetermined price for the crop, minus the number of bushels harvested. |
| 5. Each insured crop... | Acreage with reduced yield due partially to cause(s) not insured against and partially to cause(s) insured against. | Appraised number of bushels by which production for such acreage has been reduced because of cause(s) not insured against. |

[1] Production shall be in bushels for all crops.

(b) If production from two or more insurance units is commingled and the insured fails to establish and maintain separate acreage and production records satisfactory to the Corporation, the Corporation may allocate the commingled production between the units involved in any manner it deems appropriate or void the insurance on the insurance units involved and declare the premium(s) for such units forfeited by the insured. If production from uninsured acreage and insured acreage is commingled and the insured fails to establish and maintain separate acreage and production records satisfactory to the Corporation, all such production which is commingled shall be considered to have been produced on the insured acreage or the Corporation may void the insurance on the insurance unit(s) involved and declare the premium(s) for such unit(s) forfeited by the insured.

7. *Date table.*

Discount date: June 30.
Maturity date: July 31.
Interest date: October 31.
Cancellation date: February 28.

8. *Definitions.* Notwithstanding the provisions of Section 13 of the policy, in any case where a share tenant rents land for a share of the crop and rents other land owned by the same person for cash, for a fixed commodity payment, or for other consideration, all such land which is planted to insurable crops shall constitute an insurance unit except in cases where a combination unit is in effect for the crop year.

9. *Reduction of premium based on good experience.* The insured's annual premium for any year may be reduced 25 percent if he has had seven consecutive years of insured crop(s) under a Federal Crop Insurance contract without a loss for which an indemnity was paid. Credit for consecutive years of good experience under any other existing Federal Crop Insurance contract will not be transferred to the multiple crop contract if the insured is eligible to receive a premium discount based on consecutive years of good experience or based on an accumulated balance of premiums over indemnities under such existing contract. Nothing in this paragraph shall create in the insured any right to a reduced premium.

Approved: Beginning with the 1953 crop year.

[SEAL] FEDERAL CROP INSURANCE CORPORATION.

§ 420.63–2 *Humboldt County.*

RIDER NO. 1 TO THE MULTIPLE CROP INSURANCE POLICY

(Applicable in Humboldt County, Iowa, Beginning With the 1953 Crop Year)

1. *Insurable crops.* For the purpose of the multiple crop insurance program the insurable crops are:

(a) Corn normally regarded as field corn. The contract will not provide insurance for true type silage corn, corn planted thick for silage or fodder purposes, sweet corn, popcorn, broom corn, corn planted for the development of hybrid seed corn, or any type of corn other than that normally regarded as field corn.

(b) Oats planted for harvest as grain.

(c) Soybeans planted for harvest as beans.

2. *Coverage per acre.* The coverage per acre for each insured crop shall be reduced 50 percent for any acreage released by the

Corporation and planted to a substitute crop.

3. *Insurance period.* Insurance shall attach at the time of planting to any insured acreage of any insured crop. Insurance shall cease with respect to any portion of the corn crop upon harvesting (picking the corn from the stalk either by hand or machine or cutting the corn for fodder or ensilage), all other insured crops upon threshing or with respect to any portion of any crop upon removal from the field, whichever is earlier. However, in no event shall insurance remain in effect (a) with respect to any crop later than the earlier of (i) the end of the normal harvest period for such crop or (ii) December 10, unless such time is extended in writing by the Corporation, and (b) with respect to any insurance unit later than the date of submission of a claim for indemnity.

4. *Predetermined price for valuing production.* In determining any loss under the contract, production of each insurable crop shall be evaluated at the predetermined price established by the Corporation for that crop and shown on the county actuarial table. The predetermined prices for the 1953 crop year are on file in the county office and for any subsequent crop year shall be on file in the county office at least 15 days prior to the cancellation date. However, any production of corn, oats, or soybeans which will not meet the latest available requirements for a Commodity Credit Corporation loan or support because of poor quality due to insurable causes, and would not meet these requirements if properly handled, shall be evaluated at a value per bushel determined by the Corporation.

5. *Released crop.* Notwithstanding any other provision of the policy any crop on any insured acreage may be released by the Corporation subject to an appraisal by the Corporation of the yield that would be realized if the crop were harvested, except that any corn may be used for ensilage or fodder without a release by the Corporation if the insured leaves a number of rows considered by the Corporation to be an adequate representative sample for appraising the yield.

6. *Amount of loss.* (a) The amount of loss with respect to any insurance unit shall be determined by (1) multiplying the insurable acreage (exclusive of any acreage to which insurance did not attach) planted to each insured crop by the applicable coverage per acre, and the result by the insured interest, and (2) subtracting from the total thereof the insured interest in the value (based on the predetermined price) of the total production on such acreage of all insured crops. However, the amount of loss so determined shall be reduced if the premium computed for the insurance unit on the basis of the acreage and interest approved by the Corporation on the acreage report is less than the premium computed for the planted acreage on the insurance unit. This reduction shall be made on the basis of the ratio of the premium computed for the acreage and interest as approved by the Corporation on the acreage report to the premium computed for the planted acreage. The total production for each insured crop on the insurance unit shall include all production determined in accordance with the production schedule below. Where any small grains are seeded with an insured growing small grain crop on acreage not released by the Corporation, all production shall be counted as the insured small grain on a weight basis. In the case of a volunteer crop produced with an insured crop, the production of such volunteer crop shall be included in determining the production of the insured crop.

The Corporation reserves the right to determine the amount of production on the basis of an appraisal of any unharvested crop standing in the field.

PRODUCTION SCHEDULE

| Crop | Acreage classification | Total production [1] |
|---|---|---|
| 1. Each insured crop.... | Acreage released by the Corporation and planted to a substitute crop. | That portion of the appraised production for such acreage which is in excess of the number of bushels determined by (1) subtracting the total coverage for such acreage from what the total coverage for such acreage would be if it were not planted to a substitute crop, and (2) dividing the result thus obtained by the predetermined price for the crop. |
| 2. Each insured crop.... | Acreage not planted to a substitute crop. | The appraised production or the actual production, including an appraisal of corn left in the field after harvest and an appraisal of corn used for ensilage or fodder. |
| 3. Each insured crop.... | Acreage put to another use without the consent of the Corporation. | Appraised production for such acreage but not less than the product of (1) such acreage and (2) the bushel equivalent of the coverage per acre on the basis of the predetermined price for the crop. |
| 4. Each insured crop.... | Acreage with reduced yield due solely to cause(s) not insured against. | Appraised number of bushels by which production for such acreage has been reduced but not less than the product of (1) such acreage and (2) the applicable bushel equivalent of the coverage per acre on the basis of the predetermined price for the crop, minus the number of bushels harvested. |
| 5. Each insured crop.... | Acreage with reduced yield due partially to cause(s) not insured against and partially to cause(s) insured against. | Appraised number of bushels by which production for such acreage has been reduced because of cause(s) not insured against. |

[1] Production shall be in bushels for all crops.

(b) If production from two or more insurance units is commingled and the insured fails to establish and maintain separate acreage and production records satisfactory to the Corporation, the Corporation may allocate the commingled production between the units involved in any manner it deems appropriate or void the insurance on the insurance units involved and declare the premium(s) for such units forfeited by the insured. If production from uninsured acreage and insured acreage is commingled and the insured fails to establish and maintain separate acreage and production records satisfactory to the Corporation, all such production which is commingled shall be considered to have been produced on the insured acreage or the Corporation may void the insurance on the insurance unit(s) involved and declare the premium(s) for such unit(s) forfeited by the insured.

7. *Date table.*

Discount date: June 30.
Maturity date: July 31.
Interest date: October 31.
Cancellation date: February 28.

8. *Definitions.* Notwithstanding the provisions of Section 13 of the policy, in any case where a share tenant rents land for a share of the crop and rents other land owned by the same person for cash, for a fixed commodity payment, or for other consideration, all such land which is planted to insurable crops shall constitute an insurance unit except in cases where a combination unit is in effect for the crop year.

9. *Reduction of premium based on good experience.* The insured's annual premium for any year may be reduced 25 percent if he has had seven consecutive years of insured crop(s) under a Federal Crop Insurance contract without a loss for which an indemnity was paid. Credit for consecutive years of good experience under any other existing Federal Crop Insurance contract will not be transferred to the multiple crop contract if the insured is eligible to receive a premium discount based on consecutive years of good experience or based on an accumulated balance of premiums over indemnities under such existing contract. Nothing in this paragraph shall create in the insured any right to a reduced premium.

Approved: Beginning with the 1953 crop year.

[SEAL] FEDERAL CROP INSURANCE CORPORATION.

## § 420.63–3 *Delaware County.*

RIDER NO. 1 TO THE MULTIPLE CROP INSURANCE POLICY

(Applicable in Delaware County, Iowa, Beginning With the 1953 Crop Year)

1. *Insurable crops.* For the purpose of the multiple crop insurance program the insurable crops are:

(a) Corn normally regarded as field corn. The contract will not provide insurance for true type silage corn, corn planted thick for silage or fodder purposes, sweet corn, popcorn, broom corn, corn planted for the development of hybrid seed corn, or any type of corn other than that normally regarded as field corn.

(b) Oats planted for harvest as grain.

(c) Soybeans planted for harvest as beans.

2. *Coverage per acre.* The coverage per acre for each insured crop shall be reduced 50 percent for any acreage released by the Corporation and planted to a substitute crop.

3. *Insurance period.* Insurance shall attach at the time of planting to any insured acreage of any insured crop. Insurance shall cease with respect to any portion of the corn crop upon harvesting (picking the corn from the stalk either by hand or machine or cutting the corn for fodder or ensilage), all other insured crops upon threshing or with respect to any portion of any crop upon removal from the field, whichever is earlier. However, in no event shall insurance remain in effect (a) with respect to any crop later than the earlier of (i) the end of the normal harvest period for such crop or (ii) December 10, unless such time is extended in writing by the Corporation, and (b) with respect to any insurance unit later than the date of submission of a claim for indemnity.

4. *Predetermined price for valuing production.* In determining any loss under the contract, production of each insurable crop shall be evaluated at the predetermined price established by the Corporation for that crop and shown on the county actuarial table. The predetermined prices for the 1953 crop year are on file in the county office and for any subsequent crop year shall be on file in the county office at least 15 days prior to the cancellation date. However, any production of corn, oats, or soybeans which will not meet the latest available requirements for a Commodity Credit Corporation loan or support because of poor quality due to insurable causes, and would not meet these requirements if properly handled, shall be evaluated at a value per bushel determined by the Corporation.

5. *Released crop.* Notwithstanding any other provision of the policy any crop on any insured acreage may be released by the Corporation subject to an appraisal by the Corporation of the yield that would be realized if the crop were harvested, except that any corn may be used for ensilage or fodder without a release by the Corporation if the insured leaves a number of rows considered by the Corporation to be an adequate representative sample for appraising the yield.

6. *Amount of loss.* (a) The amount of loss with respect to any insurance unit shall be determined by (1) multiplying the insurable acreage (exclusive of any acreage to which insurance did not attach) planted to each insured crop by the applicable coverage per acre, and the result by the insured interest, and (2) subtracting from the total thereof the insured interest in the value (based on the predetermined price) of the total production on such acreage of all insured crops. However, the amount of loss so determined shall be reduced if the premium computed for the insurance unit on the basis of the acreage and interest approved by the Corporation on the acreage report is less than the premium computed for the planted acreage on the insurance unit. This reduction shall be made on the basis of the ratio of the premium computed for the acreage and interest as approved by the Corporation on the acreage report to the premium computed for the planted acreage. The total production for each insured crop on the insurance unit shall include all production determined in accordance with the production schedule below. Where any small grains are seeded with an insured growing small grain crop on acreage not released by the Corporation, all production shall be counted as the insured small grain on a weight basis. In the case of a volunteer crop produced with an insured crop, the production of such volunteer crop shall be included in determining the production of the insured crop.

The Corporation reserves the right to determine the amount of production on the basis of an appraisal of any unharvested crop standing in the field.

PRODUCTION SCHEDULE

| Crop | Acreage classification | Total production [1] |
|---|---|---|
| 1. Each insured crop.... | Acreage released by the Corporation and planted to a substitute crop. | That portion of the appraised production for such acreage which is in excess of the number of bushels determined by (1) subtracting the total coverage for such acreage from what the total coverage for such acreage would be if it were not planted to a substitute crop, and (2) dividing the result thus obtained by the predetermined price for the crop. |
| 2. Each insured crop.... | Acreage not planted to a substitute crop. | The appraised production or the actual production, including an appraisal of corn left in the field after harvest and an appraisal of corn used for ensilage or fodder. |
| 3. Each insured crop.... | Acreage put to another use without the consent of the Corporation. | Appraised production for such acreage but not less than the product of (1) such acreage and (2) the bushel equivalent of the coverage per acre on the basis of the predetermined price for the crop. |
| 4. Each insured crop.... | Acreage with reduced yield due solely to cause(s) not insured against. | Appraised number of bushels by which production for such acreage has been reduced but not less than the product of (1) such acreage and (2) the applicable bushel equivalent of the coverage per acre on the basis of the predetermined price for the crop, minus the number of bushels harvested. |
| 5. Each insured crop.... | Acreage with reduced yield due partially to cause(s) not insured against and partially to cause(s) insured against. | Appraised number of bushels by which production for such acreage has been reduced because of cause(s) not insured against. |

[1] Production shall be in bushels for all crops.

(b) If production from two or more insurance units is commingled and the insured fails to establish and maintain separate acreage and production records satisfactory to the Corporation, the Corporation may allocate the commingled production between the units involved in any manner it deems appropriate or void the insurance on the insurance units involved and declare the premium(s) for such units forfeited by the insured. If production from uninsured acreage and insured acreage is commingled and the insured fails to establish and maintain separate acreage and production records satisfactory to the Corporation, all such production which is commingled shall be considered to have been produced on the insured acreage or the Corporation may void the insurance on the insurance unit(s) involved and declare the premium(s) for such unit(s) forfeited by the insured.

7. *Date table.*

Discount date: June 30.
Maturity date: July 31.
Interest date: October 31.
Cancellation date: February 28.

8. *Definitions.* Notwithstanding the provisions of Section 13 of the policy, in any case where a share tenant rents land for a share of the crop and rents other land owned by the same person for cash, for a fixed commodity payment, or for other consideration, all such land which is planted to insurable crops shall constitute an insurance unit except in cases where a combination unit is in effect for the crop year.

9. *Reduction of premium based on good experience.* The insured's annual premium for any year may be reduced 25 percent if he has had seven consecutive years of insured crop(s) under a Federal Crop Insurance contract without a loss for which an indemnity was paid. Credit for consecutive years of good experience under any other existing Federal Crop Insurance contract will not be transferred to the multiple crop contract if the insured is eligible to receive a premium discount based on consecutive years of good experience or based on an accumulated balance of premiums over indemnities under such existing contract. Nothing in this paragraph shall create in the insured any right to a reduced premium.

Approved: Beginning with the 1953 crop year.

[SEAL] FEDERAL CROP INSURANCE CORPORATION.

## § 420.63–4 *Howard County.*

RIDER NO. 1 TO THE MULTIPLE CROP INSURANCE POLICY

(Applicable in Howard County, Iowa, Beginning With the 1953 Crop Year)

1. *Insurable crops.* For the purpose of the multiple crop insurance program the insurable crops are:

(a) Corn normally regarded as field corn. The contract will not provide insurance for true type silage corn, corn planted thick for silage or fodder purposes, sweet corn, popcorn, broom corn, corn planted for the development of hybrid seed corn, or any type of corn other than that normally regarded as field corn.

(b) Oats planted for harvest as grain.

(c) Soybeans planted for harvest as beans.

2. *Coverage per acre.* The coverage per acre for each insured crop shall be reduced 50 percent for any acreage released by the Corporation and planted to a substitute crop.

3. *Insurance period.* Insurance shall attach at the time of planting to any insured acreage of any insured crop. Insurance shall cease with respect to any portion of the corn crop upon harvesting (picking the corn from the stalk either by hand or machine or cutting the corn for fodder or ensilage), all other insured crops upon threshing or with respect to any portion of any crop upon removal from the field, whichever is earlier. However, in no event shall insurance remain in effect (a) with respect to any crop later than the earlier of (i) the end of the normal harvest period for such crop or (ii) December 10, unless such time is extended in writing by the Corporation, and (b) with respect to any insurance unit later than the date of submission of a claim for indemnity.

4. *Predetermined price for valuing production.* In determining any loss under the contract, production of each insurable crop shall be evaluated at the predetermined price established by the Corporation for that crop and shown on the county actuarial table. The predetermined prices for the 1953 crop year are on file in the county office and for any subsequent crop year shall be on file in the county office at least 15 days prior to the cancellation date. However, any production of corn, oats, or soybeans which will not meet the latest available requirements for a Commodity Credit Corporation loan or support because of poor quality due to insurable causes, and would not meet these requirements if properly handled, shall be evaluated at a value per bushel determined by the Corporation.

5. *Released crop.* Notwithstanding any other provision of the policy any crop on any insured acreage may be released by the Corporation subject to an appraisal by the Corporation of the yield that would be realized if the crop were harvested, except that any corn may be used for ensilage or fodder without a release by the Corporation if the insured leaves a number of rows considered by the Corporation to be an adequate representative sample for appraising the yield.

6. *Amount of loss.* (a) The amount of loss with respect to any insurance unit shall be determined by (1) multiplying the insurable acreage (exclusive of any acreage to which insurance did not attach) planted to each insured crop by the applicable coverage per acre, and the result by the insured interest, and (2) subtracting from the total thereof the insured interest in the value (based on the predetermined price) of the total production on such acreage of all insured crops. However, the amount of loss so determined shall be reduced if the premium computed for the insurance unit on the basis of the acreage and interest approved by the Corporation on the acreage report is less than the premium computed for the planted acreage on the insurance unit. This reduction shall be made on the basis of the ratio of the premium computed for the acreage and interest as approved by the Corporation on the acreage report to the premium computed for the planted acreage. The total production for each insured crop on the insurance unit shall include all production determined in accordance with the production schedule below. Where any small grains are seeded with an insured growing small grain crop on acreage not released by the Corporation, all production shall be counted as the insured small grain on a weight basis. In the case of a volunteer crop produced with an insured crop, the production of such volunteer crop shall be included in determining the production of the insured crop.

The Corporation reserves the right to determine the amount of production on the basis of an appraisal of any unharvested crop standing in the field.

acreage of any insured crop. Insurance shall cease with respect to any portion of the corn crop upon harvesting (picking the corn from the stalk either by hand or machine or cutting the corn for fodder or ensilage), all other insured crops upon threshing or with respect to any portion of any crop upon removal from the field, whichever is earlier. However, in no event shall insurance remain in effect (a) with respect to any crop later than the earlier of (1) the end of the normal harvest period for such crop or (ii) December 10, unless such time is extended in writing by the Corporation, and (b) with respect to any insurance unit later than the date of submission of a claim for indemnity.

4. *Predetermined price for valuing production.* In determining any loss under the contract, production of each insurable crop shall be evaluated at the predetermined price established by the Corporation for that crop and shown on the county actuarial table. The predetermined prices for the 1953 crop year are on file in the county office and for any subsequent crop year shall be on file in the county office at least 15 days prior to the cancellation date. However, any production of corn, oats, or soybeans which will not meet the latest available requirements for a Commodity Credit Corporation loan or support because of poor quality due to insurable causes, and would not meet these requirements if properly handled, shall be evaluated at a value per bushel determined by the Corporation.

5. *Released crop.* Notwithstanding any other provision of the policy any crop on any insured acreage may be released by the Corporation subject to an appraisal by the Corporation of the yield that would be realized if the crop were harvested, except that any corn may be used for ensilage or fodder without a release by the Corporation if the insured leaves a number of rows considered by the Corporation to be an adequate representative sample for appraising the yield.

6. *Amount of loss.* (a) The amount of loss with respect to any insurance unit shall be determined by (1) multiplying the insurable acreage (exclusive of any acreage to which insurance did not attach) planted to each insured crop by the applicable coverage per acre, and the result by the insured interest, and (2) subtracting from the total thereof the insured interest in the value (based on the predetermined price) of the total production on such acreage of all insured crops. However, the amount of loss so determined shall be reduced if the premium computed for the insurance unit on the basis of the acreage and interest approved by the Corporation on the acreage report is less than the premium computed for the planted acreage on the insurance unit. This reduction shall be made on the basis of the ratio of the premium computed for the acreage and interest as approved by the Corporation on the acreage report to the premium computed for the planted acreage. The total production for each insured crop on the insurance unit shall include all production determined in accordance with the production schedule below. Where any small grains are seeded with an insured growing small grain crop on acreage not released by the Corporation, all production shall be counted as the insured small grain on a weight basis. In the case of a volunteer crop produced with an insured crop, the production of such volunteer crop shall be included in determining the production of the insured crop.

The Corporation reserves the right to determine the amount of production on the basis of an appraisal of any unharvested crop standing in the field.

PRODUCTION SCHEDULE

| Crop | Acreage classification | Total production [1] |
|---|---|---|
| 1. Each insured crop... | Acreage released by the Corporation and planted to a substitute crop. | That portion of the appraised production for such acreage which is in excess of the number of bushels determined by (1) subtracting the total coverage for such acreage from what the total coverage for such acreage would be if it were not planted to a substitute crop, and (2) dividing the result thus obtained by the predetermined price for the crop. |
| 2. Each insured crop... | Acreage not planted to a substitute crop. | The appraised production or the actual production, including an appraisal of corn left in the field after harvest and an appraisal of corn used for ensilage or fodder. |
| 3. Each insured crop... | Acreage put to another use without the consent of the Corporation. | Appraised production for such acreage but not less than the product of (1) such acreage and (2) the bushel equivalent of the coverage per acre on the basis of the predetermined price for the crop. |
| 4. Each insured crop... | Acreage with reduced yield due solely to cause(s) not insured against. | Appraised number of bushels by which production for such acreage has been reduced but not less than the product of (1) such acreage and (2) the applicable bushel equivalent of the coverage per acre on the basis of the predetermined price for the crop, minus the number of bushels harvested. |
| 5. Each insured crop... | Acreage with reduced yield due partially to cause(s) not insured against and partially to cause(s) insured against. | Appraised number of bushels by which production for such acreage has been reduced because of cause(s) not insured against. |

[1] Production shall be in bushels for all crops.

(b) If production from two or more insurance units is commingled and the insured fails to establish and maintain separate acreage and production records satisfactory to the Corporation, the Corporation may allocate the commingled production between the units involved in any manner it deems appropriate or void the insurance on the insurance units involved and declare the premium(s) for such units forfeited by the insured. If production from uninsured acreage and insured acreage is commingled and the insured fails to establish and maintain separate acreage and production records satisfactory to the Corporation, all such production which is commingled shall be considered to have been produced on the insured acreage or the Corporation may void the insurance on the insurance unit(s) involved and declare the premium(s) for such unit(s) forfeited by the insured.

7. *Date table.*
Discount date: June 30.
Maturity date: July 31.
Interest date: October 31.
Cancellation date: February 28.

8. *Definitions.* Notwithstanding the provisions of Section 13 of the policy, in any case where a share tenant rents land for a share of the crop and rents other land owned by the same person for cash, for a fixed commodity payment, or for other consideration, all such land which is planted to insurable crops shall constitute an insurance unit except in cases where a combination unit is in effect for the crop year.

9. *Reduction of premium based on good experience.* The insured's annual premium for any year may be reduced 25 percent if he has had seven consecutive years of insured crop(s) under a Federal Crop Insurance contract without a loss for which an indemnity was paid. Credit for consecutive years of good experience under any other existing Federal Crop Insurance contract will not be transferred to the multiple crop contract if the insured is eligible to receive a premium discount based on consecutive years of good experience or based on an accumulated balance of premiums over indemnities under such existing contract. Nothing in this paragraph shall create in the insured any right to a reduced premium.

Approved: Beginning with the 1953 crop year.

[SEAL] FEDERAL CROP INSURANCE CORPORATION.

§ 420.63-5 *Ida County.*

RIDER NO. 1 TO THE MULTIPLE CROP INSURANCE POLICY

(Applicable in Ida County, Iowa, Beginning With the 1953 Crop Year)

1. *Insurable crops.* For the purpose of the multiple crop insurance program the insurable crops are:

(a) Corn normally regarded as field corn. The contract will not provide insurance for true type silage corn, corn planted thick for silage or fodder purposes, sweet corn, popcorn, broom corn, corn planted for the development of hybrid seed corn, or any type of corn other than that normally regarded as field corn.

(b) Oats planted for harvest as grain.

(c) Soybeans planted for harvest as beans.

2. *Coverage per acre.* The coverage per acre for each insured crop shall be reduced 50 percent for any acreage released by the Corporation and planted to a substitute crop.

3. *Insurance period.* Insurance shall attach at the time of planting to any insured acreage of any insured crop. Insurance shall cease with respect to any portion of the corn crop upon harvesting (picking the corn from the stalk either by hand or machine or cutting the corn for fodder or ensilage), all other insured crops upon threshing or with respect to any portion of any crop upon removal from the field, whichever is earlier. However, in no event shall insurance remain in effect (a) with respect to any crop later than the earlier of (1) the end of the normal harvest period for such crop or (ii) December 10, unless such time is extended in writing by the Corporation, and (b) with respect to any insurance unit later than the date of submission of a claim for indemnity.

4. *Predetermined price for valuing production.* In determining any loss under the contract, production of each insurable crop shall be evaluated at the predetermined price established by the Corporation for that crop and shown on the county actuarial table. The predetermined prices for the 1953 crop year are on file in the county office and for any subsequent crop year shall be on file in the county office at least 15 days prior to the cancellation date. However, any production of corn, oats, or soybeans which will not meet the latest available requirements for a Commodity Credit Corporation loan or support because of poor quality due to insurable causes, and would not meet these requirements if properly handled, shall be evaluated at a value per bushel determined by the Corporation.

5. *Released crop.* Notwithstanding any other provision of the policy any crop on any insured acreage may be released by the Corporation subject to an appraisal by the Corporation of the yield that would be realized if the crop were harvested, except that any corn may be used for ensilage or fodder without a release by the Corporation if the insured leaves a number of rows considered by the Corporation to be an adequate representative sample for appraising the yield.

6. *Amount of loss.* (a) The amount of loss with respect to any insurance unit shall be determined by (1) multiplying the insurable acreage (exclusive of any acreage to which insurance did not attach) planted to each insured crop by the applicable coverage per acre, and the result by the insured interest, and (2) subtracting from the total thereof the insured interest in the value (based on the predetermined price) of the total production on such acreage of all insured crops. However, the amount of loss so determined shall be reduced if the premium computed for the insurance unit on the basis of the acreage and interest approved by the Corporation on the acreage report is less than the premium computed for the planted acreage on the insurance unit. This reduction shall be made on the basis of the ratio of the premium computed for the acreage and interest as approved by the Corporation on the acreage report to the premium computed for the planted acreage. The total production for each insured crop on the insurance unit shall include all production determined in accordance with the production schedule below. Where any small grains are seeded with an insured growing small grain crop on acreage not released by the Corporation, all production shall be counted as the insured small grain on a weight basis. In the case of a volunteer crop produced with an insured crop, the production of such volunteer crop shall be included in determining the production of the insured crop.

The Corporation reserves the right to determine the amount of production on the basis of an appraisal of any unharvested crop standing in the field.

PRODUCTION SCHEDULE

| Crop | Acreage classification | Total production [1] |
|---|---|---|
| 1. Each insured crop... | Acreage released by the Corporation and planted to a substitute crop. | That portion of the appraised production for such acreage which is in excess of the number of bushels determined by (1) subtracting the total coverage for such acreage from what the total coverage for such acreage would be if it were not planted to a substitute crop, and (2) dividing the result thus obtained by the predetermined price for the crop. |
| 2. Each insured crop... | Acreage not planted to a substitute crop. | The appraised production or the actual production, including an appraisal of corn left in the field after harvest and an appraisal of corn used for ensilage or fodder. |
| 3. Each insured crop... | Acreage put to another use without the consent of the Corporation. | Appraised production for such acreage but not less than the product of (1) such acreage and (2) the bushel equivalent of the coverage per acre on the basis of the predetermined price for the crop. |
| 4. Each insured crop... | Acreage with reduced yield due solely to cause(s) not insured against. | Appraised number of bushels by which production for such acreage has been reduced but not less than the product of (1) such acreage and (2) the applicable bushel equivalent of the coverage per acre on the basis of the predetermined price for the crop, minus the number of bushels harvested. |
| 5. Each insured crop... | Acreage with reduced yield due partially to cause(s) not insured against and partially to cause(s) insured against. | Appraised number of bushels by which production for such acreage has been reduced because of cause(s) not insured against. |

[1] Production shall be in bushels for all crops.

(b) If production from two or more insurance units is commingled and the insured fails to establish and maintain separate acreage and production records satisfactory to the Corporation, the Corporation may allocate the commingled production between the units involved in any manner it deems appropriate or void the insurance on the insurance units involved and declare the premium(s) for such units forfeited by the insured. If production from uninsured acreage and insured acreage is commingled and the insured fails to establish and maintain separate acreage and production records satisfactory to the Corporation, all such production which is commingled shall be considered to have been produced on the insured acreage or the Corporation may void the insurance on the insurance unit(s) involved and declare the premium(s) for such unit(s) forfeited by the insured.

7. *Date table.*

§ 420.63-6 *Kossuth County.*

RIDER NO. 1 TO THE MULTIPLE CROP INSURANCE POLICY

(Applicable in Kossuth County, Iowa, Beginning With the 1953 Crop Year)

1. *Insurable crops.* For the purpose of the multiple crop insurance program the insurable crops are:

(a) Corn normally regarded as field corn. The contract will not provide insurance for true type silage corn, corn planted thick for silage or fodder purposes, sweet corn, popcorn, broom corn, corn planted for the development of hybrid seed corn, or any type of corn other than that normally regarded as field corn.

(b) Oats planted for harvest as grain.

(c) Soybeans planted for harvest as beans.

2. *Coverage per acre.* The coverage per acre for each insured crop shall be reduced 50 percent for any acreage released by the Corporation and planted to a substitute crop.

3. *Insurance period.* Insurance shall attach at the time of planting to any insured

Interest date: October 31.
Cancellation date: February 28.

8. *Definitions.* Notwithstanding the provisions of Section 13 of the policy, in any case where a share tenant rents land for a share of the crop and rents other land owned by the same person for cash, for a fixed commodity payment, or for other consideration, all such land which is planted to insurable crops shall constitute an insurance unit except in cases where a combination unit is in effect for the crop year.

9. *Reduction of premium based on good experience.* The insured's annual premium for any year may be reduced 25 percent if he has had seven consecutive years of insured crop(s) under a Federal Crop Insurance contract without a loss for which an indemnity was paid. Credit for consecutive years of good experience under any other existing Federal Crop Insurance contract will not be transferred to the multiple crop contract if the insured is eligible to receive a premium discount based on consecutive years

of good experience or based on an accumulated balance of premiums over indemnities under such existing contract. Nothing in this paragraph shall create in the insured any right to a reduced premium.

Approved: Beginning with the 1953 crop year.

[SEAL] FEDERAL CROP INSURANCE CORPORATION.

§ 420.63–7 *Tama County.*

RIDER NO. 1 TO THE MULTIPLE CROP INSURANCE POLICY

(Applicable in Tama County, Iowa, Beginning With the 1953 Crop Year)

1. *Insurable crops.* For the purpose of the multiple crop insurance program the insurable crops are:

(a) Corn normally regarded as field corn. The contract will not provide insurance for true type silage corn, corn planted thick for silage or fodder purposes, sweet corn, popcorn, broom corn, corn planted for the development of hybrid seed corn, or any type of corn other than that normally regarded as field corn.

(b) Oats planted for harvest as grain.

(c) Soybeans planted for harvest as beans.

2. *Coverage per acre.* The coverage per acre for each insured crop shall be reduced 50 percent for any acreage released by the Corporation and planted to a substitute crop.

3. *Insurance period.* Insurance shall attach at the time of planting to any insured acreage of any insured crop. Insurance shall cease with respect to any portion of the corn crop upon harvesting (picking the corn from the stalk either by hand or machine or cutting the corn for fodder or ensilage), all other insured crops upon threshing or with respect to any portion of any crop upon removal from the field, whichever is earlier. However, in no event shall insurance remain in effect (a) with respect to any crop later than the earlier of (i) the end of the normal harvest period for such crop or (ii) December 10, unless such time is extended in writing by the Corporation, and (b) with respect to any insurance unit later than the date of submission of a claim for indemnity.

4. *Predetermined price for valuing production.* In determining any loss under the contract, production of each insurable crop shall be evaluated at the predetermined price established by the Corporation for that crop and shown on the county actuarial table. The predetermined prices for the 1953 crop year are on file in the county office and for any subsequent crop year shall be on file in the county office at least 15 days prior to the cancellation date. However, any production of corn, oats, or soybeans which will not meet the latest available requirements for a Commodity Credit Corporation loan or support because of poor quality due to insurable causes, and would not meet these requirements if properly handled, shall be evaluated at a value per bushel determined by the Corporation.

5. *Released crop.* Notwithstanding any other provision of the policy any crop on any insured acreage may be released by the Corporation subject to an appraisal by the Corporation of the yield that would be realized if the crop were harvested, except that any corn may be used for ensilage or fodder without a release by the Corporation if the insured leaves a number of rows considered by the Corporation to be an adequate representative sample for appraising the yield.

6. *Amount of loss.* (a) The amount of loss with respect to any insurance unit shall be determined by (1) multiplying the insurable acreage (exclusive of any acreage to which insurance did not attach) planted to each insured crop by the applicable coverage per acre, and the result by the insured interest, and (2) subtracting from the total thereof the insured interest in the value (based on the predetermined price) of the total production on such acreage of all insured crops. However, the amount of loss so determined shall be reduced if the premium computed for the insurance unit on the basis of the acreage and interest approved by the Corporation on the acreage report is less than the premium computed for the planted acreage on the insurance unit. This reduction shall be made on the basis of the ratio of the premium computed for the acreage and interest as approved by the Corporation on the acreage report to the premium computed for the planted acreage. The total production for each insured crop on the insurance unit shall include all production determined in accordance with the production schedule below. Where any small grains are seeded with an insured growing small grain crop on acreage not released by the Corporation, all production shall be counted as the insured small grain on a weight basis. In the case of a volunteer crop produced with an insured crop, the production of such volunteer crop shall be included in determining the production of the insured crop.

The Corporation reserves the right to determine the amount of production on the basis of an appraisal of any unharvested crop standing in the field.

PRODUCTION SCHEDULE

| Crop | Acreage classification | Total production [1] |
|---|---|---|
| 1. Each insured crop... | Acreage released by the Corporation and planted to a substitute crop. | That portion of the appraised production for such acreage which is in excess of the number of bushels determined by (1) subtracting the total coverage for such acreage from what the total coverage for such acreage would be if it were not planted to a substitute crop, and (2) dividing the result thus obtained by the predetermined price for the crop. |
| 2. Each insured crop... | Acreage not planted to a substitute crop. | The appraised production or the actual production, including an appraisal of corn left in the field after harvest and an appraisal of corn used for ensilage or fodder. |
| 3. Each insured crop... | Acreage put to another use without the consent of the Corporation. | Appraised production for such acreage but not less than the product of (1) such acreage and (2) the bushel equivalent of the coverage per acre on the basis of the predetermined price for the crop. |
| 4. Each insured crop... | Acreage with reduced yield due solely to cause(s) not insured against. | Appraised number of bushels by which production for such acreage has been reduced but not less than the product of (1) such acreage and (2) the applicable bushel equivalent of the coverage per acre on the basis of the predetermined price for the crop, minus the number of bushels harvested. |
| 5. Each insured crop... | Acreage with reduced yield due partially to cause(s) not insured against and partially to cause(s) insured against. | Appraised number of bushels by which production for such acreage has been reduced because of cause(s) not insured against. |

[1] Production shall be in bushels for all crops.

(b) If production from two or more insurance units is commingled and the insured fails to establish and maintain separate acreage and production records satisfactory to the Corporation, the Corporation may allocate the commingled production between the units involved in any manner it deems appropriate or void the insurance on the insurance units involved and declare the premium(s) for such units forfeited by the insured. If production from uninsured acreage and insured acreage is commingled and the insured fails to establish and maintain separate acreage and production records satisfactory to the Corporation, all such production which is commingled shall be considered to have been produced on the insured acreage or the Corporation may void the insurance on the insurance unit(s) involved and declare the premium(s) for such unit(s) forfeited by the insured.

[SEAL] FEDERAL CROP INSURANCE CORPORATION.

§ 420.63–8 *Union County.*

RIDER NO. 1 TO THE MULTIPLE CROP INSURANCE POLICY

(Applicable in Union County, Iowa, Beginning With the 1953 Crop Year)

1. *Insurable crops.* For the purpose of the multiple crop insurance program the insurable crops are:

(a) Corn normally regarded as field corn. The contract will not provide insurance for true type silage corn, corn planted thick for silage or fodder purposes, sweet corn, popcorn, broom corn, corn planted for the development of hybrid seed corn, or any type of corn other than that normally regarded as field corn.

(b) Oats planted for harvest as grain.

(c) Soybeans planted for harvest as beans.

2. *Coverage per acre.* The coverage per acre for each insured crop shall be reduced 50 percent for any acreage released by the Corporation and planted to a substitute crop.

3. *Insurance period.* Insurance shall attach at the time of planting to any insured acreage of any insured crop. Insurance shall cease with respect to any portion of the corn crop upon harvesting (picking the corn from the stalk either by hand or machine or cutting the corn for fodder or ensilage), all other insured crops upon threshing or with respect to any portion of any crop upon removal from the field, whichever is earlier. However, in no event shall insurance remain in effect (a) with respect to any crop later than the earlier of (i) the end of the normal harvest period for such crop or (ii) December 10, unless such time is extended in writing by the Corporation, and (b) with respect to any insurance unit later than the date of submission of a claim for indemnity.

4. *Predetermined price for valuing production.* In determining any loss under the contract, production of each insurable crop shall be evaluated at the predetermined price established by the Corporation for that crop and shown on the county actuarial table. The predetermined prices for the 1953 crop year are on file in the county office and for any subsequent crop year shall be on file in the county office at least 15 days prior to the cancellation date. However, any production of corn, oats, or soybeans which will not meet the latest available requirements for a Commodity Credit Corporation loan or support because of poor quality due to insurable causes, and would not meet these requirements if properly handled, shall be evaluated at a value per bushel determined by the Corporation.

5. *Released crop.* Notwithstanding any other provision of the policy any crop on any insured acreage may be released by the Corporation subject to an appraisal by the Corporation of the yield that would be realized if the crop were harvested, except that any corn may be used for ensilage or fodder without a release by the Corporation if the insured leaves a number of rows considered by the Corporation to be an adequate representative sample for appraising the yield.

6. *Amount of loss.* (a) The amount of loss with respect to any insurance unit shall be determined by (1) multiplying the insurable acreage (exclusive of any acreage to which insurance did not attach) planted to each insured crop by the applicable coverage per acre, and the result by the insured interest, and (2) subtracting from the total thereof the insured interest in the value (based on the predetermined price) of the total production on such acreage of all insured crops. However, the amount of loss so determined shall be reduced if the premium computed for the insurance unit on the basis of the acreage and interest approved by the Corporation on the acreage report is less than the premium computed for the planted acreage on the insurance unit. This reduction shall be made on the basis of the ratio of the premium computed for the acreage and interest as approved by the Corporation on the acreage report to the premium computed for the planted acreage. The total production for each insured crop on the insurance unit shall include all production determined in accordance with the production schedule below. Where any small grains are seeded with an insured growing small grain crop on acreage not released by the Corporation, all production shall be counted as the insured small grain on a weight basis. In the case of a volunteer crop produced with an insured crop, the production of such volunteer crop shall be included in determining the production of the insured crop.

The Corporation reserves the right to determine the amount of production on the basis of an appraisal of any unharvested crop standing in the field.

PRODUCTION SCHEDULE

| Crop | Acreage classification | Total production [1] |
|---|---|---|
| 1. Each insured crop... | Acreage released by the Corporation and planted to a substitute crop. | That portion of the appraised production for such acreage which is in excess of the number of bushels determined by (1) subtracting the total coverage for such acreage from what the total coverage for such acreage would be if it were not planted to a substitute crop, and (2) dividing the result thus obtained by the predetermined price for the crop. |
| 2. Each insured crop... | Acreage not planted to a substitute crop. | The appraised production or the actual production, including an appraisal of corn left in the field after harvest and an appraisal of corn used for ensilage or fodder. |
| 3. Each insured crop... | Acreage put to another use without the consent of the Corporation. | Appraised production for such acreage but not less than the product of (1) such acreage and (2) the bushel equivalent of the coverage per acre on the basis of the predetermined price for the crop. |
| 4. Each insured crop... | Acreage with reduced yield due solely to cause(s) not insured against. | Appraised number of bushels by which production for such acreage has been reduced but not less than the product of (1) such acreage and (2) the applicable bushel equivalent of the coverage per acre on the basis of the predetermined price for the crop, minus the number of bushels harvested. |
| 5. Each insured crop... | Acreage with reduced yield due partially to cause(s) not insured against and partially to cause(s) insured against. | Appraised number of bushels by which production for such acreage has been reduced because of cause(s) not insured against. |

[1] Production shall be in bushels for all crops.

(b) If production from two or more insurance units is commingled and the insured fails to establish and maintain separate acreage and production records satisfactory to the Corporation, the Corporation may allocate the commingled production between the units involved in any manner it deems appropriate or void the insurance on the insurance units involved and declare the premium(s) for such units forfeited by the insured. If production from uninsured acreage and insured acreage is commingled and the insured fails to establish and maintain separate acreage and production records satisfactory to the Corporation, all such production which is commingled shall be considered to have been produced on the insured acreage or the Corporation may void the insurance on the insurance unit(s) involved and declare the premium(s) for such unit(s) forfeited by the insured.

7. *Date table.*

Discount date: June 30.
Maturity date: July 31.
Interest date: October 31.
Cancellation date: February 28.

8. *Definitions.* Notwithstanding the provisions of Section 13 of the policy, in any case where a share tenant rents land for a share of the crop and rents other land owned by the same person for cash, for a fixed commodity payment, or for other consideration, all such land which is planted to insurable crops shall constitute an insurance unit except in cases where a combination unit is in effect for the crop year.

9. *Reduction of premium based on good experience.* The insured's annual premium for any year may be reduced 25 percent if he has had seven consecutive years of insured crop(s) under a Federal Crop Insurance contract without a loss for which an indemnity was paid. Credit for consecutive years of good experience under any other existing Federal Crop Insurance contract will not be transferred to the multiple crop contract if the insured is eligible to receive a premium discount based on consecutive years of good experience or based on an accumulated balance of premiums over indemnities under such existing contract. Nothing in this paragraph shall create in the insured any right to a reduced premium.

Approved: Beginning with the 1953 crop year.

[SEAL] FEDERAL CROP INSURANCE CORPORATION.

§ 420.63–9 *Warren County.*

RIDER NO. 1 TO THE MULTIPLE CROP INSURANCE POLICY

(Applicable in Warren County, Iowa, Beginning With the 1953 Crop Year)

1. *Insurable crops.* For the purpose of the multiple crop insurance program the insurable crops are:

(a) Corn normally regarded as field corn. The contract will not provide insurance for true type silage corn, corn planted thick for silage or fodder purposes, sweet corn, popcorn, broom corn, corn planted for the development of hybrid seed corn, or any type of corn other than that normally regarded as field corn.

(b) Oats planted for harvest as grain.

(c) Soybeans planted for harvest as beans.

2. *Coverage per acre.* The coverage per acre for each insured crop shall be reduced 50 percent for any acreage released by the Corporation and planted to a substitute crop.

3. *Insurance period.* Insurance shall attach at the time of planting to any insured acreage of any insured crop. Insurance shall cease with respect to any portion of the corn crop upon harvesting (picking the corn from the stalk either by hand or machine or cutting the corn for fodder or ensilage), all other insured crops upon threshing or with respect to any portion of any crop upon removal from the field, whichever is earlier. However, in no event shall insurance remain in effect (a) with respect to any crop later than the earlier of (i) the end of the normal harvest period for such crop or (ii) December 10, unless such time is extended in writing by the Corporation, and (b) with respect to any insurance unit later than the date of submission of a claim for indemnity.

4. *Predetermined price for valuing production.* In determining any loss under the contract, production of each insurable crop shall be evaluated at the predetermined price established by the Corporation for that crop and shown on the county actuarial table. The predetermined prices for the 1953 crop year are on file in the county office and for any subsequent crop year shall be on file in the county office at least 15 days prior to the cancellation date. However, any production of corn, oats, or soybeans which will not meet the latest available requirements for a Commodity Credit Corporation loan or support because of poor quality due to insurable causes, and would not meet these requirements if properly handled, shall be evaluated at a value per bushel determined by the Corporation.

5. *Released crop.* Notwithstanding any other provision of the policy any crop on any insured acreage may be released by the Corporation subject to an appraisal by the Corporation of the yield that would be realized if the crop were harvested, except that any corn may be used for ensilage or fodder without a release by the Corporation if the insured leaves a number of rows considered by the Corporation to be an adequate representative sample for appraising the yield.

6. *Amount of loss.* (a) The amount of loss with respect to any insurance unit shall be determined by (1) multiplying the insurable acreage (exclusive of any acreage to which insurance did not attach) planted to each insured crop by the applicable coverage per acre, and the result by the insured interest, and (2) subtracting from the total thereof the insured interest in the value (based on the predetermined price) of the total production on such acreage of all in-

sured crops. However, the amount of loss so determined shall be reduced if the premium computed for the insurance unit on the basis of the acreage and interest approved by the Corporation on the acreage report is less than the premium computed for the planted acreage on the insurance unit. This reduction shall be made on the basis of the ratio of the premium computed for the acreage and interest as approved by the Corporation on the acreage report to the premium computed for the planted acreage. The total production for each insured crop on the insurance unit shall include all production determined in accordance with the production schedule below. Where any small grains are seeded with an insured growing small grain crop on acreage not released by the Corporation, all production shall be counted as the insured small grain on a weight basis. In the case of a volunteer crop produced with an insured crop, the production of such volunteer crop shall be included in determining the production of the insured crop.

The Corporation reserves the right to determine the amount of production on the basis of an appraisal of any unharvested crop standing in the field.

PRODUCTION SCHEDULE

| Crop | Acreage classification | Total production [1] |
|---|---|---|
| 1. Each insured crop... | Acreage released by the Corporation and planted to a substitute crop. | That portion of the appraised production for such acreage which is in excess of the number of bushels determined by (1) subtracting the total coverage for such acreage from what the total coverage for such acreage would be if it were not planted to a substitute crop, and (2) dividing the result thus obtained by the predetermined price for the crop. |
| 2. Each insured crop... | Acreage not planted to a substitute crop. | The appraised production or the actual production, including an appraisal of corn left in the field after harvest and an appraisal of corn used for ensilage or fodder. |
| 3. Each insured crop... | Acreage put to another use without the consent of the Corporation. | Appraised production for such acreage but not less than the product of (1) such acreage and (2) the bushel equivalent of the coverage per acre on the basis of the predetermined price for the crop. |
| 4. Each insured crop... | Acreage with reduced yield due solely to cause(s) not insured against. | Appraised number of bushels by which production for such acreage has been reduced but not less than the product of (1) such acreage and (2) the applicable bushel equivalent of the coverage per acre on the basis of the predetermined price for the crop, minus the number of bushels harvested. |
| 5. Each insured crop... | Acreage with reduced yield due partially to cause(s) not insured against and partially to cause(s) insured against. | Appraised number of bushels by which production for such acreage has been reduced because of cause(s) not insured against. |

[1] Production shall be in bushels for all crops.

(b) If production from two or more insurance units is commingled and the insured fails to establish and maintain separate acreage and production records satisfactory to the Corporation, the Corporation may allocate the commingled production between the units involved in any manner it deems appropriate or void the insurance on the insurance units involved and declare the premium(s) for such units forfeited by the insured. If production from uninsured acreage and insured acreage is commingled and the insured fails to establish and maintain separate acreage and production records satisfactory to the Corporation, all such production which is commingled shall be considered to have been produced on the insured acreage or the Corporation may void the insurance on the insurance unit(s) involved and declare the premium(s) forfeited by the insured. If production from uninsured acreage and insured acreage is commingled and the insured fails to establish and maintain separate acreage and production records satisfactory to the Corporation, the Corporation may allocate the commingled production between the units involved in any manner it deems appropriate or void the insurance on the insurance units involved and declare the premium(s) for such units forfeited by the insured. If production from uninsured acreage and insured acreage is commingled and the insured fails to establish and maintain separate acreage and production records satisfactory to the Corporation, all such production which is commingled shall be considered to have been produced on the insured acreage or the Corporation may void the insurance on the insurance unit(s) involved and declare the premium(s) forfeited by the insured.

7. *Date table.*
Discount date: June 30.
Maturity date: July 31.
Interest date: October 31.
Cancellation date: February 28.

8. *Definitions.* Notwithstanding the provisions of Section 13 of the policy, in any case where a share tenant rents land for a share of the crop and rents other land owned by the same person for cash, for a fixed commodity payment, or for other consideration, all such land which is planted to insurable crops shall constitute an insurance unit except in cases where a combination unit is in effect for the crop year.

9. *Reduction of premium based on good experience.* The insured's annual premium for any year may be reduced 25 percent if he has had seven consecutive years of insured crop(s) under a Federal Crop Insurance contract without a loss for which an indemnity was paid. Credit for consecutive years of good experience under any other existing Federal Crop Insurance contract will not be transferred to the multiple crop contract if the insured is eligible to receive a premium discount based on consecutive years of good experience or based on an accumulated balance of premiums over indemnities under such existing contract. Nothing in this paragraph shall create in the insured any right to a reduced premium.

Approved: Beginning with the 1953 crop year.

[SEAL] FEDERAL CROP INSURANCE CORPORATION.

## § 420.63–10 *Winnebago County.*

RIDER NO. 1 TO THE MULTIPLE CROP INSURANCE POLICY

(Applicable in Winnebago County, Iowa, Beginning With the 1953 Crop Year)

1. *Insurable crops.* For the purpose of the multiple crop insurance program the insurable crops are:

(a) Corn normally regarded as field corn. The contract will not provide insurance for true type silage corn, corn planted thick for silage or fodder purposes, sweet corn, popcorn, broom corn, corn planted for the development of hybrid seed corn, or any type of corn other than that normally regarded as field corn.

(b) Oats planted for harvest as grain.

(c) Soybeans planted for harvest as beans.

2. *Coverage per acre.* The coverage per acre for each insured crop shall be reduced 50 percent for any acreage released by the Corporation and planted to a substitute crop.

3. *Insurance period.* Insurance shall attach at the time of planting to any insured acreage of any insured crop. Insurance shall cease with respect to any portion of the crop upon harvesting (picking the corn from the stalk either by hand or machine or cutting the corn for fodder or ensilage), all other insured crops upon threshing or with respect to any portion of any crop upon removal from the field, whichever is earlier. However, in no event shall insurance remain in effect (a) with respect to any crop later than the earlier of (1) the end of the normal harvest period for such crop or (11) December 10, unless such time is extended in writing by the Corporation, and (b) with respect to any insurance unit later than the date of submission of a claim for indemnity.

4. *Predetermined price for valuing production.* In determining any loss under the contract, production of each insurable crop shall be evaluated at the predetermined price established by the Corporation for that crop and shown on the county actuarial table. The predetermined prices for the 1953 crop year are on file in the county office and for any subsequent crop year shall be on file in the county office at least 15 days prior to the cancellation date. However, any production of corn, oats, or soybeans which will not meet the latest available requirements for a Commodity Credit Corporation loan or support because of poor quality due to insurable causes, and would not meet these requirements if properly handled, shall be evaluated at a value per bushel determined by the Corporation.

5. *Released crop.* Notwithstanding any other provision of the policy any crop on any insured acreage may be released by the Corporation subject to an appraisal by the Corporation of the yield that would be realized if the crop were harvested, except that any corn may be used for ensilage or fodder without a release by the Corporation if the insured leaves a number of rows considered by the Corporation to be an adequate representative sample for appraising the yield.

6. *Amount of loss.* (a) The amount of loss with respect to any insurance unit shall be determined by (1) multiplying the insurable acreage (exclusive of any acreage to which insurance did not attach) planted to each insured crop by the applicable coverage per acre, and the result by the insured interest, and (2) subtracting from the total thereof the insured interest in the value (based on the predetermined price) of the total production on such acreage of all insured crops. However, the amount of loss so determined shall be reduced if the premium computed for the insurance unit on the basis of the acreage and interest approved by the Corporation on the acreage report is less than the premium computed for the planted acreage on the insurance unit. This reduction shall be made on the basis of the ratio of the premium computed for the acreage and interest as approved by the Corporation on the acreage report to the premium computed for the planted acreage. The total production for each insured crop on the insurance unit shall include all production determined in accordance with the production schedule below. Where any small grains are seeded with an insured growing small grain crop on acreage not released by the Corporation, all production shall be counted as the insured small grain on a weight basis. In the case of a volunteer crop produced with an insured crop, the production of such volunteer crop shall be included in determining the production of the insured crop.

The Corporation reserves the right to determine the amount of production on the basis of an appraisal of any unharvested crop standing in the field.

PRODUCTION SCHEDULE

| Crop | Acreage classification | Total production [1] |
|---|---|---|
| 1. Each insured crop... | Acreage released by the Corporation and planted to a substitute crop. | That portion of the appraised production for such acreage which is in excess of the number of bushels determined by (1) subtracting the total coverage for such acreage from what the total coverage for such acreage would be if it were not planted to a substitute crop, and (2) dividing the result thus obtained by the predetermined price for the crop. |
| 2. Each insured crop... | Acreage not planted to a substitute crop. | The appraised production or the actual production, including an appraisal of corn left in the field after harvest and an appraisal of corn used for ensilage or fodder. |
| 3. Each insured crop... | Acreage put to another use without the consent of the Corporation. | Appraised production for such acreage but not less than the product of (1) such acreage and (2) the bushel equivalent of the coverage per acre on the basis of the predetermined price for the crop. |
| 4. Each insured crop... | Acreage with reduced yield due solely to cause(s) not insured against. | Appraised number of bushels by which production for such acreage has been reduced but not less than the product of (1) such acreage and (2) the applicable bushel equivalent of the coverage per acre on the basis of the predetermined price for the crop, minus the number of bushels harvested. |
| 5. Each insured crop... | Acreage with reduced yield due partially to cause(s) not insured against and partially to cause(s) insured against. | Appraised number of bushels by which production for such acreage has been reduced because of cause(s) not insured against. |

[1] Production shall be in bushels for all crops.

(b) If production from two or more insurance units is commingled and the insured fails to establish and maintain separate acreage and production records satisfactory to the Corporation, the Corporation may allocate the commingled production between the units involved in any manner it deems appropriate or void the insurance on the insurance units involved and declare the premium(s) for such unit(s) forfeited by the insured. If production from uninsured acreage and insured acreage is commingled and the insured fails to establish and maintain separate acreage and production records satisfactory to the Corporation, all such production which is commingled shall be considered to have been produced on the insured acreage or the Corporation may void the insurance on the insurance unit(s) involved and declare the premium(s) forfeited by the insured.

7. *Date table.*
Discount date: June 30.
Maturity date: July 31.
Interest date: October 31.
Cancellation date: February 28.

8. *Definitions.* Notwithstanding the provisions of Section 13 of the policy, in any case where a share tenant rents land for a share of the crop and rents other land owned by the same person for cash, for a fixed commodity payment, or for other consideration, all such land which is planted to insurable crops shall constitute an insurance unit except in cases where a combination unit is in effect for the crop year.

9. *Reduction of premium based on good experience.* The insured's annual premium for any year may be reduced 25 percent if he has had seven consecutive years of insured crop(s) under a Federal Crop Insurance contract without a loss for which an indemnity was paid. Credit for consecutive years of good experience under any other existing Federal Crop Insurance contract will not be transferred to the multiple crop contract if the insured is eligible to receive a premium discount based on consecutive years of good experience or based on an accumulated balance of premiums over indemnities under such existing contract. Nothing in this paragraph shall create in the insured any right to a reduced premium.

Approved: Beginning with the 1953 crop year.

[SEAL] FEDERAL CROP INSURANCE CORPORATION.

## § 420.63–11 *Worth County.*

RIDER NO. 1 TO THE MULTIPLE CROP INSURANCE POLICY

(Applicable in Worth County, Iowa, Beginning With the 1953 Crop Year)

1. *Insurable crops.* For the purpose of the multiple crop insurance program the insurable crops are:

(a) Corn normally regarded as field corn. The contract will not provide insurance for true type silage corn, corn planted thick for silage or fodder purposes, sweet corn, popcorn, broom corn, corn planted for the development of hybrid seed corn, or any type of corn other than that normally regarded as field corn.

(b) Oats planted for harvest as grain.

(c) Soybeans planted for harvest as beans.

2. *Coverage per acre.* The coverage per acre for each insured crop shall be reduced 50 percent for any acreage released by the Corporation and planted to a substitute

(b) If production from two or more insurance units is commingled and the insured fails to establish and maintain separate acreage and production records satisfactory to the Corporation, the Corporation may allocate the commingled production between the units involved in any manner it deems appropriate or void the insurance on the insurance units involved and declare the premium(s) for such units forfeited by the insured. If production from uninsured acreage and insured acreage is commingled and the insured fails to establish and maintain separate acreage and production records satisfactory to the Corporation, all such production which is commingled shall be considered to have been produced on the insured acreage or the Corporation may void the insurance on the insurance unit(s) involved and declare the premium(s) for such unit(s) forfeited by the insured.

7. *Date table.*

Discount date: June 30.
Maturity date: July 31.
Interest date: October 31.
Cancellation date: February 28.

8. *Definitions.* Notwithstanding the provisions of Section 13 of the policy, in any case where a share tenant rents land for a share of the crop and rents other land owned by the same person for cash, for a fixed commodity payment, or for other consideration, all such land which is planted to insurable crops shall constitute an insurance unit except in cases where a combination unit is in effect for the crop year.

Approved: Beginning with the 1953 crop year.

[SEAL] FEDERAL CROP INSURANCE CORPORATION.

§ 420.66 *Louisiana.*

§ 420.66–2 *St. Landry Parish.*

RIDER NO. 1 TO THE MULTIPLE CROP INSURANCE POLICY

(Applicable in St. Landry Parish, La., Beginning With the 1953 Crop Year)

1. *Insurable crops.* For the purpose of the multiple crop insurance program the insurable crops are:

(a) Cotton, restricted to American upland cotton and not including cotton planted primarily for experimental purposes.

(b) Rice planted for harvest.

(c) Sugarcane, including acreage harvested for seed, and excluding (i) acreage of less than one acre on an insurance unit and (ii) acreage on which three successive crops have been harvested from one planting.

2. *Coverage per acre.* (a) The coverage per acre for each insured crop, except cotton, shall be reduced 50 percent for any acreage released by the Corporation and planted to a substitute crop.

(b) The coverage per acre for cotton shall be reduced as follows: (1) 60 percent for any acreage which is released by the Corporation because of damage occurring prior to laying by the crop, and (2) 25 percent for any acreage on which the crop is laid by and not harvested.

3. *Insurance period.* Insurance shall attach at the time of planting to any insured acreage of any insured crop. Insurance shall cease with respect to any portion of the cotton crop upon picking, the rice crop upon threshing, the sugarcane crop upon cutting, or with respect to any portion of any crop upon removal from the field, whichever is earlier. However, in no event shall insurance remain in effect (a) with respect to any crop later than the earlier of (i) the end of the normal harvest period for such crop or (ii) December 10 (January 31 following the normal time of harvest for sugarcane) unless such time is extended in writing by the Corporation, and (b) with respect to any insurance unit later than the date of submission of a claim for indemnity.

4. *Predetermined price for valuing production.* In determining any loss under the contract, production of each insurable crop shall be evaluated at the predetermined price established by the Corporation for that crop and shown on the county actuarial table. The predetermined prices for the 1953 crop year are on file in the county office and for any subsequent crop year shall be on file in the county office at least 15 days prior to the cancellation date. However, any production of rice which will not meet the latest available requirements for a Commodity Credit Corporation loan or support because of poor quality due to insurable causes, and would not meet these requirements if properly handled, shall be evaluated at a value per unit determined by the Corporation.

5. *Released crop.* Notwithstanding any other provision of the policy any crop on any insured acreage may be released by the Corporation subject to an appraisal by the Corporation of the yield that would be realized if the crop were harvested.

6. *Amount of loss.* (a) The amount of loss with respect to any insurance unit shall be determined by (1) multiplying the insurable acreage (exclusive of any acreage to which insurance did not attach) planted to each insured crop by the applicable coverage per acre, and the result by the insured interest, and (2) subtracting from the total thereof the insured interest in the value (based on the predetermined price) of the total production on such acreage of all insured crops. However, the amount of loss so determined shall be reduced if the premium computed for the insurance unit on the basis of the acreage and interest approved by the Corporation on the acreage report is less than the premium computed for the planted acreage on the insurance unit. This reduction shall be made on the basis of the ratio of the premium computed for the acreage and interest as approved by the Corporation on the acreage report to the premium computed for the planted acreage. The total production for each insured crop on the insurance unit shall include all production determined in accordance with the production schedule below.

The Corporation reserves the right to determine the amount of production on the basis of an appraisal of any unharvested crop standing in the field.

PRODUCTION SCHEDULE

| Crop | Acreage classification | Total production [1] |
|---|---|---|
| 1. Each insured crop except cotton. | Acreage released by the Corporation and planted to a substitute crop. | That portion of the appraised production for such acreage which is in excess of the number of pounds or tons determined by (1) subtracting the total coverage for such acreage from what the total coverage for such acreage would be if it were not planted to a substitute crop, and (2) dividing the result thus obtained by the predetermined price for the crop. |
| 2. Each insured crop except cotton. | Acreage not planted to a substitute crop. | The appraised production or the actual production. |
| 3. Cotton | Acreage released by the Corporation because of damage occurring prior to laying by the crop. | That portion of the appraised production for such acreage which is in excess of the number of pounds determined by (1) subtracting the total coverage for such acreage from what the total coverage for such acreage would be if it were harvested and (2) dividing the result thus obtained by the predetermined price. |
| 4. Cotton | Acreage on which the crop is laid by and not harvested. | That portion of the appraised production for such acreage which is in excess of the number of pounds determined by (1) subtracting the total coverage for such acreage from what the total coverage for such acreage would be if it were harvested and (2) dividing the result thus obtained by the predetermined price. |
| 5. Cotton | Acreage harvested | Production, including an appraisal of production left in the field after harvest. |
| 6. Each insured crop | Acreage put to another use without the consent of the Corporation. | Appraised production for such acreage but not less than the product of (1) such acreage and (2) the pound or ton equivalent of the coverage per acre on the basis of the predetermined price for the crop. |
| 7. Each insured crop | Acreage with reduced yield due solely to cause(s) not insured against. | Appraised number of pounds or tons by which production for such acreage has been reduced but not less than the product of (1) such acreage and (2) the applicable pound or ton equivalent of the coverage per acre on the basis of the predetermined price for the crop, minus the number of bushels, pounds, or tons harvested. |
| 8. Each insured crop | Acreage with reduced yield due partially to cause(s) not insured against and partially to cause(s) insured against. | Appraised number of pounds or tons by which production for such acreage has been reduced because of cause(s) not insured against. |

[1] Production shall be in pounds for cotton and rice, and tons (rounded to tenths), for sugarcane. If any part of the sugarcane production from the insurance unit is processed for sugar, the total number of tons of sugarcane shall be adjusted to standard sugarcane (as determined in accordance with regulations issued by the U. S. Department of Agriculture for the crop year involved.)

Notwithstanding the other provisions of this paragraph (a) regarding the determination of the total production of cotton, in any case where the quality of any cotton production is reduced solely by insured causes to the extent that the value per pound, as determined by the Corporation, is less than 75 percent of the predetermined price, the number of pounds of such poor quality cotton shall be adjusted downward to the number of pounds obtained by dividing the total value of such cotton, as determined by the Corporation, by 75 percent of the predetermined price.

(b) If production from two or more insurance units is commingled and the insured fails to establish and maintain separate acreage and production records satisfactory to the Corporation, the Corporation may allocate the commingled production between the units involved in any manner it deems appropriate or void the insurance on the insurance units involved and declare the premium(s) for such units forfeited by the insured. If production from uninsured acreage and insured acreage is commingled and the insured fails to establish and maintain separate acreage and production records satisfactory to the Corporation, all such production which is commingled shall be considered to have been produced on the insured acreage or the Corporation may void the insurance on the insurance unit(s) involved and declare the premium(s) for such unit(s) forfeited by the insured.

7. *Date table.*

Discount date: June 30.
Maturity date: July 31.
Interest date: October 31.
Cancellation date: February 28.

8. *Definitions.* (a) "County" means Parish in Louisiana.

(b) "Flood" as a cause of loss insured against shall not include damage caused by the use or overflow of the Atchafalaya River Spillway.

(c) For all purposes under the contract sugarcane for harvest within the crop year shall be considered to have been planted as follows: (1) the first crop from seed, on the date the planting operation is actually accomplished, and (2) second and third year crops on November 1 preceding the calendar year in which the crop is normally harvested.

(d) In addition to the causes of loss not insured against as stated in Section 8 of the policy, the contract also will not cover loss of the rice crop due to a shortage of irrigation water where the acreage planted to rice is in excess of the acreage which could be irrigated properly with the irrigation facilities available and with a supply of irrigation water which reasonably could be expected.

(e) In addition to the provisions of Section 13 of the policy, any share of an insured crop paid or to be paid for irrigation water shall be considered for the purpose of determining insurance units only as a part of the share of the insured.

(f) "Harvest" with respect to any acreage of cotton means the removal (by manual or mechanical means) of an amount of cotton from the stalk which is equal in value (based on the predetermined price) to 10 percent or more of the coverage for such acreage.

9. *Reduction of premium based on good experience.* The insured's annual premium for any year may be reduced 25 percent if he has had seven consecutive years of insured crop(s) under a Federal Crop Insurance contract without a loss for which an indemnity was paid. Credit for consecutive years of good experience under any other existing Federal Crop Insurance contract will not be transferred to the multiple crop contract if the insured is eligible to receive a premium discount based on consecutive years of good experience or based on an accumulated balance of premiums over indemnities under such existing contract. Nothing in this paragraph shall create in the insured any right to a reduced premium.

Approved: Beginning with the 1953 crop year.

[SEAL] FEDERAL CROP INSURANCE CORPORATION.

§ 420.71 *Minnesota.*

§ 420.71–11 *Faribault County.*

RIDER NO. 1 TO THE MULTIPLE CROP INSURANCE POLICY

(Applicable in Faribault County, Minn., Beginning With the 1953 Crop Year)

1 *Insurable crops.* For the purpose of the multiple crop insurance program the insurable crops are:

(a) Barley planted for harvest as grain.

(b) Corn normally regarded as field corn. The contract will not provide insurance for true type silage corn, corn planted thick for silage or fodder purposes, sweet corn, popcorn, broom corn, corn planted for the development of hybrid seed corn, or any type of corn other than that normally regarded as field corn.

(c) Flax planted for harvest as seed.

(d) Oats planted for harvest as grain.

(e) Soybeans planted for harvest as beans.

(f) Mixtures of insurable small grains and mixtures of flax and insurable small grains planted for harvest as grain or seed.

2. *Coverage per acre.* The coverage per acre for each insured crop shall be reduced 50 percent for any acreage released by the Corporation and planted to a substitute crop.

3. *Determining coverage(s) and premium(s) for mixtures.* (a) If a mixture of insurable crops is planted the coverage of the predominant crop shall apply.

(b) For the purpose of determining the premium, any acreage of a mixture of insurable crops shall be considered as acreage of the predominant crop.

4. *Insurance period.* Insurance shall attach at the time of planting to any insured acreage of any insured crop. Insurance shall cease with respect to any portion of the corn crop upon harvesting (picking the corn from the stalk either by hand or machine or cutting the corn for fodder or ensilage), all other insured crops upon threshing, or with respect to any portion of any crop upon removal from the field, whichever is earlier. However, in no event shall insurance remain in effect (a) with respect to any crop later than the earlier of (i) the end of the normal harvest period for such crop or (ii) December 10, unless such time is extended in writing by the Corporation, and (b) with respect to any insurance unit later than the date of submission of a claim for indemnity.

5. *Protection against loss of quality.* In determining any loss under the contract, production of each insurable crop shall be evaluated at the predetermined price established by the Corporation for that crop and shown on the county actuarial table. However, any production of barley, corn, flax, oats or soybeans, which will not meet the latest available requirements for a Commodity Credit Corporation loan or support because of poor quality due to insurable causes, and would not meet these requirements if properly handled, shall be evaluated at a value per unit determined by the Corporation.

6. *Released crop.* Notwithstanding any other provision of the policy any crop on any insured acreage may be released by the Corporation subject to an appraisal by the Corporation of the yield that would be realized if the crop were harvested, except that any corn may be used for ensilage or fodder without a release by the Corporation if the insured leaves a number of rows considered by the Corporation to be an adequate representative sample for appraising the yield.

7. *Amount of loss.* (a) The amount of loss with respect to any insurance unit shall be determined by (1) multiplying the insurable acreage (exclusive of any acreage to which insurance did not attach) planted to each insured crop by the applicable coverage per acre and the result by the insured interest, and (2) subtracting from the total thereof the insured interest in the value (based on the predetermined price) of the total production on such acreage of all insured crops. However, the amount of loss so determined shall be reduced if the premium computed for the insurance unit on the basis of the acreage and interest approved by the Corporation on the acreage report is less than the premium computed for the planted acreage on the insurance unit. This reduction shall be made on the basis of the ratio of the premium computed for the acreage and interest as approved by the Corporation on the acreage report to the premium computed for the planted acreage. The total production for each insured crop on the insurance unit shall include all production determined in accordance with the production schedule below. In determining production on acreage where a mixture of flax and an insurable small grain is insured, the production of each commodity shall be determined and handled separately. In determining production on acreage where a mixture of insurable small grains (excluding flax) is insured, all production shall be counted as the predominant small grain on a weight basis. Where any small grains are seeded with an insured growing small grain crop on acreage not released by the Corporation, all production shall be counted as the insured small grain on a weight basis. In the case of a volunteer crop produced with an insured crop, the production of such volunteer crop shall be included in determining the production of the insured crop.

The Corporation reserves the right to determine the amount of production on the basis of an appraisal of any unharvested crop standing in the field.

PRODUCTION SCHEDULE

| Crop | Acreage classification | Total production [1] |
|---|---|---|
| 1. Each insured crop | Acreage released by the Corporation and planted to a substitute crop. | That portion of the appraised production for such acreage which is in excess of the number of bushels determined by (1) subtracting the total coverage for such acreage would be from what the total coverage for such acreage would be if it were not planted to a substitute crop, and (2) dividing the result thus obtained by the predetermined price for the crop. |
| 2. Each insured crop | Acreage not planted to a substitute crop. | The appraised production or the actual production, including an appraisal of corn left in the field after harvest and an appraisal of corn used for ensilage or fodder. |
| 3. Each insured crop | Acreage put to another use without the consent of the Corporation. | Appraised production for such acreage but not less than the product of (1) such acreage and (2) the bushel equivalent of the coverage per acre on the basis of the predetermined price for the crop. |
| 4. Each insured crop | Acreage with reduced yield due solely to cause(s) not insured against. | Appraised number of bushels by which production for such acreage has been reduced but not less than the product of (1) such acreage and (2) the applicable bushel equivalent of the coverage per acre on the basis of the predetermined price for the crop, minus the number of bushels harvested. |
| 5. Each insured crop | Acreage with reduced yield due partially to cause(s) not insured against and partially to cause(s) insured against. | Appraised number of bushels by which production for such acreage has been reduced because of cause(s) not insured against. |

[1] Production shall be in bushels for all crops.

(b) If production from two or more insurance units is commingled and the insured fails to establish and maintain separate acreage and production records satisfactory to the Corporation, the Corporation may allocate the commingled production between the units involved in any manner it deems appropriate or void the insurance on the insurance units involved and declare the premium(s) for such units forfeited by the insured. If production from uninsured acreage and insured acreage is commingled and the insured fails to establish and maintain separate acreage and production records satisfactory to the Corporation, all such production which is commingled shall be considered to have been produced on the insured acreage or the Corporation may void the insurance on the insurance unit(s) involved and declare the premium(s) for such unit(s) forfeited by the insured.

8. *Date table.*

Discount date: June 30.
Maturity date: July 31.
Interest date: October 31.
Cancellation date: February 28.

Approved: Beginning with the 1953 crop year.

[SEAL] FEDERAL CROP INSURANCE CORPORATION.

§ 420.80 *New York.*

§ 420.80–2 *Steuben County.*

RIDER NO. 1 TO THE MULTIPLE CROP INSURANCE POLICY

(Applicable in Steuben County, N. Y., Beginning With the 1953 Crop Year)

1. *Insurable crops.* For the purpose of the multiple crop insurance program the insurable crops are:

(a) Corn planted for grain or silage but not including sweet corn, popcorn, broom corn, or corn planted for the development of hybrid seed corn.

(b) Dry edible beans (pea, medium white, red kidney, and white marrow).

(c) Oats (spring only) planted for harvest as grain.

(d) Potatoes (excluding acreage of less than one acre on an insurance unit) commonly known as Irish potatoes.

(e) Winter wheat planted for harvest as grain. (Insurance on wheat to attach the first crop year of the contract only if the application is filed on or before December 15 preceding the calendar year in which the crop for that crop year is normally harvested.)

2. *Coverage per acre.* The coverage per acre for each insured crop shall be reduced 50 percent for any acreage released by the Corporation and planted to a substitute crop.

3. *Insurance period.* Insurance shall attach at the time of planting to any insured acreage of any insured crop. Insurance shall cease with respect to any portion of the corn crop upon harvesting (picking the corn from the stalk either by hand or machine or cutting the corn for silage), the potato crop upon digging, all other insured crops upon threshing, or with respect to any portion of any crop upon removal from the field, whichever is earlier. However, in no event shall insurance remain in effect (a) with respect to any crop later than the earlier of (i) the end of the normal harvest period for such crop or (ii) December 10, unless such time is extended in writing by the Corporation, and (b) with respect to any insurance unit later than the date of submission of a claim for indemnity.

4. *Protection against loss of quality.* In determining any loss under the contract, production of each insurable crop shall be evaluated at the predetermined price established by the Corporation for that crop and shown on the county actuarial table. However, any production of corn (as set forth below), oats, potatoes, or wheat which will not meet the latest available requirements for a Commodity Credit Corporation loan or support because of poor quality due to insurable causes, and would not meet these requirements if properly handled, shall be evaluated at a value per unit determined by the Corporation. In order for corn to be so evaluated for poor quality it must be a variety of corn adapted to the production of corn for grain and must be harvested as grain. In order to provide quality protection on dry edible beans, production of beans shall be determined on the basis of sound whole beans.

5. *Released crop.* Notwithstanding any other provision of the policy any crop on any insured acreage may be released by the Corporation subject to an appraisal by the Corporation of the yield that would be realized if the crop were harvested.

6. *Amount of loss.* (a) The amount of loss with respect to any insurance unit shall be determined by (1) multiplying the insurable acreage (exclusive of any acreage to which insurance did not attach) planted to each insured crop by the applicable coverage per acre, and the result by the insured interest, and (2) subtracting from the total thereof the insured interest in the value (based on the predetermined price) of the total production on such acreage of all insured crops. However, the amount of loss so determined shall be reduced if the premium computed for the insurance unit on the basis of the acreage and interest approved by the Corporation for the crop year is less than the premium computed for the planted acreage for the insurance unit. This reduction shall be made on the basis of the ratio of the premium computed for the acreage and interest as approved by the Corporation on the acreage report to the premium computed for the planted acreage. The total production for each insured crop on the insurance unit shall include all production determined in accordance with the production schedule below. Production of corn shall be counted as grain, except that production for any corn harvested for silage and the appraised production for any true type silage corn and corn planted thick for silage but not harvested as silage shall be counted as corn silage. Where any small grains are seeded with an insured growing small grain crop on acreage not released by the Corporation, all production shall be counted as the insured small grain on a weight basis. In the case of a volunteer crop produced with an insured crop, the production of such volunteer crop shall be included in determining the production of the insured crop.

The Corporation reserves the right to determine the amount of production on the basis of an appraisal of any unharvested crop standing in the field.

PRODUCTION SCHEDULE

| Crop | Acreage classification | Total production [1] |
|---|---|---|
| 1. Each insured crop... | Acreage released by the Corporation and planted to a substitute crop. | That portion of the appraised production for such acreage which is in excess of the number of bushels, pounds, or tons determined by (1) subtracting the total coverage for such acreage from what the total coverage for such acreage would be if it were not planted to a substitute crop, and (2) dividing the result thus obtained by the predetermined price for the crop. |
| 2. Each insured crop... | Acreage not planted to a substitute crop. | The appraised production or the actual production, including an appraisal of corn left in the field after harvest. |
| 3. Each insured crop... | Acreage put to another use without the consent of the Corporation. | Appraised production for such acreage but not less than the product of (1) such acreage and (2) the bushel, pound, or ton equivalent of the coverage per acre on the basis of the predetermined price for the crop. |
| 4. Each insured crop... | Acreage with reduced yield due solely to cause(s) not insured against. | Appraised number of bushels, pounds, or tons by which production for such acreage has been reduced but not less than the product of (1) such acreage and (2) the applicable bushel, pound, or ton equivalent of the coverage per acre on the basis of the predetermined price for the crop, minus the number of bushels, pounds, or tons harvested. |
| 5. Each insured crop... | Acreage with reduced yield due partially to cause(s) not insured against and partially to cause(s) insured against. | Appraised number of bushels, pounds, or tons by which production for such acreage has been reduced because of cause(s) not insured against. |

[1] Production and allowances shall be in bushels for oats and wheat, pounds for beans and potatoes, and in bushels for corn grain or in tons (rounded to tenths) for corn silage.

(b) If production from two or more insurance units is commingled and the insured fails to establish and maintain separate acreage and production records satisfactory to the Corporation, the Corporation may allocate the commingled production between the units involved in any manner it deems appropriate or void the insurance on the insurance units involved and declare the premium(s) for such units forfeited by the insured. If production from uninsured acreage and insured acreage is commingled and the insured fails to establish and maintain separate acreage and production records satisfactory to the Corporation, all such production which is commingled shall be considered to have been produced on the insured acreage or the Corporation may void the insurance on the insurance unit(s) involved and declare the premium(s) for such unit(s) forfeited by the insured.

Discount date: June 30.
Maturity date: July 31.
Interest date: October 31.
Cancellation date: September 30.

Approved: Beginning with the 1953 crop year.

[SEAL] FEDERAL CROP INSURANCE CORPORATION.

§ 420.82 *North Dakota.*

§ 420.82–1 *Barnes County.*

RIDER NO. 1 TO THE MULTIPLE CROP INSURANCE POLICY

(Applicable in Barnes County, N. Dak., Beginning With the 1953 Crop Year)

1. *Insurable crops.* For the purpose of the multiple crop insurance program the insurable crops are:

(a) Barley planted for harvest as grain.

(b) Corn normally regarded as field corn. The contract will not provide insurance for true type silage corn, corn planted thick for silage or fodder purposes, sweet corn, popcorn, broom corn, corn planted for the development of hybrid seed corn, or any type of corn other than that normally regarded as field corn.

(c) Flax planted for harvest as seed.

(d) Oats planted for harvest as grain.

(e) Rye (winter only) planted for harvest as grain.

(f) Spring wheat planted for harvest as grain.

2. *Coverage per acre.* The coverage per acre for each insured crop shall be reduced 50 percent for any acreage released by the Corporation and planted to a substitute crop.

3. *Insurance period.* Insurance shall attach at the time of planting to any insured acreage of any insured crop. Insurance shall cease with respect to any portion of the corn crop upon harvesting (picking the corn from the stalk either by hand or machine or cutting the corn for fodder or ensilage), all other insured crops upon threshing, or with respect to any portion of any crop upon removal from the field, whichever is earlier. However, in no event shall insurance remain in effect (a) with respect to any crop later than the earlier of (i) the end of the normal harvest period for such crop or (ii) October 31, unless such time is extended in writing by the Corporation, and (b) with respect to any insurance unit later than the date of submission of a claim for indemnity.

4. *Predetermined price for valuing production.* In determining any loss under the contract, production of each insurable crop shall be evaluated at the predetermined price established by the Corporation for that crop and shown on the county actuarial table. The predetermined prices for the 1953 crop year are on file in the county office and for any subsequent crop year shall be on file in the county office at least 15 days prior to the cancellation date. However, any production of barley, corn, flax, oats, rye, or wheat which will not meet the latest available requirements for a Commodity Credit Corporation loan or support because of poor quality due to insurable causes, and would not meet these requirements if properly handled, shall be evaluated at a value per bushel determined by the Corporation.

5. *Released crop.* Notwithstanding any other provision of the policy any crop on any insured acreage may be released by the Corporation subject to an appraisal by the Corporation of the yield that would be realized if the crop were harvested, except that any corn may be used for ensilage or fodder without a release by the Corporation if the insured leaves a number of rows considered by the Corporation to be an adequate representative sample for appraising the yield.

6. *Amount of loss.* (a) The amount of loss with respect to any insurance unit shall be determined by (1) multiplying the insurable acreage (exclusive of any acreage to which insurance did not attach) planted to each insured crop by the applicable coverage per acre, and the result by the insured interest, and (2) subtracting from the total thereof the insured interest in the value (based on the predetermined price) of the total production on such acreage of all insured crops. However, the amount of loss so determined shall be reduced if the premium computed for the insurance unit on the basis of the acreage and interest approved by the Corporation on the acreage report is less than the premium computed for the planted acreage on the insurance unit. This reduction shall be made on the basis of the ratio of the premium computed for the acreage and interest as approved by the Corporation on the acreage report to the premium computed for the planted acreage. The total production for each insured crop on the insurance unit shall include all production determined in accordance with the production schedule below. However, with respect to any acreage of corn which is not or will not be harvested as corn for grain, the production shall be the appraised production of corn for grain, or the appraised or actual production of ensilage, whichever has the higher total value (on the basis of the price per bushel for corn as provided under section 4 above, or the value per ton for ensilage as determined by the Corporation): Provided however that, if the appraised or actual production of corn which was or could have been used for ensilage is one ton or more per acre, the value of such production shall not be less than $3.00 per acre.

Where any small grains are seeded with an insured growing small grain crop on acreage not released by the Corporation, all production shall be counted as insured small grain on a weight basis. In the case of a volunteer crop produced with an insured crop, the production of such volunteer crop shall be included in determining the production of the insured crop. The Corporation reserves the right to determine the amount of production on the basis of an appraisal of any unharvested crop standing in the field.

PRODUCTION SCHEDULE

| Crop | Acreage classification | Total production [1] |
|---|---|---|
| 1. Each insured crop... | Acreage released by the Corporation and planted to a substitute crop. | That portion of the appraised production for such acreage which is in excess of the number of bushels determined by (1) subtracting the total coverage for such acreage from what the total coverage for such acreage would be if it were not planted to a substitute crop, and (2) dividing the result thus obtained by the predetermined price for the crop. |
| 2. Each insured crop... | Acreage not planted to a substitute crop. | The appraised production or the actual production including an appraisal of corn left in the field after harvest. |
| 3. Each insured crop... | Acreage put to another use without the consent of the Corporation. | Appraised production for such acreage but not less than the product of (1) such acreage and (2) the bushel equivalent of the coverage per acre on the basis of the predetermined price for the crop. |
| 4. Each insured crop... | Acreage with reduced yield due solely to cause(s) not insured against. | Appraised number of bushels by which production for such acreage has been reduced but not less than the product of (1) such acreage and (2) the applicable bushel equivalent of the coverage per acre, on the basis of the predetermined price for the crop, minus the number of bushels harvested. |
| 5. Each insured crop... | Acreage with reduced yield due partially to cause(s) not insured against and partially to cause(s) insured against. | Appraised number of bushels by which production for such acreage has been reduced because of cause(s) not insured against. |

[1] Production shall be in bushels for all crops.

(b) If production from two or more insurance units is commingled and the insured fails to establish and maintain separate acreage and production records satisfactory to the Corporation, the Corporation may allocate the commingled production between the units involved in any manner it deems appropriate or void the insurance on the insurance units involved and declare the premium(s) for such units forfeited by the insured. If production for uninsured acreage and insured acreage is commingled and the insured fails to establish and maintain separate acreage and production records satisfactory to the Corporation, all such production is considered to have been produced on the insured acreage or the Corporation may void the insurance on the insurance unit(s) involved and declare the premium(s) for such unit(s) forfeited by the insured.

7. *Date table.*

Discount date: June 30.
Maturity date: July 31.
Interest date: October 31.
Cancellation date: February 28.

8. *Reduction of premium based on good experience.* The insured's annual premium for any year may be reduced 25 percent if he has had seven consecutive years of insured crop(s) under a Federal Crop Insurance contract without a loss for which an indemnity was paid. Credit for consecutive years of good experience under any other existing Federal Crop Insurance contract will not be transferred to the multiple crop contract if the insured is eligible to receive a premium discount based on consecutive years of good experience or based on an accumulated balance of premiums over indemnities under such existing contract. Nothing in this paragraph shall create in the insured any right to a reduced premium.

Approved: Beginning with the 1953 crop year.

[SEAL] FEDERAL CROP INSURANCE CORPORATION.

§ 420.82–2 *Ransom County.*

RIDER NO. 1 TO THE MULTIPLE CROP INSURANCE POLICY

(Applicable in Ransom County, N. Dak., Beginning With the 1953 Crop Year)

1. *Insurable crops.* For the purpose of the multiple crop insurance program the insurable crops are:

(a) Barley planted for harvest as grain.

(b) Corn normally regarded as field corn. The contract will not provide insurance for true type silage corn, corn planted thick for silage or fodder purposes, sweet corn, popcorn, broom corn, corn planted for the development of hybrid seed corn, or any type of corn other than that normally regarded as field corn.

(c) Flax planted for harvest as seed.

(d) Oats planted for harvest as grain.

(e) Rye (winter only) planted for harvest as grain.

(f) Spring wheat planted for harvest as grain.

2. *Coverage per acre.* The coverage per acre for each insured crop shall be reduced 50 percent for any acreage released by the Corporation and planted to a substitute crop.

3. *Insurance period.* Insurance shall attach at the time of planting to any insured acreage of any insured crop. Insurance shall cease with respect to any portion of the corn crop upon harvesting (picking the corn from the stalk either by hand or machine or cutting the corn for fodder or ensilage), all other insured crops upon threshing, or with respect to any portion of any crop upon removal from the field, whichever is earlier. However, in no event shall insurance remain in effect (a) with respect to any crop later than the earlier of (i) the end of the normal harvest period for such crop or (ii) October 31, unless such time is extended in writing by the Corporation, and (b) with respect to any insurance unit later than the date of submission of a claim for indemnity.

4. *Predetermined price for valuing production.* In determining any loss under the contract, production of each insurable crop shall be evaluated at the predetermined price established by the Corporation for that crop and shown on the county actuarial table. The predetermined prices for the 1953 crop year are on file in the county office and for any subsequent crop year shall be on file in the county office at least 15 days prior to the cancellation date. However, any production of barley, corn, flax, oats, rye, or wheat which will not meet the latest available requirements for a Commodity Credit Corporation loan or support because of poor quality due to insurable causes, and would not meet these requirements if properly handled, shall be evaluated at a value per bushel determined by the Corporation.

5. *Released crop.* Notwithstanding any other provision of the policy any crop on any insured acreage may be released by the Corporation subject to an appraisal by the Corporation of the yield that would be realized if the crop were harvested, except that any corn may be used for ensilage or fodder without a release by the Corporation if the insured leaves a number of rows considered by the Corporation to be an adequate representative sample for appraising the yield.

6. *Amount of loss.* (a) The amount of loss with respect to any insurance unit shall be determined by (1) multiplying the insurable acreage (exclusive of any acreage to which insurance did not attach) planted to each insured crop by the applicable coverage per acre, and the result by the insured interest, and (2) subtracting from the total thereof the insured interest in the value (based on the predetermined price) of the total production on such acreage of all insured crops. However, the amount of loss so determined shall be reduced if the pre-

mium computed for the insurance unit on the basis of the acreage and interest approved by the Corporation on the acreage report is less than the premium computed for the planted acreage on the insurance unit. This reduction shall be made on the basis of the ratio of the premium computed for the acreage and interest as approved by the Corporation on the acreage report to the premium computed for the planted acreage. The total production for each insured crop on the insurance unit shall include all production determined in accordance with the production schedule below. However, with respect to any acreage of corn which is not or will not be harvested as corn for grain, the production shall be the appraised production of corn for grain, or the appraised or actual production of ensilage, whichever has the higher total value (on the basis of the price per bushel for corn as provided under section 4 above, or the value per ton for ensilage as determined by the Corporation): Provided however that, if the appraised or actual production of corn which was or could have been used for ensilage is one ton or more per acre, the value of such production shall not be less than $3.00 per acre.

Where any small grains are seeded with an insured growing small grain crop on acreage not released by the Corporation, all production shall be counted as insured small grain on a weight basis. In the case of a volunteer crop produced with an insured crop, the production of such volunteer crop shall be included in determining the production of the insured crop. The Corporation reserves the right to determine the amount of production on the basis of an appraisal of any unharvested crop standing in the field. However, in no event shall insurance remain in effect (a) with respect to any crop later than the earlier of (i) the end of the normal harvest period for such corp or (ii) October 31, unless such time is extended in writing by the Corporation, and (b) with respect to any insurance unit later than the date of submission of a claim for indemnity.

4. *Predetermined price for valuing production.* In determining any loss under the contract, production of each insurable crop shall be evaluated at the predetermined price established by the Corporation for that crop and shown on the country actuarial table. The predetermined prices for the 1953 crop year are on file in the county office and for any subsequent crop year shall be on file in the county office at least 15 days prior to the cancellation date. However, any production of barley, corn, flax, oats, rye, or wheat which will not meet the latest available requirements for a Commodity Credit Corporation loan or support because of poor quality due to insurable causes, and would not meet these requirements if properly handled, shall be evaluated at a value per bushel determined by the Corporation.

5. *Released crop.* Notwithstanding any other provision of the policy any crop on any insured acreage may be released by the Corporation subject to an appraisal by the Corporation of the yield that would be realized if the crop were harvested, except that any corn may be used for ensilage or fodder without a release by the Corporation if the insured leaves a number of rows considered by the Corporation to be an adequate representative sample for appraising the yield.

6. *Amount of loss.* (a) The amount of loss with respect to any insurance unit shall be determined by (1) multiplying the insurable acreage (exclusive of any acreage to which insurance did not attach) planted to each insured crop by the applicable coverage per acre, and the result by the insured interest, and (2) subtracting from the total thereof the insured interest in the value (based on the predetermined price) of the total production on such acreage of all insured crops. However, the amount of loss so determined shall be reduced if the premium computed for the insurance unit on the basis of the acreage and interest approved by the Corporation on the acreage report is less than the premium computed for the planted acreage on the insurance unit. This reduction shall be made on the basis of the ratio of the premium computed for the acreage and interest as approved by the Corporation on the acreage report to the premium computed for the planted acreage. The total production for each insured crop on the insurance unit shall include all production determined in accordance with the production schedule below. However, with respect to any acreage of corn which is not or will not be harvested as corn for grain, the production shall be the appraised production of corn for grain, or the appraised or actual production of ensilage, whichever has the higher total value (on the basis of the price per bushel for corn as provided under section 4 above, or the value per ton for ensilage as determined by the Corporation): Provided however that, if the appraised or actual production of corn which was or could have been used for ensilage is one ton or more per acre, the value of such production shall not be less than $3.00 per acre.

Where any small grains are seeded with an insured growing small grain crop on acreage not released by the Corporation, all production shall be counted as insured small grain on a weight basis. In the case of a volunteer crop produced with an insured crop, the production of such volunteer crop shall be included in determining the production of the insured crop. The Corporation reserves the right to determine the amount of production on the basis of an appraisal of any unharvested crop standing in the field.

PRODUCTION SCHEDULE

| Crop | Acreage classification | Total production [1] |
|---|---|---|
| 1. Each insured crop... | Acreage released by the Corporation and planted to a substitute crop. | That portion of the appraised production for such acreage which is in excess of the number of bushels determined by (1) subtracting the total coverage for such acreage from what the total coverage for such acreage would be if it were not planted to a substitute crop, and (2) dividing the result thus obtained by the predetermined price for the crop. |
| 2. Each insured crop... | Acreage not planted to a substitute crop. | The appraised production or the actual production including an appraisal of corn left in the field after harvest. |
| 3. Each insured crop... | Acreage put to another use without the consent of the Corporation. | Appraised production for such acreage but not less than the product of (1) such acreage and (2) the bushel equivalent of the coverage per acre on the basis of the predetermined price for the crop. |
| 4. Each insured crop... | Acreage with reduced yield due solely to cause(s) not insured against. | Appraised number of bushels by which production for such acreage has been reduced but not less than the product of (1) such acreage and (2) the applicable bushel equivalent of the coverage per acre, on the basis of the predetermined price for the crop, minus the number of bushels harvested. |
| 5. Each insured crop... | Acreage with reduced yield due partially to cause(s) not insured against and partially to cause(s) insured against. | Appraised number of bushels by which production for such acreage has been reduced because of cause(s) not insured against. |

[1] Production shall be in bushels for all crops.

(b) If production from two or more insurance units is commingled and the insured fails to establish and maintain separate acreage and production records satisfactory to the Corporation, the Corporation may allocate the commingled production between the units involved in any manner it deems appropriate or void the insurance on the insurance units involved and declare the premium(s) for such units forfeited by the insured. If production for uninsured acreage and insured acreage is commingled and the insured fails to establish and maintain separate acreage and production records satisfactory to the Corporation, all such production which is commingled shall be considered to have been produced on the insured acreage or the Corporation may void the insurance on the insurance unit(s) involved and declare the premium(s) for such unit(s) forfeited by the insured.

7. *Date table.*

Discount date: June 30.
Maturity date: July 31.
Interest date: October 31.
Cancellation date: February 28.

8. *Reduction of premium based on good experience.* The insured's annual premium for any year may be reduced 25 percent if he has had seven consecutive years of insured crop(s) under a Federal Crop Insurance contract without a loss for which an indemnity was paid. Credit for consecutive years of good experience under any other existing Federal Crop Insurance contract will not be transferred to the multiple crop contract if the insured is eligible to receive a premium discount based on consecutive years of good experience or based on an accumulated balance of premiums over indemnities under such existing contract. Nothing in this paragraph shall create in the insured any right to a reduced premium.

Approved: Beginning with the 1953 crop year.

[SEAL] FEDERAL CROP INSURANCE CORPORATION.

§ 420.82-3 *Sargent County.*

RIDER NO. 1 TO THE MULTIPLE CROP INSURANCE POLICY

(Applicable in Sargent County, N. Dak., Beginning With the 1953 Crop Year)

1. *Insurable crops.* For the purpose of the multiple crop insurance program the insurable crops are:

(a) Barley planted for harvest as grain.

(b) Corn normally regarded as field corn. The contract will not provide insurance for true type silage corn, corn planted thick for silage or fodder purposes, sweet corn, popcorn, broom corn, corn planted for the development of hybrid seed corn, or any type of corn other than that normally regarded as field corn.

(c) Flax planted for harvest as seed.

(d) Oats planted for harvest as grain.

(e) Rye (winter only) planted for harvest as grain.

(f) Spring wheat planted for harvest as grain.

2. *Coverage per acre.* The coverage per acre for each insured crop shall be reduced 50 percent for any acreage released by the Corporation and planted to a substitute crop.

3. *Insurance period.* Insurance shall attach at the time of planting to any insured acreage of any insured crop. Insurance shall cease with respect to any portion of the corn crop upon harvesting (picking the corn from the stalk either by hand or machine or cutting the corn for fodder or ensilage), all other insured crops upon threshing, or with respect to any portion of any crop upon removal from the field, whichever is earlier.

[SEAL] FEDERAL CROP INSURANCE CORPORATION.

## § 420.82–6 *La Moure County.*

RIDER NO. 1 TO THE MULTIPLE CROP INSURANCE POLICY

(Applicable in La Moure County, N. Dak., Beginning With the 1953 Crop Year)

1. *Insurable crops.* For the purpose of the multiple crop insurance program the insurable crops are:

(a) Barley planted for harvest as grain.

(b) Corn normally regarded as field corn. The contract will not provide insurance for true type silage corn, corn planted thick for silage or fodder purposes, sweet corn, popcorn, broom corn, corn planted for the development of hybrid seed corn, or any type of corn other than that normally regarded as field corn.

(c) Flax planted for harvest as seed.

(d) Oats planted for harvest as grain.

(e) Rye (winter only) planted for harvest as grain.

(f) Spring wheat planted for harvest as grain.

2. *Coverage per acre.* The coverage per acre for each insured crop shall be reduced 50 percent for any acreage released by the Corporation and planted to a substitute crop.

3. *Insurance period.* Insurance shall attach at the time of planting to any insured acreage of any insured crop. Insurance shall cease with respect to any portion of the corn crop upon harvesting (picking the corn from the stalk either by hand or machine or cutting the corn for fodder or ensilage), all other insured crops upon threshing, or with respect to any portion of any crop upon removal from the field, whichever is earlier. However, in no event shall insurance remain in effect (a) with respect to any crop later than the earlier of (i) the end of the normal harvest period for such crop or (ii) October 31, unless such time is extended in writing by the Corporation, and (b) with respect to any insurance unit later than the date of submission of a claim for indemnity.

4. *Protection against loss of quality.* In determining any loss under the contract, production of each insurable crop shall be evaluated at the predetermined price established by the Corporation for that crop and shown on the county actuarial table. However, any production of barley, corn, flax, oats, rye, or wheat which will not meet the latest available requirements for a Commodity Credit Corporation loan or support because of poor quality due to insurable causes, and would not meet these requirements if properly handled, shall be evaluated at a value per bushel determined by the Corporation.

5. *Released crop.* Notwithstanding any other provision of the policy any crop on any insured acreage may be released by the Corporation subject to an appraisal by the Corporation of the yield that would be realized if the crop were harvested, except that any corn may be used for ensilage or fodder without a release by the Corporation if the insured leaves a number of rows considered by the Corporation to be an adequate representative sample for appraising the yield.

6. *Amount of loss.* (a) The amount of loss with respect to any insurance unit shall be determined by (1) multiplying the insurable acreage (exclusive of any acreage to which insurance did not attach) planted to each insured crop by the applicable coverage per acre, and the result by the insured interest, and (2) subtracting from the total thereof the insured interest in the value (based on the predetermined price) of the total production on such acreage of all insured crops. However, the amount of loss so determined shall be reduced if the premium computed for the insurance unit on the basis of the acreage and interest approved by the Corporation on the acreage report is less than the premium computed for the planted acreage on the insurance unit. This reduction shall be made on the basis of the ratio of the premium computed for the acreage and interest as approved by the Corporation on the acreage report to the premium computed for the planted acreage. The total production for each insured crop on the insurance unit shall include all production determined in accordance with the production schedule below. Where any small grains are seeded with an insured growing small grain crop on acreage not released by the Corporation, all production shall be counted as the insured small grain on a weight basis. In the case of a volunteer crop produced with an insured crop, the production of such volunteer crop shall be included in determining the production of the insured crop.

The Corporation reserves the right to determine the amount of production on the basis of an appraisal of any unharvested crop standing in the field.

PRODUCTION SCHEDULE

| Crop | Acreage classification | Total production [1] |
|---|---|---|
| 1. Each insured crop... | Acreage released by the Corporation and planted to a substitute crop. | That portion of the appraised production for such acreage which is in excess of the number of bushels determined by (1) subtracting the total coverage for such acreage from what the total coverage for such acreage would be if it were not planted to a substitute crop, and (2) dividing the result thus obtained by the predetermined price for the crop. |
| 2. Each insured crop... | Acreage not planted to a substitute crop. | The appraised production or the actual production, including an appraisal of corn left in the field after harvest. |
| 3. Each insured crop... | Acreage put to another use without the consent of the Corporation. | Appraised production for such acreage but not less than the product of (1) such acreage and (2) the bushel equivalent of the coverage per acre on the basis of the predetermined price for the crop. |
| 4. Each insured crop... | Acreage with reduced yield due solely to cause(s) not insured against. | Appraised number of bushels by which production for such acreage has been reduced but not less than the product of (1) such acreage and (2) the applicable bushel equivalent of the coverage per acre on the basis of the predetermined price for the crop, minus the number of bushels harvested. |
| 5. Each insured crop... | Acreage with reduced yield due partially to cause(s) not insured against and partially to cause(s) insured against. | Appraised number of bushels by which production for such acreage has been reduced because of cause(s) not insured against. |

[1] Production shall be in bushels for all crops.

(b) If production from two or more insurance units is commingled and the insured fails to establish and maintain separate acreage and production records satisfactory to the Corporation, the Corporation may allocate the commingled production between the units involved in any manner it deems appropriate or void the insurance on the insurance units involved and declare the premium(s) for such units forfeited by the insured. If production from uninsured acreage and insured acreage is commingled and the insured fails to establish and maintain separate acreage and production records satisfactory to the Corporation, all such production which is commingled shall be considered to have been produced on the insured acreage or the Corporation may void the insurance on the insurance unit(s) involved and declare the premium(s) for such unit(s) forfeited by the insured.

7. *Date table.*
Discount date: June 30.
Maturity date: July 31.
Interest date: October 31.
Cancellation date: February 28.

Approved: Beginning with the 1953 crop year.

## § 420.82–7 *Steele County.*

RIDER NO. 1 TO THE MULTIPLE CROP INSURANCE POLICY

(Applicable in Steele County, N. Dak., Beginning With the 1953 Crop Year)

1. *Insurable crops.* For the purpose of the multiple crop insurance program the insurable crops are:

(a) Barley planted for harvest as grain.

(b) Flax planted for harvest as seed.

(c) Oats planted for harvest as grain.

(d) Rye (winter only) planted for harvest as grain.

(e) Spring wheat planted for harvest as grain.

2. *Coverage per acre.* The coverage per acre for each insured crop shall be reduced 50 percent for any acreage released by the Corporation and planted to a substitute crop.

3. *Insurance period.* Insurance shall attach at the time of planting to any insured acreage of any insured crop. Insurance shall cease with respect to any portion of all insured crops upon threshing, or with respect to any portion of any crop upon removal from the field, whichever is earlier. However, in no event shall insurance remain in effect (a) with respect to any crop later than the earlier of (i) the end of the normal harvest period for such crop or (ii) October 31, unless such time is extended in writing by the Corporation, and (b) with respect to any insurance unit later than the date of submission of a claim for indemnity.

4. *Protection against loss of quality.* In determining any loss under the contract, production of each insurable crop shall be evaluated at the predetermined price established by the Corporation for that crop and shown on the county actuarial table. However, any production of barley, corn, flax, oats, rye, or wheat which will not meet the latest available requirements for a Commodity Credit Corporation loan or support because of poor quality due to insurable causes, and would not meet these requirements if properly handled, shall be evaluated at a value per bushel determined by the Corporation.

5. *Released crop.* Notwithstanding any other provision of the policy any crop on any insured acreage may be released by the Corporation subject to an appraisal by the Corporation of the yield that would be realized if the crop were harvested.

6. *Amount of loss.* (a) The amount of loss with respect to any insurance unit shall be determined by (1) multiplying the insurable acreage (exclusive of any acreage to which insurance did not attach) planted to each insured crop by the applicable coverage per acre, and the result by the insured interest, and (2) subtracting from the total thereof the insured interest in the value (based on the predetermined price) of the total production on such acreage of all insured crops. However, the amount of loss so determined shall be reduced if the premium computed for the insurance unit on the basis of the acreage and interest approved by the Corporation on the acreage report is less than the premium computed for the planted acreage on the insurance unit. This reduction shall be made on the basis of the ratio of the premium computed for the acreage and interest as approved by the Corporation on the acreage report to the premium computed for the planted acreage. The total production for each insured crop on the insurance unit shall include all production determined in accordance with the production schedule below. Where any small grains are seeded with an insured growing small grain crop on acreage not released by the Corporation, all production shall be counted as the insured small grain on a weight basis. In the case of a volunteer crop produced with an insured crop, the production of such volunteer crop shall be included in determining the production of the insured crop.

The Corporation reserves the right to determine the amount of production on the basis of an appraisal of any unharvested crop standing in the field.

PRODUCTION SCHEDULE

| Crop | Acreage classification | Total production [1] |
|---|---|---|
| 1. Each insured crop... | Acreage released by the Corporation and planted to a substitute crop. | That portion of the appraised production for such acreage which is in excess of the number of bushels determined by (1) subtracting the total coverage for such acreage from what the total coverage for such acreage would be if it were not planted to a substitute crop, and (2) dividing the result thus obtained by the predetermined price for the crop. |
| 2. Each insured crop... | Acreage not planted to a substitute crop. | The appraised production or the actual production. |
| 3. Each insured crop... | Acreage put to another use without the consent of the Corporation. | Appraised production for such acreage but not less than the product of (1) such acreage and (2) the bushel equivalent of the coverage per acre on the basis of the predetermined price for the crop. |
| 4. Each insured crop... | Acreage with reduced yield due solely to cause(s) not insured against. | Appraised number of bushels by which production for such acreage has been reduced but not less than the product of (1) such acreage and (2) the applicable bushel equivalent of the coverage per acre on the basis of the predetermined price for the crop, minus the number of bushels harvested. |
| 5. Each insured crop... | Acreage with reduced yield due partially to cause(s) not insured against and partially to cause(s) insured against. | Appraised number of bushels by which production for such acreage has been reduced because of cause(s) not insured against. |

[1] Production shall be in bushels for all crops.

(b) If production from two or more insurance units is commingled and the insured fails to establish and maintain separate acreage and production records satisfactory to the Corporation, the Corporation may allocate the commingled production between the units involved in any manner it deems appropriate or void the insurance on the insurance units involved and declare the premium(s) for such units forfeited by the insured. If production from uninsured acreage and insured acreage is commingled and the insured fails to establish and maintain separate acreage and production records satisfactory to the Corporation, all such production which is commingled shall be considered to have been produced on the insured acreage or the Corporation may void the insurance on the insurance unit(s) involved and declare the premium(s) for such unit(s) forfeited by the insured.

7. *Date table.*
Discount date: June 30.
Maturity date: July 31.
Interest date: October 31.
Cancellation date: February 28.

Approved: Beginning with the 1953 crop year.

[SEAL] FEDERAL CROP INSURANCE CORPORATION.

## § 420.82–8 *Richland County.*

RIDER NO. 1 TO THE MULTIPLE CROP INSURANCE POLICY

(Applicable in Richland County, N. Dak., Beginning With the 1953 Crop Year)

1. *Insurable crops.* For the purpose of the multiple crop insurance program the insurable crops are:

(a) Barley planted for harvest as grain.

(b) Corn normally regarded as field corn. The contract will not provide insurance for true type silage corn, corn planted thick for silage or fodder purposes, sweet corn, popcorn, broom corn, corn planted for the development of hybrid seed corn, or any type of corn other than that normally regarded as field corn.

(c) Flax planted for harvest as seed.

(d) Oats planted for harvest as grain.

(e) Rye (winter only) planted for harvest as grain.

(f) Soybeans planted for harvest as beans.

(g) Spring wheat planted for harvest as grain.

2. *Coverage per acre.* The coverage per acre for each insured crop shall be reduced 50 percent for any acreage released by the Corporation and planted to a substitute crop.

3. *Insurance period.* Insurance shall attach at the time of planting to any insured acreage of any insured crop. Insurance shall cease with respect to any portion of the corn crop upon harvesting (picking the corn from the stalk either by hand or machine or cutting the corn for fodder or ensilage), all other insured crops upon threshing, or with respect to any portion of any crop upon removal from the field, whichever is earlier. However, in no event shall insurance remain in effect (a) with respect to any crop later than the earlier of (i) the end of the normal harvest period for such crop or (ii) October 31, unless such time is extended in writing by the Corporation, and (b) with respect to any insurance unit later than the date of submission of a claim for indemnity.

4. *Protection against loss of quality.* In determining any loss under the contract, production of each insurable crop shall be evaluated at the predetermined price established by the Corporation for that crop and shown on the county actuarial table. However, any production of barley, corn, flax, oats, rye, soybeans, or wheat which will not meet the latest available requirements for a Commodity Credit Corporation loan or support because of poor quality due to insurable causes, and would not meet these requirements if properly handled, shall be evaluated at a value per bushel determined by the Corporation.

5. *Released crop.* Notwithstanding any other provision of the policy any crop on any insured acreage may be released by the Corporation subject to an appraisal by the Corporation of the yield that would be realized if the crop were harvested, except that any corn may be used for ensilage or fodder without a release by the Corporation if the insured leaves a number of rows considered by the Corporation to be an adequate representative sample for appraising the yield.

6. *Amount of loss.* (a) The amount of loss with respect to any insurance unit shall be determined by (1) multiplying the insurable acreage (exclusive of any acreage to which insurance did not attach) planted to each insured crop by the applicable coverage per acre, and the result by the insured interest, and (2) subtracting from the total thereof the insured interest in the value (based on the predetermined price) of the

total production on such acreage of all insured crops. However, the amount of loss so determined shall be reduced if the premium computed for the insurance unit on the basis of the acreage and interest approved by the Corporation on the acreage report is less than the premium computed for the planted acreage on the insurance unit. This reduction shall be made on the basis of the ratio of the premium computed for the acreage and interest as approved by the Corporation on the acreage report to the premium computed for the planted acreage. The total production for each insured crop on the insurance unit shall include all production determined in accordance with the production schedule below. However, with respect to any acreage of corn which is not or will not be harvested as corn for grain, the production shall be the appraised production of corn for grain or the appraised or actual production of ensilage, whichever has the higher total value (on the basis of the price per bushel for corn as provided under section 4 above, or the value per ton for ensilage as determined by the Corporation): Provided however that, if the appraised or actual production of corn which was or could have been used for ensilage is one ton or more per acre, the value of such production shall not be less than $3.00 per acre. Where any small grains are seeded with an insured growing small grain crop on acreage not released by the Corporation, all production shall be counted as the insured small grain on a weight basis. In the case of a volunteer crop produced with an insured crop, the production of such volunteer crop shall be included in determining the production of the insured crop.

The Corporation reserves the right to determine the amount of production on the basis of an appraisal of any unharvested crop standing in the field.

PRODUCTION SCHEDULE

| Crop | Acreage classification | Total production [1] |
|---|---|---|
| 1. Each insured crop... | Acreage released by the Corporation and planted to a substitute crop. | That portion of the appraised production for such acreage which is in excess of the number of bushels determined by (1) subtracting the total coverage for such acreage from what the total coverage for such acreage would be if it were not planted to a substitute crop, and (2) dividing the result thus obtained by the predetermined price for the crop. |
| 2. Each insured crop... | Acreage not planted to a substitute crop. | The appraised production or the actual production, including an appraisal of corn left in the field after harvest. |
| 3. Each insured crop... | Acreage put to another use without the consent of the Corporation. | Appraised production for such acreage but not less than the product of (1) such acreage and (2) the bushel equivalent of the coverage per acre on the basis of the predetermined price for the crop. |
| 4. Each insured crop... | Acreage with reduced yield due solely to cause(s) not insured against. | Appraised number of bushels by which production for such acreage has been reduced but not less than the product of (1) such acreage and (2) the applicable bushel equivalent of the coverage per acre on the basis of the predetermined price for the crop, minus the number of bushels harvested. |
| 5. Each insured crop... | Acreage with reduced yield due partially to cause(s) not insured against partially to cause(s) insured against. | Appraised number of bushels by which production for such acreage has been reduced because of cause(s) not insured against. |

[1] Production shall be in bushels for all crops.

(b) If production from two or more insurance units is commingled and the insured fails to establish and maintain separate acreage and production records satisfactory to the Corporation, the Corporation may allocate the commingled production between the units involved in any manner it deems appropriate or void the insurance on the insurance units involved and declare the premium(s) for such units forfeited by the insured. If production from uninsured acreage and insured acreage is commingled and the insured fails to establish and maintain separate acreage and production records satisfactory to the Corporation, all such production which is commingled shall be considered to have been produced on the insured acreage or the Corporation may void the insurance on the insurance unit(s) involved and declare the premium(s) for such unit(s) forfeited by the insured.

7. *Date table.*

Discount date: June 30.
Maturity date: July 31.
Interest date: October 31.
Cancellation date: February 28.

Approved: Beginning with the 1953 crop year.

[SEAL] FEDERAL CROP INSURANCE CORPORATION.

## § 420.82–9 *Grand Forks County.*

RIDER NO. 1 TO THE MULTIPLE CROP INSURANCE POLICY

(Applicable in Grand Forks, N. Dak. Beginning With the 1953 Crop Year)

1. *Insurable crops.* For the purpose of the multiple crop insurance program the insurable crops are:

(a) Barley planted for harvest as grain.
(b) Flax planted for harvest as seed.
(c) Oats planted for harvest as grain.
(d) Rye (winter only) planted for harvest as grain.
(e) Spring wheat planted for harvest as grain.

2. *Coverage per acre.* The coverage per acre for each insured crop shall be reduced 50 percent for any acreage released by the Corporation and planted to a substitute crop.

3. *Insurance period.* Insurance shall attach at the time of planting to any insured acreage of any insured crop. Insurance shall cease with respect to any portion of all insured crops upon threshing, or with respect to any portion of any crop upon removal from the field, whichever is earlier. However, in no event shall insurance remain in effect (a) with respect to any crop later than the earlier of (i) the end of the normal harvest period for such crop or (ii) October 31, unless such time is extended in writing by the Corporation, and (b) with respect to any insurance unit later than the date of submission of a claim for indemnity.

4. *Protection against loss of quality.* In determining any loss under the contract, production of each insurable crop shall be evaluated at the predetermined price established by the Corporation for that crop and shown on the county actuarial table. However, any production of barley, flax, oats, rye, or wheat which will not meet the latest available requirements for a Commodity Credit Corporation loan or support because of poor quality due to insurable causes, and would not meet these requirements if properly handled, shall be evaluated at a value per bushel determined by the Corporation.

5. *Released crop.* Notwithstanding any other provision of the policy any crop on any insured acreage may be released by the Corporation subject to an appraisal by the Corporation of the yield that would be realized if the crop were harvested.

6. *Amount of loss.* (a) The amount of loss with respect to any insurance unit shall be determined by (1) multiplying the insurable acreage (exclusive of any acreage to which insurance did not attach) planted to each insured crop by the applicable coverage per acre, and the result by the insured interest, and (2) subtracting from the total thereof the insured interest in the value (based on the predetermined price) of the total production on such acreage of all insured crops. However, the amount of loss so determined shall be reduced if the premium computed for the insurance unit on the basis of the acreage and interest approved by the Corporation on the acreage report is less than the premium computed for the planted acreage on the insurance unit. This reduction shall be made on the basis of the ratio of the premium computed for the acreage and interest as approved by the Corporation on the acreage report to the premium computed for the planted acreage. The total production for each insured crop on the insurance unit shall include all production determined in accordance with the production schedule below. Where any small grains are seeded with an insured growing small grain crop on acreage not released by the Corporation, all production shall be counted as the insured small grain on a weight basis. In the case of a volunteer crop produced with an insured crop, the production of such volunteer crop shall be included in determining the production of the insured crop.

The Corporation reserves the right to determine the amount of production on the basis of an appraisal of any unharvested crop standing in the field.

PRODUCTION SCHEDULE

| Crop | Acreage classification | Total production |
|---|---|---|
| 1. Each insured crop... | Acreage released by the Corporation and planted to a substitute crop. | That portion of the appraised production for such acreage which is in excess of the number of bushels determined by (1) subtracting the total coverage for such acreage from what the total coverage for such acreage would be if it were not planted to a substitute crop, and (2) dividing the result thus obtained by the predetermined price for the crop. |
| 2. Each insured crop... | Acreage not planted to a substitute crop. | The appraised production or the actual production |
| 3. Each insured crop... | Acreage put to another use without the consent of the Corporation. | Appraised production for such acreage but not less than the product of (1) such acreage and (2) the bushel equivalent of the coverage per acre on the basis of the predetermined price for the crop. |

[1] Production shall be in bushels for all crops.

PRODUCTION SCHEDULE—Continued

| Crop | Acreage classification | Total production [1] |
|---|---|---|
| 4. Each insured crop... | Acreage with reduced yield due solely to cause(s) not insured against. | Appraised number of bushels by which production for such acreage has been reduced but not less than the product of (1) such acreage and (2) the applicable bushel equivalent of the coverage per acre on the basis of the predetermined price for the crop, minus the number of bushels harvested. |
| 5. Each insured crop... | Acreage with reduced yield due partially to cause(s) not insured against and partially to cause(s) insured against. | Appraised number of bushels by which production for such acreage has been reduced because of cause(s) not insured against. |

[1] Production shall be in bushels for all crops.

(b) If production from two or more insurance units is commingled and the insured fails to establish and maintain separate acreage and production records satisfactory to the Corporation, the Corporation may allocate the commingled production between the units involved in any manner it deems appropriate or void the insurance on the insurance units involved and declare the premium(s) for such units forfeited by the insured. If production from uninsured acreage and insured acreage is commingled and the insured fails to establish and maintain separate acreage and production records satisfactory to the Corporation, all such production which is commingled shall be considered to have been produced on the insured acreage or the Corporation may void the insurance on the insurance unit(s) involved and declare the premium(s) for such unit(s) forfeited by the insured.

7. *Date table.*

Discount date: June 30.
Maturity date: July 31.
Interest date: October 31.
Cancellation date: February 28.

Approved: Beginning with the 1953 crop year.

[SEAL] FEDERAL CROP INSURANCE CORPORATION.

## § 420.85 *Oregon.*

## § 420.85–4 *Deschutes County.*

RIDER NO. 1 TO THE MULTIPLE CROP INSURANCE POLICY

(Applicable in Deschutes County, Oreg., Beginning With the 1953 Crop Year)

1. *Insurable crops.* For the purpose of the multiple crop insurance program the insurable crops are:

(a) Alfalfa hay.
(b) Barley planted for harvest as grain.
(c) Oats planted for harvest as grain.
(d) Potatoes (excluding acreage of less than one acre on an insurance unit) commonly known as Irish potatoes.
(e) Alsike clover planted for harvest as seed. (Insurance on alsike clover to attach only for the first crop year after such acreage is planted.)
(f) Wheat planted for harvest as grain.

2. *Coverage per acre.* The coverage per acre for each insured crop shall be reduced 50 percent for any acreage released by the Corporation and planted to a substitute crop.

3. *Insurance period.* Insurance shall attach at the time of planting to any insured acreage of any insured crop except alfalfa and alsike clover in which case insurance shall attach on December 16 (preceding harvest) provided there is a stand on that date sufficient that farmers in the area generally would leave the crop for harvest the following harvest season. Insurance shall cease with respect to any portion of the alfalfa crop upon baling or stacking, the potato crop upon digging, all other insured crops upon threshing, or with respect to any portion of any crop upon removal from the field, whichever is earlier. However, in no event shall insurance remain in effect (a) with respect to any crop later than the earlier of (i) the end of the normal harvest period for such crop or (ii) December 10, unless such time is extended in writing by the Corporation, and (b) with respect to any insurance unit later than the date of submission of a claim for indemnity.

4. *Protection against loss of quality.* In determining any loss under the contract, production of each insurable crop shall be evaluated at the predetermined price established by the Corporation for that crop and shown on the county actuarial table. However, any production of barley, oats, potatoes or wheat which will not meet the latest available requirements for a Commodity Credit Corporation loan or support because of poor quality due to insurable causes, and would not meet these requirements if properly handled, shall be evaluated at a value per unit determined by the Corporation.

5. *Released crop.* Notwithstanding any other provision of the policy any crop on any insured acreage may be released by the Corporation subject to an appraisal by the Corporation of the yield that would be realized if the crop were harvested.

6. *Amount of loss.* (a) The amount of loss with respect to any insurance unit shall be determined by (1) multiplying the insurable acreage (exclusive of any acreage to which insurance did not attach) planted to each insured crop by the applicable coverage per acre, and the result by the insured interest, and (2) subtracting from the total thereof the insured interest in the value (based on the predetermined price) of the total production on such acreage of all insured crops. However, the amount of loss so determined shall be reduced if the premium computed for the insurance unit on the basis of the acreage and interest approved by the Corporation on the acreage report is less than the premium computed for the planted acreage. The total production for each insured crop on the insurance unit shall include all production determined in accordance with the production schedule below. Where any small grains are seeded with an insured growing small grain crop on acreage not released by the Corporation, all production shall be counted as the insured small grain on a weight basis. In the case of a volunteer crop produced with an insured crop, the production of such volunteer crop shall be included in determining the production of the insured crop.

The Corporation reserves the right to determine the amount of production on the basis of an appraisal of any unharvested crop standing in the field.

PRODUCTION SCHEDULE

| Crop | Acreage classification | Total production [1] |
|---|---|---|
| 1. Each insured crop... | Acreage released by the Corporation and planted to a substitute crop. | That portion of the appraised production for such acreage which is in excess of the number of bushels, pounds or tons determined by (1) subtracting the total coverage for such acreage from what the total coverage for such acreage would be if it were not planted to a substitute crop, and (2) dividing the result thus obtained by the predetermined price for the crop. |
| 2. Each insured crop... | Acreage not planted to a substitute crop. | The appraised production or the actual production. |
| 3. Each insured crop... | Acreage put to another use without the consent of the Corporation. | Appraised production for such acreage but not less than the product of (1) such acreage and (2) the bushel, pound or ton equivalent of the coverage per acre on the basis of the predetermined price for the crop. |
| 4. Each insured crop... | Acreage with reduced yield due solely to cause(s) not insured against. | Appraised number of bushels, pounds or tons by which production for such acreage has been reduced but not less than the product of (1) such acreage and (2) the applicable bushel, pound or ton equivalent of the coverage per acre on the basis of the predetermined price for the crop, minus the number of bushels, pounds or tons harvested. |
| 5. Each insured crop... | Acreage with reduced yield due partially to cause(s) not insured against and partially to cause(s) insured against. | Appraised number of bushels, pounds or tons by which production for such acreage has been reduced because of cause(s) not insured against. |

[1] Production and allowances shall be in bushels for barley, oats and wheat, in pounds for potatoes and alsike clover seed, and in tons (rounded to tenths) for alfalfa.

(b) If production from two or more insurance units is commingled and the insured fails to establish and maintain separate acreage and production records satisfactory to the Corporation, the Corporation may allocate the commingled production between the units involved in any manner it deems appropriate or void the insurance on the insurance units involved and declare the premium(s) for such units forfeited by the insured. If production from uninsured acreage and insured acreage is commingled and the insured fails to establish and maintain separate acreage and production records satisfactory to the Corporation, all such production which is commingled shall be considered to have been produced on the insured acreage or the Corporation may void the insurance on the insurance unit(s) involved and declare the premium(s) for such unit(s) forfeited by the insured.

7. *Irrigated acreage.* (a) In addition to the provisions of section 4 of the policy the following provisions shall apply: (1) The acreage of insured crops which shall be insured in any year shall not exceed that acreage which can be irrigated adequately with the facilities available and with a supply of irrigation water which reasonably could be expected, taking into consideration the amount of water required to irrigate the acreage of all irrigated crops on the farm. (2) Insurance shall not attach with respect to acreage planted to insurable crops (i) the first year after being leveled or (ii) the first year such acreage is irrigated.

(b) In addition to the causes of loss insured against as shown on the first page of the policy, the contract shall cover loss due to failure of the water supply from natural causes that could not be foreseen and prevented by the insured.

(c) In addition to the causes of loss not insured against as shown in section 8 of the policy, the contract shall not cover loss caused by (1) failure properly to apply ir-

rigation water to any insurable crop in accordance with good farming practices, as determined by the Corporation and (2) shortage of irrigation water on any farm where the Corporation determines that the total acreage of all irrigated crops on the farm is in excess of that which could be irrigated properly with the facilities available and with the supply of irrigation water which reasonably could be expected.

8. *Date table.*

Discount date: June 30.
Maturity date: July 31.
Interest date: October 31.
Cancellation date: September 30.

9. *Definitions.* Notwithstanding the provisions of section 24 (d) "crop year" with respect to alfalfa and alsike clover means each 12-month period beginning with the first day of the insurance period and shall be designated by reference to the calendar year in which the crop is normally harvested.

For all purposes under the contract alfalfa and alsike clover for harvest within the crop year shall be considered to have been planted as of the beginning of the insurance period for that crop year.

Approved: Beginning with the 1953 crop year.

[SEAL] FEDERAL CROP INSURANCE CORPORATION.

§ 420.85–5 *Polk County.*

RIDER NO. 1 TO THE MULTIPLE CROP INSURANCE POLICY

(Applicable in Polk County, Oreg., Beginning With the 1953 Crop Year)

1. *Insurable crops.* For the purpose of the multiple crop insurance program the insurable crops are:

(a) Alfalfa hay.
(b) Barley planted for harvest as grain.
(c) Clover hay including any mixture containing a predominance of clover.
(d) Common, Willamette and hairy vetch planted in the fall for harvest as seed.
(e) Vetch hay and mixtures of oats or wheat with vetch and/or Austrian winter peas, planted for hay.
(f) Oats planted for harvest as grain.
(g) Wheat planted for harvest as grain.

* * * * *

2. *Coverage per acre.* The coverage per acre for each insured crop shall be reduced 50 percent for any acreage released by the Corporation and planted to a substitute crop.

3. *Insurance period.* Insurance shall attach at the time of planting to any insured acreage of any insured crop except alfalfa and clover hay in which cases insurance shall attach on November 1 (preceding harvest) provided there is a stand at that time sufficient that farmers in the area generally would leave the applicable crop for harvest the following harvest season. Insurance shall cease with respect to any portion of the hay crops upon baling or stacking, and all other insured crops upon threshing, or with respect to any portion of any crop upon removal from the field, whichever is earlier. However, in no event shall insurance remain in effect (a) with respect to any crop later than the earlier of (i) the end of the normal harvest period for such crop or (ii) December 10, unless such time is extended in writing by the Corporation, and (b) with respect to any insurance unit later than the date of submission of a claim for indemnity.

4. *Protection against loss of quality.* In determining any loss under the contract, production of each insurable crop shall be evaluated at the predetermined price established by the Corporation for that crop and shown on the county actuarial table. However, any production of barley, oats, vetch or wheat which will not meet the latest available requirements for a Commodity Credit Corporation loan or support because of poor quality due to insurable causes, and would not meet these requirements if properly handled, shall be evaluated at a value per unit determined by the Corporation.

5. *Released crop.* Notwithstanding any other provision of the policy any crop on any insured acreage may be released by the Corporation subject to an appraisal by the Corporation of the yield that would be realized if the crop were harvested.

6. *Amount of loss.* (a) The amount of loss with respect to any insurance unit shall be determined by (1) multiplying the insurable acreage (exclusive of any acreage to which insurance did not attach) planted to each insured crop by the applicable coverage per acre and the result by the insured interest, and (2) subtracting from the total thereof the insured interest in the value (based on the predetermined price) of the total production on such acreage of all insured crops. However, the amount of loss so determined shall be reduced if the premium computed for the insurance unit on the basis of the acreage and interest approved by the Corporation on the acreage report is less than the premium computed for the planted acreage on the insurance unit. This reduction shall be made on the basis of the ratio of the premium computed for the acreage and interest as approved by the Corporation on the acreage report to the premium computed for the planted acreage. The total production for each insured crop on the insurance unit shall include all production determined in accordance with the production schedule below. Where vetch for seed is planted with an insured small grain crop, the production of each commodity shall be determined and counted separately. Where any small grain is planted with an insured growing small grain crop on acreage not released by the Corporation, all production shall be counted as the insured small grain on a weight basis. In the case of a volunteer crop produced with an insured crop, the production of such volunteer crop shall be included in determining the production of the insured crop.

The Corporation reserves the right to determine the amount of production on the basis of an appraisal of any unharvested crop standing in the field.

PRODUCTION SCHEDULE

| Crop | Acreage classification | Total production [1] |
|---|---|---|
| 1. Each insured crop... | Acreage released by the Corporation and planted to a substitute crop. | That portion of the appraised production for such acreage which is in excess of the number of bushels, pounds or tons determined by (1) subtracting the total coverage for such acreage from what the total coverage for such acreage would be if it were planted to a substitute crop, and (2) dividing the result thus obtained by the predetermined price for the crop. |
| 2. Each insured crop... | Acreage not planted to a substitute crop. | The appraised production or the actual production. |
| 3. Each insured crop... | Acreage put to another use without the consent of the Corporation. | Appraised production for such acreage but not less than the product of (1) such acreage and (2) the bushel, pound or ton equivalent of the coverage per acre on the basis of the predetermined price for the crop. |
| 4. Each insured crop... | Acreage with reduced yield due solely to cause(s) not insured against. | Appraised number of bushels, pounds or tons by which production for such acreage has been reduced but not less than the product of (1) such acreage and (2) the applicable bushel, pound or ton equivalent of the coverage per acre on the basis of the predetermined price for the crop, minus the number of bushels, pounds or tons harvested. |
| 5. Each insured crop... | Acreage with reduced yield due partially to cause(s) not insured against and partially to cause(s) insured against. | Appraised number of bushels, pounds or tons by which production for such acreage has been reduced because of cause(s) not insured against. |

[1] Production shall be in bushels for barley, oats and wheat, in pounds for vetch, and tons (rounded to tenths) for hay.

(b) If production from two or more insurance units is commingled and the insured fails to establish and maintain separate acreage and production records satisfactory to the Corporation, the Corporation may allocate the commingled production between the units involved in any manner it deems appropriate or void the insurance on the insurance units involved and declare the premium(s) for such units forfeited by the insured. If production from uninsured acreage and insured acreage is commingled and the insured fails to establish and maintain separate acreage and production records satisfactory to the Corporation, all such production which is commingled shall be considered to have been produced on the insured acreage or the Corporation may void the insurance on the insurance unit(a) involved and declare the premium(s) for such unit(s) forfeited by the insured.

7. *Date table.*

Discount date: June 30.
Maturity date: July 31.
Interest date: October 31.
Cancellation date: September 30.

8. *Definitions.* Notwithstanding the provisions of section 24 (d) "crop year" with respect to alfalfa hay and clover hay means the period beginning with the first day of the insurance period and ending upon harvest and shall be designated by reference to the calendar year in which the crop is normally harvested. For all purposes under the contract, alfalfa hay and clover hay for harvest within the crop year shall be considered to have been planted as of the beginning of the insurance period for that crop year.

Approved: Beginning with the 1953 crop year.

[SEAL] FEDERAL CROP INSURANCE CORPORATION.

§ 420.89 *South Dakota.*

§ 420.89–9 *Hanson County.*

RIDER NO. 1 TO THE MULTIPLE CROP INSURANCE POLICY

(Applicable in Hanson County, S. Dak., Beginning With the 1953 Crop Year)

1. *Insurable crops.* For the purpose of the multiple crop insurance program the insurable crops are:

(a) Barley planted for harvest as grain.
(b) Corn normally regarded as field corn. The contract will not provide insurance for true type silage corn, corn planted thick for silage or fodder purposes, sweet corn, popcorn, broom corn, corn planted for the development of hybrid seed corn, or any type of corn other than that normally regarded as field corn.
(c) Flax planted for harvest as seed.
(d) Oats planted for harvest as grain.
(e) Rye (winter only) planted for harvest as grain.
(f) Soybeans planted for harvest as beans.
(g) Spring wheat planted for harvest as grain.

2. *Coverage per acre.* The coverage per acre for each insured crop shall be reduced 50 percent for any acreage released by the Corporation and planted to a substitute crop.

3. *Insurance period.* Insurance shall attach at the time of planting to any insured acreage of any insured crop. Insurance shall cease with respect to any portion of the corn crop upon harvesting (picking the corn from the stalk either by hand or machine or cutting the corn for fodder or ensilage), all other insured crops upon threshing, or with respect to any portion of any crop upon removal from the field, whichever is earlier. However, in no event shall insurance remain in effect (a) with respect to any crop later than the earlier of (i) the end of the normal harvest period for such crop or (ii) December 10, unless such time is extended in writing by the Corporation, and (b) with respect to any insurance unit later than the date of submission of a claim for indemnity.

4. *Protection against loss of quality.* In determining any loss under the contract, production of each insurable crop shall be evaluated at the predetermined price established by the Corporation for that crop and shown on the county actuarial table. However, any production of barley, corn, flax, oats, rye, soybeans or wheat which will not meet the latest available requirements for a Commodity Credit Corporation loan or support because of poor quality due to insurable causes, and would not meet these requirements if properly handled, shall be evaluated at a value per bushel determined by the Corporation.

5. *Released crop.* Notwithstanding any other provision of the policy any crop on any insured acreage may be released by the Corporation subject to an appraisal by the Corporation of the yield that would be realized if the crop were harvested, except that any corn may be used for ensilage or fodder without a release by the Corporation if the insured leaves a number of rows considered by the Corporation to be an adequate representative sample for appraising the yield.

6. *Amount of loss.* (a) The amount of loss with respect to any insurance unit shall be determined by (1) multiplying the insurable acreage (exclusive of any acreage to which insurance did not attach) planted to each insured crop by the applicable coverage per acre, and the result by the insured interest and (2) subtracting from the total thereof the insured interest in the value (based on the predetermined price) of the total production on such acreage of all insured crops. However, the amount of loss so determined shall be reduced if the premium computed for the insurance unit on the basis of the acreage and interest approved by the Corporation on the acreage report, is less than the premium computed for the planted acreage on the insurance unit. This reduction shall be made on the basis of the ratio of the premium computed for the acreage and interest as approved by the Corporation on the acreage report to the premium computed for the planted acreage. The total production for each insured crop on the insurance unit shall include all production determined in accordance with the production schedule below. Where any small grains are seeded with an insured growing small grain crop on acreage not released by the Corporation, all production shall be counted as the insured small grain on a weight basis. In the case of a volunteer crop produced with an insured crop, the production of such volunteer crop shall be included in determining the production of the insured crop.

The Corporation reserves the right to determine the amount of production on the basis of an appraisal of any unharvested crop standing in the field.

PRODUCTION SCHEDULE

| Crop | Acreage classification | Total production [1] |
|---|---|---|
| 1. Each insured crop... | Acreage released by the Corporation and planted to a substitute crop. | That portion of the appraised production for such acreage which is in excess of the number of bushels determined by (1) subtracting the total coverage for such acreage from what the total coverage for such acreage would be if it were not planted to a substitute crop, and (2) dividing the result thus obtained by the predetermined price for the crop. |
| 2. Each insured crop... | Acreage not planted to a substitute crop. | The appraised production or the actual production, including an appraisal of corn left in the field after harvest and an appraisal of corn used for ensilage or fodder. |
| 3. Each insured crop... | Acreage put to another use without the consent of the Corporation. | Appraised production for such acreage but not less than the product of (1) such acreage and (2) the bushel equivalent of the coverage per acre on the basis of the predetermined price for the crop. |
| 4. Each insured crop... | Acreage with reduced yield due solely to cause(s) not insured against. | Appraised number of bushels by which production for such acreage has been reduced but not less than the product of (1 such acreage and (2) the applicable bushel equivalent of the coverage per acre on the basis of the predetermined price for the crop, minus the number of bushels harvested |
| 5. Each insured crop... | Acreage with reduced yield due partially to cause(s) not insured against and partially to cause(s) insured against. | Appraised number of bushels by which production for such acreage has been reduced because of cause(s) not insured against. |

[1] Production shall be in bushels for all crops.

(b) If production from two or more insurance units is commingled and the insured fails to establish and maintain separate acreage and production records satisfactory to the Corporation, the Corporation may allocate the commingled production between the units involved in any manner it deems appropriate or void the insurance on the insurance units involved and declare the premium(s) for such units forfeited by the insured. If production from uninsured acreage and insured acreage is commingled and the insured fails to establish and maintain separate acreage and production records satisfactory to the Corporation, all such production which is commingled shall be considered to have been produced on the insured acreage or the Corporation may void the insurance on the insurance unit(s) involved and declare the premium(s) for such unit(s) forfeited by the insured.

7. *Date table.*

Discount date: June 30.
Maturity date: July 31.
Interest date: October 31.
Cancellation date: February 28.

Approved: Beginning with the 1953 crop year.

[SEAL] FEDERAL CROP INSURANCE CORPORATION.

§ 420.89–10 *Kingsbury County.*

RIDER NO. 1 TO THE MULTIPLE CROP INSURANCE POLICY

(Applicable in Kingsbury County, S. Dak., Beginning With the 1953 Crop Year)

1. *Insurable crops.* For the purpose of the multiple crop insurance program the insurable crops are:

(a) Barley planted for harvest as grain.
(b) Corn normally regarded as field corn. The contract will not provide insurance for true type silage corn, corn planted thick for silage or fodder purposes, sweet corn, popcorn, broom corn, corn planted for the development of hybrid seed corn, or any type of corn other than that normally regarded as field corn.
(c) Flax planted for harvest as seed.
(d) Oats planted for harvest as grain.
(e) Rye (winter only) planted for harvest as grain.
(f) Soybeans planted for harvest as beans.
(g) Spring wheat planted for harvest as grain.

2. *Coverage per acre.* The coverage per acre for each insured crop shall be reduced 50 percent for any acreage released by the Corporation and planted to a substitute crop.

3. *Insurance period.* Insurance shall attach at the time of planting to any insured acreage of any insured crop. Insurance shall cease with respect to any portion of the corn crop upon harvesting (picking the corn from the stalk either by hand or machine or cutting the corn for fodder or ensilage), all other insured crops upon threshing, or with respect to any portion of any crop upon removal from the field, whichever is earlier. However, in no event shall insurance remain in effect (a) with respect to any crop later than the earlier of (i) the end of the normal harvest period for such crop or (ii) December 10, unless such time is extended in writing by the Corporation, and (b) with respect to any insurance unit later than the date of submission of a claim for indemnity.

4. *Protection against loss of quality.* In determining any loss under the contract, production of each insurable crop shall be evaluated at the predetermined price established by the Corporation for that crop and shown on the county actuarial table. However, any production of barley, corn, flax, oats, rye, soybeans or wheat which will not meet the latest available requirements for a Commodity Credit Corporation loan or support because of poor quality due to insurable causes, and would not meet these requirements if properly handled, shall be evaluated at a value per bushel determined by the Corporation.

5. *Released crop.* Notwithstanding any other provision of the policy any crop on any insured acreage may be released by the Corporation subject to an appraisal by the Corporation of the yield that would be realized if the crop were harvested, except that any corn may be used for ensilage or fodder without a release by the Corporation if the insured leaves a number of rows considered by the Corporation to be an adequate representative sample for appraising the yield.

6. *Amount of loss.* (a) The amount of loss with respect to any insurance unit shall be determined by (1) multiplying the insurable acreage (exclusive of any acreage to which insurance did not attach) planted to each insured crop by the applicable coverage per acre, and the result by the insured interest and (2) subtracting from the total thereof the insured interest in the value (based on the predetermined price) of the total production on such acreage of all insured crops. However, the amount of loss so determined shall be reduced if the premium computed for the insurance unit on the basis of the acreage and interest approved by the Corporation on the acreage report, is less than the premium computed for the planted acreage on the insurance unit. This reduction shall be made on the basis of the ratio of the premium computed for the acreage and interest as approved by the Corporation on the acreage report to the

(b) The coverage per acre for cotton shall be reduced as follows: (1) 60 percent for any acreage which is released by the Corporation because of poor quality due to insurable causes, and would not meet these requirements if properly handled, shall be evaluated at a value per bushel determined by the Corporation.

5. *Released crop.* Notwithstanding any other provision of the policy any crop on any insured acreage may be released by the Corporation subject to an appraisal by the Corporation of the yield that would be realized if the crop were harvested, except that any corn may be used for ensilage or fodder without a release by the Corporation if the insured leaves a number of rows considered by the Corporation to be an adequate representative sample for appraising the yield.

6. *Amount of loss.* (a) The amount of loss with respect to any insurance unit shall be determined by (1) multiplying the insurable acreage (exclusive of any acreage to which insurance did not attach) planted to each insured crop by the applicable coverage per acre, and the result by the insured interest, and (2) subtracting from the total thereof the insured interest in the value (based on the predetermined price) of the total production on such acreage of all insured crops. However, the amount of loss so determined shall be reduced if the premium computed for the insurance unit on the basis of the acreage and interest approved by the Corporation on the acreage report is less than the premium computed for the planted acreage on the insurance unit. This reduction shall be made on the basis of the ratio of the premium computed for the acreage and interest as approved by the Corporation on the acreage report to the premium computed for the planted acreage. The total production for each insured crop on the insurance unit shall include all production determined in accordance with the production schedule below.

The Corporation reserves the right to determine the amount of production on the basis of an appraisal of any unharvested crop standing in the field.

PRODUCTION SCHEDULE

| Crop | Acreage classification | Total production [1] |
|---|---|---|
| 1. Each insured crop except cotton. | Acreage released by the Corporation and planted to a substitute crop. | That portion of the appraised production for such acreage which is in excess of the number of bushels or pounds determined by (1) subtracting the total coverage for such acreage from what the total coverage for such acreage would be if it were not planted to a substitute crop, and (2) dividing the result thus obtained by the predetermined price. |
| 2. Each insured crop except cotton. | Acreage not planted to a substitute crop. | The appraised production or the actual production, including an appraisal of corn left in the field after harvest and an appraisal of corn used for ensilage or fodder. |
| 3. Cotton | Acreage released by the Corporation and planted to a substitute crop because of failure to establish a stand prior to laying by the crop. | That portion of the appraised production for such acreage which is in excess of the number of pounds determined by (1) subtracting the total coverage for such acreage from what the total coverage for such acreage would be if it were harvested and (2) dividing the result thus obtained by the predetermined price. |

[1] Production shall be in bushels for corn and sweetpotatoes, and pounds for cotton and tobacco.

Notwithstanding the other provisions of this paragraph (a) regarding the determination of the total production of cotton, in any case where the quality of any cotton production is reduced solely by insured causes to the extent that the value per pound, as determined by the Corporation, is less than 75 percent of the predetermined price, the number of pounds of such poor quality cotton shall be adjusted downward to the number of pounds obtained by dividing the total value of such cotton, as determined by the Corporation, by 75 percent of the predetermined price.

(b) If production from two or more insurance units is commingled and the insured fails to establish and maintain separate acreage and production records satisfactory to the Corporation, the Corporation may allocate the commingled production between the units involved in any manner it deems appropriate or void the insurance on the insurance units involved and declare the premium(s) for such units forfeited by the insured. If production from uninsured acreage and insured acreage is commingled and the insured fails to establish and maintain separate acreage and production records satisfactory to the Corporation, all such production which is commingled shall be considered to have been produced on the insured acreage or the Corporation may void the insurance on the insurance unit(s) involved and declare the premium(s) for such unit(s) forfeited by the insured.

7. *Date table.*

Discount date: June 30.
Maturity date: July 31.
Interest date: October 31.
Cancellation date: February 28.

8. *Definitions.* "Harvest" with respect to any acreage of cotton means the removal (by manual or mechanical means) of an amount of cotton from the stalk which is equal in value (based on the predetermined price) to 10 percent or more of the coverage for such acreage.

9. *Reduction of premium based on good experience.* The insured's annual premium for any year may be reduced 25 percent if he has had seven consecutive years of insured crop(s) under a Federal Crop Insurance contract without a loss for which an indemnity was paid. Credit for consecutive years of good experience under any other existing Federal Crop Insurance contract will not be transferred to the multiple crop contract if the insured is eligible to receive a premium discount based on consecutive years of good experience or based on an accumulated balance of premiums over indemnities under such existing contract. Nothing in this paragraph shall create in the insured any right to a reduced premium.

Approved: Beginning with the 1953 crop year.

[SEAL] FEDERAL CROP INSURANCE CORPORATION.

§ 420.90–2 *Lincoln County.*

RIDER NO. 1 TO THE MULTIPLE CROP INSURANCE POLICY

(Applicable in Lincoln County, Tenn., Beginning With the 1953 Crop Year)

1. *Insurable crops.* For the purpose of the multiple crop insurance program the insurable crops are:

(a) Alfalfa hay.

(b) Lespedeza (annual only) for hay, including volunteer annual lespedeza.

(c) Corn normally regarded as field corn, including corn with which soybeans are interplanted. The contract will not provide insurance for true type silage corn, corn planted thick for silage or fodder purposes, sweet corn, popcorn, broom corn, corn planted for the development of hybrid seed corn, or any type of corn other than that normally regarded as field corn.

(d) Cotton, restricted to American upland cotton and not including cotton planted primarily for experimental purposes.

(e) Tobacco, type 31.

2. *Coverage per acre.* (a) The coverage per acre for each insured crop, except cotton, shall be reduced 50 percent for any acreage released by the Corporation and planted to a substitute crop.

(b) The coverage per acre for cotton shall be reduced as follows: (1) 60 percent for any acreage which is released by the Corporation because of damage occurring prior to laying by the crop, and (2) 25 percent for any acreage on which the crop is laid by and not harvested.

3. *Insurance period.* Insurance shall attach at the time of planting to any insured acreage of any insured crop except alfalfa in which case insurance shall attach on November 1 (preceding harvest), and volunteer annual lespedeza in which case insurance shall attach on May 1 (preceding harvest), provided in either case there is a stand on the applicable date sufficient that farmers in the area generally would leave the crop for harvest the following harvest season. Insurance shall cease with respect to (a) any portion of the tobacco crop upon weighing-in at the tobacco warehouse, transfer of interest in the tobacco after harvest, removal of the tobacco from the insurance unit (except for curing, packing or immediate delivery to the tobacco warehouse), or weighing of the tobacco for casing, (b) any portion of the corn crop upon harvesting (picking the corn from the stalk either by hand or machine or cutting the corn for fodder or ensilage), the cotton crop upon picking, the hay crop upon baling or stacking, or with respect to any portion of any crop (except tobacco) upon removal from the field, whichever is earlier. However, in no event shall insurance remain in effect (a) with respect to tobacco later than February 28 following harvest unless such time is extended in writing by the Corporation, (b) with respect to any other crop later than the earlier of (i) the end of the normal harvest period for such crop or (ii) December 10, unless such time is extended in writing by the Corporation, and (c) with respect to any insurance unit later than the date of submission of a claim for indemnity.

4. *Predetermined price for valuing production.* In determining any loss under the contract, production of each insurable crop shall be evaluated at the predetermined price established by the Corporation for that crop and shown on the county actuarial table. The predetermined prices for the 1953 crop year are on file in the county office and for any subsequent crop year shall be on file in the county office at least 15 days prior to the cancellation date. However, any production of corn which will not meet the latest available requirements for a Commodity Credit Corporation loan or support because of poor quality due to insurable causes, and would not meet these requirements if properly handled, shall be evaluated at a value per bushel determined by the Corporation.

5. *Released crop.* Notwithstanding any other provision of the policy any crop on any insured acreage may be released by the Corporation subject to an appraisal by the Corporation of the yield that would be realized if the crop were harvested, except that any corn may be used for ensilage or fodder without a release by the Corporation if the insured leaves a number of rows considered by the Corporation to be an adequate representative sample for appraising the yield.

6. *Amount of loss.* (a) The amount of loss with respect to any insurance unit shall be determined by (1) multiplying the insurable acreage (exclusive of any acreage to which insurance did not attach) planted to each insured crop by the applicable coverage per acre, and the result by the insured interest, and (2) subtracting from the total thereof the insured interest in the value (based on the predetermined price) of the total production on such acreage of all insured crops. However, the amount of loss so determined shall be reduced if the premium computed for the insurance unit on the basis of the acreage and interest approved by the Corporation on the acreage report is less than the premium computed for the planted acreage on the insurance unit. This reduction shall be made on the basis of the ratio of the premium computed for the acreage and interest as approved by the Corporation on the acreage report to the premium computed for the planted acreage. The total production for each insured crop on the insurance unit shall include all production determined in accordance with the production schedule below.

The Corporation reserves the right to determine the amount of production on the basis of an appraisal of any unharvested crop standing in the field.

PRODUCTION SCHEDULE

| Crop | Acreage classification | Total production [1] |
|---|---|---|
| 1. Each insured crop | Acreage released by the Corporation and planted to a substitute crop. | That portion of the appraised production for such acreage which is in excess of the number of bushels or pounds determined by (1) subtracting the total coverage for such acreage from what the total coverage for such acreage would be if it were not planted to a substitute crop, and (2) dividing the result thus obtained by the predetermined price. |
| 2. Each insured crop | Acreage not planted to a substitute crop. | The appraised production or the actual production, including an appraisal of corn left in the field after harvest and an appraisal of corn used for ensilage or fodder. |
| 3. Cotton | Acreage released by the Corporation and planted to a substitute crop because of failure to establish a stand prior to laying by the crop. | That portion of the appraised production for such acreage which is in excess of the number of pounds determined by (1) subtracting the total coverage for such acreage from what the total coverage for such acreage would be if it were harvested and (2) dividing the result thus obtained by the predetermined price. |
| 4. Each insured crop | Acreage with reduced yield due solely to cause(s) not insured against. | Appraised number of bushels or pounds by which production for such acreage has been reduced but not less than the product of (1) such acreage and (2) the bushel or pound equivalent of the coverage per acre on the basis of the predetermined price for the crop, minus the number of bushels or pounds harvested. |
| 5. Each insured crop | Acreage with reduced yield due partially to cause(s) not insured against and partially to cause(s) insured against. | Appraised number of bushels or pounds by which production for such acreage has been reduced because of cause(s) not insured against. |
| 6. Cotton | Acreage on which the crop is laid by and not harvested. | That portion of the appraised production for such acreage which is in excess of the number of pounds determined by (1) subtracting the total coverage for such acreage from what the total coverage for such acreage would be if it were harvested and (2) dividing the result thus obtained by the predetermined price. |
| 7. Cotton | Acreage harvested | Production, including an appraisal of production left in the field after harvest. |
| 8. Each insured crop | Acreage put to another use without the consent of the Corporation. | Appraised production for such acreage but not less than the product of (1) such acreage and (2) the bushel or pound equivalent of the coverage per acre on the basis of the predetermined price for the crop. |
| 9. Each insured crop | Acreage with reduced yield due solely to cause(s) not insured against. | Appraised number of bushels or pounds by which production for such acreage has been reduced but not less than the product of (1) such acreage and (2) the applicable bushel or pound equivalent of the coverage per acre on the basis of the predetermined price for the crop, minus the number of bushels or pounds harvested. |
| 10. Each insured crop | Acreage with reduced yield due partially to cause(s) not insured against and partially to cause(s) insured against. | Appraised number of bushels or pounds by which production for such acreage has been reduced because of cause(s) not insured against. |

[1] Production shall be in bushels for corn and sweetpotatoes, and pounds for cotton and tobacco.

PRODUCTION SCHEDULE

| Crop | Acreage classification | Total production [1] |
|---|---|---|
| 1. Each insured crop except cotton. | Acreage released by the Corporation and planted to a substitute crop. | That portion of the appraised production for such acreage which is in excess of the number of bushels, pounds, or tons determined by (1) subtracting the total coverage for such acreage from what the total coverage for such acreage would be if it were not planted to a substitute crop, and (2) dividing the result thus obtained by the predetermined price for the crop. |
| 2. Each insured crop except cotton. | Acreage not planted to a substitute crop. | The appraised production or the actual production, including an appraisal of corn left in the field after harvest and an appraisal of corn used for ensilage or fodder. |
| 3. Cotton | Acreage released by the Corporation because of damage occurring prior to laying by the crop. | That portion of the appraised production for such acreage which is in excess of the number of pounds determined by (1) subtracting the total coverage for such acreage from what the total coverage for such acreage would be if it were harvested and (2) dividing the result thus obtained by the predetermined price. |
| 4. Cotton | Acreage on which the crop is laid by and not harvested. | That portion of the appraised production for such acreage which is in excess of the number of pounds determined by (1) subtracting the total coverage for such acreage from what the total coverage for such acreage would be if it were harvested and (2) dividing the result thus obtained by the predetermined price. |
| 5. Cotton | Acreage harvested | Production, including an appraisal of production left in the field after harvest. |
| 6. Each insured crop | Acreage put to another use without the consent of the Corporation. | Appraised production for such acreage but not less than the product of (1) such acreage and (2) the bushel, pound, or ton equivalent of the coverage per acre on the basis of the predetermined price for the crop. |
| 7. Each insured crop | Acreage with reduced yield due solely to cause(s) not insured against. | Appraised number of bushels, pounds, or tons by which production for such acreage has been reduced but not less than the product of (1) such acreage and (2) the applicable bushel, pound, or ton equivalent of the coverage per acre, on the basis of the predetermined price for the crop, minus the number of bushels, pounds, or tons harvested. |
| 8. Each insured crop | Acreage with reduced yield due partially to cause(s) not insured against and partially to cause(s) insured against. | Appraised number of bushels, pounds, or tons by which production for such acreage has been reduced because of cause(s) not insured against. |

[1] Production shall be in bushels for corn, pounds for cotton and tobacco, and in tons (rounded to tenths) for hay.

Notwithstanding the other provisions of this paragraph (a) regarding the determination of the total production of cotton, in any case where the quality of any cotton production is reduced solely by insured causes to the extent that the value per pound, as determined by the Corpocation, is less than 75 percent of the predetermined price, the number of pounds of such poor quality cotton shall be adjusted downward to the number of pounds obtained by dividing the total value of such cotton, as determined by the Corporation, by 75 percent of the predetermined price.

(b) If production from two or more insurance units is commingled and the insured fails to establish and maintain separate acreage and production records satisfactory to the Corporation, the Corporation may allocate the commingled production between the units involved in any manner it deems appropriate or void the insurance on the insurance units involved and declare the premium(s) for such units forfeited by the insured. If production from uninsured acreage and insured acreage is commingled and the insured fails to establish and maintain separate acreage and production records satisfactory to the Corporation, all such production which is commingled shall be considered to have been produced on the insured acreage or the Corporation may void the insurance on the insurance unit(s) involved and declare the premium(s) for such unit(s) forfeited by the insured.

7. *Date table.*

Discount date: June 30.
Maturity date: July 31.
Interest date: October 31.
Cancellation date: February 28.

8. *Definitions.* (a) For all purposes under the contract alfalfa and volunteer lespedeza hay for harvest within the crop year shall be considered to have been planted as of the beginning of the insurance period for that crop year.

(b) "Harvest" with respect to any acreage of cotton means the removal (by manual or mechanical means) of an amount of cotton from the stalk which is equal in value (based on the predetermined price) to 10 percent or more of the coverage for such acreage.

9. *Reduction of premium based on good experience.* The insured's annual premium for any year may be reduced 25 percent if he has had seven consecutive years of insured crop(s) under a Federal Crop Insurance contract without a loss for which an indemnity was paid. Credit for consecutive years of good experience under any other existing Federal Crop Insurance contract will not be transferred to the multiple crop contract if the insured is eligible to receive a premium discount based on consecutive years of good experience or based on an accumulated balance of premiums over indemnities under such existing contract. Nothing in this paragraph shall create in the insured any right to a reduced premium.

Approved: Beginning with the 1953 crop year.

[SEAL] FEDERAL CROP INSURANCE CORPORATION.

## § 420.90–4 *Dyer County.*

RIDER NO. 1 TO THE MULTIPLE CROP INSURANCE POLICY

(Applicable in Dyer County, Tenn., Beginning With the 1953 Crop Year)

1. *Insurable crops.* For the purpose of the multiple crop insurance program the insurable crops are:

(a) Corn normally regarded as field corn, including corn with which soybeans are interplanted. The contract will not provide insurance for true type silage corn, corn planted thick for silage or fodder purposes, sweet corn, popcorn, broom corn, corn planted for the development of hybrid seed corn, or any type of corn other than that normally regarded as field corn.

(b) Cotton, restricted to American upland cotton and not including cotton planted primarily for experimental purposes.

(c) Soybeans planted for harvest as beans excluding soybeans interplanted in the same row with corn.

2. *Coverage per acre.* (a) The coverage per acre for each insured crop, except cotton, shall be reduced 50 percent for any acreage released by the Corporation and planted to a substitute crop.

(b) The coverage per acre for cotton shall be reduced as follows: (1) 60 percent for any acreage which is released by the Corporation because of damage occurring prior to laying by the crop, and (2) 25 percent for any acreage on which the crop is laid by and not harvested.

3. *Insurance period.* Insurance shall attach at the time of planting to any insured acreage of any insured crop. Insurance shall cease with respect to any portion of the corn crop upon harvesting (picking the corn from the stalk either by hand or machine or cutting the corn for fodder or ensilage), the cotton crop upon picking, all other insured crops upon threshing, or with respect to any portion of any insured crop upon removal from the field, whichever is earlier. However in no event shall insurance remain in effect (a) with respect to any crop later than the earlier of (i) the end of the normal harvest period for such crop or (ii) December 31, unless such time is extended in writing by the Corporation, and (b) with respect to any insurance unit later than the date of submission of a claim for indemnity.

4. *Protection against loss of quality.* In determining any loss under the contract, production of each insurable crop shall be evaluated at the predetermined price established by the Corporation for that crop and shown on the county actuarial table. However, any production of corn or soybeans which will not meet the latest available requirements for a Commodity Credit Corporation loan or support because of poor quality due to insurable causes, and would not meet these requirements if properly handled, shall be evaluated at a value per unit determined by the Corporation.

5. *Released crop.* Notwithstanding any other provision of the policy any crop on any insured acreage may be released by the Corporation subject to an appraisal by the Corporation of the yield that would be realized if the crop were harvested, except that any corn may be used for ensilage or fodder without a release by the Corporation if the insured leaves a number of rows considered by the Corporation to be an adequate representative sample for appraising the yield.

6. *Amount of loss.* (a) The amount of loss with respect to any insurance unit shall be determined by (1) multiplying the insurable acreage (exclusive of any acreage to which insurance did not attach) planted to each insured crop by the applicable coverage per acre, and the result by the insured interest, and (2) subtracting from the total thereof the insured interest in the value (based on the predetermined price) of the total production on such acreage of all insured crops. However, the amount of loss so determined shall be reduced if the premium computed for the insurance unit on the basis of the acreage and interest approved by the Corporation on the acreage report is less than the premium computed for the planted acreage on the insurance unit. This reduction shall be made on the basis of the ratio of the premium computed for the acreage and interest as approved by the Corporation on the acreage report to the premium computed for the planted acreage. The total production for each insured crop on the insurance unit shall include all production determined in accordance with the production schedule below. Any production of soybeans interplanted in the same row with corn shall not be counted as production.

The Corporation reserves the right to determine the amount of production on the basis of an appraisal of any unharvested crop standing in the field.

PRODUCTION SCHEDULE

| Crop | Acreage classification | Total production [1] |
|---|---|---|
| 1. Each insured crop except cotton. | Acreagere leased by the Corporation and planted to a substitute crop. | That portion of the appraised production for such acreage which is in excess of the number of bushels determined by (1) subtracting the total coverage for such acreage from what the total coverage for such acreage would be if it were not planted to a substitute crop, and (2) dividing the result thus obtained by the predetermined price for the crop. |
| 2. Each insured crop except cotton. | Acreage not planted to a substitute crop. | The appraised production or the actual production, including an appraisal of corn left in the field after harvest and an appraisal of corn used for ensilage or fodder. |
| 3. Cotton | Acreage released by the Corporation because of damage occurring prior to laying by the crop. | That portion of the appraised production for such acreage which is in excess of the number of pounds determined by (1) subtracting the total coverage for such acreage from what the total coverage for such acreage would be if it were harvested and (2) dividing the result thus obtained by the predetermined price. |
| 4. Cotton | Acreage on which the crop is laid by and not harvested. | That portion of the appraised production for such acreage which is in excess of the number of pounds determined by (1) subtracting the total coverage for such acreage from what the total coverage for such acreage would be if it were harvested and (2) dividing the result thus obtained by the predetermined price. |
| 5. Cotton | Acreage harvested | Production, including an appraisal of production left in the field after harvest. |
| 6. Each insured crop | Acreage put to another use with the consent of the Corporation. | Appraised production for such acreage but not less than the product of (1) such acreage and (2) the bushel or pound equivalent of the coverage per acre on the basis of the predetermined price for the crop. |
| 7. Each insured crop | Acreage with reduced yield due solely to cause(s) not insured against. | Appraised number of bushels or pounds by which production for such acreage has been reduced but not less than the product of (1) such acreage and (2) the applicable bushel or pound equivalent of the coverage per acre, on the basis of the predetermined price for the crop, minus the number of bushels or pounds harvested. |
| 8. Each insured crop | Acreage with reduced yield due partially to cause(s) not insured against and partially to cause(s) insured against. | Appraised number of bushels or pounds by which production for such acreage has been reduced because of cause(s) not insured against. |

[1] Production shall be in bushels for corn and soybeans and in pounds for cotton.

Notwithstanding the other provisions of this paragraph (a) regarding the determination of the total production of cotton, in any case where the quality of any cotton production is reduced solely by insured causes to the extent that the value per pound, as determined by the Corporation, is less than 75 percent of the predetermined price, the number of pounds of such poor quality cotton shall be adjusted downward to the number of pounds obtained by dividing the total value of such cotton, as determined by the Corporation, by 75 percent of the predetermined price.

(b) If production from two or more insurance units is commingled and the insured fails to establish and maintain separate acreage and production records satisfactory to the Corporation, the Corporation may allocate the commingled production between the units involved in any manner it deems appropriate or void the insurance on the insurance units involved and declare the premium(s) for such units forfeited by the insured. If production for uninsured acreage and insured acreage is commingled and the insured fails to establish and maintain separate acreage and production records satisfactory to the Corporation, all such production which is commingled shall be considered to have been produced on the insured acreage or the Corporation may void the insurance on the insurance unit(s) involved and declare the premium(s) for such unit(s) forfeited by the insured.

7. *Date table.*

Discount date: June 30.
Maturity date: July 31.
Interest date: October 31.
Cancellation date: February 28.

8. *Definitions.* "Harvest" with respect to any acreage of cotton means the removal (by manual or mechanical means) of an amount of cotton from the stalk which is equal in value (based on the predetermined price) to 10 percent or more of the coverage for such acreage.

Approved: Beginning with the 1953 crop year.

[SEAL] FEDERAL CROP INSURANCE CORPORATION.

## § 420.90–5 *Obion County.*

RIDER NO. 1 TO THE MULTIPLE CROP INSURANCE POLICY

(Applicable in Obion County, Tenn., Beginning With the 1953 Crop Year)

1. *Insurable crops.* For the purpose of the multiple crop insurance program the insurable crops are:

(a) Corn normally regarded as field corn, including corn with which soybeans are interplanted. The contract will not provide insurance for true type silage corn, corn planted thick for silage or fodder purposes, sweet corn, popcorn, broom corn, corn planted for the development of hybrid seed corn, or any type of corn other than that normally regarded as field corn.

(b) Cotton, restricted to American upland cotton and not including cotton planted primarily for experimental purposes.

(c) Oats (Fall only) planted for harvest as grain.

(d) Soybeans planted for harvest as beans, excluding soybeans interplanted in the same row with corn.

(e) Strawberries, excluding acreage of less than two-tenths acre on an insurance unit.

(f) Tobacco, types 23 and 35.

(g) Wheat planted for harvest as grain.

2. *Coverage per acre.* (a) The coverage per acre for each insured crop, except cotton, shall be reduced 50 percent for any acreage released by the Corporation and planted to a substitute crop.

(b) The coverage per acre for cotton shall be reduced as follows: (1) 60 percent for any acreage which is released by the Corporation because of damage occurring prior to laying by the crop, and (2) 25 percent for any acreage on which the crop is laid by and not harvested.

3. *Insurance period.* Insurance shall attach at the time of planting to any insured acreage of any insured crop except strawberries on which insurance shall attach on March 1 of each year provided the strawberries were planted by June 1 of the prior year and there is a sufficient stand of plants on March 1 to expect a normal crop to be produced. Insurance shall cease with respect to (a) any portion of the tobacco crop upon weighing-in at the tobacco warehouse, transfer of interest in the tobacco after harvest, removal of the tobacco from the insurance unit (except for curing, packing or immediate delivery to the tobacco warehouse), or weighing of the tobacco for casing, (b) any portion of the corn crop upon harvesting (picking the corn from the stalk either by hand or machine or cutting the corn for fodder or ensilage), the cotton and strawberry crops upon picking, all other insured crops upon threshing, or with respect to any portion of any crop (except tobacco) upon removal from the field, whichever is earlier. However, in no event shall insurance remain in effect (a) with respect to tobacco later than March 31 following harvest unless such time is extended in writing by the Corporation, (b) with respect to any other crop later than the earlier of (i) the end of the normal harvest period for such crop or (ii) December 31, unless such time is extended in writing by the Corporation, and (c) with respect to any insurance unit later than the date of submission of a claim for indemnity.

4. *Protection against loss of quality.* In determining any loss under the contract, production of each insurable crop shall be evaluated at the predetermined price established by the Corporation for that crop and shown on the county actuarial table. However, any production of corn, oats, soybeans or wheat which will not meet the latest available requirements for a Commodity Credit Corporation loan or support because of poor quality due to insurable causes, and would not meet these requirements if properly handled, shall be evaluated at a value per unit determined by the Corporation.

5. *Released crop.* Notwithstanding any other provision of the policy any crop on any insured acreage may be released by the Corporation subject to an appraisal by the Corporation of the yield that would be realized if the crop were harvested, except that any corn may be used for ensilage or fodder without a release by the Corporation if the insured leaves a number of rows considered by the Corporation to be an adequate representative sample for appraising the yield.

6. *Amount of loss.* (a) The amount of loss with respect to any insurance unit shall be determined by (1) multiplying the insurable acreage (exclusive of any acreage to which insurance did not attach) planted to each insured crop by the applicable coverage per acre, and the result by the insured interest, and (2) subtracting from the total thereof the insured interest in the value (based on the predetermined price) of the total production on such acreage of all insured crops. However, the amount of loss so determined shall be reduced if the premium computed for the insurance unit on the basis of the acreage and interest approved by the Corporation on the acreage report is less than the premium computed for the planted acreage on the insurance unit. This reduction shall be made on the basis of the ratio of the premium computed for the acreage and interest as approved by the Corporation on the acreage report to the premium computed for the planted acreage. The total production for each insured crop on the insurance unit shall include all production determined in accordance with the production schedule below. Where any small grains are seeded with an insured growing small grain crop on acreage not released by the Corporation, all production shall be counted as the insured small grain on a weight basis. In the case of a volunteer crop produced with an insured crop, the production of such volunteer crop shall be included in determining the production of the insured crop. Any production of soybeans interplanted in the same row with corn shall not be counted as production.

The Corporation reserves the right to determine the amount of production on the basis of an appraisal of any unharvested crop standing in the field.

PRODUCTION SCHEDULE

| Crop | Acreage classification | Total production [1] |
|---|---|---|
| 1. Each insured crop except cotton. | Acreage released by the Corporation and planted to a substitute crop. | That portion of the appraised production for such acreage which is in excess of the number of bushels, crates or pounds determined by (1) subtracting the total coverage for such acreage from what the total coverage for such acreage would be if it were not planted to a substitute crop, and (2) dividing the result thus obtained by the predetermined price for the crop. |
| 2. Each insured crop except cotton. | Acreage not planted to a substitute crop. | The appraised production or the actual production, including an appraisal of corn left in the field after harvest and an appraisal of corn used for ensilage or fodder. |
| 3. Cotton | Acreage released by the Corporation because of damage occurring prior to laying by the crop. | That portion of the appraised production for such acreage which is in excess of the number of pounds determined by (1) subtracting the total coverage for such acreage from what the total coverage for such acreage would be if it were harvested and (2) dividing the result thus obtained by the predetermined price. |
| 4. Cotton | Acreage on which the crop is laid by and not harvested. | That portion of the appraised production for such acreage which is in excess of the number of pounds determined by (1) subtracting the total coverage for such acreage from what the total coverage for such acreage would be if it were harvested and (2) dividing the result thus obtained by the predetermined price. |
| 5. Cotton | Acreage harvested | Production, including an appraisal of production left in the field after harvest. |
| 6. Each insured crop | Acreage put to another use without the consent of the Corporation. | Appraised production for such acreage but not less than the product of (1) such acreage and (2) the bushel, crate or pound equivalent of the coverage per acre on the basis of the predetermined price for the crop. |
| 7. Each insured crop | Acreage with reduced yield due solely to cause(s) not insured against. | Appraised number of bushels, crates or pounds by which production for such acreage has been reduced but not less than the product of (1) such acreage and (2) the applicable bushel, crate or pound equivalent of the coverage per acre on the basis of the predetermined price for the crop, minus the number of bushels, crates or pounds harvested. |
| 8. Each insured crop | Acreage with reduced yield due partially to cause(s) not insured against and partially to cause(s) insured against. | Appraised number of bushels, crates or pounds by which production for such acreage has been reduced because of cause(s) not insured against. |

[1] Production shall be in bushels for corn, oats, soybeans and wheat, in crates (24 quarts) for strawberries and in pounds for cotton, and tobacco.

Notwithstanding the other provisions of this paragraph (a) regarding the determination of the total production of cotton, in any case where the quality of any cotton production is reduced solely by insured causes to the extent that the value per pound, as determined by the Corporation, is less than 75 percent of the predetermined price, the number of pounds of such poor quality cotton shall be adjusted downward to the number of pounds obtained by dividing the total value of such cotton, as determined by the Corporation, by 75 percent of the predetermined price.

(b) If production from two or more insurance units is commingled and the insured fails to establish and maintain separate acreage and production records satisfactory to the Corporation, the Corporation may allocate the commingled production between the units involved in any manner it deems appropriate or void the insurance on the insurance units involved and declare the premium(s) for such units forfeited by the insured. If production from uninsured acreage and insured acreage is commingled and the insured fails to establish and maintain separate acreage and production records satisfactory to the Corporation, all such production which is commingled shall be considered to have been produced on the insured acreage or the Corporation may void the insurance on the insurance unit(s) involved and declare the premium(s) for such unit(s) forfeited by the insured.

7. *Date table.*

Discount date: June 30.
Maturity date: July 31.
Interest date: October 31.
Cancellation date: January 31.

8. *Definitions.* (a) For all purposes under the contract strawberries for harvest within the crop year shall be considered to have been planted as of the beginning of the insurance period for that crop year.

(b) "Harvest" with respect to any acreage of cotton means the removal (by manual or mechanical means) of an amount of cotton from the stalk which is equal in value (based on the predetermined price) to 10 percent or more of the coverage for such acreage.

Approved: Beginning with the 1953 crop year.

[SEAL] FEDERAL CROP INSURANCE CORPORATION.

## § 420.90–6 *Weakley County.*

RIDER NO. 1 TO THE MULTIPLE CROP INSURANCE POLICY

(Applicable in Weakley County, Tenn., Beginning With the 1953 Crop Year)

1. *Insurable crops.* For the purpose of the multiple crop insurance program the insurable crops are:

(a) Corn normally regarded as field corn, including corn with which soybeans are interplanted. The contract will not provide insurance for true type silage corn, corn planted thick for silage or fodder purposes, sweet corn, popcorn, broom corn, corn planted for the development of hybrid seed corn, or any type of corn other than that normally regarded as field corn.

(b) Cotton, restricted to American upland cotton and not including cotton planted primarily for experimental purposes.

(c) Lespedeza (annual and sericea) for hay, including volunteer annual lespedeza.

(d) Soybeans planted for harvest as beans, excluding soybeans interplanted in the same row with corn.

interplanted in the same row with corn.

(e) Strawberries, excluding acreage of less than two-tenths acre on an insurance unit.

(f) Sweet potatoes, excluding acreage of less than one acre on an insurance unit.

(g) Tobacco, types 23 and 35.

2. *Coverage per acre.* (a) The coverage per acre for each insured crop except cotton, shall be reduced 50 percent for any acreage released by the Corporation and planted to a substitute crop.

(b) The coverage per acre for cotton shall be reduced as follows: (1) 60 percent for any acreage which is released by the Corporation because of damage occurring prior to laying by the crop, and (2) 25 percent for any acreage on which the crop is laid by and not harvested.

3. *Insurance period.* Insurance shall attach at the time of planting to any insured acreage of any insured crop, except (a) sericea and volunteer annual lespedeza on which insurance shall attach on May 1 provided there is a stand at that time sufficient that farmers in the area generally would leave it for harvest the following harvest season and further provided in the case of sericea lespedeza that the crop was planted not later than May 1 of the previous crop year, and (b) strawberries on which insurance shall attach on March 1 of each year provided the strawberries were planted by June 1 of the prior year and there is a sufficient stand of plants on March 1 to expect a normal crop to be produced. Insurance shall cease with respect to (a) any portion of the tobacco crop upon weighing-in at the tobacco warehouse, transfer of interest in the tobacco after harvest, removal of the tobacco from the insurance unit (except for curing, packing or immediate delivery to the tobacco warehouse), or weighing of the tobacco for casing, (b) any portion of the corn crop upon harvesting (picking the corn from the stalk either by hand or machine or cutting the corn for fodder or ensilage), the cotton crop upon picking, the hay crop upon baling or stacking, the sweet potato crop upon digging, the strawberry crop upon picking, the soybean crop upon threshing, or with respect to any portion of any crop (except tobacco) upon removal from the field, whichever is earlier. However, in no event shall insurance remain in effect (a) with respect to tobacco later than March 31 following harvest unless such time is extended in writing by the Corporation, (b) with respect to any other crop later than the earlier of (i) the end of the normal harvest period for such crop or (ii) December 31, unless such time is extended in writing by the Corporation, and (c) with respect to any insurance unit later than the date of submission of a claim for indemnity.

4. *Protection against loss of quality.* In determining any loss under the contract, production of each insurable crop shall be evaluated at the predetermined price established by the Corporation for that crop and shown on the county actuarial table. However, any production of corn, or soybeans which will not meet the latest available requirements for a Commodity Credit Corporation loan or support because of poor quality due to insurable causes, and would not meet these requirements if properly handled, shall be evaluated at a value per unit determined by the Corporation.

5. *Released crop.* Notwithstanding any other provision of the policy any crop on any insured acreage may be released by the Corporation subject to an appraisal by the Corporation of the yield that would be realized if the crop were harvested, except that any corn may be used for ensilage or fodder without a release by the Corporation if the insured leaves a number of rows considered by the Corporation to be an adequate representative sample for appraising the yield.

6. *Amount of loss.* (a) The amount of loss with respect to any insurance unit shall be determined by (1) multiplying the insurable acreage (exclusive of any acreage to which insurance did not attach) planted to each insured crop by the applicable coverage per acre, and the result by the insured interest, and (2) subtracting from the total thereof the insured interest in the value (based on the predetermined price) of the total production on such acreage of all insured crops. However, the amount of loss so determined shall be reduced if the premium computed for the insurance unit on the basis of the acreage and interest approved by the Corporation on the acreage report is less than the premium computed for the planted acreage on the insurance unit. This reduction shall be made on the basis of the ratio of the premium computed for the acreage and interest as approved by the Corporation on the

acreage report to the premium computed for the planted acreage. The total production for each insured crop on the insurance unit shall include all production determined in accordance with the production schedule below. Any production of soybeans interplanted in the same row with corn shall not be counted as production.

The Corporation reserves the right to determine the amount of production on the basis of an appraisal of any unharvested crop standing in the field.

PRODUCTION SCHEDULE

| Crop | Acreage classification | Total production [1] |
|---|---|---|
| 1. Each insured crop except cotton. | Acreage released by the Corporation and planted to a substitute crop. | That portion of the appraised production for such acreage which is in excess of the number of bushels, crates, pounds or tons determined by (1) subtracting the total coverage for such acreage from what the total coverage for such acreage would be if it were not planted to a substitute crop, and (2) dividing the result thus obtained by the predetermined price for the crop. |
| 2. Each insured crop except cotton. | Acreage not planted to a substitute crop. | The appraised production or the actual production, including an appraisal of corn left in the field after harvest and an appraisal of corn used for ensilage or fodder. |
| 3. Cotton | Acreage released by the Corporation because of damage occurring prior to laying by the crop. | That portion of the appraised production for such acreage which is in excess of the number of pounds determined by (1) subtracting the total coverage for such acreage from what the total coverage for such acreage would be if it were harvested and (2) dividing the result thus obtained by the predetermined price. |
| 4. Cotton | Acreage on which the crop is laid by and not harvested. | That portion of the appraised production for such acreage which is in excess of the number of pounds determined by (1) subtracting the total coverage for such acreage from what the total coverage for such acreage would be if it were harvested and (2) dividing the result thus obtained by the predetermined price. |
| 5. Cotton | Acreage harvested | Production, including an appraisal of production left in the field after harvest. |
| 6. Each insured crop | Acreage put to another use without the consent of the Corporation. | Appraised production for such acreage but not less than the product of (1) such acreage and (2) the bushel, crate, pound, or ton equivalent of the coverage per acre on the basis of the predetermined price for the crop. |
| 7. Each insured crop | Acreage with reduced yield due solely to cause(s) not insured against. | Appraised number of bushels, crates, pounds or tons by which production for such acreage has been reduced but not less than the product of (1) such acreage and (2) the applicable bushel, crate, pound or ton equivalent of the coverage per acre on the basis of the predetermined price for the crop, minus the number of bushels, crates, pounds or tons harvested. |
| 8. Each insured crop | Acreage with reduced yield due partially to cause(s) not insured against and partially to cause(s) insured against. | Appraised number of bushels, crates, pounds or tons by which production for such acreage has been reduced because of cause(s) not insured against. |

[1] Production shall be in bushels for corn, soybeans, and sweetpotatoes, in crates (24 quart) for strawberries in pounds for cotton and tobacco and in tons (rounded to tenths) for hay.

Notwithstanding the other provisions of this paragraph (a) regarding the determination of the total production of cotton, in any case where the quality of any cotton production is reduced solely by insured causes to the extent that the value per pound, as determined by the Corporation, is less than 75 percent of the predetermined price, the number of pounds of such poor quality cotton shall be adjusted downward to the number of pounds obtained by dividing the total value of such cotton, as determined by the Corporation, by 75 percent of the predetermined price.

(b) If production from two or more insurance units is commingled and the insured fails to establish and maintain separate acreage and production records satisfactory to the Corporation, the Corporation may allocate the commingled production between the units involved in any manner it deems appropriate or void the insurance on the insurance units involved and declare the premium(s) for such units forfeited by the insured. If production from uninsured acreage and insured acreage is commingled and the insured fails to establish and maintain separate acreage and production records satisfactory to the Corporation, all such production which is commingled shall be considered to have been produced on the insured acreage or the Corporation may void the insurance on the insurance unit(s) involved and declare the premium(s) for such unit(s) forfeited by the insured.

7. *Date table.*

Discount date: June 30.
Maturity date: July 31.
Interest date: October 31.
Cancellation date: January 31.

8. *Definitions.* For all purposes under the contract sericea and volunteer lespedeza and strawberries for harvest within the crop year shall be considered to have been planted as of the beginning of the insurance period for that crop year.

"Harvest" with respect to any acreage of cotton means the removal (by manual or mechanical means) of an amount of cotton from the stalk which is equal in value (based on the predetermined price) to 10 percent or more of the coverage for such acreage.

Approved: Beginning with the 1953 crop year.

[SEAL] FEDERAL CROP INSURANCE CORPORATION.

## § 420.90–7 *Warren County.*

RIDER NO. 1 TO THE MULTIPLE CROP INSURANCE POLICY

(Applicable in Warren County, Tenn., Beginning With the 1953 Crop Year)

1. *Insurable crops.* For the purpose of the multiple crop insurance program the insurable crops are:

(a) Corn normally regarded as field corn, including corn with which soybeans are interplanted. The contract will not provide insurance for true type silage corn, corn planted thick for silage or fodder purposes, sweet corn, popcorn, broom corn, corn planted for the development of hybrid seed corn, or any type of corn other than that normally regarded as field corn.

(b) Cotton, restricted to American upland cotton and not including cotton planted primarily for experimental purposes.

(c) Oats (fall only) planted for harvest as grain. (Insurance on oats to attach the first crop year of the contract only if the application is filed on or before September 30 preceding the calendar year in which the crop for that crop year is normally harvested.)

(d) Soybeans planted for harvest as beans, excluding soybeans interplanted in the same row with corn.

(e) Tobacco, type 31.

(f) Wheat planted for harvest as grain. (Insurance on wheat to attach the first crop year of the contract only if the application is filed on or before September 30 preceding the calendar year in which the crop for that crop year is normally harvested.)

2. *Coverage per acre.* (a) The coverage per acre for each insured crop, except cotton, shall be reduced 50 percent for any acreage released by the Corporation and planted to a substitute crop.

(b) The coverage per acre for cotton shall be reduced as follows: (1) 60 percent for any acreage which is released by the Corporation because of damage occurring prior to laying by the crop, and (2) 25 percent for any acreage on which the crop is laid by and not harvested.

3. *Insurance period.* Insurance shall attach at the time of planting to any insured acreage of any insured crop. Insurance shall cease with respect to (a) any portion of the tobacco crop upon weighing-in at the tobacco warehouse, transfer of interest in the tobacco after harvest, removal of the tobacco from the insurance unit (except for curing, packing or immediate delivery to the tobacco warehouse), or weighing of the tobacco for casing, (b) any portion of the corn crop upon harvesting (picking the corn from the stalk either by hand or machine or cutting the corn for fodder or ensilage), the cotton crop upon picking, all other insured crops upon threshing, or with respect to any portion of any crop (except tobacco) upon removal from the field, whichever is earlier. However, in no event shall insurance remain in effect (a) with respect to tobacco later than February 28 following harvest unless such time is extended in writing by the Corporation, (b) with respect to any other crop later than the earlier of (i) the end of the normal harvest period for such crop or (ii) December 31, unless such time is extended in writing by the Corporation, and (c) with respect to any insurance unit later than the date of submission of a claim for indemnity.

4. *Protection against loss of quality.* In determining any loss under the contract, production of each insurable crop shall be evaluated at the predetermined price established by the Corporation for that crop and shown on the county actuarial table. However, any production of corn, oats, soybeans or wheat which will not meet the latest available requirements for a Commodity Credit Corporation loan or support because of poor quality due to insurable causes, and would not meet these requirements if properly handled, shall be evaluated at a value per unit determined by the Corporation.

5. *Released crop.* Notwithstanding any other provision of the policy any crop on any insured acreage may be released by the Corporation subject to an appraisal by the Corporation of the yield that would be realized if the crop were harvested, except that any corn may be used for ensilage or fodder without a release by the Corporation if the insured leaves a number of rows considered by the Corporation to be an adequate representative sample for appraising the yield.

6. *Amount of loss.* (a) The amount of loss with respect to any insurance unit shall be determined by (1) multiplying the insurable acreage (exclusive of any acreage to which insurance did not attach) planted to each insured crop by the applicable coverage per acre, and the result by the insured interest, and (2) subtracting from the total thereof the insured interest in the value (based on the predetermined price) of the total production on such acreage of all insured crops. However, the amount of loss so determined shall be reduced if the premium computed for the insurance unit on the basis of the acreage and interest approved by the Corporation on the acreage report is less than the premium computed for the planted acreage on the insurance unit. This reduction shall be made on the basis of the ratio of the premium computed

for the acreage and interest as approved by the Corporation on the acreage report to the premium computed for the planted acreage. The total production for each insured crop on the insurance unit shall include all production determined in accordance with the production schedule below. Where any small grains are seeded with an insured growing small grain crop on acreage not released by the Corporation, all production shall be counted as the insured small grain on a weight basis. In the case of a volunteer crop produced with an insured crop, the production of such volunteer crop shall be included in determining the production of the insured crop. Any production of soybeans interplanted in the same row with corn shall not be counted as production.

The Corporation reserves the right to determine the amount of production on the basis of an appraisal of any unharvested crop standing in the field.

PRODUCTION SCHEDULE

| Crop | Acreage classification | Total production [1] |
|---|---|---|
| 1. Each insured crop except cotton. | Acreage released by the Corporation and planted to a substitute crop. | That portion of the appraised production for such acreage which is in excess of the number of bushels or pounds determined by (1) subtracting the total coverage for such acreage from what the total coverage for such acreage would be if it were not planted to a substitute crop, and (2) dividing the result thus obtained by the predetermined price for the crop. |
| 2. Each insured crop except cotton. | Acreage not planted to a substitute crop. | The appraised production or the actual production, including an appraisal of corn left in the field after harvest and an appraisal of corn used for ensilage or fodder. |
| 3. Cotton | Acreage released by the Corporation because of damage occurring prior to laying by the crop. | That portion of the appraised production for such acreage which is in excess of the number of pounds determined by (1) subtracting the total coverage for such acreage from what the total coverage for such acreage would be if it were harvested and (2) dividing the result thus obtained by the predetermined price. |
| 4. Cotton | Acreage on which the crop is laid by and not harvested. | That portion of the appraised production for such acreage which is in excess of the number of pounds determined by (1) subtracting the total coverage for such acreage from what the total coverage for such acreage would be if it were harvested and (2) dividing the result thus obtained by the predetermined price. |
| 5. Cotton | Acreage harvested | Production, including an appraisal of production left in the field after harvest. |
| 6. Each insured crop | Acreage put to another use without the consent of the Corporation. | Appraised production for such acreage but not less than the product of (1) such acreage and (2) the bushel or pound equivalent of the coverage per acre on the basis of the predetermined price for the crop. |
| 7. Each insured crop | Acreage with reduced yield due solely to cause(s) not insured against. | Appraised number of bushels or pounds by which production for such acreage has been reduced but not less than the product of (1) such acreage and (2) the applicable bushel or pound equivalent of the coverage per acre, on the basis of the predetermined price for the crop, minus the number of bushels or pounds harvested. |
| 8. Each insured crop | Acreage with reduced yield due partially to cause(s) not insured against and partially to cause(s) insured against. | Appraised number of bushels or pounds by which production for such acreage has been reduced because of cause(s) not insured against. |

[1] Production shall be in bushels for corn, oats, soybeans and wheat, and in pounds for cotton and tobacco.

Notwithstanding the other provisions of this paragraph (a) regarding the determination of the total production of cotton, in any case where the quality of any cotton production is reduced solely by insured causes to the extent that the value per pound, as determined by the Corporation, is less than 75 percent of the predetermined price, the number of pounds of such poor quality cotton shall be adjusted downward to the number of pounds obtained by dividing the total value of such cotton, as determined by the Corporation, by 75 percent of the predetermined price.

(b) If production from two or more insurance units is commingled and the insured fails to establish and maintain separate acreage and production records satisfactory to the Corporation, the Corporation may allocate the commingled production between the units involved in any manner it deems appropriate or void the insurance on the insurance units involved and declare the premium(s) for such units forfeited by the insured. If production from uninsured acreage and insured acreage is commingled and the insured fails to establish and maintain separate acreage and production records satisfactory to the Corporation, all such production which is commingled shall be considered to have been produced on the insured acreage or the Corporation may void the insurance on the insurance unit(s) involved and declare the premium(s) for such unit(s) forfeited by the insured.

7. *Date table.*

Discount date: June 30.
Maturity date: July 31.
Interest date: October 31.
Cancellation date: August 31.

8. *Definitions.* "Harvest" with respect to any acreage of cotton means the removal (by manual or mechanical means) of an amount of cotton from the stalk which is equal in value (based on the predetermined price) to 10 percent or more of the coverage for such acreage.

Approved: Beginning with the 1953 crop year.

[SEAL] FEDERAL CROP INSURANCE CORPORATION.

## § 420.90–8 *Coffee County.*

RIDER NO. 1 TO THE MULTIPLE CROP INSURANCE POLICY

(Applicable in Coffee County, Tenn., Beginning With the 1953 Crop Year)

1. *Insurable crops.* For the purpose of the multiple crop insurance program the insurable crops are:

(a) Corn normally regarded as field corn, including corn with which soybeans are interplanted. The contract will not provide insurance for true type silage corn, corn planted thick for silage or fodder purposes, sweet corn, popcorn, broom corn, corn planted for the development of hybrid seed corn, or any type of corn other than that normally regarded as field corn.

(b) Cotton, restricted to American upland cotton and not including cotton planted primarily for experimental purposes.

(c) Potatoes (excluding acreage of less than one acre on an insurance unit) commonly known as Irish potatoes.

(d) Soybeans planted for harvest as beans, excluding soybeans interplanted in the same row with corn.

(c) Tobacco, type 31.

2. *Coverage per acre.* (a) The coverage per acre for each insured crop, except cotton, shall be reduced 50 percent for any acreage released by the Corporation and planted to a substitute crop.

(b) The coverage per acre for cotton shall be reduced as follows: (1) 60 percent for any acreage which is released by the Corporation because of damage occurring prior to laying by the crop, and (2) 25 percent for any acreage on which the crop is laid by and not harvested.

3. *Insurance period.* Insurance shall attach at the time of planting to any insured acreage of any insured crop. Insurance shall cease with respect to (a) any portion of the tobacco crop upon weighing-in at the tobacco warehouse, transfer of interest in the tobacco after harvest, removal of the tobacco from the insurance unit (except for curing, packing or immediate delivery to the tobacco warehouse), or weighing of the tobacco for casing, (b) any portion of the corn crop upon harvesting (picking the corn from the stalk either by hand or machine or cutting the corn for fodder or ensilage), the cotton crop upon picking, the soybean crop upon threshing, or with respect to any portion of any crop (except tobacco) upon removal from the field, whichever is earlier. However, in no event shall insurance remain in effect (a) with respect to tobacco later than February 28 following harvest unless such time is extended in writing by the Corporation, (b) with respect to any other crop later than the earlier of (1) the end of the normal harvest period for such crop or (ii) December 31, unless such time is extended in writing by the Corporation, and (c) with respect to any insurance unit later than the date of submission of a claim for indemnity.

4. *Production against loss of quality.* In determining any loss under the contract, production of each insurable crop shall be evaluated at the predetermined price established by the Corporation for that crop and shown on the county actuarial table. However, any production of corn, potatoes or soybeans which will not meet the latest available requirements for a Commodity Credit Corporation loan or support because of poor quality due to insurable causes, and would not meet these requirements if properly handled, shall be evaluated at a value per unit determined by the Corporation.

5. *Released crop.* Notwithstanding any other provision of the policy any crop on any insured acreage may be released by the Corporation subject to an appraisal by the Corporation of the yield that would be realized if the crop were harvested, except that any corn may be used for ensilage or fodder without a release by the Corporation if the insured leaves a number of rows considered by the Corporation to be an adequate representative sample for appraising the yield.

6. *Amount of loss.* (a) The amount of loss with respect to any insurance unit shall be determined by (1) multiplying the insurable acreage (exclusive of any acreage to which insurance did not attach) planted to each insured crop by the applicable coverage per acre, and the result by the insured interest, and (2) subtracting from the total thereof the insured interest in the value (based on the predetermined price) of the total production on such acreage of all insured crops. However, the amount of loss so determined shall be reduced if the premium computed for the insurance unit on the basis of the acreage and interest approved by the Corporation on the acreage report is less than the premium computed for the planted acreage on the insurance unit. This reduction shall be made on the basis of the ratio of the premium computed for the acreage and interest as approved by the Corporation on the acreage report to the premium computed for the planted acreage.

which will not meet the latest available requirements for a Commodity Credit Corporation loan or support because of poor quality due to insurable causes, and would not meet these requirements if properly handled, shall be evaluated at a value per unit determined by the Corporation. In order to provide quality protection on dry edible beans, production of beans shall be determined on the basis of sound whole beans.

5. *Released crop.* Notwithstanding any other provision of the policy any crop on any insured acreage may be released by the Corporation subject to an appraisal by the Corporation of the yield that would be realized if the crop were harvested.

6. *Amount of loss.* (a) The amount of loss with respect to any insurance unit shall be determined by (1) multiplying the insurable acreage (exclusive of any acreage to which insurance did not attach) planted to each insured crop by the applicable coverage per acre, and the result by the insured interest, and (2) subtracting from the total thereof the insured interest in the value (based on the predetermined price) of the total production on such acreage of all insured crops. However, the amount of loss so determined shall be reduced if the premium computed for the insurance unit on the basis of the acreage and interest approved by the Corporation on the acreage report is less than the premium computed for the planted acreage on the insurance unit. This reduction shall be made on the basis of the ratio of the premium computed for the acreage and interest as approved by the Corporation on the acreage report to the premium computed for the planted acreage. The total production for each insured crop on the insurance unit shall include all production determined in accordance with the production schedule below. Where any small grains are seeded with an insured growing small grain crop on acreage not released by the Corporation, all production shall be counted as the insured small grain on a weight basis. In the case of a volunteer crop produced with an insured crop, the production of such volunteer crop shall be included in determining the production of the insured crop.

The Corporation reserves the right to determine the amount of production on the basis of an appraisal of any unharvested crop standing in the field.

PRODUCTION SCHEDULE

| Crop | Acreage classification | Total production [1] |
|---|---|---|
| 1. Each insured crop | Acreage released by the Corporation and planted to a substitute crop. | That portion of the appraised production for such acreage which is in excess of the number of bushels, pounds or tons determined by (1) subtracting the total coverage for such acreage from what the total coverage for such acreage would be if it were not planted to a substitute crop, and (2) dividing the result thus obtained by the predetermined price for the crop. |

[1] Production and allowances shall be in bushels for barley, oats and wheat, pounds for beans, tons (rounded to tenths) for corn silage.

The total production for each insured crop on the insurance unit shall include all production determined in accordance with the production schedule below. In the case of a volunteer crop produced with an insured crop, the production of such volunteer crop shall be included in determining the production of the insured crop.

PRODUCTION SCHEDULE

| Crop | Acreage classification | Total production [1] |
|---|---|---|
| 1. Each insured crop except cotton. | Acreage released by the Corporation and planted to a substitute crop. | That portion of the appraised production for such acreage which is in excess of the number of bushels or pounds determined by (1) subtracting the total coverage for such acreage from what the total coverage for such acreage would be if it were not planted to a substitute crop, and (2) dividing the result thus obtained by the predetermined price for the crop. |
| 2. Each insured crop except cotton. | Acreage not planted to a substitute crop. | The appraised production or the actual production, including an appraisal of corn left in the field after harvest and an appraisal of corn used for ensilage or fodder. |
| 3. Cotton | Acreage released by the Corporation because of damage occurring prior to laying by the crop. | That portion of the appraised production for such acreage which is in excess of the number of pounds determined by (1) subtracting the total coverage for such acreage from what the total coverage for such acreage would be if it were harvested and (2) dividing the result thus obtained by the predetermined price. |
| 4. Cotton | Acreage on which the crop is laid by and not harvested. | That portion of the appraised production for such acreage which is in excess of the number of pounds determined by (1) subtracting the total coverage for such acreage from what the total coverage for such acreage would be if it were harvested and (2) dividing the result thus obtained by the predetermined price. |
| 5. Cotton | Acreage harvested | Production, including an appraisal of production left in the field after harvest. |
| 6. Each insured crop | Acreage put to another use without the consent of the Corporation. | Appraised production for such acreage but not less than the product of (1) such acreage and (2) the bushel or pound equivalent of the coverage per acre on the basis of the predetermined price for the crop. |
| 7. Each insured crop | Acreage with reduced yield due solely to cause(s) not insured against. | Appraised number of bushels or pounds by which production for such acreage has been reduced but not less than the product of (1) such acreage and (2) the applicable bushel or pound equivalent of the coverage per acre, on the basis of the predetermined price for the crop, minus the number of bushels or pounds harvested. |
| 8. Each insured crop | Acreage with reduced yield due partially to cause(s) not insured against and partially to cause(s) insured against. | Appraised number of bushels, or pounds by which production for such acreage has been reduced because of cause(s) not insured against. |

[1] Production shall be in bushels for corn, and soybeans, and in pounds for cotton, potatoes and tobacco.

Notwithstanding the other provisions of this paragraph (a) regarding the determination of the total production of cotton, in any case where the quality of any cotton production is reduced solely by insured causes to the extent that the value per pound, as determined by the Corporation, is less than 75 percent of the predetermined price, the number of pounds of such poor quality cotton shall be adjusted downward to the number of pounds obtained by dividing the total value of such cotton, as determined by the Corporation, by 75 percent of the predetermined price.

(b) If production from two or more insurance units is commingled and the insured fails to establish and maintain separate acreage and production records satisfactory to the Corporation, the Corporation may allocate the commingled production between the units involved in any manner it deems appropriate or void the insurance on the insurance units involved and declare the premium(s) for such units forfeited by the insured. If production from uninsured acreage and insured acreage is commingled and the insured fails to establish and maintain separate acreage and production records satisfactory to the Corporation, all such production which is commingled shall be considered to have been produced on the insured acreage or the Corporation may void the insurance on the insurance unit(s) involved and declare the premium(s) for such unit(s) forfeited by the insured.

7. *Date table.*

Discount date: June 30.

PRODUCTION SCHEDULE—Continued

| Crop | Average classification | Total production [1] |
|---|---|---|
| 2. Each insured crop... | Acreage not planted to a substitute crop. | The appraised production or the actual production. |
| 3. Each insured crop... | Acreage put to another use without the consent of the Corporation. | Appraised production for such acreage but not less than the product of (1) such acreage and (2) the bushel, pound or ton equivalent of the coverage per acre on the basis of the predetermined price for the crop. |
| 4. Each insured crop... | Acreage with reduced yield due solely to cause(s) not insured against. | Appraised number of bushels, pounds, or tons by which production for such acreage has been reduced but not less than the product of (1) such acreage and (2) the applicable bushel, pound, or ton equivalent of the coverage per acre on the basis of the predetermined price for the crop, minus the number of bushels, pounds, or tons harvested. |
| 5. Each insured crop... | Acreage with reduced yield due partially to cause(s) not insured against and partially to cause(s) insured against. | Appraised number of bushels, pounds, or tons by which production for such acreage has been reduced because of cause(s) not insured against. |

[1] Production and allowances shall be in bushels for barley, oats and wheat, pounds for beans, tons (rounded to tenths) for corn silage.

(b) If production from two or more insurance units is commingled and the insured fails to establish and maintain separate acreage and production records satisfactory to the Corporation, the Corporation may allocate the commingled production between the units involved in any manner it deems appropriate or void the insurance on the insurance units involved and declare the premium(s) for such units forfeited by the insured. If production from uninsured acreage and insured acreage is commingled and the insured fails to establish and maintain separate acreage and production records satisfactory to the Corporation, all such production which is commingled shall be considered to have been produced on the insured acreage or the Corporation may void the insurance on the insurance unit(s) involved and declare the premium(s) for such unit(s) forfeited by the insured.

7. *Irrigated acreage.* (a) In addition to the provisions of section 4 of the policy, the following provisions shall apply: (1) The acreage of insured crops in any year shall not exceed that acreage which can be irrigated adequately with the facilities available and with a supply of irrigation water which reasonably could be expected, taking into consideration the amount of water required to irrigate the acreage of all irrigated crops on the farm. (2) Insurance shall not attach with respect to acreage planted to insurable crops (i) the first year after being leveled or (ii) the first year such acreage is irrigated.

(b) In addition to the causes of loss insured against as shown on the first page of the policy the contract shall cover loss due to failure of the water supply from natural causes that could not be foreseen and prevented by the insured.

(c) In addition to the causes of loss not insured against as shown in section 8 of the policy, the contract shall not cover loss caused by (1) failure properly to apply irrigation water to any insurable crop in accordance with good farming practices, as determined by the Corporation, and (2) shortage of irrigation water on any farm where the Corporation determines that the total acreage of all irrigated crops on the farm is in excess of that which could be irrigated properly with the facilities available and with the supply of irrigation water which reasonably could be expected.

8. *Date table.*

Discount date: June 30.
Maturity date: July 31.
Interest date: October 31.
Cancellation date: August 31.

Approved: Beginning with the 1953 crop year.

## Chapter VIII—Production and Marketing Administration (Sugar Branch), Department of Agriculture

### Subchapter B—Sugar Requirements and Quotas

[Sugar Reg. 812]

### PART 812—SUGAR REQUIREMENTS AND QUOTAS; HAWAII AND PUERTO RICO

CALENDAR YEAR 1954

By virtue of the authority vested in the Secretary of Agriculture by the Sugar Act of 1948, as amended (61 Stat. 922, 65 Stat. 318; 7 U. S. C., Sup. 1100) and the Administrative Procedure Act (60 Stat. 237, 5 U. S. C. 1001), these regulations are hereby made, prescribed, and published to be in force and effect for the calendar year 1954 or until amended or superseded by regulations hereafter made during the calendar year 1954.

*Basis and purpose.* The determinations and the sugar quotas set forth below have been made and established pursuant to section 203 of the Sugar Act of 1948, as amended (hereinafter called the "act"). The act provides for the Secretary of Agriculture to make such determinations and establish such quotas for the calendar year 1954 during December 1953. The determinations of the sugar requirements have been based, insofar as required by section 201 of the act, on official statistics of the Department of Agriculture and statistics published by other agencies of the Federal Government. The purpose of such determinations is to provide the amounts of sugar needed to meet the requirements of consumers in the Territory of Hawaii and in Puerto Rico for the calendar year 1954. The determinations provide the basis for the establishment of sugar quotas for such year for local consumption therein pursuant to section 203 of the act.

Prior to the issuance of these regulations, notice was given (18 F. R. 6720) that the Secretary of Agriculture was preparing, among other things, to determine the requirements and quotas for the calendar year 1954 for local consumption in Hawaii and in Puerto Rico and that any interested person might present any data, views or arguments with respect thereto in writing not later than November 27, 1953. Due consideration has been given to the data, views and arguments submitted, in accordance with the Administrative Procedure Act (60 Stat. 237).

Since the act provides that the Secretary of Agriculture determine sugar requirements and establish quotas for local consumption in Hawaii and in Puerto Rico during December 1953, to be applicable for the calendar year 1954, it is impracticable and not in the public interest to comply with the 30-day effective date requirements of the Administrative Procedure Act. Accordingly, these regulations shall be effective January 1, 1954.

§ 812.11 *Sugar requirements and quotas*—(a) *Sugar requirements.* It is hereby determined, pursuant to section 203 of the act, that the amount of sugar needed to meet the requirements of consumers in the Territory of Hawaii for the calendar year 1954 is 40,000 short tons of sugar, raw value, and that the amount of sugar needed to meet the requirements of consumers in Puerto Rico for the calendar year 1954 is 100,000 short tons, raw value.

(b) *Local consumption quotas.* There are hereby established, pursuant to section 203 of the act, for local consumption in the Territory of Hawaii and in Puerto Rico, for the calendar year 1954 the following quotas:

| Area: | Quotas in terms of short tons, raw value |
|---|---|
| Hawaii | 40,000 |
| Puerto Rico | 100,000 |

§ 812.12 *Restrictions on marketing.* For the calendar year 1954, all persons are hereby forbidden, pursuant to section 209 of the act, from marketing in the Territory of Hawaii or in Puerto Rico, for consumption therein, any sugar or liquid sugar after the quota for the area for the calendar year 1954 has been filled.

*Statement of bases and considerations.* Pursuant to section 203 of the act, it has been determined that those provisions of section 201 of the act which shall apply to the determination of the amounts of sugar needed to meet the requirements of consumers in Hawaii and in Puerto Rico relate to (1) the quantities of sugar distributed for local consumption in Hawaii and in Puerto Rico during the twelve-month period ended October 31, 1953 (2) deficiencies or surpluses in inventories of sugar and (3) changes in consumption because of changes in population and demand conditions.

The quantities of sugar distributed for consumption in Hawaii and Puerto Rico, including that which was lost in refining after charge to the local quotas, during such twelve-month period were approximately 42,000 short tons of sugar, raw value, and 96,000 short tons of sugar, raw value, respectively.

No official estimate of population for either of these areas for 1953 or 1954 is available. The estimate of the population of Hawaii for 1952 is 2 percent larger than for 1951, and for Puerto Rico, 0.3 percent larger.

In Hawaii, distribution of sugar for local consumption in recent years has not followed an increasing trend related to population increases because of the changes in industrial use. The 42,000 tons marketed during the period ended October 31, 1953 is larger than the quantity marketed in 4 out of the 5 previous comparable periods. Distribution during those five periods averaged 39,000 tons. The relatively high rate of distribution prior to October 31, 1953, together with the 6,000 tons of the 1953 local consumption quota remaining to be marketed after October 31 will probably result in some refined sugar stocks charged to the 1953 quota available for use in 1954. Thus it appears that new quota supplies of 40,000 short tons, raw value, will be adequate for local consumption in Hawaii in 1954.

In Puerto Rico the 96,000 tons distributed in the twelve-month period ended October 31, 1953, is less than the quantity distributed in any of the previous 5 comparable periods. Distribution during those five periods averaged 101,000 tons. The comparatively low rate of distribution during the twelve-month period ended October 31, 1953 indicates that the "invisible" stocks (stocks held by wholesalers, retailers and industrial users) were considerably reduced by October 31. On that date refiners in the island had approximately 18,000 tons of 1953 quota sugar on hand. This quantity, while sufficient to meet consumption requirements for the balance of 1953 and early 1954, is 5,000 tons less than the quantity distributed during November 1952–January 1953. It therefore appears that "invisible" inventories will not be excessive on January 1, 1954 and that a quota of 100,000 short tons, raw value, for local consumption in Puerto Rico in 1954 will provide a supply of sugar that will be consumed at fair prices.

In accordance with the above, the quotas for local consumption in Hawaii and Puerto Rico for 1954 have been established at 40,000 and 100,000 short tons, raw value, respectively.

(Sec. 403, 61 Stat. 932, 7 U. S. C. Sup., 1153. Interpret or apply secs. 201, 203, 209, 210, 61 Stat. 923, 925, 928; 7 U. S. C. Sup., 1111, 1113, 1119, 1120)

Done at Washington, D. C., this 15th day of December 1953. Witness my hand and the seal of the Department of Agriculture.

[SEAL] E. T. BENSON,
*Secretary of Agriculture.*

[F. R. Doc. 53-10555; Filed, Dec. 18, 1953; 8:49 a. m.]

[Sugar Reg. 811]

### PART 811—CONTINENTAL SUGAR REQUIREMENTS AND AREA QUOTAS

REQUIREMENTS AND QUOTAS FOR 1954

*Correction*

In Federal Register Document 53-10487, published at page 8257 of the issue for Thursday, December 17, 1953, the following changes are made:

1. In § 811.65 (b) (2) the headnote of the list should read: *"Direct-consumption sugar, tons, raw value".*

2. In § 811.66 the headnote of the list should read: *"Liquid sugar, wine gallons, 72 percent total sugar content".*

## Chapter IX—Production and Marketing Administration (Marketing Agreements and Orders), Department of Agriculture

[Navel Orange Reg. 9, Amdt. 1]

### PART 914—NAVEL ORANGES GROWN IN ARIZONA AND DESIGNATED PART OF CALIFORNIA

LIMITATION OF HANDLING

*Findings.* 1. Pursuant to the marketing agreement and Order No. 14 (18 F. R. 5638), regulating the handling of Navel oranges grown in Arizona and designated part of California, effective September 22, 1953, under the applicable provisions of the Agricultural Marketing Agreement Act of 1937, as amended (7 U. S. C. 601 et seq.), and upon the basis of the recommendation and information submitted by the Navel Orange Administrative Committee, established under the said marketing agreement and order, and upon other available information, it is hereby found that the limitation of handling of such Navel oranges, as hereinafter provided, will tend to effectuate the declared policy of the act.

(2) It is hereby further found that it is impracticable and contrary to the public interest to give preliminary notice, engage in public rule making procedure, and postpone the effective date of this amendment until 30 days after publication thereof in the FEDERAL REGISTER (60 Stat. 237; 5 U. S. C. 1001 et seq.) because the time intervening between the date when information upon which this amendment is based became available and the time when this amendment must become effective in order to effectuate the declared policy of the act is insufficient, and this amendment relieves restrictions on the handling of Navel oranges grown in Arizona and designated part of California.

*Order, as amended.* The provisions in paragraph (b) (1) (i) of § 914.309 (Navel Orange Regulation 9, 18 F. R. 8171) are amended to read as follows:

(i) District 1, 500 carloads.

(Sec 5, 49 Stat. 753, as amended; 7 U. S. C. and Sup. 608c)

Done at Washington, D. C., this 15th day of December 1953.

[SEAL] FLOYD F. HEDLUND,
*Acting Director, Fruit and Vegetable Branch, Production and Marketing Administration.*

[F. R. Doc. 53-10553; Filed, Dec. 18, 1953; 8:49 a. m.]

[Navel Orange Reg. 10]

### PART 914—NAVEL ORANGES GROWN IN ARIZONA AND DESIGNATED PART OF CALIFORNIA

LIMITATION OF HANDLING

§ 914.310 *Navel Orange Regulation 10*—(a) *Findings.* (1) Pursuant to the marketing agreement and Order No. 14 (18 F. R. 5638), regulating the handling of navel oranges grown in Arizona and designated part of California, effective September 22, 1953, under the applicable provisions of the Agricultural Marketing Agreement Act of 1937, as amended (7 U. S. C. 601 et seq.), and upon the basis of the recommendation and information submitted by the Navel Orange Administrative Committee, established under the said marketing agreement and order, and upon other available information, it is hereby found that the limitation of handling of such navel oranges, as hereinafter provided, will tend to effectuate the declared policy of the act.

(2) It is hereby further found that it is impracticable and contrary to the public interest to give preliminary notice, engage in public rule-making procedure, and postpone the effective date of this section until 30 days after publication thereof in the FEDERAL REGISTER (60 Stat. 237; 5 U. S. C. 1001 et seq.) because the time intervening between the date when information upon which this section is based became available and the time when this section must become effective in order to effectuate the declared policy of the act is insufficient, and a reasonable time is permitted, under the circumstances, for preparation for such effective time; and good cause exists for making the provisions of this section effective as hereinafter set forth. The Navel Orange Administrative Committee held an open meeting on December 17, 1953, after giving due notice thereof, to consider supply and market conditions for navel oranges and the need for regulation; interested persons were afforded an opportunity to submit information and views at this meeting; the recommendation and supporting information for regulation during the period specified herein was promptly submitted to the Department after such meeting was held; the provisions of this section, including its effective time, are identical with the aforesaid recommendation of the committee, and information concerning such provisions and effective time has been disseminated among handlers of such navel oranges; it is necessary, in order to effectuate the declared policy of the act, to make this section effective during the period herein specified; and compliance with this section will not require any special preparation on the part of persons subject thereto which cannot be completed on or before the effective date hereof.

(b) *Order.* (1) The quantity of navel oranges grown in Arizona and designated part of California which may be handled during the period beginning at 12:01 a. m., P. s. t., December 20, 1953, and ending at 12:01 a. m., P. s. t., December 27, 1953, is hereby fixed as follows:

(i) District 1: 400 carloads;
(ii) District 2: 52.21 carloads;
(iii) District 3: Unlimited movement;
(iv) District 4: Unlimited movement.

(2) The prorate base of each handler who has made application therefor, as provided in the said marketing agreement and order, is hereby fixed in accordance with the prorate base schedule which is attached hereto and made a part hereof by this reference.

(3) As used in this section "handled," "handler," "carloads," "prorate base," "District 1," "District 2," "District 3," and "District 4" shall have the same meaning as when used in said marketing agreement and order.

(Sec. 5, 49 Stat. 753, as amended; 7 U. S. C. and Sup. 608c)

Done at Washington, D. C., this 18th day of December 1953.

[SEAL] S. R. SMITH,
*Director, Fruit and Vegetable Branch, Production and Marketing Administration.*

PRORATE BASE SCHEDULE

[12:01 a. m., P. s. t., Dec. 20, to 12:01 a. m., P. s. t., Dec. 27, 1953]

[Grapefruit Reg. 190]

PART 933—ORANGES, GRAPEFRUIT, AND TANGERINES GROWN IN FLORIDA

LIMITATION OF SHIPMENTS

§ 933.652 *Grapefruit Regulation 190*—(a) *Findings.* (1) Pursuant to the marketing agreement, as amended, and Order No. 33, as amended (7 CFR Part 933), regulating the handling of oranges, grapefruit, and tangerines grown in the State of Florida, effective under the applicable provisions of the Agricultural Marketing Agreement Act of 1937, as amended, and upon the basis of the recommendations of the committees established under the aforesaid amended marketing agreement and order, and upon other available information, it is hereby found that the limitation of shipments of grapefruit, as hereinafter provided, will tend to effectuate the declared policy of the act.

(2) It is hereby further found that it is impracticable and contrary to the public interest to give preliminary notice, engage in public rule-making procedure, and postpone the effective date of this section until 30 days after publication thereof in the FEDERAL REGISTER (60 Stat. 237; 5 U. S. C. 1001 et seq.) because the time intervening between the date when information upon which this section is based became available and the time when this section must become effective in order to effectuate the declared policy of the act is insufficient; a reasonable time is permitted, under the circumstances, for preparation for such effective time; and good cause exists for making the provisions of this section effective not later than December 21, 1953. Shipments of grapefruit, grown in the State of Florida, are presently subject to regulation by grades and sizes, pursuant to the amended marketing agreement and order, and will so continue until December 21, 1953, the recommendation and supporting information for continued regulation subsequent to December 20 was promptly submitted to the Department after an open meeting of the Growers Administrative Committee on December 15; such meeting was held to consider recommendations for regulation, after giving due notice of such meeting, and interested persons were afforded an opportunity to submit their views at this meeting; the provisions of this section including the effective time of this section, are identical with the aforesaid recommendation of the committee, and information concerning such provisions and effective time has been disseminated among handlers of such grapefruit; it is necessary in order to effectuate the declared policy of the act, to make this section effective during the period hereinafter set forth so as to provide for the continued regulation of the handling of grapefruit; and compliance with this section will not require any special preparation on the part of persons subject thereto which cannot be completed by the effective time of this section.

(b) *Order.* (1) During the period beginning at 12:01 a. m., e. s. t., December 21, 1953, and ending at 12:01 a. m., e. s. t., January 4, 1954, no handler shall ship:

(i) Any white seeded grapefruit, grown in the State of Florida, which do not grade at least U. S. No. 1 Russet;

(ii) Any pink seeded grapefruit, grown in the State of Florida, which do not grade at least U. S. No. 2;

(iii) Any seedless grapefruit, grown in the State of Florida, which do not grade at least U. S. No. 2;

(iv) Any white seeded grapefruit, grown in the State of Florida, which are of a size smaller than a size that will pack 70 grapefruit, packed in accordance with the requirements of a standard pack, in a standard nailed box;

(v) Any pink seeded grapefruit, grown in the State of Florida, which are of a size smaller than a size that will pack 80 grapefruit, packed in accordance with the requirements of a standard pack, in a standard nailed box;

(vi) Any pink seedless grapefruit, grown in the State of Florida, which are of a size smaller than a size that will pack 96 grapefruit, packed in accordance with the requirements of a standard pack, in a standard nailed box;

(vii) Any white seedless grapefruit, grown in the State of Florida, that grade U. S. No. 2 or U. S. No. 2 Bright which are of a size smaller than a size that will pack 80 grapefruit, packed in accordance with the requirements of a standard pack, in a standard nailed box; or

(viii) Any white seedless grapefruit, grown in the State of Florida, that grade U. S. No. 1 Russet, U. S. No. 1, U. S. No. 1 Bronze, U. S. No. 1 Golden, U. S. No. 1 Bright or U. S. Fancy which are of a size smaller than a size that will pack 96 grapefruit, packed in accordance with the requirements of a standard pack, in a standard nailed box

(2) As used in this section, "handler," "ship," and "Growers Administrative Committee," shall have the same meaning as when used in said amended marketing agreement and order; and "U. S. No. 1 Russet," "U. S. No. 1," "U. S. No. 1 Bronze," "U. S. No. 1 Golden," "U. S. No. 1 Bright," "U. S. Fancy," "U. S. No. 2," "U. S. No. 2 Bright," "standard pack," and "standard nailed box" shall have the same meaning as when used in the revised United States Standards for Florida Grapefruit (§§ 51.750 to 51.790 of this title).

(Sec. 5, 49 Stat. 753, as amended; 7 U. S. C. and Sup. 608c)

Done at Washington, D. C., this 16th day of December 1953.

[Orange Reg. 246]

PART 933—ORANGES, GRAPEFRUIT, AND TANGERINES GROWN IN FLORIDA

LIMITATION OF SHIPMENTS

§ 933.653 *Orange Regulation 246*—(a) *Findings.* (1) Pursuant to the marketing agreement, as amended, and Order No. 33, as amended (7 CFR Part 933), regulating the handling of oranges, grapefruit, and tangerines grown in the State of Florida, effective under the applicable provisions of the Agricultural Marketing Agreement Act of 1937, as amended, and upon the basis of the recommendations of the committees established under the aforesaid amended marketing agreement and order, and upon other available information, it is hereby found that the limitation of shipments of all oranges, except Temple oranges, as hereinafter provided, will tend to effectuate the declared policy of the act.

(2) It is hereby further found that it is impracticable and contrary to the public interest to give preliminary notice, engage in public rule-making procedure, and postpone the effective date of this section until 30 days after publication thereof in the FEDERAL REGISTER (60 Stat. 237; 5 U. S. C. 1001 et seq.) because the time intervening between the date when information upon which this section is based became available and the time when this section must become effective in order to effectuate the declared policy of the act is insufficient; a reasonable time is permitted, under the circumstances, for preparation for such effective time; and good cause exists for making the provisions of this section effective not later than December 21, 1953. Shipments of all oranges except Temple oranges, grown in the State of Florida, are presently subject to regulation by grades and sizes, pursuant to the amended marketing agreement and order, and will so continue until December 21, 1953; the recommendation and supporting information for continued regulation subsequent to December 20 was promptly submitted to the Department after an open meeting of the Growers Administrative Committee on December 15; such meeting was held to consider recommendations for regulation, after giving due notice of such meeting and interested persons were afforded an opportunity to submit their views at this meeting; the provisions of this section, including the effective time of this section, are identical with the aforesaid recommendation of the committee, and information concerning such provisions and effective time has been disseminated among handlers of such oranges; it is necessary, in order to effectuate the declared policy of the act, to make this section effective during the period hereinafter set forth so as to provide for the continued regulation of the handling of all oranges, except Temple oranges; and compliance with this section will not require any special preparation on the part of the persons subject thereto which cannot be completed by the effective time of this section.

(b) *Order.* (1) During the period beginning at 12:01 a. m., e. s. t., December 21, 1953, and ending at 12:01 a. m., e. s. t., January 4, 1954, no handler shall ship:

(i) Any oranges, except Temple oranges, grown in the State of Florida, which do not grade at least U. S. No. 1 Russet; or

(ii) Any oranges, except Temple oranges, grown in the State of Florida, which are of a size smaller than $2^{10}/_{16}$ inches in diameter, measured midway at a right angle to a straight line running from the stem to the blossom end of the fruit, except that a tolerance of 10 percent, by count, of oranges smaller than such minimum size shall be permitted, which tolerance shall be applied in ac-

cordance with the provisions for the application of tolerances, specified in the revised United States Standards for Florida oranges (§ 51.1140 of this title): *Provided*, That in determining the percentage of oranges in any lot which are smaller than $2^{10}/_{16}$ inches in diameter, such percentage shall be based only on those oranges in such lot which are of a size $2^{14}/_{16}$ inches in diameter and smaller.

(2) As used in this section, the terms "handler," "ship," and "Growers Administrative Committee" shall each have the same meaning as when used in said amended marketing agreement and order; and the term "U. S. No. 1 Russet" shall have the same meaning as when used in the revised United States Standards for Florida Oranges (§§ 51.1140 to 51.1186 of this title).

(3) Shipments of Temple oranges, grown in the State of Florida, are subject to the provisions of Orange Regulation 244 (§ 933.647; 18 F. R. 7380).

(Sec. 5, 49 Stat. 753, as amended; 7 U. S. C. and Sup. 608c)

Done at Washington, D. C., this 16th day of December 1953.

[SEAL] S. R. SMITH,
*Director, Fruit and Vegetable Branch, Production and Marketing Administration.*

[Lemon Reg. 516]

## PART 953—LEMONS GROWN IN CALIFORNIA AND ARIZONA

### LIMITATION OF SHIPMENTS

§ 953.623 *Lemon Regulation 516*—(a) *Findings.* (1) Pursuant to the marketing agreement, as amended, and Order No. 53, as amended (7 CFR Part 953; 18 F. R. 6767), regulating the handling of lemons grown in the State of California or in the State of Arizona, effective under the applicable provisions of the Agricultural Marketing Agreement Act of 1937, as amended (7 U. S. C. 601 et seq.), and upon the basis of the recommendation and information submitted by the Lemon Administrative Committee, established under the said amended marketing agreement and order, and upon other available information, it is hereby found that the limitation of the quantity of such lemons which may be handled, as hereinafter provided, will tend to effectuate the declared policy of the act.

(2) It is hereby further found that it is impracticable and contrary to the public interest to give preliminary notice, engage in public rule-making procedure, and postpone the effective date of this section until 30 days after publication thereof in the FEDERAL REGISTER (60 Stat. 237; 5 U. S. C. 1001 et seq.) because the time intervening between the date when information upon which this section is based became available and the time when this section must become effective in order to effectuate the declared policy of the act is insufficient, and a reasonable time is permitted, under the circumstances, for preparation for such effective time; and good cause exists for making the provisions of this section effective as hereinafter set forth. Shipments of lemons, grown in the State of California or in the State of Arizona, are currently subject to regulation pursuant to said amended marketing agreement and order; the recommendation and supporting information for regulation during the period specified in this section was promptly submitted to the Department after an open meeting of the Lemon Administrative Committee on December 16, 1953, such meeting was held, after giving due notice thereof to consider recommendations for regulation, and interested persons were afforded an opportunity to submit their views at this meeting; the provisions of this section, including its effective time, are identical with the aforesaid recommendation of the committee, and information concerning such provisions and effective time has been disseminated among handlers of such lemons; it is necessary, in order to effectuate the declared policy of the act, to make this section effective during the period hereinafter specified; and compliance with this section will not require any special preparation on the part of persons subject thereto which cannot be completed by the effective time thereof.

(b) *Order.* (1) The quantity of lemons grown in the State of California or in the State of Arizona which may be handled during the period beginning at 12:01 a. m., P. s. t., December 20, 1953, and ending at 12:01 a. m., P. s. t., December 27, 1953, is hereby fixed as follows:

(i) District 1: 25 carloads;
(ii) District 2: 160 carloads;
(iii) District 3: 15 carloads.

(2) The prorate base of each handler who has made application therefor, as provided in the said amended marketing agreement and order, is hereby fixed in accordance with the prorate base schedule which is attached to Lemon Regulation 515 (18 F. R. 8172) and made a part hereof by this reference.

(3) As used in this section, "handled," "handler," "carloads," "prorate base," "District 1," "District 2," and "District 3," shall have the same meaning as when used in the said amended marketing agreement and order.

(Sec. 5, 49 Stat. 753, as amended; 7 U. S. C. and Sup. 608c)

Done at Washington, D. C., this 17th day of December 1953.

[SEAL] S. R. SMITH,
*Director, Fruit and Vegetable Branch, Production and Marketing Administration.*

[Grapefruit Reg. 93]

## PART 955—GRAPEFRUIT GROWN IN ARIZONA; IN IMPERIAL COUNTY, CALIFORNIA, AND IN THAT PART OF RIVERSIDE COUNTY, CALIFORNIA, SITUATED SOUTH AND EAST OF THE SAN GORGONIO PASS

### LIMITATION OF SHIPMENTS

§ 955.354 *Grapefruit Regulation 93*—(a) *Findings.* (1) Pursuant to the marketing agreement, as amended, and Order No. 55, as amended (7 CFR Part 955), regulating the handling of grapefruit grown in the State of Arizona; in Imperial County, California, and in that part of Riverside County, California, situated south and east of the San Gorgonio Pass, effective under the applicable provisions of the Agricultural Marketing Agreement Act of 1937, as amended, and upon the basis of the recommendations of the Administrative Committee (established under the aforesaid amended marketing agreement and order), and upon other available information, it is hereby found that the limitation of shipments of grapefruit, as hereinafter provided, will tend to effectuate the declared policy of the act.

(2) It is hereby further found that it is impracticable and contrary to the public interest to give preliminary notice, engage in public rule making procedure, and postpone the effective date of this section until 30 days after publication thereof in the FEDERAL REGISTER (60 Stat. 237; 5 U. S. C. 1001 et seq.) because the time intervening between the date when information upon which this section is based became available and the time when this section must become effective in order to effectuate the declared policy of the act is insufficient; a reasonable time is permitted, under the circumstances, for preparation for such effective time; and good cause exists for making the provisions of this section effective not later than December 20, 1953. Shipments of grapefruit, grown as aforesaid, have been subject to regulation by grades and sizes, pursuant to the amended marketing agreement and order, since October 18, 1953, and will so continue until December 20, 1953; the recommendation and supporting information for continued regulation subsequent to December 19, 1953, was promptly submitted to the Department after an open meeting of the Administrative Committee on December 10; such meeting was held to consider recommendations for regulation, after giving due notice of such meeting, and interested persons were afforded an opportunity to submit their views at this meeting; the provisions of this section, including the effective time thereof, are identical with the aforesaid recommendation of the committee, and information concerning such provisions and effective time has been disseminated among handlers of such grapefruit; it is necessary, in order to effectuate the declared policy of the act, to make this section effective during the period hereinafter set forth so as to provide for the continued regulation of the handling of grapefruit; and compliance with this section will not require any special preparation on the part of persons subject thereto which cannot be completed by the effective time of this section.

(b) *Order.* (1) During the period beginning at 12:01 a. m., P. s. t., December 20, 1953, and ending at 12:01 a. m., P. s. t., January 24, 1954, no handler shall ship:

(i) Any grapefruit of any variety grown in the State of Arizona; in Imperial County, California; or in that part of Riverside County, California, situated south and east of the San Gorgonio Pass unless such grapefruit are at least fairly well colored, and otherwise grade at least U. S. No. 2; or

(ii) From the State of California or the State of Arizona (*a*) to any point outside thereof in the United States, any grapefruit, grown as aforesaid, which are of a size smaller than $3^{11}/_{16}$ inches in diameter, or (*b*) to any point in Canada, any grapefruit, grown as aforesaid, which are of a size smaller than $3^{6}/_{16}$ inches in diameter ("diameter" in each case to be measured midway at a right angle to a straight line running from the stem to the blossom end of the fruit), except that a tolerance of 5 percent, by count, of grapefruit smaller than the foregoing minimum sizes shall be permitted which tolerance shall be applied in accordance with the provisions for the application of tolerance, specified in the revised United States Standards for Grapefruit (California and Arizona), §§51.925 to 51.955 of this title: *Provided*, That in determining the percentage of grapefruit in any lot which are smaller than $3^{11}/_{16}$ inches in diameter, such percentage shall be based only on the grapefruit in such lot which are of a size $4^{2}/_{16}$ inches in diameter and smaller; and in determining the percentage of grapefruit in any lot which are smaller than $3^{3}/_{16}$ inches in diameter, such percentage shall be based only on the grapefruit in such lot which are of a size $3^{13}/_{16}$ inches in diameter and smaller.

(2) As used in this section, "handler," "variety," "grapefruit," and "ship" shall have the same meaning as when used in said amended marketing agreement and order; and the terms "U. S. No. 2" and "fairly well colored" shall each have the same meaning as when used in the revised United States Standards for Grapefruit (California and Arizona), §§ 51.925 to 51.955 of this title.

(Sec. 5, 49 Stat. 753, as amended; 7 U. S. C. and Sup. 608c)

Done at Washington, D. C., this 15th day of December 1953.

[SEAL] FLOYD F. HEDLUND,
*Acting Director, Fruit and Vegetable Branch, Production and Marketing Administration.*

## PART 959—IRISH POTATOES GROWN IN THE COUNTIES OF CROOK, DESCHUTES, JEFFERSON, KLAMATH, AND LAKE IN OREGON, AND MODOC AND SISKIYOU IN CALIFORNIA

### LIMITATION OF SHIPMENTS

*Findings.* (1) Pursuant to Marketing Agreement No. 114 and Order No. 59, as amended (7 CFR Part 959), regulating the handling of Irish potatoes grown in the counties of Crook, Deschutes, Jefferson, Klamath, and Lake in the State of Oregon, and Modoc and Siskiyou in the State of California, effective under the applicable provisions of the Agricultural Marketing Agreement Act of 1937, as amended (48 Stat. 31, as amended; 7 U. S. C. 601 et seq.), and upon the basis of the recommendation and information submitted by the Oregon-California Potato Committee, established pursuant to said marketing agreement and amended order, and upon other available information, it is hereby found that the amendment to the limitation of shipments, as hereinafter provided, will tend to effectuate the declared policy of the act.

(2) It is hereby found that it is impracticable and contrary to the public interest to give preliminary notice, engage in public rule making procedure, and postpone the effective date of this amendment until 30 days after publication in the FEDERAL REGISTER (5 U. S. C. 1001 et seq.) in that (i) the time intervening between the date when information upon which this amendment is based became available and the time when this amendment must become effective in order to effectuate the declared policy of the act is insufficient, (ii) more orderly marketing in the public interest, than would otherwise prevail, will be promoted by regulating the shipment of potatoes, in the manner set forth below, on and after the effective date of this amendment, (iii) compliance with this amendment will not require any preparation on the part of handlers which cannot be completed by the effective date, and (iv) information regarding the committee's recommendations has been made available to producers and handlers in the production area.

*Order as amended.* The provisions of § 959.309 (b) (4) and (5) (FEDERAL REGISTER, August 29, October 22, November 10, and December 5, 1953; 18 F. R. 5163, 6697, 7055, 7844), are hereby amended to read as follows:

(4) The limitations set forth in subparagraph (1) of this paragraph shall not be applicable to shipments of potatoes for the following purposes: (i) Grading or storing in the production area, (ii) seed, (iii) canning or freezing, (iv) dehydration, or manufacture or conversion into starch, flour, and alcohol within the production area, (v) charity, and (vi) livestock feed within the production area.

(5) Each handler making shipments of potatoes pursuant to subparagraph (4) of this paragraph shall (except for shipments of potatoes for grading or storing in the production area, and shipments of potatoes for livestock feed within the production area) (i) file an application with the committee pursuant to § 959.130 for permission to make such shipments, (ii) pay assessments on such shipments pursuant to § 959.41, and (iii) have such shipments (except shipments of seed potatoes) inspected pursuant to § 959.60, and for each shipment made pursuant to subdivisions (iii), (iv), and (v) of subparagraph (4) of this paragraph shall furnish a record of shipment applicable thereto to the committee: *Provided*, That each application to ship potatoes made pursuant to subdivisions (iii), (iv), and (v) of subparagraph (4) of this paragraph shall be accompanied by the applicant handler's certification and buyer's certification that the potatoes to be shipped are to be used for the purpose stated in the application; *And provided further*, That each handler agrees in his application to furnish a copy of the bill of lading on each such shipment and to bill each such shipment directly to the applicable processor.

(Sec. 5, 49 Stat. 753, as amended; 7 U. S. C. and Sup. 608c)

Done at Washington, D. C., this 17th day of December 1953, to become effective 12:01 a. m., P. s. t., December 21, 1953.

[SEAL] S. R. SMITH,
*Director, Fruit and Vegetable Branch.*

# TITLE 14—CIVIL AVIATION

## Chapter II—Civil Aeronautics Administration, Department of Commerce

[Amdt. 68]

## PART 608—DANGER AREAS

### ALTERATIONS

The danger area alteration appearing hereinafter has been coordinated with the civil operators involved, the Army, the Navy, and the Air Force, through the Air Coordinating Committee, Airspace Subcommittee, and is adopted to become effective when indicated in order to promote safety of the flying public. Since a military function of the United States is involved, compliance with the notice, procedures, and effective date provisions of section 4 of the Administrative Procedure Act is not required.

Part 608 is amended as follows:

In § 608.61, the Fairbanks, Alaska, area (D-345), published on July 16, 1949, in 14 F. R. 4298, is amended by changing the "Description by Geographical Coordinates" column to read: "Beginning at lat. 64°45'00" N., long. 147°30'00" W.; SE along the S. bank of the Tanana River to lat. 64°43'40" N., long. 147°24'18" W.; ENE. to lat. 64°43'50" N., long. 147°21'14" W.; ESE. to lat. 64°43'00" N., long. 147°17'33" W.; SSE. to lat. 64°37'16" N., long. 147°13'14" W.; SE. along the S. bank of the Tanana River to lat. 64°20'00" N., long. 146°53'00" W.; due W. to the N. bank of Wood River at lat. 64°20'00" N., long. 147°55'00" W.; NW. along the N. bank of Wood River to lat. 64°34'00" N., long. 148°23'00" W.; NE. to lat. 64°45'00" N., long. 147°30'00" W., point of beginning."

(Sec. 205, 52 Stat. 984, as amended; 49 U. S. C. 425. Interprets or applies sec. 601, 52 Stat. 1007, as amended; 49 U. S. C. 551)

This amendment shall become effective on December 15, 1953.

[SEAL] F. B. LEE,
*Administrator of Civil Aeronautics.*

[F. R. Doc. 53-10580; Filed, Dec. 17, 1953; 5:09 p. m.]

## PART 609—STANDARD INSTRUMENT APPROACH PROCEDURES

### ALTERATIONS

The standard instrument approach procedure alterations appearing hereinafter are adopted to become effective when indicated in order to promote safety of the flying public. Compliance with the notice, procedures, and effective date provisions of section 4 of the Administrative Procedure Act would be impracticable and contrary to the public interest, and therefore is not required.

Part 609 is amended as follows:

1. The low frequency range procedures prescribed in § 609.6 are amended to read in part:

LFR STANDARD INSTRUMENT APPROACH PROCEDURE

Bearings, headings, and courses are magnetic. Distances are in statute miles unless otherwise indicated. Elevations and altitudes are in feet, MSL. Ceilings are in feet above airport elevation.
If an LFR instrument approach is conducted at the below named airport, it shall be in accordance with the following instrument approach procedure, unless an approach is conducted in accordance with a different procedure authorized by the Administrator for Civil Aeronautics for such airport. Initial approaches shall be made over specified routes. Minimum altitude(s) shall correspond with those established for en route operation in the particular area or as set forth below.

| City and State; airport name, elevation; facility; class and identification; procedure No.; effective date | Initial approach to facility from— | Course and distance | Minimum altitude (ft.) | Procedure turn (—) side of final approach course (outbound and inbound); altitudes; limiting distances | Minimum altitude over facility on final approach course (ft.) | Course and distance, facility to airport | Ceiling and visibility minimums: Condition | Type aircraft: 75 m. p. h. or less | Type aircraft: More than 75 m. p. h. | If visual contact not established at authorized landing minimums after passing facility within distance specified, or if landing not accomplished |

**3. The instrument landing system procedures prescribed in § 609.11 are amended to read in part:**

ILS STANDARD INSTRUMENT APPROACH PROCEDURE

Bearings, headings, and courses are magnetic. Distances are in statute miles unless otherwise indicated. Elevations and altitudes are in feet, MSL. Ceilings are in feet above airport elevation.
If an ILS instrument approach is conducted at the below named airport, it shall be in accordance with the following instrument approach procedure, unless an approach is conducted in accordance with a different procedure authorized by the Administrator for Civil Aeronautics for such airport. Initial approaches shall be made over specified routes. Minimum altitude(s) shall correspond with those established for en route operation in the particular area or as set forth below:

| City and State; airport name, elevation; facility; class and identification; procedure No.; effective date | Transition to ILS: From— | Transition to ILS: To— | Transition to ILS: Course and distance | Transition to ILS: Minimum altitudes (ft.) | Procedure turn (—) side of final approach course (outbound and inbound); altitudes; limiting distances | Minimum altitude at glide slope intercept-ion inbound (ft.) | Altitude of glide slope and distance to approach end of runway at—: Outer marker | Altitude of glide slope and distance to approach end of runway at—: Middle marker | Ceiling and visibility minimums: Condition | Ceiling and visibility minimums: Type aircraft: 75 m. p. h. or less | Ceiling and visibility minimums: Type aircraft: More than 75 m. p. h. | If visual contact not established upon descent to authorized landing minimums or if landing not accomplished |

VOR STANDARD INSTRUMENT APPROACH PROCEDURE

Bearings, headings, and courses are magnetic. Distances are in statute miles unless otherwise indicated. Elevations and altitudes are in feet, MSL. Ceilings are in feet above airport elevation.
If a VOR instrument approach is conducted at the below named airport, it shall be in accordance with the following instrument approach procedure unless an approach is conducted in accordance with a different procedure authorized by the Administrator for Civil Aeronautics for such airport. Initial approaches shall be made over specified routes. Minimum altitude(s) shall correspond with those established for en route operation in the particular area or as set forth below.

| City and State; airport name, elevation; facility; class and identification; procedure No.; effective date | Initial approach to facility from— | Course and distance | Minimum altitude (ft.) | Procedure turn (—) side of final approach course (outbound and inbound); altitudes; limiting distances | Minimum altitude over facility on final approach course (ft.) | Course and distance facility to airport | Ceiling and visibility minimums: Condition | Ceiling and visibility minimums: Type aircraft: 75 m. p. h. or less | Ceiling and visibility minimums: Type aircraft: More than 75 m. p. h. | If visual contact not established at authorized landing minimums after passing facility within distance specified, or if landing not accomplished |

## TITLE 17—COMMODITY AND SECURITIES EXCHANGES

### Chapter II—Securities and Exchange Commission

PART 239—FORMS PRESCRIBED UNDER THE SECURITIES ACT OF 1933

FORMS FOR REGISTRATION STATEMENTS

The Securities and Exchange Commission has heretofore published for comments and suggestions a proposed revision of Form S-5 (17 CFR 239.15) under the Securities Act of 1933. This form is used for registration of securities under that act by open-end management investment companies which are registered under the Investment Company Act of 1940 on Form N-8B-1 (17 CFR 274.11). All comments and suggestions received have been carefully considered, and the Commission has determined that the proposed revision should be adopted with certain modifications.

A registration statement on Form S-5 (17 CFR 239.15) consists largely of certain of the information and documents which would be required by Form N-8B-1 (17 CFR 274.11) if a registration statement under the 1940 Act were currently being filed on that form. The purpose of the revision is to bring this form into line with the revision of Form N-8B-1. It also permits the use in the prospectus of more concise financial data than has heretofore been required. It is believed that the revision of these forms will simplify registration under both acts and will result in shorter and simpler prospectuses for open-end management investment companies.

The revised Form S-5 (17 CFR 239.15) may be used by any open-end management investment company even though its registration statement under the 1940 Act was filed on Form N-8B-1 (17 CFR 274.11) prior to the revision of that form. In such cases, registrants need only furnish in their registration statement on Form S-5 (17 CFR 239.15) the information and documents specified in that form which would be required if they were currently filing a registration statement under the 1940 Act on the revised Form N-8B-1 (17 CFR 274.11).

The revised Form S-5[1] (17 CFR 239.15) is adopted pursuant to the Securities Act of 1933, particularly sections 7, 10 and 19 (a) thereof. It shall become effective immediately upon publication December 15, 1953, provided that any registration statement filed on Form S-5 (17 CFR 239.15) prior to January 15, 1954, may at the option of the registrant be filed on such form as in effect immediately prior to such effective date.

(Sec. 19, 48 Stat. 85, as amended; 15 U. S. C. 77s)

By the Commission.

[SEAL] NELLYE A. THORSEN, *Assistant Secretary.*

DECEMBER 10, 1953.

[F. R. Doc. 53-10547; Filed, Dec. 18, 1953; 8:47 a. m.]

PART 270—RULES AND REGULATIONS, INVESTMENT COMPANY ACT OF 1940

PREPARATION AND FILING OF REGISTRATION STATEMENTS AND REPORTS

The Securities and Exchange Commission has heretofore published for comments and suggestions certain proposed amendments to its general rules and regulations under the Investment Company Act of 1940. All comments and suggestions received have been carefully considered and the Commission has determined that the amendments should be adopted with certain modifications. The text of the amended rules is set forth below.

The amended rules relate to the preparation and filing of registration statements and reports pursuant to section 8 and 30 (a) of the act. They incorporate into the general rules and regulations certain definitions and other general requirements which have heretofore been contained in the various forms for registration statements and reports. These rules with appropriate changes are in large part patterned after the registration and reporting rules under the Securities Act of 1933 and the Securities Exchange Act of 1934. They replace all existing rules under section 8 of the act.

These amended rules are adopted pursuant to the Investment Company Act of 1940, particularly sections 8, 30 (a) and 38 (a) thereof. They shall become effective immediately upon publication December 15, 1953, provided that any registration statement or report filed prior to January 15, 1954, may, at the option of the company filing such statement or report, comply with such amended rules or with the corresponding rules and regulations as in effect immediately prior to such effective date.

By the Commission.

[SEAL] NELLYE A. THORSEN, *Assistant Secretary.*

DECEMBER 10, 1953.

[1] Filed as part of the original document.

§ 270.8b-1 *Scope of §§ 270.8b-1 to 270.8c-1.* The rules contained in §§ 270.8b-1 to 270.8c-1 shall govern all registration statements pursuant to section 8 of the act, including notifications of registration pursuant to section 8 (a), and all reports pursuant to section 30 (a) or (b) of the act, including all amendments to such statements and reports, except that any provision in a form covering the same subject matter as any such rule shall be controlling.

§ 270.8b-2 *Definitions.* Unless the context otherwise requires, the following terms, when used in the rules contained in §§ 270.8b-1 to 270.8c-1, in the rules under section 30 (a) or (b) of the act or in the forms for registration statements and reports pursuant to section 8 or 30 (a) or (b) of the act, shall have the respective meanings indicated in this section:

*Amount.* The term "amount", when used in regard to securities, means the principal amount if relating to evidences of indebtedness, the number of shares if relating to shares, and the number of units if relating to any other kind of security.

*Certified.* The term "certified", when used in regard to financial statements, means certified by an independent public or independent certified public accountant or accountants.

*Charter.* The term "charter" includes articles of incorporation, declaration of trust, articles of association or partnership, or any similar instrument, as amended, effecting (either with or without filing with any governmental agency) the organization or creation of an incorporated or unincorporated person.

*Employee.* The term "employee" does not include a director, trustee, officer or member of the advisory board.

*Fiscal year.* The term "fiscal year" means the annual accounting period or, if no closing date has been adopted, the calendar year ending on December 31.

*Investment income.* The term "investment income" means the aggregate of net operating income or loss from real estate and gross income from interest, dividends and all other sources, exclusive of profit or loss on sales of securities or other properties.

*Material.* The term "material", when used to qualify a requirement for the furnishing of information as to any subject, limits the information required to those matters as to which an average prudent investor ought reasonably to be informed before buying or selling any security of the particular company.

*Parent.* A "parent" of a specified person is an affiliated person who controls the specified person directly or indirectly through one or more intermediaries.

*Previously filed or reported.* The terms "previously filed" and "previously reported" mean previously filed with, or reported in, a registration statement under section 8 of the act or in a report under section 30 (a) or (b) of the act.

*Share.* The term "share" means a share of stock in a corporation or unit of interest in an unincorporated person.

*Significant subsidiary.* The term "significant subsidiary" means a subsidiary meeting any one of the following conditions:

(1) The value of the investments in and advances to the subsidiary by its parent and the parent's other subsidiaries, if any, exceed 10 percent of the value of the assets of the parent or, if a consolidated balance sheet is filed, the value of the assets of the parent and its consolidated subsidiaries.

(2) The total investment income of the subsidiary or, in the case of a non-investment company subsidiary, the net income exceeds 10 percent of the total investment income of the parent or, if consolidated statements are filed, 10 percent of the total investment income of the parent and its consolidated subsidiaries.

(3) The subsidiary is the parent of one or more subsidiaries and, together with such subsidiaries would, if considered in the aggregate, constitute a significant subsidiary.

*Subsidiary.* A "subsidiary" of a specified person is an affiliated person who is controlled by the specified person, directly or indirectly, through one or more intermediaries.

*Totally-held subsidiary.* The term "totally-held subsidiary" means a subsidiary (1) substantially all of whose outstanding securities are owned by its parent and/or the parent's other totally-held subsidiaries, and (2) which is not indebted to any person other than its parent and/or the parent's other totally-held subsidiaries in an amount which is material in relation to the particular subsidiary, excepting indebtedness incurred in the ordinary course of business which is not over-due and which matures within one year from the date of its creation, whether evidenced by securities or not.

§ 270.8b-3 *Title of securities.* Wherever the title of securities is required to be stated, there shall be given such information as will indicate the type and general character of the securities, including the following:

(a) In the case of shares, the par or stated value, if any; the rate of dividends, if fixed, and whether cumulative or non-cumulative; a brief indication of the preference, if any; and if convertible, a statement to that effect.

(b) In the case of funded debt, the rate of interest; the date of maturity, or if the issue matures serially, a brief indication of the serial maturities, such as "maturing serially from 1950 to 1960"; if the payment of principal or interest is contingent, an appropriate indication of such contingency; a brief indication of the priority of the issue; and if convertible, a statement to that effect.

(c) In the case of any other kind of security, appropriate information of comparable character.

§ 270.8b-4 *Interpretation of requirements.* Unless the context clearly shows otherwise—

(a) The forms require information only as to the company filing the registration statement or report.

(b) Whenever any fixed period of time in the past is indicated, such period shall be computed from the date of filing.

(c) Whenever words relate to the future, they have reference solely to present intention.

(d) Any words indicating the holder of a position or office include persons, by whatever titles designated, whose duties are those ordinarily performed by holders of such positions or offices.

§ 270.8b–10 *Requirements as to proper form.* Every registration statement or report shall be prepared in accordance with the form prescribed therefor by the Commission, as in effect on the date of filing. Any such statement or report shall be deemed to be filed on the proper form unless objection to the form is made by the Commission within thirty days after the date of filing.

§ 270.8b–11 *Number of copies; signatures; binding.* (a) Three complete copies of each registration statement or report, including exhibits and all other papers and documents filed as a part thereof, shall be filed with the Commission.

(b) At least one copy of the registration statement or report shall be manually signed in the manner prescribed by the appropriate form. If the registration statement or report is typewritten, one of the signed copies filed with the Commission shall be the original "ribbon" copy. Unsigned copies shall be conformed. If the signature of any person is affixed pursuant to a power of attorney or other similar authority, a copy of such power of attorney or other authority shall also be filed with the registration statement or report.

(c) Each copy of a registration statement or report filed with the Commission shall be bound in one or more parts, without stiff covers. The bindings shall be made on the left-hand side and in such manner as to leave the reading matter legible.

§ 270.8b–12 *Requirements as to paper, printing and language.* (a) Registration statements and reports shall be filed on good quality unglazed, white paper, 8½ x 13 inches in size, insofar as practicable. However, tables, charts, maps, and financial statements may be on larger paper if folded to that size.

(b) The registration statement or report and, insofar as practicable, all papers and documents filed as a part threeof, shall be printed, lithographed, mimeographed, or typewritten. However, the registration statement or report or any portion thereof may be prepared by any similar process which, in the opinion of the Commission, produces copies suitable for a permanent record. Irrespective of the process used, all copies of any such material shall be clear, easily readable and suitable for repeated photo-copying. Debits in credit categories and credits in debit categories shall be designated so as to be clearly distinguishable as such on photocopies.

(c) The body of all printed registration statements and reports shall be in roman type at least as large as ten-point modern type. However, to the extent necessary for convenient presentation, financial statements and other statistical or tabular data and the notes thereto may be in roman type at least as large as eight-point modern type. All type shall be leaded at least two points.

(c) Registration statements and reports shall be in the English language. If any exhibit or other paper or document filed with a registration statement or report is in a foreign language, it shall be accompanied by a translation into the English language.

§ 270.8b–13 *Preparation of registration statement or report.* The registration statement or report shall contain the numbers and captions of all items of the appropriate form, but the text of the items may be omitted provided the answers thereto are so prepared as to indicate to the reader the coverage of the items without the necessity of his referring to the text of the items or instructions thereto. However, where any item requires information to be given in tabular form, it shall be given in substantially the tabular form specified in the item. All instructions, whether appearing under the items of the form or elsewhere therein, are to be omitted from the registration statement or report. Unless expressly provided otherwise, if any item is inapplicable or the answer thereto is in the negative, an appropriate statement to that effect shall be made.

§ 270.8b–14 *Riders; inserts.* Riders shall not be used. If the registration statement or report is typed on a printed form, and the space provided for the answer to any given item is insufficient, reference shall be made in such space to a full insert page or pages on which the item number and caption and the complete answer are given.

§ 270.8b–15 *Amendments.* All amendments shall be filed under cover of the facing sheet of the appropriate form, shall be clearly identified as amendments, and shall comply with all pertinent requirements applicable to registration statements and reports. Amendments shall be filed separately for each separate registration or report amended.

§ 270.8b–20 *Additional information.* In addition to the information expressly required to be included in a registration statement or report, there shall be added such further material information, if any, as may be necessary to make the required statements, in the light of the circumstances under which they are made, not misleading.

§ 270.8b–21. *Information unknown or not available.* Information required need be given only insofar as it is known or reasonably available to the registrant. If any required information is unknown and not reasonably available to the registrant, either because the obtaining thereof would involve unreasonable effort or expense, or because it rests peculiarly within the knowledge of another person not affiliated with the registrant, the information may be omitted subject to the following conditions:

(a) The registrant shall give such information on the subject as it possesses or can acquire without unreasonable effort or expense, together with the sources thereof.

(b) The registrant shall include a statement either showing that unreasonable effort or expense would be involved or indicating the absence of any affiliation with the person within whose knowledge the information rests and stating the result of a request made to such person for the information.

§ 270.8b–22 *Disclaimer of control.* If the existence of control is open to reasonable doubt in any instance, the registrant may disclaim the existence of control and any admission thereof; in such case, however, the registrant shall state the material facts pertinent to the possible existence of control.

§ 270.8b–23 *Incorporation by reference.* (a) Matter contained in any part of a registration statement or report, other than exhibits, may be incorporated by reference in answer or partial answer to any item of the statement or report. Matter contained in an exhibit may be so incorporated to the extent permitted in § 270.8b–24 (Rule N-8B–24).

(b) Any financial statement filed with the Commission pursuant to any act administered by the Commission may be incorporated by reference in a registration statement or report, filed with the Commission by the same or any other person, if it substantially conforms to the requirements of the form on which the statement or report is filed.

(c) Material incorporated by reference shall be clearly identified in the reference. An express statement that the specified matter is incorporated by reference shall be made at the particular place in the registration statement or report where the information is required. Matter shall not be incorporated by reference in any case where such incorporation would render the statement incomplete, unclear or confusing.

§ 270.8b–24 *Summaries or outlines of documents.* Where an item requires a summary or outline of the provisions of any document, only a brief statement shall be made, in succinct and condensed form, as to the most important provisions of the document. In addition to such statement, the summary or outline may incorporate by reference particular items, sections, or paragraphs of any exhibit and may be qualified in its entirety by such reference. Matter contained in an exhibit may be incorporated by reference in answer to an item only to the extent permitted by this section.

§ 270.8b–25 *Extension of time for furnishing information.* If it is impractical to furnish any required information, document or report at the time it is required to be filed, there may be filed with the Commission as a separate document an application (a) identifying the information, document or report in question, (b) stating why the filing thereof at the time required is impracticable, and (c) requesting an extension of time for filing the information, document or report to a specified date not more than 60 days after the date it would otherwise have to be filed. The application shall be deemed granted unless the Commission, within 10 days after receipt thereof, shall enter an order denying the application. Section 270.0–5 (Rule N-5) shall not apply to such applications.

§ 270.8b–30 *Additional exhibits.* A company may file such exhibits as it may desire, in addition to those required by the appropriate form. Such exhibits shall be so marked as to indicate clearly the subject matters to which they refer.

§ 270.8b–31 *Omission of substantially identical documents.* In any case where two or more indentures, contracts, franchises, or other documents required to be filed as exhibits are substantially identical in all material respects except as to the parties thereto, the dates of execution, or other details, copies of only one of such documents need be filed, with a schedule identifying the other documents omitted and setting forth the material details in which such documents differ from the documents filed. The Commission may at any time in its discretion require the filing of copies of any documents so omitted.

§ 270.8b–32 *Incorporation of exhibits by reference.* (a) Any document or part thereof filed with the Commission pursuant to any act administered by the Commission may be incorporated by reference as an exhibit to any registration statement or report filed with the Commission by the same or any other person.

(b) If any modification has occurred in the text of any document incorporated by reference since the filing thereof, a statement containing the text of such modification and the date thereof shall be filed with the reference.

§ 270.8c–1 *Previously filed material.* A company which has securities registered under the Securities Act of 1933 may, in filing a registration statement under the Investment Company Act of 1940, incorporate by reference any information, financial statement or exhibit contained in (a) its most recent currently effective registration statement under the Securities Act of 1933, (b) the most recent prospectus filed under that act, or (c) any report filed pursuant to section 15 (d) of the Securities Exchange Act of 1934, provided a copy of such registration statement, prospectus or report is filed with each copy of the registration statement under the Investment Company Act of 1940.

(Sec. 38, 54 Stat. 841; 15 U. S. C. 80a–37. Interpret or apply secs. 8, 30, 54 Stat. 803, 841; 15 U. S. C. 80a–8, 80a–29)

---

PART 274—FORMS PRESCRIBED UNDER THE INVESTMENT COMPANY ACT OF 1940

REGISTRATION STATEMENT OF MANAGEMENT INVESTMENT COMPANY

The Securities and Exchange Commission has heretofore published for comments and suggestions a proposed revision of Form N-8B–1 (17 CFR 274.11) under the Investment Company Act of 1940. This form is prescribed for registration statements filed under the act by all management investment companies except those which issue periodic payment plan certificates. All comments and suggestions received have been carefully considered, and the Commission has determined that the revised form should be adopted, with certain modifications.

This is the first general revision of this form since it was adopted in 1941. The revision reflects the experience gained over the intervening years and takes into consideration the fact that the form is now used chiefly by newly organized management investment companies. Much of the historical information relating to the operation of companies which were in existence at the time of the adoption of the Investment Company Act is no longer of importance and, hence, the requirements for the furnishing of such information have been omitted. The resulting form is considerably simplified and should result in less work in the preparation of registration statements thereon.

Management investment companies which have previously filed a registration statement on Form II-8B–1 (17 CFR 274.11) are not required to refile on the revised form. However, any such company will be permitted, at its option, to file a statement on the revised form in lieu of its next annual report on Form N-30A–1 (17 CFR 274.101). Any company which elects to file such a statement may, of course, incorporate by reference any required financial statements or exhibits previously filed so that the work involved will thereby be considerably reduced.

The revised Form N-8B–1[1] (17 CFR 274.11) is adopted pursuant to the Investment Company Act of 1940, particularly sections 8 and 38 (a) thereof. It shall become effective immediately upon publication December 15, 1953, provided that any registration statement filed on Form N-8B–1 (17 CFR 274.11) prior to January 15, 1954, may at the option of the registrant be filed on such form as in effect immediately prior to such effective date.

(Sec. 38, 54 Stat. 841; 15 U. S. C. 80a–37)

By the Commission.

NELLYE A. THORSEN,
*Assistant Secretary.*

DECEMBER 10, 1953.

## TITLE 47—TELECOMMUNICATION

### Chapter I—Federal Communications Commission

[Docket No. 10591]

PART 3—RADIO BROADCAST SERVICES

STANDARDS OF GOOD ENGINEERING PRACTICE CONCERNING STANDARD BROADCAST STATIONS

*Correction*

In Federal Register Document 53–10318, appearing at page 8137 of the issue for Friday, December 11, 1953, the following change should be made: In section 4, A, (3) the word "prevent" should read "present".

## TITLE 15—COMMERCE AND FOREIGN TRADE

### Chapter III—Bureau of Foreign Commerce, Department of Commerce

Subchapter B—Export Regulations

[6th Gen. Rev. of Export Regs., Amdt. P. L. 64 [1]]

PART 399—POSITIVE LIST OF COMMODITIES AND RELATED MATTERS

MISCELLANEOUS AMENDMENTS

Section 399.1 *Appendix A—Positive List of Commodities* is amended in the following particulars:

1. The following commodities are added to the Positive List:

| Dept. of Commerce Schedule B No. | Commodity | Unit | Processing code and related commodity group | GLV dollar value limits | Validated license required |
|---|---|---|---|---|---|
| | Electrical apparatus, n. e. c., and parts, n. e. c. (specify by name): | | | | |
| 709998 | Thermistors [1] | No. | RARA | 10 | RO |
| | Industrial manufacturing and service-industries machines, n. e. c., and specially fabricated parts, n. e. c. (specify by name): | | | | |
| 775998 | Assembling jigs, and fixtures and accessories therefor, for military equipment (report jigs and fixtures for machine tools under 744383). [1] | ---------- | GIEQ | None | RO |

[1] These commodities may be exported under Foreign Distribution (FD), license (see Part 378 of this subchapter), and, effective January 25, 1954, are subject to the IC/DV requirements (see § 373.2 of this subchapter).

[2] These commodities may be exported under the Periodic Requirements licensing procedure (see Part 376 of this subchapter), and, effective January 25, 1954, are subject to the IC/DV requirements (see § 373.2 of this subchapter).

This part of the amendment shall become effective as of 12:01 a. m., December 17, 1953.

2. The following commodities are deleted from the Positive List:

| Dept. of Commerce Schedule B No. | Commodity |
|---|---|
| | Logs, bolts, and hewn timber: |
| 401700 | Port Orford cedar logs (including Lawson's cypress). |

This part of the amendment shall become effective as of December 10, 1953.

3. The revised entries set forth below are substituted for entries presently on the Positive List. Where the Positive List contains more than one entry under a single Schedule B number, the entry to be superseded is identified by a numerical reference enclosed in parentheses following the commodity description in the revised entry.

| Dept. of Commerce Schedule B No. | Commodity | Unit | Processing code and related commodity group | GLV dollar value limits | Validated license required |
|---|---|---|---|---|---|
| | Platinum and allied metals: | | | | |
| 692205 | Wire of platinum, rhodium platinum, or iridium platinum of a thickness of 0.5 mm or less.[22] | T. oz. | MINL | 25 | RO |
| 709909 | Parts, n. e. c., specially fabricated for electronic and cathode-ray tubes, n. e. c., including commercial, industrial, and radio and television transmitting tubes (specify by name). (3) [18] | ---------- | RARA 51 | 100 | RO |
| 709909 | Parts, n. e. c., specially fabricated for radio and television receiving tubes (specify by name). (3) [1] | ---------- | RARA 51 | 10 | RO |
| | Power-driven metalworking machine tools (non-portable), and parts: | | | | |
| 740005 | Engine lathes, except bench and light duty types (specify types).[13] | No. | TOOL | 500 | RO |
| 740315 | Automatic screw (bar) machines [13] | No. | TOOL | 500 | RO |
| 740607 | Pipe- and/or nipple-threading machines [13] | No. | TOOL | 500 | RO |
| 740607 | Tapping machines, vertical multiple spindle, adjustable joint.[13] | No. | TOOL | 500 | RO |
| 740700 | Knee- and column-type milling machines (specify type).[13] | No. | TOOL | 500 | RO |
| 746010 | Portable machine tools so designed that they must be attached to the work they operate.[13] | ---------- | TOOL | 250 | R |
| 766970 | Industrial process indicating (measuring), recording and/or controlling instruments, n. e. c., and specially fabricated parts, n. e. c. ★ The commodities described in this Positive List entry are excepted from the provisions of General In-Transit License GIT. See § 371.9 (c) of this subchapter.

[1] The G.L.V. dollar-value limit is increased.

[7] The letter "A" is added in the column headed "Commodity Lists", indicating that the commodity is subject to the IC/DV procedure (see § 373.2 of this subchapter), effective January 25, 1954.

[9] The letter "A" is deleted in the column headed "Commodity Lists", indicating that the commodity is no longer subject to the IC/DV procedure (see § 373.2 of this subchapter).

[10] The letter "B" is deleted in the column headed "Commodity Lists", indicating that the commodity is no longer subject to DL restrictions (see § 374.2 of this subchapter), and is no longer excepted from the Time Limit licensing procedure (see Part 377 of this subchapter).

[11] The letter "D" is added in the column headed "Commodity Lists", indicating that the commodity may be exported under the Periodic Requirements licensing procedure (see Part 376 of this subchapter).

[13] The letter "F" is added in the column headed "Commodity Lists", indicating that the commodity may be exported under the Foreign Distribution licensing procedure (see Part 378 of this subchapter).

[14] The letter "F" is deleted in the column headed "Commodity Lists", indicating that the commodity may no longer be exported under the Foreign Distribution licensing procedure (see Part 378 of this subchapter), effective January 9, 1954.

[18] The commodity description is revised without substantive change.

[19] The unit of quantity is changed.

[21] The commodity is no longer excepted from the provisions of General In-Transit License GIT (see § 371.9 (c) of this subchapter).

[22] The effect of this revision is to delete all other forms of platinum and alloys, including scrap.

[24] The requirement to specify working pressure is added.

[26] The effect of this revision is to remove compounds or mixtures containing bacitracin, neomycin, polymixin, and tyrothricin.

[26] The effect of this revision is to remove antibiotic feed supplements containing bacitracin, neomycin, polymixin, and tyrothricin.

[27] The requirement to specify grade is removed for licensing purposes.

This part of the amendment shall become effective as of December 10, 1953, unless otherwise indicated in the footnotes.

Shipments of any commodities removed from general license to Country Group R or Country Group O destinations as a result of changes set forth in Item 1 of this amendment, which were on dock, on lighter, laden aboard an exporting carrier, or in transit to a port of exit pursuant to actual orders for export prior to 12:01 a. m., December 17, 1953, may be exported under the previous general license provisions up to and including January 9, 1954. Any such shipment not laden aboard the exporting carrier on or before January 9, 1954, requires a validated license for export.

## TITLE 33—NAVIGATION AND NAVIGABLE WATERS

### Chapter I—Coast Guard, Department of the Treasury

Subchapter A—General

[CGFR 53–38]

PART 8—REGULATIONS, UNITED STATES COAST GUARD RESERVE

PHYSICAL EXAMINATIONS AND STANDARDS

By virtue of the authority contained in the act of July 9, 1952 (66 Stat. 481), the following amendments are hereby prescribed and shall become effective upon publication in the FEDERAL REGISTER.

1. Section 8.1401 is amended to read as follows:

§ 8.1401 *Physical standards*—(a) *Officers.* The standards for appointment and retention of Reserve officers and for the enlistment of officer candidates shall be the same as those prescribed for officers of the Regular Coast Guard.

(b) *Enlisted personnel.* The standards for enlistment, reenlistment, and retention of Reserve enlisted personnel other than officer candidates shall be the same as those prescribed for enlisted personnel of the Naval Reserve.

2. Section 8.1402 is amended to read as follows:

§ 8.1402 *Waiver of physical defects.* (a) Physical defects not considered to be sufficiently serious to interfere with the performance of general or special duties to which a Reservist or an applicant for membership in the Reserve is likely to be assigned may be waived by the Commandant. Once such defects have been waived either prior or subsequent to the effective date of this amendment, additional waivers shall not be required for the same defects provided that the degree thereof has not materially increased, and if a Reservist is

otherwise physically qualified, such defects shall not prevent him from being reenlisted or promoted.

(b) In determining the physical qualifications of a Reservist or an applicant for membership in the Reserve, due consideration shall be given to an individual's age, prior military service, educational background, civilian occupational skill, and the character of the duty to which the member may be assigned in the event he should be ordered to active duty pursuant to law.

(c) A Reservist or applicant for membership in the Reserve who has been found not physically qualified may submit a request for waiver of physical defects to the Commandant via official channels. In each such case, the District Commander shall make recommendations in the premises.

(d) A Reservist who is granted a waiver under this section may be placed in a limited duty status category in the discretion of the Commandant.

3. Section 8.1403 is amended to read as follows:

§ 8.1403 *Persons authorized to conduct physical examinations.* (a) Physical examinations of Reservists and of applicants for appointment or enlistment shall, if practicable, be conducted by a board of at least two medical officers of the U. S. Public Health Service. If impracticable to assemble such a board, physical examinations shall be conducted by one medical officer of the U. S. Public Health Service. If such a medical officer is unavailable, physical examinations may be conducted by one medical officer of any component of the Armed Forces. In special cases, physical examinations may be conducted by a medical officer of the Veterans' Administration or by a reputable civilian physician.

(b) A Reservist whose duties involve flying shall be given a flight physical examination commensurate with the type of duty to be performed by medical officers of the U. S. Public Health Service who have qualified as flight surgeons or aviation medical examiners or by medical officers of any branch of the Armed Forces including the Reserve components thereof, who are authorized to conduct such examinations.

(c) All reports of physical examinations of Reservists shall be reviewed by the Chief Medical Officer, together with the medical history of the Reservist on file at Headquarters.

4. Section 8.1405 is amended to read as follows:

§ 8.1405 *Persons required to take physical examinations.* (a) All applicants for appointment or enlistment in the Reserve are required to take a physical examination prior to becoming a member thereof and must be found physically qualified or must have physical defects waived.

(b) All Reservists are required to take a physical examination at the times specified in § 8.1406.

5. Section 8.1406 is amended to read as follows:

§ 8.1406 *When physical examinations are required.* (a) Except for members of the Retired Reserve and members whose names are carried on a retired list, all Reservists not on active duty shall be required to take a physical examination only at the following times:

(1) *Quadrennially.* At least once during each 4 year period, a physical examination must be accomplished. Such 4 year period shall be considered as having commenced on the day following the date upon which the last complete physical examination was conducted. District Commanders will ascertain when Reservists under their jurisdiction will become due for quadrennial physical examination. They will notify Reservists concerned at least 60 days in advance of the dates on which they will become due for such examination.

(2) *Upon notification of promotion.* This subparagraph applies only to Reserve officers. In the event the officer concerned has taken and passed a complete physical examination approved by the Commandant within one year prior to notification, the Commandant may waive physical examination and require instead submission of the certificate of physical condition provided for in § 8.1408.

(3) *Prior to or upon reporting for active duty in excess of 7 days.* This physical examination will not be accomplished prior to 30 days in advance of the reporting date.

(4) *Upon release from active duty in excess of 7 days.*

(5) *Upon reenlistment or extension of enlistment.* The District Commander concerned may waive this requirement. However, in such cases, a physical examination shall be accomplished as soon after reenlistment or extension of enlistment as is practicable and in any event must be accomplished within the 4 year period prescribed in subparagraph (1) of this paragraph.

(6) *Annually or biannually for pilots.* A Reserve pilot authorized to perform duty involving actual control of aircraft shall have satisfactorily passed a flight physical examination within 12 months immediately preceding the actual control of aircraft if he is a member of an organized unit under the jurisdiction of the Chief of Naval Air Reserve Training, or is a member of an organized unit training at a Coast Guard Air Station; otherwise the interval between flight physical examinations shall be 6 months.

(7) *When indicated under § 8.1404 (a).*

(8) *Upon special notification.* Special examinations and examinations by boards of medical survey may be ordered by the Commandant as required or at the request of a Reservist to determine his physical fitness.

(b) Reservists on active duty shall undergo physical examinations in accordance with requirements for personnel of the Regular Coast Guard.

6. A new § 8.1407 is hereby added as follows:

§ 8.1407 *Completeness of physical examinations.* (a) Except as provided in paragraph (b) of this section, all physical examinations of Reservists shall be complete in every respect and required reports shall be submitted to the Commandant.

(b) Physical examinations conducted pursuant to paragraphs (a) (3) and (4) of § 8.1406 need not be extensive provided the period of active duty is not in excess of 30 days and provided the Reservist is found qualified for duty and release therefrom. They shall, however, be sufficient for the medical examiner to determine whether or not the individual is physically qualified to perform duties assigned, and is or is not free from infectious or contagious disease. Each Reservist so examined shall be required to execute a certificate of physical condition at the time each examination is conducted. The results of these examinations need only be entered upon the Reservist's orders and no other report will be required if he is found to be physically qualified. In the event that a Reservist is found not physically qualified or if injury, sickness, or disease was incurred while performing active duty, a complete physical examination shall be accomplished and required reports shall be submitted.

(c) A Reservist whose duties involve flying shall be given a physical examination commensurate with the type of flying duties to be performed.

7. A new § 8.1408 is hereby added as follows:

§ 8.1408 *Certificate of physical condition.* Except for members of the Retired Reserve and members whose names are carried on a retired list, each Reservist not on active duty is required to submit a certificate of physical condition annually in such form and at such time as the Commandant shall determine.

8. A new § 8.1409 is hereby added as follows:

§ 8.1409 *Reports and records of physical examinations.* (a) The results of every complete physical examination shall be entered in the individual's health record and will become a part of his medical history.

(b) Except as provided for in § 8.1407 (b), the results of every physical examination shall be reported to the Commandant on such forms and in such manner as he may require.

(c) A report of physical examination for appointment or enlistment shall accompany each candidate's application.

9. A new § 8.1410 is hereby added as follows:

§ 8.1410 *Disposition of Reservists found not physically qualified.* (a) If, as a result of any physical examination, a Reservist is found not physically qualified and if the defects can be corrected by medical treatment, such Reservist shall be afforded a reasonable length of time, not above one year, in which to have the defects satisfactorily corrected. During the period granted for correction of such defects, the Commandant may restrict such Reservist from engaging in such training activities as he may deem to be in the best interests of the service.

(b) If, as a result of any physical examination, a Reservist is found not physically qualified and if the defects cannot be corrected by medical treatment and are not waived, or if, being correctible, the defects are not corrected within the time allowed, such Reservist shall be afforded an opportunity to request transfer to the Retired Reserve or a retired list, if qualified. If he is found to be qualified and he elects transfer to the Retired Reserve or a retired list, he shall be so transferred. If he is not so transferred, the Commandant may institute proceedings to effect discharge.

(c) The report of physical examination in cases under paragraphs (a) and (b) of this section shall be accompanied by recommendation of the District Commander.

(d) Notwithstanding any other provisions of the regulations in this part, a Reserve officer who has been or may hereafter be honorably discharged solely by reason of being found not physically qualified for active service and whose physical condition did not result from his own misconduct may be reappointed within one year from the date of discharge in the same rank or grade in which discharged and with the same date of rank as that previously held provided that the defects which disqualified such officer have been corrected satisfactorily or waived by the Commandant.

10. A new § 8.1411 is hereby added as follows:

§ 8.1411 *Failure to appear for physical examination or to submit information concerning physical condition.* (a) Except as provided in paragraph (b) of this section, failure of Reservists to appear for a physical examination or failure to submit information concerning their physical condition when required may result, in the discretion of the Commandant, in the institution of proceedings to effect discharge.

(b) A Reservist having an unfulfilled service obligation pursuant to section 4 (d) (1) or 4 (d) (3) of the Universal Military Training and Service Act, as amended, and who fails to appear for a physical examination or who fails to submit needed information concerning his physical condition when required, after every reasonable attempt has been made to accomplish the same, may be involuntarily ordered to active duty or active duty for training by the Commandant pursuant to section 233 (c) of the act of July 9, 1952 (66 Stat. 490) during which tour of duty a physical examination shall be accomplished or the needed information secured.

11. A new § 8.1412 is hereby added as follows:

§ 8.1412 *Immunization.* When directed by the Commandant, Reservists shall be immunized against certain diseases in accordance with established practices of the Regular Coast Guard except as may be necessary to adapt the same to the Reserve.

12. A new § 8.1413 is hereby added as follows:

§ 8.1413 *Temporary members of the Reserve.* The provisions of §§ 8.1401 to 8.1413, inclusive, shall not apply to temporary members of the Reserve. The physical examinations and standards for such members shall be as prescribed by the Commandant.

(Sec. 251, 66 Stat. 495)

## PART 8—REGULATIONS, UNITED STATES COAST GUARD RESERVE

### ASSIGNMENT TO RETIRED RESERVE

By virtue of the authority contained in the act of July 9, 1952 (66 Stat. 481), the following amendment is hereby prescribed and shall become effective upon publication in the FEDERAL REGISTER.

A new § 8.4406 is hereby added as follows:

§ 8.4406 *Assignment to Retired Reserve.* (a) Except as provided by paragraph (e) of this section, the following members of the Coast Guard Reserve shall, upon their application, be placed in or transferred to the Retired Reserve by the Commandant and their names shall be placed upon a Coast Guard Reserve Retired List established by § 8.1106 (c):

(1) Reservists who have completed a total of twenty years of honorable service in any component of the Armed Forces or Armed Forces without component including those Reserve components enumerated in section 306 (c) of Title III of the act of June 29, 1948, as amended (62 Stat. 1087).

(2) Reservists who have been found physically disqualified for active duty as a result of a service-connected disability regardless of total years of service and regardless of age. This subparagraph shall be liberally applied and shall be extended to all cases in which there is any reasonable relationship between military service and disability.

(3) Reservists who have been retired or granted retired pay under any provision of law.

(4) Reservists who have attained the age of 62 years regardless of length of service unless retained until age 64 pursuant to law.

(b) Except as provided by paragraph (e) of this section, the following members of the Coast Guard Reserve may, upon their application, be placed in or transferred to the Retired Reserve by the Commandant and if so transferred, their names shall be placed upon a Coast Guard Reserve Retired List established by § 8.1106 (c):

(1) Reservists who, having attained the age of 37 years, have completed a minimum of eight years of satisfactory federal service as defined in section 302 (b) of Title III of the act of June 29, 1948, as amended (62 Stat. 1087).

(2) Reservists who, having attained the age of 37 years, have completed a minimum of eight years of satisfactory federal service as defined in section 306 (b) of Title III of the act of June 29, 1948 as amended (62 Stat. 1087), provided they have served honorably on active duty in time of war or national emergency for at least six months.

(3) Reservists who have been found physically disqualified for active duty or Reserve officers who have attained the years in age and grade as indicated in the following table:

| | |
|---|---|
| Commander | 58 |
| Lieutenant Commander | 52 |
| Lieutenant | 46 |
| Lieutenant (junior grade) | 40 |
| Ensign | 40 |
| Commissioned warrant officer | 40 |
| Warrant officer | 40 |

Provided they meet one of the following requirements:

(i) Honorable service on active duty between April 6, 1917 and November 11, 1918, or between September 9, 1940 and December 31, 1946, or between December 16, 1950 and a terminal date to be fixed by the Commandant.

(ii) At least ten years of honorable service.

(iii) Hold a combat award.

(iv) Have qualifications that could usefully be employed on active duty in a capacity consistent with the physical disability.

(v) Have other extraordinary considerations which would justify transfer to the Retired Reserve.

(c) Notwithstanding any other provisions of the regulations in this part, the following former members of the Coast Guard Reserve may, upon their application and upon the recommendation of the Commandant, be reappointed or reenlisted in the same rank or rate with the date of rank or rate in which they were previously separated: *Provided,* That simultaneously with the submission of such application they apply for and are found to be qualified for immediate placement in the Retired Reserve. To be found qualified for such placement, they must meet one of the conditions prescribed in paragraphs (a) and (b) of this section as of the date of their last separation from the Reserve. The names of persons so reappointed or reenlisted shall be placed upon a Coast Guard Reserve Retired List established by § 8.1106 (c):

(1) Former members who, because of their failure to meet the prescribed physical standards in effect at the time of separation, were involuntarily separated or not offered reenlistment or reappointment.

(2) Former members whose separation was effected by reason of attainment of the statutory age limit in effect at the time of separation.

(d) Upon placement in or transfer to the Retired Reserve, a Reservist's name shall be placed on a Coast Guard Reserve Retired List in his permanent grade, or in the highest temporary grade in which

he served satisfactorily as determined by the Commandant, unless entitled to be retired in a higher grade according to law.

(e) A member may be discharged in lieu of placement in or transfer to the Retired Reserve even though he meets one or more of the requirements contained in this section if the Commandant determines, upon the recommendation of a board of officers convened pursuant to section 249 of the act of July 9, 1952 (66 Stat. 495), that his separation from the Coast Guard Reserve is desirable and warranted based upon his entire record of service.

(f) Placement in or transfer to the Retired Reserve is a permanent change in status and of itself does not entitle the Reservist to receive retired pay. Once assigned to the Retired Reserve, personnel are not eligible for reassignment to the Ready or Standby Reserve and their retired status may be changed only by resignation, discharge, or dismissal.

(Sec. 251, 66 Stat. 495)

## TITLE 46—SHIPPING

### Chapter I—Coast Guard, Department of the Treasury

[CGFR 53-56]

Subchapter P—Manning of Vessels

PART 157—MANNING REQUIREMENTS

Subchapter Q—Specifications

PART 160—LIFESAVING EQUIPMENT

MANNING OF VESSELS; SPECIFICATION FOR BUOYANT APPARATUS AND LIFE FLOATS

A notice regarding proposed regulations regarding enforcement of Officers' Competency Certificates Convention, 1936, manning of vessels, and proposed changes in the specification for buoyant apparatus and life floats was published in the FEDERAL REGISTER dated September 9, 1953, 18 F. R. 5432, 5435, as Items III, XXVII, and XXVIII on the agenda to be considered by the Merchant Marine Council, and a public hearing was held by the Merchant Marine Council on September 29, 1953, in Washington, D. C. No comments were received proposing changes in the proposed regulations.

The new regulations designated 46 CFR Subpart 157.18, containing §§ 157.18-1 to 157.18-15, inclusive, provide that every master or person in charge of a vessel subject to R. S. 4438a, as amended (46 U. S. C. 224a), or the Officers' Competency Certificates Convention, 1936, shall file with the Collector of Customs a complete list of the officers employed aboard the vessel upon application for final clearance for a foreign port or for an applicaton for a permit to touch and trade. A vessel subject to other provisions of the shipping laws which submits a crew list on Form CG-710A will not have to submit a separate list setting forth the identification of the officers. The new regulations also describe the vessels subject to these requirements, authorize the Collector of Customs or the Coast Guard District Commander to detain any vessel which he has reason to believe is not in compliance with R. S. 4438a, as amended (46 U. S. C. 224a), or the Officers' Competency Certificates Convention, 1936, and sets forth the procedures for an appeal to the Commandant, United States Coast Guard, whose decision in each case is final in effect. These regulations are based on Item III of the agenda.

The amendment to 46 CFR 157.30-30 clarifies the requirements for licensed operators of motorboats carrying passengers for hire and deletes reference to R. S. 4426, as amended (46 U. S. C. 404). This regulation requires a licensed motorboat operator for every motorboat carrying passengers for hire. This amendment is based on Item XXVII of the agenda.

The amendment to 46 CFR 160.010-7 (e) permits the use of beam loading tests as an alternate to the drop test for balsa wood buoyant apparatus of the peripheral body type. The drop test will still be required in all cases for pre-approval samples and samples from production lots of buoyant apparatus made from materials other than balsa wood. The amendments to 46 CFR 160.027-1 (a) (2), 160.027-4 (a) revise references to military specifications and bring up to date editorially the specification for life floats. The amendment to 46 CFR 160.027-7 (e) permits the use of beam loading tests as an alternate to the drop test for balsa wood life floats. The drop tests will still be required in all cases of pre-approval samples and samples from production lots of life floats made from materials other than balsa wood. These amendments are based on Item XXVIII of the agenda.

By virtue of the authority vested in me as Commandant, United States Coast Guard, by Treasury Department Order No. 120, dated July 31, 1950 (15 F. R. 6521), to promulgate rules and regulations in accordance with the statutes cited with the regulations below, the following amendments to the regulations are prescribed which shall become effective thirty days after publication of this document in the FEDERAL REGISTER.

1. Part 157 is amended by adding a new Subpart 157.18, consisting of §§ 157.18-1 to 157.18-15, inclusive, reading as follows:

SUBPART 157.18—OFFICERS' COMPETENCY CERTIFICATES CONVENTION, 1936

Sec.
157.18-1 Vessels subject to requirements of this subpart.
157.18-5 Detention of vessel.
157.18-10 Right of appeal.
157.18-15 Filing lists of officers with Collector of Customs.

AUTHORITY: §§ 157.18-1 to 157.18-15 issued under R. S. 4405, as amended, 4462, as amended; 46 U. S. C. 375, 416. Interpret or apply R. S. 4438a, as amended; 46 U. S. C. 224a; E. O. 10402, Oct. 30, 1952, 17 F. R. 9917; 3 CFR, 1952 Supp.

§ 157.18-1 *Vessels subject to requirements of this subpart.* (a) Paragraph (1) of R. S. 4438a, as amended (46 U. S. C. 224a), states:

(1) That the Officers' Competency Certificates Convention, 1936 (International Labor Organization Draft Convention Numbered 53, "concerning the minimum requirement of professional capacity for masters and officers on board merchant ships"), as ratified by the President on September 1, 1938, with understandings appended, and this section shall apply to all vessels, however propelled, navigating on the high seas, which are registered, enrolled and licensed, or licensed under the laws of the United States, whether permanently, temporarily, or provisionally, including yachts enrolled and licensed, or licensed, with the exception of—

(a) Ships of war;

(b) Government vessels, or vessels in the service of a public authority, which are not engaged in trade;

(c) Wooden ships of primitive build, such as dhows and junks;

(d) Unrigged vessels;

(e) All vessels of less than two hundred gross tons.

(b) All vessels subject to R. S. 4438a, as amended (46 U. S. C. 224a) are subject to the requirements of this subpart.

(c) Foreign vessels to which the Officers' Competency Certificates Convention, 1936, applies are subject to the requirements in this subpart when within the jurisdiction of the United States.

§ 157.18-5 *Detention of vessel.* (a) The Collector of Customs, or the Coast Guard District Commander, by written order served upon the master or person in charge of a vessel, may detain any vessel which he has reason to believe is not in compliance with the requirements of R. S. 4438a, as amended (46 U. S. C. 224a), until he is satisfied that all officers employed aboard such vessel, who are required to be licensed, either by the Coast Guard (in the case of a vessel of the United States), or by the Officers' Competency Certificates Convention, 1936 (in the case of a vessel of a foreign nation which is signatory to such Convention) are in possession of the required licenses. If a vessel is detained by a written order of a Coast Guard District Commander, he should give immediate notice of such detention to the Collector of Customs from whose port the vessel will either clear or secure a permit to touch and trade in order that clearance or the issuance of a permit to touch and trade may be withheld.

(b) In the case of detention of a foreign vessel to which Officers' Competency Certificates Convention, 1936, applies, the Collector of Customs or the Coast Guard District Commander ordering such detention should immediately notify the Consul of the country in which the offending vessel is registered.

§ 157.18-10 *Right of appeal.* Whenever a vessel is detained, the master may appeal, within five days to the Commandant, U. S. Coast Guard, who may, after investigation, affirm, set aside, or modify the order of detention.

§ 157.18-15 *Filing lists of officers with Collector of Customs.* The master of any vessel of the United States subject to the provisions of R. S. 4438a, as amended (46 U. S. C. 224a), and any foreign vessel belonging to a nation signatory to the Officers' Competency Certificates Convention, 1936, shall, upon application for final clearance for foreign port or upon application for a permit to touch and trade, file with the Collector of Customs a complete list of the officers employed aboard the vessel and the service number and description of license held by each officer.

2. Section 157.30-30 is amended to read as follows:

§ 157.30-30 *Licensed operators for motorboats.* (a) Every motorboat, as defined by the Motorboat Act of April 25, 1940, as amended (54 Stat. 163, 165, 166; 46 U. S. C. 526, 526f, 526p), while carrying passengers for hire, whether the motorboat is certificated or not, shall be operated or navigated by a person duly licensed for such service by the Coast Guard.

(R. S. 4405, as amended, 4462, as amended; 46 U. S. C. 375, 416. Interpret or apply 54 Stat. 165, 166, as amended; 46 U. S. C. 526f, 526p; E. O. 10402, Oct. 30, 1952, 17 F. R. 9917, 3 CFR 1952 Supp.)

3. Section 160.010-7 (e) is amended to read as follows:

§ 160.010-7 *Methods of sampling, inspections and tests.* • • •

(e) *Strength test.* Drop or launch the complete sample buoyant apparatus into still water from a height of 60 feet. Test all air compartments, if any, in accordance with paragraph (f) of this section. There shall be no damage affecting the serviceability of the apparatus for the purpose intended. Upon application from the manufacturer, consideration will be given to the use of a beam loading test in lieu of the drop test for samples from production lots of balsa wood buoyant apparatus of the peripheral-body type.

(R. S. 4405, as amended, 4462, as amended; 46 U. S. C. 375, 416. Interpret or apply R. S. 4417a, 4426, 4488, 4491, as amended, 49 Stat. 1544, 54 Stat. 346, sec. 5, 55 Stat. 244, 245, as amended; 46 U. S. C. 391a, 404, 474, 489, 1333; 50 U. S. C. App. 1275; E. O. 10402, Oct. 30, 1952, 17 F. R. 9917, 3 CFR 1952 Supp.)

4. Section 160.027-1 (a) (2) is amended to read as follows:

§ 160.027-1 *Applicable specifications and plans*—(a) *Specifications.* • • •

(2) *Military specification.*

MIL-F-16143A—Floats, life (Balsa Wood).

5. Section 160.027-4 (a) is amended to read as follows:

§ 160.027-4 *Balsa wood body life floats.* (a) Life floats having a balsa wood buoyant body shall be constructed as illustrated by Coast Guard Drawing 160.027-4; or in cases where the dimensions of the body section are suitably increased to provide at least 40 pounds per person buoyancy, they may be constructed as illustrated by Navy Department, Bureau of Ships, Drawings S8200-860050 and S8200-860051 and in accordance with the provisions of section 3 of Specification MIL-F-16143A.

6. Section 160.027-7 (e) is amended to read as follows:

§ 160.027-7 *Methods of sampling, inspections, and tests.* • • •

(e) *Strength test.* Drop or launch the complete sample life float into still water from a height of 60 feet twice, once flat and once endwise. Test all air compartments, if any, in accordance with paragraph (f) of this section. There shall be no damage to the body of the float, or other damage affecting the serviceability of the float for the purpose intended. On samples from production lots of balsa wood body type life floats beam loading tests in accordance with paragraph 4.5.3.2 of Specification MIL-F-16143A will be acceptable as an alternate to the drop tests described in this paragraph.

(R. S. 4405, as amended, 4462, as amended; 46 U. S. C. 375, 416. Interpret or apply R. S. 4417a, 4426, 4481, 4488, 4491, as amended, 49 Stat. 1544, 54 Stat. 346, sec. 5, 55 Stat. 244, 245, as amended; 46 U. S. C. 391a, 404, 474, 481, 489, 1333; 50 U. S. C. App. 1275; E. O. 10402, Oct. 30, 1952, 17 F. R. 9917, 3 CFR, 1952 Supp.)

Dated: December 15, 1953.

[SEAL] MERLIN O'NEILL,
*Vice Admiral, U. S. Coast Guard, Commandant.*

# PROPOSED RULE MAKING

## DEPARTMENT OF THE TREASURY

### Internal Revenue Service

### [ 26 CFR Parts 29, 39 ]

INCOME TAX; TAXABLE YEAR BEGINNING AFTER DECEMBER 31, 1941 AND DECEMBER 31, 1951, RESPECTIVELY

PERSONAL HOLDING COMPANIES

Notice is hereby given, pursuant to the Administrative Procedure Act, approved June 11, 1946, that the regulations set forth in tentative form below are proposed to be prescribed by the Commissioner of Internal Revenue, with the approval of the Secretary of the Treasury. Prior to the final adoption of such regulations, consideration will be given to any data, views, or arguments pertaining thereto which are submitted in writing in duplicate to the Commissioner of Internal Revenue, Washington 25, D. C., within the period of 30 days from the date of publication of this notice in the FEDERAL REGISTER. The proposed regulations are to be issued under the authority contained in sections 62 and 3791 of the Internal Revenue Code (53 Stat. 32, 467; 26 U. S. C. 62, 3791).

[SEAL] O. GORDON DELK,
*Acting Commissioner of Internal Revenue.*

Regulations 111 and 118 are hereby amended by striking therefrom § 29.505-2 (26 CFR 29.505-2) and § 39.505-2 (26 CFR 39.505-2), respectively, constituting an illustration of the computation of subchapter A net income, undistributed subchapter A net income, and surtax, in the case of a personal holding company.

[F. R. Doc. 53-10571; Filed, Dec. 18, 1953; 8:53 a. m.]

## DEPARTMENT OF AGRICULTURE

### Production and Marketing Administration

### [ 7 CFR Part 51 ]

SHELLED ENGLISH WALNUTS (JUGLANS REGIA)[1]

U. S. STANDARDS

Notice is hereby given that the United States Department of Agriculture is considering the issuance of United States Standards for Shelled English Walnuts (Juglans regia) under the authority contained in the Agricultural Marketing Act of 1946 (60 Stat. 1087; 7 U. S. C. 1621 et seq.) and the Department of Agriculture Appropriation Act, 1954 (Pub. Law 156, 83d Cong., approved July 28, 1953) to supersede United States Standards for Shelled English Walnuts (Juglans regia) effective September 30, 1939.

All persons who desire to submit written data, views or arguments for consideration in connection with the proposed standards should file the same with E. E. Conklin, Chief, Fresh Products Standardization and Inspection Branch, Fruit and Vegetable Division, Agricultural Marketing Service, United States Department of Agriculture, South Building, Washington 25, D. C., not later than 5:30 p. m., e. s. t., on the thirtieth day after the date of publication of this notice in the FEDERAL REGISTER.

The proposed standards are as follows:

GENERAL

Sec.
51.2275 General.

GRADES

51.2276 U. S. No. 1.
51.2277 U. S. Commercial.

UNCLASSIFIED

51.2278 Unclassified.

[1] Packing of the product in conformity with the requirements of these standards shall not excuse failure to comply with the provisions of the Federal Food, Drug, and Cosmetic Act.

TOLERANCES FOR GRADE DEFECTS

Sec.
51.2279 Tolerances for grade defects.

COLOR REQUIREMENTS

51.2280 Color classifications.
51.2281 Tolerances for color.
51.2282 Off color.

SIZE REQUIREMENTS

51.2283 Size classifications.
51.2284 Tolerances for size.

APPLICATION OF TOLERANCES

51.2285 Application of tolerances.

DEFINITIONS

51.2286 Well dried.
51.2287 Clean.
51.2288 Shell.
51.2289 Insect injury.
51.2290 Rancidity.
51.2291 Damage.
51.2292 Serious damage.
51.2293 Very serious damage.
51.2294 Half kernel.
51.2295 Three-fourths half kernel.

GENERAL

§ 51.2275 *General.* The walnut color chart[2] to which reference is made in §§ 51.2280 and 51.2281 has been prepared by the United States Department of Agriculture as a part of these standards.

GRADES

§ 51.2276 *U. S. No. 1.* U. S. No. 1 consists of portions of walnut kernels which are well dried, clean, free from shell, foreign material, insect injury, decay, rancidity, and free from damage caused by shriveling, mold, discoloration of the meat or other means. (See § 51.2279.)

(a) Color shall be specified in connection with this grade in terms of one of the color classifications. (See §§ 51.2275, 51.2280 and 51.2281.)

(b) Size shall be specified in connection with this grade in terms of one of the size classifications. (See §§ 51.2283 and 51.2284.)

§ 51.2277 *U. S. Commercial.* U. S. Commercial consists of portions of walnut kernels which meet the requirements of U. S. No. 1 grade, except for increased tolerances. (See § 51.2279.)

(a) Color of walnuts in this grade shall be not darker than "amber" classification, and color need not be specified. However, color may be specified in connection with the grade in terms of one of the color classifications. (See §§ 51.2275, 51.2280 and 51.2281.)

(b) Size shall be specified in connection with this grade in terms of one of the size classifications. (See §§ 51.2283 and 51.2284.)

[2] The walnut color chart was filed with these United States Standards for Shelled English Walnuts and is available for inspection in the Division of the Federal Register or in the Fruit and Vegetable Division, United States Department of Agriculture, South Building, Washington 25, D. C.

UNCLASSIFIED

§ 51.2278 *Unclassified.* Unclassified consists of portions of walnut kernels which have not been classified in accordance with either of the foregoing grades. The term "unclassified" is not a grade within the meaning of these standards, but is provided as a designation to show that no grade has been applied to the lot.

TOLERANCES FOR GRADE DEFECTS

§ 51.2279 *Tolerances for grade defects.* (a) All percentages shall be calculated on the basis of weight.

(b) In order to allow for variations, other than for color and size, incident to proper grading and handling, tolerances shall be permitted for the respective grades as indicated in Table I:

TABLE I

| Grade | Tolerances for grade defects | | | |
|---|---|---|---|---|
| | Total defects | Serious damage | Very serious damage | Shell and foreign material |
| | *Percent* | *Percent* | *Percent* | *Percent* |
| U. S. No. 1 | 5 | 2 (Included in 5 percent total defects.) | 1 (Included in 2 percent serious damage.) | 0.05 (Included in 1 percent very serious damage.) |
| U. S. Commercial | 8 | 4 (Included in 8 percent total defects.) | 2 (Included in 4 percent serious damage.) | .05 (Included in 2 percent very serious damage.) |

COLOR REQUIREMENTS

§ 51.2280 *Color classifications.* The following classifications are provided to describe the color of any lot: "Extra Light", "Light", "Light Amber" or "Amber". The portions of kernels in the lot shall not be darker than the darkest shades of color permitted in the specified classification as shown on the color chart.

§ 51.2281 *Tolerances for color.* (a) All percentages shall be calculated on the basis of weight.

(b) In order to allow for variations incident to proper grading and handling, tolerances shall be permitted for the respective color classifications as indicated in Table II:

TABLE II

| Color classification | Tolerances for color | | | |
|---|---|---|---|---|
| | Darker than extra light[1] | Darker than light[1] | Darker than light amber[1] | Darker than amber[1] |
| | *Percent* | *Percent* | *Percent* | *Percent* |
| Extra light | 15 | (Included in 15 percent darker than extra light) 15 | 2 (Included in 15 percent darker than light) 2 | (Included in 15 percent darker than light amber.) 15 |
| Light | | | | |
| Light amber | | | | |
| Amber | | | | |

[1] See illustration of this term on color chart.

§ 51.2282 *Off color.* The term "off color" is not a color classification, but shall be applied to any lot which fails to meet the requirements of the "Amber" classification.

SIZE REQUIREMENTS

§ 51.2283 *Size classifications.* The following classifications are provided to describe the size of any lot: "Halves", "Halves and Pieces", "Pieces" or "Small Pieces". The size of portions of kernels in the lot shall conform to the requirements of the specified classification as defined below:

(a) *Halves.* Lot consists of 85 percent or more, by weight, half kernels, and the remainder three-fourths half kernels. (See § 51.2284.)

(b) *Halves and pieces.* Lot consists of 20 percent or more, by weight, half kernels, and the remainder portions of kernels that cannot pass through a sieve with $^{24}/_{64}$ inch round openings. When a lot exceeds this minimum requirement, the actual percentage of halves may be specified. (See § 51.2284.)

(c) *Pieces.* Lot consists of portions of kernels that cannot pass through a sieve with $^{24}/_{64}$ inch round openings. (See § 51.2284.)

(d) *Small pieces.* Lot consists of portions of kernels that pass through a sieve with $^{24}/_{64}$ inch round openings, but that cannot pass through a sieve with $^{8}/_{64}$ inch round openings. When desired, the actual size ranges within such size ranges may be specified. (See § 51.2284.)

§ 51.2284 *Tolerances for size.* (a) All percentages shall be calculated on the basis of weight.

(b) In order to allow for variations incident to proper sizing and handling, tolerances shall be permitted for the respective size classifications as indicated in Table III.

TABLE III

| Size classification | Tolerances for size | | | | |
|---|---|---|---|---|---|
| | Smaller than three-fourths halves | Will not pass through $^{24}/_{64}$ inch round hole | Pass through $^{24}/_{64}$ inch round hole | Pass through $^{16}/_{64}$ inch round hole | Pass through $^{8}/_{64}$ inch round hole |
| | *Percent* | *Percent* | *Percent* | *Percent* | *Percent* |
| Halves | 5 | | | 1 (Included in 5 percent) | |
| Halves and pieces[1] | | | 18 | 3 (Included in 18 percent.) | 1 (Included in 3 percent.) |
| Pieces | | | 25 | 5 (Included in 25 percent.) | 1 (Included in 5 percent.) |
| Small pieces[2] | | 10 | | | 2 |

[1] No part of any tolerance shall be used to reduce the percentage of halves required or specified in a lot of "halves and pieces".
[2] The tolerances of 10 percent and 2 percent for "small pieces" classification shall apply, respectively, to any smaller maximum or any larger minimum sizes specified.

APPLICATION OF TOLERANCES

§ 51.2285 *Application of tolerances.* All tolerances for the standards shall be applied to the entire lot, and a composite sample shall be taken for determining the grade. However, any container or group of containers in which the walnuts are found to be substantially inferior to those in the majority of the containers shall be considered as a separate lot.

DEFINITIONS

§ 51.2286 *Well dried.* "Well dried" means that the portion of kernel is firm and crisp, not pliable or leathery.

§ 51.2287 *Clean.* "Clean" means that the appearance of the individual portion of kernel, or of the lot as a whole, is not materially affected by adhering dust, dirt or other foreign material.

§ 51.2288 *Shell.* "Shell" means the outer shell and/or the woody partition from between the halves of the kernel, and any fragments of either.

§ 51.2289 *Insect injury.* "Insect injury" means that the insect, web, frass or other evidence of insects is present on the portion of kernel.

§ 51.2290 *Rancidity.* "Rancidity" means that the portion of kernel is noticeably rancid to the taste. Rancidity should not be confused with a slightly astringent flavor of the pellicle (skin) or with staleness (the stage at which the flavor is flat but not objectionable).

§ 51.2291 *Damage.* "Damage" means any defect, other than color, or any combination of defects which materially affects the appearance, or the edible or shipping quality of the individual portion of kernel, or of the lot as a whole. Any one of the following shall be considered as damage:

(a) Shriveling when more than one-eighth of the portion of kernel is severely shriveled, or a greater area is affected by lesser degrees of shriveling producing an equally objectionable appearance, except that kernels which are thin in in cross-section but which are otherwise normally developed shall not be considered as shriveled;

(b) Mold when plainly visible;

(c) Discoloration of the meat when more than one-eighth of the meat of the portion of kernel is severely discolored, or a greater area of the meat is affected by lesser degrees of discoloration producing an equally objectionable appearance;

(d) Not well dried; and

(e) Not clean.

§ 51.2292 *Serious damage.* "Serious damage" means any defect, other than color, or any combination of defects which seriously affects the appearance, or the edible or shipping quality of the individual portion of kernel or of the lot as a whole. Any one of the following shall be considered as serious damage:

(a) Shriveling when more than one-fourth of the kernel is severely shriveled, or a greater area is affected by lesser degrees of shriveling producing an equally objectionable appearance;

(b) Mold when plainly visible on more than one-eighth of the surface of the kernel in the aggregate; and

(c) Discoloration of the meat when more than one-fourth of the meat of the portion of kernel is severely discolored, or a greater area of the meat is affected by lesser degrees of discoloration producing an equally objectionable appearance.

§ 51.2293 *Very serious damage.* "Very serious damage" means any defect, other than color, or any combination of defects which very seriously affects the appearance, or the edible or shipping quality of the individual portion of kernel or of the lot as a whole. Any one of the following shall be considered as very serious damage:

(a) Shriveling when more than 50 percent of the portion of kernel is severely shriveled;

(b) Mold when plainly visible on more than one-fourth of the surface of the portion of kernel in the aggregate;

(c) Discoloration of the meat when more than 50 percent of the meat of the portion of kernel is severely discolored;

(d) Insect injury;

(e) Rancidity or decay; and

(f) Shell, or any foreign material.

§ 51.2294 *Half kernel.* "Half kernel" means the separated half of a kernel with not more than one-eighth broken off.

§ 51.2295 *Three-fourths half kernel.* "Three-fourths half kernel" means a portion of a half of a kernel which has more than one-eighth but not more than one-fourth broken off.

Done at Washington, D. C., this 15th day of December 1953.

[SEAL] GEORGE A. DICE,
*Deputy Assistant Administrator, Production and Marketing Administration.*

## [ 7 CFR Part 728 ]

WHEAT

NOTICE OF FORMULATION OF REGULATIONS RELATING TO DETERMINATION OF COUNTY NORMAL YIELDS

Pursuant to the authority contained in the Agricultural Adjustment Act of 1938, as amended, the Secretary of Agriculture is preparing to formulate regulations for determining county normal yields of wheat for the 1954 crop. Section 301 (b) (13) of the act provides for the determination of county normal yields by taking the average yield per acre of wheat for the county during the ten calendar years immediately preceding the year in which such normal yield is determined and adjusting such average yield for abnormal weather conditions and trends in yields. Provision is also made that if for any year of the ten-year period the data are not available or there is no actual yield an appraised yield for such year shall be determined in accordance with regulations issued by the Secretary of Agriculture.

Prior to the issuance of regulations for determining county normal yields, including the appraising of the yields for years for which data are not available or in which there was no actual yield, consideration will be given to data, views, and recommendations pertaining thereto which are submitted in writing to the Director, Grain Branch, Commodity Stabilization Service (formerly Production and Marketing Administration), United States Department of Agriculture, Washington 25, D. C. All written submissions must be postmarked not later than seven days after the date of publication of this notice in the FEDERAL REGISTER.

Issued at Washington, D. C., this 17th day of December 1953.

[SEAL] HOWARD H. GORDON,
*Administrator.*

## [ 7 CFR Part 949 ]

[Docket No. AO-232-A-2]

HANDLING OF MILK IN SAN ANTONIO, TEXAS, MARKETING AREA

DECISION WITH RESPECT TO PROPOSED AMENDMENTS TO TENTATIVE MARKETING AGREEMENT AND TO ORDER, AS AMENDED

Pursuant to the provisions of the Agricultural Marketing Agreement Act of 1937, as amended (7 U. S. C. 601 et seq.), and the applicable rules of practice and procedure, as amended, governing pro-

ceedings to formulate marketing agreements and marketing orders (7 CFR Part 900), a public hearing was conducted at San Antonio, Texas, on August 26, 1952, November 5, 1952, and May 21, 1953 (18 F. R. 2860).

Upon the basis of the evidence introduced at the hearing and the record thereof, the Assistant Administrator, Production and Marketing Administration, on August 20, 1953, filed with the Hearing Clerk, United States Department of Agriculture, his recommended decision and opportunity to file written exceptions thereto which was published in the FEDERAL REGISTER on August 26, 1953 (18 F. R. 5088).

Within the period reserved for exceptions the producers' association and certain handlers filed exceptions to certain of the findings, conclusions and actions recommended by the Assistant Administrator. In arriving at the findings, conclusions, and regulatory provisions of this decision, each of such exceptions was carefully and fully considered in conjunction with the record evidence pertaining thereto. Certain of the exceptions referred to situations associated with anticipated conditions. If experience proves any of the provisions herein decided upon to be inadequate to accomplish their intended purposes it will be necessary to review the conditions effective in the market at a subsequent hearing.

To the extent that the findings, conclusions, and actions decided upon herein are at variance with the exceptions, such exceptions are overruled.

The material issues of record are concerned with the following:

1. The establishment of standards which a plant must meet in order to be recognized as a pool plant fully subject to the order.
2. The need for provisions relative to unpriced milk.
3. The extension of the marketing area.
4. The need for price incentives to encourage more uniform production.
5. Miscellaneous changes.

*Findings and conclusions.* The following findings and conclusions on the material issues are based upon the evidence introduced at the hearing and the record thereof:

1. *Basis of pooling.* A market-wide pooling system, such as is in effect in the San Antonio market for distributing market proceeds from producer milk, is characterized by provisions which require equalization of returns from all sales of regulated milk in the marketing area. Each handler is required to pay for producer milk at the prices applicable to the class in which he uses such milk. Through the equalization process all producers who supply milk to regulated handlers are paid the same minimum blend or uniform price, with proper adjustment for differences in the butterfat tests for milk. A two-fold purpose is served by this method of distributing returns to producers. There is an equal sharing of the higher returns for the total market Class I sales and of the lower returns realized from the disposition of reserve or Class II milk. The uniform price which represents the blend value of all producer milk received and disposed of for all purposes in the market, therefore, depends upon which handlers are included in the pool and the utilization such handlers make of milk received from producers.

Equalization is carried out through a pooling process by which handlers pay for their milk at class prices in accordance with its use. Money so collected is redistributed among handlers to enable them to make uniform payments to producers from whom they have received milk. Involved in the equalization of sales and redistribution of funds is the question as to the appropriate scope of pooling. Since the production of high quality milk required by consumers involves extra care and expense, it is important that the amount of milk produced under Grade A standards be no more than the minimum necessary to supply the market. To encourage more than enough production of such milk would represent an economic waste, since the expenditures incurred in producing Grade A milk not essential to the market supply would result in no value to consumers.

One of the problems, then, under the market-wide pool is to determine the standards for identifying the plants which constitute an essential and regular part of the market supply, so as to assure the sharing of Class I sales among only those producers who furnish their milk to such plants. Class I prices must first be set as nearly as possible at the minimum levels which will encourage the necessary amount of milk production and the resulting returns should be distributed in such a way as to assure the market of the maximum supply of quality milk which can be obtained at these prices. In order to do this, provision should be made that equalization of market sales should be made only to plants meeting reasonable performance standards with respect to supplying their milk to the market.

Under the present provisions of the order, any person who operates a milk plant, which is approved by the appropriate health authority of the marketing area for the processing of Grade A milk, and from which Grade A milk is disposed of on retail or wholesale routes in the marketing area, is a handler. All handlers, except producer-handlers, who so distribute any quantity of Class I milk are subject to full regulation under the order, and must be and are included in the market-wide pool. If minimum producer prices which a handler must pay are to be fixed, then his sales and producer payments must be equalized with all other handlers for whom such prices are fixed.

Since the market-wide pool results in the payment of producers on the average utilization for the market, the individual handler is relieved of any responsibility for maintaining a high Class I utilization in order to support his pay rates to producers. Whatever utilization of milk a handler may have, his rate of pay to producers will be the same as that of all other handlers in the market. Under the present order, it is possible for any approved plant to make distribution of a small quantity of milk in the marketing area and share in the market-wide pool. Thus, the market-wide pool provides both opportunity and incentive for any distributor, wherever located, to sell a token quantity of milk in the San Antonio market if such distributor had a relatively low percentage utilization as Class I milk in relation to the market average. He would then draw money from the equalization fund of the pool, thereby reducing the price received by regular market producers. This is commonly called "riding the pool." Without some performance standards, such plants may enter the market whenever it is advantageous to do so for the sole purpose of "riding the pool." Such dissipation of returns from the sale of Class I milk would not be in the interest of either producers, handlers, or consumers in the San Antonio market.

Plants selling primarily to other markets or plants shipping milk on an opportunity basis to any market where supplies happen to be short do not represent reliable sources of milk upon which the San Antonio market may depend. If such plants were allowed to sell a token quantity of milk in the San Antonio marketing area whenever their Class I sales were low and then withdraw when their Class I sales were high as compared with receipts, the result would be that the in-and-out handler would be able to gain advantage in paying producers. The San Antonio market would have no compensating gain from the payment of equalization to such a handler. Such a distribution of equalization payments would, in fact, reduce the blend prices to producers regularly supplying the market and thereby have an adverse effect on the milk supplies upon which the market depends. This could result in the need for higher Class I prices than would otherwise be required.

Performance standards should be such that any distributor who has a substantial function in the supplying of milk to the market would pool his sales and share in the market-wide equalization. On the other hand, distributors only casually or incidentally associated with the market should not be subject to complete regulation, nor should they be permitted or required to equalize their sales with all handlers in the San Antonio market. If distributors are to be permitted to share on a pro rata basis the Class I utilization of the entire market because of token shipments without being genuinely associated with the market, then the money paid by users of Class I milk would be subject to dissipation without accomplishing the intended purpose. This might very well happen under the present order since the only qualifications such a plant would be required to meet would be compliance with health department standards of any of the various authorities having jurisdiction in the marketing area. The mere circumstances of having health department approval is not sufficient justification for equalizing sales of such a distributor with the market. Health authorities should not be placed in a position of determining which plants

should share in equalization. There is no reason to assume that a health department would refuse an application for approval because it had determined that the milk from the applicant's plant was not entitled to pool with the market or that such standards as might be applied by the health authority for this purpose would be appropriate to effectuate the declared policy of the act.

For these reasons, provision should be made in the order that a distributor must dispose of not less than 15 percent of his total receipts of approved milk from dairy farmers on retail or wholesale routes in the marketing area in order to be included in the market-wide pool and share in the equalization of market sales. The performance standard herein provided is designed to accomplish the objective as set forth above. On the basis of evidence available, it appears that it should accomplish such objective. If actual operating experience proves it inadequate, the standard should be revised on the basis of such experience. Such a standard should apply uniformly to all milk distributors. Any plant, regardless of its location, should have equal opportunity to comply with the standard and thereby participate in the market-wide pool and have its producers share in Class I sales of the market. Any producer who meets the appropriate health department requirements should be permitted under the order to sell his milk to plants meeting the standard of qualification. Whether or not distributors or producers choose to supply the San Antonio market will depend on the economic circumstances with which they are confronted, such as prices, transportation costs, and alternative outlets.

Evidence in the record indicates that the plants included in the pool under the order during May 1953 may be considered as associated with the market and entitled to pool. A very large percentage of the Class I sales of regulated handlers now goes to outlets in the marketing area. Although the record does not show the exact portion of Class I sales in the marketing area of each handler now included in the pool, it is possible that some handlers may need to watch their operations to insure continued eligibility to pool. It is concluded that to require a handler to dispose of 15 percent of his receipts from approved dairy farmers as Class I sales in the marketing area is the minimum which should be established to achieve the objectives of such a provision and that such a requirement is necessary and reasonable. In order to allow plant operators time for making any adjustments which may be necessary as a result of such an amendment to the order, provision is made that if plants regulated under the order during May 1953 make application to the market administrator for designation as pool plants, such designation will be made for a six-month period after the effective date of any amendment issued pursuant to this decision, provided that such plant continues to distribute Class I milk in the marketing area.

2. *Provisions relative to unpriced milk.* A large volume of milk is customarily purchased by San Antonio handlers from sources other than producers. Such milk comes from plants scattered throughout a wide area. Although much of this milk is assigned to Class I use, it is not priced under the San Antonio order. Aside from the provision of the order requiring prior allocation of producer milk to Class I, the purchase and sale of such milk is not affected by the order program. The handler may obtain such milk whenever and wherever he can. The price he pays and the utilization he makes of the milk are not regulated in any way by the order.

Experience has proven, however, that the operations of handlers in the San Antonio market in obtaining and selling unpriced milk for Class I purposes have, at times, jeopardized the effectiveness of the classification and pricing program of the order. The volume of milk which handlers have accepted from producers has been less each month since the inception of the order than the total Class I disposition. In April 1953, which was the month of lowest imports shown on the record, approximately 6 percent of Class I sales were allocated to other source milk. In spite of this fact, the record discloses that handlers refused, during at least part of the month of April, to accept some of the milk produced by their regular producers or milk offered for sale by other potential producers. Some producers were required to keep part of their milk at home during part of this period and dispose of it as best they could. Some of the producers who had milk refused were informed that the handler to whom they delivered had enough milk for his Class I needs and any increased production above a base period average would not be accepted. The cooperative association of producers, as well as producers themselves, tried unsuccessfully to place this milk with other handlers in the market.

The record discloses, also, that handlers have largely discontinued a long-standing practice of seeking new producers and assisting them in undertaking the production of graded milk. One handler representative testified that it would be possible to secure a substantial number of new producers if conditions were such that it was feasible to take on such producers. Failure to develop new producers could soon result in serious reductions in the flow of producer milk. There is a normal turnover among producers which represents a substantial proportion of the total production.

Evidence in the record indicates that the major reason why producer milk was refused by at least some handlers and why new production was not encouraged even though the market was short was the fact that surplus milk was temporarily available from other fluid markets at a cost less than that for Class I producer milk. Handlers purchasing this other source milk on a short term basis at a saving compared to producer Class I milk are able to underbid handlers using producer milk for contract sales, and to jeopardize generally the position of producer prices and all Class I sales in the market.

The record evidence indicates that a large share, if not all, of the supplemental milk obtained by handlers during several weeks prior to the hearing was seasonal surplus milk from other markets. The evidence indicates that such milk will not be available to the San Antonio market when seasonal shortages again occur. It indicates, also, that the alternative outlet for such milk, if not sold to San Antonio handlers, would be to manufacture Class II products.

The purchase and sale of such milk in the San Antonio market is disrupting the orderly marketing of milk. It is interfering also with the stated purpose of the act, namely, to fix prices which will insure a sufficient quantity of pure and wholesome milk.

The prices fixed under the order clearly cannot be effective in encouraging a production of milk which is appropriate to the needs of the market if handlers can circumvent these prices by purchasing surplus milk from other markets for Class I use. To raise the Class I price would provide additional incentive for handlers to obtain such milk and encourage them to refuse producer milk whenever low priced milk was available from other sources. To lower the Class I price would reduce blend prices and discourage production of milk for the market.

If some handlers purchase unpriced milk for Class I use at a lesser cost than producer milk, then those handlers using producer milk will be placed temporarily at a competitive disadvantage. This tends to be disruptive to the orderly marketing of milk and, in the San Antonio market, has given handlers the incentive to curtail their purchases of producer milk.

It is a well recognized fact that a minimum amount of milk in excess of actual Class I disposition is necessary to operate a fluid milk business. Because of a seasonal fluctuation in production not matched by seasonal changes in consumption, this excess is particularly large in certain months of the year. This excess or reserve milk is surplus to the fluid operation, and can only be marketed in manufactured form in competition with products made from ungraded milk produced in the major low cost dairying areas of the United States. Thus, such reserve milk yields a considerably lower return than is necessary to sustain graded milk production in the San Antonio milkshed. Likewise, it yields a lower price than would be necessary to purchase graded milk on a regular basis in other supply areas and pay the cost of transporting such a bulky and perishable product to San Antonio.

The existence of this reserve Grade A milk, which must be marketed at a lower price, is the primary cause of the instability which affects fluid milk markets. If a handler were able to use milk he purchased at Class II prices for Class I use, he would stand to gain advantage, but in so doing he demoralizes the Class I market price.

One of the paramount reasons why regulation of prices is considered necessary in the San Antonio market is to insure that the position of handlers paying producers a Class I price for fluid milk will not be undermined by others using the market's excess or surplus

producer milk for Class I use. It is equally important that the Class I market be protected from the use of seasonal excess milk from other markets as well as from its own surplus. The order provisions as they now stand permit a handler to curtail purchases of producer milk to their own advantage and secure low cost seasonal supplies from elsewhere for Class I use. These seasonal supplies are easily and cheaply acquired during the months of flush production when surrounding markets are receiving milk greatly in excess of their current fluid needs. If adjacent milksheds try to dump their seasonal surplus on each other's Class I markets, the result would soon be market chaos, particularly in the spring months. Class I prices would be demoralized and the rate of milk production would suffer. The result would be a shortage of milk in both markets at any time in the year when general shortages and high prices prevailed. Such marketing conditions would be contrary to the stated purpose of the act. It is necessary, therefore, in order to insure the effectiveness of the classified pricing program of the order and to promote orderly marketing, that some measure be taken to remove the incentive which handlers have to acquire unpriced milk (milk not paid for in accordance with its utilization) and undermine the Class I pricing structure of the order.

One possible alternative would be to extend price regulation in accordance with order provisions to all milk dealers who supplied milk either directly or indirectly to the San Antonio market. This alternative is both economically and administratively unacceptable in such an order program. It would open the San Antonio market pool to anyone who supplied even a token quantity of milk to handlers serving the marketing area. The objections to such distribution of pooled funds was discussed earlier in connection with the recommendations for standards of pool participation for distributing plants.

Such regulation would have the further disadvantage of being cumbersome, expensive, difficult to enforce, and it would interfere with the acquisition of needed supplemental milk supplies for the San Antonio market. The record discloses that needed supplemental milk is obtained by San Antonio handlers from numerous and widely scattered points. It would not be possible or desirable to limit the number of plants or area from which milk might be purchased. However, in order to bring such plants under regulation, it would be necessary to set up a complete new set of transfer and allocation rules, perhaps with individual tailoring according to the various plant locations, markets and supplies. It would be necessary to follow milk from these plants to its various destinations and uses to determine classification. Also, it would be necessary to ascertain sources of supply other than receipts directly from farmers and determine what priority should be given such supplies in the allocation of Class I milk. In the case of a plant which made an incidental shipment of milk, perhaps at the end of the month, or in the case of such items as storage cream, additional complications would be involved. Earlier inventories as well as sales would have to be ascertained and classified. Classification might depend upon transactions made in the past concerning which adequate records were not kept. Producer prices would be fixed for milk already purchased and sold. Required record keeping and auditing problems would be greatly multiplied with the extension of regulation.

Such extension of regulation would undoubtedly interfere with the acquisition of needed supplemental milk supplies for the San Antonio market. Potential suppliers might be reluctant to sell milk to San Antonio handlers if such sale would mean that they would be subject to producer price fixing and complete regulations provided for the San Antonio market. Also, the terms of the order, such as pooling and equalization, might work to the disadvantage of such a supplier selling primarily to an unregulated Class I market.

If a supply plant became primarily associated with the San Antonio market, there would be need to extend full regulation to such plant. However, there is no evidence of such association of any plant at this time.

It is concluded that it is not feasible to price all milk which may enter the market and that provision is necessary in the order which will insure against the displacement of producer milk by such unpriced milk for the purpose of cost advantage. There is no choice as to what type of provision can be used for this purpose. The only alternative is to levy a charge against unpriced milk used in Class I to the extent it is required for the removal of any advantage there may be in using such milk instead of regulated producer milk.

Several problems are involved in establishing rules for any charge or payment designed to bring about the removal of the advantage of using unregulated milk. The rate of a compensation payment for this purpose must not be so low that it will permit a handler to have temporary or p e r m a n e n t advantage through sale of unpriced milk as Class I in the marketing area. It should not be so high that it will penalize suppliers of unpriced milk who offer milk needed by the market and who are not in a position of gaining an unfair advantage by such sale of milk. The payment must be provided for in a manner which is administratively feasible and which does not bring about unjustified administrative inconvenience or expense.

Several methods were described on the hearing record for determining what rate of payment would be appropriate. One of these is to ascertain the actual cost to the regulated handler of milk which he purchases from unregulated plants and charge as a compensation payment any amount by which the Class I price exceeded the cost of the unregulated milk used in Class I. Such a scheme is not sound from the standpoint of administrative feasibility and it would not necessarily remove the advantage in using unregulated milk even though it were feasible. Rates at which milk sales are billed may not represent actual cost to the purchaser. In the case of a firm which owns or controls pool plants under the San Antonio order as well as unregulated plants, the rate of payment from one plant to another, if any were made, would have little or no significance. If such a provision were to be adopted, the billing rate might be deliberately set in each instance at a level which would avoid any payments without regard to the value of the milk. There are a number of firms which control plants under the San Antonio order as well as unregulated plants.

A handler having no unregulated plants would no doubt find it possible to arrange a billing price on purchased milk which would avoid any compensatory payments. If a handler had the choice of paying money to the market-wide pool or to a person from whom he was buying milk, he would probably choose the latter. A kick-back arrangement or offsetting purchase and sale might readily be arranged, perhaps through a third party. Since the billing price for milk would be a self-serving figure for both parties to the transaction, it would be virtually impossible to ascertain that it represented the true cost to the purchaser.

If the stated purchase price were a true cost, it would still not fulfill the purpose of removing the advantage to unregulated milk to base compensation payments on the difference between such price and the Class I price. The record discloses that sales of priced milk between regulated handlers ordinarily take place at the class price plus a handling charge. This handling charge varies according to circumstances, but represents a payment to the receiver of the milk to offset his purchasing and receiving costs, such as receiving, weighing, testing and cooling the milk, and other costs of doing business. The cost of receiving the milk in bulk form is somewhat less than receiving it from producers. Thus, in order to remove the advantage to unregulated milk, it would be necessary to provide that the cost of bulk unregulated milk be somewhat more than the Class I price. It would be exceedingly difficult to determine what this excess rate should be, particularly in the case of products such as skim milk and cream, where the allocation of additional processing costs among more than one end product is involved. Furthermore, the marketing agreement act does not give the Secretary express authority to enforce prices other than producer prices. This scheme for removing the advantage in using unregulated milk is rejected for these reasons.

Another suggested method is to determine the price actually paid dairy farmers by the unregulated milk dealer who first received the milk, and base the compensation payment thereon. This method has several shortcomings. The various payment plans which are used in paying farmers for milk would make the determination of pay rates to individual farmers a next to impossible task. For example, unregulated milk dealers may use varying rates of butterfat differentials, different types of base rating plans, or payments based on volume of deliveries. Various devices such as these for paying farmers often make it impossible to determine actual rate of payment per hundredweight of milk. Stated prices are often illusory, since the cost of the milk itself may be modified by unrealistic charges for various items of supplies and services. Whatever payment plan an unregulated milk dealer may use is a matter of his own choice and it can be changed readily. Calculation of compensation payments according to this suggestion would give any affected dealer special incentive to resort to these or other special payment plans for purposes of evading payments.

The further problem of establishing the rate of payment to be required would by itself preclude use of the actual cost of the milk purchased from farmers by unregulated handlers as a basis for calculating the payment to be required. If a payment were to be required on the unregulated milk based on the difference between prices paid farmers and some other price, the unregulated handler could avoid payments by increasing his prices to farmers. This would give an unregulated handler the advantage over regulated handlers in that a regulated handler has no choice as to what he is required to pay producers nor how this money is to be distributed. Likewise, it would enable unregulated suppliers to dispose of Class I milk in the marketing area with no obligation to equalize such sales with other suppliers of the market.

Even though the rate of payment to producers for all milk might be known, it would still be impossible to ascertain the rate of payment on that portion of the milk disposed of in the marketing area. Since milk marketed outside the marketing area would represent most of the total supply in the unregulated plant, it would be necessary to determine payment for milk marketed to the various outlets. As pointed out subsequently in this decision, all handlers have both surplus as well as Class I milk in their plants and it is not realistic to assume that the purchase price for milk for each use is the same.

It has been suggested that in order to overcome this objection the plant of the unregulated handler be subject to audit and that the rate of compensation payment be based on the difference between the average utilization value at order prices in the unregulated plant and the average rate of payment to producers. This method would not recover the entire advantage of selling surplus milk as Class I in the marketing area. This method has not only the disadvantages associated with other schemes based on actual pay rates to producers, but it would involve, in the case of the San Antonio market, an extremely complicated and administratively impracticable system of accounting and determination in such plants. The unregulated plants from which the San Antonio handlers obtain supplemental milk are numerous and widely scattered. Determination of utilization value in these plants would involve the same complications and administrative expense and difficulties as discussed earlier which would be involved in complete regulation of such plants. To make the detailed accounting necessary to establish classification, such unregulated dealers would need to maintain the same detailed records as wholly regulated handlers.

An alternative method for determining the rate of compensation payments would be to base the rate of payment on the difference between blend prices prevailing in an area and the Class I price. This method has been suggested because it is assumed that unregulated handlers will be forced by competition to pay farmers approximately average blend prices. This assumption is not valid to the degree that a payment based on the difference between such prices could be expected to insure that unregulated milk would not be used to displace regulated milk for cost reasons at all times throughout the year. Unregulated plants, as well as regulated plants, have some surplus milk at all times and particularly during the seasons of flush production. As a result, prices paid farmers are, in fact, blend prices made up of returns from the sale of milk in Class I outlets, as well as sales to the surplus market. If an unregulated plant were in a position to sell its surplus milk for Class I use in the marketing area and maintain its own Class I outlets, it would have a competitive advantage over regulated handlers who found it necessary to dispose of part of their milk as surplus.

In the absence of a compensation payment, the unregulated plants located anywhere in the potential supplemental supply area might sell milk for Class I use in other markets at substantial handling charges whenever fluid milk tended to be in short supply, and then dispose of milk for Class I use in the San Antonio market to maintain the blend price during the season of flush production when Class I sales elsewhere were difficult to make. A plant which could thus keep its disposition of milk largely as Class I and avoid qualification as a pool plant would be in a position to pay its farmers at a higher rate than that received by producers under the order, or it could retain the extra return as profit. In either case, however, pool milk would be at a disadvantage relative to unregulated milk.

Since none of these suggestions presents an acceptable approach to the problem of compensation payments, it is necessary to resort to a different procedure. The only sound method of dealing with this problem is one based on a recognition of the economics involved as they affect producers and handlers. This approach resolves itself primarily into a question of market values for milk.

Handlers under the order seeking to purchase unregulated milk will naturally resort to the lowest cost source from which suitable milk is available. In fixing the rate of compensation payment, it is necessary, therefore, to determine what the lowest cost source may be and to base the payment on the difference between the cost of such milk and the cost of milk priced under the order for similar use. The record shows that milk supplies are invariably larger in surrounding markets in spring and summer than in fall and winter, and that because of relatively constant sales of fluid milk, the excess increased production must be marketed largely as manufactured products. This outlet represents the opportunity cost of the surplus milk since it is the highest price at which the milk can otherwise be sold. It is this opportunity cost or value of such milk which would be effective in determining the price at which the unregulated plant would sell such milk. The minimum asking price of the unregulated supplier of such milk would be expected to be only the return which he would realize if the milk were disposed of for surplus use.

Since considerable volumes of Grade A milk must be disposed of as surplus by various unregulated plants from which the market may obtain milk, it is evident that handlers under the San Antonio order could obtain such milk at prices reflecting its value as surplus milk. In short, the actual value of this milk is not the blend price paid to dairy farmers but rather the price which can be obtained for it in the market when disposed of as surplus milk.

Therefore, for the months of February through July, during which period surplus milk is likely to be available in substantial volumes to the San Antonio market from non-pool sources, the compensation payment on unpriced other source milk and other source milk products used for Class I should be based on the difference between the minimum price of producer milk used for surplus and the applicable Class I price under the San Antonio order. The Class II price established by the order is a fair and economic measure of the value of milk in surplus uses whether received from producers at regulated plants or from other farmers at non-regulated plants. In calculating the payments on other source milk both the Class I and surplus values must relate to and be fixed as of the point where the milk is received from farmers at the first receiving plant, so as to be properly comparable with minimum class prices which always attach to producer milk at that level of marketing. No allowance should be made for subsequent handling costs and profits in this farm level comparison between producer and other source milk because such costs and profits attach at stages of marketing subsequent to the basing point to which minimum class prices for producer milk refer. They are in no way regulated by the order with respect to producer milk. Neither the act nor the order contemplates, authorizes or provides for the regulation of subsequent handling charges or profits or the establishment of uniform resale prices between handlers, whether the milk be from producers or other sources.

During the months of August through January, when milk supplies tend to be shorter, it is concluded that other source fluid milk will not be available to handlers in the San Antonio market at surplus prices. Evidence in the record indicates that the supply of excess milk available in January and August is much less than during the season of flush production. It is concluded that during these two months the compensation payment should be based on the difference between the Class I and the blend prices under the order. Generally speaking, during these two months the relationship between the supply of milk in the San

Antonio supply area and the demand for such milk will tend to fluctuate considerably from year to year according to production conditions. It is concluded that these fluctuations will tend to be similar in San Antonio and surrounding milksheds. Thus, the rate of compensation payment based on the difference between Class I and blend prices will adjust itself automatically in these months according to changes in demand for and prices of outside supplies. If supplies of producer milk are relatively plentiful, unpriced milk can be expected to be cheaper, and therefore, the rate of compensation payment should be somewhat higher. On the other hand, as milk supplies in the area tend to be short, it is to be expected that the cost of unregulated milk will increase. Under these circumstances, the rate of compensation payment will be correspondingly less. If producer milk were all assigned to Class I in August or January no compensation payment would be required during such month.

During the remaining months of the year (September through December), no compensation charge should be provided. Evidence in the record indicates that the cost to San Antonio handlers of milk from unpriced sources will be at such levels that there will be no incentive to use such milk to displace producer milk for reasons of cost advantage for this period.

By choosing a rate of compensation payment which reflects the cost of the cheapest milk which may be expected to be available, any advantage to individual handlers relative to others, in obtaining such cheap milk and substituting it for producer milk in Class I, is removed insofar as administratively possible and no handler is given the clear opportunity to gain an unfair advantage which otherwise would exist. Although the unfair advantage of obtaining other source milk is removed by the particular rate of payment herein provided, nevertheless, if other source milk is to be purchased, the incentive for purchasing the cheapest of such milk remains; for the lower the price which a handler pays for other source milk, the lower will be his total cost of purchasing such milk. This follows from the fact that the measure of the compensation payment is an objective one and does not depend upon the particular price which the handler paid for the other source milk.

As pointed out heretofore in connection with material issue number 1, the process of market-wide pooling creates an unnatural incentive for milk to come into the market to gain certain advantages. Such milk would not be associated with the market in the absence of regulation.

The act requires that prices fixed under the order for milk purchased from producers or associations of producers be uniform as to all handlers, subject only to usual adjustments, such as those for butterfat content and location of the milk. The only prices fixed under the order are those for producer milk, and it is hereby determined that they are uniform as required by the act. Class prices for pool milk under the order are for raw milk as received from farmers, f. o. b. the loading platform at the plant where first received.

No valid comparison can be made of prices to farmers with the necessarily higher prices of milk or milk products at any later point in the marketing process. The prices between dealers must necessarily reflect, in addition to such initial farm level cost or price, subsequent handling costs, such as those incurred in receiving, weighing, testing, cooling, hauling between plants, processing, and selling, as well as profits. Consequently, the compensatory charges do not purport to assure that the cost or price of non-pool milk or milk products, as bought and sold from dealer to dealer, will be no higher than the minimum class prices for raw, unassembled pool milk, f. o. b. initial plant. A handler selling pool milk or milk products could not well sell it at levels as low as the minimum class price without loss to himself. Compensatory charges at a rate which would assure a total maximum cost to a handler of only the minimum class price for non-pool milk and milk products received from a non-pool plant would clearly discriminate against pool milk and milk products.

It is concluded that the compensation payments herein provided are not only incidental, but necessary to sustain the classification and pricing of milk according to its use in the market, and that the rates of payment specified are those which are necessary and appropriate to accomplish this purpose.

Testimony in the hearing record concerning availability of milk supplies to San Antonio handlers indicates that the rate of payment recommended here will tend to equalize the competitive position of priced and unpriced milk, and will avoid displacement of producer milk for reasons of cost. However, if experience proves that milk is available to handlers during the fall and winter months at prices lower than those anticipated, or that such payments otherwise interfere with the purposes of the order, then it will be necessary to reconsider the rate of compensation payment on the basis of that experience.

In addition to that other source milk which enters the marketing area through pool plants, some non-pool milk may be distributed within the marketing area from plants which are non-pool plants and the milk from such plants will be non-pool milk. The compensation charges applicable to other source milk disposed of in the marketing area from distributing plants which are non-pool plants should be the same as those applicable to other source milk distributed from pool plants discussed above. It would not be possible to stabilize the market under the classified pricing program if non-pool plants were allowed to distribute unpriced milk in the marketing area without such payments. Such milk should be classified and priced the same through the classification pricing program as unpriced milk distributed through any other channels.

Handlers distributing such unpriced milk in the marketing area from non-pool distributing plants have the same opportunity to buy milk at the opportunity cost level as do the operators of pool plants who purchase other source milk. Such milk may be purchased and distributed in the marketing area. In addition, however, the operator of the non-pool plant in all probability has surplus milk in his own plant which he would want to dispose of on any basis which would yield a higher return than the surplus value. It would be particularly easy to dispose of such milk for Class I use in the marketing area by bidding for large contracts such as hospitals, defense establishments or large institutions. With surplus outlets as the alternative, and no compensation payments to make, the non-pool handlers would have considerable incentive or margin to underbid the seller of priced milk for such sales. A non-pool plant might also use such price advantage in selling his surplus milk to Class I outlets for the purpose of establishing a regular trade on retail or wholesale routes to homes and stores in the marketing area. The non-pool plant might sell up to 15 percent of its milk into the marketing area as Class I without becoming subject to regulation. To allow a non-pool plant to use its surplus milk in this manner for establishing a regular trade in the marketing area without compensation payments would mean that such plant would have a marked competitive advantage over regulated handlers selling priced milk. Such conditions could readily lead to disorderly marketing conditions.

It is considered inappropriate also that a plant distributing a small share of its milk in the marketing area should be subject to full regulation because of that small share of its milk so marketed. Such regulation might place a plant of this kind at a competitive disadvantage with respect to its unregulated competition. In some cases, a non-pool plant may be disposing of a larger share of its milk as Class I than the average utilization for the market. In such cases, the compensation payments herein provided might cost the handler less than the equalization payments such plant would pay if fully regulated as a pool plant. In these instances the sale of small quantities of milk in the marketing area would be more likely to take place under the compensation payment provisions herein provided than if full regulation were extended to all plants.

The rate of compensation payment provided for non-pool plants making distribution directly in the marketing area should be the same as that for pool plants which obtain and use unpriced milk in Class I. The administrative feasibility of any other method of levying compensation payments is substantially the same as that described in the case of unpriced milk distributed in the marketing area by pool plants.

Testimony in the record indicates that no compensation payments should be required on milk classified and priced as Class I under another Federal milk marketing order. The minimum prices for Class I milk under other Federal orders where San Antonio handlers might obtain supplemental supplies approximate or exceed the San Antonio Class I prices, with seasonal adjustment as recommended herein and as adjusted for location of the supplying plants. Since handlers under other Federal orders must pay for producer milk on a utilization basis, they would not be in a position to unload any surplus producer milk into the San Antonio market for Class I use at less than Class I prices. In order that such handlers would not be able to sell any other source milk which they may have to the San Antonio market, provision should be made in the order that the exemption from compensation payment applies only if the Class I producer milk is equal to the total Class I sales of such handler. No distinction should be made with respect to the application of such payments to milk from handlers regulated under other Federal milk marketing orders whether the milk is distributed by the handler from the other order or by a San Antonio handler.

No compensatory payment should be required on milk custom bottled in a non-pool plant. Handlers may transfer bulk milk to non-pool plants for packaging. This packaged milk may be returned to the handler for Class I distribution in the marketing area. Such milk is included in the gross receipts and sales of the pool plant handler upon receipt and transfer in bulk. It is again accounted for when received and disposed of in packaged form. Inasmuch as receipts of milk from non-pool plants are considered as other source milk, it is possible that producer milk transferred to a non-pool plant for custom packaging would become subject to a compensatory payment when this milk is returned in packaged form. Similarly other source milk which is transferred as Class I milk for packaging could be subjected to compensatory payments twice. Provision should be made to preclude this by allocating the packaged milk received from non-pool plants from the gross Class I utilization to the extent that an equivalent amount of bulk milk is transferred to such non-pool plant by the handler and such transfer is classified as Class I milk.

Any funds collected under the compensatory payment provisions should be added to the producer-settlement fund. It is the purpose of the order to insure that a sufficient and dependable supply of quality milk will be available for Class I needs of the market. To the extent that Class I sales are displaced through the disposition of surplus milk from unpriced sources, producers stand to lose income from the sale of milk to the market which they are expected to supply. This loss of income would mean that the prices contemplated under the order would not be realized by producers. As a result, production might suffer, in which case consumers would stand to lose because of the disappearance of milk supplies from the regular and dependable sources which have assumed an obligation of supplying them milk to the market on a year-round basis. Otherwise, Class I prices would have to be increased to offset the loss of income to producers. There is no alternative source of dependable milk supplies which would cost consumers less over a period of time than the milk supplied by regular producers: Thus, there is justification for returning to producers the difference between the value of such milk at its opportunity cost, which would otherwise be its value to the seller, and the Class I price. There is no other alternative disposition of funds from compensation payments under the authority of the act other than that herein provided. In order that the money accruing under this provision should provide the maximum benefit, it is concluded that it should be added to the producer-settlement fund and disbursed to producers through the uniform price during the months of September through December as a further incentive for uniform production. This is the period when local production tends to be lowest and when handlers' requirements for high cost other source milk are at a maximum.

The use of compensation payments was questioned on the hearing record on the basis that they might foster unrealistic class prices. This is not the case. Class prices held in excess of the necessary level for any reason would be self-liquidating under the terms of the order. If base prices were set above the level necessary to encourage appropriate rates of milk production, the supply of milk would increase. Higher prices could be expected to attract additional milk to the market in the form of greater production by old producers or by the addition of new producers and new plants to the pool. The provisions of the order do not preclude any producer from selling his milk to a pool plant. Any plant which cares to do so is eligible to distribute or sell milk in the market and qualify as a pool plant fully subject to the provisions of the order, and assume the responsibility of serving the market.

The increased supplies of milk which so resulted would have the effect of decreasing prices to producers. This would come about since any increase in Class II milk would reduce the blend price, and since the supply-demand provision of the order would automatically decrease the Class I price as producers' milk supplies increased relative to Class I sales. The compensation payment will not discourage association of dependable milk supplies with the market, but, as pointed out heretofore, might be a means to facilitate such association in the case of handlers largely in the fluid milk business.

It is necessary that the order specify the handler obligated to make the compensation payments. If the unpriced milk is distributed in the marketing area from a non-pool plant, the operator of such plant should make the payment. In the case of supplemental milk received at pool plants from unpriced sources, either the buying or selling plant might be assessed. From the standpoint of the economics involved, it would make no difference, since the amount of payment would be the same in both cases.

From the standpoint of administration and enforcement, it would be much easier and simpler for the regulated plant to make the payment. It is the regulated handler with whom the market administrator regularly deals. Such handler would be expected to know and understand the terms and provisions of the order. He is the handler who would be responsible for distributing the milk in the regulated market. Whether or not a compensation payment would be required would depend upon the application of the allocation provisions of the order to the plant of the receiving handler.

The seller, on the other hand, would not be aware until later whether a compensation payment would be required, and might not even know at the time of the sale, particularly if the sale took place through a broker, whether his milk would be moved to a regulated market for disposition. If enforcement proceedings were to be required, it would be more convenient and logical to bring the case to trial in the area of the regulated market where the problem arose.

The compensation payments herein provided will not prohibit the marketing of milk nor limit the marketing of milk products from any production area of the United States. The rate of payment required is uniform except for adjustment by transportation differentials to any plant, regardless of whether it is located in the marketing area or at any distance from the marketing area. The transportation differential herein provided for this purpose is designed to reflect the cost of hauling bulk milk in tank truck lots and is based on the evidence in the hearing record.

The quantity of milk and milk products which may be sold in any regulated market is dependent to a considerable extent upon the price fixed under the order for the particular class of utilization. Such influence should not be construed, however, as a limitation of the type precluded under the act. No price can be fixed without influencing, to some extent, the quantity of milk and milk products which may be sold from either regulated or unregulated sources. No quantitative limitations are imposed under the order on the amounts of unpriced milk which may be disposed of in the marketing area nor do they prohibit such use or any other use of unpriced nonpool milk or milk products. The compensation payment herewith provided will not discriminate against producers by areas, but will provide for equalization of competitive prices by type of transaction with respect to relationship between regulated and unregulated milk.

The payment will not deprive suppliers of unpriced milk of a high priced market which they would otherwise enjoy. The alternative sale value of the unpriced milk is recognized, and this value is returned to these sources when sale is made to the San Antonio market. If marketing facilities and outlets are such that it is advantageous for unpriced sources to dispose of their surplus milk to the San Antonio Class I market, they may be expected to and undoubtedly will do so, and the return they receive will be a full surplus value for such milk.

The compensation payment herewith provided has as its primary purpose the elimination of economic incentives for handlers to use unpriced milk to displace minimum priced milk in Class I sales. The rate of payment found to be appropriate for this purpose is one which recognizes general competitive conditions in

the purchase and sale of regulated and unregulated milk.

It is recognized, however, that general competitive conditions do not prevail in all cases. Each handler is situated differently and each individual transaction is made under different circumstances. It is not possible, however, to adjust prices or payments to individual circumstances or transactions. Such an individual approach would not be administratively or economically feasible. Compensatory payments must therefore be applied at a definite and certain rate applicable to all handlers similarly situated. No single rate of payment can be determined, however, which would result in complete equality of cost to all handlers. Consequently, instances will undoubtedly arise which will appear to indicate that the objectives of the compensatory payment are not being achieved in particular cases. In some cases, the payments required may seem harsh.

It is necessary in seeking an overall solution to problems of this nature to adopt provisions which will be reasonable and as liberal as possible, and at the same time will still guarantee the integrity of regulation. To provide inadequate payments would leave the door open to practices which would render the program ineffective. Commerce in milk is entirely at the option of handlers. They are free to complete only those transactions which are most favorable to themselves. Order provisions must recognize this fact. They must recognize, also, that the varying conditions under which milk transactions occur give rise to great complexity and some doubtful circumstances. Where marginal problems arise, they must be resolved in favor of producers under the order, otherwise the advantage may go to unregulated milk and to dealers and farmers who are not required to abide by any rules of procedure or price making.

3. *Extension of the marketing area.* The proposal to extend the marketing area to include the counties of Comal, Guadalupe, and Hayes should be denied.

The present San Antonio marketing area is composed of all territory within Bexar County. Testimony for the extension of the marketing area was presented on behalf of two handlers whose plants are located in the Comal and Guadalupe counties. Proponents presented no testimony supporting the inclusion of Hayes County. The record indicates that practically all of the milk received by handlers, whose plants are located within the present marketing area, is disposed of in Bexar County. Although the record does not show the proportion of total sales which are made within the present marketing area by the proponents, the testimony indicates that such sales are not a substantial proportion of their fluid sales and represent a very small proportion of total sales in the marketing area. In addition to the proponents, there is only one San Antonio handler who disposes of Class I milk in the proposed extended area. The primarily fluid milk outlets for the proponents are in the city of Austin and in the three proposed counties. A substantial portion of the fluid milk disposed of in these counties is made by six other distributors who are not now subject to the regulation and who are primarily engaged in supplying the Austin market and adjacent territories. Thus, to extend the marketing area would have the result of bringing six additional plants under full or partial regulation which are in no way associated with the San Antonio market. The problem, complained of by proponents, of fringe area competition, thus would be increased several-fold by the extension of the marketing area.

The record indicates that there are substantial differences between the Austin and San Antonio markets with respect to the factors surrounding the production, procurement and distribution of milk.

The purpose of defining marketing area, along with other definitions, is to establish the scope of the regulation. In other words, these definitions determine what persons and what milk is to be subject to the pricing and pooling provisions of the order. As discussed elsewhere in this decision, the regulation should apply to milk which is substantially and regularly associated with the San Antonio market. To extend the marketing area as proposed would bring under regulation handlers and milk of producers which are not closely associated with San Antonio. It is concluded, therefore, that no change should be made in the definition of marketing area at this time.

There may be some objection on the part of proponents to provisions of the order in that prices now are fixed for all producer milk in their plants, even though their Class I disposition is almost entirely to unregulated markets in competition with handlers not subject to price fixing. Provisions found necessary earlier in this decision provide that prices will not be fixed for proponent handlers if this is the case. They will be exempted from full regulation and their Class I sales in the marketing area will be treated the same as Class I milk from any other unpriced source.

4. *Uniform production incentives.* One of the important problems in a fluid milk market is to achieve a proper balance between the seasonal flow of milk from producers and the requirements for such milk in fluid uses. Production of milk tends to increase during the spring pasture season and decline during the fall and winter months, while sales of fluid milk and fluid milk products tend to be fairly stable throughout the year. If a market is adequately supplied during the short production season, burdensome surpluses may prevail during the flush production season. It is essential, therefore, that producers be encouraged to furnish a reasonably uniform quantity of milk from month to month.

Receipts of milk from San Antonio producers have been somewhat more uniform than in many fluid milk markets. The record shows that if the present pattern of production is to be maintained or improved, a greater incentive is needed for uniform production than is now provided by the order. It is important that a safeguard be provided now rather than to wait until such time that uneven production presents a serious marketing problem.

It was proposed by certain handlers that a base rating plan be adopted to distribute to producers the market proceeds of milk. A detailed method of applying such a plan was not proposed at the hearing. However, testimony with respect to a proposed plan considered at the promulgation hearing was incorporated in the record. As indicated in the decision resulting from that hearing, with the year-round deficits of supply, which still prevail in the San Antonio market, it is evident that under the proposed base plan, the uniform price for base milk and for milk in excess of base would be practically the same. The influence of a base rating plan on the seasonal pattern of production depends upon the effect of lower prices for excess milk in reducing the incentive to make deliveries in months of surplus production and the value of a large base in encouraging production in months of normally short production. Since these influences can operate only when the price received for excess milk is lower than that for base milk this plan would be ineffective in the San Antonio market under present conditions.

In view of this situation, an incentive for more uniform production can be best achieved through seasonal variation in the Class I price. A small degree of seasonality has resulted from the application of the supply-demand adjustment under the present Class I pricing formula. Producers testified at the hearing that it was necessary to increase the amount of the seasonal differences in the Class I price. The record evidence supports a decrease in the Class I price during the months of April, May and June, and a corresponding increase in the Class I price during the months of September, October, and November. These appear to be the months of highest and lowest production, respectively, in relation to Class I sales. It was suggested on the record that adjustments of 40 or 50 cents be made. It is concluded that the use of 50 cents or a total difference of $1.00 between the two periods is the minimum which should be adopted. This difference plus the seasonality of prices injected by the supply-demand arrangement should offer a necessary incentive to promote uniform production in this market.

This seasonality in Class I prices will promote a closer relationship among the Class I prices in the San Antonio market and other competing markets particularly during the season of the year when milk supplies in this region are most plentiful and competition for Class I sales from other areas tends to be greatest.

5. *Miscellaneous changes.* (a) The definitions of producer and handler should be modified so as to include in the pool any milk sold by producer-handlers and milk caused to be diverted by cooperative associations from pool plants to nonpool plants.

The present definition of a producer-handler includes a person who operates an approved plant and sells milk of his own production on routes or plant stores within the marketing area, but who receives no milk from other producers. The production and sales of producer-handlers are not pooled. Any milk which a producer-handler disposes of to another handler is considered other source milk. Under the allocation provisions of the order such milk, which is delivered in bottles or packages and disposed of by the handler under the label of the producer-handler, is assigned to Class I milk and bulk milk is assigned to the lowest priced available utilization in the receiving handlers' plant.

The record shows that there is at present only one such producer-handler in the San Antonio market. He operates an approved plant at his farm located in Bexar County for the bottling of milk for distribution in the marketing area. Approximately two-thirds of his total production is bottled and delivered to other handlers for distribution by them. A plant store is operated at the farm from which sales of bottled milk are also made. The balance of his milk is disposed of in bulk form also to a regulated handler. This producer-handler proposed that the definition of producer be changed so that his milk would be considered as producer milk. He testified that he desired to have his production and sales of both bottled and bulk milk pooled along with all producers in the market. It is concluded that inasmuch as the proponents entire production is regularly disposed of in the marketing area and the major portion of which is supplied to other handlers, the request to permit such pooling is reasonable. This result may best be accomplished by considering this type of an operation as a pool plant under the order. Own-production of a handler is considered as producer milk under the order. Because sales of milk are made directly to consumers, it is necessary that such persons be identified as handlers in order that they will be subject to the necessary record keeping, reporting and auditing requirements of the order. Milk disposed of to other handlers will be subject to the inter-handler transfer provisions of the order. Administrative assessment charges should apply to own-production of handlers. The record shows that there are no other persons operating as producer-handlers in the marketing area, therefore, there is no necessity for retaining the producer-handler definition and all references to a producer-handler should be deleted from the order. In the event a producer-handler, as identified heretofore, should enter the market, he would become a handler under the order.

Situations have arisen in the market where handlers have temporarily refused to accept all of the milk production of their regular producers. Inasmuch as other outlets were not available in the market, individual producers had to dispose of the milk refused, by separating the cream and using the skim milk for feed or else dumping it. Such milk which is not received at a pool plant cannot share in the market-wide pool. One of the functions of a market-wide pool is to spread the financial burden of carrying temporary or seasonal reserve supplies equally among all producers. The producers' association proposed that a cooperative association should be recognized as a pool-handler with respect to milk of its members which is diverted by it to a non-pool plant. Proponents stated that if the association were to be recognized as a pool-handler, with respect to diverted milk, it would be possible for the association to arrange for assembling any excess milk of its members and disposing of it to other outlets. It could thereby perform a useful service to its members and the market. Such milk would then be pooled and return to producers the market-wide uniform price. The monetary returns of the cutback producer would be maintained on a par with other producers. This would assist him in maintaining his dairy enterprise and supply milk to the market when it is later urgently needed for Class I uses. Appropriate changes should be made in the definitions of producer and handler so that a cooperative will be considered as a pool-handler with respect to milk diverted from a pool plant to a nonpool plant for its account. The producers of such milk will thereby be enabled to share in the market-wide pool on their total milk deliveries.

(b) Minor changes shauld be made in the provisions relating to the announcement of Class I and Class II prices.

The market administrator is required to announce Class I prices on or before the 10th of the month based on data which are available on the 28th day of the preceding month. The record shows that by the first few days of the month more current figures for certain items included in the formula are available, but which he is precluded from using under the present order language. The use of figures available through the 5th of the month, therefore, will make possible the use of more current data in establishing the Class I price and the order should be amended accordingly. Over a period of time the use of this later date will not affect the cost of Class I milk or returns to producers. Also, 2 of the 18 condenseries specified in § 949.51 of the Class I pricing provisions of the order should be deleted since such plants are no longer operating. Official notice is hereby taken of the fact that such plants have discontinued operations. Interested parties may take exception to such official notice if they so desire.

The present order provides for rounding of the Class I price to the nearest full cent. No such provision has been made for Class II prices. The market administrator is announcing the Class II price based on the nearest full cent and the order should be clarified accordingly.

(c) It was proposed that methods employed in classifying and accounting for inventories be changed. Presently, plus or minus variations in inventory between the beginning of the month and the end of the month are classified as Class II milk. Because other source milk is received during most delivery periods by some handlers, it has been necessary for the market administrator to maintain separate inventory accounts for producer milk and other source milk for such handlers. This has been necessary in order to determine reclassification charges on producer milk which is assigned as inventory to Class II milk and later disposed of as Class I milk.

Most of the milk which is carried in inventory by handlers in this market will be disposed of as Class I milk. Therefore, the amount of milk which would be subject to reclassification would be reduced to a minimum by classifying inventory as Class I milk. Classification of inventory variations as Class I milk would also simplify the accounting procedure. Any reclassification of milk from inventory allocated to Class II milk would be made through the regular monthly classification procedure.

In accordance with the proposal to clarify the accounting procedure, inventories of bulk milk and cream and other products included in Class I milk which are on hand at the end of each month should be classified as Class I milk. The beginning inventory should be considered as a current month milk receipt and subtracted from Class I milk in the allocation provisions. These changes will eliminate negative inventory variation figures which have caused some confusion. Over a period of time, the proposed changes will have very minor, if any, effect on the cost of milk to handlers or the returns to producers.

The total gross Class I sales will be increased by classifiying ending inventory as Class I milk. Therefor, in calculating the supply-demand utilization percentage pursuant to § 949.51 (f), the ending inventory as defined in § 949.41 (a) (2) should be excluded.

(d) The provisions of the order dealing with inter-handler transfers of milk, skim milk, and cream, should be changed so that producer milk is not displaced in available Class I usage by other source milk. The order now provides that inter-handler transfers cannot be classified as Class II milk if this results in producer milk being allocated to Class II milk and other source milk to Class I milk in the plant of the transferee handler. It is possible, however, under some circumstances, that a transfer of milk as Class I milk will result in producer milk being classified as Class II milk in the transferring handlers' plant at the same time other source milk is allocated to Class I milk in the transferee handlers' plant. This may happen when the transferring plant receives other source milk in excess of its utilization of Class II milk while the transferee handler buys other source milk in a lesser quantity than his net Class II utilization after subtraction of Class II milk from other pool plants. One of the purposes of the order is to allocate producer milk to the highest priced available classification. The transfer provisions should be changed to provide that if either or both pool plants have received other source milk, the skim milk or butterfat so transferred shall be classified so as to allocate the greatest possible Class I utilization to producer milk at both plants.

(e) The order is silent, with respect to the allocation of products other than

milk, skim milk or cream received by a handler from a pool plant. Such transfers may be in the form of Class I products other than milk, skim milk or cream or products included in Class II milk. It is concluded that skim milk and butterfat in such products received from other handlers should be classified in conformance with the regular classification provisions of the order and subtracted from the respective class utilizations as the second step in the allocation procedure.

(f) Under the reporting provisions of the order, handlers are not required to report other source milk receipts of Class II products which are disposed of in the same form as received without further processing and packaging. Experience in this market has shown that the reporting of such receipts facilitates the checking of handlers' monthly reports and the auditing program of the market administrator. Handlers have cooperated in furnishing this information. It is concluded that the order should be changed to require handlers to report total receipts of products disposed of in the form received.

(g) It was proposed that the order be clarified with respect to classification of skim milk and butterfat used to produce products other than dairy products by handlers or by processors to whom handlers may dispose of milk. The record shows that ungraded milk may be used by the processors of soup, candy and most other manufactured food products. It is concluded, therefore, that provision should be made to classify skim milk and butterfat transferred or disposed of in bulk to wholesale manufacturers of such products as Class II milk. Skim milk and butterfat used by handlers for products not classified in Class I milk likewise should be Class II.

(h) A proposal was made to include dumped skim milk in Class II milk. Under the present order dumped skim milk is considered along with shrinkage as milk not specifically accounted for as Class II milk. Plant loss in excess of 2 percent of receipts of producers, is classified as Class I milk. The testimony shows that very few handlers have dumped skim milk and the necessity for dumping such milk has been very infrequent. Skim milk may be disposed of for livestock feed and classified as Class II milk. Other changes recommended herein provide additional outlets for skim milk at a Class II milk classification. The verification by the market administrator of the quantities of any skim milk which may be dumped presents an administrative problem. In view of these facts, it is concluded that the proposal for including dumped skim milk in Class II milk should be denied.

(i) It was proposed that shrinkage of producer milk should be prorated to Class I milk and Class II milk in accordance with the amount of producer milk, other than shrinkage, which is classified in each class. The record testimony is inconclusive with respect to a need for changing the present method of assigning to Class II milk actual shrinkage up to 2 percent of total producer milk receipts.

(j) The adoption of the several amendments decided upon herein require additions and numerous conforming changes throughout the order. For that reason the entire order should be redrafted and reissued.

*General findings.* (a) The proposed marketing agreement and the order, as amended, and as hereby proposed to be further amended, and all of the terms and conditions thereof, will tend to effectuate the declared policy of the act;

(b) The parity prices of milk as determined pursuant to section 2 of the act are not reasonable in view of the price of feeds, available supplies of feeds and other economic conditions which affect market supply of and demand for milk in the marketing area, and the minimum prices specified in the proposed marketing agreement and the order, as amended, and as hereby proposed to be further amended, are such prices as will reflect the aforesaid factors, insure a sufficient quantity of pure and wholesome milk and be in the public interest; and

(c) The proposed order, as amended, and as hereby proposed to be further amended, will regulate the handling of milk in the same manner as, and will be applicable only to persons in the respective classes of industrial and commercial activity specified in a marketing agreement upon which a hearing has been held.

*Order of the Secretary Directing That a Referendum Be Conducted: Determination of a Representative Period: and Designation of an Agent To Conduct Such Referendum*

Pursuant to section 8c (19) of the Agricultural Marketing Agreement Act of 1937, as amended (7 U. S. C. 608c (19)), it is hereby directed that a referendum be conducted among the producers (as defined in the proposed order as amended, regulating the handling of milk in the San Antonio, Texas, marketing area) who, during the month of September 1953, were engaged in the production of milk for sale in the marketing area specified in the aforesaid order as amended, to determine whether such producers favor the issuance of the order amending the order, as amended, which is filed herewith.

The month of September 1953 is hereby determined to be the representative period for the conduct of such referendum.

Orville A. Jamison is hereby designated agent of the Secretary to conduct such referendum in accordance with the procedure for the conduct of referenda to determine producer approval of milk marketing orders as published in the FEDERAL REGISTER on August 10, 1950 (15 F. R. 5177), such referendum to be completed on or before the 15th day from the date this decision is filed.

*Marketing agreement and order.* Annexed hereto and made a part hereof are two documents entitled respectively "Marketing Agreement Regulating the Handling of Milk in the San Antonio, Texas, Marketing Area," and "Order Amending the Order, as Amended, Regulating the Handling of Milk in the San Antonio, Texas, Marketing Area," which have been decided upon as the detailed and appropriate means of effectuating the foregoing conclusions. These documents shall not become effective unless and until the requirements of § 900.14 of the rules of practice and procedure, as amended, governing proceedings to formulate marketing agreements and orders have been met.

*It is hereby ordered*, That all of this decision, except the attached marketing agreement, be published in the FEDERAL REGISTER. The regulatory provisions of said marketing agreement are identical with those contained in the order as amended, and as hereby proposed to be further amended by the attached order, which will be published with this decision.

The decision filed at Washington, D. C., this 16th day of December 1953.

[SEAL] JOHN H. DAVIS,
*Assistant Secretary of Agriculture.*

*Order,*[1] *as Amended, Regulating the Handling of Milk in the San Antonio, Texas, Marketing Area*

Sec.
949.0 Findings and determinations.

DEFINITIONS

949.1 Act.
949.2 Secretary.
949.3 Person.
949.4 Cooperative association.
949.5 San Antonio, Texas, marketing area.
949.6 Approved milk plant.
949.7 Pool plant.
949.8 Non-pool plant.
949.9 Handler.
949.10 Producer.
949.11 Producer milk.
949.12 Other source milk.

MARKET ADMINISTRATOR

949.20 Designation.
949.21 Powers.
949.22 Duties.

REPORTS, RECORDS AND FACILITIES

949.30 Reports of receipts and utilization.
949.31 Reports of payments to producers.
949.32 Records and facilities.
949.33 Retention of records.

CLASSIFICATION

949.40 Skim milk and butterfat to be classified.
949.41 Classes of utilization.
949.42 Shrinkage.
949.43 Responsibility of handlers and reclassification of milk.
949.44 Transfers.
949.45 Computation of the skim milk and butterfat in each class.
949.46 Allocation of skim milk and butterfat classified.

MINIMUM PRICES

949.50 Minimum prices.
949.51 Class I milk.
949.52 Formula index.
949.53 Class II milk.
949.54 Butterfat differential to handlers.
949.55 Use of equivalent factors.

APPLICATION OF PROVISIONS

949.60 Handlers subject to other orders.
949.61 Handlers operating non-pool plants.

[1] This order shall not become effective unless and until the requirements of § 900.14 of the rules of practice and procedure, as amended, governing proceedings to formulate marketing agreements and orders have been met.

UNPRICED MILK

Sec.
949.65 Rate of payment on unpriced milk.

DETERMINATION OF UNIFORM PRICES TO PRODUCERS

949.70 Computation of value of milk for each handler.
949.71 Computation of uniform price for pool milk.

PAYMENTS FOR MILK

949.80 Time and method of payment.
949.81 Producer butterfat differential.
949.82 Producer-settlement fund.
949.83 Payments to the producer-settlement fund.
949.84 Payments out of the producer-settlement fund.
949.85 Adjustments of accounts.
949.86 Marketing services.
949.87 Payment of administrative expense.
949.88 Termination of obligation.

EFFECTIVE TIME, SUSPENSION OR TERMINATION

949.90 Effective time.
949.91 Suspension or termination.
949.92 Continuing obligations.
949.93 Liquidation.

MISCELLANEOUS PROVISIONS

949.100 Agents.
949.101 Separability of provisions.

AUTHORITY: §§ 949.1 to 949.101 issued under Sec. 5, 49 Stat. 753, as amended; 7 U. S. C. and Sup. 608c.

§ 949.0 *Findings and determinations.* The findings and determinations hereinafter set forth are supplementary and in addition to the findings and determinations previously made in connection with the issuance of the aforesaid order and of each of the previously issued amendments thereto; and all of said previous findings and determinations are hereby ratified and affirmed, except insofar as such findings and determinations may be in conflict with the findings and determinations set forth herein.

(a) *Findings upon the basis of the hearing record.* Pursuant to the provisions of the Agricultural Marketing Agreement Act of 1937, as amended (7 U. S. C. 601 et seq.), and the applicable rules of practice and procedure, as amended, governing the formulation of marketing agreements and marketing orders (7 CFR Part 900), a public hearing was held upon proposed amendments to a tentative marketing agreement and to the order, as amended, regulating the handling of milk in the San Antonio, Texas, marketing area. Upon the basis of the evidence introduced at such hearing and the record thereof, it is found that:

(1) The said order, as amended, and as hereby further amended, and all of the terms and conditions thereof will tend to effectuate the declared policy of the act;

(2) The parity prices of milk produced for sale in the said marketing area as determined pursuant to section 2 of the act are not reasonable in view of the price of feeds, available supplies of feeds and other economic conditions which affect market supplies of and demand for such milk, and the minimum prices specified in the said order, as amended, and as hereby further amended, are such prices as will reflect the aforesaid factors, insure a sufficient quantity of pure and wholesome milk and be in the public interest;

(3) The said order, as amended, and as hereby further amended, regulates the handling of milk in the same manner as and is applicable only to persons in the respective classes of industrial and commercial activity specified in a marketing agreement upon which a hearing has been held.

*Order relative to handling.* It is therefore ordered that on and after the effective date hereof the handling of milk in the San Antonio, Texas, marketing area shall be in conformity to and in compliance with the terms and conditions of this order, as amended, and as hereby further amended, and the aforesaid order, as amended, is hereby further amended, as set forth below:

DEFINITIONS

§ 949.1 *Act.* "Act" means Public Act No. 10, 73d Congress, as amended, and as reenacted and amended, by the Agricultural Marketing Agreement Act of 1937, as amended (7 U. S. C. 601 et seq.).

§ 949.2 *Secretary.* "Secretary" means the Secretary of Agriculture of the United States or any other officer or employee of the United States authorized to exercise the powers and to perform the duties of the said Secretary of Agriculture.

§ 949.3 *Person.* "Person" means any individual, partnership, corporation, association, or any other business unit.

§ 949.4 *Cooperative association.* "Cooperative association" means any cooperative marketing association of producers which the Secretary determines after application by the association (a) to have its entire activities under the control of its members, (b) to have full authority in the sale of milk of its members, and (c) to be qualified under the provisions of the act of Congress of February 18, 1922, as amended, known as the "Capper-Volstead Act."

§ 949.5 *San Antonio, Texas, marketing area.* "San Antonio, Texas, marketing area" hereinafter called the "marketing area" means all the territory including all municipal corporations and all Federal military reservations, facilities and installations located within the boundaries of Bexar County, Texas.

§ 949.6 *Approved plant.* "Approved plant" means any milk plant (a) which is approved by the appropriate health authority of the marketing area for the processing of Grade A milk and from which Class I milk is delivered (including delivery by a vendor, or sale from a plant or plant store) in the marketing area other than to any milk processing plant, or (b) which is supplying Class I milk to a federal institution or base in the marketing area.

§ 949.7 *Pool plant.* "Pool plant" means an approved plant from which the volume of skim milk and butterfat distributed as Class I milk to retail or wholesale outlets (including sales through plant stores) in the marketing area during the delivery period is 15 percent or more of the receipts of milk at such plant during the month from pool plants and from dairy farmers conforming to the requirements of § 949.10 (a) or (b): *Provided*, That, in any event, a plant which was an approved plant during the month of May 1953 shall, upon written application to the market administrator on or before the 10th day after the effective date of this subpart, be designated as a pool plant during each month of the six month period following the effective date hereof, in which Class I milk is disposed of from such plant to retail or wholesale outlets in the marketing area, and such plant has been a pool plant in each of the preceding month(s) of such period.

§ 949.8 *Non-pool plant.* "Non-pool plant" means any milk receiving, manufacturing, or distributing plant other than a pool plant.

§ 949.9 *Handler.* "Handler" means a person in his capacity as the operator of an approved plant(s), or a cooperative association with respect to producer milk diverted for the account of such association pursuant to § 949.10. Milk so diverted shall be deemed to have been received at a pool plant.

§ 949.10 *Producer.* "Producer" means any person who produces milk received directly from the farm at a pool plant or diverted from a pool plant to a non-pool plant for the account of a cooperative association, which milk is (a) produced under a permit or rating for the production of milk to be disposed of for consumption as Grade A milk issued by the appropriate health authority having jurisdiction in the marketing area, or by another health authority whose certification is accepted by such health authority, or (b) is acceptable to an agency of the Federal Government for fluid consumption in its institutions or bases. This definition shall not include any such person with respect to milk received by a handler partially exempt from this subpart pursuant to § 949.60.

§ 949.11 *Producer milk.* "Producer milk" means any skim milk or butterfat contained in milk received directly at the pool plant from producers, or diverted by a cooperative association in accordance with the provisions of § 949.10.

§ 949.12 *Other source milk.* "Other source milk" means all receipts of skim milk or butterfat other than that contained in (a) producer milk, (b) receipts from pool plants, or (c) Class II products disposed of in the form in which received without further processing or packaging by the handler.

MARKET ADMINISTRATOR

§ 949.20 *Designation.* The agency for the administration of this subpart shall be a market administrator who shall be a person selected by the Secretary. Such person shall be entitled to such compensation as may be determined by and shall be subject to removal at the discretion of, the Secretary.

§ 949.21 *Powers.* The market administrator shall have the following powers with respect to this subpart:

(a) To administer its terms and provisions;

(b) To receive, investigate, and report to the Secretary complaints of violations;

(c) To make rules and regulations to effectuate its terms and provisions; and

(d) To recommend amendments to the Secretary.

§ 949.22 *Duties.* The market administrator shall:

(a) Within 30 days following the date upon which he enters upon his duties, execute and deliver to the Secretary a bond, conditioned upon the faithful performance of his duties, in an amount and with surety thereon satisfactory to the Secretary;

(b) Employ and fix the compensation of such persons as may be necessary to enable him to administer its terms and provisions;

(c) Obtain a bond in reasonable amount and with reasonable surety thereon covering each employee who handles funds entrusted to the market administrator;

(d) Pay out of funds provided by § 949.87 the cost of his bond and of the bonds of his employees, his own compensation, and all other expenses (except those incurred under § 949.86) necessarily incurred by him in the maintenance and functioning of his office and in the performance of his duties;

(e) Keep such books and records as will clearly reflect the transactions provided for in this subpart and, upon request by the Secretary, surrender the same to such other person as the Secretary may designate;

(f) Submit his books and records to examination by the Secretary and furnish such information and reports as the Secretary may request;

(g) Audit all reports and payments by each handler by inspection of such handler's records and of the records of any other handler or person upon whose utilization the classification of skim milk or butterfat for such handler depends;

(h) Publicly announce, at his discretion, by posting in a conspicuous place in his office and by such other means as he deems appropriate, the name of any person who, within 10 days after the day upon which he is required to perform such acts has not:

(1) Made reports pursuant to §§ 949.30 to 949.31 inclusive, or

(2) Made payments pursuant to §§ 949.60, 949.61 and §§ 949.80 to 949.87, inclusive.

(i) On or before the twelfth day after the end of each month, report to each cooperative association which so requests the amount and class utilization of milk received by each handler from producers who are members of such cooperative association. For the purpose of this report the milk so received shall be assigned to each class in the proportion that the total producer milk in each class is of the total receipts of producer milk by such handler.

(j) Notify handlers and make announcement by such other means as he deems appropriate of prices as follows:

(1) On or before the tenth day of each month the Class I price for such month computed pursuant to § 949.51 and the Class I butterfat differential computed pursuant to § 949.54;

(2) On or before the fifth day of each month the Class II price for the preceding month computed pursuant to § 949.53 and the Class II butterfat differential computed pursuant to § 949.54; and

(3) On or before the twelfth day of each month for the preceding month the uniform price computed pursuant to § 949.71, and the butterfat differential to producers computed pursuant to § 949.81.

(k) Prepare and publish such statistics and information as he deems advisable and as do not reveal confidential information.

REPORTS, RECORDS, AND FACILITIES

§ 949.30 *Reports of receipts and utilization.* On or before the 7th day after the end of each month, each handler shall report to the market administrator in the detail and on forms prescribed by the market administrator for each of his approved plants as follows:

(a) The quantities of skim milk and butterfat contained in producer milk;

(b) The quantities of skim milk and butterfat contained in (or represented by) receipts from pool plants;

(c) The quantities of skim milk and butterfat contained in receipts of other source milk;

(d) The quantities of skim milk and butterfat contained in receipts of Class II products disposed of in the form in which received without further processing or packaging by the handler;

(e) The utilization of all skim milk and butterfat required to be reported pursuant to this section; and

(f) Such other information with respect to the receipt and utilization of skim milk and butterfat as the market administrator may prescribe.

§ 949.31 *Reports of payments to producers.* On or before the 20th day after the end of each month, each handler who received milk from producers shall submit to the market administrator his producer payroll for the month, which shall show for each producer;

(a) His total deliveries of milk.

(b) The average butterfat content of such milk, and

(c) The net amount of such handler's payments to such producer with the prices, deductions, and charges involved.

§ 949.32 *Records and facilities.* Each handler shall maintain and make available to the market administrator or to his representative during the usual hours of business such accounts and records of his operations and such facilities as are necessary for the market administrator to verify or establish the correct data with respect to:

(a) The receipts and utilization of all skim milk and butterfat received from any source;

(b) The weights and tests for butterfat and other content of all milk, skim milk, cream and other milk products handled;

(c) Payments to producers and cooperative associations; and

(d) The pounds of skim milk and butterfat contained in or represented by all milk, skim milk, cream and other milk products on hand at the beginning and end of each month.

§ 949.33 *Retention of records.* All books and records required under this subpart to be made available to the market administrator shall be retained by the handler for a period of three years to begin at the end of the month to which such books and records pertain: *Provided*, That if, within such three-year period, the market administrator notifies the handler in writing that the retention of such books and records, or of specified books and records, is necessary in connection with a proceeding under section 8c (15) (A) of the act or a court action specified in such notice, the handler shall retain such books and records, or specified books and records, until further written notification from the market administrator. In either case, the market administrator shall give further written notification to the handler promptly, upon determination of the litigation or where the records are no longer necessary in connection therewith.

CLASSIFICATION

§ 949.40 *Skim milk and butterfat to be classified.* All skim milk and butterfat received within the month at a pool plant in the form of producer milk, other source milk, or receipts from other pool plants shall be classified by the market administrator pursuant to the provisions of §§ 949.41 to 949.46, inclusive.

§ 949.41 *Classes of utilization.* Subject to the conditions set forth in §§ 949.43 and 949.44, the classes of utilization shall be as follows:

(a) Class I milk shall be all skim milk (including reconstituted skim milk) and butterfat (1) disposed of in the form of milk, skim milk, buttermilk, flavored milk, flavored milk drinks, cream, cultured sour cream, any mixture (except eggnog and bulk ice cream and frozen dairy product mixes) of cream and milk or skim milk; (2) contained in inventories of products designated as Class I pursuant to subparagraph (1) of this paragraph on hand at the end of the month, and (3) all other skim milk and butterfat not specifically accounted for as Class II milk;

(b) Class II milk shall be all skim milk and butterfat:

(1) Used to produce any product other than those designated as Class I in paragraph (a) of this section;

(2) Disposed of for livestock feed;

(3) In shrinkage up to 2 percent of receipts from producers; and

(4) In shrinkage of other source milk.

§ 949.42 *Shrinkage.* The market administrator shall allocate shrinkage to a handler's receipts at pool plants as follows:

(a) Compute the total shrinkage of skim milk and butterfat; and

(b) Prorate the resulting amounts between the receipts of skim milk and butterfat in producer milk and other source milk.

§ 949.43 *Responsibility of handlers and reclassification of milk.* (a) All skim milk and butterfat shall be Class I milk unless the handler who first receives such skim milk or butterfat can prove to the market administrator that such skim milk or butterfat should be classified otherwise.

(b) Any skim milk or butterfat classified as Class II milk shall be reclassified if such skim milk or butterfat is later disposed of (whether in original or other form) as Class I milk.

§ 949.44 *Transfers.* Skim milk or butterfat transferred from a pool plant in the form of milk, skim milk, or cream shall be classified:

(a) As Class I milk, if transferred to the pool plant of another handler, unless utilization as Class II milk is mutually reported in writing to the market administrator by both handlers on or before the 7th day after the end of the month within which such transfer occurred, and the amount of skim milk or butterfat so assigned to Class II does not exceed the amount of skim milk or butterfat, respectively, remaining in Class II utilization by the transferee handler after the subtraction of other source milk pursuant to § 949.46: *Provided*, That the skim milk and butterfat so transferred shall be classified so as to result in a maximum assignment of producer milk to Class I milk.

(b) As Class I milk, if transferred or diverted to a non-pool plant except as:

(1) The transferring or diverting handler claims utilization as Class II milk;

(2) The operator of the non-pool plant maintains books and records showing the receipts and utilization of all skim milk and butterfat at such plant which are made available if requested by the market administrator for the purpose of verification, and

(3) The Class I utilization of skim milk and butterfat respectively at such plant is less than the total of skim milk and butterfat so transferred plus receipts at such plant of skim milk and butterfat in milk from dairy farmers who the market administrator determines constitute the regular source of supply for fluid usage of such non-pool plant.

(c) As Class II milk if transferred subject to verification by the market administrator to a wholesale food manufacturing establishment which has no Class I disposition of skim milk or butterfat.

§ 949.45 *Computation of skim milk and butterfat in each class.* For each month, the market administrator shall correct for mathematical and for other obvious errors the report submitted by each handler and shall compute the pounds of skim milk and butterfat in Class I milk and Class II milk for such handler.

§ 949.46 *Allocation of skim milk and butterfat classified.* (a) The pounds of skim milk remaining in each class after making the following computations for each handler for each month shall be the pounds of skim milk in such class allocated to producer milk received by such handler during such month.

(1) Subtract from the total pounds of skim milk in Class I the pounds of skim milk in Class I products which were on hand at the beginning of the month;

(2) Subtract from the pounds of skim milk in each class the pounds of skim milk received from pool plants of other handlers in a form other than milk, skim milk, or cream according to its classification pursuant to § 949.41;

(3) Subtract from the pounds of skim milk remaining in Class II milk the plant shrinkage of skim milk in producer milk classified as Class II milk pursuant to § 949.41 (b) (3);

(4) Subtract from the pounds of skim milk in Class I milk the pounds of skim milk received from a non-pool plant in the form of packaged fluid milk which is not in excess of the volume of skim milk transferred in the form of bulk milk to such plant by such handler and classified as Class I milk;

(5) Subtract from the pounds of skim milk remaining in Class II milk the pounds of skim milk in other source milk which were not subject to the Class I pricing provisions of another order issued pursuant to the act, less the skim milk subtracted pursuant to subparagraph 4 of this paragraph: *Provided*, That if the pounds of skim milk to be subtracted are greater than the remaining pounds of skim milk in Class II, the balance shall be subtracted from the pounds of skim milk in Class I;

(6) Subtract from the pounds of skim milk remaining in Class II the pounds of skim milk in other source milk which were subject to the Class I pricing provisions of another order issued pursuant to the act: *Provided*, That if the pounds of skim milk to be subtracted are greater than the remaining pounds of skim milk in Class II, the balance shall be subtracted from the pounds of skim milk in Class I;

(7) Subtract the pounds of skim milk in milk, skim milk, or cream received from pool plants of other handlers from the pounds of skim milk remaining in the class to which assigned, pursuant to § 949.44 (a);

(8) Add to the pounds of skim milk remaining in Class II milk the pounds of skim milk subtracted pursuant to subparagraph (3) of this paragraph and if the pounds of skim milk remaining in all classes exceed the pounds of skim milk in milk received from producers, subtract such excess from the pounds of skim milk remaining in the various classes in series beginning with the lowest price class.

(b) Determine the pounds of butterfat in each class to be allocated to producer milk in the same manner prescribed for skim milk in paragraph (a) of this section.

(c) Determine the weighted average butterfat content in Class I and Class II milk computed pursuant to paragraphs (a) and (b) of this section.

MINIMUM PRICES

§ 949.50 *Minimum prices.* Subject to the appropriate butterfat differential computed pursuant to § 949.54 each handler shall pay in the manner set forth in §§ 949.70 through 949.85 for milk received at his pool plant from producers at no less than the prices per hundredweight set forth in §§ 949.51 and 949.53.

§ 949.51 *Class I milk.* The Class I price shall be an amount calculated as follows:

(a) Multiply the formula index computed pursuant to § 949.52 by $5.99, and divide by 100.

(b) Adjust the price calculated pursuant to paragraph (a) of this section so that it does not exceed the price calculated pursuant to paragraph (e) of this section by less than $2.00 or more than $3.00.

(c) For the months of April through June subtract and for the months of September through November add 50 cents.

(d) To the foregoing price add 3 cents for each percentage point which the utilization percentage calculated pursuant to paragraph (f) of this section is less than 100 or subtract 3 cents for each percentage point which such utilization percentage is more than 110 provided that in no case shall more than 60 cents be added to or subtracted from the price because of the provisions of this paragraph. The resulting amount rounded to the nearest full cent shall be the Class I price.

(e) The average of the basic or field prices per hundredweight reported to have been paid or to be paid for milk of 3.5 percent butterfat content received from farmers during the preceding month at the following plants or places for which prices have been reported to the market administrator or to the United States Department of Agriculture, divided by 3.5 and multiplied by 4.0:

*Present Operator and Location*

Borden Co., Mount Pleasant, Mich.
Carnation Co., Sparta, Mich.
Pet Milk Co., Hudson, Mich.
Pet Milk Co., Wayland, Mich.
Pet Milk Co., Coopersville, Mich.
Borden Co., Black Creek, Wis.
Borden Co., Orfordville, Wis.
Borden Co., New London, Wis.
Carnation Co., Chilton, Wis.
Carnation Co., Berlin, Wis.
Carnation Co., Richland Center, Wis.
Carnation Co., Oconomowoc, Wis.
Pet Milk Co., New Glarus, Wis.
Pet Milk Co., Belleville, Wis.
White House Milk Co., Manitowoc, Wis.
White House Milk Co., West Bend, Wis.

(f) The percentage calculated from receipts and utilization for the first and second preceding months as follows shall be known as the utilization percentage:

(1) From the total gross pounds of Class I milk determined pursuant to § 949.40 for all pool plants subtract the following:

(i) Inventories as defined in § 949.41 (a) (2);

(ii) The pounds of skim milk and butterfat subtracted pursuant to § 949.46 (a) (4) and the corresponding step of (b);

(iii) The pounds of skim milk and butterfat subtracted pursuant to § 949.46 (a) (7) and the corresponding step of (b);

(2) Add the Class I milk disposed of in the marketing area by non-pool plants, except those partially exempted from the provisions of this part pursuant to § 949.60.

(3) Divide the total pounds of producer milk received during such period by

the total net Class I sales determined pursuant to this paragraph and multiply by 100. Round the result to the nearest whole percentage point.

§ 949.52 *Formula index.* Based on the latest data published not later than the 5th day of each month, the market administrator shall calculate a formula index for the current month as follows:

(a) Divide the monthly wholesale price index for all commodities as announced by the Bureau of Labor Statistics, U. S. Department of Labor, by the average of such index for the years 1948 through 1950 and multiply by 100.

(b) Divide by 3.586 the average of the three latest monthly indexes of retail sales of non-durable goods as announced by the Department of Business of the University of Texas, Austin, Texas.

(c) Compute a labor-feed index as follows:

(1) Divide by 0.0485 the daily farm wage rate without board or room for the State of Texas as reported by the U. S. Department of Agriculture and multiply by 0.3;

(2) Divide by 0.03971 the average price paid per hundredweight for all mixed dairy feed in the State of Texas as reported by the U. S. Department of Agriculture and multiply by 0.7;

(3) Add together the amounts determined pursuant to subparagraphs (1) and (2) of this paragraph.

(d) Add the amounts determined pursuant to paragraphs (a), (b), and (c) of this section, divide by 3 and round to the nearest one-tenth.

§ 949.53 *Class II milk.* The prices for Class II milk shall be determined according to the following computations:

(a) From the simple average as computed by the market administrator of the daily wholesale selling prices (using the midpoint of any price range as one price) of Grade A (92-score) bulk creamery butter per pound at Chicago as reported by the U. S. Department of Agriculture during the month, subtract 3 cents, add 20 percent thereof and multiply by 4.0;

(b) From the average of the carlot prices per pound of nonfat dry milk solids for human consumption, spray process, f. o. b. manufacturing plants in the Chicago area as reported by the U. S. Department of Agriculture for the period from the 26th day of the preceding month through the 25th day of the current month, subtract 5 cents, multiply by 8.16; and

(c) Add together the amounts computed pursuant to paragraphs (a) and (b) of this section and round to the nearest full cent.

§ 949.54 *Butterfat differentials to handlers.* If the average butterfat content of the milk of any handler allocated to any class pursuant to § 949.46 is more or less than 4.0 percent, there shall be added to the respective class price, computed pursuant to §§ 949.51 and 949.53 for each one-tenth of 1 percent that the average butterfat content of such milk is above 4.0 percent, or subtracted for each one-tenth of 1 percent that such average butterfat content is below 4.0 percent, an amount equal to the butterfat differential computed by multiplying the simple average, as computed by the market administrator, of the daily wholesale prices per pound (using the midpoint of any price range as one price) of Grade A (92-score) bulk creamery butter at Chicago as reported by the United States Department of Agriculture during the appropriate month by the applicable factor listed below:

(a) *Class I milk.* Multiply such price for the preceding month by 0.125;

(b) *Class II milk.* Multiply such price for the current month by 0.120.

§ 949.55 *Use of equivalent factors in formulas.* If for any reason a price, index, or wage rate, specified in this part for use in computing class prices and for other purposes is not reported or published in the manner described in this part, the market administrator shall use a price, index, or wage rate, determined by the Secretary to be equivalent to or comparable with the factor specified.

APPLICATION OF PROVISIONS

§ 949.60 *Handlers subject to other orders.* In the case of any handler who the Secretary determines disposes of a greater portion of his milk as Class I milk in another marketing area regulated by a milk marketing agreement or order issued pursuant to the act, the provisions of this subpart shall not apply except as follows:

(a) The handler shall, with respect to the total receipts of skim milk and butterfat, make reports to the market administrator at such time and in such manner as the market administrator may require and allow verification of such reports by the market administrator.

(b) The handler shall pay on or before the 13th day after the end of the month to the market administrator for deposit into the producer-settlement fund an amount determined as follows:

(1) Compute the total skim milk and butterfat disposed of by such handler during the month as Class I milk on retail or wholesale routes (including sales through vendors) in the marketing area;

(2) From such handler's total Class I sales, pursuant to the order regulating the pricing of milk at such handler's plant, subtract the total quantity of skim milk and butterfat received from producers pursuant to such order and allocated to Class I milk;

(3) Multiply the hundredweight computed pursuant to subparagraph (1) or (2) of this paragraph, whichever is less, by the rate determined pursuant to § 949.65.

§ 949.61 *Handlers operating non-pool plants.* None of the provisions from §§ 949.44 through 949.55, inclusive, or from §§ 949.70 through 949.84, inclusive, shall apply in the case of a handler in his capacity as the operator of a non-pool plant, except that such handler shall, on or before the 13th day after the end of each month, pay to the market administrator for deposit into the producer-settlement fund pursuant to § 949.82 an amount calculated by multiplying the total hundredweight of butterfat and skim milk disposed of as Class I milk from such plant to retail or wholesale outlets (including sales by vendors and plant stores) in the marketing area during the month, by the rate determined pursuant to § 949.65.

UNPRICED MILK

§ 949.65 *Rate of payment on unpriced milk.* The rate of payment per hundredweight to be made by handlers on unpriced Class I milk shall be any plus amount calculated as follows:

(a) During the months of February through July:

(1) Subtract the Class II price, adjusted by the Class II butterfat differential, from the Class I price, adjusted by the Class I butterfat differential;

(2) From such difference subtract 10 cents and an amount calculated by multiplying 0.16 cent by the miles (shortest highway distance) from the edge of the marketing area to the plant at which the unpriced milk originates.

(b) During the months of January and August, subtract from the Class I price, adjusted by the Class I butterfat differential, the uniform price to producers, adjusted by the Class I differential.

DETERMINATION OF UNIFORM PRICES TO PRODUCERS

§ 949.70 *Computation of value of milk for each handler.* For each month the market administrator shall compute the value of milk for each handler as follows:

(a) Multiply the quantity of producer milk in each class computed pursuant to § 949.46 by the applicable Class price and add together the resulting amounts;

(b) Add the amounts computed by multiplying the pounds of overage deducted from each class pursuant to § 949.46 (a) (8) and (b) by the applicable class price, and

(c) For the months of January through August add an amount computed by multiplying the hundredweight of other source skim milk and butterfat subtracted from Class I milk pursuant to § 949.46 (a) (5) and (b) by the rate computed pursuant to § 949.65, applicable at the nearest plants from which an equivalent amount of such other source milk was received.

§ 949.71 *Computation of uniform price for pool milk.* For each month the market administrator shall compute the uniform price for all milk received from producers as follows:

(a) Combine into one total the amounts computed pursuant to § 949.70 (a) and (b) for all handlers who made the reports prescribed in § 949.30 and who are not in default of payments required pursuant to §§ 949.80 and 949.83;

(b) Add an amount representing not less than one-half of the unobligated cash balance in the producer-settlement fund account pursuant to § 949.82 (a);

(c) Add during each of the months of September through December an amount equivalent to one-fourth of the total in payments to the producer-settlement fund for the immediately preceding months of January through August pursuant to § 949.82 (b);

(d) Subtract if the average butterfat content of the producer milk of handlers included in the computations pursuant to paragraph (a) of this section is

greater than 4.0 percent, or add if such average is less than 4 percent, an amount computed by multiplying the amount by which such average butterfat content varies from 4.0 percent by the butterfat differential computed pursuant to § 949.81 and multiply the resulting amount by the hundredweight of such milk;

(e) Divide by the total hundredweight of producer milk of handlers included in the computation pursuant to paragraph (a) of this section;

(f) Subtract not less than 4 cents nor more than 5 cents. The resulting figure shall be the uniform price per hundredweight for all milk of 4.0 percent butterfat content received from producers.

PAYMENT FOR MILK

§ 949.80 *Time and method of payment.* Each handler shall make payment as follows:

(a) On or before the last day of each month to each producer for milk received during the first 15 days of such month at not less than the price per hundredweight for Class II milk for the preceding month.

(b) On or before the 15th day after the end of the month during which the milk was received, to each producer at not less than the uniform price per hundredweight computed for such month pursuant to § 949.71 subject to the following adjustments: (1) The butterfat differential pursuant to § 949.81, (2) the payment made pursuant to paragraph (a) of this section, (3) marketing service deductions pursuant to § 949.86, and (4) proper deductions authorized by the producers: *Provided,* That if by such date such handler has not received full payment pursuant to § 949.84, he may reduce his total payment to all producers pro rata by not more than the amount of reduction in payments from the market administrator; he shall, however, complete such payments pursuant to this paragraph not later than the date for making such payments next following receipt of the balance due from the market administrator.

(c) In making the payments to producers pursuant to paragraph (b) of this section each handler shall furnish each producer with a supporting statement, in such form that it may be retained by the producer, which shall show:

(1) The month for which payment is made and the identity of the handler and of the producer;

(2) The total pounds and average butterfat test of milk received from such producer;

(3) The minimum rate or rates at which payment to such producer is required;

(4) The rate which is used in making the payment, if such rate is other than the applicable minimum rate;

(5) The amount or the rate per hundredweight of each deduction claimed by the handler, together with a description of the respective deductions; and

(6) The net amount of payment to such producer.

§ 949.81 *Producer butterfat differential.* In making payments pursuant to § 949.80 there shall be added to the uniform price for each one-tenth of one percent that the average butterfat content of such milk is above 4.0 percent not less than, or there may be deducted from the uniform price for each one-tenth of one percent that the average butterfat content of such milk is below 4.0 percent not more than, an amount computed as follows: Multiply by 1.1 the simple average computed by the market administrator of the daily wholesale selling prices (using the midpoint of any price range as one price) of Grade A (92-score) bulk creamery butter per pound at Chicago as reported by the United States Department of Agriculture during the month, divide the result by 10 and round to the nearest one-tenth of a cent.

§ 949.82 *Producer-settlement fund.* The market administrator shall establish a separate fund known as the "producer-settlement fund" into which he shall deposit all payments made by handlers, pursuant to §§ 949.60, 949.61, 949.83, and 949.85 and out of which he shall make all payments, pursuant to §§ 949.84 and 949.85. This fund shall be maintained by the market administrator in two separate accounts as follows:

(a) Payments made by handlers pursuant to §§ 949.83 and 949.85 less the amounts determined pursuant to § 949.70 (c).

(b) The payments required pursuant to §§ 949.60, 949.61, and the amounts determined pursuant to § 949.70 (c).

§ 949.83 *Payments to the producer-settlement funds.* On or before the 13th day after the end of the month during which the milk was received, each handler, including a cooperative association which is a handler, shall pay to the market administrator the amount of money if any, by which the value of the milk received by such handler from producers as determined pursuant to § 949.70 is greater than the value of such milk calculated at the uniform price adjusted by the producer butterfat differential.

§ 949.84 *Payments out of the producer-settlement fund.* On or before the 14th day after the end of the month during which the milk was received, the market administrator shall pay to each handler, including a cooperative association which is a handler, the amount, if any, by which the value of the milk received by such handler from producers during the month as determined pursuant to § 949.70 is less than the value of such milk calculated at the uniform price adjusted by the producer butterfat differential. During each of the months of September through December one-fourth of the amount established pursuant to § 949.82 (b) for the immediately preceding months of January through August shall be applied by the market administrators to such payments.

§ 949.85 *Adjustment of accounts.* Whenever audit by the market administrator of any handler's books, reports, records, or accounts discloses errors resulting in money due:

(a) The market administrator from such handler;

(b) Such handler from the market administrator; or

(c) Any producer or cooperative association from such handler, the market administrator shall promptly notify such handler of any amount so due and payment thereof shall be made on or before the next date for making payment set forth in the provisions under which such error occurred.

§ 949.86 *Marketing services*—(a) *Marketing service deduction.* Except as set forth in paragraph (b) of this section each handler, in making payments to producers (other than himself) shall make a deduction of six cents per hundredweight of milk or such lesser deduction as the Secretary from time to time may prescribe. Such deductions shall be paid by the handler to the market administrator on or before the 15th day after the end of the month. Such moneys shall be expended by the market administrator for verification of weights and tests of milk received from such producers and in providing market information to such producers.

(b) *Marketing service deduction with respect to producers who are members of or are marketing through a cooperative association.* In the case of each producer who is a member of, or who has given written authorization for the rendering of marketing services and the taking of a deduction therefor to a cooperative association, which the Secretary as determined is performing the services described in paragraph (a) of this section, such handler, in lieu of the deduction specified under paragraph (a) of this section, shall deduct from the payments to such producer the amount per hundredweight specified by such association which is not in excess of the rate authorized by such producer and shall pay such deduction to the cooperative association entitled to receive it on or before the 15th day after the end of the month during which such milk was received.

§ 949.87 *Payment of administration expense.* As his pro rata share of the expense of administration of this part each handler shall pay to the market administrator on or before the 15th day after the end of the month for such month 4 cents per hundredweight, or such lesser amount as the Secretary may from time to time prescribe, with respect to skim milk and butterfat (a) received from producers, (b) received at a pool plant as other source milk and allocated to Class I milk, or (c) distributed as Class I milk in the marketing area from a non-pool plant.

§ 949.88 *Termination of obligation.* The provisions of this section shall apply to any obligation under this part for the payment of money.

(a) The obligation of any handler to pay money required to be paid under the terms of this part shall, except as provided in paragraphs (b) and (c) of this section, terminate two years after the last day of the calendar month during which the market administrator receives the handler's utilization report on the milk involved in such obligation, unless within such two-year period the market administrator notifies the handler in writing that such money is due and pay-

able. Service of such notice shall be complete upon mailing to the handler's last known address, and it shall contain, but need not be limited to, the following information:

(1) The amount of the obligation;

(2) The delivery period during which the milk, with respect to which the obligation exists, was received or handled; and

(3) If the obligation is payable to one or more producers or to an association of producers, the name of such producer(s) or association of producers, or if the obligation is payable to the market administrator, the account for which it is to be paid.

(b) If a handler fails or refuses, with respect to any obligation under this part, to make available to the market administrator or his representatives all books and records required by this subpart to be made available, the market administrator may, within the two-year period provided for in paragraph (a) of this section, notify the handler in writing of such failure or refusal. If the market administrator so notifies a handler, the said two-year period with respect to such obligation shall not begin to run until the first day of the calendar month following the month during which all such books and records pertaining to such obligation are made available to the market administrator or his representatives.

(c) Notwithstanding the provisions of paragraphs (a) and (b) of this section, a handler's obligation under this part to pay money shall not be terminated with respect to any transaction involving fraud or willful concealment of a fact, material to the obligation, on the part of the handler against whom the obligation is sought to be imposed.

(d) Any obligation on the part of the market administrator to pay a handler any money which such handler claims to be due him under the terms of this part shall terminate two years after the end of the calendar month during which the milk involved in the claim was received if an underpayment is claimed, or two years after the end of the calendar month during which the agreement (including deduction or set-off by the market administrator) was made by the handler if a refund on such payment is claimed, unless such handler, within the applicable period of time, files, pursuant to section 8c (15) (A) of the act, a petition claiming such money.

EFFECTIVE TIME, SUSPENSION OR TERMINATION

§ 949.90 *Effective time.* The provisions of this part or any amendment to this part shall become effective at such time as the Secretary may declare and shall continue in force until suspended or terminated pursuant to § 949.91.

§ 949.91 *Suspension or termination.* The Secretary may suspend or terminate this part or any provision of this part whenever he finds this part or any provision of this part obstructs or does not tend to effectuate the declared policy of the act. This part shall terminate in any event whenever the provisions of the act authorizing it cease to be in effect.

§ 949.92 *Continuing obligations.* If, upon the suspension or termination of any or all provisions of this part there are any obligations thereunder the final accrual or ascertainment of which requires further acts by any person (including the market administrator), such further acts shall be performed notwithstanding such suspension or termination.

§ 949.93 *Liquidation.* Upon the suspension or termination of the provisions of this part, except this section, the market administrator, or such other liquidating agent as the Secretary may designate, shall if so directed by the Secretary, liquidate the business of the market administrator's office, dispose of all property in his possession or control, including accounts receivable, and execute and deliver all assignments or other instruments necessary or appropriate to effectuate any such disposition. If a liquidating agent is so designated, all assets, books and records of the market administrator shall be transferred promptly to such liquidating agent. If, upon such liquidation, the funds on hand exceed the amounts required to pay outstanding obligations of the office of the market administrator and to pay necessary expenses of liquidation and distribution, such excess shall be distributed to contributing handlers and producers in an equitable manner.

MISCELLANEOUS PROVISIONS

§ 949.100 *Agents.* The Secretary may, by designation in writing, name any officer or employee of the United States to act as his agent or representative in connection with any of the provisions of this part.

§ 949.101 *Separability of provisions.* If any provisions of this part, or its application to any person or circumstances, is held invalid, the applications of such provisions and the remaining provisions of this part to other persons or circumstances, shall not be affected thereby.

## CIVIL AERONAUTICS BOARD

### [ 14 CFR Parts 40, 41, 42, 60 ]

AMENDMENT OF CIVIL AIR REGULATIONS TO PERMIT USE OF NAUTICAL UNITS IN CONTROL OF AIR TRAFFIC AND TO REQUIRE THEIR USE IN AIR CARRIER OPERATIONS

EXTENSION OF TIME FOR FILING COMMENTS

On November 27, 1953, the Board circulated Draft Release No. 53-30 and published as a notice of proposed rule making in the FEDERAL REGISTER on December 2, 1953 (18 F. R. 7659) proposed amendments to the Civil Air Regulations to permit the use of nautical units in the control of air traffic and to require their use in air carrier operations. Reference is made to the notice published December 2, 1953, and Draft Release No. 53-30 for a full explanation of the purpose and background of the proposed rules.

In the notice published December 2, 1953, the Board indicated that it would give consideration to all comment submitted before January 4, 1954, before taking final action on the proposed rule. Meanwhile, interested persons have requested additional time for the submission of comment in order to permit further analysis of the effect of the proposed rule.

In view of the foregoing, the time for submission of comment on the proposed rule is being extended and written comment submitted prior to February 1, 1954, will be considered by the Board before taking final action on the proposed rule. Comments should be submitted in duplicate addressed to the Civil Aeronautics Board, attention of the Bureau of Safety Regulation, Washington 25, D. C. and will be available after February 3, 1954, for examination by interested persons at the Docket Section of the Board, Room 5412, Department of Commerce Building, Washington, D. C.

(Sec. 205, 52 Stat. 984; 49 U. S. C. 425. Interpret or apply secs. 601-610, 52 Stat. 1007-1012, as amended; 49 U. S. C. 551-560)

Dated: December 16, 1953, at Washington, D. C.

By the Civil Aeronautics Board.

## DEPARTMENT OF HEALTH, EDUCATION, AND WELFARE

### Food and Drug Administration

### [ 21 CFR Part 135 ]

[Docket No. FDC-60]

COLOR CERTIFICATION

NOTICE OF HEARING TO AMEND REGULATIONS

In the matter of amending §§ 135.3 and 135.11 of the color certification regulations:

Upon the initiative of the Secretary of Health, Education, and Welfare and in accordance with the provisions of the Federal Food, Drug, and Cosmetic Act (secs. 406 (b), 504, 604, 701, 52 Stat. 1049, 1052, 1055; 21 U. S. C. 346 (b), 354, 364, 371; 67 Stat. 18), notice is hereby given that a public hearing will be held commencing at 10 o'clock in the morning of January 19, 1954, in Room G-747A, Health, Education, and Welfare Building, 330 Independence Avenue SW., Washington, D. C., for the purpose of receiving evidence upon the basis of which to amend the regulations for the certification of coal-tar colors (21 CFR Part 135, as amended 21 CFR, 1952 Supp.) in the following respects:

1. It is proposed to amend § 135.3 *List of straight colors and specifications for their certification for use in foods, drugs, and cosmetics* by deleting the names of the following straight colors and the respective specifications therefor:

FD&C Red No. 32.
FD&C Orange No. 1.
FD&C Orange No. 2.

2. It is proposed to amend § 135.11 (d) (2) to read as follows:

§ 135.11 *Labeling.* • • •

(d) No batch of a mixture shall be certified under this part if:

• • • • • •

(2) The name of such mixture is the same as or simulates the name of a previously certified batch of a mixture containing a different substance, or a different percentage of a pure dye; but this provision shall not apply if:

(i) The person who requests certification of such batch is the owner of such name and has given 3 months' written notice to the Food and Drug Administration specifying the change to be made in the composition of such mixture; or

(ii) Such change results from removal of a color from the listings in §§ 135.3, 135.4, or § 135.5.

At the hearing, evidence will be restricted to testimony and exhibits relevant and material to these proposals. The hearing will be conducted in accordance with the rules of practice provided therefor. Mr. Leonard D. Hardy is hereby designated as presiding officer to conduct the hearing in the place of the Secretary, with full authority to administer oaths and affirmations and to do all other things appropriate to the conduct of the hearing. The presiding officer is required to certify the entire record of the proceedings to the Secretary for initial decision. The proposed amendment for consideration at the hearing is subject to adoption, rejection, or modification by the Secretary as the evidence adduced at the hearing may require.

Dated: December 15, 1953.

[SEAL] OVETA CULP HOBBY, *Secretary.*

## HOUSING AND HOME FINANCE AGENCY

### Home Loan Bank Board

### [ 24 CFR Part 145 ]

[No. 26672]

FEDERAL SAVINGS AND LOAN SYSTEM OPERATIONS

APPROVAL OF BRANCH OFFICES AND AGENCIES

DECEMBER 15, 1953.

Resolved that, pursuant to § 142.1 of the rules and regulations for the Federal Savings and Loan System (24 CFR 142.1) and Part 108 of the general regulations of the Home Loan Bank Board (24 CFR Part 108), it is hereby proposed to amend §§ 145.14 and 145.15 of the rules and regulations for the Federal Savings and Loan System (24 CFR 145.14, 145.15) as follows:

1. Section 145.14 to read as follows:

§ 145.14 *Branch offices*—(a) *Establishment.* No Federal association may establish or maintain a branch office without the prior written approval of the Board. Each application by a Federal association for permission to establish or maintain a branch office shall state the need for such branch office; the functions to be performed; the personnel and office facilities to be provided and the estimated annual volume of business, income, and expenses of such branch office. No application for the establishment by a Federal association of a branch office will be approved unless in the judgment of the Board a necessity exists for such branch in the community to be served, nor unless there is a reasonable probability of its usefulness and success, nor unless the same can be established without undue injury to properly conducted existing local thrift and home-financing institutions. No application to establish a branch office will be approved by the Board where the location of such branch office, or the number of branches which the applicant would have if such application were approved, would not be permitted by law or practice in the State, district, or Territory in which the home office of the applicant is located with respect to branches or branch offices of any one or more types of financial institutions located in such State, district, or Territory, authorized to provide savings, thrift, or home-financing facilities to the public: *Provided*, That the Board may approve, for a Federal association, as branch offices, any or all existing offices of two or more associations involved in any merger into such Federal association where any one or more types of financial institutions located in the State, district, or Territory, authorized to provide savings, thrift, or home-financing facilities to the public, could be permitted to do the same: *And provided further*, That, for the purpose of determining practice in any State, district, or Territory within the meaning of this section the operation of chain, group or affiliated financial institutions shall be regarded as the operation of branch offices, and the term branch office, for the purposes of this section, shall include any office of a financial institution at which savings may be received. The approval of the establishment or maintenance of a branch office shall not in any manner enlarge the lending powers of any Federal association as provided by law and the rules and regulations in this part.

(b) *Operation.* Any business of a Federal association, except the approval of loans, may be transacted at a branch office, as authorized by its board of directors. A detailed record of all transactions of any branch office of a Federal association shall be maintained at such office and such control records as may be necessary for the proper conduct of such association's business shall be furnished by such branch office to its home office.

2. The proviso at the end of the first sentence of § 145.15 to read as follows: "*Provided*, That no loans may be approved and no savings account business may be transacted at any agency of a Federal association which is authorized to be established or maintained after."

3. The following provisions to be substituted for the third sentence of § 145.15: "A Federal association may, without approval by the Board, establish or maintain any agency, the functions of which are limited to the servicing of loans and contracts, or to the management or sale of real estate owned, or to any combination of such functions, if such agency is located within its regular lending area, as defined in § 145.6-6, or located elsewhere, provided (a) the association has received express authority from the Federal Savings and Loan Insurance Corporation to originate loans in such locality on the security of improved real estate other than insured or guaranteed loans or (b) the agency is an institution which is insured by the Federal Savings and Loan Insurance Corporation or by the Federal Deposit Insurance Corporation. A Federal association may, without prior approval by the Board, establish or maintain temporary or incidental agencies for individual transactions or for special temporary purposes."

Resolved further, that a hearing will be held on February 1, 1954, at 10 o'clock in the forenoon in Room 827, Federal Home Loan Bank Board Building, 101 Indiana Avenue, NW., Washington, D. C., before the Home Loan Bank Board, a member thereof, or a Hearing Officer designated by the Board, for the purpose of receiving evidence, oral views and arguments on said proposed amendments of the rules and regulations for the Federal Savings and Loan System, if written notice of intention to appear at said hearing is received by the Secretary to the Home Loan Bank Board at least five days before said date. If no such written notice of intention to appear has been received by the Secretary to the Board at least five days before the date set for the hearing, the hearing will be dispensed with. Whether or not a hearing is held, written data, views or arguments on said proposed amendments which are received by the Secretary to the Home Loan Bank Board on or before January 27, 1954, or prior to the conclusion of the hearing, if held, will be considered by the Home Loan Bank Board in connection with its consideration of the proposed amendments of the said rules and regulations.

(Sec. 5, 48 Stat. 132, as amended; 12 U. S. C. 1464 and Supp.)

By the Home Loan Bank Board.

[SEAL] J. FRANCIS MOORE, *Secretary.*

[F. R. Doc. 53-10565; Filed, Dec. 18, 1953; 8:52 a. m.]

### [ 24 CFR Parts 161, 163 ]

[No. 6656]

FEDERAL SAVINGS AND LOAN INSURANCE CORPORATION OPERATIONS

DEFINITION OF TERM "PRINCIPAL OFFICE"; ADVERTISING BY BRANCH OFFICES

DECEMBER 15, 1953.

Resolved that, pursuant to Part 108 of the general regulations of the Home Loan Bank Board (24 CFR Part 108) and § 167.1 of the rules and regulations for Insurance of Accounts (24 CFR 167.1), it is hereby proposed that the rules and regulations for Insurance of Accounts (24 CFR, Chapter I, Subchapter D) be amended in the following particulars:

a. A new § 161.7 (24 CFR 161.7) immediately following § 161.6 be added, reading as follows:

§ 161.7 *Principal office.* The term "principal office" means the home office

of an institution established as such in conformity with the laws under which the insured institution is organized.

b. Section 163.27 (24 CFR 163.27) be amended to read as follows:

§ 163.27 *Advertising must be accurate.* No insured institution shall use advertising (whether printed, radio, display, or of any other nature) or make any representation which is inaccurate in any particular or which in any way misrepresents its services, contracts, investments, or financial condition. When an insured institution is operating a branch office or offices outside of the municipality in which its principal office is located, all advertising of, or by, any such branch office, shall state clearly the location of the principal office of such insured institution.

Resolved further, that a hearing will be held on February 1, 1954 at 10 o'clock in the forenoon in Room 827, Federal Home Loan Bank Board Building, 101 Indiana Avenue, NW., Washington, D. C., before the Home Loan Bank Board, a member thereof, or a Hearing Officer designated by the Board, for the purpose of receiving evidence, oral views and arguments on said proposed amendments of the rules and regulations for Insurance of Accounts, if written notice of intention to appear at said hearing is received by the Secretary to the Home Loan Bank Board at least five days before said date. If no such written notice of intention to appear has been received by the Secretary to the Board at least five days before the date set for the hearing, the hearing will be dispensed with. Whether or not a hearing is held, written data, views or arguments on said proposed amendments which are received by the Secretary to the Home Loan Bank Board on or before January 27, 1954, or prior to the conclusion of the hearing, if held, will be considered by the Home Loan Bank Board in connection with its consideration of the proposed amendments of the said rules and regulations.

(Sec. 402, 48 Stat. 1256; 12 U. S. C. 1725)

By the Home Loan Bank Board.

[SEAL] J. FRANCIS MOORE, *Secretary.*

## DEPARTMENT OF AGRICULTURE

### Production and Marketing Administration

UPLAND COTTON AND EXTRA LONG STAPLE COTTON

NOTICE OF REDELEGATION OF FINAL AUTHORITY OF STATE PRODUCTION AND MARKETING ADMINISTRATION COMMITTEES

Section 722.529 (b) of the "Marketing Quota Regulations Relating to Apportionment of the National Acreage Allotment for the 1954 Crop of Upland Cotton to States, Counties, and Farms" (18 F. R. 7527) and § 722.1127 (b) of the "Marketing Quota Regulations Relating to Apportionment of the National Acreage Allotment for the 1954 Crop of Extra Long Staple Cotton to States, Counties, and Farms" (18 F. R. 7883), issued pursuant to the marketing quota provisions of the Agricultural Adjustment Act of 1938, as amended (7 U. S. C. 1301–1376), provide that any authority delegated to a State Production and Marketing Administration Committee by such regulations may be redelegated by the State committee. In accordance with section 3 (a) (1) of the Administrative Procedure Act (5 U. S. C. 1002 (a)) which requires delegations of final authority to be published in the FEDERAL REGISTER, there are set out herein the redelegations of final authority which have been made by State Production and Marketing Administration Committees of authority vested in such committees by the Secretary of Agriculture in the regulations referred to above. Shown below are the sections of the regulations in which such authority appears and the persons to whom the authority has been redelegated:

ALABAMA

Section 722.517 (b)—B. L. Collins, State Administrative Officer.

Section 722.529 (a)—B. L. Collins, State Administrative Officer; and the following ASC Farmer Fieldmen: Gerald Fowler, H. H. Edmondson, Curtis A. Hicks and M. H. Lane.

ARKANSAS

Section 722.517 (b)—N. A. McGhee, Acting State Administrative Officer; M. E. Finn, Assistant Chief, Administrative Division; and Rex A. Owens, Program Specialist (Production Adjustment).

Section 722.529 (a)—N. A. McGhee, Acting State Administrative Officer; M. E. Finn, Assistant Chief, Administrative Division; Rex A. Owens, Program Specialist (Production Adjustment); the following ASC Farmer Fieldmen: Hoyte N. Rowland, Coy E. Scifres, Burle E. McMahen, and Maurice J. Mills; and the following County ASC Auditors: Walter W. Sumner, Robert E. Golden, Joe A. Parr and Erle W. Collier.

CALIFORNIA

Sections 722.529 (a) and 722.1127 (a)—J. T. Moody, Program Specialist; and Wesley Schlotzhauer, Program Specialist.

FLORIDA

Sections 722.529 (a) and 722.1127 (a)—R. S. Dennis, State Administrative Officer; O. P. McArthur, Program Specialist; and to the following ASC Farmer Fieldmen: F. M. Vickery, Jr., A. E. Raines, A. E. Dunscombe, Guy Cox and R. O. Bell.

GEORGIA

Sections 722.529 (a) and 722.1127 (a)—T. R. Breedlove, Chairman, State Committee; W. H. Booth, Member, State Committee; C. F. Fleming, Administrative Assistant to State Committee; R. H. Patat, Chief, Audit and Statistical Division; and the following ASC Farmer Fieldmen: E. R. Leake, P. M. Hardman, J. B. Bilderback, P. M. Mix, W. B. Suddeth, Robert E. Bolton, G. W. Rountree, and William M. Phillips.

ILLINOIS

Sections 722.516, 722.517 and 722.529 (a)—Winstead R. Davie, ASC Farmer Fieldman; and Arnold A. Allan, Program Specialist.

KENTUCKY

Sections 722.516 and 722.517—Clarence L. Miller, Chairman, State Committee; James R. Rash, Jr., Member, State Committee; Walker R. Reynolds, Member, State Committee; W. L. Rouse, State Administrative Officer; Roger Karrick, Program Specialist; and Homer Yonts, Program Specialist.

Section 722.529 (a)—Clarence L. Miller, Chairman, State Committee; James R. Rash, Jr., Member, State Committee; Walker R. Reynolds, Member, State Committee; W. L. Rouse, State Administrative Officer; Roger Karrick, Program Specialist; Homer Yonts, Program Specialist; Kenneth Grogan, ASC Farmer Fieldman and Carlos Thompson, ASC Farmer Fieldman.

LOUISIANA

Section 722.529 (a)—C. E. Slack, State Administrative Officer; J. R. Bath, Program Specialist; R. W. May, Administrative Assistant; Leyton Hawthorne, Administrative Assistant; R. C. Smith, County ASC Auditor; and the following ASC Farmer Fieldmen: H. F. Spencer, Don L. Rockett, L. L. Sanders and C. J. Clayton.

MISSISSIPPI

Sections 722.517 (d) (3) (ii) and 722.518—State Administrative Officer.

Section 722.528—State Administrative Officer; Chief, Program Division; and Administrative Assistant for Marketing Quotas.

Section 722.529 (a)—State Administrative Officer; Chief, Program Division; Administrative Assistant for Marketing Quotas; all ASC Farmer Fieldmen; and all County ASC Auditors.

MISSOURI

Sections 722.516, 722.517 and 722.529 (a)—Harry E. Campbell, Member, State Committee; Claude Bowles, Program Specialist; and Elmer Kinkade, ASC Farmer Fieldman.

NEW MEXICO

Sections 722.517 (b) and 722.1117 (b)—Donald W. Vance, Administrative Assistant; and W. C. Hutchins, Jr., Administrative Assistant.

Sections 722.529 (a) and 722.1127 (a)—Donald W. Vance, Administrative Assistant; W. C. Hutchins, Jr., Administrative Assistant; and the following ASC Farmer Fieldmen: Samuel G. Cotton, Clarence E. Habiger, and Rolland D. Lloyd.

NEVADA

Sections 722.517 (b) and 722.529 (a)—Ervin H. Christensen, Administrative Assistant.

NORTH CAROLINA

Section 722.516 (c) (3)—H. D. Godfrey, State Administrative Officer.

Section 722.529 (a)—A. P. Hassell, Jr., Chief, Administrative Division; all of the ASC Farmer Fieldmen.

OKLAHOMA

Section 722.529 (a)—H. P. Moffitt, State Administrative Officer; Fred E. Percy, Chief of Programs Division; Samuel A. Shelby, Program Specialist; and the following ASC Farmer Fieldmen: Russell D. Cocanougher, Orth L. Costley, Lee I. Garrett, Roger P. Bush, Jr., S. L. Clifton and Byron Daniel.

PUERTO RICO

Sections 722.1116 and 722.1117—G. Laguarda, Director Caribbean Area ASC Office.

TENNESSEE

Section 722.517 (b)—Joe D. Ramsey, Program Specialist; John E. Hudson, Assistant Program Specialist.

Section 722.529 (a)—Joe D. Ramsey, Program Specialist; John E. Hudson, Assistant Program Specialist; the following ASC Farmer Fieldmen: James G. Barrett, Clarence W. Baumgardner, Foster E. Bradshaw, John R. Collier, Levie W. Dickerson, Alvis A. Johnson and Ray E. Wilkinson.

TEXAS

Sections 722.517 (b) and 722.1117 (b)—A Committee consisting of Ralph T. Price, State Administrative Officer; Edwin F. Rollins, Program Specialist; and Henry H. Marshall, Administrative Officer.

Sections 722.529 (a) and 722.1127 (a)—Henry H. Marshall, Administrative Officer; Charles H. Galloway, Administrative Assistant; Paul H. Johnson, Program Specialist; Edwin F. Rollins, Program Specialist; and the following ASC Farmer Fieldmen: Wartham H. Seale, Dale Carter, Ward M. Taylor, Thomas E. Rattan, Allan J. McMillan, John W. Gamble, R. C. Flatt, Irvin H. Lloyd, W. I. Chenault, Ralph Griffin, V. M. Dziewas and Robert F. Spreen.

VIRGINIA

Section 722.528—W. T. Powers, State Administrative Officer; J. S. Shackleton, Jr., Program Specialist; J. Parker Lambeth, Jr., Marketing Quota Specialist.

## DEPARTMENT OF THE INTERIOR

### Bureau of Land Management

[Doc. 16, Region II]

CALIFORNIA

RESTORATION ORDER UNDER FEDERAL POWER ACT

DECEMBER 14, 1953.

Pursuant to the following listed determinations of the Federal Power Commission and in accordance with Order No. 427, section 2.22 (a) (4) of the Director, Bureau of Land Management, approved August 16, 1950 (15 F. R. 5641), it is ordered as follows:

Subject to valid existing rights and the provisions of existing withdrawals, the lands hereinafter described, so far as they are withdrawn or reserved for power purposes, are hereby opened to disposition under the public land laws as provided below, subject to the provisions of section 24 of the Federal Power Act of June 10, 1920 (41 Stat. 1075; 16 U. S. C. 818), as amended, and as to DA-666, DA-732 and DA-791 subject to the stipulation that, if and when the lands are required wholly or in part for purposes of power development, any structures, machinery or improvements placed thereon which shall be found to interfere with such development shall be removed or relocated as may be necessary to eliminate interference with the power development without expense to the United States or its permittees or licensees, including with respect to DA-732 such relocation and reconstruction of California State Highway No. 65 as may be made necessary by reason of such power development; as to DA-765 subject to the stipulation that:

(a) The right of the United States, its permittees or licensees to use the land for power purposes shall be specifically reserved;

(b) That no use shall be made by others which will in any way interfere or be inconsistent with the use of the land by the United States, its permittees or licensees for power purposes;

(c) That any structures, machinery or improvements placed thereon shall be found to interfere with power development shall be removed or relocated as may be necessary to eliminate interference with such development without expense to the United States, its permittees or licensees;

(d) And that the United States, its permittes or licensees shall not be held liable for any damage to structures, machinery or improvements placed thereon resulting from the construction, operation or maintenance of hydroelectric facilities authorized by the United States;

And as to DA-789 subject to the stipulation that:

(a) If and when the lands are required, wholly or in part, for any purpose or purposes incident to power development, including the location of roads, power lines and conduits under or across said land, that all structures, machinery

or improvements placed thereon, which shall be found to interfere with such development, shall be removed or relocated so as to eliminate interference with power development, without cost or expense to the United States or its permittees or licensees; and

(b) That the United States or its permittees or licensees shall not be subject to any suit or claim for damages to any mining operations, structures, machinery or improvements placed thereon resulting from the construction, operation or maintenance of any power development authorized by the United States;

And as to DA–803 subject to the stipulation that the United States or its licensees or permittees shall not be liable for any damages resulting from the operation and maintenance of the canal or conduit on the lands described in the determination.

| Determination No. | Dates and types of withdrawal | Type of restoration | Description of lands |
|---|---|---|---|
| DA–661—California | Reservoir-site reserve No. 17 of June 8, 1926; powersite classification No. 266 of Mar. 8, 1932; powersite reserve No. 710 of Apr. 22, 1929. | Under applicable public land laws. | California: T. 1 S., R. 15 E., M. D. M., sec. 27, that part of the NE¼SW¼ lying northeast of a diagonal line drawn from the northwest corner to the southeast corner. |
| DA–666—California | In secs. 1, 2 and 12 powersite reserve No. 655 of Sept. 25, 1917; in sec. 11 power-site classification No. 45 of July 7, 1922. | For mining purposes only. | California: T. 27 S., R. 32 E., M. D. M., sec. 1, SW¼SW¼; sec. 2, S½SE¼; sec. 11, N½NE¼, NE¼NW¼; sec. 12, NW¼NW¼. Sec. 11 in Sequoia National Forest. |
| DA–732—California | Power-site reserve No. 416 of Jan. 24, 1914; in sec. 15 NE¼SE¼ first form reclamation withdrawal of Jan. 15, 1942. | Under applicable public land laws. | California: T. 8 N., R. 10 E., M. D. M., sec. 15, N½SE¼; sec. 22, S½NW¼ (sec. 15 NE¼SE¼ in reclamation withdrawal). |
| DA–743—California | Power-site reserve No. 201 of Aug. 30, 1911; first form reclamation withdrawal of Feb. 19, 1932. | None | California: T. 14 N., R. 9 E., M. D. M., sec. 1, lot 4 (in reclamation withdrawal). |
| DA–765—California | Power-site reserve No. 87 of July 2, 1910; project No. 137 of June 26, 1925, as amended; project No. 525 of Aug. 6, 1924, project No. 707 of Mar. 26, 1927. | Under applicable public land laws. | California: T. 7 N., R. 13 E., M. D. M., sec. 33, NW¼. |
| DA–769—California | Power-site reserve No. 87 of July 2, 1910. | do | California: T. 6 N., R. 13 E., M. D. M., sec. 17, NE¼NE¼SE¼. |
| DA–770 and DA–770—California. | do | do | California: T. 6 N., R. 13 E., M. D. M., sec. 9, NW¼SW¼. |
| DA–771—California | Power-site reserve No. 261 of May 2, 1912. | do | California: T. 6 N., R. 13 E., M. D. M., sec. 2, lot 16. |
| DA–789—California | Power-site classification No. 183 of July 9, 1927, project No. 187 of Mar. 14, 1924. | For mining purposes only. | California: T. 19 N., R. 8 E., M. D. M., sec. 8, S½NE¼, E½SE¼, S½SW¼NE¼; sec. 9, S½NW¼NW¼, SW¼NW¼. |
| DA–791—California | Power-site reserve No. 115 of Sept. 21, 1925. | do | California: T. 6 N., R. 6 E., H. M., sec. 23, S½NE¼, SE¼, NE¼; sec. 24, N½SE¼, SE¼NE¼. In Six Rivers National Forest. |
| DA–803—California | Power-site reserve No. 655 of Sept. 25, 1917; project No. 382 of Apr. 10, 1922. | Under applicable public land laws. | California: T. 27 S., R. 33 E., M. D. M., sec. 6, SE¼NE¼, NE¼SE¼, S½SE¼. |

The character of the above described lands, other than that within national forests, is rough and mountainous nonagricultural land which is primarily suitable for grazing or hunting purposes, except as to DA–661 which contains some evidence of being mineral in character, and as to DA–803 which may be suitable for airport purposes. It is unlikely that any of the above described lands will be classified as suitable for homestead, desert-land or small tract use.

The lands described shall be subject to application by the State of California for a period of ninety days from the date of publication of this order in the FEDERAL REGISTER for rights-of-way for public highways or as a source of material for the construction and maintenance of such highways, as provided by section 24 of the Federal Power Act as amended.

This order shall not otherwise become effective to change the status of such land until 10:00 a. m. P. s. t. on the 91st day after the date of publication. At that time the said lands shall become subject to application, petition, location and selection, subject to valid existing rights, the provisions of existing withdrawals, the requirements of applicable laws and the 90-day preference-right filing period for veterans and others entitled to preference under the act of September 27, 1944 (58 Stat. 747; 43 U. S. C. 279–284), as amended.

L. T. HOFFMAN,
*Regional Administrator.*

## SECURITIES AND EXCHANGE COMMISSION

[File No. 70–3125]

UNION ELECTRIC COMPANY OF MISSOURI

ORDER GRANTING APPLICATION AND PERMITTING DECLARATION TO BECOME EFFECTIVE

DECEMBER 15, 1953.

Union Electric Company of Missouri ("Union"), a registered holding company and also a subsidiary company of The North American Company, likewise a registered holding company, having filed an application-declaration pursuant to sections 6, 7 and 10 of the Public Utility Holding Company Act of 1935, and Rule U-50 and Rule U-62 promulgated thereunder, regarding certain proposed transactions, which are summarized as follows:

Union proposes to acquire the common stock of Missouri Edison Company ("Missouri Edison") from the holders thereof by offering in exchange therefor 7/10ths of one share of Union common stock of $10 par value for each share of Missouri Edison common stock of $5 par value, except that no fractional shares of Union's common stock will be issued to stockholders of Missouri Edison. The maximum number of shares of Union's common stock which would be issuable upon such exchange is 87,500. In lieu of fractional shares to which Missouri Edison stockholders would otherwise be entitled by virtue of the exchange, Union will issue to The Boatmen's National Bank of St. Louis, as agent for Missouri Edison stockholders who make the exchange, such number of full shares of Union common stock of $10 par value as shall equal the total of the fractional shares which would otherwise be issued to the Missouri Edison stockholders. The Boatmen's National Bank of St. Louis will then sell such full shares in the open market and distribute the proceeds to the Missouri Edison stockholders in proportion to their respective fractional interests in the full shares.

The consummation of the exchange is subject to certain conditions which are embodied in an agreement between Union and Missouri Edison including, among others, the condition that there shall have been deposited for exchange at least 85 percent of the 125,000 shares of Missouri Edison common stock and that Union shall have listed the additional shares of its common stock on the New York Stock Exchange, and registered the same under the Securities Exchange Act of 1934. Union requests exemption from the competitive bidding requirements of Rule U-50. Union also proposes to send certain solicitation material to the stockholders of Missouri Edison relating to the exchange.

A public hearing having been held after appropriate notice, the Commission having examined the record herein and having made and filed its findings and opinion herein:

*It is ordered*, That said application-declaration be, and the same hereby is, granted and permitted to become effective forthwith, subject to the terms and conditions contained in Rule U-24 and subject also to the following additional term and condition:

That jurisdiction be, and hereby is, generally reserved to the Commission to determine the retainability, indirectly by Union and directly by Missouri Edison, of Missouri Edison's gas utility system, and to entertain such further proceedings, make such supplemental findings and take such further action as the Commission may deem appropriate in connection therewith to effectuate the provisions of section 11 (b) of the act.

By the Commission.

[SEAL] ORVAL L. DUBOIS,
*Secretary.*

[F. R. Doc. 53–10546; Filed, Dec. 18, 1953; 8:46 a. m.]

[File No. 70–3152]

NORTH CONTINENT UTILITIES CORP.

ORDER REGARDING PROPOSED LIQUIDATION AND DISSOLUTION OF REGISTERED HOLDING COMPANY AND PAYMENT OF LIQUIDATING DIVIDEND

DECEMBER 15, 1953.

An application-declaration having been filed with this Commission, pursuant to sections 11 and 12 (c) of the Public Utility Holding Company Act of 1935 ("act") and Rules U-24 and U-46 promulgated thereunder, by North Continent Utilities Corporation ("North Continent"), a registered holding company, with respect to proposed transactions which are summarized as follows:

The Commission has heretofore directed North Continent in proceedings under section 11 (b) of the act to liquidate and dissolve (North Continent Utilities Corporation, File Nos. 54–74 and 59–69).

Pursuant to prior authorization of the Commission under Rule U-44 (c), North Continent, under date of October 20, 1953, entered into a contract with Alberta Consolidated Gas Utilities Limited, a non-affiliate, whereby the latter agreed to purchase North Continent's entire interest in Great Northern Gas Company, Limited, at a price of $533,639, plus an amount equal to interest on certain notes and advances from August 1, 1953, to the closing date. The sale was consummated on November 30, 1953. North Continent now has as its sole asset approximately $659,000 in cash and current receivables. Pursuant to section 275 of the General Corporation Law of Delaware, the Board of Directors has adopted a resolution to the effect that it is advisable and to the best interests of the Corporation to dissolve the Corporation, and has called a special meeting of stockholders to be held on December 15, 1953 to vote on the question of dissolution. Proxy solicitation material for said meeting has been mailed to stockholders pursuant to authorization of the Commission by order dated November 17, 1953.

The Board of Directors has also tentatively approved a Plan of Liquidation and Dissolution, said Plan providing in substance for (1) an initial liquidating dividend of $8.50 per share, payable immediately to all holders of capital stock of the corporation upon surrender of their respective certificates for cancellation, and (2) a further liquidating dividend or dividends until all available assets shall have been distributed to stockholders. The application-declaration states that at the present time it is impossible to state definitely in what amounts, or at what times, such further liquidating dividend or dividends may be distributed, and that after payment of the initial liquidating dividend of $8.50 per share the Corporation will have on hand approximately $110,000, which (together with such further assets as may accrue to the Corporation in connection with expiration of rights of holders of old securities of the Corporation under the Supplemental Plan of 1950) is considered by the Board of Directors to be an ample reserve for all present or future liabilities, including taxes for the current year, any possible deficiency assessments of taxes for prior years, fees and expenses in connection with the aforementioned sale of Great Northern Gas Company, Limited, and fees and expenses of all types which may be incurred in completing the dissolution program. As and when it can be determined definitely that the aforesaid items will not exhaust the entire reserved amount, the balance will be available to be paid out in a further liquidating dividend or dividends.

Fees and expenses in connection with the proposed transactions (including the sale by North Continent of its interest in Great Northern Gas Company, Limited) are estimated at $27,000, including legal fees of $15,000 to Dallstream, Schiff, Stern & Hardin, counsel for North Continent.

Applicant-declarant requests that the application-declaration be granted and permitted to become effective forthwith upon issuance.

Due notice having been given of the filing of the application-declaration, and a hearing not having been requested or ordered by the Commission; and the Commission finding that the applicable provisions of the act and the rules promulgated thereunder are satisfied and that no adverse findings are necessary; and deeming it appropriate in the public interest and in the interest of investors and consumers that said application-declaration be granted and permitted to become effective forthwith, without the imposition of terms and conditions other than those prescribed in Rule U-24:

*It is ordered*, Pursuant to the applicable provisions of the act, that said application-declaration be granted and permitted to become effective forthwith, subject to the terms and conditions prescribed in Rule U-24.

By the Commission.

[SEAL] ORVAL L. DUBOIS,
*Secretary.*

[F. R. Doc. 53–10545; Filed, Dec. 18, 1953; 8:46 a. m.]

[File No. 70–3165]

APPALACHIAN ELECTRIC POWER CO.

NOTICE OF FILING REGARDING SALE OF PRINCIPAL AMOUNT OF FIRST MORTGAGE BONDS AT COMPETITIVE BIDDING

DECEMBER 15, 1953.

Notice is hereby given that Appalachian Electric Power Company ("Appalachian"), a public-utility subsidiary of American Gas and Electric Company, a registered holding company, has filed an application pursuant to the Public Utility Holding Company Act of 1935 ("act"). Applicant has designated section 6 (b) of the act and Rules U-42 (b) (2) and U-50 thereunder as applicable to the proposed transactions which are summarized as follows:

Appalachian proposes to issue and sell, pursuant to the competitive bidding requirements of Rule U-50, $20,000,000 principal amount of its first mortgage bonds, -- percent series due 1983. The bonds are to be issued under an indenture dated as of December 1, 1940, as heretofore supplemented, between Appalachian and Bankers Trust Company as Trustee, and an indenture supplemental to said indenture to be dated as of December 1, 1953. The price of the bonds shall be not less than 100 percent or more than 102¾ percent of the principal amount thereof and the interest rate (which shall be a multiple of ⅛ of 1 percent) will be determined by competitive bidding.

The proceeds from the sale of Appalachian's first mortgage bonds will be applied, in part, to the prepayment, without premium, of all notes payable to banks at the time outstanding. The amount of such notes presently outstanding is $17,000,000 and it is expected that not to exceed $2,000,000 principal amount of additional notes payable to banks will be issued prior to the time of the issuance of the bonds, making an aggregate amount of not to exceed $19,000,000 of such notes to be repaid. The balance of the proceeds from the sale of the said bonds will be added to Appalachian's treasury funds and will be applied to the payment of the costs of extensions, additions and improvements to its properties.

Appalachian is organized and doing business in the State of Virginia and also does business in the States of Tennessee and West Virginia. Appalachian represents that the sale of its bonds will be expressly authorized by the Virginia State Corporation Commission and by the Tennessee Railroad and Public Utilities Commission. Copies of the orders of those State Commissions are to be supplied by amendment.

The expenses to be incurred in connection with the issue and sale of its bonds, including legal fees of counsel for the company in the amount of $20,250 and legal fees of counsel for the underwriters of $7,500, are estimated by Appalachian to amount to $121,065.

Appalachian requests that the period for inviting bids be shortened to not less than six days. Appalachian also requests that the Commission's order herein be issued on or before January 4, 1954, waives the 30-day waiting period and requests that the Commission's order become effective upon issuance.

Notice is further given that any interested person may, not later than December 29, 1953, at 5:30 p. m., e. s. t., request the Commission in writing that a hearing be held on such matter, stating the nature of his interest, the reason or reasons for such request and the issues, if any, of fact or law proposed to be controverted, or he may request that he be notified if the Commission should order a hearing thereon. Any such request should be addressed: Secretary, Securities and Exchange Commission, 425 Second Street NW., Washington 25, D. C. At any time after said date, the application, as filed or as amended, may be granted as provided in Rule U-23 of the rules and regulations promulgated under the act, or the Commission may exempt such transactions as provided in Rules U-20 and U-100 thereof.

By the Commission.

[SEAL] ORVAL L. DUBOIS,
*Secretary.*

[F. R. Doc. 53–10544; Filed, Dec. 18, 1953; 8:46 a. m.]

[File No. 70-3167]

CITIES SERVICE CO. ET AL.

NOTICE OF FILING REGARDING SALE BY PARENT OF SUBSIDIARY'S COMMON STOCK, REQUEST FOR EXEMPTION FROM COMPETITIVE BIDDING, AND REQUEST FOR RECITALS

DECEMBER 14, 1953.

In the matter of Cities Service Company, The Gas Service Company, Gas Advisers, Inc.; File No. 70-3167.

Notice is hereby given that Cities Service Company ("Cities"), a registered holding company, The Gas Service Company ("Gas Service"), a wholly-owned public utility subsidiary of Cities, and Gas Advisers, Inc. ("Gas Advisers"), a mutual service company owned by various subsidiaries in the Cities system which are served by said service company, have filed a joint application-declaration, pursuant to the Public Utility Holding Company Act of 1935 ("act"). Applicants-declarants have designated sections 11 (b), 12 (c), 12 (d), and 12 (f) and Rules U-42, U-43, U-44 and U-50 promulgated thereunder as applicable to the proposed transactions.

Notice is further given that any interested person may, not later than December 28, 1953, at 5:30 p. m., e. s. t., request the Commission in writing that a hearing be held on such matter, stating the reasons for such request, the nature of his interest and the issues of fact or law raised by said application-declaration which he desires to controvert, or may request that he be notified if the Commission should order a hearing thereon. Any such request should be addressed: Secretary, Securities and Exchange Commission, 425 Second Street NW., Washington 25, D. C. At any time after December 28, 1953, said application-declaration, as filed or as amended, may be granted and permitted to become effective as provided in Rule U-23 of the rules and regulations promulgated under the act, or the Commission may exempt such transactions as provided in Rules U-20 (a) and U-100 thereof.

All interested persons are referred to said application-declaration which is on file in the offices of this Commission for a statement of the transactions therein proposed, which are summarized as follows:

Cities proposes to sell to selected underwriters for public offering 1,500,000 shares of common stock of $10 par value each of Gas Service.

Subject to, and on the date of, consummation by Cities of the sale of said 1,500,000 shares of common stock, Gas Service proposes to sell and Gas Advisers proposes to purchase for retirement the 270 shares of its capital stock ($100 par value per share) now owned by Gas Service for a purchase price of $27,000, and concurrently therewith the service contract dated January 1, 1938 between Gas Service and Gas Advisers will be terminated.

Cities requests that the Commission issue an order exempting from Rule U-50 its proposed sale of 1,500,000 shares of common stock of Gas Service and alleges (among other things), as reasons for such request, that the stock of Gas Service has been owned in its entirety by Cities since the formation of Gas Service and that there is not now nor has there ever been any market in it and no familiarity therewith on the part of prospective investors; and that the size of the offering is such as to preclude the possibility of having many bidders, to increase the hazards of an unsuccessful effort, and to require an intensive and nation-wide effort to develop investor interest.

The application-declaration states that Cities will use the net proceeds from the sale of its holdings of common stock of Gas Service, estimated by Cities at approximately $33,000,000, to purchase additional common stock of its wholly-owned subsidiary, Empire Gas and Fuel Company.

It is requested that the Commission's order herein make the necessary findings and contain the recitals required by Supplement R and section 1808 (f) of the Internal Revenue Code, as amended, and that the Commission's order become effective upon its issuance.

By the Commission.

[SEAL] ORVAL L. DUBOIS, *Secretary.*

FEDERAL REGISTER

VOLUME 18 NUMBER 248

Washington, Tuesday, December 22, 1953

## TITLE 14—CIVIL AVIATION

### Chapter I—Civil Aeronautics Board

Subchapter A—Civil Air Regulations

[Supp. 4]

PART 40—SCHEDULED INTERSTATE AIR CARRIER CERTIFICATION AND OPERATION RULES

MISCELLANEOUS INTERPRETATIONS AND POLICIES

On October 17, 1953, the Administrator of Civil Aeronautics published in 18 F. R. 6610-6622, interpretations to define and policies to implement various sections of new Part 40. The purpose of this supplement is to revise or delete some of these interpretations and policies in response to comments received from interested persons.

1. Section 40.18-4 as published on October 17, 1953 in 18 F. R. 6610, is revised to read:

§ 40.18-4 *Policies, procedures and limitations governing issuance and amendment of Operations Specifications, Aircraft Maintenance (CAA policies which apply to § 40.18 (a))*—(a) *General.* The Administrator will issue and amend Operations Specifications, Aircraft Maintenance, in accordance with the following policies, procedures, and limitations. The criteria set forth in this section will be followed by the Administrator in fixing time limitations for the performance of overhaul, inspections and checks, or in permitting or requiring revisions thereto. The basic principle followed by the Administrator will be that the inspections, checks, maintenance or overhaul be performed at times well within the expected or proven service life of each component of the aircraft. In determining what the expected or proven service life of an aircraft or any of its components might be, the Administrator will consider the following factors: (1) Geographical area or areas of operation; (2) engine operating powers, procedures, etc.; (3) number of landings, long haul versus short haul, etc.; (4) maintenance organization and inspection procedures; (5) other operators' service experience records; (6) manufacturers' recommendations; (7) service history, particularly of known or evident trends toward malfunctioning. Special reliance will be placed on service experience, including the information obtained from such tests, inspections, or measurements as have been performed in accumulating such service experience.

(b) *Procedure for establishing new or revised time limitations.* (1) Time limitations may be established in terms of hours of operation, multiples of engine overhaul periods or multiples of inspection periods. Time limitations for components on which deterioration is not necessarily a function of operating hours, such as electronic units, pitot tubes and emergency flotation equipment may be established in terms of calendar months. Certain items may be maintained on an on condition overhaul basis.

(2) On condition overhaul is applicable to components on which a determination of airworthiness may be made by visual inspection, measurements, tests, or other means without a teardown inspection or overhaul.

(c) *Airframe initial time limitations.* The initial time limitations for overhauls, inspections, or checks of airframes may be established on a recurrent fixed time basis or by adoption of a structural inspection specification covering procedures such as pattern inspections, block overhauls, or progressive inspections. Regardless of the basis upon which the time limitations are established, the same basic standards will be applicable. The maintenance program must specify checks, inspections and overhauls to be performed and times at which they will be performed.

(d) *Appliances; initial time limitations.* Initial time limitations for inspections, bench checks, major inspections or overhaul, as applicable, to the appliance involved, should not be greater than those limitations applicable to the same or similar appliances used in existing aircraft operated by the air carrier. When the usage or installation of such appliances differ to a substantial extent from the previous usage or installation, the time limitations shall be adjusted to reflect the extent of such difference. When new usage or installation is involved, conservative time limitations should be established until service experience shows that more liberal time limits can be used. In those cases where an appliance has a subcomponent

FEDERAL REGISTER

Published daily, except Sundays, Mondays, and days following official Federal holidays, by the Federal Register Division, National Archives and Records Service, General Services Administration, pursuant to the authority contained in the Federal Register Act, approved July 26, 1935 (49 Stat. 500, as amended; 44 U. S. C., ch. 8B), under regulations prescribed by the Administrative Committee of the Federal Register, approved by the President. Distribution is made only by the Superintendent of Documents, Government Printing Office, Washington 25, D. C.

The regulatory material appearing herein is keyed to the Code of Federal Regulations, which is published, under 50 titles, pursuant to section 11 of the Federal Register Act, as amended August 5, 1953.

The FEDERAL REGISTER will be furnished by mail to subscribers, free of postage, for $1.50 per month or $15.00 per year, payable in advance. The charge for individual copies (minimum 15¢) varies in proportion to the size of the issue. Remit check or money order, made payable to the Superintendent of Documents, directly to the Government Printing Office, Washington 25, D. C.

There are no restrictions on the republication of material appearing in the FEDERAL REGISTER.

Part 34 — 8622
Part 35 — 8622

which is subject to wear with time in service, the air carrier will establish maintenance procedures for periodic inspection of such subcomponent to insure its continued airworthiness.

(e) *Powerplants; initial time limitations.* (1) The initial overhaul time limitations for any engine which has never been used in air carrier service will tentatively be established at 1000 hours. However, the Operations Specifications will require sample overhaul of a representative number of engines, but not less than three, to be accomplished at each increment of 100 hours, beginning at 800 hours, unless such new model engine incorporates certain unconventional features not previously employed in air carrier operations, in which case, the initial overhaul period will be established by the Administrator. Satisfactory teardown inspection will be necessary before increasing the fleet overhaul period to the next higher increment. This sample overhaul procedure and evaluation of service experience will provide the operator with necessary information to substantiate the basic 1,000 hour overhaul.

(2) The initial time limitations for overhaul of an engine model which has received substantial air carrier service experience, but not by the applicant, will tentatively be established at 1,000 hours. An engine model will not be considered as having substantial air carrier service experience unless it has been satisfactorily operated by another carrier on an approved 1,000 hour or higher overhaul period. However, the Operations Specifications will require that the basic 1,000 hour overhaul period be substantiated on the same basis as outlined for a new engine except that sample overhauls of a representative number of engines will be accomplished in increments of 100 hour periods beginning at 900 hours. The initial time limitations for overhaul of accessories which are a part of the power package, including propellers, will be established at the overhaul period fixed for the engine itself, unless service experience permits or requires higher or lower overhaul periods.

(f) *Revision of time limitations; general.* The inspection and overhaul time limitations applicable to airframes, powerplants, propellers, and appliances will be revised on the basis of service experience. Increases in such time limitations may be made when the record of service experience for the previous 90 days indicates that such increase will not adversely affect the continuous condition of airworthiness. When the service records indicate that any component or subcomponent consistently requires repair, adjustment or other maintenance because of damage, wear, or deterioration, within the current time limitations, the air carrier will be responsible for intiating corrective action.

(1) *Airframe; revision of time limitations.* The increases of time limitations for overhaul (or major inspection in case of pattern system, etc.) of airframes will be based on evaluation of all pertinent service records and examination of at least one aircraft, of the model involved, that has been overhauled at the currently approved time limitations. When a pattern or block overhaul type of maintenance system is used, it will be permissible to reschedule individual items in another block or pattern, if performance and condition of the specific item warrants such an increase.

(2) *Powerplants and associated mechanical appliances; revision of time limitations.* Increases in engine overhaul periods will not be approved in increments greater than 100 hours. Increases in time limitations above the 1,000 hour basic engine overhaul period will be considered on the basis of satisfactory operation of a specified number of engines of the same type or model. The operator may make application for a supplemental amendment to the currently approved time limitation indicating the desired time limitations and the particular engines to be operated to the new time limitations. This supplemental amendment will be applicable to 3 to 5 engines as deemed necessary by the assigned CAA agent, in order to determine the ability of the engine to operate satisfactorily at the desired new overhaul period. The engines so operated will be identified on the supplemental amendment by make, model, and serial number. Upon satisfactory completion of the 100 hours additional operation, and satisfactory disassembly and inspection of the engines and related components listed on the supplemental specification, the air carrier may then submit an application for an amendment in the routine manner, requesting a 100 hour extension of the overhaul period on the entire fleet of engines and related components of the same type and model in their operation. Experience may justify a request for the operation of some engine accessories to double or triple the approved engine overhaul limitations. Such amendments may be submitted if previous satisfactory service and overhaul experience, including the service to be performed at each engine change period, can justify the increase as not adversely affecting the continuous condition of airworthiness of the component involved. Installation of engines being operated in accordance with provisions of a supplemental specification will be limited to one per twin engine aircraft and two per four engine aircraft installed on opposite sides.

(3) *Appliances, general; revision of time limitations.* Increases in established times for inspections, bench tests or overhaul periods will be based on consideration of the following factors: (1) geographical area or areas of operation; (2) number of landings, long haul versus short haul; (3) maintenance organization and inspection procedures; (4) manufacturers' recommendations; (5) service history, particularly of known or evident trends toward malfunctioning. When electrical/electronic appliances are overhauled on an on condition basis, special consideration will be given to the continued airworthiness of mechanical components of such equipment.

(4) *Emergency equipment.* The inspection periods for first aid kits, flotation equipment and other emergency equipment will assure the continued serviceability and immediate readiness of such equipment for its intended emergency purposes. Major inspection periods will be established for the purpose of determining that all components of the emergency equipment are complete and airworthy and may be expected to remain in this condition until the next major inspection or actual use under emergency conditions. Routine inspection periods will be established to assure that such equipment (or any component thereof) is installed or stored properly, has not been tampered with, damaged, or had articles removed since the last inspection. All inspection periods will be adjusted in accordance with service experience and pertinent operating conditions.

2. Sections 40.19–1 and 40.19–2 as published on October 17, 1953 in 18 F. R. 6612–6613 are revised to read:

§ 40.19–1 *Content of Operations Specifications, Aircraft Maintenance (CAA policies which apply to § 40.19 (e)).* The Administrator will issue Operations Specifications, Aircraft Maintenance, which have the following minimum contents:

(a) (1) The Operations Specifications, Aircraft Maintenance, will contain a listing of the components of airframes, engines, propellers, and appliances, and the time limitations for checks, inspections and overhauls applicable to each listed component. The list of components will be complete and inclusive except that sub-components which are subject to check, inspection and overhaul at the same time limitations as the components to which they are related may be omitted from the listing (e. g. that form commonly called the "short form"). When this is done, the Operations Specifications will bear a statement to the effect that parts and sub-components not listed will be checked, inspected, and overhauled at the same time limitations specified for the component or assembly to which such components are related.

(2) When coded identifications or titles, such as "operation #1, #2, #3, etc." or "line check, intermediate check, base inspection, etc.," are used in connection with specified time limitations in the Operations Specifications, a brief description of such terms will be included which identifies the operation concerned.

(b) If the carrier proposes Operations Specifications, Aircraft Maintenance, which would permit for all or any part of an aircraft a block overhaul system, a sampling inspection and overhaul system, or any other maintenance system which either (1) does not prescribe a fixed period for overhaul, inspection or check of each component of an aircraft, or (2) includes alternative standards and procedures under which the air carrier may be given authority to establish and adjust such time limitations, the air carrier will fully define and describe the manner in which such a special maintenance program will be performed.

(c) Operations Specifications identified as Operations Specifications, Aircraft Maintenance—General, will contain conditions uniformly applicable to all Operations Specifications, Aircraft Maintenance.

§ 40.19–2 *Content of Operations Specifications, Aircraft Weight and Balance Control (CAA policies which apply to § 40.19 (f)).* The Operations Specifications, Aircraft Weight and Balance Control, as submitted by an air carrier, will contain an accurate description of the procedures used to maintain control of weight and balance of all aircraft operated under the terms of the operating certificate which will insure that the aircraft, under all operating conditions, is loaded within the gross weight and center of gravity limitations. This description should include procedures used for determining weight of passengers, weight of baggage, periodic aircraft weighing, type of loading devices, and identification of aircraft concerned.

3. Section 40.23–1 as published on October 17, 1953 in 18 F. R. 6615 is deleted.

4. Section 40.37–1 as published on October 17, 1953 in 18 F. R. 6616 is revised to read:

§ 40.37–1 *Servicing and maintenance facilities (CAA policies which apply to § 40.37).*—(a) *General.* In demonstrating or proving to the satisfaction of the Administrator that housing, facilities, equipment and materials are adequate, the air carrier may be guided by Civil Aeronautics Manual 52, § 52.21 and §§ 52.30 through 52.36 of this chapter, insofar as applicable to his aircraft and maintenance system.

(b) *Facilities provided by other agencies.* The air carrier will show that agencies contracting to perform major overhauls, repairs, or alterations for the air carrier are those specified under § 18.10 (b), (d), or (e) of this chapter.

5. Section 40.51–1 is adopted to read:

§ 40.51–1 *Contents of manual; methods and procedures for maintaining weight and balance control (CAA policies which apply to § 40.51 (a) (19)).*—(a) *General.* (1) The air carrier may utilize any loading schedule, procedure, or means by which the air carrier can show that the aircraft is properly loaded and will not exceed authorized weight and balance limitations during operation.

(2) By whatever method used, the air carrier should account for all probable loading conditions which may be experienced in service and show that the loading schedule will provide satisfactory loading. Loading schedules may be applied to individual aircraft or to a complete fleet. Unless otherwise authorized, a copy of pertinent loading data should be carried in each aircraft. When an air carrier operates several types or models of aircraft, the loading schedule, which may be index type, tabular type or a mechanical computer, will be identified with the type or model of aircraft for which it is designed.

(b) *Loading provisions.* All seats, compartments, and other loading stations will be properly marked, and the identification used will correspond with the instructions established for computing the weight and balance of the aircraft. When the loading schedule provides blocking off of seats or compart-

ments in order to remain within the center of gravity limits, effective means will be provided to assure that such seats or compartments are not occupied during operations specified. Cargo compartments will be placarded showing the maximum weight of each compartment, and such placcards will be readily legible to the loading personnel. Instructions will be prepared for crew members, cargo handlers, and other personnel concerned, giving complete information necessary regarding distribution of passengers, cargo, fuel and other items. Information relative to maximum capacities and other pertinent limitations affecting the weight or balance of the aircraft will be included in these instructions. When it is possible by adverse distribution of passengers to exceed the approved CG limits of the aircraft, special instructions will be issued to the appropriate crew members so that the load distribution can be maintained within the approved limitations.

(c) *Terms, descriptions, and general standards.* For the purpose of weight and balance control, the following terms, descriptions, and general standards will apply. Deviations from these standards by the individual operator due to the nature of his operation will be acceptable.

(1) *Empty weight.* The empty weight of an aircraft is considered to be the maximum gross weight less the following:

(i) All fuel and oil, excepting system fuel and oil.[1]

(ii) Drainable anti-detonant injector and de-icing fluids.

(iii) Crew and baggage.

(iv) Passengers and cargo (revenue and non-revenue).

(v) Removable passenger service equipment, food, magazines, etc., including drainable washing and drinking water.

(vi) Emergency equipment (overwater, tropical, frigid).

(vii) Other equipment, variable for flights.

(viii) Flight spares (spark plugs, wheel, cylinder, etc.).

(2) *Operating weight.* The basic operating weight established by the air carrier for a particular model aircraft will include the following standard items of the operator in addition to the empty weight of the aircraft unless otherwise specified:

(i) Normal oil quantity.

(ii) Anti-detonant injector and deicing (winter) fluids.

(iii) Crew and baggage.

(iv) Passenger service equipment, including washing and drinking water, magazines, etc.

(v) Emergency equipment, if required, for all flights.

(vi) All other items of equipment considered standard by the air carrier concerned.

(3) *Aircraft, zero fuel weight.* The zero fuel weight of an aircraft is the maximum weight authorized for such aircraft without fuel. The weight of fuel carried in the fuselage, or equivalent locations, will be deducted from such maximum. When zero fuel weight limitations or equivalent restrictions are specified, proper provision for loading will be made by the operator so that such structural limitations are not exceeded.

(d) *Aircraft weights.* Aircraft weight and balance control, will contain provisions for determining aircraft weights in accordance with the following procedures:

(1) *Individual aircraft weights and changes.* The loading schedule may utilize the individual weight of the aircraft in computing pertinent gross weight and balance. The individual weight and balance of each aircraft will be re-established at the specified reweighing periods. It also will be reestablished whenever the accumulated changes to the operating weight exceed plus or minus one-half of one percent of the maximum landing weight or the cumulative change in CG position exceeds one-half of one percent of the MAC.

(2) *Fleet weights, establishment and changes.* For a fleet or group of aircraft, of the same model and configuration, an average operating fleet weight may be utilized if the operating weights and CG positions are within the limits established in this paragraph. The fleet weight will be calculated on the following basis:

(i) An operator's empty fleet weight will be determined by weighing aircraft according to the following table:

For fleet of 1 to 3, weigh all aircraft.
For fleet of 4 to 9, weigh 3 aircraft plus at least 50 percent of the number over 3.
For fleet of over 9, weigh 6 aircraft plus at least 10 percent of the number over 9.

(ii) In choosing the aircraft to be weighed, the aircraft in the fleet having the highest time since last weighing should be selected. When the average empty weight and CG position has been determined for aircraft weighed and the basic operating fleet weight (winter and summer, if applicable) established, necessary data should be computed for aircraft not weighed but which are considered eligible under such fleet weight. If the basic operating weight of any aircraft weighed or the calculated basic operating weight of any of the remaining aircraft in the fleet varies by an amount more than plus or minus one-half of one percent of the maximum landing weight from the established basic operating fleet weight or the CG position varies more than plus or minus one-half of one percent of the MAC from the fleet weight CG, that airplane will be omitted from that group and operated on its actual or calculated operating weight and CG position. If it falls within the limits of another fleet or group, it may then become part of that operating fleet weight. In cases where the aircraft is within the operating fleet weight tolerance but the CG position varies in excess of the tolerance allowed, the aircraft may still be utilized under the applicable operating fleet weight but with an individual CG position.

(iii) Re-establishment of the operator's empty fleet weight or the operating fleet weight and corresponding CG positions may be accomplished between weighing periods by calculation based on the current empty weight of the aircraft previously weighed for fleet weight purposes. Weighing for re-establishment of all fleet weights will be conducted on a two-year basis unless shorter periods are desired by the air carrier.

(3) *Establishing initial weight before use in air carrier service.* Prior to being used in air carrier service, each aircraft will be weighed and the empty weight and center of gravity location established. New production transport category aircraft delivered to air carriers normally are weighed at the factory and are eligible for air carrier operations without reweighing if the weight and balance records have been adjusted for alterations or modifications to the aircraft. Aircraft transferred from one air carrier to another need not be weighed prior to utilization by the latter unless more than twenty-four calendar months have elapsed since last weighing.

(4) *Periodic weighing; aircraft using individual weights.* Aircraft operated under a loading schedule utilizing individual aircraft weights in computing the gross weight will be weighed at intervals of twenty-four calendar months. An air carrier may, however, apply for extension of this weighing period for a particular model aircraft, when pertinent records and actual routine weighing during the preceding twenty-four months of air carrier operation show that weight and balance records maintained are sufficiently accurate to indicate aircraft weights within the established limitations. Such application should be limited to increases in increments of twelve months and must be substantiated in each instance with at least two aircraft weighings. Increases may not be granted which exceed a time which is equivalent to the aircraft overhaul period.

(5) *Periodic weighing, aircraft using "fleet weights."* Aircraft operating under fleet weights should be weighed in accordance with procedures outlined for the establishment of fleet weights. Since each fleet weight will be re-established every two years and a specified number of aircraft weighed at such periods, no additional weighing is considered necessary. A rotation program should, however, be incorporated so all aircraft in the fleet will be reweighed periodically.

(6) *Weighing procedure.* Normal precautions, consistent with good practices in the weighing procedure, such as checking for completeness of the aircraft and equipment, determining that fluids are properly accounted for, and that weighing is accomplished in an enclosed building preventing the effect of the wind, will prevail. Any acceptable scales may be used for weighings provided the are properly calibrated, zeroed and used in accordance with the manufacturer's instructions. Each scale should have been calibrated, either by the manufacturer or by a civil Department of Weights and Measures, within one year prior to weighing any aircraft for this purpose unless the air carrier can show evidence which warrants a longer period between calibrations.

(e) *Passenger weights.* The air carrier may elect to use either the actual passenger weight or the average passenger weight to comput passenger loads over any route, except in those cases where non-standard weight passenger groups are carried. Both methods may be used interchangeably provided only one method is used for any flight from originating to terminating point of the particular trip or flight involved, except as indicated in subparagraph (3) of this paragraph. Provisions will be incorporated in the load manifest to clearly indicate to personnel concerned whether actual or average passenger weights are to be used in computing the passenger load.

(1) *Actual passenger weight.* Actual passenger weight may be determined by scale weighing of each passenger prior to boarding the aircraft, and such weight is to include minor articles carried on board by the passenger. If such articles are not weighed, the estimated weight is to be accounted for. The actual passenger weight may also be determined by asking each passenger his weight and adding thereto a pre-determined constant to provide for hand-carried articles and also to cover possible seasonal affect upon passenger weight due to variance in clothing weight. This constant may be approved for an air carrier on the basis of a detailed study conducted by the operator over the particular routes involved and during the extreme seasons when applicable.

(2) *Average passenger weight.* (i) An average weight of 160 pounds (summer) may be used for each adult passenger during the calendar period of May 1 through October 31.

(ii) An average weight of 165 pounds (winter) may be used for each adult passenger during the calendar period through April 30.

(iii) An average weight of 80 pounds may be used for children between the ages of 3 and 12. Children above 12 years of age are classified as adults for the purpose of weight and balance computations. Children less than 3 years old are considered "babes in arms."

(iv) The average passenger weight includes minor items normally carried by a passenger.

(3) *Non-standard weight groups of passengers.* The average passenger weight method will not be used in the case of flights carrying large groups of passengers whose average weight obviously does not conform with the normal standard weight. Actual weights will be used when a passenger load consists to a large extent of athletic squads or other special group which is smaller or larger than the U. S. average. Where such a group forms only a part of the total passenger load, the actual weights may be used for such group and average weights used for the balance of the passenger load. In such instances, a notation will be made on the load manifest, indicating number of persons in the special group and identifying the group (i. e., football squad, Blank Nationals, etc.).

(f) *Crew weight.* The actual weight of crew members may be used or the following approved average weights may be utilized:

(1) Male cabin attendants 150 pounds; female cabin attendants 130 pounds.

(2) All other crew members 170 pounds.

(g) *Passenger and crew baggage.* Procedures should be provided so that all baggage, including that carried on board by the passengers, is properly accounted for. If desired by the air carrier, a standard crew baggage weight may be used.

(h) *Center of gravity travel during flight.* The air carrier will show that the procedures fully account for the extreme variations in center of gravity travel during flight caused by all or any combination of the following variables:

(1) The movement of a number of passengers and cabin attendants equal to the placarded capacity of the lounges or lavatories from their normal position in the aircraft cabin to such lounge or lavatory. If the capacity of such compartment is one, the movement of either one passenger or one cabin attendant, whichever most adversely affects the CG condition will be considered. When the capacity of the lavatory or lounge is two or more, the movement of that number of passengers or cabin attendants from positions evenly distributed throughout the aircraft may be used. Where seats are blocked off, the movement of passengers and/or cabin attendants evenly distributed throughout only the actual loaded section of the aircraft will be used. The extreme movements of the cabin attendants carrying out their assigned duties within the cabin will be considered. The various conditions will be combined in such a manner that the most adverse effect on the CG will be obtained and so accounted for in the development of the loading schedule to assure the aircraft being loaded within the approved limits at all times during flight.

(2) *Landing gear retraction.* Possible change in CG position due to landing gear retraction will be investigated and results accounted for.

(3) *Fuel.* The effect on the CG travel of the aircraft during flight due to fuel used down to the required reserve fuel or to an acceptable minimum reserve fuel established by the air carrier will be accounted for.

(i) *Fuel allowance for taxiing and run-up.* The weight and balance system may provide for a weight allowance of 3 pounds of fuel for each 100 horsepower (maximum continuous) available to the aircraft from all of its engines to be added to the maximum gross weight of the aircraft to compensate for fuel used during run-up and taxiing.

(j) *Records.* The weight and balance system will include methods by which the air carrier will maintain a complete, current and continuous record of the weight and center of gravity of each aircraft. Such records should reflect all alterations and changes affecting either the weight or balance of the aircraft, and will include a complete and current equipment list. When fleet weights are used, pertinent computations should also be available in individual aircraft files.

(k) *Weight of fluids.* The weight of all fluids used in aircraft may be established on the basis of actual weight, a standard volume conversion or a volume conversion utilizing appropriate temperature correction factors to accurately determine the weight by computation of the quantity of fluid on board.

6. Section 40.51–2 as published on October 17, 1953 in 18 F. R. 6616 is deleted.

7. Section 40.63–1 as published on October 17, 1953 in 18 F. R. 6617 is revised to read:

§ 40.63–1 *Matcrially altered in design (CAA interpretations which apply to § 40.63 (b) (1).* A type of airplane will be considered to be materially altered in design when the alterations include, but are not necessarily limited to:

(a) Installation of powerplants other than the powerplants of a type similar to those with which the aircraft is certificated.

(b) Major alteration to the aircraft or its components which materially affects the flight characteristics.

8. Section 40.116–1 as published on October 17, 1953 in 18 F. R. 6617 is deleted.

9. Section 40.153–1 as published on October 17, 1953 in 18 F. R. 6617 is amended by substituting the word "will" for "must" in the last sentence thereof.

10. Section 40.170–1 is adopted to read:

§ 40.170–1 *Approval of aircraft instruments and equipment for all operations (CAA interpretations which apply to § 40.170 (a)).* Instruments and equipment specified in §§ 40.171, 40.172, and §§ 40.230 through 40.232 must be approved in accordance with one or more of the following methods:

(a) Instruments and equipment which are accepted as part of the aircraft on original certification.

(b) Instruments and equipment manufactured in accordance with (TSO) Technical Standard Orders and installed in accordance with approved repair and alteration procedures or on original aircraft certification.

(c) Instruments and equipment manufactured in accordance with a (CAATC) Type Certificate and installed on original aircraft certification or subsequent repair and alteration approval.

(d) Instruments and equipment approved by the Administrator in accordance with standard repair and alteration procedure.

11. Section 40–170–2 as published on October 17, 1953 in 18 F. R. 6617 is revised to read:

§ 40.170–2 *Determination of operable condition of radio equipment (CAA interpretations which apply to § 40.170 (b)).* Radio equipment specified in

[1] System fuel and oil is that amount required to fill both systems and the tanks, where applicable, up to the tank outlets to the engines. When oil is used for propeller feathering, such oil is included as system oil.

§§ 40.230 through 40.232 which is of such complex nature that it cannot be accurately checked for operable condition prior to take-off, except by special ramp or shop performance check procedures, may be deemed to have been determined operable if equipment in this category is comprehensively checked for satisfactory operational performance during the last comprehensive performance check specified in the Operations Specifications, Aircraft Maintenance (other than preflight or daily), of the air carrier using such equipment coupled with frequent in-flight checks by pilots during regular operations.

12. Sections 40.173–1 through 40.173–4 as published on October 17, 1953, in 18 F. R. 6617–6618 are deleted and a new § 40.173–1 is adopted to read:

§ 40.173–1 *Hand fire extinguishers for crew, passenger, and cargo compartments (CAA interpretations which apply to § 40.173 (d)).* Approved extinguishers are extinguishers which have been approved by the Administrator or by the Underwriters Laboratories (UL), the Factory Mutual Laboratories (FML), or any other agency which may be deemed qualified by the Administrator in accordance with § 4b.18 of this chapter.

13. Sections 40.175–1 and 40.175–2 as published on October 17, 1953 in 18 F. R. 6618 are deleted and a new § 40.175–1 is adopted to read:

§ 40.175–1 *Power supply requirements for operation of instruments (CAA interpretations which apply to § 40.175 (c)).* (a) Instruments and equipment using an external power source are interpreted to mean all instruments and equipment which derive their operative or motive power from an external source such as radios, air driven instruments, electric gyro instruments, etc., as contrasted with spring driven clocks or magnetic compasses which have a self-contained power source.

(b) The requirement that all airplanes have installed "a power supply and distribution system capable of producing and distributing the load for all required instruments and equipment using and external power source in the event of failure of any one power source or component of the power distribution system" is interpreted to mean that an alternate power source or sources and power distribution system or systems will be necessary to assure that all required instruments and equipment, using an external power source, receive their essential operative or motive power regardless of failure of any one power source or component of a power distribution system.

14. Section 40.178–1 as published on October 17, 1953 in 18 F. R. 6618 is deleted.

15. Section 40.206–1 as published on October 17, 1953 in 18 F. R. 6618 is deleted.

16. Section 40.230–1 as published on October 17, 1953 in 18 F. R. 6618 is revised to read:

§ 40.230–1 *Independent radio systems (CAA interpretations which apply to § 40.230).* Radio systems are independent where each such system is separate and complete, and the function of any part of the whole of one system is not dependent on the continued functioning of any component of the other, and in event of failure in one system, the other system is capable of continued independent operation.

17. Sections 40.241–1 and 40.241–2 as published on October 17, 1953 in 18 F. R. 6618–6619 are deleted and a new § 40.241–1 is adopted to read:

§ 40.241–1 *Persons directly in charge of inspection, maintenance, overhaul, or repair of airframes, engines, propellers, or appliances (CAA interpretations which apply to § 40.241 (b)).* The individual "directly in charge" is interpreted to mean each individual assigned by the carrier or other person performing maintenance, to a position in which he is responsible for the work of a shop or station which performs inspections, maintenance, repairs, alterations, or other functions affecting aircraft airworthiness. Such individuals need not necessarily physically observe and direct each worker constantly, but must be available for consultation and decision on matters requiring instruction or decision from higher authority than that of the individuals performing the work.

18. Sections 40.261–1 and 40.307–1 as published on October 17, 1953 in 18 F. R. 6619 are deleted.

(Sec. 205, 52 Stat. 984, as amended; 49 U. S. C. 425. Interpret or apply secs. 601, 604, 605, 608, 52 Stat. 1007, 1010, 1011; 49 U. S. C. 551, 554, 555, 558)

This supplement shall become effective January 1, 1954.

### Subchapter B—Economic Regulations

[Reg. ER–194]

### PART 241—FILING OF REPORTS BY CERTIFICATED AIR CARRIERS AND UNIFORM ACCOUNTING REQUIREMENTS

Adopted by direction of the Civil Aeronautics Board at its office in Washington, D. C., on the 17th day of December 1953.

Pursuant to authority delegated by the Civil Aeronautics Board to the Office of Carrier Accounts and Statistics this amendment to Part 241 of the Economic Regulations (14 CFR Part 241) is being adopted for the purpose of requiring certificated air carriers to separate in their accounts and on their CAB Form 41 reports the service and subsidy elements of mail payments. This separation will give Congress and the public continuing information as to the amount of subsidy paid to the carriers and is in line with the President's Reorganization Plan No. 10, effective October 1, 1953, which transfers to the Board the function of paying the subsidy portion of air mail compensation under the Civil Aeronautics Act.

Notice of this proposed change was published in the FEDERAL REGISTER on October 29, 1953, in Draft Release No. 66. Moreover, all air carriers affected by this change informally received identical notification of the change through distribution of a memorandum addressed to the chief accounting officers of all scheduled air carriers from the Chief, Accounting and Statistics Division of the Bureau of Air Operations.

Interested persons have been afforded an opportunity to participate in the making of this rule and due consideration has been given to all relevant matters submitted and arguments presented.

In consideration of the foregoing, the Board hereby amends Part 241 of the Economic Regulations as follows, effective January 21, 1954:

1. By deleting the instructions and item list under § 241.3102 *Mail; United States* and insertion of two paragraphs to read:

(a) This account shall include income from the carriage of United States mail accruing under service mail rates established by the Civil Aeronautics Board.

(b) Fines and penalties imposed by the United States Government in connection with the carriage of mail shall be charged to Account 7193, "Other Non-Operating Expenses".

2. By inserting between § 241.3109 *Other transportation,* and § 241.4100 *Incidental revenues; net* of the following new center heading and section:

FEDERAL SUBSIDY

§ 241.3900 *Federal subsidy.*[1] (a) This account shall include elements of compensation fixed pursuant to section 406 (b) of the Civil Aeronautics Act which exceed amounts accruing under service mail rates established by the Civil Aeronautics Board for the carriage of United States mail.

(b) Fines and penalties imposed by the United States Government shall be charged to Account 7193, "Other Non-Operating Expenses".

(Sec. 205, 52 Stat. 984, 49 U. S. C. 425. Interpret or apply sec. 407, 52 Stat. 1000; 49 U. S. C. 487.)

NOTE: The record keeping and reporting requirements of this amendment have been approved by the Bureau of the Budget in accordance with the Federal Reports Act of 1942.

By the Office of Carrier Accounts and Statistics.

[SEAL] WARNER H. HORD,
*Chief, Office of Carrier Accounts and Statistics.*

[F. R. Doc. 53–10598; Filed, Dec. 21, 1953; 8:50 a. m.]

[1] A sample copy of Schedule B of CAB Form 41 incorporating this new account was filed as part of the original document.

## TITLE 26—INTERNAL REVENUE

### Chapter I—Internal Revenue Service, Department of the Treasury

#### Subchapter C—Miscellaneous Excise Taxes

[Regulations 29]

### PART 197—DRAWBACK OF TAX ON DISTILLED SPIRITS USED IN THE MANUFACTURE OF NONBEVERAGE PRODUCTS

*Preamble.* 1. These regulations, "Regulations 29, Drawback of Tax on Distilled Spirits Used in the Manufacture of Nonbeverage Products," (26 CFR Part 197) are a republication of Regulations 29, 1942 edition (26 CFR Part 197), as amended to date by approved Treasury decisions.

2. These regulations, except for the revision of several sections to conform with the delegation of authority made in IR-Mimeograph No. 232, dated July 6, 1953, consist only of previously approved material but the text has been rearranged and renumbered to conform to the Federal Register Regulations (13 F. R. 5929).

3. This republication of these regulations shall not affect or limit any act done or any liability previously incurred, or any suit, action, or proceeding had or commenced in any civil, administrative, or criminal cause and proceeding prior to the date of republication, nor shall this republication release, acquit, affect, or limit any offense committed in violation of these regulations prior to republication, or any penalty, liability or forfeiture incurred prior to such date.

4. It is found that compliance with the notice and public rule-making procedure of section 4 (a) and the effective date limitations of section 4 (c) of the Administrative Procedure Act (5 U. S. C. 1001, et seq.) is unnecessary in connection with the republication of the regulations in this part for the reason that the changes made relate merely to form and not to substance.

Sec.
197.0 Statutory provisions.
197.0–1 Tax.
197.0–2 Registration.

Subpart A—Scope of Regulations
197.1 Drawback of tax on spirits used in nonbeverage products.

Subpart B—Definitions
197.10 Meaning of terms.
197.11 Domestic distilled spirits and distilled spirits.
197.12 Filed.
197.13 Fully taxpaid.
197.14 Intermediate products.
197.15 I. R. C.
197.16 Nonbeverage products.
197.17 Time.
197.18 Total annual withdrawals.
197.19 U. S. C.
197.20 Used.
197.21 Year.

Subpart C—Special Tax
197.25 Payment and rates of special tax.
197.26 Special tax for each place.
197.27 Date special tax due.
197.28 Filing of return and payment of special tax.

EXECUTION OF FORM 11
197.29 General.
197.30 Signature.
197.31 Oaths or affirmations.

Subpart D—Special Tax Stamps
197.40 Issuance of stamps.
197.41 Posting of stamps.
197.42 Correction of errors on stamps.

CHANGE IN LOCATION
197.43 General.
197.44 Removal in same internal revenue district.
197.45 Removal to another internal revenue district.
197.46 Failure of registration.
197.47 Certificates in lieu of lost stamps.

CHANGE IN CONTROL
197.48 General.
197.49 Persons eligible.
197.50 Failure of registration.
197.51 Certificates in lieu of lost stamps.

CHANGE IN NAME OR STYLE
197.52 General.
197.53 Change in capital stock.
197.54 Sale of stock.

ADJUSTMENT OF SPECIAL TAX RATE
197.55 Change to higher rate.
197.56 Change to lower rate.
197.57 Refund of special tax.

CLAIMS FOR REFUND OF SPECIAL TAX
197.58 General.
197.59 Limitation.

Subpart E—Bonds and Consents of Sureties
197.65 General.
197.66 Corporate surety.
197.67 Powers of attorney.
197.68 Individual sureties.
197.69 Ownership of real property.
197.70 Execution of Form 33 (AT).
197.71 Certificate of title.
197.72 Appraisal.
197.73 Investigation.
197.74 Requalification.
197.75 Deposit of collateral.
197.76 Consents of surety.
197.77 Approval required.
197.78 Authority to approve.
197.79 Additional or strengthening bonds.
197.80 New or superseding bonds.
197.81 Account with drawback bond.

TERMINATION OF BONDS
197.82 General.
197.83 Application of surety for release from bond.
197.84 Extent of release of surety from liability under bond.
197.85 Action by Assistant Regional Commissioner.
197.86 Notice of termination.
197.87 Release of collateral.

Subpart F—Formulas and Samples
197.95 Products requiring formulas.
197.96 Products not requiring formulas.
197.97 Statement of process.
197.98 Samples.

Subpart G—Claims for Drawback
197.105 Drawback.
197.106 Claims.
197.107 Bond, Form 1730.
197.108 Date of filing claim.
197.109 Information to be shown by the claim.

SUPPORTING DATA
197.110 General.
197.111 Identification of special-tax payment.
197.112 Distilled spirits received in tank cars.
197.113 Distilled spirits received in containers.
197.114 Distilled spirits received in bottles.
197.115 Use of distilled spirits.
197.116 Distilled spirits account.
197.117 Account of distilled spirits recovered in the manufacture of products eligible for drawback.
197.118 Account of distilled spirits recovered in the manufacture of intermediate products.
197.119 Account of intermediate products.

ACTION ON CLAIMS
197.120 Action on quarterly claims.
197.121 Action on monthly claims.

Subpart H—Records
197.130 Nature of records.
197.131 Exception.
197.132 Form of record.

AUTHORITY: §§ 197.1 to 197.132 issued under 53 Stat. 467; 26 U. S. C. 3791. Interpret or apply 53 Stat. 388 as amended, 394, 396, 399, 495; 26 U. S. C. 3250, 3270, 3280, 3304, 4041. Other statutory provisions interpreted or applied are cited to text in parenthesis.

§ 197.0 *Statutory provisions.* The provisions of law having more common application to drawback of tax on distilled spirits used in the manufacture of nonbeverage products are contained in §§ 197.0–1 and 197.0–2.

§ 197.0–1 *Tax.*

26 U. S. C. 3250 TAX.

* * * * * *

(l) *Manufacturers or producers of designated nonbeverage products*—(1) *In general.* Any person using distilled spirits produced in a domestic registered distillery or industrial alcohol plant and fully taxpaid in the manufacture or production of medicines, medicinal preparations, food products, flavors, or flavoring extracts which are unfit for beverage purposes, upon payment of a special tax per annum, shall be eligible for drawback at the time when such distilled spirits are used in the manufacture of such products and as hereinafter provided for.

(2) Such special tax per annum shall be graduated in amount as follows: (a) for total annual withdrawals not exceeding 25 proof gallons, $25 per annum; (b) for total annual withdrawals not exceeding 50 proof gallons, $50 per annum; (c) for total annual withdrawals of 50 proof gallons or more, $100 per annum.

(3) *Requirements.* Such person shall register annually with the Commissioner; keep such books and records as may be necessary to establish the fact that distilled spirits purchased by him and fully taxpaid were used in the manufacture or production of medicines, medicinal preparations, food products, flavors, or flavoring extracts which were unfit for use for beverage purposes; and shall be subject to such rules and regulations in relation thereto as the Commissioner, with the approval of the Secretary, shall prescribe to secure the Treasury of the United States against frauds.

(4) *Investigative powers of Commissioner.* The Commissioner, for the purpose of ascertaining the correctness of any claim filed under this subsection is authorized, by any officer or employee of the Bureau of Internal Revenue, including the field service, designated by him for that purpose, to examine any books, papers, records, or memoranda bearing upon the matters required to be alleged in the claim, and may require the attendance of the person filing the claim or of any officer or employee of such person, or the attendance of any other person having knowledge in the premises, and may take his testimony with reference to any matter covered by the claim, with power to administer oaths to such person or persons.

(5) *Drawback.* In the case of distilled spirits tax-paid and used as provided in this subsection, a drawback shall be allowed—

(A) At the rate of $6 on each proof gallon upon which tax is paid at a rate of $9 per proof gallon prior to the effective date of section 462 of the Revenue Act of 1951.

(B) At the rate of $9.50 on each proof gallon upon which tax is paid at a rate of

$10.50 per proof gallon on and after the effective date of section 462 of the Revenue Act of 1951, and

(C) At the rate of $8 on each proof gallon upon which tax is paid at a rate of $9 per proof gallon after March 31, 1954.

Such drawback shall be due and payable quarterly upon filing of a proper claim with the Secretary; except that, where any person entitled to such drawback shall elect in writing to file monthly claims therefor, such drawback shall be due and payable monthly upon filing of a proper claim with the Secretary: *Provided, however,* That the Secretary may require persons electing to file monthly drawback claims to file with him a bond or other security in such amount and with such conditions as he shall by regulations prescribe. Any such election may be revoked upon filing of notice thereof with the Secretary. No claim under this subsection shall be allowed unless filed with the Secretary within the three months next succeeding the quarter in which the distilled spirits covered by the claim were used as provided in this subsection.

§ 197.0–2 *Registration.*

26 U. S. C. 3270 REGISTRATION.

(a) *Requirements.* Every person engaged in any trade or business on which a special tax is imposed by law shall register with the collector of the district his name or style, place of residence, trade or business, and the place where such trade or business is to be carried on. In case of a firm or company, the names of the several persons constituting the same, and the places of residence, shall be so registered.

• • • • •

### Subpart A—Scope of Regulations

§ 197.1 *Drawback of tax on spirits used in nonbeverage products.* These regulations, "Regulations 29, Drawback of Tax on Distilled Spirits Used in the Manufacture of Nonbeverage Products" (26 CFR Part 197), contain the procedural and substantive requirements relative to obtaining drawback of internal revenue tax on distilled spirits used in the manufacture of certain nonbeverage products. The regulations cover the allowance of drawback of internal revenue tax on fully tax-paid domestic distilled spirits used in the manufacture or production of medicines, medicinal preparations, food products, flavors, or flavoring extracts, which are unfit for beverage purposes; the payment of special (occupational) taxes in order to be eligible to claim drawback; claims; formulas and samples; losses; and records and reports of distilled spirits received and used in the manufacture of nonbeverage products.

### Subpart B—Definitions

§ 197.10 *Meaning of terms.* As used in this part, unless the context otherwise requires, terms shall have the meaning ascribed in this subpart.

§ 197.11 *Domestic distilled spirits and distilled spirits.* "Domestic distilled spirits" and "distilled spirits" shall mean that substance known as ethyl alcohol produced at industrial alcohol plants operated under Regulations 3 (26 CFR Part 182), and those substances known as whisky, brandy, rum, or other spirits, produced at registered distilleries or fruit distilleries operated under Regulations 4 (26 CFR Part 183) and 5 (26 CFR Part 184).

§ 197.12 *Filed.* A claim for drawback shall be deemed to have been "filed" when it is delivered to the office of the proper Assistant Regional Commissioner, Alcohol and Tobacco Tax, and by that office received.

§ 197.13 *Fully taxpaid.* Distilled spirits shall be deemed to have been "fully taxpaid" when the internal revenue tax imposed and levied in respect thereto has been paid at the rates provided by law.

§ 197.14 *Intermediate products.* "Intermediate products" shall mean products containing distilled spirits which are not subject to drawback until used in a nonbeverage product eligible for drawback.

§ 197.15 *I. R. C.* "I. R. C." shall mean the Internal Revenue Code.

§ 197.16 *Nonbeverage products.* The term "nonbeverage products" refers to medicines, medicinal preparations, food products, flavors, or flavoring extracts, in the manufacture or production of which fully tax-paid distilled spirits are used, and which are unfit for use for beverage purposes.

§ 197.17 *Time.* The "time" at which distilled spirits shall be deemed to have been used is when the product contains the ingredients called for by an approved formula, or formulas prescribed by the United States Pharmacopoeia, the National Formulary, or the Homeopathic Pharmacopea of the United States, as the case may be.

§ 197.18 *Total annual withdrawals.* The term "total annual withdrawals" shall mean the total quantity of distilled spirits (proof gallons), which are used in the manufacture or production of nonbeverage products during a year.

§ 197.19 *U. S. C.* "U. S. C." shall mean the United States Code.

§ 197.20 *Used.* Distilled spirits shall be deemed to have been "used" in the manufacture of a product designated in 26 U. S. C. 3250 (1), when such spirits are either consumed in such manufacture or are incorporated in the product: *Provided,* That spirits lost by causes such as spillage, leakage, breakage or theft, prior to or during the process of manufacture, shall not be deemed to be consumed in such manufacture.

§ 197.21 *Year.* "Year" shall mean the period which begins July 1 and ends on the following June 30.

### Subpart C—Special Tax

§ 197.25 *Payment and rates of special tax.* Each person who uses distilled spirits in the manufacture or production of medicines, medicinal preparations, food products, flavors, or flavoring extracts which are unfit for beverage purposes, in order to be eligible to claim the drawback on the distilled spirits so used, must pay special tax at the rate of $25 per annum for total annual withdrawals not exceeding 25 proof gallons of distilled spirits; $50 per annum for total annual withdrawals not exceeding 50 proof gallons; or $100 per annum for total annual withdrawals of more than 50 proof gallons. Where a claim is filed in the first quarter of a year, covering distilled spirits used during the last quarter of the preceding year, and special tax has not been paid for the preceding year, special tax for such preceding year must be paid in the appropriate amount prior to or at the time of filing the claim. Special tax, based upon estimated withdrawals, may be paid in advance of actual withdrawals. Adjustments of the special tax where improperly paid will be made in accordance with §§ 197.55 and 197.56. The manufacturer is not required to pay the special tax if he does not claim drawback on the distilled spirits used by him.

§ 197.26 *Special tax for each place.* A separate special tax must be paid for each place at which distilled spirits are used in the manufacture or production of nonbeverage products if a claim is filed for drawback of tax on distilled spirits so used at each such place.

§ 197.27 *Date special tax due.* The special tax must be paid prior to the filing of the first claim for drawback during any fiscal year commencing July 1 and ending with June 30 following. Notwithstanding the month of the fiscal year in which the claim is filed, the full annual special tax of $25, $50, or $100, as the case may be, must be paid.

§ 197.28 *Filing of return and payment of special tax.* Persons intending to file claims for drawback shall file returns on Form 11 with remittances, with the district director of internal revenue for the district in which the place of manufacture is located. The remittance must be in the form of cash, United States post office money order, or certified check. Uncertified checks will not be accepted by the district director.

### Execution of Form 11

§ 197.29 *General.* Special-tax returns, Form 11, may be procured from any district director or collection officer and shall disclose, in the spaces provided, the following:

(a) The true name of the taxpayer, which may be followed by the words "trading as" and any trade name under which the business is conducted.

(b) The exact location of the place of business, as by name and number of building or street, and where these do not exist, by some particularization in addition to the post office address.

(c) The kind of business carried on.

(d) Except in the case of a corporation, the true names of all persons having a proprietary interest in the business. While it is not necessary that the names of all persons having a proprietory interest in the business appear on the special-tax stamp, the names must be disclosed on the return, Form 11.

§ 197.30 *Signature.* The return of an individual proprietor shall be signed by the proprietor; the return of a partnership shall be signed by a member of the firm; and the return of a corporation shall be signed by an officer thereof. In each case, the person signing the return shall designate his capacity, as "individual owner," "member of firm," or, in the case of corporation, the title of the officer. Receivers, trustees, assignees, executors, administrators, and other legal representatives who continue the business of a bankrupt, insolvent, deceased person, etc., will indicate the fiduciary capacity in which they act. Returns signed and sworn to by persons as agents will not be accepted unless they file with the district director a power of attorney authorizing them so to act.

§ 197.31 *Oaths or affirmations.* Form 11 must be sworn to before a notary public or other official authorized to administer oaths: *Provided,* That if the form officially prescribed for such return contains therein a provision for verification by a written declaration that such return is made under penalties of perjury, such return shall be verified by the execution of such declaration, and such declaration so executed shall be in lieu of the oath required herein for verification.

(63 Stat. 667; 26 U. S. C. 3809)

### Subpart D—Special-Tax Stamps

§ 197.40 *Issuance of stamps.* Upon receipt of a return on Form 11, properly executed, together with proper remittance, the district director of internal revenue will issue a special-tax stamp designated "Manufacturer of Nonbeverage Products." District directors and collection officers may not issue the special-tax stamp before the tax is fully paid. Such special-tax stamp may not be sold or otherwise transferred to another person.

§ 197.41 *Posting of stamps.* A special-tax payer shall conspicuously display his special-tax stamp in the place of business for which the special tax was paid. If such stamp is lost or accidentally destroyed, the taxpayer should immediately notify the district director of internal revenue from whom the stamp was purchased, who will issue to the taxpayer a "Certificate in Lieu of Lost or Destroyed Special Tax Stamp," which must be kept in the same manner as the stamp.

(53 Stat. 394; 26 U. S. C. 3273)

§ 197.42 *Corrections of errors on stamps.* On receipt of a special-tax stamp, the taxpayer will examine it to insure that the name and address are correctly stated thereon. If an error has been made, the stamp should be returned to the district director of internal revenue, with a statement showing the nature of the error and setting forth the proper name or address. The district director of internal revenue, on receipt of such stamp and statement, will compare the data with that on Form 11, and if an error on the part of the district director of internal revenue has been made, he will make the necessary correction and return the stamp to the taxpayer. If the Form 11 agrees with the data on the stamp, the district director of internal revenue will require the taxpayer to file a new Form 11, designated "Amended Return," disclosing the proper name and address, and, on receipt of the amended Form 11, will amend his Record 10 accordingly, attach the amended Form 11 to the original Form 11, make the proper correction on the stamp, and return it to the taxpayer.

### Change in Location

§ 197.43 *General.* A special-tax payer who, during the fiscal year for which special tax was paid, removes his place of manufacture to a place other than that specified in his special-tax stamp, must register the change with the district director of internal revenue from whom the special-tax stamp was purchased, within 90 days after he moves into the new premises, by executing a new return on Form 11, designated as "Amended Return," setting forth the time when and the place to which such removal was made, and shall surrender the special-tax stamp to the district director of internal revenue for indorsement of the change in location.

(53 Stat. 396; 26 U. S. C. 3280)

§ 197.44 *Removal in same internal revenue district.* When a special-tax payer removes his place of manufacture to another address within the same internal revenue district, the district director will enter on his Record 10 the new address and the date of removal into the new premises, and will note the change on the face of the special-tax stamp, stating clearly thereon the new location, and will return the special-tax stamp to the taxpayer.

§ 197.45 *Removal to another internal revenue district.* When a taxpayer removes his place of manufacture to a location within an internal revenue district other than that in which the special-tax stamp was issued, the district director who issued the special-tax stamp will enter on his Record 10 the new address and date of removal into the new premises, stating clearly the new location where the business is to be carried on, and will transmit the stamp to the district director of the district to which the taxpayer removed. The district director of that district will make entry on his Record 10, as in the case of a new registrant, and note the taxpayer's new address and the district director's name, title, and district, and the date of removal on the special-tax stamp, which will be returned to the taxpayer.

§ 197.46 *Failure of registration.* A person who removes his place of manufacture and fails to register such removal with the district director, as required by § 197.43, must pay a new special tax for the new location if a claim for drawback is filed by him during the fiscal year for which the original special tax was paid.

§ 197.47 *Certificates in lieu of lost stamps.* The provisions of §§ 197.43–197.46 shall apply to certificates issued in lieu of lost or destroyed special-tax stamps.

### Change in Control

§ 197.48 *General.* Certain persons other than the special-tax payer may, without paying additional special tax, be eligible to the same privileges granted by law to the taxpayer during the remainder of the fiscal year for which the special tax was paid. To secure such right, such person or persons must file with the district director from whom the special-tax stamp was purchased, within 90 days after the date on which the successor or successors assume control, a return on Form 11, showing the basis of the succession.

§ 197.49 *Persons eligible.* Under the conditions indicated in § 197.48, persons such as those listed below have the right of succession:

Death: The widow or child, or executor, administrator, or other legal representative of the taxpayer.

Husband and wife: A husband or wife succeeding to the business of his or her spouse (living).

Insolvency: A receiver or trustee in bankruptcy, or an assignee for benefit of creditors.

Withdrawal from firm: The partner or partners remaining after death or withdrawal of a member.

§ 197.50 *Failure of registration.* A person so succeeding, who fails to register such succession with the district director, as required by § 197.48, must pay a new special tax if a claim for drawback is filed by him during the fiscal year for which the original special tax was paid.

§ 197.51 *Certificates in lieu of lost stamps.* The provisions of §§ 197.48–197.50 shall apply to certificates issued in lieu of lost or destroyed special-tax stamps.

### Change in Name or Style

§ 197.52 *General.* A special-tax payer does not incur liability to additional special tax by reason of a mere change in the trade name or style under which such business is conducted, nor by reason of a change in management which involves no change in the proprietorship of the business.

§ 197.53 *Change in capital stock.* Additional special tax is not required by reason of a change of name or increase in the capital stock of a corporation if the laws of the State of incorporation provide for such changes without creating a new corporation.

§ 197.54 *Sale of stock.* No additional special tax is required by reason of the sale or transfer of all or a controlling interest in the capital stock of a corporation.

### Adjustment of Special Tax Rate

§ 197.55 *Change to higher rate.* A manufacturer of nonbeverage products who pays a special tax of $25 per annum and has filed or intends to file a claim or claims for drawback covering distilled spirits in excess of 25 proof gallons used during the year for which the special tax was paid, must pay special tax of $50 or $100, as the case may be, and obtain a stamp therefor. The manufacturer may thereupon submit the special-tax stamp of $25 to the district director of internal revenue to whom the special tax was paid with a claim on Form 843 for refund of the value thereof. Similar procedure will govern in the case of a manufacturer of nonbeverage products who pays special tax of $50 and has filed or intends to file claim for drawback covering distilled spirits used in excess of 50 proof gallons.

§ 197.56 *Change to lower rate.* A manufacturer of nonbeverage products who pays special tax of $100 or $50 per annum, as the case may be, and, during the year for which the special tax was paid, files claim or claims for drawback covering the use of not more than 50 or 25 proof gallons of distilled spirits, as the case may be, may file a claim on Form 843 for refund of the difference between the special tax paid and the special tax due. The special-tax stamp shall be attached to the claim.

§ 197.57 *Refund of special tax.* Refund of special tax may be made if it is established that the taxpayer did not file a claim for drawback for the period covered by the special-tax stamp. Where claim for drawback was filed, refund of special tax may be made if it is established that no drawback was allowed or paid for the period covered by the stamp.

CLAIMS FOR REFUND OF SPECIAL TAX

§ 197.58 *General.* Claims for refund of the special tax alleged to have been erroneously or improperly paid shall be filed on Form 843 (original only) with the district director of internal revenue to whom the special tax was paid. The claim must set forth in detail and state each ground upon which it is made, and facts sufficient to apprise the Assistant Regional Commissioner of the exact basis thereof. The special-tax stamp shall be attached to the claim.

(53 Stat. 399; 26 U. S. C. 3304)

§ 197.59 *Limitation.* No claim for refund of the special tax shall be allowed unlesss presented within four years next after the payment of such tax.

(53 Stat. 399; 26 U. S. C. 3304)

**Subpart E—Bonds and Consents of Sureties**

§ 197.65 *General.* Every person required to file a bond or consent of surety under the provisions of this part shall prepare and execute it on the prescribed form, in triplicate, in accordance with the provisions in this part and the instructions printed on the form, and shall submit it to the Assistant Regional Commissioner. The bonds required by the provisions in this part shall be given with surety or collateral security. The surety may be individual or corporate. The surety may not have any interest, either direct or indirect, in the business of the principal on the bond.

§ 197.66 *Corporate surety.* Bonds may be given with corporate surety authorized by the Secretary of the Treasury to become surety on Federal bonds, subject to the limitations prescribed by the Secretary in Treasury Department Form 356, Commissioner of Accounts, Surety Bonds Branch, which is issued annually, and subject to such amendatory circulars as may be issued from time to time. A bond executed by two or more corporate sureties shall be the joint and several liability of the principal and the sureties: *Provided*, That each corporate surety may limit its liability in terms upon the face of the bond in a definite, specified amount, which amount shall not exceed the limitations prescribed for such corporate surety by the Secretary, as set forth in Treasury Department Form 356. When the sureties so limit their liability, the aggregate of such limited liabilities must equal the required penal sum of the bond.

§ 197.67 *Powers of attorney.* Powers of attorney and other evidence of appointment of agents and officers to execute bonds on behalf of corporate sureties are required to be filed with, and passed upon by, the Commissioner of Accounts, Surety Bonds Branch, Treasury Department. Such powers and other evidence of appointment need not be filed with, or submitted to, Assistant Regional Commissioners. Powers of attorney or other evidence of appointment of agents and officers to execute bonds on behalf of the principal, must be filed on Form 1534, in triplicate, with the Assistant Regional Commissioner with whom the bond is filed.

§ 197.68 *Individual sureties.* Bonds may be given with individual sureties of which there must be not less than two, each of whom must qualify by executing Form 33 (AT), in triplicate. Individual sureties must be citizens of the United States and reside in the State in which the business of the principal is to be conducted. No person will be accepted as an individual surety in a State in which he is not authorized to become a surety.

§ 197.69 *Ownership of real property.* Each individual surety must own unencumbered real property, in fee simple, the appraised value of which, over and above any exemptions from execution allowed by the laws of the State, is equal to the penal sum of the bond. Such real property must be located within the State where the business of the principal is to be conducted. The real property must be described in the surety's affidavit, Form 33 (AT), with all of the formalities required in conveyances of real estate by the laws of the State in which it is situated.

§ 197.70 *Execution of Form 33 (AT).* The surety's affidavit on Form 33 (AT) shall contain all of the information required by this part and the instructions printed on the form. The form shall be subscribed and sworn to before an officer duly authorized to administer oaths, and one copy thereof shall be attached to each copy of the bond to which it relates.

§ 197.71 *Certificate of title.* There must be submitted with the surety's affidavit, Form 33 (AT), a certificate of title, in triplicate, showing that the surety has a fee simple title free of encumbrances to the realty described in the form: *Provided*, That where recognized by the laws of the State in which the realty is located, there may be submitted, in lieu of a certificate of title, a document of comparable validity, such as a certified copy of a title insurance policy or a certificate of search and finding executed by an authorized attorney.

§ 197.72 *Appraisal.* There will also be submitted with Form 33 (AT) an appraisal, in triplicate, by two or more competent persons, designated by the Assistant Regional Commissioner for the purpose, showing separately the value of the land and buildings, and a full and clear statement of the method employed by them in determining their valuation. The appraisal shall be at the expense of the principal on the bond, unless it is made by Government officers.

§ 197.73 *Investigation.* The Assistant Regional Commissioner must cause an investigation to be made of all the facts stated in the surety's affidavit on Form 33 (AT) and supporting documents, and shall forward one copy of the report of such investigation to the Commissioner with the bond and accompanying Form 33 (AT).

§ 197.74 *Requalification.* The Commissioner or Assistant Regional Commissioner may at any time require the requalification of individual sureties on Form 33 (AT).

§ 197.75 *Deposit of collateral.* Except as provided in this section, bonds or notes of the United States, or other obligations which are unconditionally guaranteed as to both interest and principal by the United States, may be pledged and deposited by principals as collateral security in lieu of individual or corporate sureties. Assistant Regional Commissioners on receiving such bonds or notes, or other obligations, pledged and deposited by principals as collateral security in lieu of surety, shall deposit such securities as required by Department Circular No. 154, revised (31 CFR Part 225). United States Savings, Defense Savings, and War Savings Bonds issued under the authority of section 22 of the Second Liberty Bond Act, as amended, and other bonds and notes of the United States, which are nontransferable or the hypothecation of which will not be recognized by the Treasury Department, may not be pledged and deposited as security in lieu of corporate or individual sureties.

(Sec. 1126, 44 Stat. 122 as amended, sec. 7, 49 Stat. 22; 6 U. S. C. 15)

§ 197.76 *Consents of surety.* Consents of surety to a change in the terms of a bond must be executed on Form 1533, in as many copies as are required of the bond which they affect, by the principal and all sureties with the same formality and proof of authority to execute as are required for the execution of bonds. Form 1533 will be used by obligors on collateral bonds as well as those on surety bonds. The Form 1533 must properly identify the bond affected thereby and state specifically and precisely what is covered by the extended terms thereof. If the surety is a corporation, the consent may be executed by an agent or attorney in fact duly authorized so to do by power of attorney filed by the surety with the appropriate Assistant Regional Commissioner, or the consent may be executed by the home office officials of such corporate surety; except that, in cases where the saving of time is an element, the consent may be executed by an agent or attorney in fact where the home office officials, by specific direction, order its execution. A copy of such specific direction should be attached to each copy of such consent.

§ 197.77 *Approval required.* No person using distilled spirits in the manufacture of nonbeverage products may file monthly claim for drawback under the provisions of this part until bond on Form 1730 has been approved by the Assistant Regional Commissioner.

§ 197.78 *Authority to approve.* Assistant Regional Commissioners are authorized to approve all bonds and consents of surety required by this part.

§ 197.79 *Additional or strengthening bonds.* In all cases where the penal sum of a bond on file and in effect is not sufficient, computed as prescribed by this part, the principal may give an additional or strengthening bond in a sufficient penal sum, provided the surety thereon is the same as on the bond already on file and in effect; otherwise a new bond covering the entire liability will be required. Such additional or strengthening bonds, being filed to increase the bond liability of the principal and the surety, shall not be construed in any sense to be substitute bonds, and the Assistant Regional Commissioner will refuse to approve an additional or strengthening bond where any notation is made thereon which may be construed as a release of any former bond or as limiting the amount of either bond to less than its full penal sum. Additional or strengthening bonds must show the current date of execution and the effective date in the blank spaces provided therefor. Such bonds must have marked thereon, by the obligors at the time of execution, "Additional Bond," or "Strengthening Bond," as the case may be.

§ 197.80 *New or superseding bonds.* The principal on any bond filed pursuant to this part may, at any time, substitute a new bond therefor. Executors, administrators, assignees, receivers, trustees, or other persons acting in a fiduciary capacity, continuing or liquidating the business of the principal, must execute and file a new bond or obtain the consent of the surety or sureties on the existing bond or bonds. When, in the opinion of the Commissioner or the Assistant Regional Commissioner, the interests of the Government demand it or in any case where the security of the bond becomes impaired in whole or in part for any reason whatever, the principal will be required to give a new bond. A new bond shall be required immediately in case of death, removal from the State, or insolvency of an individual surety, or the insolvency of a corporate surety. Where a bond is found to be not acceptable or for any reason becomes invalid or of no effect, the principal shall be required to file immediately a new and satisfactory bond. Superseding bonds must show the current date of execution and the date they are to be effective, and each such bond shall have marked thereon, by the obligors at the time of execution, "Superseding Bond." Where a new bond is submitted by the principal to supersede a bond or bonds then in effect, and such superseding bond has been approved, the superseded bond shall be released as to transactions occurring wholly subsequent to the effective date of the superseding bond and notice of termination of the superseded bond may be issued as provided in § 197.85.

§ 197.81 *Account with drawback bond.* The Assistant Regional Commissioner will keep an account with each bond governing the allowance of drawback on a monthly basis. The principal will be charged with the amount of drawback allowed on each monthly claim. Credit will be given on the account with the bond in the amount equal to the drawback found by audit and investigation to be allowable, under the provisions of this part.

TERMINATION OF BONDS

§ 197.82 *General.* Continuing bonds on Form 1730 will be terminated by the Assistant Regional Commissioner as to liability on drawback allowed after a specified future date (a) pursuant to a notice by the surety as provided in § 197.83, (b) following approval of a superseding bond, as provided in § 197.80, or (c) following notification by the principal of his intent to discontinue the filing of claims on a monthly basis: *Provided*, That the bond will not be terminated until all outstanding liability thereunder has been discharged. Upon termination, the Assistant Regional Commissioner will mark the bond "canceled" followed by the date of cancellation, and will issue a notice of termination, Form 1490, or a notice of release, Form 1491, as provided in § 197.86.

§ 197.83 *Application of surety for release from bond.* A surety on any bond required by this part may at any time, in writing, notify the Assistant Regional Commissioner in whose office the bond is on file, and the principal, that he desires to be relieved of liability under the bond at a date not less than 60 days after the date of the notification. One copy of the notice must be delivered to the principal and two copies shall be delivered to the Assistant Regional Commissioner. If the notice is given by an agent of the surety it must be accompanied by a power of attorney authorizing the agent to give such notice, or by a verified statement that such power of attorney is on file with the Treasury Department. The surety must also file with the Assistant Regional Commissioner an acknowledgment or other proof of service of such notice on the principal.

§ 197.84 *Extent of release of surety from liability under bond.* If the notice required by § 197.83 is not withdrawn thereafter in writing, the rights of the principal as supported by the said bond shall be terminated on the date named in the notice, and the surety will be relieved from liability for drawback allowed subsequent to the date named. Liability for drawback allowed prior to the date named in the surety's notice will continue until the claims for such drawback have been properly verified by the Assistant Regional Commissioner according to law and this part. Where the principal files a valid superseding bond, the surety on the bond superseded will be relieved from liability for drawback allowed wholly subsequent to the effective date of the superseding bond.

§ 197.85 *Action by Assistant Regional Commissioner.* When an application by the surety for release from bond is filed with the Assistant Regional Commissioner, or when a superseding bond has been approved, or when the principal has discontinued filing claims on a monthly basis, the Assistant Regional Commissioner will make a complete examination of records to determine whether there is any liability then due and payable, or chargeable, outstanding against the bond. If it is found that liabilities chargeable against the bond have not been paid or credited or otherwise settled, no further action will be taken until all such liabilities have been settled. If the Assistant Regional Commissioner finds that the bond may be properly terminated, he will issue notice of termination in accordance with the provisions of § 197.86.

§ 197.86 *Notice of termination.* Upon determining that the bond on Form 1730 may be terminated, the Assistant Regional Commissioner will execute a notice of termination, Form 1490, where a superseding bond has been approved, or a notice of release, Form 1491, where the principal has discontinued filing monthly claims, or where the surety has made application for release from bond as provided in § 197.83. The notice of termination or the notice of release shall be prepared in quadruplicate where there is but one surety, and in quintuplicate where there are two sureties. The Assistant Regional Commissioner will forward the original of the notice to the Commissioner, together with a copy of the surety's application, if any, furnish one copy to each obligor, and retain one copy of the notice and the surety's application, if any, on file with the bond to which it relates.

§ 197.87 *Release of collateral.* The release of collateral pledged and deposited to support bonds required by this part will be in accordance with the provisions of Department Circular No. 154, revised (31 CFR Part 225), subject to the conditions governing issuance of notices on Forms 1490 and 1491 of the termination of such bonds. When the Assistant Regional Commissioner determines that there is no outstanding liability against the bond, and has satisfied himself that the interests of the Government will not be jeopardized, the security may be released and returned to the principal.

(44 Stat. 122 as amended; 6 U. S. C. 15)

**Subpart F—Formulas and Samples**

§ 197.95 *Products requiring formulas.* Manufacturers intending to file drawback claims are required to file quantitative formulas for all preparations except those covered by § 197.96. Such formulas should be sent direct to the Director, Alcohol and Tobacco Tax Division, Washington 25, D. C., on Form 1678, in triplicate, before or at the time of manufacture of the products. Upon receipt by the Director, Alcohol and Tobacco Tax Division, the formulas will be examined and if found to be medicines, medicinal preparations, food products, flavors, or flavoring extracts which are unfit for beverage purposes they will be

approved. If the formulas do not meet the requirements of the law for drawback products, they will be disapproved. No drawback will be allowed on distilled spirits used in a disapproved product, unless such product is later used in the manufacture of an approved nonbeverage product. The formulas should be serially numbered, commencing with number one and continuing thereafter in numerical sequence. Amended or revised formulas will be considered as new formulas and serially numbered accordingly. One copy of each formula will be retained by the Director, Alcohol and Tobacco Tax Division, one copy returned to the manufacturer, and one copy will be sent to the Assistant Regional Commissioner for filing. The formulas returned to manufacturers shall be filed in serial order by the manufacturer and made available for examination by internal revenue officers in the investigation of drawback claims. The copies sent to Assistant Regional Commissioners shall likewise be filed in serial order, available for examination by drawback audit clerks and laboratory chemists. In the case of food products, such as preserved fruits, cakes, buns, soups, etc., it will be sufficient if the formulas therefor show the quantity of proof gallons of distilled spirits used in the production of a given quantity of finished product.

§ 197.96 *Products not requiring formulas.* Quantitative formulas need not be submitted if the products are medicinal preparations, tinctures, or fluid extracts produced under formulas prescribed by the United States Pharmacopoeia, The National Formulary, or the Homeopathic Pharmacopoeia of the United States, and such products are identified in the supporting data by name and followed by the letters "U. S. P.," "N. F.," or "H. P. U. S.," as the case may be.

§ 197.97 *Statement of process.* The Assistant Regional Commissioner, at his discretion, may at any time require any person claiming drawback under the regulations in this part to file a statement of process in addition to that required by Form 1678 and such other data as he may deem necessary for consideration of such person's claim for drawback. When such additional data are required, the statement of process should be submitted with copies of the commercial labels used on the finished products.

§ 197.98 *Samples.* The Commissioner, or Assistant Regional Commissioner, at his discretion, may also at any time require any person claiming drawback under the regulations in this part to submit a sample of each nonbeverage product for examination. Where the applicant proposes to use a mixture of oil or other ingredients, the composition of which is unkown to him, a 1-ounce sample should be submitted with the sample of finished product when so required by the Commissioner, or Assistant Regional Commissioner, as the case may be.

### Subpart G—Claims for Drawback

§ 197.105 *Drawback.* Drawback at the rate specified by law on each proof gallon of distilled spirits used in the manufacture of medicines, medicinal preparations, food products, flavors, or flavoring extracts which are unfit for beverage purposes will be allowed to any person who has become eligible for such drawback and upon the filing of a claim therefor as provided in this subpart.

§ 197.106 *Claims.* The claim for drawback shall be filed on Form 843 (original only) with the Assistant Regional Commissioner, for the region in which the place of manufacture is located, and shall pertain only to distilled spirits used in the manufacture or production of nonbeverage products during any one quarter of the year, and only one claim may be filed for each quarter: *Provided*, That where the manufacturer has notified the Assistant Regional Commissioner, in writing, of his intention to file claims on a monthly basis, in lieu of a quarterly basis, and has filed a bond in compliance with the provisions of § 197.107, claims may be filed monthly in lieu of quarterly: *Provided further*, That any such election for the filing of monthly claims may be revoked upon filing of notice thereof, in writing, with the Assistant Regional Commissioner.

§ 197.107 *Bond, Form 1730.* Every person desiring to file claims for drawback on a monthly basis shall, upon filing his notice of such intention as provided in § 197.106, execute a bond on Form 1730, in triplicate, in conformity with the provisions of §§ 197.65–197.80, and file the same with the Assistant Regional Commissioner. The penal sum of the bond must be sufficient to cover the amount of drawback which will, during any quarterly period, constitute a charge against the bond: *Provided*, That the penal sum of any bond shall not exceed $200,000 nor be less than $1,000. The bond shall be a continuing one, and the liability thereof subject to increase as successive monthly claims are allowed thereunder and to decrease as the verifications of such monthly claims are made. When the limit of liability under a bond given in less than the maximum penal sum has been reached, no further drawback on monthly claims will be allowed unless prior charges against the bond have been decreased, or a new, or additional, bond in sufficient penal sum is furnished.

§ 197.108 *Date of filing claim.* Quarterly claims for drawback must be filed with the Assistant Regional Commissioner within the three months next succeeding the quarter in which the distilled spirits covered by the claim were used in the manufacture of nonbeverage products. Monthly claims for drawback may be filed at any time after the end of the month in which the distilled spirits covered by the claim were used in the manufacture of nonbeverage products, but must be filed not later than the close of the third month succeeding the quarter in which such spirits were used.

§ 197.109 *Information to be shown by the claim.* The claim must set forth the following:

(a) That the special tax has been paid.

(b) That the distilled spirits on which drawback is claimed were fully taxpaid and were produced in a domestic registered distillery or an industrial alcohol plant.

(c) That the distilled spirits on which the drawback is claimed were used in the manufacture or production of nonbeverage products.

(d) That the nonbeverage products were manufactured in compliance with (1) quantitative formulas filed with the Commissioner on Form 1678 prior to or at the time of manufacture, or (2) formulas prescribed by the United States Pharmacopoeia, the National Formulary, or the Homeopathic Pharmacopoeia of the United States.

(e) That the data submitted in support of the claim are correct.

#### Supporting Data

§ 197.110 *General.* Each claim will be accompanied by statements of supporting data as provided by §§ 197.111–197.119.

§ 197.111 *Identification of special tax-payment.* Each claim will be accompanied by a statement showing, with respect to payment of special tax: (a) Serial number of special tax stamp, (b) denomination, (c) fiscal year for which issued, (d) date of issuance, and (e) internal revenue district where issued.

§ 197.112 *Distilled spirits received in tank cars.* Each claim covering the receipt of distilled spirits in tank cars will be accompanied by a statement showing date of receipt, the name and address of the vendor, whether taxpayment was evidenced by a certificate of taxpayment, Form 1595, or a wholesale liquor dealer's stamp, the serial number of the certificate of taxpayment (Form 1595), or the wholesale liquor dealer's stamp, the date of issuance of the certificate or wholesale liquor dealer's stamp, and the name of the producer, kind, quantity, and proof of the spirits. (When a tank car or tank truck is emptied, the certificate of taxpayment, Form 1595, or the wholesale liquor dealer's stamp, as the case may be, affixed thereto shall be scalped by cutting out all of that portion of the certificate or stamp within the borders and the cut-out portion of the certificate or stamp shall be immediately forwarded to the Assistant Regional Commissioner. If the tank car or tank truck is received without the certificate or stamp attached thereto, the vendee shall note such fact on the bill of lading, if any, or on Form 1440 or 1520, as the case may be, and immediately notify the Assistant Regional Commissioner who will cause such inquiry to be made respecting the shipment and receipt of the conveyance as he may deem appropriate.)

§ 197.113 *Distilled spirits received in containers.* Each claim covering the receipt of distilled spirits in containers, such as barrels, drums, cans, or cases, bearing taxpaid or wholesale liquor dealer's stamps will be accompanied by a statement showing the date of receipt, the name and address of the vendor, the serial number of the taxpaid or wholesale liquor dealer's stamp affixed to the container, the date of issuance appearing on the stamp, the serial number, if any, of the container, and the name of the producer, kind, quantity, and proof of the spirits. (When the package is emptied, the stamp shall be scalped and attached to the next claim filed for drawback on the spirits which were in such package. The scalped stamp will be retained by the Assistant Regional Commissioner with the claims record of the claimant.)

§ 197.114 *Distilled spirits received in bottles.* Each claim covering the receipt of distilled spirits in bottles will be accompanied by a statement showing the date of receipt, the name and address of the vendor, the serial number of the strip stamp affixed over the mouth and neck of the bottle, and the name of the bottler, kind, quantity, and proof of the spirits.

§ 197.115 *Use of distilled spirits.* Each claim covering the use of distilled spirits in the manufacture of nonbeverage products will be accompanied by a statement showing the name, description, and formula number, if any, of each nonbeverage product in the manufacture of which distilled spirits were used, the alcoholic content by volume of each such product, the number of proof gallons and kind of distilled spirits used in manufacture thereof, and the quantity produced.

§ 197.116 *Distilled spirits account.* Each claim will be accompanied by a statement showing in proof gallons the quantity of all distilled spirits on hand at the beginning of the period, quantity in process beginning of the period, quantity received during the period, quantity used during the period in the manufacture of nonbeverage products subject to drawback, quantity used in the manufacture of intermediate products, quantity otherwise used not subject to drawback, quantity in process at the end of the period, and the quantity remaining on hand at the end of the period. Distilled spirits in process will include distilled spirits represented in unfinished nonbeverage products, mixtures, menstruums, etc. Any discrepancy between the amount of distilled spirits on hand at the end of the period as disclosed by actual inventory and the amount shown by the manufacturer's records must be reported in the summary with an explanation of the cause thereof.

§ 197.117 *Account of distilled spirits recovered in the manufacture of products eligible for drawback.* Each claim will be accompanied by a summary statement showing in proof gallons the quantity of all recovered distilled spirits on hand at the beginning of the period, quantity in process beginning of the period, quantity recovered during the period, quantity used not subject to drawback, quantity in process at the end of the period, and the quantity remaining on hand at the end of the period. Any discrepancy between the amount of recovered distilled spirits on hand at the end of the period as disclosed by actual inventory and the amount shown by the manufacturer's records must be reported in the summary with an explanation of the cause thereof. Distilled spirits recovered from dregs or marc of percolation, or extraction, of products eligible for drawback may be reused in the manufacture of medicines or flavoring extracts of the kind in which originally used. Such recovered distilled spirits are not eligible for drawback and may be reused only in the manufacture of nonbeverage products. They may not be used in the manufacture of intermediate products.

§ 197.118 *Account of distilled spirits recovered in the manufacture of intermediate products.* Each claim will be accompanied by a summary statement showing in proof gallons the quantity of all recovered distilled spirits on hand at the beginning of the period, quantity in process beginning of the period, quantity recovered during the period, quantity used during the period in the manufacture of nonbeverage products subject to drawback, quantity otherwise used, and the quantity remaining on hand at the end of the period. Any discrepancy between the amount of recovered distilled spirits on hand at the end of the period as disclosed by actual inventory and the amount shown by the manufacturer's records must be reported in the summary with an explanation of the cause thereof. Any distilled spirits recovered from the dregs or marc of percolation, or extraction, of intermediate products as defined in § 197.14 are eligible for drawback of tax only when used in the manufacture of a nonbeverage product.

§ 197.119 *Account of intermediate products.* Each claim will be accompanied by a statement showing the quantity in wine gallons of each intermediate product and the quantity of distilled spirits (proof gallons) used therein on hand at the beginning of the period, produced during the period, and on hand at the end of the period, and showing the quantity in wine gallons of each intermediate product and the quantity of the distilled spirits contained therein (proof gallons) used during the period in eligible products, used during the period in other intermediate products, and otherwise disposed of during the period. Any discrepancy between the amount of intermediate products on hand at the end of the period as disclosed by actual inventory and the amount shown by the manufacturer's records must be reported in the statement with an explanation of the cause thereof. Only the distilled spirits remaining in an intermediate product at the time of its use in the manufacture of an approved nonbeverage product, are eligible for drawback.

#### Action on Claims

§ 197.120 *Action on quarterly claims.* The Assistant Regional Commissioner will date-stamp the claim and, after recording, will examine the claim for the purpose of determining whether it is properly executed and that all supporting data have been submitted and will conduct such inquiries and investigations as may be necessary to verify that drawback is allowable on the distilled spirits covered by the claim. After completion of such verification he will allow or disallow the claim in accordance with his findings and existing law and regulations.

§ 197.121 *Action on monthly claims.* The Assistant Regional Commissioner will date-stamp the claim and, after recording, will examine the claim for the purpose of determining whether it is properly executed and that all required supporting data have been submitted. Where a bond in the maximum penal sum or, if less than such maximum, in a sufficient penal sum, is on file, the Assistant Regional Commissioner will verify that the amount of drawback claimed is correctly calculated, based on the quantity of distilled spirits stated to have been used by the manufacturer, and, without investigation, allow or disallow the claim (including the final claim for any quarter) in accordance with existing law and regulations. Where the bond on file is not in a sufficient penal sum, action on the claim will be withheld pending completion of an investigation subsequent to the end of the quarterly period. When the final claim for a quarter is received, the Assistant Regional Commissioner will conduct such investigation as may be necessary to verify, as to each claim filed for the quarter, that the drawback allowed, or claimed where bond was insufficient, was proper: *Provided*, That where the total charges outstanding against the manufacturer's bond are less than the penal sum of such bond, the Assistant Regional Commissioner may, at his discretion, conduct such investigation at less frequent intervals. Upon completion of verification the Assistant Regional Commissioner will credit the manufacturer's bond in an amount equal to the drawback on the spirits found to have been lawfully used.

### Subpart H—Records

§ 197.130 *Nature of records.* Every person intending to claim drawback on distilled spirits used in the manufacture or production of nonbeverage products must keep a permanent record showing the following data:

(a) The quantity, proof, and kind of distilled spirits received.

(b) Name and address of the person from whom the spirits were received.

(c) Kind of container and serial number thereof, serial number of certificate of tax payment, or wholesale liquor dealer's stamp (if tank car), serial number of taxpaid distilled spirits stamp, or wholesale liquor dealer's stamp (if barrel, drum, can, or case), or serial number of strip stamp (if bottle).

(d) Date on which received.

(e) Number of proof gallons and kind of distilled spirits used in the manufacture of each product, and the date of use.

(f) Name of each product in the manufacture of which distilled spirits were used.

(g) Quantity of each product produced and the alcohol content thereof.

(h) Name and address of the purchaser.

(i) Quantity of each product sold to each purchaser.

(j) Date of sale of product to each purchaser.

§ 197.131 *Exception.* The manufacturer need not keep the records required by paragraphs (h), (i), and (j) of § 197.130 where the nonbeverage product

contains less than 3 percent of distilled spirits by volume, nor shall such records be required where nonbeverage products are sold by the producer direct to the consumer in retail quantities. The Assistant Regional Commissioner may at any time require the keeping of such records upon at least 5 days' notice to the taxpayer.

§ 197.132 *Form of record.* No particular form of record is prescribed, but the data required to be shown shall be readily ascertainable from the records kept by the manufacturer. Such records shall be kept complete and current at all times, and shall be retained by the manufacturer on the place covered by the special-tax stamp, and shall be open to inspection by Government officers during regular business hours. Such records shall be retained by the manufacturer for a period of not less than 3 years.

*Effect.* These regulations shall be effective December 1, 1953.

[SEAL] JUSTIN F. WINKLE,
*Acting Commissioner of Internal Revenue.*

## TITLE 33—NAVIGATION AND NAVIGABLE WATERS

### Chapter II—Corps of Engineers, Department of the Army

PART 207—NAVIGATION REGULATIONS

BISCAYNE BAY, FLORIDA

Pursuant to the provisions of section 7 of the River and Harbor Act of August 8, 1917 (40 Stat. 266; 33 U. S. C. 1), § 207.172 establishing and governing navigation and use of a seaplane restricted area is hereby amended to include an adjacent seaplane operating area in Biscayne Bay, Miami, Florida, as follows:

§ 207.172 *Biscayne Bay, Fla.; seaplane restricted and operating areas, Coast Guard Air Station, Miami, Fla.*—(a) *The seaplane restricted area*—(1) *The area.* The waters of Biscayne Bay in the vicinity of Dinner Key Channel within an irregular area described as follows: Beginning at the intersection of the easterly extension of the line of the north wall of the Coast Guard hangar and the sheet steel bulkhead; thence 13° 33', along the bulkhead, 160 feet; thence 51° 00', 128 feet; thence 141° 00', 390 feet; thence 74° 02', 257 feet; thence 136° 53', 186 feet; thence 74° 02', 945 feet; thence 151° 49', 1,041 feet; thence 214° 07', 250 feet; thence 124° 08', 2,680 feet; thence 214° 07', 600 feet; thence 304° 08', 2,680 feet; thence 214° 07', 290 feet; thence 304° 08', 1,615 feet, to the sheet steel bulkhead, thence 341° 48', along the bulkhead, 701 feet; and thence 13° 33', along the bulkhead, 166 feet, to the point of beginning.

NOTE: All bearings are referred to true meridian.

(2) *The regulations.* (i) Watercraft shall not anchor or moor within the restricted area. Fishing in the area is prohibited.

(ii) Watercraft shall use the area to the minimum extent practicable, and only for the purpose of passing through as expeditiously as possible. No watercraft shall use the channel from one-half hour after sundown to one-half hour before sunrise except in the case of an emergency involving danger to life or property.

(iii) Watercraft in the area shall give seaplanes the right-of-way at all times. All watercraft shall promptly clear the area when seaplanes are observed approaching the area or when warned by the siren of a crash boat, and shall remain clear of the area while seaplanes are operating in the area.

(iv) The enforcing agency will send out a crash boat or boats to warn watercraft in or near the area of impending operations within the area. Each crash boat will sound a siren to attract the attention of watercraft, and the crew will display a sign reading "Plane Approaching: Clear Channel at Once".

(v) The enforcing agency will post at each end of the area a large sign reading "Danger! Coast Guard Planes Have Right-of-Way in This Channel. Use Channels to South If Practicable. Clear Channel Promptly When Planes Are Observed Approaching Or When Warned By Siren of Crash Boat."

(b) *The seaplane operating area*—(1) *The area.* Beginning at Dinner Key Seaplane Channel Lighted Buoy 2A marking the entrance to the seaplane restricted area, thence 105° for approximately 4,350 feet to Dinner Key Seaplane Channel Approach Light 2; thence 54° for approximately 9,900 feet to Miami South Channel Entrance Range Front Light; thence 178° for approximately 4,350 feet to Miami South Channel Entrance Range Rear Light; thence 182° for approximately 12,750 feet to Southwest Point Daybeacon 26; thence 270° for approximately 13,500 feet to a position in Biscayne Bay at latitude 25°41'-24", longitude 80°13'30"; thence 30° for approximately 9,900 feet to Dinner Key Channel Daybeacon 2; thence 313° for approximately 4,920 feet to Dinner Key Seaplane Channel Lighted Buoy 1 marking the southernmost portion of the entrance to the seaplane restricted area; thence 34° for approximately 600 feet to the point of beginning.

NOTE: All bearings are referred to true meridian.

(2) *The regulations.* (i) Watercraft may navigate, anchor, or moor within the operating area. Fishing will be permitted.

(ii) Watercraft utilizing the area during hours from sunset to sunrise, or during periods of low visibility, shall comply strictly with existing regulations of the Rules of the Road applicable to Inland Waters and Motorboat regulations pertaining to required lighting while underway or at anchor.

(iii) Watercraft within the operating area must recognize the fact that the maneuverability of aircraft on the surface is relatively limited as compared to that of vessels or vehicles specifically designed for surface operations. Therefore, it is essential that occupants of all watercraft shall, when in the seaplane operating area, exercise due vigilance and be alert for the presence of aircraft either taxiing on the surface, or approaching for landings and takeoffs within the area.

(iv) Seaplane landings and takeoffs will be covered by the presence of a station crash boat whenever possible. Under unusual and infrequent circumstances seaplanes may be limited to a particular heading or portion of the operating area, and watercraft in that vicinity may be requested by the crash boat to yield right-of-way to the aircraft for the particular maneuver involved. Under such unusual conditions watercraft shall comply with the request made by the crash boat for the mutual safety of boats and aircraft.

(c) Notices covering the regulations in this section will be posted at the nearby marina and wharves and at boat basins in Miami and adjoining towns.

(d) The regulations in this section shall be enforced by the Commanding Officer, United States Coast Guard Air Station, Miami, Florida, and such agencies as he may designate.

[Regs., Dec. 2, 1953, 800.2121 (Biscayne Bay, Fla.)-ENGWO] (40 Stat. 266; 33 U. S. C. 1)

[SEAL] WM. E. BERGIN,
*Major General, U. S. Army, The Adjutant General.*

## TITLE 46—SHIPPING

### Chapter I—Coast Guard, Department of the Treasury

Subchapter B—Merchant Marine Officers and Seamen

[CGFR 53-58]

PART 10—LICENSING OF OFFICERS AND MOTORBOAT OPERATORS AND REGISTRATION OF STAFF OFFICERS

SUBPART 10.05—PROFESSIONAL REQUIREMENTS FOR DECK OFFICERS' LICENSES (INSPECTED VESSELS)

SUBPART 10.20—MOTORBOAT OPERATORS' LICENSES

EXAMINATION SUBJECTS FOR DECK OFFICERS OF OCEAN OR COASTWISE STEAM OR MOTOR VESSELS AND EXPERIENCE REQUIREMENTS FOR APPLICANTS FOR MOTORBOAT OPERATORS' LICENSES

A notice regarding proposed changes in the regulations regarding licensing of officers and motorboat operators was published in the FEDERAL REGISTER dated September 9, 1953, 18 F. R. 5432, as Items IV and V on the agenda to be considered by the Merchant Marine Council, and a public hearing was held by the Merchant Marine Council on September 29, 1953, in Washington, D. C. All comments submitted were considered and were rejected because a change was not considered necessary or the application of the regulation was already described in the regulations.

The amendment to the table 10.05-45 (b) in 46 CFR 10.05-45 (b) describes the examination subjects given to candidates for deck licenses for prospective deck officers of ocean or coastwise steam or motor vessels. This table sets forth the various subjects covered by the various examinations given by the Coast Guard. This amendment is based on Item IV of the agenda.

The amendment to 46 CFR 10.20-3 (a) regarding general requirements of an applicant for a motorboat operator's license is revised to require an applicant to show evidence of satisfactory service of at least one year's experience in the operation of motorboats. This requirement is considered necessary in promoting safety of life at sea. This amendment is based on Item V of the agenda.

By virtue of the authority vested in me as Commandant, United States Coast Guard, by Treasury Department Order No. 120, dated July 31, 1950 (15 F. R. 6521), to promulgate regulations in accordance with the statutes cited with the regulations below, the following amendments to the regulations are prescribed which shall become effective on and after thirty days after the date of publication of this document in the FEDERAL REGISTER:

1. Section 10.05-45 (b) is amended by revising table 10.05-45 (b) to read as follows:

TABLE 10.05-45 (b)—SUBJECTS FOR DECK OFFICERS OF OCEAN OR COASTWISE STEAM OR MOTOR VESSELS

| Subjects | Master | | | Chief mate | | Second mate | | Third mate | |
|---|---|---|---|---|---|---|---|---|---|
| | Ocean | Coastwise | Yachts | Ocean | Coastwise | Ocean | Coastwise | Ocean | Coastwise |
| 1. Latitude by Polaris | X | X | ------ | X | ------ | X | ------ | ------ | ------ |

| 23. Stability and ship construction | X | X | | | | | | | |
| 24. Steamship | X | X | X | X | X | X | X | X | X |
| 25. Cargo stowage and handling | | X | | X | X | X | X | X | ------ |
| 26. Change in draft due to density | | X | | X | | | | | |
| 27. Determination of area and volume | | | | | X | X | | | |
| 28. Lifesaving apparatus and fire fighting equipment | X | X | X | X | X | X | X | X | X |
| 29. Ship sanitation | X | X | | X | | | | | |
| 30. Rules and regulations for inspection of merchant vessels | X | X | X | X | X | X | X | X | X |
| 31. Laws governing marine inspection | X | X | | X | X | | | | |
| 32. Ship's business | X | X | | | | | | | |
| 33. Such further examination of a non-mathematical character as the officer in charge, marine inspection, may consider necessary to establish the applicant's proficiency | X | X | X | X | X | X | X | X | X |

2. Section 10.20-3 (a) is amended to read as follows:

§ 10.20-3 *General requirements.* (a) Any person who has attained the age of 18 years and is qualified in all other respects, shall be considered eligible for a motorboat operator's license and may be examined by the Coast Guard.

(1) An applicant for a license as a motorboat operator shall submit satisfactory documentary evidence of at least one year's experience in the operation of motorboats.

(R. S. 4405, as amended, 4462, as amended, secs. 1, 2, 49 Stat. 1544, as amended, sec. 17, 54 Stat. 166, as amended, sec. 5, 55 Stat. 244, 245, as amended; 46 U. S. C. 375, 416, 367, 526p, 50 U. S. C. App. 1275)

Dated: December 15, 1953.

[SEAL] MERLIN O'NEILL,
*Vice Admiral, U. S. Coast Guard, Commandant.*

## TITLE 44—PUBLIC PROPERTY AND WORKS

### Chapter I—General Services Administration

Subchapter C—Real Property Management

PART 100—PUBLIC BUILDINGS AND GROUNDS

These rules and regulations are promulgated pursuant to Public Law No. 566, 80th Congress, approved June 1, 1948 (40 U. S. C. Sec. 318) and the Federal Property and Administrative Services Act of 1949 (63 Stat. 377), as amended.

AUTHORITY: §§ 100.1 to 100.12 issued under sec. 2, 62 Stat. 281, as amended; 40 U. S. C. 318a.

§ 100.1 *Applicability.* The rules and regulations in this part shall apply to all Federal property under the charge and control of General Services Administration and to all persons entering in or on such property. Unless otherwise stated in this part Federal property under the charge and control of the General Services Administration is referred to as "property".

§ 100.2 *Recording presence.* When requested, persons entering or leaving buildings during periods when such buildings are closed to the public shall sign the building register and/or display authorized identification document.

§ 100.3 *Preservation of property.* The injury, abuse, or damage, in any way whatsoever, to any property or part thereof, including signs, regulations, decorations or other facility or equipment, or to any tree, or other plant life is prohibited.

§ 100.4 *Conformity with signs and emergency directions.* Persons in and on property shall comply with "No Smoking" and other official signs of a prohibitory nature, and at the time of a fire alarm or other emergency signal shall comply with the directions of building police and other authorized individuals.

§ 100.5 *Nuisances.* The use of loud, abusive, or otherwise improper language, unwarranted loitering, sleeping or assembly, the creation of any hazard to persons or things, improper disposal of rubbish, spitting, prurient prying, the commission of any obscene of indecent act, or any other unseemly or disorderly conduct on property, and throwing articles of all kinds from buildings and climbing upon any part of buildings, is prohibited.

§ 100.6 *Gambling.* Participating in games for money or property, or the operation of gambling devices, the conduct of a lottery or pool, or the selling or purchasing of numbers tickets is prohibited.

§ 100.7 *Intoxicating beverages and narcotics.* Entering property or the operating of a motor vehicle thereon, by a person under the influence of intoxicating beverages or narcotic drug, or the consumption of such beverages or the use

of such drugs in or on property is prohibited.

§ 100.8 *Soliciting and vending.* The soliciting of alms and contributions, commercial soliciting and vending of all kinds, the display or distribution of commercial advertising, or the collecting of private debts, in or on property, is prohibited unless prior permission is obtained.

§ 100.9 *Photography.* Taking photographs for commercial or publication purposes within property is prohibited unless prior permission is obtained.

§ 100.10 *Dogs and other animals.* Bringing a dog (except a seeing-eye dog), or other animal upon property is prohibited, unless prior permission is obtained.

§ 100.11 *Vehicular and pedestrian traffic.* (a) Drivers of all vehicles in or on property shall drive in a careful and safe manner at all times and shall comply with the signals and directions of police officers and all posted traffic signs; (b) the blocking of entrances, driveways, walks, loading platforms or fire hydrants in or on property is prohibited; (c) except in emergencies, parking in or on property is not allowed without a permit. Parking without authority, parking in unauthorized locations or in locations reserved for other persons or continuously in excess of 18 hours without permission, or contrary to the direction of posted signs is prohibited. This section may be supplemented from time to time by the issuance and posting of specific traffic directives as may be required and when so issued and posted such directives shall have the same force and effect as if made a part hereof.

§ 100.12 *Penalties; other laws.* Whoever shall be found guilty of violating the rules and regulations in this part shall be fined not more than $50.00 or imprisoned not more than 30 days, or both. Nothing contained in these rules and regulations shall be construed to abrogate any other Federal laws or regulations, or any State and local laws and regulations, applicable to an area in which property is situated.

Approved: December 1, 1953.

EDMUND F. MANSURE,
*Administrator of General Services.*

## TITLE 50—WILDLIFE

### Chapter I—Fish and Wildlife Service, Department of the Interior

#### Subchapter C—Management of Wildlife Conservation Areas

REVOCATION OF REGULATIONS

*Basis and purpose.* Public hunting and fishing on certain national wildlife refuges having been authorized by administrative action pursuant to §§ 18.11 and 18.12 of this subchapter, the following existing regulations no longer are required and are hereby revoked effective upon publication of this document in the FEDERAL REGISTER:

PART 31—PACIFIC REGION

SUBPART—COLD SPRINGS NATIONAL WILDLIFE REFUGE, OREGON

FISHING

§ 31.51 *Fishing permitted* (4 F. R. 4436).
§ 31.52 *Waters open to fishing* (4 F. R. 4436).
§ 31.53 *State fishing laws* (4 F. R. 4436).
§ 31.54 *Fishing permits* (4 F. R. 4436).
§ 31.55 *Routes of travel* (4 F. R. 4436).
§ 31.56 *Use of motorboats prohibited* (4 F. R. 4436).

SUBPART—MALHEUR NATIONAL WILDLIFE REFUGE, OREGON

HUNTING

§ 31.207 *Hunting permitted* (13 F. R. 6287).
§ 31.208 *Area open to hunting* (13 F. R. 6287).
§ 31.209 *Entry* (13 F. R. 6287).
§ 31.210 *Permits* (13 F. R. 6287).
§ 31.211 *Dogs* (13 F. R. 6287).
§ 31.212 *Boats* (13 F. R. 6287).
§ 31.213 *State cooperation* (13 F. R. 6287).

PART 32—SOUTHWESTERN REGION

SUBPART—SAN ANDRES NATIONAL WILDLIFE REFUGE, NEW MEXICO

DEER HUNTING

§ 32.151 *Deer hunting permitted* (7 F. R. 6407).
§ 32.152 *Joint survey* (7 F. R. 6407).
§ 32.153 *Area open to hunting* (7 F. R. 6407).
§ 32.154 *State laws and regulations* (7 F. R. 6407).
§ 32.155 *Disorderly conduct; intoxication* (7 F. R. 6407).
§ 32.156 *Entry upon refuge; civil liability* (7 F. R. 6407).
§ 32.157 *Limitation on firearms and bullets* (7 F. R. 6407).
§ 32.158 *Penalties* (7 F. R. 6407).
§ 32.159 *State cooperation in management of the shooting area* (7 F. R. 6407).

## PROPOSED RULE MAKING

### CIVIL AERONAUTICS BOARD

#### Office of Carrier Accounts and Statistics

[ 14 CFR Part 241 ]

[Economic Regs. Draft Release No. 67]

FILING OF REPORTS BY CERTIFICATED AIR CARRIERS AND UNIFORM ACCOUNTING REQUIREMENTS

NOTICE OF PROPOSED RULE-MAKING

DECEMBER 17, 1953.

Pursuant to authority delegated by the Civil Aeronautics Board to the Office of Carrier Accounts and Statistics notice is hereby given that the Office has under consideration an amendment to Part 241 of the Economic Regulations (14 CFR Part 241) for the purpose of modifying the present reporting requirements for certificated air carriers.

The objective is to terminate the requirement for detailed reporting of domestic coach service on Schedule C–2, "Coach, Tourist, and Low Fare Off-Peak Services", after December 1953. With discontinuance of the detailed report, however, it is proposed that an additional sheet of Schedule C–1, containing overall flight and traffic data on a monthly basis for the domestic coach services would be required beginning with January 1954. It is intended to continue the special report on Schedule C–2 for international tourist services since the development and accumulated experience with the international low fare services generally are not as great as with the domestic coach services so that there is a continuing need for the more detailed information. It is also planned to effect changes in the accounting and reporting instructions related to (1) the filing period for the Interim Financial and Operating Report (2) the number of copies of Schedule C–1 to be filed and (3) accounting for estimated liability arising out of pending wage and salary negotiations. These changes are all proposed to be effective with reports for January 1954.

The changes proposed by the Office of Carrier Accounts and Statistics are as follows:

1. By deleting the following sentence from § 241.2110: "Accruals for estimated liability arising out of pending wage and salary negotiations shall not be included in this account but in account 2340, 'Other Deferred Credits' ".

2. By deleting the following sentence from § 241.2340 (b): "Estimated liability arising out of pending wage and salary negotiations shall be included in this account if the carrier elects to reflect this item in its accounts".

3. By changing from "2" to "3" the number of copies of Schedule C–1 to be filed as specified under the list of Schedules contained in Instruction No. 3 of § 241.7–1.

4. By changing the title "C–2 Coach, Tourist and Low Fare Off-Peak Services" under the list of Schedules contained in Instruction No. 3 of § 241.7–1 to read: "C–2 Coach and Tourist Services".

5. By amending Instruction No. 8 of § 241.7–1 to read:

8. Where the reporting carrier operates separate and distinct air transport divisions, regardless of whether conducted under certificates of public convenience and necessity issued by the Civil Aeronautics Board or on a nonscheduled basis, for which it maintains separate records and books of account, and where the reporting carrier conducts both domestic and international operations, the carrier shall file separate Schedules B, B–1 through B–10, C, and C–1 for each such division and operation. Where the carrier conducts international operations it shall also file Schedule C–2 for the international operation or for each separate division performing international operations. Separate filing of additional schedules may be required or exemptions, in full or in part, from the above separate filing may be granted by the Civil Aeronautics Board after examination of the Board's needs in this respect. Where separate reports are submitted in accordance with the above, an additional Schedule B shall be filed showing the profit and loss for the "System". At the option of the carrier additional Schedules C and C–1 may be filed for the "System", presenting data covering "All Services" only.

6. By changing the number of days for filing the Interim Financial and Operating Report from "30" to "40" under "Postmarked within the following number of days" in Instruction No. 10 of § 241.7–1.

7. By adding after the present language of Schedule B–1 of § 241.7–2 an additional paragraph reading:

Passenger revenue: There shall be reported on this schedule the amount of passenger revenue applicable to "Coach and Tourist Service" (as identified for separate reporting on Schedules C and C–1), except that for each operation for which a report is made on Schedule C–2, "Coach and Tourist Services", the reporting of coach and tourist passenger revenue on this schedule is not required. The amount of coach and tourist revenue reported on this schedule may be estimated provided that this fact is indicated on each report.

8. By adding after the first paragraph of the present language of Schedule C–1 Monthly Flight and Traffic Statistics of § 241.7–2 an additional paragraph reading:

In addition, for each operation in which coach and tourist service is performed but not reported on Schedule C–2 "Coach and Tourist Services", an additional page of this schedule shall be filed covering the coach and tourist service. Items 8 through 28 shall be completed on this page of the schedule. Item 8 need be completed in total only on this page, no breakdown being required by type of aircraft. Item 11, number of revenue passengers carried, shall be an unduplicated count of revenue passengers carried in the coach and tourist service, including coach and tourist passengers part of whose trip was at regular fare. Transfer, lay-over, and reduced-fare passengers shall be included or excluded in the same manner as prescribed for line 11 under "Item, Definitions and Instructions".

9. By amending the present second paragraph under Schedule C–1, Monthly Flight and Traffic Statistics of § 241.7–2 to read:

In those instances where a carrier performs only scheduled service, the flight and traffic statistics for all services and scheduled service may be reported on a single sheet of this schedule. The words "Total Scheduled" should be inserted in the heading opposite "Service" with a footnote indicating that the statistics are also "Total—All Services".

10. By amending the first sentence of the item beginning "Line 11, Number of revenue passengers carried," of § 241.7–2 to read: "This item shall be reported only on those pages of Schedule C and C–1 covering 'All Services', 'Total Scheduled Services', and 'Total Nonscheduled Services' and on the page of Schedule C–1 covering 'Coach and Tourist Service'."

11. By changing the heading of Schedule C–2, Coach, Tourist and Low Fare Off-Peak Services, of § 241.7–2 to read: "Schedule C–2, Coach and Tourist Services".

12. By amending the first paragraph of Schedule C–2 of § 241.7–2 to read:

This schedule is designed for reporting data covering international coach and tourist services and similar differential fare services which are conducted separately from other services and need be submitted only for operations having such tourist and differential fare services. This schedule is not to be used for reporting other reduced fare traffic such as seasonal and excursion fare traffic which is carried in regular services. A report is to be made on this schedule for each calendar month.

13. By striking the second paragraph of Schedule C–2 of § 241.7–2.

14. By amending the present fifth and sixth paragraphs of Schedule C–2 of § 241.7–2 to read:

Columns (5) through (8)—Distribution by Flights: Insert flight numbers in column headings. Use one column for all coach and tourist flights scheduled to serve the same "terminal points" in both directions. Include data applicable to extra section flights in the same column used for the scheduled flights to which related.

Lines 11 through 20—Revenue Passenger Miles: For any passengers carried on flights covered by this report at other than coach and tourist fares (when such other fares are applicable to traffic on the flight) give in a footnote or attached statement the revenue passenger miles identifying also the class of fare and points between which carried.

This amendment is proposed under the authority of sections 205 (a) and 407 of the Civil Aeronautics Act, as amended, (52 Stat. 984, 1000; 49 U. S. C. 425, 487).

Interested persons may participate in the proposed rule-making through the submission of written data, views or arguments pertaining thereto, in triplicate, addressed to the Secretary, Civil Aeronautics Board, Washington 25, D. C. All revelant matter in communications received on or before January 18, 1954, will be considered by the Office before taking final action on the proposed rule.

By the Office of Carrier Accounts and Statistics.

[SEAL] WARNER H. HORD,
*Chief, Office of Carrier Accounts and Statistics.*

## NOTICES

### DEPARTMENT OF THE INTERIOR

#### Office of the Secretary

STANDING ROCK SIOUX TRIBE

FEDERAL INDIAN LIQUOR LAWS

Pursuant to the act of August 15, 1953 (Pub. Law 277, 83d Cong., 1st Sess.), I certify that the following ordinance relating to the application of the Federal Indian liquor laws on the Standing Rock Sioux Indian Reservation was duly adopted by the Standing Rock Sioux Tribe which has jurisdiction over the area of Indian country included in the resolution:

Whereas Public Law 277, 83d Congress, approved August 15, 1953, provides that sections 1154, 1156, 3113, 3488 and 3618 of title 18, United States Code, commonly referred to as the Federal Indian liquor laws, shall not apply to any act or transaction within any area of Indian country provided such act or transaction is in conformity with both the laws of the State in which such act or transaction occurs and with an ordinance duly adopted by the tribe having jurisdiction over such area of Indian country, certified by the Secretary of the Interior, and published in the FEDERAL REGISTER.

Therefore, be it resolved that the introduction, sale or possession of intoxicating beverages shall be lawful within the Indian country under the jurisdiction of the Standing Rock Sioux Indian Reservation: *Provided,* That such introduction, sale or pos-

session is in conformity with the laws of the respective states of North and South Dakota.

Be it further resolved that any tribal laws, resolutions or ordinances heretofore enacted which prohibit the sale, introduction or possession of intoxicating beverages are hereby repealed.

ORME LEWIS,
*Assistant Secretary of the Interior.*

DECEMBER 16, 1953.

## SECURITIES AND EXCHANGE COMMISSION

[File No. 70-3161]

NEW ENGLAND GAS AND ELECTRIC ASSN. AND ALGONQUIN GAS TRANSMISSION CO.

NOTICE REGARDING PROPOSED ISSUE AND SALE OF NOTES BY SUBSIDIARY AND ACQUISITION THEREOF BY PARENT AND BORROWING FROM BANKS BY SUBSIDIARY AND PARENT

DECEMBER 15, 1953.

Notice is hereby given that a joint application-declaration and amendments thereto have been filed with this Commission by New England Gas and Electric Association ("Negas"), a registered holding company, and its nonutility subsidiary, Algonquin Gas Transmission Company ("Algonquin"), designating sections 6 (a), 7, 9 (a), and 12 (f) of the Public Utility Holding Company Act of 1935 ("act") and Rules U-23, U-43, and U-50 thereunder, as applicable to the proposed transactions which are summarized as follows:

Algonquin proposes to incur a bank loan of $2,000,000, at 4½ percent per annum, to be evidenced by an unsecured note maturing in 16 equal quarterly payments commencing January 1, 1955. Algonquin also proposes to issue and sell $5,150,000 principal amount of 25-year unsecured notes at the principal amount thereof to three of its stockholders who own in the aggregate 99.3 percent of Algonquin's common stock. Such notes are to be issuable in denominations of not less than $500,000 and will be dated December 30, 1953, will be due December 30, 1978, and will bear cumulative interest at the rate of 6 percent per annum for the first five years and at the rate of 5 percent per annum thereafter, payable only if earned in accordance with the definition of that term contained in an agreement among Algonquin and its bondholders. The proposed 25-year notes are to be subordinate to all bonds and other notes of Algonquin and will be exchangeable for debentures bearing the same terms and conditions.

Algonquin's said stockholders have agreed, subject to necessary regulatory approval, to subscribe to the proposed 25-year notes as follows:

| | |
|---|---|
| Eastern Gas & Fuel Associates | $1,910,650 |
| New England Gas & Electric Association | 1,787,050 |
| Texas Eastern Transmission Corp. | 1,452,300 |
| Total | 5,150,000 |

In connection with this financing, Algonquin has entered into an agreement with its bond holders regarding the proposed amendment of the sinking fund requirements under Algonquin's First Mortgage and Deed of Trust dated as of March 1, 1951, so as to defer the commencement of regular sinking fund payments from July 1, 1954, to July 1, 1955, and to eliminate the provision for a contingent sinking fund of $3,000,000.

Algonquin states that it must raise funds on or before December 30, 1953, to provide adequate working capital, to retire its short-term bank loans and to raise funds to pay certain claims assigned to Texas Eastern Transmission Corporation and various other claims incurred in connection with the completion of its pipe line system. Such required funds are estimated to aggregate about $7,150,000.

Negas proposes to finance its investment of $1,787,050 in the proposed 25-year notes of Algonquin by borrowing $1,500,000 from banks, to be evidenced by notes maturing October 21, 1955, and by using treasury funds for the balance. The interest rate on such notes has not yet been determined. According to Negas it is expected that its presently outstanding bank indebtedness due October 21, 1955, and aggregating $2,000,000, and the proposed additional loan of $1,500,000 will be retired at or prior to maturity from the proceeds of an offering or offerings of its common shares.

Negas and Algonquin request that the Commission's order herein be entered as soon as possible and become effective upon issuance.

Negas and Algonquin represent that no State or Federal Commission, other than this Commission, has jurisdiction over the proposed transactions.

Notice is further given that any interested person may, not later than December 28, 1953, at 1:00 p. m., e. s. t., request in writing that a hearing be held on such matter, stating the nature of his interest, the reasons for such request, and the issues of fact or law, if any, raised by said joint amended application-declaration which he desires to controvert; or he may request that he be notified if the Commission should order a hearing thereon. Any such request should be addressed: Secretary, Securities and Exchange Commission, 425 Second Street NW., Washington 25, D. C. At any time after said date said joint application-declaration, as filed or as further amended, may be granted and permitted to become effective as provided in Rule U-23 of the rules and regulations promulgated under the act, or the Commission may exempt such transactions as provided in Rule U-20 (a) and Rules U-100 thereof.

By the Commission.

[SEAL] ORVAL L. DUBOIS,
*Secretary.*

## SMALL BUSINESS ADMINISTRATION

[Declaration of Disaster Area 10]

NEW HAMPSHIRE

DECLARATION OF DISASTER AREA

Whereas, it has been reported that on or about November 7 and November 8, 1953, because of the combined disastrous effect of a gale, snow, and the tides, damage resulted to residences and business property located in certain coastal areas in the State of New Hampshire; and

Whereas, the Small Business Administration has investigated and has received other reports of investigations of conditions in the areas affected; and

Whereas, after reading and evaluating reports of such conditions, I find that the conditions in such areas constitute a catastrophe within the purview of the Small Business Act of 1953;

Now, therefore, as Acting Administrator of the Small Business Administration, I hereby determine that:

1. Applications for disaster loans under the provisions of section 207 (b) of the Small Business Act of 1953 may be received and considered by the SBA Regional Office below indicated from persons or firms where property situated in the coastal areas of the following county (hereinafter referred to as "the disaster area") suffered damage or other destruction as a result of the catastrophe above referred to:

County of Rockingham: Small Business Administration Regional Office, 40 Broad Street, Boston, Mass.

2. Special field offices will not be established to receive and process such applications.

3. No disaster loan application from any resident or firm situated in the disaster area will be accepted under the authority of this order subsequent to June 30, 1954.

Dated: December 17, 1953.

WENDELL B. BARNES,
*Acting Administrator.*

[F. R. Doc. 53-10595; Filed, Dec. 21, 1953; 8:49 a. m.]

[Declaration of Disaster Area 11]

MAINE

DECLARATION OF DISASTER AREA

Whereas, it has been reported that on or about November 6 and November 7, 1953, because of the combined disastrous effect of a gale, snow and the tides, damage resulted to residences and business property located in certain coastal areas in the State of Maine; and

Whereas, the Small Business Administration has investigated and has received other reports of investigations of conditions in the areas affected; and

Whereas, after reading and evaluating reports of such conditions, I find that the conditions in such areas constitute a catastrophe within the purview of the Small Business Act of 1953;

Now, therefore, as Acting Administrator of the Small Business Administration, I hereby determine that

1. Applications for disaster loans under the provisions of section 207 (b) of the Small Business Act of 1953 may be received and considered by the SBA Regional Office below indicated from persons or firms where property situated in the coastal areas of the following counties (hereinafter referred to as "the disaster areas") suffered damage or other destruction as a result of the catastrophe above referred to:

Counties of York, Cumberland, Sagadahoc: Small Business Administration Regional Office, 40 Broad Street, Boston, Mass.

2. Special field offices will not be established to receive and process such applications.

3. No disaster loan application from any resident or firm situated in the disaster areas will be accepted under the authority of this order subsequent to June 30, 1954.

Dated: December 17, 1953.

WENDELL B. BARNES,
*Acting Administrator.*

## INTERSTATE COMMERCE COMMISSION

[4th Sec. Application 28753]

PAPER BOXES FROM NEWTON, N. C., TO OFFICIAL AND ILLINOIS TERRITORIES

APPLICATION FOR RELIEF

DECEMBER 17, 1953.

The Commission is in receipt of the above-entitled and numbered application for relief from the long-and-short-haul provision of section 4 (1) of the Interstate Commerce Act.

Filed by: R. E. Boyle, Jr., Agent, for carriers parties to schedule listed below.

Commodities involved: Paper boxes, carloads.

From: Newton, N. C.

To: Points in official and Illinois territories.

Grounds for relief: Rail competition, circuity, to apply rates constructed on the basis of the short line distance formula, and additional origin.

Schedules filed containing proposed rates: C. A. Spaninger, Agent, I. C. C. No. 1349, supp. 29.

Any interested person desiring the Commission to hold a hearing upon such application shall request the Commission in writing so to do within 15 days from the date of this notice. As provided by the general rules of practice of the Commission, Rule 73, persons other than applicants should fairly disclose their interest, and the position they intend to take at the hearing with respect to the application. Otherwise the Commission, in its discretion, may proceed to investigate and determine the matters involved in such application without further or formal hearing. If because of an emergency a grant of temporary relief is found to be necessary before the expiration of the 15-day period, a hearing, upon a request filed within that period, may be held subsequently.

By the Commission.

[SEAL] GEORGE W. LAIRD,
*Secretary.*

[4th Sec. Application 28754]

VERMICULITE, BROKEN, CRUSHED, OR GROUND, BETWEEN POINTS IN SOUTHERN TERRITORY

APPLICATION FOR RELIEF

DECEMBER 17, 1953.

The Commission is in receipt of the above-entitled and numbered application for relief from the long-and-short-haul provision of section 4 (1) of the Interstate Commerce Act.

Filed by: R. E. Boyle, Jr., Agent, for carriers parties to schedule listed below.

Commodities involved: Vermiculite, broken, crushed or ground, carloads.

Between: Points in southern territory including adjacent points in Virginia.

Grounds for relief: Rail competition, circuity, and to apply rates constructed on the basis of the short line distance formula.

Schedules filed containing proposed rates: C. A. Spaninger, Agent, I. C. C. No. 1315, supp. 37.

Any interested person desiring the Commission to hold a hearing upon such application shall request the Commission in writing so to do within 15 days from the date of this notice. As provided by the general rules of practice of the Commission, Rule 73, persons other than applicants should fairly disclose their interest, and the position they intend to take at the hearing with respect to the application. Otherwise the Commission, in its discretion, may proceed to investigate and determine the matters involved in such application without further or formal hearing. If because of an emergency a grant of temporary relief is found to be necessary before the expiration of the 15-day period, a hear-

ing, upon a request filed within that period, may be held subsequently.

By the Commission.

---

[4th Sec. Application 28755]

LIVESTOCK FROM ST. LOUIS AND EAST ST. LOUIS, TO THE SOUTH

APPLICATION FOR RELIEF

DECEMBER 17, 1953.

The Commission is in receipt of the above-entitled and numbered application for relief from the long-and-short-haul provision of section 4 (1) of the Interstate Commerce Act.

Filed by: R. E. Boyle, Jr., Agent, for carriers parties to schedule listed below.

Commodities involved: Livestock, carloads.

From: St. Louis, Mo., East St. Louis, Ill., and certain intermediate points in Illinois and Indiana.

To: Points in southern territory.

Grounds for reilief: Rail competition, circuity, to maintain grouping, and to apply rates constructed on the basis of the short line distance formula.

Schedules filed containing proposed rates: C. A. Spaninger, Agent, I. C. C. No. 1087, supp. 58.

Any interested person desiring the Commission to hold a hearing upon such application shall request the Commission in writing so to do within 15 days from the date of this notice. As provided by the general rules of practice of the Commission, Rule 73, persons other than applicants should fairly disclose their interest, and the position they intend to take at the hearing with respect to the application. Otherwise the Commission, in its discretion, may proceed to investigate and determine the matters involved in such application without further or formal hearing. If because of an emergency a grant of temporary relief is found to be necessary before the expiration of the 15-day period, a hearing, upon a request filed within that period, may be held subsequently.

By the Commission.

VOLUME 18 NUMBER 249

*Washington, Wednesday, December 23, 1953*

## TITLE 7—AGRICULTURE

### Chapter I—Production and Marketing Administration (Standards, Inspections, Marketing Practices), Department of Agriculture

PART 61—COTTONSEED SOLD OR OFFERED FOR SALE FOR CRUSHING PURPOSES (INSPECTION, SAMPLING, AND CERTIFICATION)

REVISION OF FEES FOR REVIEW GRADING OF COTTONSEED

On November 6, 1953, a notice of proposed rule making was published in the FEDERAL REGISTER (18 F. R. 7014) regarding the amendment of § 61.46 of the regulations governing cottonseed sold or offered for sale for crushing purposes (7 CFR Part 61) to increase the fees for the review of the grading of any lot of cottonseed. Under the amendment, the fee for the review of the grading of any lot of cottonseed would be increased from $6.00 to $9.00. Of each such fee collected, $1.00 would be covered into the Treasury of the United States and $4.00 disbursed to each of the two licensed chemists designated to make reanalyses of the seed. This change is made because the operating expenses of licensed chemists in connection with the performance of their duties incident to review gradings have increased substantially since June 1943, the effective date of the $6.00 fee.

After consideration of all relevant matters presented, including the proposal set forth in said notice, § 61.46 is hereby amended to read as follows, pursuant to authority contained in the Department of Agriculture Appropriation Act, 1954 (Pub. Law 156, 83d Cong., approved July 28, 1953):

§ 61.46 *Fees for review of grading of cottonseed.* For the review of the grading of any lot of cottonseed, the fee shall be $9.00. Remittance to cover such fee, in the form of a certified check, draft, or money order payable to the Treasurer of the United States, shall accompany each application for review. Of each such fee collected, $1.00 shall be covered into the Treasury and $4.00 disbursed to each of the two licensed chemists designated to make reanalyses of such seed.

(Pub. Law 156, 83d Cong.)

Done at Washington, D. C., this 18th day of December 1953, to become effective 30 days after publication hereof in the FEDERAL REGISTER.

[SEAL] ROY W. LENNARTSON, *Assistant Administrator.*

### Chapter XI—Agricultural Conservation Program, Department of Agriculture

PART 1102—AGRICULTURAL CONSERVATION; PUERTO RICO

SUBPART—1954

*Foreword.* Productive land is the main source of the food, clothing, and shelter for the American people. The conservation and improvement of this resource for sustained, productive use is an undertaking of vital concern to citizens of all walks of life.

The Agricultural Conservation Program is an important part, but only a part, of a coordinated effort to help landowners and operators attain soil conservation objectives. The total effort includes research, education, technical assistance, cost-sharing, and such indirect aids as credit.

The fundamental purpose of the Agricultural Conservation Program is to provide a means by which the public can share with landowners and operators the cost of carrying out needed conservation work over and above that which they would do with only their own resources. It is our sincere hope that the Agricultural Conservation Program will be carried out in such a manner that it will make a marked contribution toward attainment of conservation objectives.

*General program principles.* The 1954 Agricultural Conservation Program for Puerto Rico has been developed and is to be carried out on the basis of the following general principles:

| Part 122 | 8662 |

1. The program is confined to the conservation practices on which Federal cost-sharing is most needed in order to achieve the maximum conservation benefit.

2. The program is designed to encourage those conservation practices which provide the most enduring conservation benefits practicably attainable in 1954 on the lands where they are to be applied.

3. Costs will be shared with a farmer only on satisfactorily performed conservation practices for which Federal cost-sharing was requested by the farmer before the conservation work was begun.

4. Costs should be shared only on practices which it is believed farmers would not carry out to the needed extent without program assistance. Generally, practices that have become a part of regular farming operations on a particular farm should not be eligible for cost-sharing.

5. The rates of cost-sharing are the minimum required to result in substantially increased performance of needed practices.

6. The purpose of the program is to help achieve additional conservation on the land. Such of the available funds that cannot be wisely utilized for this purpose will be returned to the public treasury.

7. If the Federal Government shares the cost of the initial application of conservation practices which farmers otherwise would not perform but which are essential to the national interest, the farmers should assume responsibility for the upkeep and maintenance of those practices.

INTRODUCTION

Sec.
1102.400 Introduction.

CONTROL OF FUNDS

1102.401 Maximum Federal cost-share.
1102.402 Adjustments.
1102.403 Allocation.

SELECTION OF PRACTICES AND RESPONSIBILITY FOR TECHNICAL PHASES

1102.406 Selection of practices.
1102.407 Responsibility for technical phases.

CONSERVATION PRACTICES AND MAXIMUM RATES OF COST-SHARING

1102.411 Practice 1: Establishing water disposal areas to dispose of excess water without causing erosion, by constructing protected outlet channels or establishing permanent grasses or legumes in either natural waterways or in other predetermined locations for carrying runoff water from ditches or terrace systems.
1102.412 Practice 2: Constructing continuous terraces to detain or control the flow of water and check erosion on sloping land.
1102.413 Practice 3: Establishing field diversion ditches to intercept runoff and divert excess water to protected outlets, on land of 10 percent or more slope in coffee groves or planted to intertilled crops, except sugarcane, or for the protection of cultivated fields against the inflow of runoff water from uncultivated areas.
1102.414 Practice 4: Constructing or enlarging permanent open farm drainage systems to dispose of excess water.
1102.415 Practice 5: Establishing an adequate system of hillside ditches to intercept runoff and divert excess water to protected outlets or land of 12 percent up to 45 percent slope planted in intertilled crops, except sugarcane, and in orchards.
1102.416 Practice 6: Constructing ditches with either rock or vegetative barrier protection to intercept runoff or divert excess water to protected outlets on land having a slope of from 12 to 45 percent planted to intertilled crops, except sugarcane, and in orchards.
1102.417 Practice 7: Initial establishment of contour strip-cropping on nonterraced land to protect soil from water erosion by planting alternate strips of clean-tilled crops and noncultivated grasses or legumes which will prevent soil washing.
1102.418 Practice 8: Planting fruit trees on farmland for erosion control in gullies.
1102.419 Practice 9: Planting adapted trees or shrubs on farmland for erosion control, watershed protection, or forestry purposes.
1102.420 Practice 10: Constructing, enlarging, or sealing dams, pits, or ponds for livestock water to obtain proper distribution of livestock and encourage rotation grazing and better grassland management as a means of protecting established vegetative cover.
1102.421 Practice 11: Initial establishment of improved permanent pasture for erosion control by seeding, sodding, or sprigging perennial legumes or self-reseeding annuals or perennial grasses or a mixture of legumes and perennial grasses or other approved forage plants.
1102.422 Practice 12: Initial improvement of established permanent pastures of the varieties referred to in § 1102.421 (practice 11), by planting strips of tropical kudzu or other legumes approved by the Department of Agriculture and Commerce of the Commonwealth Government of Puerto Rico and the ASC State Office for soil or watershed protection.
1102.423 Practice 13: Constructing wells for livestock water to obtain proper distribution of livestock and encourage rotation grazing and better grassland management as a means of protecting established vegetative cover.
1102.424 Practice 14: Improving the woodland protection which coffee groves provide for steep slopes, by applying to coffee trees, on land terraced or covered with catch pits under the 1954 Agricultural Conservation Program or in previous years, fertilizer of grades containing not less than 10 units of available N and not less than 10 units of available $P_2O_5$.
1102.425 Practice 15: Constructing and maintaining throughout 1954, individual terraces around coffee trees in order to properly improve the woodland protection afforded by such trees to steep slopes.
1102.426 Practice 16: Constructing and maintaining throughout 1954, individual catch pits on the upper side of the coffee trees in order to properly improve the woodland protection afforded by such trees to steep slopes.

FEDERAL COST-SHARES

1102.431 Division of Federal cost-shares.
1102.432 Increase in small Federal cost-shares.
1102.433 Federal cost-shares limited to $1,500.

GENERAL PROVISIONS RELATING TO FEDERAL COST-SHARING

1102.436 Maintenance of practices.
1102.437 Practices defeating purposes of programs.
1102.438 Depriving others of Federal cost-share.
1102.439 Filing of false claims.
1102.440 Misuse of purchase orders.
1102.441 Federal cost-shares not subject to claims.
1102.442 Assignments.
1102.443 Pooling agreements.
1102.444 Compliance with regulatory measures.
1102.445 Practices carried out with State or Federal aid.

APPLICATION FOR PAYMENT OF FEDERAL COST-SHARES

1102.451 Persons eligible to file application.
1102.452 Time and manner of filing application and information required.

APPEALS

1102.456 Appeals.

BULLETINS, INSTRUCTIONS, AND FORMS

1102.461 Bulletins, instructions, and forms.

DEFINITIONS

1102.466 Definitions.

AUTHORITY, AVAILABILITY OF FUNDS, AND APPLICABILITY

1102.472 Availability of funds.
1102.473 Applicability.

AUTHORITY: §§ 1102.400 to 1102.473 issued under sec. 4, 49 Stat. 164; 16 U. S. C. 590d. Interpret or apply secs. 7–17, 49 Stat. 1148, as amended; Pub. Law 156, 83d Cong.; 16 U. S. C. 590g-590q.

INTRODUCTION

§ 1102.400 *Introduction.* Through the 1954 Agricultural Conservation Program for Puerto Rico (referred to in this subpart as the 1954 program), administered by the Department of Agriculture, the Federal Government will share with farmers of Puerto Rico the cost of carrying out approved conservation practices in acordance with the provisions contained in this subpart and such modifications thereof as may hereafter be made. Approved practices will be deemed to have been carried out during the program year if started after the beginning of the program year and the ASC State Office determines that they were substantially completed by the end of the program year. However, no practice will be eligible for Federal cost-sharing until it has been completed in accordance with all applicable specifications and program provisions. The 1954 program was developed by the ASC State Office, the Director of the Soil Conservation Service for the Caribbean Area, the Forest Serv-

ice official having jurisdiction of farm forestry in Puerto Rico, the Director of the Agricultural Extension Service, and representatives of the Department of Agriculture and Commerce of the Commonwealth of Puerto Rico.

CONTROL OF FUNDS

§ 1102.401 *Maximum Federal cost-share.* The maximum Federal cost-share for a farm shall be equal to the total of the cost-shares for all practices approved for the farm and carried out in accordance with the specifications for such practices.

§ 1102.402 *Adjustments.* If the total estimated earnings under the program exceed the total funds available, the Federal cost-shares will be reduced equitably, except that cost-sharing will be allowed in full for fertilizer furnished under purchase orders for carrying out the practices contained in §§ 1102.421 and 1102.424.

§ 1102.403 *Allocation.* The amount of funds available for conservation practices under this program is $633,000. This amount does not include the amount set aside for administrative expenses and the amount required for increases in small Federal cost-shares in § 1102.432.

SELECTION OF PRACTICES AND RESPONSIBILITY FOR TECHNICAL PHASES

§ 1102.406 *Selection of practices.* (a) This subpart contains a general description of the conservation practices in the 1954 program, the applicable specifications, and the rates of Federal cost-sharing for each practice. The practices included in this subpart are those for which the ASC State Office, the Soil Conservation Service, and the Forest Service agree that the bearing by the Federal Government of a share of the cost is essential to permit accomplishment of needed conservation work which would not otherwise be carried out in the desired volume.

(b) Each farm operator shall be given an opportunity to request that the Federal Government share in the cost of these practices on which he considers he needs such assistance in order to permit their performance in adequate volume on his farm. Costs will be shared only for those practices for which cost-sharing is requested before performance of the practice is started. Any person who wishes to participate in the 1954 program must file a Cert. Form No. 39–54–P. R., Declaration of Intention, Request for Inspection and Certification of Conservation Needs, on or before September 15, 1954. In cases of hardship, such date may be extended by the ASC State Office. These forms may be obtained and filed at any of the ASC district offices, offices of the Soil Conservation Service (SCS), offices of the Extension Service and Farmers Home Administration. Prior approval of the ASC State Office is required for the practices contained in §§ 1102.411–1102.423 Such approval shall be conditioned upon carrying out the practices under the supervision of persons who have been designated to be responsible for the practices and must be obtained before performance of the practices is started unless otherwise approved by the ASC State Office.

§ 1102.407 *Responsibility for technical phases.* (a) The Soil Conservation Service is responsible for the technical phases of the practices contained in §§ 1102.411–1102.416, 1102.420, and 1102.422. This responsibility shall include (1) a finding that the practice is needed and practical on the farm, (2) necessary site selection, other preliminary work, and layout work of the practice, (3) necessary supervision of the installation, and (4) certification of performance (or application of the practice to the land).

(b) The Forest Service is responsible for the technical phases of the practice contained in § 1102.419. This responsibility shall include (1) providing necessary specialized technical assistance, (2) development of specifications for the practice, and (3) working through the ASC State Office, determining compliance in meeting these specifications.

CONSERVATION PRACTICES AND MAXIMUM RATES OF COST-SHARING

§ 1102.411 *Practice 1: Establishing water disposal areas to dispose of excess water without causing erosion, by constructing protected outlet channels or establishing permanent grasses or legumes in either natural waterways or in other predetermined locations for carrying runoff water from ditches or terrace systems.* Either type of outlet must be vegetated with the sod-forming grasses listed in § 1102.416 (practice 6), prior to use with companion practices, such as terraces or hillside and/or diversion ditches. When natural waterways are not used, the constructed channels shall be of sufficient size to carry all runoff water at nonscouring velocity from the fields. The cross section of the constructed channel shall not average less than 3.5 square feet.

*Maximum Federal cost-share.* (1) $0.75 per 1,000 square feet when established by shaping and seeding.

(2) $3.25 per 1,000 square feet when established by shaping and sodding.

(3) $0.12 per cubic yard of earth moved when a channel is constructed and vegetation established.

§ 1102.412 *Practice 2: Constructing continuous terraces to detain or control the flow of water and check erosion on sloping land.* In order to qualify for Federal cost-sharing, a channel or Nicholas type terrace shall be constructed on land having a slope of from 2 to 12 percent. The water-carrying cross-sectional area of the channel after settling may vary from 6 square feet on land of 12 percent slope to 8 square feet on land of 2 percent slope. Necessary outlets or waterways, in accordance with the specifications in § 1102.411 (practice 1), must be provided before the terraces are constructed. The vertical distance between terraces on the various slopes shall be as follows:

| Average slope of land in feet per 100 feet: | *Vertical spacing between terraces* |
|---|---|
| 1 | 1 foot 0 inch |
| 2 | 2 feet 0 inch |
| 3 | 2 feet 6 inches |
| 4 | 3 feet 0 inch |
| 5 | 3 feet 6 inches |
| 6 | 4 feet 0 inch |
| 7 | 4 feet 4 inches |
| 8 | 4 feet 8 inches |
| 9 | 5 feet 0 inch |
| 10 | 5 feet 4 inches |
| 11 | 5 feet 8 inches |
| 12 | 6 feet 0 inch |

*Maximum Federal cost-share.* $1.25 per 100 linear feet.

§ 1102.413 *Practice 3: Establishing field diversion ditches to intercept runoff and divert excess water to protected outlets, on land of 10 percent or more slope in coffee groves or planted to intertilled crops, except sugarcane, or for the protection of cultivated fields against the inflow of runoff water from uncultivated areas.* In order to qualify for Federal cost-sharing, field diversion ditches must be constructed in those locations adjacent to lands having a slope of 10 percent or more to prevent the overflow of runoff water from uncultivated areas into the land to be protected. The field diversion ditch shall be of sufficient size and so designed as to carry all runoff water at nonscouring velocity. No Federal cost-sharing will be allowed for this practice unless water disposal areas, constructed in accordance with the specifications in § 1102.411 (practice 1), have been provided.

*Maximum Federal cost-share.* $0.12 per cubic yard of earth moved.

§ 1102.414 *Practice 4: Constructing or enlarging permanent open farm drainage systems to dispose of excess water.* Federal cost-sharing will be allowed for the construction or enlargement of permanent open farm drainage systems. Ditches must be provided with adequate outlets and so constructed as to provide an effective drainage for the area to be drained. No Federal cost-sharing will be allowed for permanent open farm drainage ditches constructed on sugarcane land, except where such drainage is carried out as a community undertaking under a pooling agreement approved by the ASC State Office. No Federal cost-sharing will be allowed for cleaning or maintaining a ditch or for structures installed for crossings or other structures primarily for the convenience of the farm operator.

*Maximum Federal cost-share.* $0.12 per cubic yard of earth moved.

§ 1102.415 *Practice 5: Establishing an adequate system of hillside ditches to intercept runoff and divert excess water to protected outlets on land of 12 percent up to 45 percent slope planted in intertilled crops, except sugarcane, and in orchards.* The vertical interval between the ditches must not exceed 9 feet. The grade and cross section of the ditch must be such as to carry all water at a nonscouring velocity. The minimum cross section of the ditch shall be 12 inches wide and 12 inches deep, with a side slope of 1:1 on the lower side of the ditch. Necessary outlets or waterways, in accordance with the specifications in § 1102.411 (practice 1), must be provided before the hillside ditches are constructed. No Federal cost-sharing will be allowed for cleaning or maintaining a ditch.

*Maximum Federal cost-share.* $0.70 per 100 linear feet.

§ 1102.416 *Practice 6: Constructing ditches with either rock or vegetative barrier protection to intercept runoff or divert excess water to protected outlets on land having a slope of from 12 to 45 percent planted to intertilled crops, except sugarcane, and in orchards.* (a) Federal cost-sharing will be allowed when the ditches and barriers are constructed and planted in accordance with the following specifications:

(1) The vertical interval between the ditches must not exceed 9 feet.

(2) The grade and cross section of the ditch must be such as to carry all water at a nonscouring velocity.

(3) Necessary outlets or waterways, in accordance with the specifications in § 1102.411 (practice 1), must be provided before the hillside ditches are constructed.

(4) The barrier must be placed at least 6 inches above the upper edge of the ditch.

(5) Any of the following varieties of grasses may be used:

(i) Tall stiff-stemmed grasses: Elephant, Merker, Guatemala, Guinea, Patchouli.

(ii) Sod-forming grasses: Bersuda, St. Augustine, Sour Paspalum, Carpet.

(iii) Any other adapted grasses or legumes approved by the ASC State Office which, when planted singly or in combination, will act as a barrier.

(b) The minimum cross section of the ditch shall be 12 inches wide and 12 inches deep, with a slope of 1:1 on the lower side of the ditch.

(c) No Federal cost-sharing will be allowed for cleaning or maintaining a ditch.

*Maximum Federal cost-share.* $1 per 100 linear feet.

§ 1102.417 *Practice 7: Initial establishment of contour stripcropping on nonterraced land to protect soil from water erosion by planting alternate strips of clean-tilled crops and noncultivated grasses or legumes which will prevent soil washing.* Contour lines must be established and all cultural operations performed as nearly as practicable on the contour. The spacing and width of the strips must be in accordance with the recommendations of the Soil Conservation Service. No Federal cost-sharing will be allowed under this practice on the same area on which cost-sharing was given for stripcropping under previous programs.

*Maximum Federal cost-share.* $3 per acre.

§ 1102.418 *Practice 8: Planting fruit trees on farmland for erosion control in gullies.* Trees must be planted on the contour and protected from fire and grazing. Federal cost-sharing will be allowed for not more than 200 fruit trees planted on a farm. A permanent cover of grass, legumes, or mulch must be maintained under the trees.

*Maximum Federal cost-share.* $0.10 per tree.

§ 1102.419 *Practice 9: Planting adapted trees or shrubs on farmland for erosion control, watershed protection, or forestry purposes.* All plantings must be protected from fire and grazing.

*Maximum Federal cost-share.* $2 per 100 trees or shrubs.

§ 1102.420 *Practice 10: Constructing, enlarging, or sealing dams, pits, or ponds for livestock water to obtain proper distribution of livestock and encourage rotation grazing and better grassland management as a means of protecting established vegetative cover.* No Federal cost-sharing will be allowed for cleaning or maintaining an existing structure, or for repairs or maintenance of a dam, pond, or pit. Ponds or pits for livestock water may be approved only when needed to obtain proper distribution of livestock and prevent overgrazing.

*Maximum Federal cost-share.* (1) $0.12 per cubic yard of earth moved in the construction of an earth dam.

(2) $10 per cubic yard of concrete used in the construction of a dam or in lining any part of an excavated pond or pit when the permeability of the soil makes such lining desirable.

(3) $0.12 per cubic yard of earth moved in the excavation of a pond or pit.

§ 1102.421 *Practice 11: Initial establishment of improved permanent pasture for erosion control by seeding, sodding, or sprigging perennial legumes or self-reseeding annuals or perennial grasses or a mixture of legumes and perennial grasses or other approved forage plants.* (a) The varieties of grasses or legumes planted must be well adapted to the conditions of the particular area planted. Plantings of tropical kudzu must be carried out on not less than one-half acre to qualify for cost-sharing.

(b) The land must be properly prepared by plowing, and harrowing if necessary, and furrowing on contour lines, and sufficient clump divisions, sprigs, cuttings, or seeds must be used to secure a good ground cover at maturity.

(c) When the pasture is established by using seed, the rates of seeding should not be less than 12 pounds per acre, except for tropical kudzu where the rate of seeding should be not less than 5 pounds per acre. When pasture is established by using slips or cuttings, the distance between the rows must not be more than 3 feet. On land of 2 percent or more slope, the planting and all cultivating must be as near as practicable along contour lines.

(d) Fertilizer must be applied to plantings established under rate of cost-sharing (1), in the minimum amounts determined by soil test or experience in the area to be essential to the successful establishment of the vegetative cover, and cost-sharing will be limited to the minimum amounts so determined. Receipts or invoices showing the purchase and analysis of fertilizer applied (except for fertilizer furnished through the Agricultural Conservation Program as provided in § 1102.424 (practice 14)), properly dated and signed by the vendor, should be retained for presentation to the farm inspector at the time of inspection.

(e) Federal cost-sharing for carrying out this practice is limited to farms located within "Zone 1," comprising the municipalities of Aibonito, Barranquitas, Coamo, Comerio, and Orocovis. No Federal cost-sharing will be allowed for any operation for which the Commonwealth Government of Puerto Rico shares in the cost under any other program.

*Maximum Federal cost-share.* (1) $12 per acre for planting Malojilla, Malojillo, molasses grass, elephant grass, Merker grass, Roselawn St. Augustine, Guinea grass, Pangola, Guatemala grass, tropical kudzu, or similar approved grasses or legumes (except where 40 percent or more of the area is planted in tropical kudzu).

(2) $15 per acre for planting tropical kudzu as such or in combination with any approved grasses, where at least 40 percent of the area is planted in tropical kudzu.

(3) $0.10 per pound of nitrogen (N) applied, not to exceed 160 pounds per acre.

(4) $0.07 per pound of available phosphate ($P_2O_5$) applied, not to exceed 120 pounds per acre.

§ 1102.422 *Practice 12: Initial improvement of established permanent pastures of the varieties referred to in § 1102.421 (practice 11), by planting strips of tropical kudzu or other legumes approved by the Department of Agriculture and Commerce of the Commonwealth Government of Puerto Rico and the ASC State Office for soil or watershed protection.* The legumes must occupy at least 40 percent of the total area planted. On land of 2 percent or more slope, the strips should follow as near as practicable along contour lines. The rate of cost-sharing applies to the total area occupied by the tropical kudzu or approved legumes and the established pasture. The planting of tropical kudzu or other approved legumes must be carried out on not less than one-half acre to qualify for cost-sharing. No Federal cost-sharing will be allowed under this practice if the Commonwealth Government of Puerto Rico shares in the cost under any other program. Federal cost-sharing for carrying out this practice is limited to farms located within "Zone 1," comprising the municipalities of Aibonito, Barranquitas, Coamo, Comerio, and Orocovis.

*Maximum Federal cost-share.* $10 per acre.

§ 1102.423 *Practice 13: Constructing wells for livestock water to obtain proper distribution of livestock and encourage rotation grazing and better grassland management as a means of protecting established vegetative cover.* The wells should be drilled in an area of the farm where the providing of water will contribute to a better distribution of grazing. The necessary pumping equipment must be installed, except in connection with artesian wells. Adequate drinking troughs for animals must be installed. No Federal cost-sharing will be allowed for wells drilled at or for the use of farm headquarters or unless water is obtained. No Federal cost-sharing will be allowed if the Commonwealth Government of Puerto Rico shares in the cost under any other program. Federal cost-sharing for carrying out this practice is limited to farms located within "Zone 1," comprising the municipalities of Aibonito, Bar-

ranquitas, Coamo, Comerio, and Orocovis.

*Maximum Federal cost-share.* (1) $1 per linear foot of well for wells having a bore taking a casing of less than 4 inches in diameter, and artesian wells.

(2) $2 per linear foot of well for wells having a bore taking a casing of 4 inches or more, but less than 6 inches, in diameter, excluding artesian wells.

(3) $3 per linear foot of well for wells having a bore taking a casing of 6 inches or more in diameter, excluding artesian wells.

§ 1102.424 *Practice 14: Improving the woodland protection which coffee groves provide for steep slopes, by applying to coffee trees, on land terraced or covered with catch pits under the 1954 Agricultural Conservation Program or in previous years, fertilizer of grades containing not less than 10 units of available N and not less than 10 units of available $P_2O_5$.* (a) When the fertilizer applied on any farm does not meet such minimum requirements, lower grades may be accepted if recommended and approved by the Advisory Committee for the respective community after proper investigation, and if approved by the ASC State Office.

(1) The maximum number of pounds of coffee fertilizer for which Federal cost-sharing will be allowed shall be the product of (i) 600 and (ii) the actual number of acres terraced (or covered with catch pits) as of the end of the 1954 program year, not in excess of the greater of 30 percent of the coffee bearing acres on the farm or 10 acres.

(2) To qualify for Federal cost-sharing, the coffee trees on the area where the fertilizer is applied must have been properly thinned, the forest litter properly maintained, and old or nonproductive coffee trees removed; all in accordance with specifications approved by the ASC State Office.

(3) No Federal cost-sharing will be allowed under this practice for the application of fertilizer for which the Commonwealth Government of Puerto Rico shares in the cost under any other program.

(4) Receipts or invoices showing the purchase and analysis of fertilizer applied (except for fertilizer furnished through the Agricultural Conservation Program as provided in paragraphs (b) through (f) of this section), properly dated and signed by the vendor, should be retained for presentation to the farm inspector at the time of inspection.

(b) In order to facilitate the financing of the purchase of fertilizer for §§ 1102.421 and 1102.424 (practices 11 and 14), the fertilizer may be furnished on purchase orders to persons for carrying out these practices. Fertilizer may not be furnished to persons who are indebted to the Federal Government as indicated by the register of indebtedness, except in those cases where the agency to which the debt is owed notifies the ASC State Office that it waives its right to setoff in order to permit the furnishing of fertilizer. Purchase orders may be obtained by filing an application for such orders. Applications are available at the ASC district offices, local offices of the Extension Service, local offices of the Department of Agriculture and Commerce of the Commonwealth Government of Puerto Rico, offices of the Soil Conservation Service, and district offices of the Farmers Home Administration.

(c) Title to any fertilizer furnished through the Agricultural Conservation Program shall vest in the Federal Government until the fertilizer is applied or all charges for same are satisfied.

(d) The farmer shall pay that part of the cost of the fertilizer, as established under instructions issued by the Administrator, ACPS, which is in excess of the Federal cost-share attributable to the use of the fertilizer. The Federal cost-share increase on the amount of the Federal cost-share attributable to the use of the fertilizer may be advanced as a credit against that part of the cost of the fertilizer required to be paid by the farmer.

(e) The person to whom fertilizer is furnished under the 1954 program will be relieved of responsibility for the fertilizer upon determination by the ASC State Office that the fertilizer was used in performing the practice for which it was furnished. If the person uses any fertilizer for any purpose other than that for which it was furnished, he shall be indebted to the Federal Government for that part of the cost of the fertilizer borne by the Federal Government and shall pay such amount to the Treasurer of the United States direct or by withholdings from Federal cost-shares otherwise due him under the program.

(f) Any person to whom fertilizer is furnished shall be responsible to the Federal Government for any damage to the fertilizer, unless he shows that the damage was caused by circumstances beyond his control. If the fertilizer is abandoned or not used during the program year, it may, in accordance with instructions issued by the Administrator, ACPS, be transferred to another person or otherwise disposed of at the expense of the person who abandoned or failed to use the fertilizer, or be retained by the person for use in a subsequent program year.

*Maximum Federal cost-share.* The lesser of $40 or 80 percent of the fair price per ton for the grade of fertilizer used, as determined by the ASC State Office.

§ 1102.425 *Practice 15: Constructing and maintaining throughout 1954, individual terraces around coffee trees in order to properly improve the woodland protection afforded by such trees to steep slopes.* Individual terraces around coffee trees should be constructed as nearly level as possible within the 1954 designated parcel. Using the tree as an axis, the excavated area should have a radius of at least 3 feet on land having a slope of not more than 45 percent and of at least 2 feet on steeper slopes. The excavated soil should be used to fill in the slope below the tree. No cost-sharing will be allowed for the construction of terraces on land having a slope of 2 percent or less or if the terraces constructed are not properly maintained throughout 1954. Cost-sharing will not be allowed for more than 450 terraces per acre, nor will cost-sharing be allowed if less than 300 terraces have been constructed per acre. Federal cost-sharing will not be allowed for this practice if the Commonwealth Government of Puerto Rico shares in the cost under any other program.

*Maximum Federal cost-share.* $2 per 100 terraces.

§ 1102.426 *Practice 16: Constructing and maintaining throughout 1954, individual catch pits on the upper side of the coffee trees in order to properly improve the woodland protection afforded by such trees to steep slopes.* Catch pits must be from 30 to 42 inches long, 12 to 15 inches wide, and not less than 8 inches deep. No cost-sharing will be allowed for the construction of catch pits on land having a slope of 2 percent or less, or if the catch pits constructed are not properly maintained throughout 1954. Catch pits must be constructed outside the maximum limit of the area covered by the branches of the coffee trees, but always at the upper side of the tree, on the contour, and within the 1954 designated parcel. Where the nature of the soil and other local conditions make adherence to the foregoing specifications neither practicable nor desirable, such changes may be made as are recommended by the Advisory Committee for the community and approved by the ASC State Office. In such case the applicable cost-share per 100 catch pits shall be that recommended by the said Advisory Committee and approved by the ASC State Office, but in no event more than $1.75 per 100 catch pits. No cost-sharing will be allowed for more than 450 catch pits per acre nor will cost-sharing be allowed if less than 300 catch pits have been constructed per acre. No cost-sharing will be allowed for this practice if the Commonwealth Government of Puerto Rico has shared in the cost under any other program.

*Maximum Federal cost-share.* $1.75 per 100 catch pits.

### Federal Cost Shares

§ 1102.431 *Division of Federal cost-shares*—(a) *Federal cost-shares.* The Federal cost-share attributable to carrying out the practices contained in §§ 1102.421 and 1102.424 with fertilizer furnished under a purchase order shall be credited to the person to whom the fertilizer is furnished and it shall have priority over payment for other practices. Other Federal cost-shares shall be credited to the person who carried out the practices by which such other Federal cost-shares are earned. If more than one person contributed to the carrying out of such practices, the Federal cost-share shall be divided among such persons in the proportion that the ASC State Office determines they contributed to the carrying out of the practices. In making this determination, the ASC State Office shall take into consideration the value of the labor, equipment, or material contributed by each person toward the carrying out of each practice on a particular acreage and shall assume that each contributed equally unless it is established to the satisfaction of the ASC State Office that their respective contributions thereto were not in equal proportion. The furnishing of land or the right to use water will not be considered as a contribution to the carrying out of any practice.

(b) *Death, incompetency, or disappearance.* In case of death, incompetency, or disappearance of any person, any Federal share of the cost due him shall be paid to his successor, determined in accordance with the provisions of the regulations in ACP–122, as amended (part 1108 of this chapter).

§ 1102.432 *Increase in small Federal cost-shares.* The Federal cost-share computed for any person with respect to any farm shall be increased as follows: *Provided, however,* That in the event legislation is enacted which repeals or amends the authority for making such increases, the Secretary may in such manner and at such time as is consistent with such legislation discontinue such increases:

(a) Any Federal cost-share amounting to $0.71 or less shall be increased to $1.

(b) Any Federal cost-share amounting to more than $0.71, but less than $1, shall be increased by 40 percent.

(c) Any Federal cost-share amounting to $1 or more shall be increased in accordance with the following schedule:

| Amount of cost-share computed: | *Increase in cost-share* |
|---|---|
| $1 to $1.99 | $0.40 |
| $2 to $2.99 | .80 |
| $3 to $3.99 | 1.20 |
| $4 to $4.99 | 1.60 |
| $5 to $5.99 | 2.00 |
| $6 to $6.99 | 2.40 |
| $7 to $7.99 | 2.80 |
| $8 to $8.99 | 3.20 |
| $9 to $9.99 | 3.60 |
| $10 to $10.99 | 4.00 |
| $11 to $11.99 | 4.40 |
| $12 to $12.99 | 4.80 |
| $13 to $13.99 | 5.20 |
| $14 to $14.99 | 5.60 |
| $15 to $15.99 | 6.00 |
| $16 to $16.99 | 6.40 |
| $17 to $17.99 | 6.80 |
| $18 to $18.99 | 7.20 |
| $19 to $19.99 | 7.60 |
| $20 to $20.99 | 8.00 |
| $21 to $21.99 | 8.20 |
| $22 to $22.99 | 8.40 |
| $23 to $23.99 | 8.60 |
| $24 to $24.99 | 8.80 |
| $25 to $25.99 | 9.00 |
| $26 to $26.99 | 9.20 |
| $27 to $27.99 | 9.40 |
| $28 to $28.99 | 9.60 |
| $29 to $29.99 | 9.80 |
| $30 to $30.99 | 10.00 |
| $31 to $31.99 | 10.20 |
| $32 to $32.99 | 10.40 |
| $33 to $33.99 | 10.60 |
| $34 to $34.99 | 10.80 |
| $35 to $35.99 | 11.00 |
| $36 to $36.99 | 11.20 |
| $37 to $37.99 | 11.40 |
| $38 to $38.99 | 11.60 |
| $39 to $39.99 | 11.80 |
| $40 to $40.99 | 12.00 |
| $41 to $41.99 | 12.10 |
| $42 to $42.99 | 12.20 |
| $43 to $43.99 | 12.30 |
| $44 to $44.99 | 12.40 |
| $45 to $45.99 | 12.50 |
| $46 to $46.99 | 12.60 |
| $47 to $47.99 | 12.70 |
| $48 to $48.99 | 12.80 |
| $49 to $49.99 | 12.90 |
| $50 to $50.99 | 13.00 |
| $51 to $51.99 | 13.10 |
| $52 to $52.99 | 13.20 |
| $53 to $53.99 | 13.30 |
| $54 to $54.99 | 13.40 |
| $55 to $55.99 | 13.50 |
| $56 to $56.99 | $13.60 |
| $57 to $57.99 | 13.70 |
| $58 to $58.99 | 13.80 |
| $59 to $59.99 | 13.90 |
| $60 to $185.99 | 14.00 |
| $186 to $199.99 | (1) |
| $200 and over | (2) |

[1] Increase to $200.
[2] No increase.

§ 1102.433 *Federal cost-shares limited to $1,500.* (a) The total of all Federal cost-shares under the 1954 program to any person with respect to farms, ranching units, and turpentine places in the United States (including Alaska, Hawaii, Puerto Rico, and the Virgin Islands) shall not exceed the sum of $1,500.

(b) All or any part of any Federal cost-share which otherwise would be due any person under the 1954 program may be withheld, or required to be refunded, if he has adopted, or participated in adopting, any scheme or device, including the dissolution, reorganization, revival, formation, or use of any corporation, partnership, estate, trust, or any other means, designed to evade, or which has the effect of evading, the provisions of this section.

### General Provisions Relating to Federal Cost-Sharing

§ 1102.436 *Maintenance of practices.* The sharing of costs, by the Federal Government, for the performance of approved conservation practices on any farm under the 1954 program will be subject to the condition that the person with whom the costs are shared will maintain such practices in accordance with good farming practices as long as the land on which they are carried out is under his control.

§ 1102.437 *Practices defeating purposes of programs.* If the ASC State Office finds that any person has adopted or participated in any practice which tends to defeat the purposes of the 1954 or any previous program, including, but not limited to, failure to maintain in accordance with good farming practices, practices carried out under a previous program, it may withhold, or require to be refunded, all or any part of the Federal cost-share which otherwise would be due him under the 1954 program.

§ 1102.438 *Depriving others of Federal cost-share.* If the ASC State Office finds that any person has employed any scheme or device (including coercion, fraud, or misrepresentation), the effect of which would be or has been to deprive any other person of the Federal cost-share due that person under the program, it may withhold, in whole or in part, from the person participating in or employing such a scheme or device, or require him to refund in whole or in part, the Federal cost-share which otherwise would be due him under the 1954 program.

§ 1102.439 *Filing of false claims.* If the ASC State Office finds that any person has knowingly filed claim for payment of the Federal cost-share under the program for practices not carried out, or for practices carried out in such a manner that they do not meet the required specifications therefor, such person shall not be eligible for any Federal cost-sharing under the program and shall refund all amounts that may have been paid to him under the program. The withholding or refunding of Federal cost-shares will be in addition to and not in substitution of any other penalty or liability which might otherwise be imposed.

§ 1102.440 *Misuse of purchase orders.* If the ASC State Office finds that any person has knowingly used a purchase order issued to him for conservation materials or services for a purpose other than that for which it was issued, and that such misuse of the purchase order tends to defeat the purpose for which it was issued, such person shall not be eligible for any Federal cost-sharing under the program and shall refund all amounts that may have been paid to him under the program. The withholding or refunding of Federal cost-shares will be in addition to and not in substitution of any other penalty or liability which might otherwise be imposed.

§ 1102.441 *Federal cost-shares not subject to claims.* Any Federal cost-share, or portion thereof, due any person shall be determined and allowed without regard to questions of title under State law; without deduction of claims for advances (except as provided in § 1102.442, and except for indebtedness to the United States subject to setoff under orders issued by the Secretary); and without regard to any claim or lien against any crop, or proceeds thereof, in favor of the owner or any other creditor.

§ 1102.442 *Assignments.* Any person who may be entitled to any Federal cost-share under the 1954 program may assign his right thereto, in whole or in part, as security for cash loaned or advances made for the purpose of financing the making of a crop in 1954. No assignment will be recognized unless it is made in writing on Form ACP–69 and in accordance with the instructions in ACP–70–Insular Region.

§ 1102.443 *Pooling agreements.* Farmers in any local area may agree in writing, with the approval of the ASC State Office, to perform designated amounts of practices which will conserve or improve the agricultural resources of the community. For purposes of eligibility for cost-sharing, practices carried out under such an approved written agreement will be regarded as having been carried out on the farms of the persons who performed the practices.

§ 1102.444 *Compliance with regulatory measures.* Persons who carry out conservation practices under the 1954 program shall be responsible for obtaining the authorities, rights, easements, or other approvals necessary to the performance and maintenance of the practices in keeping with applicable laws and regulations. The person with whom the cost of the practice is shared shall be responsible to the Federal Government for any losses it may sustain because he infringes on the rights of others or fails to comply with applicable laws or regulations.

§ 1102.445 *Practices carried out with State or Federal aid.* The Federal share of the cost for any practice shall not be reduced because it is carried out with materials or services furnished through the program or by any agency of a State to another agency of the same State, or with technical advisory services furnished by a State or Federal agency. In other cases of State or Federal aid, the total Federal cost-share computed on the basis of the total number of units of the practice performed shall be reduced by the value of the aid, as determined by the ASC State Office, in computing the amount of the Federal cost-share to be paid for performance of the practice. Materials or services furnished or used by a State or Federal agency for the performance of practices on its land shall not be regarded as State or Federal aid for the purposes of this section.

APPLICATION FOR PAYMENT OF FEDERAL COST-SHARES

§ 1102.451 *Persons eligible to file application.* Any person who, as landlord, tenant, or sharecropper on a farm, bore a part of the cost of an approved conservation practice is eligible to file an application for payment of the Federal cost-share due him.

§ 1102.452 *Time and manner of filing application and information required.* Payment of Federal cost-shares will be made only upon application submitted on the prescribed form to the ASC district offices not later than February 28, 1955, except that the ASC State Office may accept an application filed after February 28, 1955, but not later than December 31, 1955, in any case where the failure to timely file was not the fault of the applicant. If an application for a farm is filed within the time prescribed, any person on the farm who did not sign the application may subsequently file an application, provided he does so on or before December 31, 1955. Payment may be withheld from any person who fails to file any form or furnish any information required with respect to any farm which such person is operating or renting to another. Any application for payment may be rejected if any form or information required of the applicant is not submitted to the district office within the time fixed by the Administrator, ACPS, which time shall be not later than December 31, 1955. At least 2 weeks' notice to the public shall be given of the expiration of a time limit for filing prescribed forms or required information, and any time limit fixed shall afford a full and fair opportunity to those eligible to file the form or information within the period prescribed. Such notice shall be given by mailing notice to the ASC district offices and making copies available to the press.

APPEALS

§ 1102.456 *Appeals.* Any person may, within 15 days after notice thereof is forwarded to or made available to him, request the ASC State Office in writing to reconsider its recommendation or determination in any matter affecting the right to or the amount of his Federal cost-shares with respect to the farm. The ASC State Office shall notify him of its decision in writing within 30 days after the submission of the appeal. If he is dissatisfied with the decision of the ASC State Office, he may, within 15 days after its decision is forwarded to or made available to him, request the Administrator, ACPS, to review the decision of the ASC State Office. The decision of the Administrator, ACPS, shall be final. Written notice of any decision rendered under this section by the ASC State Office shall also be issued to each other landlord, tenant, or sharecropper on the farm who may be adversely affected by the decision.

BULLETINS, INSTRUCTIONS, AND FORMS

§ 1102.461 *Bulletins, instructions, and forms.* The Administrator, ACPS, is authorized to make determinations and to prepare and issue bulletins, instructions, and forms containing detailed information with respect to the 1954 program as it applies to Puerto Rico, and forms will be available in the State and district ASC offices. Producers wishing to participate in the program should obtain all information needed from the offices mentioned herein.

DEFINITIONS

§ 1102.466 *Definitions.* For the purposes of the 1954 program:

(a) "Secretary" means the Secretary of the United States Department of Agriculture or the officer of the Department acting in his stead pursuant to delegated authority.

(b) "Administrator, ACPS," means the Administrator of the Agricultural Conservation Program Service.

(c) "State" means the Commonwealth of Puerto Rico.

(d) "ASC State Office" means the Caribbean Area Agricultural Stabilization and Conservation Office, San Juan, Puerto Rico.

(e) "Advisory Committee" means the persons, technicians, or others designated by the ASC State Office and the Department of Agriculture and Commerce of the Commonwealth Government of Puerto Rico to form a committee for the community.

(f) "Person" means an individual, partnership, association, corporation, estate, or trust, or other business enterprise, or other legal entity (and, wherever applicable, a State, a political subdivision of a State, or any agency thereof) that, as landlord, tenant, or sharecropper, participates in the operation of a farm.

(g) "Farm" means all adjacent or nearby farm or range land under the same ownership which is operated by one person, including also (1) any other adjacent or nearby farm or range land which the ASC State Office, in accordance with instructions issued by the Administrator, ACPS, determines is operated by the same person as part of the same unit in producing livestock or with respect to the rotation of crops, and with work stock, machinery, and labor substantially separate from that for any other land; and (2) any field-rented tract (whether operated by the same or another person) which, together with any other land included in the farm, constitutes a unit with respect to the rotation of crops. A farm shall be regarded as located in the municipality in which the principal dwelling is situated or, if there is no dwelling thereon, it shall be regarded as located in the municipality in which the major portion of the farm is located.

(h) "Coffee farm" means the same as "farm," except that it shall contain at least 0.5 acre of coffee in production in any one contiguous area.

(i) "Sugarcane farm" means any farm that has sugarcane growing in 1954.

(j) "Cropland" means farmland which in 1953 was tilled or was in regular crop rotation, excluding (1) bearing orchards (except the acreage of cropland therein), and (2) plowable noncrop open pasture.

(k) "Orchards" means the acreage in planted fruit trees, nut trees, coffee trees, vanilla plants, and banana plants.

(l) "Pastureland" means farmland, other than rangeland, on which the predominant growth is forage suitable for grazing and on which the spacing of any trees or shrubs is such that the land could not fairly be considered as woodland.

(m) "Rangeland" means nonirrigated land growing, without cultivation, native perennial grasses and forage plants primarily, and used for grazing by domestic livestock.

(n) "Designated parcel" means the acreage, designated under the 1954 program by the producer and accepted by the ASC State Office, within the coffee bearing area of a farm on which prescribed practices are to be carried out. Such acreage cannot exceed the larger of 4 acres or 12 percent of the total coffee bearing area of a farm.

(o) "Program year" means the period from January 1, 1954, through December 31, 1954.

AUTHORITY, AVAILABILITY OF FUNDS, AND APPLICABILITY

§ 1102.471 *Authority.* The program contained in this subpart is approved pursuant to the authority vested in the Secretary of Agriculture under sections 7–17 of the Soil Conservation and Domestic Allotment Act, as amended (49 Stat. 1148; 16 U. S. C. 590g–590q), and the Department of Agriculture Appropriation Act, 1954.

§ 1102.472 *Availability of funds.* (a) The provisions of the 1954 program are necessarily subject to such legislation as the Congress of the United States may hereafter enact; the paying of the Federal cost-shares provided in this subpart is contingent upon such appropriation as the Congress may hereafter provide for such purpose; and the amounts of such Federal cost-shares will necessarily be within the limits finally determined by such appropriation.

(b) The funds provided for the 1954 program will not be available for paying Federal cost-shares for which applications are filed in the ASC district offices after December 31, 1955.

§ 1102.473 *Applicability.* (a) The provisions of the 1954 program contained in this subpart are not applicable to (1) any department or bureau of the United States Government or any corporation wholly owned by the United States; (2) grazing lands owned by the United States which were acquired or reserved for conservation purposes, or which are to be retained permanently under Government ownership, including, but not limited to, grazing lands administered by the Forest Service or the Soil Conservation Service of the United States Department of Agriculture, or by the Bureau of Land Management (including lands administered under the Taylor Grazing Act) or the Fish and Wildlife Service of the United States Department of the Interior; and (3) nonprivate persons for performance on any land owned by the United States or a corporation wholly owned by it.

(b) The program is applicable to (1) privately owned lands; (2) lands owned by a State or political subdivision or agency thereof; (3) lands owned by corporations which are partly owned by the United States, such as production credit associations; (4) lands temporarily owned by the United States or a corporation wholly owned by it which were not acquired or reserved for conservation purposes, including lands administered by the Farmers Home Administration, the Reconstruction Finance Corporation, the Federal Farm Mortgage Corporation, the United States Department of Defense, or by any other Government agency designated by the Administrator, ACPS; and (5) any cropland farmed by private persons which is owned by the United States or a corporation wholly owned by it.

Done at Washington, D. C., this 17th day of December, 1953.

[SEAL] TRUE D. MORSE,
*Acting Secretary of Agriculture.*

## TITLE 9—ANIMALS AND ANIMAL PRODUCTS

### Chapter I—Bureau of Animal Industry, Department of Agriculture

#### Subchapter F—Animal Breeds

[BAI Order 385, Amdt. 1]

PART 151—RECOGNITION OF BREEDS AND BOOKS OF RECORD OF PUREBRED ANIMALS

DOGS

On October 31, 1953, a notice of rule making was published in the FEDERAL REGISTER (18 F. R. 6887) regarding the proposed recognition by the Secretary of Agriculture of the book of record of purebred dogs entitled "Teckel Stammbuch", and the amendment of § 151.10 of the regulations governing the recognition of breeds and books of record of purebred animals (9 CFR 151.10 as amended).

After due consideration of all relevant material presented in connection with the notice, the Secretary of Agriculture, pursuant to the authority vested in him by section 201, paragraph 1606 of the Tariff Act of 1930, as amended (19 U. S. C. and Supp., sec. 1201, par. 1606), hereby recognizes the said book of record, and hereby amends said § 151.10 by adding to the table in paragraph (a) of said section relating to dogs the following book of record:

Dogs

| Name of breed | Book of record | By whom published |
|---|---|---|
| Dachshund | Teckel Stammbuch. | Deutscher Teckelklub, E. V., Duisburg, Rhineland, Moselstrasse 7, Germany, Joseph Chateau, stud bookkeeper. |

Under a proviso in paragraph (a) of said § 151.10 no dog registered in the above book of record shall be certified under the act as purebred unless a pedigree certificate showing three complete generations of known and recorded purebred ancestry of the Dachshund breed issued by the sponsoring Association is submitted for such animal.

(Par. 1606, 46 Stat. 673; 19 U. S. C. 1201, par. 1606)

The foregoing amendment shall become effective on the 22d day of January 1954.

Done at Washington, D. C., this 17th day of December 1953.

[SEAL] TRUE D. MORSE,
*Acting Secretary of Agriculture.*

[F. R. Doc. 53-10639; Filed, Dec. 22, 1953; 8:50 a. m.]

## TITLE 25—INDIANS

### Chapter I—Bureau of Indian Affairs, Department of the Interior

#### Subchapter I—Irrigation Projects; Operation and Maintenance

PART 130—OPERATION AND MAINTENANCE CHARGES

JOINT WORKS

Section 130.69a (1) (2) is revised to read as follows:

§ 130.69a *Joint works.* • • •

(1) • • • (2) The project engineer has determined that for the present, joint works will need approximately two-thirds of the available office space at Coolidge. The Indian unit has set up its office at Sacaton and makes that location the headquarters for its operation and maintenance activities on Indian lands and, therefore, no longer occupies any of the office space at Coolidge. The district, therefore, is permitted to use one-third of said office space until such time as the project engineer finds that the requirements of joint works for such office space increase or decrease. The occupancy of the office building at Coolidge or any other project building occupied by the district and/or the Indian unit shall be by mutual agreement of the project engineer, the district engineer and the engineer in charge of the Indian unit. Payment shall be made by the Indian unit or by the district for the cost of operating and maintaining space occupied in the office building at Coolidge or in such other project buildings as may be occupied by either unit for its exclusive use. Until the requirements of joint works increase the district may continue to occupy the approximate east one-third of the office building for which occupancy the district shall pay such sum per month from August 1, 1952 as has been or may be agreed upon in writing between the district and the project engineer. The use of such space, which shall include the right to use part of the basement space, and garage referred to in an agreement between the project engineer and the district engineer of August 25, 1952, approved by the Area Director on December 19, 1952, shall continue, subject to the paramount need for such space for joint works operations, and the judgment of the project engineer in this regard shall be final unless otherwise determined by the Secretary of the Interior. The monthly payments received shall be deposited in the joint works account of the project and applied as provided in the said agreement.

(Secs. 1, 3, 36 Stat. 270, 272, as amended; 25 U. S. C. 385)

DOUGLAS MCKAY,
*Secretary of the Interior.*

DECEMBER 17, 1953.

## TITLE 33—NAVIGATION AND NAVIGABLE WATERS

### Chapter II—Corps of Engineers, Department of the Army

PART 203—BRIDGE REGULATIONS

BAYOU BIENVENUE AND BAYOU BLACK, LOUISIANA

Pursuant to the provisions of section 5 of the River and Harbor Act of August 18, 1894 (28 Stat. 362; 33 U. S. C. 499), § 203.245 governing the operation of certain drawbridges where constant attendance of draw tenders is not required over navigable waters discharging into the Atlantic Ocean south of and including Chesapeake Bay and into the Gulf of Mexico, except the Mississippi River and its tributaries and outlets is amended, as follows:

§ 203.245 *Navigable waters discharging into the Atlantic Ocean south of and including Chesapeake Bay and into the Gulf of Mexico, except the Mississippi River and its tributaries and outlets; bridges where constant attendance of draw tenders is not required.* • • •

(i) Waterways discharging into the Gulf of Mexico east of the Mississippi River. • • •

(22-a) Bayou Bienvenue, La.; Louisiana Department of Highways bridge near Chalmette. At least 24 hours' advance notice required.

• • • • • •

(j) Waterways discharging into the Gulf of Mexico west of the Mississippi River. • • •

(4–a) Bayou Black, La.; Louisiana Department of Highways bridge near Gibson. At least 24 hours' advance notice required.

• • • • • •

[Regs. December 7, 1953, 823.01–ENGWO] (28 Stat. 362; 33 U. S. C. 499)

[SEAL] WM. E. BERGIN,
*Major General, U. S. Army,*
*The Adjutant General.*

# TITLE 14—CIVIL AVIATION

## Chapter II—Civil Aeronautics Administration, Department of Commerce

[Amdt. 55]

## PART 609—STANDARD INSTRUMENT APPROACH PROCEDURES

### ALTERATIONS

The standard instrument approach procedure alterations appearing hereinafter are adopted to become effective when indicated in order to promote safety of the flying public. Compliance with the notice, procedures, and effective date provisions of section 4 of the Administrative Procedure Act would be impracticable and contrary to the public interest, and therefore is not required.

Part 609 is amended as follows:

1. The instrument landing system procedures prescribed in § 609.11 are amended to read in part:

ILS STANDARD INSTRUMENT APPROACH PROCEDURE

Bearings, headings, and courses are magnetic. Distances are in statute miles unless otherwise indicated. Elevations and altitudes are in feet, MSL. Ceilings are in feet above airport elevation.
If an ILS instrument approach is conducted at the below named airport, it shall be in accordance with the following instrument approach procedure, unless an approach is conducted in accordance with a different procedure authorized by the Administrator for Civil Aeronautics for such airport. Initial approaches shall be made over specified routes. Minimum altitude(s) shall correspond with those established for en route operation in the particular area or as set forth below:

| City and State; airport name, elevation; facility: class and identification; procedure No.; effective date | Transition to ILS | | | | Procedure turn (—) side of final approach course (outbound and inbound); altitudes; limiting distances | Minimum altitude at glide slope intercept-ion inbound (ft.) | Altitude of glide slope and distance to approach end of runway at— | | Ceiling and visibility minimums | | | If visual contact not established upon descent to authorized landing minimums or if landing not accomplished |
|---|---|---|---|---|---|---|---|---|---|---|---|---|
| | From— | To— | Course and distance | Minimum altitudes (ft.) | | | Outer marker | Middle marker | Condition | Type aircraft: 75 m. p. h. or less | Type aircraft: More than 75 m. p. h. | |

# TITLE 32—NATIONAL DEFENSE

## Chapter IV—Joint Regulations of the Armed Forces

### Subchapter B—Transportation by Aircraft

PART 416—MOVEMENT OF TRAFFIC ON MILITARY AIR TRANSPORT SERVICE SCHEDULED AIRCRAFT

PART 417—MOVEMENT OF TRAFFIC ON OTHER THAN MILITARY AIR TRANSPORT SERVICE SCHEDULED AIRCRAFT

The following Parts 416 and 417 supersede Parts 416 and 417 (15 F. R. 483; 32 CFR 416; 417).

PART 416—MOVEMENT OF TRAFFIC ON MILITARY AIR TRANSPORT SERVICE SCHEDULED AIRCRAFT

Sec.
416.1 Purpose and scope.
416.2 Definitions.
416.3 Uniform.
416.4 Responsibilities.
416.5 Policy.
416.6 Categories.
416.7 Additional authorization.
416.8 Revenue traffic charges.
416.9 Air movement designator requirements.
416.10 Special requirements.
416.11 Baggage allowances.
416.12 Diversion to commercial carriers.

AUTHORITY: §§ 416.1 to 416.12 issued under E. O. 9886, Aug. 22, 1947, 12 F. R. 5689; 3 CFR, 1947 Supp.

DERIVATION: Army Regulations 96-25; OPNAV Instruction 4630.12, Air Force Regulation 76-15, Sept. 8, 1953.

§ 416.1 *Purpose and scope.* This part prescribes the responsibilities and policies for the movement of traffic on scheduled Military Air Transport Service aircraft. It applies to all agencies utilizing or controlling space on Military Air Transport Service aircraft.

§ 416.2 *Definitions*—(a) *Traffic.* Cargo, mail, passengers, and passengers' baggage.

(b) *Revenue traffic.* Traffic for which reimbursement to, or accounting by, the Department of Defense is required.

(c) *Nonrevenue traffic.* Traffic transported in the primary or official interest of the Department of Defense.

(d) *Baggage.* All equipment, clothing, except one overcoat or raincoat, and items of any other kind carried by or accompanying a passenger and not documented as cargo.

(e) *Air movement designator.* A combination of code letters and numbers assigned by the issuing agency as a medium of identification and for the establishment of precedence of movement of traffic.

(f) *Military Air Transport Service aircraft.* As used in this part, only those aircraft of the Military Air Transport Service organization operated for the purpose of performing transport functions (excludes subordinate nontransport services of Military Air Transport Service, such as Air Weather Service, Air Rescue Service, and so forth).

§ 416.3 *Uniform.* Military personnel of the armed services will be in uniform when traveling on military aircraft unless civilian clothing is specifically authorized in competent orders.

§ 416.4 *Responsibilities.* The Military Air Transport Service, under the command and direction of the Chief of Staff, United States Air Force, is responsible for air transportation for the Department of Defense as directed by the Secretary of Defense. The Director of Transportation, Headquarters, United States Air Force is responsible for monitoring traffic management aspects of the Military Air Transport Service.

§ 416.5 *Policy.* In addition to the competent authorities of the Army, Navy, Air Force, Marine Corps, and Coast Guard listed in paragraph (a) of this section, certain orders issued by Canadian authorities will be honored for the purpose of providing military air transportation in accordance with specific directives governing reciprocal transportation between Canada and the United States. This eligibility listing is not to be construed as indicating the relative order of movement. The following is the only traffic authorized to be carried on transport aircraft operated by the Military Air Transport Service:

(a) That traffic which is directed or authorized by written orders issued by competent authorities of the Departments of the Army, the Navy, and the Air Force authorizing air transportation without reimbursement therefor when the traffic is primarily of official concern to the Department of Defense. The determination of whether traffic is primarily of official concern to the Department of Defense is a responsibility of the Secretaries of Defense, Army, Navy, or Air Force, or by delegation of authority to those agencies authorized to establish priority of movement via military air by current Departments of the Army, Navy, and Air Force directives. The priority of traffic movement shall be determined by the Department concerned in accordance with the classification of military necessity established by the individual Departments. Assigned air movement designator will be included in all orders, movement directives, or shipping documents for all traffic to or from the continental United States or between areas outside the continental United States.

(b) That traffic which is directed or authorized by competent authorities of the Departments of the Army, the Navy, or the Air Force, with reimbursement therefor, in accordance with the provisions of applicable law, when the traffic is of official concern to the executive departments or agencies, or to the legislative or judicial branches of the Government. Requests for transportation in this category should be directed to the Chief of Staff, United States Air Force, with procurement authority chargeable or a clear indication of the method by which reimbursement is to be accomplished.

(c) That traffic which is certified by the interested Department or agency as being in the national interest may be furnished air transportation to or from places outside the continental United States with reimbursement therefor. In cases covered by this section, it will be within the purview of the Secretaries of the Army, Navy, or Air Force to refuse to authorize the transportation if deemed advisable. As a matter of general policy, the aviation organizations of the armed services will not be placed in a position of competing with United States commercial air transportation.

§ 416.6 *Categories.* Categories of traffic eligible for transportation via aircraft of the Military Air Transport Service will be limited to traffic moving under competent Army, Navy, or Air Force orders, or movement authorities directing or authorizing air transportation subject to the conditions set forth in paragraphs (a) through (e) of this section:

(a) *Personnel, space requirement, nonrevenue*—(1) *Category 1.* Military personnel of the Department of Defense, including United States Coast Guard, on active duty when traveling under competent permanent change of station, temporary duty, or emergency leave orders, including all foreign military personnel, sponsored by the Secretaries of Defense, Army, Navy, or Air Force.

(2) *Category 2.* Civilian employees of the Department of Defense when traveling under competent permanent change of station orders or properly executed transportation agreements, temporary duty, or emergency leave orders including all civilians specifically sponsored by the Secretaries of Defense, Army, Navy, or Air Force.

(3) *Category 3.* Civilian personnel of Government contractors and technical advisors to military authorities, when engaged in activities of the Department of Defense which require such air travel. Such transportation may be furnished when specified in the contract or determined to be in the best interest of the Department of Defense.

(4) *Category 4.* Members of Congress and other Federal officials when the travel is in the primary interest of the Department of Defense and when authorized by the Secretary of Defense or one of the military departments.

(5) *Category 5.* Military personnel of the National Guard and Reserve Components when traveling on matters of official concern to the Department of Defense.

(6) *Category 6.* Dependents of military and civilian personnel of the Department of Defense traveling pursuant to competent permanent change of station orders or other competent travel authorizations, including such dependents when traveling to and from the continental United States or between oversea areas for medical reasons.

(7) *Category 7.* American Red Cross personnel when serving with the Department of Defense in oversea areas, provided that they are in uniform and such travel is in the performance of Red Cross duties incident to change of station or temporary duty. Emergency leave travel is authorized between oversea areas and zone of interior aerial ports.

Military air travel will not be authorized within the zone of interior.

(8) *Category 8.* Dependents of military and civilian personnel of the Department of Defense stationed overseas when traveling to or from the United States for the purpose of attending school (limited to one roundtrip each school year).

(9) *Category 9.* Commissioned officers of the Public Health Service detailed for duty with the Army, Navy, Air Force, Marine Corps, or Coast Guard, or when traveling in connection with matters primarily of official concern to the Department of Defense.

(10) *Category 10.* British, Canadian, and Australian exchange officers on duty with the Army, Navy, Air Force, or Marine Corps while in a duty status, upon presentation of orders issued by competent authority.

(11) *Category 11.* Dependents of officials of the other executive departments or agencies, of the judicial branch, or of the legislative branch when accompanied by their principals when authorized by the Secretary of Defense.

(12) *Category 12.* Military personnel dependents in a patient status in the continental United States whose movement from one military hospital to another within the continental United States has been authorized, or who are initially admitted to a military hospital. When so determined by the hospital commander originating the movement of minor dependents (patients), an adult dependent member of the immediate family may be designated as an attendant and is authorized transportation.

(13) *Category 13.* Any person in case of an emergency involving catastrophe or possible loss of life when other means of suitable transportation are not available, feasible, or adequate.

(14) *Category 14.* Any other individual not listed in this paragraph when traveling on competent orders authorizing military air transportation in connection with matters primarily of official concern to the Department of Defense.

NOTE: The following are limiting conditions governing travel of certain categories of personnel:

(a) Dependents who are beyond the 188th day of pregnancy will not be accepted for air transportation.

(b) Infants under six weeks of age will not be accepted for air transportation.

(c) Children under 12 years of age will not be accepted for air transportation unless accompanied by parent or other responsible adult designated by the parent.

(b) *Personnel, space requirement, revenue*—(1) *Category 15.* Persons traveling in the interest of other governmental departments or agencies, with reimbursement by the department or agency concerned.

(2) *Category 16.* Civilian employees of the Department of Defense in areas outside the continental United States who are recruited from outside the duty area on the basis of a signed employment agreement providing for return transportation and who are separated at an oversea area under circumstances that do not convey eligibility for return transportation at Government expense for the purpose of repatriation to the aerial port which is within the country from which originally recruited and which is most conveniently situated to the oversea command location when military sea transportation service is not available. The direct cost of such travel is to be paid for by the individual or withheld from the money due the individual by the Government. Traffic in this category will be granted the lowest class of priority.

(3) *Category 17.* Civilian personnel or Government contractors and technical advisors to military authorities when engaged in activities of the Department of Defense in areas outside the continental United States who default in their contracts and whose tour of duty is terminated for the convenience of the Government, for the purpose of repatriation to the continental United States when Military Sea Transport Service is not available.

(4) *Category 18.* Nongovernmental passengers upon certification of the head of the interested Executive department or agency that the furnishing of such transportation is in the national interest, and that transportation by commercial means is not available or adequate.

(5) *Category 19.* Officials of the other executive departments or agencies, of the judicial branch, or of the legislative branch, and their dependents, on a nonsponsored trip when authorized by the Secretary of Defense.

(6) *Category 20.* Civilian personnel of Department of Defense agencies operating on nonappropriated funds.

(c) *Personnel, space available, nonrevenue.* The term "space available basis," means space that is surplus after all space requirement traffic has been accommodated and which would otherwise be unused.

(1) *Category 21.* Military personnel of the Department of Defense, U. S. Coast Guard, and foreign exchange officers, including British, Canadian, and Australians on duty with the Department of Defense when traveling in connection with sick or ordinary leave.

(2) *Category 22.* Persons holding the Congressional Medal of Honor, on space available basis within the continental United States, upon presentation of proper identification. These persons will sign a certificate that the travel is not for personal gain, in accordance with Part 417 of this title.

NOTE: Whenever travel is performed in one direction on a permissive basis, that is military personnel on leave, military and civilian personnel under emergency leave or accompanied travel of dependents, there is no guarantee of space on any return flight and the Government will be under no obligation to return the individual to point of origin or to any other destination.

(d) *Cargo-nonrevenue.* (1) Cargo of the Department of Defense.

(2) Mail of the Department of Defense and of military personnel and personal mail of those civilians authorized to use military postal facilities.

(3) Cargo carried as a matter primarily of official concern to the Department of Defense.

(4) Cargo of the American Red Cross for use of the Department of Defense.

(5) Any cargo in case of catastrophe, the lack of which would cause loss of life, when other means of transportation are not available, feasible, or adequate.

(e) *Cargo-revenue.* (1) Cargo moving in the interest of other governmental departments or agencies, with reimbursement from the department or agency concerned.

(2) Nongovernmental cargo upon certification of the head of the interested executive department or agency that the furnishing of such transportation is in the national interest, and that transportation by commercial means is not available or adequate.

(3) Cargo of Department of Defense agencies operating on nonappropriated funds.

§ 416.7 *Additional authorization.* (a) Requests for transportation of traffic not covered by this part will be referred to the Chief of Staff United States Army; Chief of Naval Operations, or the Director of Transportation, Headquarters United States Air Force, depending upon the department involved.

(b) All requests for Military Air Transport Service special missions not involving aircraft of the United States Air Force Special Air Mission Fleet will be submitted through appropriate channels to the Director of Transportation, Headquarters United States Air Force.

(c) The general policy of the Department of Defense is to prohibit travel of dependents on other than competent orders when the transportation is in connection with permanent change of station assignment of the principal. However, under extenuating circumstances in individual cases, certain exceptions may be authorized by the Secretary of Defense; Secretaries of the Departments; Chairman of the Joint Chiefs of Staff; Chief of Staff, United States Army; Chief of Naval Operations; Chief of Staff, United States Air Force, and Commandant of the Marine Corps, to allow travel on a space-available basis.

§ 416.8 *Revenue traffic charges.* (a) Charges will be assessed for the transportation of traffic qualifying under § 416.6 (b) and (e). Rates to be charged will be determined by the Chief of Staff, United States Air Force. Such charges will be reasonable and, except as provided in paragraph (b) of this section, not less than the current commercial rates, including taxes. Responsibility for collection of such charges will rest with the Chief of Staff, United States Air Force.

(b) Reimbursement by the Government agency concerned for traffic authorized under § 416.5 will be on the basis of the cost thereof as determined by the Chief of Staff, United States Air Force, in accordance with section 601 of the Economy Act of 30 June 1932, as amended (47 Stat. 417, as amended; 31 U. S. C. 686).

§ 416.9 *Air movement designator requirements.* All traffic (passengers and cargo) authorized in this part is subject to the establishment of an air movement designator in accordance with established procedures.

(a) Traffic scheduled for movement to an aerial port of embarkation for shipment to points outside the continental United States will not be forwarded to the aerial port of embarkation unless the traffic has been assigned an air movement designator and appropriately cleared.

(b) *Limitation.* In the establishment of air movement designators, traffic referred to in § 416.6 (a) and (d) will, at all times, be accorded primary consideration. Traffic, the transportation of which is authorized under § 416.6 (b) and (c), will not be carried if it can reasonably be handled by United States civil air carriers, nor will such traffic be carried on any given route if in the opinion of the Departments of the Army, Navy, or Air Force, United States civil air carriers are adequate to handle such traffic.

§ 416.10 *Special requirements.* (a) All traffic to be moved on Military Air Transport Service aircraft must meet carrier acceptability requirements with respect to packing, marking, and documentation. Appropriate records will be maintained to provide essential information concerning diversions, intransit data, and receipt and delivery of traffic.

(b) Military Air Transport Service will be responsible but not accountable for all traffic carried, with responsibility beginning at the station where traffic is accepted and ending upon delivery at the carrier destination airport.

(c) The Chief of Staff, United States Air Force or the Commander, Military Air Transport Service may effect emergency changes in the transport operations and the diversion of traffic already en route, with notice to the shipping agency as to alternate means of transportation utilized, when such becomes necessary. Any diversion of traffic at aerial ports of embarkation will be the responsibility of the appropriate air traffic coordinating officer.

§ 416.11 *Baggage allowances*—(a) *Normal baggage allowance.* The normal baggage allowance for all pasengers, except those covered by paragraph (c) of this section, traveling on Military Air Transport Service aircraft will be limited to 65 pounds of baggage.

(b) *Excess baggage allowance.* An excess baggage allowance may be granted by agencies authorized to establish air movement designators. Excess allowances, when authorized, will be included in individual's orders.

(c) *Baggage allowance exceptions.* (1) A baggage allowance of 100 pounds may be authorized for dependent females and dependent children (male and female) who are traveling to oversea destinations. Any authorized excess baggage will be indicated in the individual's orders.

(2) Military, naval, and air attaches and mission personnel are authorized a baggage allowance of 100 pounds while traveling to oversea destination. Any authorized excess baggage will be indicated in the individual's orders.

(3) Personnel evacuated as patients by air from an oversea area or within the continental United States are authorized 100 pounds of baggage.

(d) *Baggage not covered by this part.* This part limits only the baggage which may be carried by passengers on Military Air Transport Service aircraft, as provided in this section, and does not limit or increase the baggage which may be transported by other means of transportation on change of station, as prescribed by existing directives.

§ 416.12 *Diversion to commercial carriers.* Diversion of cargo from Military Air Transport Service aircraft and forwarding by commercial carrier to consignee will be in accordance with existing directives.

---

## PART 417—MOVEMENT OF TRAFFIC ON OTHER THAN MILITARY AIR TRANSPORT SERVICE SCHEDULED AIRCRAFT

Sec.

417.1 Purpose and scope.
417.2 Definitions.
417.3 Uniform.
417.4 Authorization.
417.5 Transportation of dependents.
417.6 Service attachés and mission chiefs (including MDAP and other specialized military missions).
417.7 Additional authorizations.
417.8 Travel with reimbursement.
417.9 Authority for certain non-Governmental transportation.
417.10 General policy on non-Governmental transportation.
417.11 Delegation of authority.
417.12 Certification.
417.13 Release from claim for injury or death.

AUTHORITY: §§ 417.1 to 417.13 issued under E. O. 9886, Aug. 22, 1947, 12 F. R. 5689; 3 CFR, 1947 Supp.

DERIVATION: Army Regulations 96-20, OPNAV Instruction 4630.10, Air Force Regulation 76-6, June 11, 1953.

§ 417.1 *Purpose and scope.* This part establishes the policy for the authorization of traffic on aircraft of the Department of Defense other than scheduled aircraft operated by the Military Air Transport Service under the provisions of Part 416 of this title.

§ 417.2 *Definitions*—(a) *Traffic.* Cargo, mail, passengers, and passengers' baggage.

(b) *Revenue traffic.* Traffic for which reimbursement to, or accounting by, the Department of Defense is required.

(c) *Nonrevenue traffic.* Traffic transported in the primary official interest of the Department of Defense.

(d) *Competent authority.* An official bearing the title of commanding officer or higher authority in the chain of command of the Army, Navy, Air Force, Marine Corps, Coast Guard (when assigned to the operational control of the Navy), the Reserve components of the aforementioned organizations and the National Guard.

§ 417.3 *Uniform.* Proper uniform will be worn under all normal conditions. Civilian clothes may be worn in exceptional circumstances when authorized by competent authority.

§ 417.4 *Authorization.* Competent authorities listed in § 417.2 (d) may authorize traffic of the following categories transported on military aircraft without reimbursement. Any traffic transported under the provisions of this part will be properly identified.

(a) Military personnel of the United States (including midshipmen, Army, Navy, Air Force, and Coast Guard cadets) in active Federal Service, while in a duty status or while in a leave status on a space available basis. Orders directing permanent change of station or temporary duty travel, or authorizing leave, will constitute authority.

(b) Military personnel of the National Guard and members of the Reserve components and retired military personnel whose names appear on the published retired list of the Army, Navy, Air Force, Marine Corps, or Coast Guard: Upon presentation of orders issued by competent authority or presentation of proper identification on a space-available basis within the zone of the interior after all priority requirements have been satisfied. The certificate required by § 417.12 must be executed. Proper identification for the services is as follows:

| Service | Reserve | Retired |
|---|---|---|
| Army | NME 2A (Reserve) Form DD2A (Reserve) | Form DD2A (Retired). |
| Navy | Form DD2N (Inactive) | Form DD2N (Inactive) |
| Marines | NavMc 178 PD. | Form DD2MC |
| Coast Guard | Form DD2CG (Inactive) | Form DD2CG (Retired) |
| Air Force | Form DD2AF (Reserve). | Form DD2AF (Retired). |

(c) State National Guard officials, including State governors, Lieutenant governors, and adjutants general when the travel within the zone of interior is connected directly with the National Guard activities. Other persons as specified by the above when prior approval has been obtained from the Chief of Staff, Army; Chief of Naval Operations; or Chief of Staff, United States Air Force.

NOTE: Provisions governing passengers in National Guard aircraft will be promulgated by the Chief, National Guard Bureau.

(d) Reserve Officer's Training Corps students of the Army, Navy, and Air Force, as follows:

(1) Summer camps: Reserve Officer's Training Corps students of the Army, Navy, and Air Force at summer camps or on active training duty on authorized flights upon approval of Reserve Officer's Training Corps camp commander or upon presentation of orders from competent authority.

(2) During school year, provided that:

(i) Aircraft is on an authorized local flight.

(ii) Students are undergoing formal Reserve Officer's Training Corps and academic training during a regular school term and the flight is in connection with this training.

(iii) Students are in proper uniform.

(e) Civil Air Patrol personnel, as follows:

(1) Civil Air Patrol senior members are authorized to be carried as passengers in military aircraft when engaged in the performance of official Civil Air Patrol duties, upon presentation of orders authorized by the National Commander, Civil Air Patrol, and provided

that such transportation does not interfere with normal military activities.

(2) Civil Air Patrol cadets participating in Civil Air Patrol activities when authorized by the National Commander, Civil Air Patrol. Normally, flights will be of local orientation type not involving special hazard, and will be accomplished to permit Civil Air Patrol cadets to travel as passengers on routine training flights without additional expense to the Government.

(f) Properly registered (senior) explorers of the Boy Scouts of America participating in scout activities on local orientation flights, provided that:

(1) Multiengine aircraft is used.

(2) Each explorer presents, through his local scout executive, a completed Boy Scouts of America Form O–1518, Recognition and Approval for Senior Explorers Orientation Flights, which includes a statement of parents' or guardian's consent.

(3) Prior approval is obtained from the Chief of Naval Operations for Navy aircraft.

(g) Persons holding the Congressional Medal of Honor, on space-available basis within the zone of interior upon presentation of proper identification and valid authorization card issued by either the Departments of the Army, Navy, or Air Force. (The certificate required by § 417.12 must be executed.)

(h) Red Cross personnel and personnel of other nationally recognized welfare agencies when serving with the armed services in the field, provided that they are in uniform and when such flights are in the performance of their official duties.

(i) Commissioned officers of the Public Health Service detailed for duty with the Army, Navy, Air Force, or Coast Guard, while in a duty status.

(j) Any person in case of an emergency involving catastrophe or possible loss of life, or in an emergency when other means of suitable transportation are not available, feasible, or adequate.

(k) Any person deputized to participate in fighting forest fires or engaged in disaster relief activities upon request of the responsible Federal or State agency.

(l) Any person when the travel is necessary for the preservation of peace, order, and safety of the Nation when such travel is requested by the responsible Federal or State officials.

(m) Civilian employees of the Department of Defense, of other Government agencies, of Government contractors, and technical advisers to military authorities when engaged in activities for the Department of Defense and traveling on official orders.

(n) Certain Canadian military personnel and civilian employees of the Canadian Defense establishment when traveling on official Canadian orders in accordance with Joint Canadian-United States Reciprocal Agreement on air transportation.

(o) British, Canadian, and Australian exchange officers on duty with the Army, Navy, or Air Force while in a duty status, upon presentation of orders issued by competent authority. These officers may be authorized space-available transportation while in a leave status, upon presentation of proper identification.

(p) Cargo and mail:

(1) Cargo and mail of the Department of Defense.

(2) Cargo of the American Red Cross for use by the Department of Defense.

(3) Any cargo in case of catastrophe, lack of which would cause loss of life when other means of transportation are not available, feasible, or adequate.

§ 417.5 *Transportation of dependents.* The general policy of the Department of Defense is to prohibit travel of dependents in military aircraft unless the travel is performed in connection with permanent change of station assignment of the principal. However, under extenuating circumstances in individual cases certain exceptions may be authorized by the Secretary of Defense, Secretaries of the Military departments, Chairman of the Joint Chiefs of Staff, Chief of Staff, United States Army; Chief of Naval Operations; Chief of Staff, United States Air Force; and the Commandant of the Marine Corps to allow accompanying travel of dependents on a space-available basis.

§ 417.6 *Service attachés and mission chiefs (including MDAP and other specialized military missions).* Attachés and military mission chiefs are authorized to permit personnel of the following categories to ride as passengers in attaché or mission aircraft on a space-available nonreimbursable basis within their sphere of accreditation:

(a) Individuals listed in, and under the conditions of, § 417.4.

(b) United States ambassadors and ministers, or in their absence chargé d'affaires, and members of their staffs designated by the ambassador, minister, or chargé d'affaires for the conduct of urgent Government business, except for normal permanent change of stations of such personnel.

(c) Distinguished nationals and members of the armed forces of foreign countries.

(d) Accompanying travel of dependents of attache, mission, or military commission personnel.

(e) *Use of attache aircraft by members of the Congress.* In those instances where Congressional committees or members thereof find it necessary while abroad to request travel in Air Force or Navy aircraft allocated to the attaches or military missions, such trips may be authorized if commercial facilities are not available, if such use of the attache or mission aircraft will not interfere in any way with the normally assigned mission of the aircraft, and provided that the purpose of the trip is specifically indicated by the chairman of the committee or subcommittee or member as being essential to the mission of the committee, subcommittee, or member. Immediately after such flights the attache will report to the Chief of Naval Operations or the Chief of Staff, United States Air Force, as appropriate, the following information:

(1) Explanation of circumstances which made the flight desirable.

(2) Dates of departure and return.

(3) List of passengers, with justification for presence of each.

(4) Destination of passengers.

(5) Stops en route and reasons therefor.

(f) Prior approval for travel outside the sphere of accreditation for all passengers not included in § 417.4 must be obtained from the Chief of Staff, United States Army; Chief of Naval Operations; or Chief of Staff, United States Air Force.

§ 417.7 *Additional authorizations.* (a) Within the limitations imposed by public law and joint regulations, the Chief of Staff, United States Army; Chief of Naval Operations; Chief of Staff, United States Air Force, or the commander of any oversea echelon reporting direct to the Departments of the Army, Navy, or Air Force may authorize the following transportation without reimbursement: Any traffic, when the transportation is primarily of official concern to the Department of Defense. While nothing contained herein is intended to infringe upon the prerogatives of theater commanders, no such transportation will be authorized unless it is of direct concern to the Department of Defense and is required for the accomplishment of a military mission.

(b) The Secretary of Defense will act on all requests for nonreimbursable transportation received from the following Federal officials: (Requests received by subordinate commands for transportation of officials or accompanying travel of dependents will be forwarded to the appropriate military department for action.)

(1) Officials of other executive departments or agencies or the judicial branch.

(2) Officials of the legislative branch, except as provided in § 417.6 (e).

NOTE: Members of Congress who hold valid Reserve status in the Army, Navy, Air Force, Marine Corps, or Coast Guard may continue to utilize air transportation in accordance with the provisions of § 417.4.

(c) Commands listed in § 417.11 may authorize nonreimbursable travel for:

(1) Representatives of information media (that is, press, radio, news, and so forth) on assignments to cover military events upon approval from the department concerned. (In addition, these representatives may be furnished transportation in the event of spot news stories of transcendent National interest for which commercial or charter facilities cannot be obtained.)

(2) Inspection personnel of the Civil Aeronautics Administration when engaged in the examination of rated pilot personnel of the armed services for civil pilot certificates or ratings.

(d) Cases arising at Army, Navy, or Air Force installations not covered by this part will be referred to the Chief of Staff, United States Army; Chief of Naval Operations; or Director of Transportation, Headquarters United States Air Force, Washington 25, D. C., depending on the installation involved, with complete information for decision.

§ 417.8 *Travel with reimbursement.* In cases not covered by other authority in this part, the Departments of the Army, the Navy, and the Air Force may provide air transportation with reimbursement therefor, and subject to other restrictions, in accordance with the provisions of applicable law, when the traffic is of official concern to the executive departments or agencies, or to the legislative or judicial branches of the Government. Requests for transportation in this category should be directed to the departments concerned with procurement authority chargeable or a clear indication of the method by which reimbursement is to be accomplished.

§ 417.9 *Authority for certain non-Governmental transportation.* To facilitate Department of Defense operations at home and abroad, non-Governmental passengers and cargo not within the scope of the foregoing provisions may be furnished air transportation by the Departments of the Army, the Navy, or the Air Force to or from places outside the continental United States, with reimbursement therefor, at not less than current commercial rates (including taxes) on certification by the head of the interested executive department or agency that the furnishing of such transportation is in the National interest. In cases covered in this section it will be within the purview of the Secretary of the Army, the Navy, or the Air Force to refuse to authorize the transportation, if considered advisable.

§ 417.10 *General policy on non-Governmental transportation.* As a general policy, the aviation organizations of the armed forces shall not be placed in a position of competing with United States commercial transportation. Therefore, in no case will air transportation under the provisions of §§ 417.8 and 417.9 be provided on any given route, if, in the opinion of the Departments of the Army, Navy, or Air Force, United States civil air carriers adequate to handle the traffic are in operation on the route.

§ 417.11 *Delegation of authority.* The following commands may authorize nonreimbursable travel for the individuals listed in § 417.7 (c).

Department of the Army: Chief of Staff, United States Army; Commanding Generals, Oversea Commands; Commanding Generals, Continental Armies and Military District of Washington; Chief, Army Field Forces.

Department of the Navy: Chief of Naval Operations; Commanders-in-Chief of Fleets; Commandant, U. S. Marine Corps; Commanding Generals, Fleet Marine Forces; Commanding Generals, Air Fleet Marine Forces; Commander, Air Force, Atlantic Fleet; Commander, Air Force, Pacific Fleet; Chief of Naval Air Training; Commanders, Sea Frontiers; Commandants, Naval Districts and River Commands; Commandant, Coast Guard (when assigned Navy for operational control); Naval Force Commanders.

Department of the Air Force: Chief of Staff, United States Air Force; Commanders, Major Air Commands, Zone of Interior and Overseas, Commander, Civil Air Patrol, United States Air Force.

Delegation of this authority below these listed commands is not authorized.

§ 417.12 *Certification.* In all cases when transportation is authorized in accordance with § 417.4 (b), (g), and (h), the following certificate will be accomplished for each individual.

I, ----------, hereby certify that my request for, and acceptance of, transportation via military aircraft is not for personal gain nor will the business conducted in connection with this trip result in any form of remuneration to the undersigned.

## TITLE 36—PARKS, FORESTS, AND MEMORIALS

### Chapter I—National Park Service, Department of the Interior

PART 20—SPECIAL REGULATIONS

DEATH VALLEY NATIONAL MONUMENT

Section 20.26, entitled *Death Valley National Monument*, is amended to read as follows:

§ 20.26 *Death Valley National Monument*—(a) *Mining.* Mining in Death Valley National Monument is subject to the following regulations, which are prescribed to govern the surface use of claims therein:

(1) The claim shall be occupied and used exclusively for mineral exploration and development and for no other purpose except that upon written permission of an authorized officer or employee of the National Park Service the surface of the claim may be used for other specified purposes, the use to be on such conditions and for such period as may be prescribed when permission is granted.

(2) The owner of the claim and all persons holding under him shall conform to all rules and regulations governing occupancy of the lands within the National Monument.

(3) The use and occupancy of the surface of mining claims as prescribed in subparagraphs (1) and (2) of this paragraph shall apply to all such claims located after the date of the act of June 13, 1933 (48 Stat. 139; 16 U. S. C. 447), within the limits of the National Monument as fixed by Proclamation No. 2028 of February 11, 1933, and enlarged by Proclamation No. 2228 of March 26, 1937, and to all mining claims on lands hereafter included in the National Monument, located after such inclusion, so long as such claims are within the boundaries of said Monument.

(4) Prospectors or miners shall not open or construct roads or vehicle trails without first obtaining written permission from an authorized officer or employee of the National Park Service. Applications for permits shall be accompanied by a map or sketch showing the location of the mining property to be served and the location of the proposed road or vehicle trail. The permit may be conditioned upon the permittee's maintaining the road or trail in a passable condition as long as it is used by the permittee or his successors.

(5) From and after the date of publication of this section, no construction, development, or dumping upon any location or entry, lying wholly or partly within the areas set forth in subdivisions (i) to (iii) of this subparagraph, shall be undertaken until the plans for such construction, development, and dumping, insofar as the surface is affected thereby, shall have been first submitted to and approved in writing by an authorized officer or employee of the National Park Service: *Provided*, That bona fide locations, entries, and patents to which vested rights under the mining laws of the United States exist as of the date of publication of this section, shall not be affected by this subparagraph:

(i) All land within 200 feet of the center line of any public road.

(ii) All land within the smallest legal subdivision of the public land surveys, containing a spring or water hole, or within one quarter of a mile thereof on unsurveyed public land.

(iii) All land within any site developed or approved for development by the National Park Service as a residential, administrative, or public campground site. Such sites shall include all land within

the exterior boundaries thereof as conspicuously posted or, if not so posted, all land within 1,000 feet of any federally owned buildings, water and sewer systems, road loops, and camp tables and fireplaces set at designated camp sites.

(b) *Use of water.* No works or water system of any kind for the diversion, impoundment, appropriation, transmission, or other use of water shall be constructed on or across Monument lands, including mining claims, without a permit approved by an authorized officer or employee of the National Park Service. Application for such permit shall be accompanied by plans of the proposed construction. The permit shall contain the following conditions: (1) No diversion and use of the water shall conflict with the paramount general public need for such water; (2) such water systems shall include taps or spigots at points to be prescribed by the Superintendent, for the convenience of the public; and (3) all appropriations of water, in compliance with the State water laws, shall be made for public use in the name of the United States and in accordance with instructions to be supplied by an authorized officer or employee of the National Park Service.

(c) *Permits.* Application for any permit required by this section shall be made through the Superintendent of the Monument.

(Sec. 3, 39 Stat. 535, as amended; 16 U. S. C. 3 Interprets or applies sec. 3, 48 Stat. 139; 16 U. S. C. 447)

Issued this 17th day of December 1953.

DOUGLAS MCKAY,
*Secretary of the Interior.*

[F. R. Doc. 53-10607; Filed, Dec. 22, 1953; 8:45 a. m.]

## Chapter II—Forest Service, Department of Agriculture

### PART 231—GRAZING

#### GRAZING PREFERENCES

By virtue of the authority vested in the Secretary of Agriculture by the act of June 4, 1897 (30 Stat. 35, 16 U. S. C. 551), as amended by the act of February 1, 1905 (33 Stat. 628, 16 U. S. C. 472), and the act of April 24, 1950 (64 Stat. 85, 16 U. S. C. 580), Regulation G-4 of the regulations governing the occupancy, use, protection, and administration of the National Forests, which constitutes § 231.4, Chapter II, Title 36, Code of Federal Regulations, is hereby amended to read as follows:

§ 231.4 *Grazing preferences.* (a) The Chief of the Forest Service is hereby authorized to prescribe the conditions under which grazing preferences in the use of the national-forest range may be established and recognized, including:

(1) Establishment of base property and livestock-ownership standards required of grazing-preference holders.

(2) Waiver and transfer of grazing preferences in connection with change of ownership of base property or permitted livestock.

(3) Approval of nonuse of grazing preferences for specified periods.

(4) Establishment of upper limits, for each National Forest or portion thereof, governing size of grazing preferences.

(b) A grazing preference is not a property right. Preferences in the use of national-forest range are approved for the exclusive use and benefit of the persons to whom allowed.

(Sec. 1, 30 Stat. 35, as amended; 16 U. S. C. 551. Interprets or applies sec. 1, 33 Stat. 628, 64 Stat. 85; 16 U. S. C. 472)

In testimony whereof, I have hereunto set my hand and caused the official seal of the Department of Agriculture to be affixed, in the city of Washington, D. C., this 18th day of December 1953.

[SEAL] EZRA TAFT BENSON,
*Secretary of Agriculture.*

# TITLE 38—PENSIONS, BONUSES, AND VETERANS' RELIEF

## Chapter I—Veterans' Administration

### PART 5—CENTRAL COMMITTEE ON WAIVERS AND FORFEITURES AND FIELD COMMITTEES ON WAIVERS

#### MISCELLANEOUS AMENDMENTS

1. In § 5.0, paragraphs (b) and (c) are amended to read as follows:

§ 5.0 *Overpayments that may be considered.* * * *

(b) In any case where a subsistence allowance overpayment that was made to a veteran for any period beginning on or after July 13, 1950, has not been recovered or waived, these committees have jurisdiction under section 7, Public Law 610, 81st Congress, to determine, after a hearing, whether the overpayment was the result of willful or negligent failure of a school to report to the Veterans' Administration, as required by applicable regulation or contract, unauthorized or excessive absences from a course in which the veteran has enrolled or the discontinuance or interruption of a course by the veteran, and to determine the school's liability for such overpayment. As to the liability of the school, a field committee on waivers may make a determination irrespective of amount, but the procedure and principles set forth in § 21.113 of this chapter are for application. In any case referred under said section 7, the committee on waivers will assume jurisdiction over both the school and the veteran and in making a final determination may (1) waive recovery if it finds that relief should be afforded to the veteran pursuant to existing regulations; or (2) determine whether there is negligence and liability as to the school (a finding that the school is not liable will require recovery from the veteran unless the overpayment is waived as to him); or (3) hold both liable if it finds that the veteran is not entitled to relief, and that there was willful or negligent failure on the part of the school. A waiver as to the veteran will automatically preclude recovery from the school. In the event a hearing is not requested, the action of the committee will be based upon the record. Hearings will be held by regional committees on waivers when requested irrespective of the amount involved.

(c) In any case where the provisions of section 266 of the Veterans' Readjustment Assistance Act of 1952 (Public Law 550, 82d Congress) are applicable, the liability of the educational institution or training establishment will be determined according to the provisions of § 21.2304 of this chapter. These committees have jurisdiction to consider all overpayments of education and training allowance and are authorized to determine under section 271 of said statute whether recovery of the overpayment or any part thereof may be waived as to the veteran. The finance activity in submitting such cases for consideration and the committee on waivers or the central committee on waivers and forfeitures in its decision will be guided by established procedure and policy in regard to overpayments. As to the liability of the educational institution or training establishment, a field committee on waivers may make a determination irrespective of amount, subject to the procedure and principles prescribed by § 21.2304 of this chapter.

* * * * *

2. Section 5.2 is revised to read as follows:

§ 5.2 *Scope of decisions.* The jurisdiction of committees on waivers, including the central committee on waivers and forfeitures, is limited to consideration of waiver or nonwaiver and to questions of liability on the part of educational institutions or training establishments as provided in § 5.0 (b) and (c). A decision of nonwaiver by a committee leaves to the finance or accounting officers the manner of recovery or collection. It is within the discretion of such committees to waive recovery as to certain persons and decline to waive recovery as to certain other persons whose claims are based on the same veteran's service. It is also within the discretion of the committees to waive or decline to waive recovery from specific benefits or sources, except that a committee shall not waive recovery out of insurance of an indebtedness secured thereby, i. e., an insurance overpayment or illegal payment made to the insured, although in appropriate cases it is proper to waive recovery of any or all of such indebtedness out of benefits other than insurance benefits then or thereafter payable to the insured.

3. In § 5.10, paragraphs (b) (3) and (e) are amended to read as follows:

§ 5.10 *Central committee on waivers and forfeitures.* * * *

(b) * * *

(3) All cases in which there is a provision for an administrative review pursuant to § 5.13 (a) or (b).

* * * * *

(e) A decision by the central committee, rendered by the concurrence of three members, including the chairman or alternate chairman, shall be final but, except as to the determinations specified in § 5.13 (b), shall be subject to an appeal to the Board of Veterans Appeals in accordance with existing appeals regulations and procedure. The central committee shall render a final decision on any request for an administrative review of a determination that an educational institution or training establishment is liable under section 7, Public Law 610, 81st Congress or section 266, Public Law 550, 82d Congress, for an overpayment of subsistence allowance or educational and training allowance; and any such decision shall be valid if it is concurred in and signed by any two members of the specially constituted review section that is designated in § 5.13 (b).

* * * * *

4. Sections 5.12 and 5.13 are revised to read as follows:

§ 5.12 *Jurisdiction of committees in field offices.* (a) Where the amount involved is not more than $500 and the case is properly before the committee under applicable Veterans' Administration regulations and administrative issues a district or regional committee on waivers has authority to render a decision on an overpayment or other indebtedness. Such decision is final, subject however to the right of the committee to reverse or modify its own decisions upon the receipt of new and material evidence or upon a showing of clear and unmistakable error; and subject further to the administrative review jurisdiction of the central committee on waivers and forfeitures when a request for administrative review is duly filed and except as to determinations under paragraph (c) of this section to an appeal to the Board of Veterans Appeals by a veteran or his dependent, or one so claiming, pursuant to established appeal procedure. No committee on waivers is authorized to reverse or modify a decision rendered by a committee on waivers of another field office or by the central committee on waivers and forfeitures.

(b) Except as to the cases referred to in paragraph (c) of this section, where the amount of the overpayment or other indebtedness is more than $500, it shall be referred by the committee on waivers to the central committee on waivers and forfeitures, without rendering a decision, but such committee on waivers shall furnish a brief setting for a complete statement of facts, and its recommendations as to the decision, with reasons supporting the recommendations.

(c) Determinations as to the liability of educational institutions or training establishments under section 7, Public Law 610, 81st Congress or section 266, Public Law 550, 82d Congress, shall be made by the field committees on waivers where the question has been properly submitted, regardless of whether the amount of the overpayment is more than $500, but where the amount is more than $2,500 there must be an administrative review as prescribed by §§ 21.113 and 21.2304 of this chapter.

§ 5.13 *Administrative reviews.* The central committee on waivers and forfeitures has authority to make administrative reviews of decisions of committees on waivers.

(a) Except as provided in paragraph (b) of this section a request for an administrative review of a decision of a committee on waivers may be made by (1) the claimant, his guardian, his agent duly authorized over the claimant's signature, or (2) on the part of the Veterans' Administration, by the manager of the district or regional office. The request must be in writing and, unless the committee extends the time, shall be presented within 60 days from receipt of notice of the field committee's action. An additional period of 30 days may be granted when, in the committee's judgment, exceptional circumstances justify. A decision rendered upon administrative review by the central committee on waivers and forfeitures shall be subject to the right of any Deputy Administrator or Assistant Deputy Administrator concerned or the General Counsel to appeal to the Administrator of Veterans Affairs within 1 year from the date thereof with decisions to be made by the Board of Veterans Appeals.

(b) The central committee on waivers and forfeitures has authority to act for the Administrator of Veterans Affairs in making administrative reviews of determinations by a committee on waivers that an educational institution or training establishment is, or is not, liable under section 7, Public Law 610, 81st Congress, or section 266, Public Law 550, 82d Congress for an overpayment to a veteran or to a dependent of a veteran.

(1) There is established in the central committee on waivers and forfeitures a specially constituted review section which will be comprised of three members, one of whom is to be designated by the chairman, central committee on waivers and forfeitures, one by the Assistant Deputy Administrator for Vocational Rehabilitation and Education, and one by the General Counsel. This section will function under the jurisdiction of the chairman of the central committee on waivers and forfeitures who will preside over the meetings of said section or will designate one member to preside in his stead, to be known as an alternate chairman. An administrative review decision under this paragraph will be valid if it is concurred in and signed by any two members of the review section. The section that is constituted in this paragraph will have jurisdiction to conduct administrative reviews of the decisions of the regional committee on waivers in:

(i) Any case in which the decision of the regional committee is not unanimous.

(ii) Any case in which a request for administrative review is filed by the school or training establishment and received by the Veterans' Administration regional office within 60 days from the date notice of the decision is mailed to the school or training establishment, or within 90 days if the committee considers that this extension of time is warranted. Such request shall be in writing setting forth fully all of the contentions and errors relied upon. A hearing, if requested, will be granted by the regional committees but no expenses of claimant or his witnesses, if any, are payable by the Veterans' Administration.

(iii) Any case in which an administrative review is requested by the regional manager of the office concerned or by the Assistant Deputy Administrator for Vocational Rehabilitation and Education within the time limits specified in subdivision (ii) of this subparagraph.

(iv) Any case in which the central committee on waivers and forfeitures determines on its own motion that an administrative review is warranted.

(v) Any case involving over $2,500.

(2) The review section will notify the Veterans' Administration regional office of original jurisdiction and the school or training establishment of its decision. The decision of the review section will serve as authority for the finance activity to institute collection proceedings, if appropriate, or to discontinue collection proceedings instituted on the basis of the original decision of the regional committee on waivers in any case where the review section of the central committee reverses a finding made by the regional committee that the school or training establishment was liable.

(3) The review section may review and modify its decision upon submission of new and material evidence. The regional committee will forward such evidence with its recommendation as to the effect, if any, thereof.

(Sec. 5, 43 Stat. 608, as amended, sec. 2, 46 Stat. 1016, sec. 7, 48 Stat. 9, 38 U. S. C. 11a, 426, 707. Interpret or apply secs. 28, 504, 43 Stat. 615, 629, as amended, sec. 4, 46 Stat. 529, as amended, secs. 11, 15, 48 Stat. 10, 11, sec. 9, 50 Stat. 662, sec. 1, 53 Stat. 1252, secs. 1, 609, 54 Stat. 1193, 1013, secs. 1, 4, 57 Stat. 554, 555, sec. 1500, 58 Stat. 300, sec. 1, 60 Stat. 908, sec. 9, 65 Stat. 35, Vet. Reg. 1 (a), Part VIII, as amended, secs. 270, 271, 66 Stat. 681; 38 U. S. C. 33, 36, 453, 507a, 510, 555, 697, 715, 717 note, 727, 728, 739, 809, 858, ch. 12 note)

This regulation is effective December 23, 1953.

[SEAL] H. V. STIRLING,
*Deputy Administrator.*

### PART 6—UNITED STATES GOVERNMENT LIFE INSURANCE

### PART 8—NATIONAL SERVICE LIFE INSURANCE

#### REENTRANCE ON ACTIVE SERVICE FOR PURPOSES OF PREMIUM WAIVER

1. In Part 6, paragraph (f) of § 6.185 is amended to read as follows:

§ 6.185 *Premium waiver on United States Government life insurance under section 622 of the National Service Life Insurance Act, as amended.* * * *

(f) If an insured reenters active service during the 120-day period following separation from active service and premiums on his United States Government life insurance are being waived under this section on the date of reentry, such reentrance for the purposes of premium waiver under section 622 shall be deemed to be a continuation of the previous active service. In such cases the waiver of premiums under this section will continue during the insured's continuous active service following reentry and 120 days thereafter unless otherwise termi-

nated in accordance with the provisions of this section.

* * * * *

(Sec. 5, 43 Stat. 608, as amended, sec. 2, 46 Stat. 1016, sec. 7, 48 Stat. 9, sec. 6, 65 Stat. 35; 38 U. S. C. 11a, 426, 707, 855. Interprets or applies secs. 300, 301, 43 Stat. 624, as amended; 38 U. S. C. 511, 512)

2. In Part 8, paragraph (f) of § 8.113 is amended to read as follows:

§ 8.113 *Premium waiver under section 622 of the National Service Life Insurance Act, as amended.* * * *

(f) If an insured reenters active service during the 120-day period following separation from active service and premiums on his National Service life insurance are being waived under this section on the date of reentry, such reentrance for the purposes of premium waiver under section 622 shall be deemed to be a continuation of the previous active service. In such cases the waiver of premiums under this section will continue during the insured's continuous active service following reentry and 120 days thereafter unless otherwise terminated in accordance with the provisions of this section.

* * * * *

(Sec. 608, 54 Stat. 1012, as amended, sec. 6, 65 Stat. 35; 38 U. S. C. 808, 855. Interprets or applies sec. 602, 54 Stat. 1003, as amended; 38 U. S. C. 802)

This regulation is effective December 23, 1953.

[SEAL] H. V. HIGLEY,
*Administrator of Veterans Affairs.*

## PART 21—VOCATIONAL REHABILITATION AND EDUCATION

### SUBPART A—EDUCATIONAL BENEFITS

OVERPAYMENTS OF SUBSISTENCE ALLOWANCE AND OTHER BENEFITS; REPAYMENT OF VALUE OF TRAINING SUPPLIES

1. Section 21.113 is revised to read as follows:

§ 21.113 *Overpayments of subsistence allowance and other benefits—(a) Bar against further education or training on account of outstanding overpayments.* Where a veteran has failed to make arrangements with the finance activity to restore or refund an outstanding overpayment of benefits made under Veterans' Administration laws, and due the Government, the educational benefits activity may not thereafter reenter the veteran into training. In any such instance, the educational benefits activity will be responsible for giving proper notification to the veteran and the institution.

(b) *Liability of institution on account of outstanding overpayments to veterans pursuant to section 7, Public Law 610, 81st Congress (This does not cover damages for breach of contract).* (1) Section 7, Public Law 610, 81st Congress, provides:

Paragraph 5 of Part VIII, Veterans Regulation Numbered 1 (a), as amended, is hereby amended by inserting "(a)" immediately after "5", and adding a new subparagraph (b) as follows:

(b) In any case where it is found that an overpayment to a veteran of subsistence allowance (which overpayment has not been recovered or waived) is proved in a hearing before the committee on waivers of the appropriate Veterans' Administration regional office to be the result of willful or negligent failure of the school to report, as required by applicable regulation or contract, to the Veterans' Administration unauthorized or excessive absences from a course, or discontinuance or interruption of a course by the veteran, the amount of such overpayment shall, at the discretion of the Administrator, constitute a liability of the school for such failure to report, and may be recovered by an off-set from amounts otherwise due the school or in other appropriate action: *Provided*, That any amount so collected shall be reimbursed if the overpayment is received from the veteran. This amendment shall be construed as applying only to matters arising after the effective date of this amendment, and shall not preclude the imposition of any civil or criminal action under any other statute.

(2) Question of waiver, or nonwaiver, as to veterans is governed by existing Veterans' Administration Regulations and instructions concerning waiver of overpayments. A school may be found liable or not liable for an overpayment of subsistence allowance. However, there is no authority to waive the liability of a school.

(3) Overpayments to a veteran (if not waived as to, or recovered from him), as set forth in subparagraph (1) of this paragraph, shall constitute a liability of the school if it is found that they were caused by failure to report, which was due to:

(i) Willfulness on the part of an official or employee of the institution; or

(ii) The result of collusion of an official or an employee of the institution and the veteran; or

(iii) Negligence on the part of the institution in failing to make report; or

(iv) Failure of the school to establish proper procedures to detect unauthorized or excessive absences from a course, or the discontinuance or interruption of a course by the veteran.

(4) Liability of the school for overpayments to veterans will not be established if it be found that notwithstanding they were caused by failure to report, there were adequate reasons or mitigating circumstances showing absence of negligence such as:

(i) The institution has an operating procedure that is adequate for reporting to the Veterans' Administration timely and pertinent information notwithstanding which isolated instances occur of failure to submit a notice promptly.

(ii) Notification to the Veterans' Administration was executed and signed by an official of the school, but the report was delayed through inadvertent failure of an employee to place it in the mails or to otherwise properly forward it to the Veterans' Administration.

(iii) The failure to report was due to a mere clerical or human error.

(iv) There had occurred no prior overpayment resulting from failure of the school to promptly submit a required report and it is shown that the school had not received a copy of the governing regulations or other notice in writing (in addition to the notice given by provisions of the contract or the statute) of its responsibility to make prompt reports.

(5) The determination as to liability will be made after notice to the school of intent to apply the liability provisions of section 7, Public Law 610, or, if the school files written request for a hearing within 30 days of receipt of such notice, after such formal hearing has been afforded.

(6) There is hereby delegated to the committee on waivers of the regional office of jurisdiction the authority to determine the existence or nonexistence of liability under the criteria set forth in this paragraph, subject to the provisions of paragraph (e) of this section.

(c) *Reimbursement to institution.* In any case wherein an overpayment of subsistence allowance has not been waived or recovered from the veteran and has been fully recovered from the school, any future recovery from the veteran is to be refunded to the school. If such a veteran subsequently makes arrangement with the finance officer to restore the amount of overpayment to the Veterans' Administration, for example, a veteran who wishes to reenter a course of education or training, any amount so recovered will be reimbursed to the school.

(d) *Responsibility of the educational benefits section.* The educational benefits section will be responsible for determining whether there is prima facie evidence to indicate that an overpayment of subsistence allowance is the result of willful or negligent failure on the part of the school to report to the Veterans' Administration unauthorized or excessive absences from the course, or discontinuance or interruption of a course by the veteran. Only those cases in which adequate prima facie evidence is of record will be referred to the finance division and the committee on waivers for possible recovery action against the school.

(e) *Administrative review.* (1) There is established in the central committee on waivers and forfeitures a specially constituted review section which will be comprised of three members, one of whom is to be designated by the chairman, central committee on waivers and forfeitures, one by the Assistant Deputy Administrator for Vocational Rehabilitation and Education, and one by the General Counsel. This section will function under the jurisdiction of the chairman of the central committee on waivers and forfeitures who will designate one member to preside over the meetings of said section to be known as an alternate chairman. An administrative review decision under this paragraph will be valid if it is concurred in and signed by any two members of the review section. The review section that is constituted in this section will have jurisdiction to conduct administrative reviews of the decisions of the regional committee on waivers in:

(i) Any case in which the decision of the regional committee is not unanimous.

(ii) Any case in which a request for administrative review is filed by the school and received by the Veterans' Administration regional office within 60 days from the date notice of the decision holding the school liable for the overpayment is mailed to the school, or within 90 days, if the committee considers that this extension of time is warranted. Such request shall be in writing setting forth fully all of the contentions and errors relied upon. A hearing, if requested, will be granted by the regional committee but no expenses of claimant or his witnesses, if any, are payable by the Veterans' Administration.

(iii) Any case in which an administrative review is requested by the regional manager of the office concerned or by the Assistant Deputy Administrator for Vocational Rehabilitation and Education, within the time limits specified in subdivision (ii) of this subparagraph.

(iv) Any case in which the Central Committee on Waivers and Forfeitures determines on its own motion that an administrative review is warranted.

(v) Any case involving an amount in excess of $2,500.

(2) The review section will notify the Veterans' Administration regional office of jurisdiction and the school of its decision. The decision of the review section will serve as authority for the finance activity to institute collection proceedings, if appropriate, or to discontinue collection proceedings instituted on the basis of the original decision of the regional Committee on Waivers, in any case where the review section of the central committee reverses a finding made by the regional committee that the school was liable.

(3) The review section may review and modify its decision upon submission of new and material evidence, provided such evidence is forwarded by the school to the Veterans' Administration regional office within 30 days of the date on which notice of the review section's decision was mailed to the school. The regional committee will forward such evidence with its recommendation as to the effect, if any, thereof.

(f) *Contractual liability.* Nothing in the statute or the regulations of this section changes any liability arising under contracts during any period prior to July 13, 1950.

(g) *Contracts between a State or political subdivision of a State and the Veterans' Administration.* Notwithstanding the criteria contained in paragraphs (a) through (f) of this section for determination of liability of an institution it is provided by Public Law 149, 83d Congress, that under any contract between a State, or any political subdivision of a State, and the Veterans' Administration providing for the furnishing of instruction in a course of institutional on-farm or other training under Part VIII of Veterans Regulation 1 (a), as amended (Public Law 346, 78th Congress, as amended, 38 U. S. C. ch. 12), liability by reason of payments of subsistence allowance which were illegal because of failure of the veteran or the course to comply with the applicable statutory, regulatory, or contractual requirements shall not be applied to the contracting State, or political subdivision, unless the Veterans' Administration, after investigation, finds that an employee or representative of such State, or political subdivision, conspired with the veteran by, or was guilty of fraud or gross negligence in, falsely reporting to the Veterans' Administration that the veteran was in a proper course of training, failing to report unauthorized or excessive absences from, or interruption of discontinuance of, his course of training, or not discovering the failure of the veteran to comply with the applicable statutory, regulatory, or contractual requirements and not promptly terminating the course of training of the veteran. The provisions of this proviso shall be effective as of July 13, 1950, but shall not require repayment of any funds heretofore properly recovered by agreement of the parties to any such contract, and shall not be applicable to any other liabilities or agreements pursuant to such contract.

2. In § 21.114, paragraph (a) is amended to read as follows:

§ 21.114 *Repayment of value of training supplies; Part VIII, Veterans Regulation 1 (a), as amended (38 U. S. C. ch. 12).* (a) Supplies furnished a trainee are deemed released to him and should not be marked to indicate ownership by the United States. A trainee will not be required to repay the value of consumable supplies nor will he be required to pay the reasonable value of nonconsumable supplies in the event he fails to complete his course of education or training if he has turned them in to a school which effects recovery of nonconsumable supplies through contractual arrangements with the Veterans' Administration. In all other cases a trainee will not be required to pay the reasonable value of nonconsumable supplies in the event he fails to complete his course of education or training unless it be determined that his failure to do so was because of fault on his part and, in making such determination, the trainee will be given the benefit of any reasonable doubt. Determination of the presence or absence of fault will be made by the educational benefits representative, and the findings will be filed in the R&E folder.

* * * * *

(Sec. 2, 46 Stat. 1016, sec. 7, 48 Stat. 9, sec. 2, 57 Stat. 43, as amended, sec. 400, 58 Stat. 287, as amended; 38 U. S. C. 11a, 701, 707, ch. 12 note. Interpret or apply secs. 3, 4, 57 Stat. 43, as amended, secs. 300, 1500–1504, 1506, 1507, 58 Stat. 286, 300, as amended; 38 U. S. C. 693g, 697–697d, 697f, g, ch. 12 note)

This regulation is effective December 23, 1953.

[SEAL] H. V. STIRLING,
*Deputy Administrator.*

## PART 21—VOCATIONAL REHABILITATION AND EDUCATION

### SUBPART E—VETERANS' READJUSTMENT ASSISTANCE ACT OF 1952

CONDITIONS GOVERNING PAYMENT OF EDUCATION AND TRAINING ALLOWANCE; LIABILITY OF EDUCATIONAL INSTITUTION OR TRAINING ESTABLISHMENT FOR OVERPAYMENTS

1. In § 21.2051, a new paragraph (b) (1) is added as follows:

§ 21.2051 *Conditions governing payment of education and training allowance.* * * *

(b) * * *

(1) Where the vacation period of the school extends beyond the end of a month, a veteran enrolled in such a school may be permitted to complete his monthly certification of training on the last day of scheduled attendance in that month certifying as to attendance through such date and to submit the form to the school prior to departure for the vacation. In such a case the certification to cover attendance in a nonaccredited course will show the succeeding days in that month as days of nonattendance and the certification covering an accredited course will be deemed to show the veteran to have been enrolled in and pursuing his course to the end of the month, except that in the event training is not resumed after the vacation period interruption will be effective as of the last date of actual attendance. (See § 21.2056 (b) (9).) The same principles will apply in the case of a veteran who completes his final examinations and departs from the school prior to the official closing date of the school term.

* * * * *

2. Section 21.2304 is revised to read as follows:

§ 21.2304 *Liability of educational institution or training establishment on account of overpayments of education and training allowances, section 266, Public Law 550, 82d Congress—(a) Conditions governing determinations of liability of an institution or training establishment for overpayments of education and training allowances to veterans.* (1) Section 266 of Public Law 550, 82d Congress, provides:

In any case where it is found by the Administrator that an overpayment has been made to a veteran as the result of (1) the willful or negligent failure of the educational institution or training establishment to report, as required by this title and applicable regulations to the Veterans' Administration excessive absences from a course, or discontinuance or interruption of a course by the veteran or (2) false certification by the educational institution or training establishment, the amount of such overpayment shall constitute a liability of such institution or establishment, and may be recovered in the same manner as any other debt due the United States: *Provided*, That any amount so collected shall be reimbursed if the overpayment is recovered from the veteran. This provision shall not preclude the imposition of any civil or criminal action under this or any other statute.

(2) Question of waiver, or nonwaiver, as to veterans is governed by existing

Veterans' Administration regulations and instructions concerning waiver of overpayments. A school or training establishment may be found liable or not liable for an overpayment of education and training allowance. However, there is no authority to waive the liability of a school or training establishment. Waiver as to the veteran will not relieve the school or training establishment of liability, but recovery in whole or in part from the veteran will limit such liability accordingly.

(3) Overpayments to a veteran (if not recovered from him), as set forth in subparagraph (1) of this paragraph, shall constitute a liability of the school or training establishment if it is found that they were caused by a false certification by the school or training establishment. Liability resulting from a false certification is not contingent upon willfulness or negligence but simply upon a finding that the overpayment to the veteran resulted from a certification which is contrary to fact.

(4) Liability other than for the submission of a false certification by the school or training establishment shall be imposed for overpayments to a veteran, as set forth in subparagraph (1) of this paragraph, if it is found that they were caused by failure to report excessive absences from a course or the discontinuance or interruption of a course which failure was due to:

(i) Willfulness on the part of an official or employee of the school or training establishment; or

(ii) The result of collusion of an official or an employee of the school or training establishment and the veteran; or

(iii) Negligence on the part of the school or training establishment in failing to make report; or

(iv) Failure of the school or training establishment to establish proper procedures to detect unauthorized or excessive absences from a course, or the discontinuance or interruption of a course by the veteran.

(5) In cases comprehended by subparagraph (4) of this paragraph, the school or training establishment will not be held to have been negligent in failing to report where there exist adequate reasons or mitigating circumstances showing absence of negligence, such as:

(i) The school or training establishment has an operating procedure that is adequate for reporting to the Veterans' Administration timely and pertinent information notwithstanding which isolated instances occur of failure to submit a notice promptly.

(ii) Notification to the Veterans' Administration of a change in a veteran's training status was executed and signed by an official of the school or training establishment, but the report was delayed through inadvertent failure of an employee to place it in the mails or to otherwise properly forward it to the Veterans' Administration.

(iii) There had occurred no prior overpayment resulting from failure of the school or training establishment to promptly submit a required report and it is shown that the school or training establishment had not received a copy of the governing regulations or other notice in writing (in addition to the notice given by the statute) of its responsibility to make prompt reports.

(iv) The failure was due to a mere clerical or human error.

(6) The determination as to whether a school or training establishment is liable will be made after notice to the school or training establishment of intent to apply the liability provisions of section 266, Public Law 550, or, if the school or training establishment files written request for a hearing within 30 days of receipt of such notice, after such formal hearing has been afforded.

(7) Subject to the conditions of paragraph (d) (1) (v) of this section, the committee on waivers of the regional office of jurisdiction is delegated the authority to determine the existence or nonexistence of liability under the criteria set forth in subparagraphs (3) through (6) of this paragraph.

(b) *Reimbursement to school or training establishment.* In any case wherein an overpayment of education and training allowance has not been recovered from the veteran and has been recovered from the school or training establishment, the amount of any such future recovery from the veteran is to be refunded to the school or training establishment. If a veteran subsequently makes arrangement with the finance officer to restore the amount of overpayment to the Veterans' Administration, for example, a veteran who wishes to reenter a course of education or training, any amount so recovered will be reimbursed to the school or training establishment.

(c) *Responsibility of the educational benefits section.* The educational benefits section will be responsible for determining whether there is prima facie evidence that an overpayment of education and training allowance is the result of a false certification by the school or training establishment, or where such is not present for determining whether there is prima facie evidence to indicate that it is the result of willful or negligent failure on the part of the school or training establishment to report to the Veterans' Administration unauthorized or excessive absences from the course, or discontinuance or interruption of a course by the veteran. Where an affirmative finding is made under either condition the case will be referred to the finance division for notification to the school or training establishment, as provided by paragraph (a) (6) of this section, and referral to the regional committee on waivers for determination of liability of the school or training establishment.

(d) *Administrative review.* (1) There is established in the central committee on waivers and forfeitures a specially constituted review section which will be comprised of three members, one of whom is to be designated by the chairman, central committee on waivers and forfeitures, one by the Assistant Deputy Administrator for Vocational Rehabilitation and Education, and one by the General Counsel. This section will function under the jurisdiction of the chairman of the central committee on waivers and forfeitures who will designate one member to preside over the meetings of said section, to be known as an alternate chairman. An administrative review decision under this paragraph will be valid if it is concurred in and signed by any two members of the review section. The section that is constituted in this paragraph will have jurisdiction to conduct administrative reviews of the decisions of the regional committee on waivers in:

(i) Any case in which the decision of the regional committee is not unanimous.

(ii) Any case in which a request for administrative review is filed by the school or training establishment and received by the Veterans' Administration regional office within 60 days from the date notice of the decision is mailed to the school or training establishment, or within 90 days, if the committee considers that this extension of time is warranted. Such request shall be in writing setting forth fully all of the contentions and errors relied upon. A hearing, if requested, will be granted by the regional committee but no expenses of claimant or his witnesses, if any, are payable by the Veterans' Administration.

(iii) Any case in which an administrative review is requested by the regional manager of the office concerned or by the Assistant Deputy Administrator for Vocational Rehabilitation and Education within the time limits specified in subdivision (ii) of this subparagraph.

(iv) Any case in which the central committee on waivers and forfeitures determines on its own motion that an administrative review is warranted.

(v) Any case involving over $2,500.

(2) The review section will notify the Veterans' Administration regional office of original jurisdiction and the school or training establishment of its decision. The decision of the review section will serve as authority for the finance activity to institute collection proceedings, if appropriate, or to discontinue collection proceedings instituted on the basis of the original decision of the regional Committee on Waivers, in any case where the review section of the central committee reverses a finding made by the regional committee that the school or training establishment was liable.

(3) The review section may review and modify its decision upon submission of new and material evidence, provided such evidence is forwarded by the school or training establishment to the Veterans' Administration regional office within 30 days of the date on which notice of the review section's decision was mailed to the school or training establishment. The regional committee will forward such evidence with its recommendation as to the effect, if any, thereof.

(Sec. 261, 66 Stat. 663)

This regulation is effective December 23, 1953.

[SEAL] H. V. STIRLING,
*Deputy Administrator.*

[F. R. Doc. 53-10645; Filed, Dec. 22, 1953; 8:52 a. m.]

## TITLE 47—TELECOMMUNICATION

### Chapter I—Federal Communications Commission

[Docket No. 10637]

PART 3—RADIO BROADCAST SERVICES

COLOR TELEVISION TRANSMISSIONS

In the matter of amendment of the Commission's Rules Governing Color Television Transmissions. By the Commission: Commissioners Webster, Sterling and Lee concurring with separate statements; Commissioner Hennock present but not voting.

1 *Preliminary statement.*

1. On August 7, 1953, the Commission issued a Notice (FCC 53-1015) instituting rule-making proceedings looking toward the adoption of new signal specifications for color television transmissions to replace the present rules and standards. Petitions requesting such action had been filed by the Radio Corporation of America (RCA) and the National Broadcasting Company, Inc. (NBC), jointly; the National Television System Committee (NTSC);[1] the Philco Corporation; Sylvania Electric Products, Inc.; the General Electric Company; and Motorola, Inc. All of the above petitioners urged the adoption of color television signal specifications advanced by the NTSC.

2. In accordance with the Commission's Notice formal comments supporting the adoption of the proposed new signal specifications for color television transmissions were filed by Columbia Broadcasting System, Inc. (CBS); Hazeltine Corporation; Admiral Corporation; Westinghouse Radio Stations, Inc.; and Harry R. Lubcke. In addition, the Commission accepted as comments in the proceeding the petitions referred to above; and NTSC filed additional material in support of the adoption of new rules.

3. Oppositions to the adoption of the signal specifications as proposed were filed by Paramount Television Productions, Inc.; Chromatic Television Laboratories, Inc.; American Television, Inc.; and Marshall Soghoian and S. L. Cooke, Jr.,[2] Richmond, Virginia.

4. We believe that a brief review of prior Commission proceedings and activity relating to color television will be helpful.

5. The Commission has concerned itself with the development of a commercially practicable color television system in formal proceedings since 1940.[3] In addition, the Commission and the industry have conducted studies, investigations, and experimentation in the field of color television. Finally, on October 10, 1950, the Commission adopted Rules and Engineering Standards for color television based upon the "field sequential" system of color television, one of the systems proposed in the hearing in Docket 8736. The Commission found that of the systems then before it only this system produced an acceptable color picture and that neither of the other two systems in that hearing satisfied the Commission's minimum requirements.

6. The field sequential system which the Commission standardized was, however, an incompatible system in the sense that existing receivers could not receive color transmissions in monochrome without adaptation. The Commission recognized the practical difficulties involved in commercializing an incompatible color system and indicated that had a satisfactory compatible system been ready at that time it would certainly have been desirable to adopt it.

7. A number of circumstances, not necessary to detail here, combined to prevent the commercial development of color television on the field sequential standards. The limited amount of commercial color broadcasting on these standards was short-lived, and color television broadcast equipment for the field sequential system has never been produced in quantity and is not now being produced, nor are color transmissions in accordance with the field sequential standards being broadcast or contemplated.

8. When the Commission adopted rules for color television in 1950, it recognized the need for further research and experimentation in this field. In a Public Notice (FCC 51-592) of June 11, 1951, the Commission pointed out that "In a field as relatively new as radio in general and television, in particular, there is always room for genuine programs of experimentation." In that Notice, the Commission stated, however, that in the interests of orderly procedure and stability, the following steps would be required of the proponents of new color systems:

(a) An appropriate petition must be filed requesting rule making proceedings with respect to color television standards.

(b) Representative receiver apparatus must be delivered to the Commission's laboratory at Laurel, Maryland.

(c) A signal must be put on the air in Washington, D. C., for the purpose of demonstrating the system.[4]

(d) The above tests must show to the Commission's satisfaction that the proposed system has a reasonable prospect of satisfying all of the criteria for a color television system set forth in the reports. These criteria are as follows:

(1) It must be capable of operating within a 6-megacycle channel allocation structure.

(2) It must be capable of producing a color picture which has a high quality of color fidelity, has adequate apparent definition, has good picture texture, and is not marred by such defects as misregistration, line crawl, jitter or unduly prominent dot or other structure.

(3) The color picture must be sufficiently bright so as to permit an adequate contrast range and so as to be capable of being viewed under nomal home conditions without objectionable flicker.

(4) It must be capable of operating through receiver apparatus that is simple to operate in the home, does not have critical registration or color controls, and is cheap enough in price to be available to the great mass of the American purchasing public.

(5) It must be capable of operating through apparatus at the station that is technically within the competence of the type of trained personnel hired by a station owner who does not have an extensive research or engineering staff at his disposal and the costs of purchase, operation, and maintenance of such equipment must not be so high as unduly to restrict the class of persons who can afford to operate a television station.

(6) It must not be unduly susceptible to interference as compared with the present monochrome system.

(7) It must be capable of transmitting color programs over inter-city relay facilities presently in existence or which may be developed in the foreseeable future.

9. In the early part of 1950 the NTSC, among other undertakings, commenced studies looking toward the development of a commercially practicable system of color television. The signal specifications now proposed for adoption are the product of a program of study and experimentation lasting for a period of more than two years. The NTSC during this period considered and evaluated several sets of signal specifications which employed various alternative techniques and values. On January 13, 1953, the NTSC adopted the specifications now proposed in this proceeding for field testing purposes. Numerous tests and demonstrations have been conducted to determine whether the signal specifications under consideration satisfy the Commission's criteria for a color television sys-

[1] The NTSC is an association of engineers and scientists interested in the development of television and its members include representatives of many of the companies engaged in the manufacture of television equipment.

[2] Marshall Soghoian and S. L. Cooke, Jr., and Otto Luther, New Preston, Connecticut, proposed alternative color television systems. In a Memorandum Opinion and Order (FCC 53-1325), adopted October 7, 1953, the Commission dismissed these comments insofar as they proposed new color systems on the ground that the proposed color systems did not meet the specified requirements for receiving consideration by the Commission in these proceedings. (The requirements referred to are set forth below in par. 8.)

[3] 1940 (Docket No. 5806); 1944-45 (Docket No. 6651); 1946-47 (Docket No. 7896); 1949-50 (Docket No. 8736 et al.).

[4] Waiver of this requirement was requested. In the Notice of Proposed Rule Making (FCC 53-1015) issued in these proceedings the Commission determined that it was not necessary that a signal be put on the air in Washington prior to the institution of rule making. The Commission stated, however, that it would determine at a later date whether during the course of the proceeding a signal on the air in Washington will be required. It is now our view in light of all the circumstances, and particularly the demonstration held in these proceedings and the broadcast of several color programs in Washington and elsewhere that no useful purpose would be served by requiring petitioners to put a signal on the air in Washington for evaluation in these proceedings.

tem.[3] Subsequent to the adoption of the proposed signal specifications for field testing, shake-down tests were first held to determine whether the specifications merited formal testing. Thereafter, formal tests were held and the data obtained in such tests have been submitted to the Commission in this proceeding.

10. The Commission was kept advised of the progress of the NTSC in this field by means of various reports submitted to the Commission and by attendance at tests and demonstrations. Following a conference with the parties to this proceeding the Commission ordered a demonstration of the color television signal specifications proposed in this proceeding to be held in New York City under the auspices of the NTSC. Programs were transmitted over Stations WNBT (National Broadcasting Company, Inc.), WCBS-TV (Columbia Broadcasting System, Inc.) and KE2XDR (Allan B. DuMont Laboratories, Inc.). The program material consisted of representative indoor and outdoor scenes and color slides and covered a wide range of hue and chroma including strongly contrasting color patterns.

11. Proponents of the new signal specifications for color television, which are urged in place of the present rules governing color transmission, contend that the new signal specifications meet or are capable of meeting all of the Commission's criteria for a satisfactory color system, and that these specifications, in addition, are compatible with the Commission's present rules and standards for monochrome transmission. Thus, RCA-NBC states that all of the criteria are met by the proposed color specifications. Substantially the same position is advanced by Sylvania, Motorola, Admiral, Westinghouse Radio Stations, and by Harry R. Lubcke. NTSC states that the new color specifications meet Commission's criteria (1), (2), (3), (6), and (7); that transmitters and receivers of a number of manufacturers have been successfully demonstrated; but no comment is directed to the possibilities of producing low-cost receiving and transmitting equipment (criteria (4) and (5)). Philco alleges that the new signal specifications meet the Commission's technical criteria but that inexpensive receivers are not now available and the Commission should waive criterion (4). Philco concludes that adoption of these signal specifications will give a strong impetus to the scientists and engineers "to develop a satisfactory color receiving tube, capable of economical mass production, and hence color receivers that will be within the price range of the great mass of the American people." CBS maintains that the new signal specifications do not meet criteria (4) and (5), but that basic changes in circumstances warrant "less rigid application" of the criteria now than in 1950 and 1951, and that adoption of the new specifications will provide a tremendous challenge to the industry to meet the criteria sometime in the future. The views advanced by General Electric were generally similar to those of CBS.

12. Oppositions to the new color specifications have been advanced by Paramount Television Productions, Inc.; Chromatic Television Laboratories, Inc.; American Television, Inc. and Marshall Soghoian and S. L. Cooke, Jr. These oppositions, in common, contend that little basis now exists for a reasonable assurance that receivers under the proposed color specifications will be "cheap enough in price to be available to the great mass of the American purchasing public" and that the Commission should not adopt the proposed color specifications until such assurance is possible.

II. *Evaluation of proposed signal specifications.*

13. The Commission has before it for consideration proposed new signal specifications for color television to replace its present rules and standards governing color television. The standardization of signal specifications for the utilization of radio frequencies is always a grave undertaking with important consequences to the public and the electronics industry. Such standardization for color television is particularly important in view of the emergence of the television service as a powerful medium of mass communications. The ultimate question presented is whether the proposed signal specifications provide a reasonable basis for the development of a color television system in the public interest. In order to aid in the resolution of that question we have in our earlier considerations of the problem formulated certain criteria to serve as guide lines in the evaluation of proposed signal specifications.[4] In the discussion that follows the proposed signal specifications are evaluated in the light of the Commission's criteria based upon the evidence in the record and the observations of the Commission at the demonstrations and at the Commission's laboratory.[5]

14. *Operation within a 6-megacycle channel structure.* The Commission's first criterion for evaluating signal specifications for the transmission of color television is that it must be capable of operating within a 6 megacycle channel allocation structure.[6] The signal specifications now under consideration meet this objective. Within the same bandwidth that had been allocated to monochrome alone, the proposed system has succeeded in adding color information, while maintaining compatibility with present monochrome standards. This has been achieved by "interlacing" the color information with the luminance signal when portrayed on a picture tube in either color or monochrome;[7] and by taking advantage of the relative insensitivity of the eye to changes in hue and saturation in small areas.

15. To "interlace" the color information, a color subcarrier within the 6 megacycle channel is used. The location of this subcarrier is critical in that it must be selected so as[8] to minimize color information visible on monochrome receivers in order to maintain to the greatest extent possible the quality of the monochrome picture. In addition, the location of the subcarrier must be well removed from the picture carrier and sufficiently removed from the sound carrier to avoid interference. The objectives with respect to the location of the subcarrier, although not fully attained, have been met to a satisfactory degree.

16. The second technique relied upon in the NTSC system relates to the demonstrated fact that the eye is much less sensitive to changes in hue and saturation in small areas than it is to changes in brightness. The corollary is that as the size of the viewed object is reduced, the eye becomes progressively color blind so that ability to distinguish hue deteriorates. It follows that the color components of a picture can be transmitted over a narrow band of frequencies since resolution of fine detail is a function of bandwidth. In the NTSC system faithful colors are transmitted over a 0.6 Mc bandwidth while the monochrome or luminance signal is transmitted over a 4.2 Mc bandwidth. In between is a twilight zone where adulterated colors are transmitted. Thus, faithful colors appear in the coarse areas of the picture, adulterated colors in the medium fine detail and only monochrome in the finest detail of the picture. The saving of frequencies resulting from the use of this technique is obtained at a cost in terms of the adverse impact on picture quality, but as indicated below, the overall result meets minimum standards of acceptability.

17. *Quality of the color television picture.* The Commission's second and third criteria relate to the quality of the color television picture in terms of specific characteristics. In the light of the data of record concerning the tests and demonstrations conducted by proponents, and the observations of the Commission at the demonstration in these proceedings and at the Commission's laboratory we are of the view that the color television pictures transmitted are satisfactory and that the signal specifications merit standardization on this score. We have reached this conclusion despite some apparent deficiencies of the color pictures as viewed on presently available receivers. None of the deficiencies present is sufficiently grave, however, to interfere seriously with the overall enjoyment which may be derived from viewing the color pictures. Although the color reproduction is not completely faithful, it is sufficiently accurate to be a pleasing reproduction. The loss in resolution, as compared to monochrome, is offset by the greater realism resulting from the addition of color information. The brightness level on present color equipment, while lower than on monochrome receivers, is nevertheless within the range of acceptability for home viewing.

18. *Receiver apparatus.* The Commission's fourth criterion relates to receiver apparatus and is a two-fold objective. First, the receiver apparatus must be simple to operate in the home and must not have critical registration or color controls, and second, it must be cheap enough in price to be available to the great mass of the American purchasing public.

19. Our evaluation of the receiver apparatus with relation to the first of the foregoing objectives is based on our examination of the receivers furnished by 13 manufacturers for use in the demonstration held in these proceedings and the receivers offered by three manufacturers to the Commission's laboratory and on our consideration of the data submitted in the proceedings. The inherent complexity of the proposed signal specifications is, in large part, reflected in the receiver. The color tube, and the attendant circuitry, is of complicated and intricate design and will impose a substantially greater burden in the servicing and maintenance of the color received as compared with monochrome receivers. The viewer controls on the front panel of the receiver apparatus are relatively simple to operate in light of the complexity of the equipment, and color controls do not appear to be critical. The reception of color television transmissions on color receivers demonstrated and examined does require a finer adjustment of the tuner control than is necessary on a monochrome receiver, for by moving this control too far in either direction, a considerable change can be effected in the color balance of the picture. This necessity for finer tuning, however, does not add significantly to the complexity of operation; and such adjustment would appear to be well within the competence of the normal home viewer. In addition to the controls required for monochrome reception, all of the receivers have an additional "chroma" control which requires adjustment by the viewer. The chroma control, which is not critical, determines the saturation of the colors. At one extreme position, the colors are fully saturated, while at the other extreme position, the colors are washed out. Some of the receivers also have a hue control installed on the front panel of the receiver for adjustment by the viewer. The hue control permits the hue of the picture to be adjusted to the personal taste of the viewer.

20. The data in the record with respect to the estimated price of the receiver is meager. The cost of the tri-color kinescope and the complexity of the attendant convergence circuitry, deflection yoke, and high voltage supply in the receiver, comprise major elements in the price of the color television receiver. RCA-NBC has furnished estimates of receivers based on the use of a 16-inch envelope tri-color tube which has a measured viewing surface of 8½ inches by 11 inches, the equivalent of a 12½ inch monochrome tube.[10] The estimated cost of the 16-inch envelope tube to receiver manufacturers is between $175 and $200. The estimated introductory price of the first color receiver will be between $800, and $1,000. We do not believe that the data in the record are sufficient to support the conclusion that the presently available receiver apparatus is "cheap enough in price to be available to the great mass of the American people" as contemplated in our criteria. However, several manufacturers have expressed their conviction that when color television reaches the mass production stage, substantial reduction in the price of color receivers will follow, as was the case of the monochrome receiver.

21. *Broadcast station apparatus.* The Commission's fifth criterion pertains to apparatus at the broadcast station and, like the criterion relating to receiver apparatus, also is expressed as a two-fold objective. First, the station apparatus must be technically within the competence of the type of trained personnel hired by a station owner who does not have an extensive research or engineering staff at his disposal, and, second, the costs of purchase, operation, and maintenance of such equipment must not be so high as unduly to restrict the class of persons who can afford to operate a television station.

22. Upon the basis of our examination of the data in the record and of our observations, we are of the view that the color signal specifications proposed by petitioners are capable of operating through station apparatus technically within the competence of the type of trained personnel hired by a station owner lacking an extensive research or engineering staff. Clearly, the operation and maintenance of color equipment at the station is more complicated than that employed with monochrome; and in the initial stages, additional training of technical personnel will be required. Nevertheless, it appears that extensive testing of the proposed signal specifications has been satisfactorily carried on by personnel recruited from monochrome operations, and that training of personnel for color operation can be accomplished without undue difficulty.

At a demonstration held in this proceeding, color programs were originated by NBC, DuMont, and CBS. These organizations do, of course, have available to them research and engineering staffs that would not be available to the great majority of other broadcasters. And, for that reason, these organizations may not be considered typical or representative of broadcasters generally for this purpose. At the same time, however, the successful participation of NBC, DuMont, and CBS in the demonstration is somewhat persuasive that color transmissions in accordance with the proposed signal specifications can be accomplished by other broadcasters after adequate training of their technical staffs.

23. With respect to the cost of purchase of color broadcasting equipment, approximate estimated cost figures and production plans have been submitted by RCA-NBC. Such data has been furnished for the following types of television broadcast transmissions: (1) network color programs; (2) color slide programs; (3) color film programs; and (4) local live programs in color. The estimated total price for the required equipment for these transmissions is $187,850. The contemplated equipment for the various types of transmissions, which it is explained will be produced on a custom basis at first, together with the approximate prices for each type of transmission are set out below:

(1) *Network operation only.* The equipment needed to supplement the monochrome facilities of an existing station to enable network programs to be transmitted in color, consist of the following: Color stabilizing amplifiers, tricolor monitor, phase equalizers, miscel-

[3] In order to conduct the field testing of the NTSC signal specifications for color television, Panel 16 was established. The responsibility for insuring "by actual observations during field tests that the proposed standards would result in a signal which will satisfactorily operate color receivers and provide the public with service which, in color, is comparable in performance to that established by the monochrome standards" was delegated to this Panel. At the conclusion of its field test program Panel 16 was composed of 109 engineers. The group averaged from 15 to 20 years' experience and included among its members 18 Fellows and 30 Senior Members of the IRE. The Panel was in existence for more than 2 years and a total of 126 engineers were in some way officially connected with it; and many other persons actively participated in its work as receiver operators, unofficial observers, or in some other capacity. In addition, RCA-NBC held several tests to obtain (1) an engineering evaluation of the proposed specifications by trained technical personnel; and (2) reaction of public opinion with respect to the color picture (conducted by Opinion Research Corporation).

[4] Criteria are set forth above, paragraph 8.

[5] A description of color television transmissions in accordance with the proposed signal specifications is attached hereto in Appendix A.

[6] The amount of picture detail which can be conveyed and the resulting quality of the television picture, is delimited by the bandwidth allocated for the transmission of the video signal. Each time the scanning beam traverses from a light element of the picture to a dark element and returns, a complete cycle of video electrical energy is generated. For technical reasons the 6 mc channel assigned to a television station can only accommodate approximately a 4 mc video bandwidth. If the sole objective to be served were a high quality picture, it would certainly be desirable to increase the video bandwidth to permit transmission of greater picture detail. However, spectrum space is severely limited and the bandwidth of television stations must be determined with a view to the desired number of television stations and the needs of other services.

[7] Color is perceived as a conscious sensation in terms of three major attributes: brightness, hue and saturation. Brightness is a measure of the light intensity radiated or reflected from objects, i. e., their physical "luminance", and is the only attribute exhibited by both colored and non-colored objects. Hue is the most characteristic attribute of color and determines whether the color is red or green or yellow, etc. Finally, saturation distinguishes strong colors from pale colors of the same hue, as red and pink. Saturation may be considered as related to physical "purity" or freedom from dilution with white. It is common knowledge that sunlight is a mixture composed of all the various colors of the rainbow such as red, orange, yellow, green, blue, indigo and violet. It has been found that it is not necessary to mix all the colors of the spectrum to form white light. Three colors properly selected and mixed in proper proportions will form white and most other colors. However, it is not possible to produce colors which are outside the spectrum area included by the primaries. For example, if the three primaries are red, green and blue, it is not possible to produce saturated violet since it is outside the spectrum area included between red and blue. Likewise, if a diluted red or orange were selected as one of the primaries, it would not be possible to obtain a saturated red.

[8] No estimates have been furnished on the price of receivers with larger tubes.

laneous parts, extra side-band filter, and test equipment. The approximate total cost for this equipment would be $24,500.

(2) *Color slides.* The additional equipment required to permit stations to transmit color slides would be the following: Color slide camera, color frequency standard, burst flag generator, colorplexer, modification kit for sync generator, and miscellaneous parts and test equipment. The approximate total cost for this equipment would be $43,250.

(3) *Color film.* The additional equipment required by a station already equipped for Stage 2 to broadcast color motion pictures would be the following: 16 mm film chain and miscellaneous equipment. The approximate total cost for such additional equipment would be $50,600.

(4) *Live pick-up.* The additional equipment required by a station already equipped for either Stage 2 or 3 in order to broadcast simple live programs with one camera would be the following: Three-tube color camera and associated control and miscellaneous equipment. The approximate total cost of such equipment would be $69,500. This figure, it should be understood, is based on the utilization of one camera, which is minimum equipment. Generally, two or more cameras are required for the origination of live broadcasts. In addition, price quotations have not been furnished for remote pick-up equipment.

24. The data in the record is meager relating to the cost of the above equipment and the costs figures submitted, it should be emphasized, represent only estimates on the basis of present conditions. This data indicates that the costs entailed in originating live color programs with present equipment will substantially increase the station's costs above that necessary for monochrome transmissions. However, it is our view that once commercial production designs are finalized and the production level for such equipment is increased, substantial reductions in the costs of such equipment will be feasible. We believe, also, upon our consideration of the evidence in the record, that the future holds promise for the development of cheaper apparatus.

25. Operation and maintenance of color television equipment at the transmitter and the studio concededly will be more complicated than that necessary at a comparable monochrome station. It appears that additional equipment and personnel will be required for the operation and maintenance of the transmitter since it will be necessary to maintain a more careful alignment of the transmitter than is generally required for monochrome transmissions. In addition, where live programs in color are originated by the station, additional personnel will be required to be assigned to each color television camera as video control technicians, and one or more additional persons might be required at the studio for other purposes.

26. *Interference characteristics.* The Commission's sixth criterion is that the color system must not be unduly susceptible to interference as compared with the present monochrome system. It is apparent from the tests that have been conducted that susceptibility to interference is related to the signal specifications, but, in addition, it is influenced by equipment design particularly in regard to adjacent channel interference. The significance of the test data submitted to the Commission was limited by the fact that only one type of receiver with a limited range of signal conditions was included, and a question is raised as to the applicability of the data to over all performance of all types of receivers which may be produced.

27. With respect to the important factor of co-channel station interference, there is no substantial difference between color and monochrome reception. Similarly, with respect to lower adjacent channel interference, impulse and random noise, no significant differences appear to exist between color and monochrome reception. With respect to the interference resulting from multipath it appears that receivers of better design suffer only a negligible increase in interference as compared with monochrome reception.

28. In certain respects, however, the more intensive use of the television channel due to the addition of the chrominance information renders the system more vulnerable to interference and increases the possibility of causing interference to other services. Particularly, color receivers are more vulnerable to interference which falls in the region of the subcarrier. Such interference to the color receiver could originate from the additional sideband energy radiated by a color television transmitter on the upper adjacent channel; or, it could be caused by some other continuous wave source of radio energy. In the first case, the transmitter manufacturer must expend every effort to confine the radiations within the limits of the authorized channel. In the second case, the receiver manufacturers must utilize the methods known to the art for reducing this interference susceptibility, even though such methods may involve additional manufacturing costs.

29. A further interference problem is presented by the radiation from the 3.579545 Mc. subcarrier oscillator in color receivers. The frequency of this oscillator and several of its harmonics fall in the amateur bands. Here too, receiver manufacturers must make full use of shielding, traps and any other known methods to minimize the radiation. The ultimate answer to whether the additional interference susceptibilty of color receivers will be a serious impediment to the establishment of a successful color television system will be furnished in the performance record of receiver manufacturers and the manufacturers of transmitters and other electronic equipment.

30. *Transmissions over intercity relay facilities.* The Commission's seventh criterion is that the signal specifications must be capable of transmitting color television programs over inter-city relay facilities presently in existence or which may be developed in the near future.

31. It is our view, based on the data in the record and the observations of the Commission at the demonstration in these proceedings and at the Commission's laboratory that satisfactory color television pictures can be transmitted over existing inter-city relay facilities. Moreover, it appears that improved systems of inter-city relay facilities now under development will provide for the transmission of a more satisfactory color television picture in accordance with the signal specifications under consideration.

32. Long distance televison transmissions are generally provided by use of the microwave relay system and the coaxial cable system. Existing microwave circuits have a bandwidth of somewhat more than 4 Mc and require no special equipment to transmit color pictures using the proposed signal specifications. The bandwidth of the coaxial cable surrently in use, however, is limited nominally to 2.7 Mc. Since all the color information in the proposed signal specifications is transmitted on the 3.58 Mc subcarrier, special provision must be made for confining the color signal within the 2.7 mc bandwidth. This is accomplished by the use of cable conversion equipment which heterodynes the color information down to a frequency band within the cable pass band for transmission at the sending end of the circuit and restores it to the original frequency band at the receiving end. The resulting signal is limited to a bandwidth of 2 Mc for the luminance channel and 0.3 Mc for the color signal.

33. Color television pictures transmitted in accordance with the proposed signal specifications over the microwave system currently in use results in negligible observable degradation and provides a highly acceptable color intercity transmission service. Transmissions over the coaxial cable system currently in use results in appreciable degradation. Although the degradation is appreciable it is our view that the over-all quality of the pictures presently meets minimum standards for acceptability. Moreover, although it appears likely that the coaxial cable currently will continue to be used for a number of years to provide network service in some areas, it appears that commercial and audience pressure may result in replacing this equipment with improved cable carrier and improved microwave equipment. The Bell Telephone Laboratories, Inc., which participated in the activity of the NTSC, stated that it has under development improved systems of inter-city television transmission to provide for the satisfactory transmission of a color signal in accordance with the proposed signal specifications.

34. *Compatibility.* The term compatibility in its usual sense refers to the satisfactory reception of black and white pictures from signals broadcast in color on monochrome receivers without alteration. There is, however, another aspect of compatibility, sometimes referred to as "reverse compatibility", which relates to the satisfactory reception of monochrome signals on color receivers without alteration.

35. The first aspect of compatibility is a factor of critical importance in view of the fact that there are at the present time more than 27 million sets in the hands of the public. No change is required in existing monochrome receivers for the reception of a black and white picture from color transmissions on the proposed signal specifications. It appears, however, that the black and white pictures suffer some degradation. At distances from the receiver where the line structure is evident there is also a dot structure visible. Beyond this critical distance there appears to be no significant deterioration in the picture. It appears, that the degree of degradation is not substantial, and we do not believe it will interfere seriously with the public's viewing of color programming in black and white.

36. With regard to the second aspect of compatibility (i. e. reverse compatibility) no test data has been submitted. A number of parties commented favorably on the ability of present color receivers in this respect but the statements were of a general nature unsupported by data. Our own observation indicates that the monochrome picture suffers a noticeable loss of definition when received on a color set.

37. *Convertibility.* The term convertibility has been used to describe the changes necessary to enable existing receivers to receive color transmissions in color. No practical converter has been demonstrated nor does it appear that proponents of the proposed signal specifications have any current plans for the production of converters.

III. *Conclusions.*

38. *Field sequential system.* In our consideration of specifications for the broadcast of color television in the 1949-50 proceedings in Docket 8736 *et al.*, we concluded that of the three systems under consideration only the field sequential system met minimum standards of acceptability. These signal specifications were, however, incompatible in the sense that receivers outstanding in the hands of the public could not receive color transmissions in monochrome without adaptation. The limited amount of commercial color broadcasting on these standards were short-lived, and color television broadcast equipment for the field sequential system has never been produced in quantity and is not now being produced, nor are color transmissions in accordance with the field sequential standards being broadcast or contemplated. Three years have passed since that decision, and there are now more than 27 million television receivers in the hands of the public, all of which are incompatible with our present color television standards. That circumstance serves to nullify those rules and standards completely. We have concluded, therefore, that our present rules for the transmission of color television should be deleted.

39. *Proposed signal specifications.* The proponents of the color television signal specifications proposed in this proceeding have been of the view that a color television system in order to prove successful must be compatible. With this premise in mind, petitioners have cooperated in an industry-wide, intensive program of study, research and experimentation, lasting over a period of more than two years, in an effort to evolve and formulate satisfactory compatible color television signal specifications. To this end, petitioners have expended millions of dollars and have employed thousands of man-hours of the most highly skilled engineers and scientists in the electronics and related fields.

40. The accomplishment of a compatible color television system within a 6 Mc bandwidth is a tribute to the skill and ingenuity of the electronics industry. The proposed color television signal specifications produce a reasonably satisfactory picture with a good overall picture quality. The quality of the picture is not appreciably marred by such defects as misregistration, line crawl, jitter or unduly prominent dot structure. The picture is sufficiently bright to permit a satisfactory contrast range under favorable ambient light conditions and is capable of being viewed in the home without objectionable flicker. Color pictures can be transmitted satisfactorily over existing intercity relay facilities and improvements in intercity relay facilities may be reasonably anticipated.

41. It has long been recognized that compromises are necessary when an attempt is made to compress within a 6 Mc channel as much information as is required in a color television system. The achievement of a compatible system within a 6 Mc channel has been accomplished only by the utilization of extremely complicated and intricate equipment. It relies on a system of circuitry involving the most advanced techniques in optics, mechanics, and electronics. The complexity and intricacy of the equipment and circuitry is reflected in the following:

First, the cost of apparatus is high. The estimated retail price of the receiver is in the luxury range of $800 to $1,000. The heart of the receiver problem lies in the color tube and its associated circuitry. The current estimated cost to a receiver manufacturer of a color tube with a viewing surface which approximates that of a 12-inch monochrome tube, is between $175 and $200. This figure alone exceeds the entire cost of several popular models of monochrome receivers. Similarly, the costs to television broadcasters for transmitting equipment, and particularly for the origination of color programs, are substantially higher than the cost of monochrome transmissions.

Second, the maintenance and operation of a compatible color receiving and transmitting apparatus in a 6 Mc bandwidth will inherently result in greater costs than monochrome alone. Because the proposed signal specifications rely on complicated techniques and because the "system load" is, in large part, shared by the receiver, it is reasonable to anticipate that receiver failures and service adjustments will be more frequent. Similar difficulties may also be anticipated at the studio and transmitter.

Third, the additional susceptibility of the color receiver to interference and the possibility of causing interference to other services from the radiation of the subcarrier in the receiver, must be given close attention by the receiver manufacturer. Also, the transmitter manufacturer, in order to reduce interference, must take steps to eliminate, so far as possible, all unnecessary radiation. In this connection, it is noted that the industry has recently established committees, which have begun work toward these ends.

42. In the comments filed in this proceeding a number of parties urging adoption of the proposed signal specifications have requested that we waive or relax certain of our criteria. It is our view, in light of the changed circumstances, that a rigorous or inflexible application of our criteria would not be warranted and that, accordingly, these requests should be granted. It was our view that any new system would have to sustain the burden of establishing that any improvement which would result from its adoption must be substantial enough to justify the resulting dislocation to receivers then in the hands of the public. There are no color receivers in the hands of the public designed to receive transmissions in accordance with those standards. And no question is presented with respect to dislocation or harm because of investment in apparatus. We believe, therefore, that the change in circumstances warrants a shift in emphasis and that we are justified in relying on the representations of petitioners that certain of the inadequacies as presently exist are a function of "equipment limitations" and are not necessarily inherent "system limitations."

43. We are persuaded to this view on the basis of the following factors:

First, included among the NTSC and the other parties to this proceeding are the major electronics manufacturing organizations. Among these parties there is overwhelming support for the proposed specifications. There is virtual unanimity that these specifications are fundamentally capable of producing satisfactory color television pictures. There is also substantial agreement that the proposed specifications have a potential for growth.

Second, although the major effort has, up to this point, been directed to the development of the system, approval of the proposed signal specifications will furnish an incentive and stimulus to manufacturing and research organizations to devote their efforts to the equipment problems. The success of color hinges on mass receiver circulation, and every effort must be made to bring the price down to the level of the mass purchaser. Every effort must also be made to design equipment to minimize the additional interference susceptibility of operations under the proposed specifications. History has demonstrated that American industry is capable of devising practical and economical equipment on a mass production basis. We have the assurance of the industry that the enormous engineering and production ingenuity at their command will be focused on these remaining problems.

Third, the proposed signal specifications are broad enough to permit considerable latitude to competing companies in the future development of more economical and efficient equipment without obsoleting equipment in the hands of the public. Thirteen manufacturers demonstrated receivers in the proceeding employing several types of picture

tubes. Thus, the proposed color specifications afford an opportunity and challenge to the industry to implement these specifications with the necessary equipment innovations.

Fourth, the signal specifications proposed are compatible, and a compatible system will afford the consumer a greater degree of freedom than would an incompatible system in choosing whether or not to purchase a color receiver at a given price, since the public will, in any event, continue to receive the program material in monochrome.

44. Upon a careful consideration of the complete record in this proceeding, we are of the view that the signal specifications proposed by petitioners provide a reasonable basis for the development of a color television service in the public interest. We have therefore concluded that the present rules and standards for the broadcast of color television based on the field sequential signal specifications should be deleted and that the signal specifications in this proceeding should be adopted in lieu thereof at this time.

45. Authority for the adoption of the amendments is contained in section 303 (b), (e), and (g) of the Communications Act of 1934, as amended.

46. In view of the foregoing, *It is ordered*, That, effective 30 days after publication in the FEDERAL REGISTER, Subpart E of Part 3 of the Commission's Rules Governing Television Broadcast Stations, is amended as set out in Appendix B attached hereto.

(Sec. 303: 48 Stat. 1082, as amended; 47 U. S. C. 303)

Adopted: December 17, 1953.

Released: December 17, 1953.

FEDERAL COMMUNICATIONS COMMISSION,[1]

[SEAL] WM. P. MASSING,
*Acting Secretary.*

CONCURRING STATEMENT OF COMMISSIONER E. M. WEBSTER

The adoption of standards for color television is an important milestone on the road to expansion of our broadcast industry. As a member of the Commission and one of the guardians of the public interest I have strong feelings that the adoption of such standards cannot be taken lightly.

Consideration of the color standards proposed by the National Television System Committee indicates to me that those standards, and any system based thereon, involve certain problems among which are included such matters as:

1. Estimated high cost of color receivers and station equipment.
2. Complexity of receivers.
3. Degradation of color transmissions as received on monochrome sets.
4. Degradation of monochrome transmissions as received on color sets.
5. Susceptibility of color receivers to interference.

It would serve no useful purpose for me to elaborate upon such problems here as the Commission's Report and Order adequately discusses these and other problems. However, I believe that the public should be forewarned that in view of the subjective nature of the evaluation of any color television demonstration it is not likely that unanimity will prevail with respect to the adequacy of present color pictures and that some viewers may find the results somewhat less satisfactory than expected.

The adoption of these standards creates certain receiver problems which must be recognized. Accordingly, the receiver manufacturers are obligated to the public to incorporate in color receivers refinements beyond those in present monochrome receivers necessary to adequately suppress aggravated receiver radiation and to overcome the greater susceptibility to interference, particularly in the region of the color sub-carrier.

While the current system designed around the NTSC standards may fall short of the established criteria in some respects, as for example the estimated cost of color receivers, I believe that compatibility is sufficiently important to warrant a reasonable flexibility in the application of the criteria. Furthermore, in my opinion those features which may be believed to be inadequacies in the current state of development are equipment problems, not inherent limitations imposed by the standards, and future improvement can be expected.

Accordingly, I concur with the Commission in its decision adopting the color television standards proposed by the National Television System Committee.

ADDITIONAL CONCURRING VIEWS OF COMMISSIONER GEO. E. STERLING

I have participated in this proceeding and the final results with confidence that a foundation is being laid that will provide the people of this nation a fine compatible color television system, capable of improvement without obsolescence of black and white receivers and color receivers built to receive the programs broadcast in accordance with the signal specifications embraced in the standards.

History is replete with the initial high cost and complexity of products designed for public consumption, resulting from the birth of a new industry, for example: the automobile. This, too, has been the experience in the radio and television industry. With respect to the complexities and cost of equipment, considering the competition in the manufacturing industry coupled with the public enthusiasm and acceptance of the television broadcasting service, I am certain that both larger screen and cheaper color receivers with controls having the ease of adjustments of current monochrome receivers will be made available to the public within the next two or three years, the time necessary to establish a color television broadcasting service of any consequence. In the meantime, the public can buy black and white television receivers now on the market and which will continue for the next three or four years to represent the greatest percent of production of TV receivers, confident that when programs are broadcast in color they may view them in black and white. In the meantime, the manufacturing industry will move ahead affirmatively to build color receivers within the price range of the great mass of the American people.

The Commission has, in this decision, pointed out with considerable emphasis the necessity of properly shielding and filtering receivers so that color programs will not be degraded by interference from radio frequency sources as well as preventing interference to the important amateur radio service, considering the public service it renders in several respects. It is my hope that industry will continue to give this subject high priority as they proceed to build equipment for public consumption.

COMMISSIONER LEE CONCURRING

DECEMBER 18, 1953.

I concur completely with the Commission's decision in this case. The defects and imperfections of this new medium are carefully pointed out and this is as it should be. The factual situation has been given to the public. It is patently apparent that color television will not be available to most of us for some time to come but this was also true in the early days of black and white television.

For my own part, I would like to say that I consider this decision a milestone in the fast moving electronics industry. The American standard of living rises again. I would like to pay my own tribute to the Industry and the able and ingenious men comprising it who have made this new miracle possible.

The defects and shortcomings that may now exist will evaporate in the coming months as Industry takes on mass production. The first automobile had many defects. An aeroplane going on the assembly line immediately takes on some aspects of being outmoded as experience teaches us new improvements and better methods of production. We would never learn the new short-cuts if we kept the basic idea on the drawing board.

Our economy will get a tremendous boost from this development.

I am delighted at long last to have had a small part in putting the show on the road.

APPENDIX A—DESCRIPTION OF COLOR TELEVISION TRANSMISSIONS IN ACCORDANCE WITH PROPOSED SIGNAL SPECIFICATIONS

I. *Introduction.*

1. Following is a description of color television transmissions in accordance with the proposed signal specifications under consideration. In attempting to simplify the description so that it might be intelligible to the lay reader it has been necessary from time to time to use non-technical terms. This may have resulted in some technical inaccuracies. However, engineers will find full data and descriptions in the record.

II. *General.*

2. There is much similarity in the composition of television pictures and magazine or newspaper pictures. Printed pictures are composed of small dots and in the case of black and white pictures these dots are black and of varying size to give the impression of various shades of gray. The presence of the dot structure is not apparent to the eye under normal conditions because the distance between the viewer and the picture is such that the eye can no longer distinguish the individual dots and sees the combined effect as a single image. The sharpness of the picture is determined by the number of dots which compose the picture. The monochrome television picture, however, is composed of lines with varying degrees of grayness throughout their length to correspond to the brightness of the original object at that point. The sharpness of such an image is determined to a large extent by the rapidity with which variations in brightness can occur along the line either from black to white, or from white to black. For a given system there is a maximum rapidity with which the line can change from black to white and back again to black, which change would result in a white dot. The width of this dot determines the number of such dots which could be reproduced in a particular line and thus the number of such dots per line is a measure of the sharpness of images which can be reproduced. The television picture differs from the printed picture in that the number of equivalent dots in television is independent of the size of the television screen where as the printed picture normally uses a fixed number of dots per inch of picture dimension. In order to create the illusion of motion it is necessary to transmit a series of still pictures in rapid succession. This principle for creating the illusion of motion is the same for both motion pictures and television, and depends upon the well known phenomenon of persistence of vision.

3. In television the tools employed for reproducing a picture are the camera, transmitter, and receiver. The function of the camera in a television system is to transform light energy into electrical energy. In principle, the television camera is not unlike a photographic camera. However, in place of film, in back of the television camera, there is substituted an electrical plate which is sensitive to light. This plate is composed of thousands of separate light sensitive cells. When the light comes through the lens of the camera, it forms an image of the scene on the plate. The individual cells of the plate store up energy in proportion to the light which falls upon them. Thus, the cells in the bright parts of the image are filled with considerable energy while the darker parts are filled with less energy. In order to release this stored energy to the transmitter, an electron beam is caused to scan the image from left to right and top to bottom. The beam can be thought of as an electron gun which successively punctures the individual cells thus releasing the stored energy to the transmitter. The transmitter provides a vehicle for transporting the camera signals to the receiver. This is done by generating a radio frequency signal in a part of the spectrum which has previously been determined to have the desired properties with regard to propagation, available bandwidth, etc. The camera signals including the image signals and certain other electrical pulses needed to maintain synchronism between transmitter and receiver are then superimposed on this radio frequency carrier. At the receiver a scanning beam similar to that at the camera is directed against the face of a viewing screen. The receiver scanning beam travels from left to right across each of the lines of the picture in exact synchronism with the beam at the camera. Therefore, the amount of electrical energy released at the camera at any instant will affect the beam at the receiver at that identical point in the picture. Thus, the picture is recomposed.

III. *The Commission's standards.*

4. When the monochrome television standards were adopted, the Commission allocated 6 Mc (6 million cycles per second) for each television channel, nearly all of which is utilized for transmitting the video portion of the composite video-sound signals. The Commission's rules for monochrome require that thirty complete pictures each comprising 525 lines be transmitted each second. In a 4 Mc video bandwidth 4 million pairs of elemental light and dark areas can be transmitted each second, or 8 million separate distinguishable elements. The number of elements is a limiting factor in determining the sharpness or resolution of the television picture and these may be arranged vertically or horizontally in an infinite variety of combinations. If it is decided, and the Commission's rules so provide, that it is necessary to scan 30 pictures each second in order to maintain continuity of motion and prevent flicker, 266,666 elements (i. e., 8 million divided by 30) are available for each "still" picture. Since the Commission's standards provide for 525 lines of vertical resolution, the horizontal resolution is fixed at 505 elements (i. e., 266,666 divided by 525). It should be noted that since the picture is 4 units wide for each 3 units of height the horizontal elements are thus about 40% wider than the vertical elements. In practice, the values of the number of lines and elements are reduced due to the time required for sending the synchronizing signals, limitation or equipment, and other factors.

IV. *Operation under proposed signal specifications.*

A. *The camera.* Since most colors can be duplicated by the mixture of proper amounts of three properly selected primary colors, it follows that a color television system can be based on the transmission and reception of images in the three primary colors.

5. The first step in the transmission and reception of images in the three primary colors is accomplished in the television camera. The camera generates three different signals from the information in the picture. These may be the signals corresponding to the red, green and blue components in the picture but other combinations of three such independent sets of information could be used.

6. One method that has been used is the equivalent of three monochrome cameras. These cameras are operated from a single set of controls so that the view televised by each camera is identical. In front of each camera lens there is placed a red, a blue and a green filter, respectively. Thus, while the view in front of each camera is identical, the scene reaching the light sensitive plate of each camera contains only the components passed by the red, blue or green filters. Hence, this camera produces an image in each of the primary colors, and changes the optical images into their equivalent electrical energy.

B. *The transmitting system.*

7. The three components obtained from the camera are electrically processed in such a manner as to obtain a brightness signal and two color-minus-brightness signals, namely red-minus-brightness and blue-minus-brightness. The brightness signal is channeled into one circuit with the other two signals being dealt with in a separate circuit.

(1) *The brightness component.*

8. The brightness circuit of the color transmitter is similar to the conventional monochrome transmitter. Both have the same function of transmitting the relative brightness of the picture in monochrome. Thus, the two systems may be considered compatible, since a receiver performing satisfactorily on the monochrome system will also receive the brightness or monochrome signals transmitted in the color system. Since the eye is most sensitive to green, less sensitive to red, and least sensitive to blue, the brightness is obtained by mixing signals in that order of proportion. The specific values of the mixture are 59 percent green, 30 percent red, and 11 percent blue.[1] Such a mixture will produce a picture on monochrome receivers, in shades of gray. In the color system, this mixture accomplishes the primary objective of transmitting with correct intensity the brightness signal which is one of the two components of the color picture image.

(2) *The chroma component.*

9. The color-minus-brightness signals are derived by subtracting the electrical value of the brightness signal from the electrical value of the color signals. The result is called the "color minus brightness" signal or "color difference" signal.[2]

---

[1] See attached concurring statements of Commissioners Webster, Sterling and Lee.

[1] Mathematically, this is written:

$$E_Y' = 0.59E_G' + 0.30E_R' + 0.11E_B'$$

where:

$E_Y'$ = brightness signal.
$E_G'$ = electrical signal corresponding to the green components of the picture.
$E_R'$ = electrical signal corresponding to the red components of the picture.
$E_B'$ = electrical signal corresponding to the blue components of the picture.

[2] The brightness signal is not separated from the chroma signal until after the color image has been transformed by the camera from an optical quantity to its electrical equivalent. The reason for this is that the electrical quantity "color-minus-brightness" has no physical equivalent since the eye responds only to chroma accompanied by brightness. Chroma minus brightness would be invisible. The subtractions and additions necessary to compose the brightness and chroma signals are accomplished in a matrix unit which a computing machine for units of electricity. Mathematically, the color minus brightness signal of the blue signal is written:

$$E_B' - E_Y'$$

Thus, the chroma circuits of the transmitter must process two signals, red minus brightness ($E_R'-E_Y'$), and blue minus brightness ($E_B'-E_Y'$). Only two signals are necessary since the similar relation for the green signal ($E_G'-E_Y'$) can be recovered at the receiver from a mathematical relationship between the other two.[3] The two signals transmitted are the red minus brightness and blue minus brightness. This still presents somewhat of a problem since the two signals must be transmitted in the same circuits without interaction. The method used is to modulate[4] the two signals on a selected subcarrier in a manner designed to prevent interaction. The frequency of the subcarrier is carefully selected to reduce the visibility of interaction between the chroma information and the brightness signal on the received picture.[5]

[3] $E_Y' = 0.59E_G' + 0.30E_R' + 0.11E_B'$.
$0.59E_G' = E_Y' - 0.30E_R' - 0.11E_B'$.
$E_G' = 1.7E_Y' - 0.51E_R' - 0.19E_B'$.
$E_G' - E_Y' = 0.7E_Y' - 0.51E_R' - 0.19E_B'$.
$= 0.51E_Y' - 0.51E_R' + 0.19E_Y' - 0.19E_B'$.
$= -0.51(E_R' - E_Y') - 0.19(E_B' - E_Y')$.

[4] The term modulation is used a number of times in the text of the decision. For those unfamiliar with this fundamental process the following may be helpful. A radio transmitter generates a "carrier frequency" on the frequency assigned to the station. (This carrier might be considered as a replacement for the wire in a telephone system.) The intelligence to be transmitted, whether it is sound, picture or facsimile, is imposed upon this carrier by the process of modulation. For radio and television the intelligence or modulation, always a lower frequency than the carrier, is imposed upon the higher frequency for more efficient transportation to the receiver. When the desired intelligence modulates a carrier wave there results a composite signal which has the propagation characteristics of the carrier wave but also contains the original intelligence in one form or another. At the receiver the demodulation process results in recovery of the original intelligence and elimination of the carrier wave which has served its purpose. This is accomplished in a demodulator (detector) and there are a number of ways of performing the demodulation. One way is to generate in the receiver another frequency which is exactly equivalent to the transmitter carrier frequency. When these two identical carriers (frequencies) are placed in the same receiver circuit (demodulator) they have the effect of cancelling each other leaving the original intelligence. This is the system used in the recovery of the color signals described above. (The system of modulation described above is known as amplitude modulation because the modulation varies the amplitude of the carrier.) Other systems based on the same broad principles are called frequency modulation and phase modulation. In the latter cases, the modulation varies the frequency or phase characteristics of the carrier rather than the amplitude; however, the objective of the modulation is the same.

[5] A sine wave subcarrier can carry two sets of information by splitting the sine wave into two components in quadrature and amplitude modulating each component with one set of information.

[6] The line frequency is chosen as 1/286 times the frequency difference between the sound and picture carriers (4.5 mc/sec) or 15,734.26 cycles second. Since there are 525 lines per frame the frame frequency becomes 29.97 cycles per second and the field frequency 59.94 cycles per second. The subcarrier frequency is chosen as an odd multiple of one half the line frequency which in this case was chosen as 455/2 of the line frequency or 3.579545 mc/sec. It will be noted that the line, field and frame frequencies are very close to the nominal values used for monochrome, namely, 15,750, 60, and 30 cycles/sec.; thus existing monochrome sets will be able to respond to such scanning rates. The above combination will result in the beat note between the quiescent sound carrier and the color subcarrier being an odd multiple of one half the line frequency. It has been determined that such a relationship results in a minimum visibility, on the received picture, of such interaction as well as a minimum visibility of the subcarrier itself due to a similar relationship of its frequency to that of the line scanning rate.

10. The relative location of the subcarrier within the channel is also an important consideration. If the subcarrier is placed too near the picture carrier there may be interference between the two. On the other hand, if the subcarrier is placed too near the edge of the channel it will restrict the width of the sidebands and limit the information which can be carried. The NTSC has compromised on a subcarrier frequency which is 3.579545 megacycles above the video carrier. Since this frequency is approximately 0.6 Mc from the edge of the pass band (see fig. 3, App. B), if the blue and red chroma signals were transmitted they would be limited to 0.6 Mc. Resolution being a function of bandwidth, this would limit the resolution of color to very coarse detail. This limitation to a 0.6 Mc bandwidth applies only when two sets of information such as the two color difference signals must be modulated on a single subcarrier. The reason for this is that in the quadrature method of modulating the subcarrier, both upper and lower sidebands of each color difference signal must be equal. It is, however, possible to send one set of information by using a single sideband. Thus, it would be possible to send two sets of information up to 0.6 Mc and continue to a higher modulating frequency with a single set of information, e. g. a single color difference signal, using only one sideband. This is the method used in the NTSC system with the result that coarse color detail in the scene being televised which produces signals of frequency less than 0.6 Mc is reproduced in approximately the original color. (The third color difference signal is recreated at the receiver.) Semi-fine color detail in the scene being televised which produces signals of frequencies greater than 0.6 Mc and less than 1.5 Mc is reproduced in hues which are contaminated. (With only one color difference signal being transmitted the primaries cannot properly combine at the receiver.) Very fine color detail in the scene being televised which produces signals of frequency greater than 1.5 Mc is reproduced in monochrome. The NTSC has made a variation in the method of sending the red minus brightness and blue minus brightness signals. Instead of sending the blue minus brightness and the red minus brightness over the subcarrier, each of these signals is mixed with the other so that the blue minus brightness contains some red and the red minus brightness contains some blue.[7] Corresponding changes are also made in the receiver circuits so that as long as both color mixture signals are received, i. e. in the modulation range 0–0.6 Mc, the circuits could unscramble the mixture and deliver the red minus brightness, blue minus brightness, and green minus brightness to the viewing tube. Thus, there results no change in the coarse detail of the picture. However, when only one color mixture signal is transmitted, i. e., a 0.6 Mc to 1.5 Mc modulation, the receiver circuits unable to function as above produce a contaminated color varying from orange to cyan depending upon the actual color being televised. This contaminated color produces less noticeable distortion in the semi-fine detail of the picture than when a single pure color is transmitted. The luminosity of the picture is approximately uniform throughout its range from orange to cyan, thus further reducing the apparency of its color distortion. This distortion in fine detail is sometimes called edge distortion, the reason being that fine detail only occurs at the edge of an object where it contrasts with the background, or, with other objects or with part of the same object. Thus, while the eye is relatively insensitive to the color in these edges, nevertheless, if the color is intense or sharply different from the adjoining area, some distortion will be apparent. The NTSC system overcomes this difficulty by using a blended color which does not call attention to the transition.

(3) *Synchronization.*

11. The NTSC color system requires no change in the black and white synchronizing standards except that additional synchronizing information, referred to as the "color burst", is added. In order to demodulate the color subcarrier the receiver must generate a subcarrier of its own of exactly the same phase and frequency. It is, in fact, so important that the received subcarrier be identical with the transmitted subcarrier that it is necessary to send along a sample of the transmitter subcarrier which can be used as a reference by the receiver. It is rather a problem of just where to put this reference "burst" so that it won't be in the way of the luminance signal, the chrominance signals or the other synchronizing pulses. The place selected was the so-called "back porch" (blanking interval) following the horizontal synchronizing pulse. This is the short period during which the picture is blanked out to prevent visible retrace while the scanning beam is returning across the picture to its starting point. Only a few cycles (9 cycles of 3.579545 megacycles) of the reference burst (derived from the color subcarrier)[8] are transmitted.

[7] The amplitude of these two orthogonal components of the chrominance signals can be expressed in terms of color difference signals as follows:

$E_Q' = 0.41(E_B' - E_Y') + 0.48(E_R' - E_Y')$
$E_I' = -0.27(E_B' - E_Y') + 0.74(E_R' - E_Y')$

Where:
$E_Q'$ = narrow-band component of the color signal.
$E_I'$ = wide-band component of the color signal.

(4) *The combined signal.*

12. Prior to transmission over the air the various signals mentioned above are combined into a composite signal. This signal includes the synchronizing signals, the brightness signal, and the chroma information on the subcarrier.[9]

C. *The receiver.*

13. The following description of receivers now known is included to indicate how the signal can be used to produce a color picture.

14. The composite color signal arriving at the receiver antenna consists of a brightness component and a chroma component.

(1) *Brightness component.*

15. If the signal is received on a monochrome television set the brightness component will pass through the receiver circuits and appear on the viewing tube as a monochrome picture. The interference from the chroma component of the incoming signal will be reduced on the monochrome receiver because of the interlacing principle previously described.[9] If the composite color signal is received on a color set the brightness component will be processed by the receiver brightness circuits and appear at the viewing tube ready to be combined with the chroma component.

(2) *Chroma component.*

16. When the composite color signal is received on a color receiver the chroma component must be separated by means of special filters before it can be processed.[9] The output of these filters is fed to the chroma demodulator which recovers the original color difference signals.[11] The two color difference signals thus derived are fed into a matrixing unit from which is recovered the third color difference signal (green minus brightness). In the case of the three gun type of color tube, the three color minus brightness signals are routed to the three respective electron beams of the color tube where they are combined with the brightness signal. The result—color minus brightness plus brightness equals color, i. e., the original primary color is restored and projected on the viewing tube.

[8] The complete color signal has the following composition:

$E_M' = E_Y' + E_Q' \sin(\omega t + 33°) + E_I' \cos(\omega t + 33°)$

or

$E_M' = E_Y' + 0.493(E_B' - E_Y') \sin \omega t + 0.877(E_R' - E_Y') \cos \omega t$

where the angular frequency $w$ is 2 pi times the frequency of the chrominance subcarrier.

The second equation above is only valid for color difference frequencies below 500 kilocycles since the $E_Q'$ signal is removed for frequencies above that range.

[9] The color subcarrier frequency selection for minimum visibility of the color information on the luminance channel is sometimes called frequency interlacing.

[10] The chroma signal is removed from the composite signal at about the third video amplifier and then fed through a 1.8 Mc to 4.3 Mc bandpass filter. This filters out the video carrier frequency and low frequency components leaving the color subcarrier and sidebands along with the high frequency components of the luminance signal. The modulations of the two color difference signals on the subcarrier remain independent only when the modulated waves each consist of like upper and lower sidebands. When the sidebands are not equal, the modulations $E_Q'$ and $E_I'$ cross talk on each other and the color is contaminated. Since the receiver response falls off for the higher video frequencies, compensation is necessary to make the upper sideband equal the lower sideband in the region 0 to 0.6 Mc from the subcarrier. This compensation consists usually of peaking coils with a peak of about 6 db in the 4.0 Mc region and is inserted in the circuit to the demodulator grids.

APPENDIX B

1. Section 3.681 is amended to read as follows:

§ 3.681 *Definitions.*

*Amplitude modulation (AM).* A system of modulation in which the envelope of the transmitted wave contains a component similar to the wave form of the signal to be transmitted.

*Antenna height above average terrain.* The average of the antenna heights above the terrain from two to ten miles from the antenna for the eight directions spaced evenly for each 45 degrees of azimuth starting with True North. (In general, a different antenna height will be determined in each direction from the antenna. The average of these various heights is considered the antenna height above the average terrain. In some cases less than 8 directions may be used. See § 3.684 (d)).

*Antenna power gain.* The square of the ratio of the root-mean-square free space field intensity produced at one mile in the horizontal plane, in millivolts per meter for one kilowatt antenna input power to 137.6 mv/m. This ratio should be expressed in decibels (db). (If specified for a particular direction, antenna power gain is based on the field strength in that direction only.)

*Aspect ratio.* The ratio of picture width to picture height as transmitted.

*Aural transmitter.* The radio equipment for the transmission of the aural signal only.

*Aural center frequency.* (1) The average frequency of the emitted wave when modulated by a sinusoidal signal; (2) the frequency of the emitted wave without modulation.

*Blanking level.* The level of the signal during the blanking interval, except the interval during the scanning synchronizing pulse and the chrominance subcarrier synchronizing burst.

*Chrominance.* The colorimetric difference between any color and a reference color of equal luminance, the reference color having a specific chromaticity.

*Chrominance subcarrier.* The carrier which is modulated by the chrominance information.

[11] The local oscillator supplies two signals having exactly the same frequency as the subcarrier. These two signals are placed in quadrature with each other in the same phase relationship as the two quadrature components of the subcarrier. Each quadrature component demodulates the respective color signal with which it is in phase.

*Color transmission.* The transmission of color television signals which can be reproduced with different values of hue, saturation, and luminance.

*Effective radiated power.* The product of the antenna input power and the antenna power gain. This product should be expressed in kilowatts and in decibels above one kilowatt (dbk). (If specified for a particular direction, effective radiated power is based on the antenna power gain in that direction only. The licensed effective radiated power is based on the average antenna power gain for each horizontal plane direction.)

*Field.* Scanning through the picture area once in the chosen scanning pattern. In the line interlaced scanning pattern of two to one, the scanning of the alternate lines of the picture area once.

*Frame.* Scanning all of the picture area once. In the line interlaced scanning pattern of two to one, a frame consists of two fields.

*Free space field intensity.* The field intensity that would exist at a point in the absence of waves reflected from the earth or other reflecting objects.

*Frequency modulation (FM).* A system of modulation where the instantaneous radio frequency varies in proportion to the instantaneous amplitude of the modulating signal (amplitude of modulating signal to be measured after pre-emphasis, if used) and the instantaneous radio frequency is independent of the frequency of the modulating signal.

*Frequency swing.* The instantaneous departure of the frequency of the emitted wave from the center frequency resulting from modulation.

*Interlaced scanning.* A scanning process in which successively scanned lines are spaced an integral number of line widths, and in which the adjacent lines are scanned during successive cycles of the field frequency.

*Luminance.* Luminous flux emitted, reflected, or transmitted per unit solid angle per unit projected area of the source.

*Monochrome transmission.* The transmission of television signals which can be reproduced in gradations of a single color only.

*Negative transmission.* Where a decrease in initial light intensity causes an increase in the transmitted power.

*Peak power.* The power over a radio frequency cycle corresponding in amplitude to synchronizing peaks.

*Percentage modulation.* As applied to frequency modulation, the ratio of the actual frequency swing to the frequency swing defined as 100 percent modulation, expressed in percentage. For the aural transmitter of television broadcast stations, a frequency swing of ±25 kilocycles is defined as 100 percent modulation.

*Polarization.* The direction of the electric field as radiated from the transmitting antenna.

*Reference black level.* The level corresponding to the specified maximum excursion of the luminance signal in the black direction.

*Reference white level of the luminance signal.* The level corresponding to the

specified maximum excursion of the luminance signal in the white direction.

*Scanning.* The process of analyzing successively, according to a predetermined method, the light values of picture elements constituting the total picture area.

*Scanning line.* A single continuous narrow strip of the picture area containing highlights, shadows, and half-tones, determined by the process of scanning.

*Standard television signal.* A signal which conforms to the television transmission standards.

*Synchronization.* The maintenance of one operation in step with another.

*Television broadcast band.* The frequencies in the band extending from 54 to 890 megacycles which are assignable to television broadcast stations. These frequencies are 54 to 72 megacycles (channels 2 through 4), 76 to 88 megacycles (channels 5 and 6), 174 to 216 megacycles (channels 7 through 13), and 470 to 890 megacycles (channels 14 through 83).

*Television broadcast station.* A station in the television broadcast band transmitting simultaneous visual and aural signals intended to be received by the general public.

*Television channel.* A band of frequencies 6 megacycles wide in the television broadcast band and designated either by number or by the extreme lower and upper frequencies.

*Television transmission standards.* The standards which determine the characteristics of a television signal as radiated by a television broadcast station.

*Television transmitter.* The radio transmitter or transmitters for the transmission of both visual and aural signals.

*Vestigial sideband transmission.* A system of transmission wherein one of the generated sidebands is partially attenuated at the transmitter and radiated only in part.

*Visual carrier frequency.* The frequency of the carrier which is modulated by the picture information.

*Visual transmitter.* The radio equipment for the transmission of the visual signal only.

*Visual transmitter power.* The peak power output when transmitting a standard television signal.

2. Section 3.682 is amended as follows:

Delete paragraph (a) and substitute the following:

§ 3.682 *Transmission standards and changes*—(a) *Transmission standards.* (1) The width of the television broadcast channel shall be six megacycles per second.

(2) The visual carrier frequency shall be nominally 1.25 mc above the lower boundary of the channel.

(3) The aural center frequency shall be 4.5 mc higher than the visual carrier frequency.

(4) The visual transmission amplitude characteristic shall be in accordance with the chart designated as Appendix III, Figure 3.

(5) The chrominance subcarrier frequency shall be 3.579545 mc ± 10 cycles per second with a maximum rate of change not to exceed one tenth cycle per second per second.

(6) For monochrome and color transmissions the number of scanning lines per frame shall be 525, interlaced two to one in successive fields. The horizontal scanning frequency shall be $\frac{2}{455}$ times the chrominance subcarrier frequency; this corresponds nominally to 15,750 cycles per second (with an actual value of 15,734.264 ± 0.044 cycles per second). The vertical scanning frequency is $\frac{2}{525}$ times the horizontal scanning frequency; this corresponds nominally to 60 cycles per second (the actual value is 59.94 cycles per second). For monochrome transmissions only, the nominal values of line and field frequencies may be used.

(7) The aspect ratio of the transmitted television picture shall be 4 units horizontally to 3 units vertically.

(8) During active scanning intervals, the scene shall be scanned from left to right horizontally and from top to bottom vertically, at uniform velocities.

(9) A carrier shall be modulated within a single television channel for both picture and synchronizing signals. For monochrome transmission, the two signals comprise different modulation ranges in amplitude, in accordance with the charts designated as Appendix III, Figures 3 and 4 (b). For color transmission, the two signals comprise different modulation ranges in amplitude except where the chrominance penetrates the synchronizing region and the burst penetrates the picture region, in accordance with the the charts designated as Appendix III, Figures 3 and 4 (a).

(10) A decrease in initial light intensity shall cause an increase in radiated power (negative transmission).

(11) The reference black level shall be represented by a definite carrier level, independent of light and shade in the picture.

(12) The blanking level shall be transmitted at 75±2.5 percent of the peak carrier level.

(13) The reference white level of the luminance signal shall be 12.5±2.5 percent of the peak carrier level.

(14) The signals radiated shall have horizontal polarization.

(15) An effective radiated power of the aural transmitter not less than 50 percent nor more than 70 percent of the peak radiated power of the visual transmitter shall be employed.

(16) The peak-to-peak variation of transmitter output within one frame of video signal due to all causes, including hum, noise, and low-frequency response, measured at both scanning synchronizing peak and blanking level, shall not exceed 5 percent of the average scanning synchronizing peak signal amplitude.[20]

(17) The reference black level shall be separated from the blanking level by the setup interval, which shall be 7.5±2.5 percent of the video range from blanking level to the reference white level.

(18) For monochrome transmission, the transmitter output shall vary in substantially inverse logarithmic relation to the brightness of the subject. No tolerances are set at this time.[20]

(19) The color picture signal shall correspond to a luminance component transmitted as amplitude modulation of the picture carrier and a simultaneous pair of chrominance components transmitted as the amplitude modulation sidebands of a pair of suppressed subcarriers in quadrature.

(20) Equation of complete color signal.

(i) The color picture signal has the following composition:

$$E_M = E_Y' + \{E_Q' \sin(\omega t + 33^\circ) \pm E_I' \cos(\omega t + 33^\circ)\}$$

Where:

$E_Q' = 0.41(E_B' - E_Y') + 0.48(E_R' - E_Y')$.
$E_I' = -0.27(E_B' - E_Y') + 0.74(E_R' - E_Y')$.
$E_Y' = 0.30E_R' + 0.59E_G' + 0.11E_B'$.

For color-difference frequencies below 500 kc (see (iii) below), the signal can be represented by:

$$E_M = E_Y' + \left\{\frac{1}{1.14}\left[\frac{1}{1.78}(E_B' - E_Y')\sin\omega t + (E_R' - E_Y')\cos\omega t\right]\right\}$$

(ii) The symbols in (i) have the following significance:

$E_M$ is the total video voltage, corresponding to the scanning of a particular picture element, applied to the modulator of the picture transmitter.

$E_Y'$ is the gamma-corrected voltage of the monochrome (black-and-white) portion of the color picture signal, corresponding to the given picture element.[21]

$E_Q'$ and $E_I'$ are the amplitudes of two orthogonal components of the chrominance signal corresponding respectively to narrow-band and wide-band axes.

$E_R'$, $E_G'$, and $E_B'$ are the gamma-corrected voltages corresponding to red, green, and blue signals during the scanning of the given picture element.

$\omega$ is the angular frequency and is $2\pi$ times the frequency of the chrominance subcarrier.

The portion of each expression between brackets in (i) represents the chrominance subcarrier signal which carries the chrominance information.

The phase reference in the $E_M$ equation in (i) is the phase of the burst (180°), as shown in Figure 4 (c). The burst corresponds to amplitude modulation of a continuous sine wave.

(iii) The equivalent bandwidth assigned prior to modulation to the color difference signals $E_Q'$ and $E_I'$ are as follows:

Q-channel bandwidth:
- At 400 kc less than 2 db down.
- At 500 kc less than 6 db down.
- At 600 kc at least 6 db down.

I-channel bandwidth:
- At 1.3 mc less than 2 db down.
- At 3.6 mc at least 20 db down.

(iv) The gamma corrected voltages $E_R'$, $E_G'$, and $E_B'$ are suitable for a color picture tube having primary colors with the following chromaticities in the CIE system of specification:

| | $x$ | $y$ |
|---|---|---|
| Red (R) | 0.67 | 0.33 |
| Green (G) | 0.21 | 0.71 |
| Blue (B) | 0.14 | 0.08 |

and having a transfer gradient (gamma exponent) of 2.2[22] associated with each primary color. The voltages $E_R'$, $E_G'$, and $E_B'$ may be respectively of the form $E_{R1/\gamma}$, $E_{G1/\gamma}$, and $E_{B1/\gamma}$ although other forms may be used with advances in the state of the art.

(v) The radiated chrominance subcarrier shall vanish on the reference white of the scene.[22a]

(vi) $E_Y'$, $E_Q'$, $E_I'$, and the components of these signals shall match each other in time to 0.05 $\mu$secs.

(vii) The angles of the subcarrier measured with respect to the burst phase, when reproducing saturated primaries and their complements at 75 percent of full amplitude, shall be within ±10° and their amplitudes shall be within ± 20 percent of the values specified above. The ratios of the measured amplitudes of the subcarrier to the luminance signal for the same saturated primaries and their complements shall fall between the limits of 0.8 and 1.2 of the values specified for their ratios. Closer tolerances may prove to be practicable and desirable with advance in the art.

3. Section 3.687 is amended as follows:

A. Delete paragraph (a) and substitute the following:

§ 3.687 *Transmitters and associated equipment*—(a) *Visual transmitter.* (1) For monochrome transmission only, the overall attenuation characteristics of the transmitter, measured in the antenna transmission line after the vestigial sideband filter (if used), shall not be greater than the following amounts below the ideal demodulated curve. (See Appendix III, Figure 7.)

2 db at 0.5 mc.
2 db at 1.25 mc.
3 db at 2.0 mc.
6 db at 3.0 mc.
12 db at 3.5 mc.

The curve shall be substantially smooth between these specified points, exclusive of the region from 0.75 to 1.25 mc.[23]

(2) For color transmission, the standard given by § 3.687 (a) (1) applies except as modified by the following: A sine wave of 3.58 mc introduced at those terminals of the transmitter which are normally fed the composite color picture signal shall produce a radiated signal having an amplitude (as measured with a diode on the R. F. transmission line supplying power to the antenna), which is down 6 ± 2 db with respect to a signal produced by a sine wave of 200 kc. In addition, the amplitude of the signal shall not vary by more than ± 2 db between the modulating frequencies of 2.1 and 4.18 mc.

(3) The field strength or voltage of the lower sideband, as radiated or dissipated and measured as described in subparagraph (4) of this paragraph, shall not be greater than −20 db for a modulating frequency of 1.25 mc or greater and in addition, for color, shall not be greater than −42 db for a modulating frequency of 3.579545 mc (the color subcarrier frequency). For both monochrome and color, the field strength or voltage of the upper sideband as radiated or dissipated and measured as described in subparagraph (4) of this paragraph shall not be greater than −20 db for a modulating frequency of 4.75 mc or greater.[25, 25a]

(4) The attenuation charactertistics of a visual transmitter shall be measured by application of a modulating signal to the transmitter input terminals in place of the normal composite television video signal. The signal applied shall be a composite signal composed of a synchronizing signal[26] to establish peak output voltage plus a variable frequency sine wave voltage occupying the interval between synchronizing pulses. The axis of the sine wave in the composite signal observed in the output monitor shall be maintained at an amplitude 0.5 of the voltage at synchronizing peaks. The amplitude of the sine wave input shall be held at a constant value. This constant value should be such that at no modulating frequency does the maximum excursion of the sine wave, observed in the composite output signal monitor, exceed the value 0.75 of peak output voltage. The amplitude of the 200 kilocycle sideband shall be measured and designated zero db as a basis for comparison. The modulation signal frequency shall then be varied over the desired range and the field strength or signal voltage of the corresponding sidebands measured. As an alternate method of measuring, in those cases in which the automatic d-c insertion can be replaced by manual control, the above characteristic may be taken by the use of a video sweep generator and without the use of pedestal synchronizing pulses. The d-c level shall be set for midcharacteristic operation.

(5) A sine wave, introduced at those terminals of the transmitter which are normally fed the composite color picture signal, shall produce a radiated signal having an envelope delay, relative to the average envelope delay between 0.05 and 0.20 mc, of zero microseconds up to a frequency of 3.0 mc; and then linearly decreasing to 4.18 mc so as to be equal to −0.17 $\mu$secs at 3.58 mc. The tolerance on the envelope delay shall be ± 0.05 $\mu$secs at 3.58 mc. The tolerance shall increase linearly to ± 0.1 $\mu$sec down to 2.1 mc, and remain at ± 0.1 $\mu$sec down to 0.2 mc.[26a] The tolerance shall also increase linearly to ± 0.1 $\mu$sec at 4.18 mc.

(6) The radio frequency signal, as radiated, shall have an envelope as would be produced by a modulating signal in conformity with Appendix III, Figure 4 (a) or (b), as modified by vestigial sideband operation specified by Appendix III, Figure 3.

(7) The time interval between the leading edges of successive horizontal pulses shall vary less than one half of one percent of the average interval. However, for color transmissions, § 3.682 (a) (5) and § 3.682 (a) (6) shall be controlling.

(8) The rate of change of the frequency of recurrence of the leading edges of the horizontal synchronizing signals shall be not greater than 0.15 percent per second, the frequency to be determined by an averaging process carried out over a period of not less than 20, nor more than 100 lines, such lines not to include any portion of the blanking interval. However, for color transmissions, § 3.682 (a) (5) and § 3.682 (a) (6) shall be controlling.

[20] These items are subject to change but are considered the best practice under the present state of the art. They will not be enforced pending a further determination thereof.

[21] Forming of the high frequency portion of the monochrome signal in a different manner is permissible and may in fact be desirable in order to improve the sharpness on saturated colors.

[22] At the present state of the art it is considered inadvisable to set a tolerance on the value of gamma and correspondingly this portion of the specification will not be enforced.

[22a] The numerical values of the signal specification assume that this condition will be reproduced as CIE Illuminant C ($x$=0.310, $y$=0.316).

[23] Output measurement shall be made with the transmitter operating into a dummy load of pure resistance and the demodulated voltage measured across this load. The ideal demodulated curve is that shown in Appendix III, Figure 7.

[25] Field strength measurements are desired. It is anticipated that these may not yield data which are consistent enough to prove compliance with the attenuation standards prescribed above. In that case, measurements with a dummy load of pure resistance, together with data on the antenna characteristics, shall be taken in place of over-all field measurements.

[25a] Television stations shall have until July 1, 1954, for compliance with the requirements of this subparagraph with respect to attenuation of the upper sidebands.

[26] The "synchronizing signal" referred to in this section means either a standard synchronizing wave form or any pulse that will properly set the peak.

[26a] Tolerances for the interval of 0.0 to 0.2 mc are not specified at the present time.

(9) Sufficient monitoring equipment shall be employed to determine whether the visual signal complies with the requirements of this subpart.

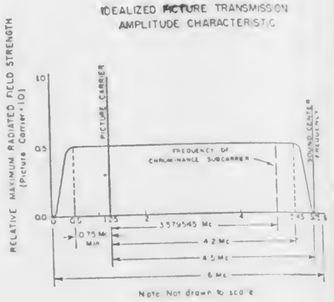
(10) For color transmission the transfer characteristic (that is the relationship between the transmitter RF output and video signal input) shall be substantially linear between the reference black and reference white levels.

B. Delete paragraph (c) (1) of § 3.687 and substitute the following:

(c) *Requirements applicable to both visual and aural transmitters.* (1) Automatic means shall be provided in the visual transmitter to maintain the carrier frequency within one kilocycle of the authorized frequency; automatic means shall be provided in the aural transmitter to maintain the carrier frequency within four kilocycles of the assigned aural carrier frequency or, alternatively, 4.5 megacycles above the actual visual carrier frequency within 5 kilocycles. For color transmission the aural carrier shall be maintained 4.5 megacycles above the visual carrier within ±1 kilocycle. When required by § 3.606, the visual and aural carrier frequencies are to be offset in frequency by 10 kilocycles (plus or minus, as indicated) from the normal carrier frequencies.

IV. Appendix III to Subpart E is amended as follows: Delete Figures 3, 4, and 7 and add the attached Figures 3, 4 (a), 4 (b), 4 (c), and 7.

IDEALIZED PICTURE TRANSMISSION AMPLITUDE CHARACTERISTIC



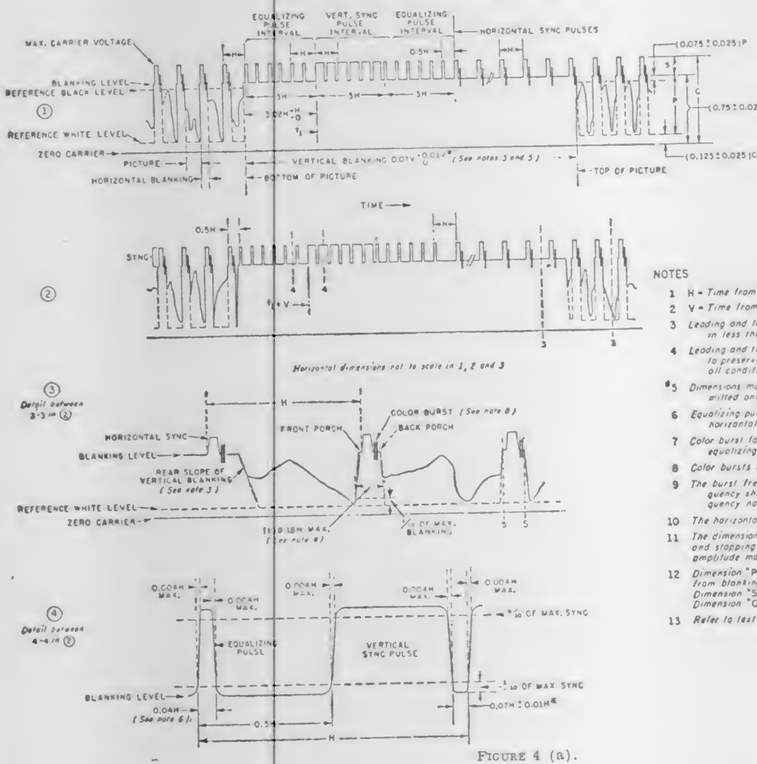


FIGURE 3.

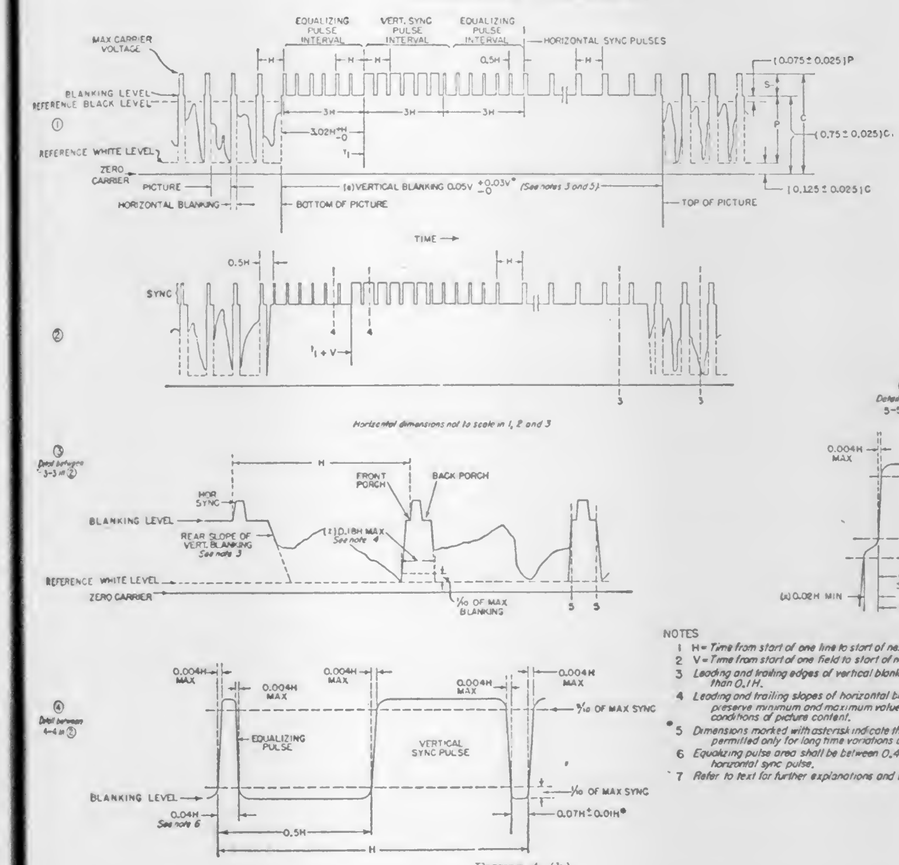
TELEVISION SYNCHRONIZING WAVEFORM
FOR COLOR TRANSMISSION



NOTES

1 H = Time from start of one line to start of next line.
2 V = Time from start of one field to start of next field.
3 Leading and trailing edges of vertical blanking should be complete in less than 0.1H.
4 Leading and trailing slopes of horizontal blanking must be steep enough to preserve minimum and maximum values of (x+y) and (z) under all conditions of picture content.
*5 Dimensions marked with asterisk indicate that tolerances given are permitted only for long time variations and not for successive cycles.
6 Equalizing pulse area shall be between 0.45 and 0.5 of area of a horizontal sync pulse.
7 Color burst follows each horizontal pulse, but is omitted following the equalizing pulses and during the broad vertical pulses
8 Color bursts to be omitted during monochrome transmission.
9 The burst frequency shall be 3.579545 mc. The tolerance on the frequency shall be ±10 cycles with a maximum rate of change of frequency not to exceed 1/10 cycle per second per second.
10 The horizontal scanning frequency shall be $\frac{2}{455}$ times the burst frequency.
11 The dimensions specified for the burst determine the times of starting and stopping the burst, but not its phase. The color burst consists of amplitude modulation of a continuous sine wave.
12 Dimension "P" represents the peak excursion of the luminance signal from blanking level, but does not include the chrominance signal. Dimension "S" is the sync amplitude above blanking level. Dimension "C" is the peak carrier amplitude.
13 Refer to text for further explanations and tolerances.

PART 3—RADIO BROADCAST SERVICE

INTERIM COLOR TELEVISION BROADCASTS

DECEMBER 18, 1953.

On December 17, 1953, the Commission issued a Report and Order adopting new signal specifications for color television.[1] In accordance with the Administrative Procedures Act, the new rules will go into effect 30 days after publication in the FEDERAL REGISTER.

In the meantime, it is anticipated that the Commission will receive requests to operate under the new standards in order to obtain operating experience. In the past, it has been necessary to secure special temporary authority from the Commission to broadcast programs utilizing the new color standards. Henceforth, pending finalization of the color order, any TV broadcast station may, without further authorization, broadcast either commercial or sustaining programs utilizing the new standards provided that the Commission is notified by wire in advance of the date and periods of the broadcasts.

FEDERAL COMMUNICATIONS COMMISSION,
[SEAL] WM. P. MASSING,
*Acting Secretary.*

[F. R. Doc. 53-10665; Filed, Dec. 22, 1953; 8:53 a. m.]

## TITLE 49—TRANSPORTATION

### Chapter I—Interstate Commerce Commission

PART 122—MONTHLY OPERATING REPORTS

MONTHLY REPORTS OF OPERATING STATISTICS

At a session of the Interstate Commerce Commission, Division 1, held at its office in Washington, D. C., on the 21st day of October A. D. 1953.

The matter of monthly reports of operating statistics of Class I steam railways being under consideration:

*It is ordered*, That the order dated October 19, 1949, in the matter of monthly reports of operating statistics of class I steam railways (49 CFR 122.3), be, and it is hereby modified with respect to the forms of monthly reports, effective January 1, 1954, as follows:

§ 122.3 *Operating statistics.* Commencing with the month of January 1954, and monthly thereafter until further order, each and every class I steam railway, including class I switching and terminal companies, subject to the provisions of section 20, part I of the Interstate Commerce Act, is hereby required to file monthly reports of operating statistics in accordance with forms of reports and notes of instructions thereon designated:

Form OS-A—Freight Train Performance.
Form OS-B—Passenger Train Performance.
Form OS-C—Yard Service Performance.
Form OS-D—Revenue Traffic.
Form OS-E—Fuel and Power Statistics.
Form OS-F—Motive Power and Car Equipment.

which forms are attached hereto and made a part of this section:[1] *Provided however*, That class I switching and terminal companies are not required to submit reports on forms designated Forms OS-A, OS-B, and OS-D. Such monthly reports shall be filed in duplicate in the Bureau of Transport Economics and Statistics, Interstate Commerce Commission, Washington, D. C., on or before the dates indicated in the notice on each form.

(Sec. 12, 24 Stat. 383, as amended; 49 U. S. C. 12. Interprets or applies sec. 20, 24 Stat. 386, as amended; 49 U. S. C. 20)

By the Commission, Division 1.

[SEAL] GEORGE W. LAIRD,
*Secretary.*

[F. R. Doc. 53-10620; Filed, Dec. 22, 1953; 8:47 a. m.]

## DEPARTMENT OF THE INTERIOR

### Bureau of Land Management

[No. 16 (R-IV)]

UTAH

ORDER PROVIDING FOR OPENING OF PUBLIC LANDS

DECEMBER 11, 1953.

In an exchange of lands made under the provisions of section 8 of the act of June 28, 1934 (48 Stat. 1269), as amended June 26, 1936 (49 Stat. 1976, 43 U. S. C. 315g), the following described lands have been reconveyed to the United States:

SALT LAKE MERIDIAN

T. 6 S., R. 6 W.
Sec. 12, $N\frac{1}{2}SW\frac{1}{4}$, $SE\frac{1}{4}$.
Sec. 13, $NW\frac{1}{4}NE\frac{1}{4}$, $S\frac{1}{2}NE\frac{1}{4}$, $N\frac{1}{2}S\frac{1}{2}$, $SW\frac{1}{4}SW\frac{1}{4}$, $SE\frac{1}{4}SE\frac{1}{4}$.
Sec. 14, $SE\frac{1}{4}$.
Sec. 23, $NE\frac{1}{4}$.
Sec. 24, $S\frac{1}{2}NW\frac{1}{4}$, $NW\frac{1}{4}SW\frac{1}{4}$.
Sec. 25, $N\frac{1}{2}SW\frac{1}{4}$.
Sec. 26, $N\frac{1}{2}SE\frac{1}{4}$.

The area described contains 1200 acres.

These tracts are primarily valuable for grazing, and it is unlikely that any will be classified for disposal under the homestead, desert-land, or small tract laws.

No applications for these lands may be allowed under the homestead, small tract, desert-land, or any other nonmineral public-land laws, unless the lands have already been classified as valuable or suitable for such type of application, or shall be so classified upon consideration of an application.

This order shall not otherwise become effective to change the status of such lands until 10:00 a. m. on the 35th day after the date of this order. At that time the said lands shall, subject to valid existing rights and the provisions of existing withdrawals, become subject to application, petition, location, and selection as follows:

(a) *Ninety-one day period for preference-right filings.* For a period of 91 days, commencing at the hour and on the days specified above, the public lands affected by this order shall be subject only to (1) application under the homestead or the desert-land laws or the Small Tract Act of June 1, 1938, 52 Stat. 609 (43 U. S. C. 682a), as amended, by qualified veterans of World War II and other qualified persons entitled to preference under the act of September 27, 1944, 58 Stat. 747 (43 U. S. C. 279-284), as amended, subject to the requirements of applicable law, and (2) application under any applicable public-land law, based on prior existing valid settlement rights and preference rights conferred by existing laws or equitable claims subject to allowance and confirmation. Applications under subdivision (1) of this paragraph shall be subject to applications and claims of the classes described in subdivision (2) of this paragraph. All applications filed under this paragraph, either at or before 10:00 a. m. on the 35th day after the date of this order shall be treated as though filed simultaneously at that time. All applications filed under this paragraph after 10:00 a. m. on the said 35th day shall be considered in the order of filing.

(b) *Date for non-preference-right filings.* Commencing at 10:00 a. m. on the 126th day after the date of this order, any lands remaining unappropriated shall become subject to such application, petition, location, selection, or other appropriation by the public generally as may be authorized by the public-land laws. All such applications filed either at or before 10:00 a. m. on the 126th day after the date of this order, shall be treated as though filed simultaneously at the hour specified on such 126th day. All applications filed thereafter shall be considered in the order of filing.

A veteran shall accompany his application with a complete photostatic, or other copy (both sides), of his certificate of honorable discharge, or of an official document of his branch of the service which shows clearly his honorable discharge as defined in § 181.36 of Title 43 of the Code of Federal Regulations, or constitutes evidence of other facts upon which the claim for preference is based and which shows clearly the period of service. Other persons claiming credit for service of veterans must furnish like proof in support of their claims. Persons asserting preference rights, through settlement or otherwise, and those having equitable claims, shall accompany their applications by duly corroborated statements in support thereof, setting forth in detail all facts relevant to their claims.

Applications for these lands, which shall be filed in the Land and Survey Office at Salt Lake City, Utah, shall be acted upon in accordance with the regulations contained in § 295.8 of Title 43 of the Code of Federal Regulations and Part 296 of that title, to the extent that such regulations are applicable. Applications under the homestead laws shall be governed by the regulations contained in Parts 166 to 170, inclusive, of Title 43 of the Code of Federal Regulations, and applications under the desert-land laws and the said Small Tract Act of June 1, 1938, shall be governed by the regulations contained in Parts 232 and 257, respectively, of that title.

Inquiries concerning these lands shall be addressed to the Manager, Land and Survey Office, 312 Federal Building, Salt Lake City, Utah.

H. BYRON MOCK,
*Regional Administrator.*

## FEDERAL POWER COMMISSION

[Docket No. G-1915]

SOUTH GEORGIA NATURAL GAS CO.

ORDER GRANTING MOTION FOR POSTPONEMENT OF HEARING

South Georgia Natural Gas Company (Applicant) filed a motion on December 7, 1953, for continuance of hearing and extension of date for serving copies of testimony and exhibits in the above proceeding.

By its order issued November 13, 1953, the Commission reopened these proceedings to convene on January 18, 1954, and directed Applicant to serve its testimony and exhibits upon the parties and the Staff no later than January 5, 1954. The Applicant in its motion requests the Commission to continue those dates to March 29 and March 15, 1954, respectively.

The Applicant now states that it requires additional time to prepare its exhibits on engineering studies and market surveys so as to bring them up to date to reflect changed conditions, and, further, that its attorneys are so continuously occupied in other proceedings now long pending that the testimony proposed to be offered at the reopened proceeding cannot be properly prepared by the date now provided by the order issued November 13, 1953.

The Applicant also alleges that it has been informed that its proposed municipal wholesale customers require additional time to make further studies.

No objections have been filed in opposition to the granting of the motion.

The Commission finds: Good cause exists for postponement of hearing in this proceeding as hereinafter ordered.

The Commission orders:

(A) The hearing in this proceeding, reopened by our order issued November 13, 1953, be convened on March 29, 1954, at 10:00 a. m., e. s. t., in the Hearing Room of the Federal Power Commission, 441 G Street NW., Washington, D. C.

(B) The Applicant, on or before March 15, 1954, shall serve upon all parties copies of the testimony and exhibits it proposes to offer at the reopened hearing, including five (5) copies upon Commission Staff Counsel.

(C) In all other respects the order issued November 13, 1953, in this matter shall remain in full force and effect.

Adopted: December 16, 1953.

Issued: December 18, 1953.

By the Commission.

[SEAL] LEON M. FUQUAY,
*Secretary.*

[F. R. Doc. 53-10626; Filed, Dec. 22, 1953; 8:48 a. m.]

[Docket No. G-2316]

TENNESSEE GAS TRANSMISSION CO.

NOTICE OF AMENDED APPLICATION

DECEMBER 17, 1953.

Take notice that Tennessee Gas Transmission Company (Applicant), a Delaware corporation, address Commerce Building, Houston, Texas, filed on December 11, 1953, a first amended application to its application for a certificate of public convenience and necessity filed on November 18, 1953, notice of which was published in the FEDERAL REGISTER on December 12, 1953 (18 F. R. 8192).

Applicant seeks authorization to transport for the account of Equitable Gas Company (Equitable) up to approximately 24,400 Mcf of natural gas per day, such gas to be purchased by Equitable in the Flour Bluffs Field of Nueces County, Texas. Applicant now proposes to utilize unallocated design day sales capacity of its authorized system in order to transport the gas rather than to construct and operate 28,000 horsepower of additional compressor units as proposed in the original application. It does, however, still propose the construction and operation of approximately fifty miles of $10\frac{3}{4}$-inch pipeline extending from the Flour Bluffs Field to Applicant's Compressor Station Number 1 in Texas.

The estimated cost of the proposed facilities is $1,575,000, and Applicant proposes no separate financing in connection with this project.

Protests or petitions to intervene may be filed with the Federal Power Commission, Washington 25, D. C., in accordance with the rules of practice and procedure (18 CFR 1.8 or 1.10) on or before the 7th day of January, 1954. The application is on file with the Commission for public inspection.

[SEAL] LEON M. FUQUAY,
*Secretary.*

[F. R. Doc. 53-10608; Filed, Dec. 22, 1953; 8:45 a. m.]

[Docket No. G-2230]

UNITED NATURAL GAS CO.

ORDER FIXING DATE OF HEARING

United Natural Gas Company (Applicant), a Pennsylvania corporation with its principal office in Oil City, Pennsylvania, filed an application with the Federal Power Commission on August 17, 1953, and supplements thereto on September 14, and October 26, 1953, for a certificate of public convenience and necessity, pursuant to section 7 of the Natural Gas Act, authorizing the operation of facilities and the sale of natural gas subject to the jurisdiction of the Commission as described in the application and supplements thereto on file with the Commission and open to public inspection.

The Commission finds: This proceeding is a proper one for disposition under the provisions of § 1.32 (b) (18 CFR 1.32 (b)) of the Commission's rules of practice and procedure. Applicant having requested that its application be heard under the shortened procedure provided by the aforesaid rule for non-contested proceedings, and no request to be heard, protest or petition having been filed subsequent to the giving of due notice of the filing of the application including publication in the FEDERAL REGISTER on September 4, 1953 (18 F. R. 5375).

The Commission orders:

(A) Pursuant to the authority contained in and subject to the jurisdiction conferred upon the Federal Power Commission by sections 7 and 15 of the Natural Gas Act, and the Commission's rules of practice and procedure, a hearing be held on January 11, 1954, at 9:45 a. m., e. s. t., in the Hearing Room of the Federal Power Commission, 441 G Street NW., Washington, D. C., concerning the matters involved in and the issues presented by the application: *Provided, however*, That the Commission may, after a noncontested hearing, forthwith dispose of the proceedings pursuant to the provisions of § 1.32 (b) of the Commission's rules of practice and procedure.

(B) Interested State commissions may participate as provided by §§ 1.8 and 1.37 (f) (18 CFR 1.8 and 1.37 (f)) of the said rules of practice and procedure.

Adopted: December 16, 1953.

Issued: December 17, 1953.

By the Commission.

[Docket No. G-2335]

OLIN INTERSTATE CORP.

NOTICE OF APPLICATION

DECEMBER 17, 1953.

On December 14, 1953, Olin Interstate Corporation (Applicant), a Delaware corporation with its executive office at 570 Lexington Avenue, New York 22, New York, filed an application for a certificate of public convenience and necessity, pursuant to section 7 of the Natural Gas Act, authorizing the acquisition and operation of all the facilities of Interstate Natural Gas Company, Incorporated (Interstate Natural), a Delaware corporation with its principal office in the Ouchita National Bank Building, Monroe, Louisiana.

The application states, among other things, that Applicant is a wholly owned subsidiary of Olin Industries, Inc.; that Applicant owns more than 99 percent of the outstanding capital stock of Interstate Natural; and, that all of the facilities, properties, contracts and other assets of Interstate Natural are proposed to be acquired by means of a corporate merger if the applied for authorization is granted by this Commission. It is proposed that Applicant shall be the corporation surviving the merger; that its name be changed to "Olin Gas Transmission Corporation"; and, that the facilities acquired from Interstate Natural shall, after the merger, be used and operated "in the same manner as used and operated by Interstate Natural." Applicant also states "no changes are expected to occur other than would occur in any event were such merger not to take place."

The application also states, among other things, that Interstate Natural is a "natural-gas company" under the Natural Gas Act, subject to the jurisdiction of the Commission; that its business, commencing in 1926 and at the present time, has been and is the production, purchase, transportation, and sale of natural gas, both in interstate commerce and intrastate commerce; that its properties are located in the States of Louisiana and Mississippi; that the depreciated original cost of such properties recorded on the books of Interstate Natural as of September 30, 1953, amounted ot $16,310,288; that its net income for the calendar year 1952 was $2,996,414 and for the first nine months of 1953, $2,190,293; and, that as of September 30, 1953, Interstate Natural's capital structure consisted of $16,020,612 capital stock and earned surplus with no outstanding debt.

The application states that Applicant was incorporated in June 1953, and thereafter issued 952,953 shares of capital stock, par value $1.00 per share, to Olin Industries, Inc., in exchange for, among other things, 70,000 shares of capital stock of Interstate Natural; that Applicant has acquired 873,486 shares of Interstate Natural stock at a price of $45 per share, leaving 9,467 shares of Interstate Natural stock outstanding not owned by Applicant; that incident to the merger, Applicant proposes to cancel the capital stock of Interstate Natural owned by it and to issue the stockholders holding the 9,467 shares 6 percent 5-year bonds upon the basis of $45 per share for each share of such capital stock; and, that upon the basis of the foregoing Applicant will have paid for all the capital stock of Interstate Natural, cash and bonds, totaling $42,882,885. The purchase of such stock has been financed principally through the issue and sale to The Prudential Insurance Company of America of $31,300,000 of 4½ percent notes, due July 1, 1955, guaranteed by Olin Industries, Inc. Prior to the maturity of such notes, Applicant proposes to exchange such notes for 18-year 4½ percent notes secured by a mortgage on the physical properties and guaranteed by Olin Oil & Gas Corporation.

Applicant proposes to record the facilities to be acquired from Interstate Natural at $65,526,412, the original cost of which as recorded on the books of Interstate Natural amounted to $40,872,205 as of September 30, 1953. The applicant proposes to record such original cost on its books and also to record an acquisition adjustment (Account 100.5) in the amount of $24,654,207. Applicant alleges that this acquisition adjustment is applicable to the physical properties to be acquired, and that such adjustment is proper based upon reproduction cost and other valuation studies submitted as a part of the application. The application includes a proposed plan to amortize such acquisition adjustment over varying periods, ranging from 4 to 33⅓ years, in the future.

Applicant alleges that, if authorization is granted for the proposed acquisition, it proposes to claim the cost of acquiring Interstate Natural as the basis for future income tax computation and liability and that this "should result in lower Federal income taxes"; that there is "no expectation" of any change of rates for gas sold by Interstate Natural for resale; and, that "no harmful effect will result to any customer" and no change is anticipated in the operation of the facilities or in the sales of natural gas which are subject to the Commission's juridiction.

Applicant requests that the intermediate decision procedure be omitted and waives oral hearing and opportunity to filing exceptions to the decision of the Commission, and requests that the application be disposed of pursuant to the shortened procedure provided for by § 1.32 (b) of the Commission's rules of practice and procedure (18 CFR 1.32 (b)).

Protests or petitions to intervene may be filed with the Federal Power Commission, Washington 25, D. C., in accordance with the Commission's rules of practice and procedure (18 CFR 1.8 or 1.10) on or before the 8th day of January, 1954. The application is on file with the Commission for public inspection.

[SEAL] LEON M. FUQUAY,
*Secretary.*

[F. R. Doc. 53-10625; Filed, Dec. 22, 1953; 8:48 a. m.]

[Docket No. G-2336]

ALABAMA-TENNESSEE NATURAL GAS CO.

ORDER SUSPENDING PROPOSED NEW TARIFF SHEETS

The Commission, by order issued September 24, 1953, at Docket No. G-2253, suspended and deferred the use of Alabama-Tennessee Natural Gas Company's (Alabama-Tennessee) proposed Sixth Revised Sheet No. 4 and Third Revised Sheet No. 7-A to its FPC Gas Tariff, Original Volume No. 1, until March 1, 1954, and until such further time thereafter as said proposed tariff sheets might be made effective in the manner prescribed by the Natural Gas Act, and ordered that a public hearing concerning the lawfulness of Alabama-Tennessee's proposed tariff sheets be held on February 24, 1954.

On November 17, 1953, Alabama-Tennessee filed Fourth Revised Sheet No. 7-A, Second Revised Sheet No. 7-B, and Original Sheets Nos. 7-C,[1] 7-D, 7-E, and 7-F to its FPC Gas Tariff, Original Volume No. 1, proposing to change its general service Rate Schedule G-1 and small general service Rate Schedule SG-1 by instituting a penalty of $10.00 per Mcf of gas taken without prior approval in excess of 1 percent over the contracted maximum daily delivery obligation. A penalty of $1.00 per Mcf of gas is proposed for unauthorized over-runs of up to 1 percent of the maximum contractual obligation.[2]

The proposed penalty provision is alleged to be modeled after the provision in the tariff of Tennessee Gas Transmission Company, Alabama-Tennessee's supplier. It is further alleged that such penalty provision is a "necessary policing measure to become operative at times when deliveries reach full capacity to assure that each resale customer will receive the quantity of gas to which he is entitled under his service agreement * * *"

The penalty provision would apply only to resale customers and may, therefore, result in discrimination against such customers. Furthermore, discrimination between customers to whom the penalty provision would apply may result from the fact that no basis is stated upon which Alabama-Tennessee's approval for over-runs is to be given nor how a buyer may qualify for such approval.

Six customer-companies have protested the proposed penalty provision and have requested that the proposal be suspended and the matter set for hearing.

The proposed penalty provision has not been shown to be justified and may be unjust, unreasonable, unduly discriminatory or preferential.

[1] Alabama-Tennessee requests that Original Sheet No. 7-C be substituted for Third Revised Sheet No. 7-A.

[2] At Docket No. G-2096 a substantially similar penalty provision was proposed by Alabama-Tennessee. The filing proposing such provision was suspended by order of the Commission and subsequently eliminated as a part of the settlement of the proceedings in said Docket No. G-2096 and Docket No. G-2070.

The Commission finds: It is necessary and proper in the public interest, and to aid in the enforcement of the provisions of the Natural Gas Act, that the Commission enter upon a hearing, as hereinafter ordered, pursuant to the authority contained in section 4 of that act, concerning the lawfulness of the rates, charges, classifications, and services, or any of them, contained in Alabama-Tennessee's FPC Gas Tariff, Original Volume No. 1, as proposed to be amended by Fourth Revised Sheet No. 7-A, Second Revised Sheet No. 7-B, and Original Sheets Nos. 7-C, 7-D, 7-E, and 7-F thereto, and that said tariff sheets be suspended as hereinafter provided, and the use thereof be deferred pending hearing and decision thereon.

The Commission orders:

(A) Pursuant to authority contained in and subject to the jurisdiction conferred upon the Federal Power Commission by sections 4, 15, and 16 of the Natural Gas Act, and the Commission's general rules and regulations, including rules of practice and procedure (18 CFR Chapter I), a public hearing be held, commencing on January 18, 1954, at 10:00 a. m., e. s. t., in the Hearing Room of the Federal Power Commission, 441 G Street NW., Washington, D. C., concerning the lawfulness of the rates, charges, classifications, and services or any of them, contained in the aforesaid Alabama-Tennessee Natural Gas Company's FPC Gas Tariff, Original Volume No. 1, as proposed to be amended by Fourth Revised Sheet No. 7-A, Second Revised Sheet No. 7-B, and Original Sheets Nos. 7-C, 7-D, 7-E, and 7-F.

(B) Pending such hearing and decision thereon, Alabama-Tennessee's proposed Fourth Revised Sheet No. 7-A, Second Revised Sheet No. 7-B, and Original Sheets Nos. 7-C, 7-D, 7-E, and 7-F be and the same are hereby suspended and the use thereof deferred until May 17, 1954, and until such further time thereafter as said proposed sheets may be made effective in the manner prescribed by the Natural Gas Act.

(C) Interested State commissions may participate as provided by §§ 1.8 and 1.37 (f) (18 CFR 1.8 and 1.37 (f)) of the Commission's rules of practice and procedure.

Adopted: December 16, 1953.

Issued: December 17, 1953.

By the Commission.

## INTERSTATE COMMERCE COMMISSION

[4th Sec. Application 28758]

BLACKSTRAP MOLASSES FROM GULF PORTS TO SOUTHERN POINTS

APPLICATION FOR RELIEF

DECEMBER 18, 1953.

The Commission is in receipt of the above-entitled and numbered application for relief from the long-and-short-haul provision of section 4 (1) of the Interstate Commerce Act.

Filed by: R. E. Boyle, Jr., Agent, for carriers parties to schedule listed below.

Commodities involved: Blackstrap molasses, distillery molasses residuum and citrus pomace final syrup, carloads.

From: Gulfport, Miss., Mobile, Ala., and New Orleans, La.

To: Specified points in Georgia, North Carolina, and South Carolina.

Grounds for relief: Competition with rail carriers and circuitous routes.

Schedules filed containing proposed rates: W. P. Emerson, Jr., Agent, I. C. C. No. 395, supp. 119.

Any interested person desiring the Commission to hold a hearing upon such application shall request the Commission in writing so to do within 15 days from the date of this notice. As provided by the general rules of practice of the Commission, Rule 73, persons other than applicants should fairly disclose their interest, and the position they intend to take at the hearing with respect to the application. Otherwise the Commission, in its discretion, may proceed to investigate and determine the matters involved in such application without further or formal hearing. If because of an emergency a grant of temporary relief is found to be necessary before the expiration of the 15-day period, a hearing, upon a request filed within that period, may be held subsequently.

By the Commission.

[4th Sec. Application 28759]

VOLCANIC SCORIA FROM ANTONITO AND MESITA, COLO., TO POINTS IN ILLINOIS AND WESTERN TRUNK-LINE TERRITORIES

APPLICATION FOR RELIEF

DECEMBER 18, 1953.

The Commission is in receipt of the above-entitled and numbered application for relief from the long-and-short-haul provision of section 4 (1) of the Interstate Commerce Act.

Filed by: W. J. Prueter, Agent, for carriers parties to his tariff I. C. C. No. A-3560.

Commodities involved: Volcanic scoria, ash or slag, carloads.

From: Antonito and Mesita, Colo.

To: Points in Illinois and western trunk-line territories.

Grounds for relief: Rail competition, circuity, to apply rates constructed on the basis of the short line distance formula, and additional commodity.

Any interested person desiring the Commission to hold a hearing upon such application shall request the Commission in writing so to do within 15 days from the date of this notice. As provided by the general rules of practice of the Commission, Rule 73, persons other than applicants should fairly disclose their interest, and the position they intend to take at the hearing with respect to the application. Otherwise the Commission, in its discretion, may proceed to investigate and determine the matters involved in such application without further or formal hearing. If because of an emergency a grant of temporary relief is found to be necessary before the expiration of the 15-day period, a hearing, upon a request filed within that period, may be held subsequently.

[4th Sec. Application 28760]

PIG IRON FROM KEOKUK, IOWA, TO SAGINAW, MICH.

APPLICATION FOR RELIEF

DECEMBER 18, 1953.

The Commission is in receipt of the above-entitled and numbered application for relief from the long-and-short-haul provision of section 4 (1) of the Interstate Commerce Act.

Filed by: W. J. Prueter, Agent, for carriers parties to schedule listed below.

Commodities involved: Pig iron, in carloads.

From: Keokuk, Iowa.

To: Saginaw, Mich.

Grounds for relief: Competition with rail carriers, and market competition.

Schedules filed containing proposed rates: W. J. Prueter, Agent, I. C. C. No. A-3894, supp. 12.

Any interested person desiring the Commission to hold a hearing upon such application shall request the Commission in writing so to do within 15 days from the date of this notice. As provided by the general rules of practice of the Commission, Rule 73, persons other than applicants should fairly disclose their interest, and the position they intend to take at the hearing with respect to the application. Otherwise the Commission, in its discretion, may proceed to investigate and determine the matters involved in such application without further or formal hearing. [4th Sec. Application 28761]

CANNED OR PRESERVED FOODSTUFFS BETWEEN JACKSON, MISS., AND PACIFIC COAST TERRITORY

APPLICATION FOR RELIEF

DECEMBER 18, 1953.

The Commission is in receipt of the above-entitled and numbered application for relief from the long-and-short-haul provision of section 4 (1) of the Interstate Commerce Act.

Filed by: W. J. Prueter, Agent, for carriers parties to his tariffs I. C. C. Nos. 1552 and 1559.

Commodities involved: Canned or preserved foodstuffs, carloads.

Between: Jackson, Miss., and Pacific Coast territory.

Grounds for relief: Competition with rail carriers, circuitous routes, and to maintain grouping.

Any interested person desiring the Commission to hold a hearing upon such application shall request the Commission in writing so to do within 15 days from the date of this notice. As provided by the general rules of practice of the Commission, Rule 73, persons other than applicants should fairly disclose their interest, and the position they intend to take at the hearing with respect to the application. Otherwise the Commission, in its discretion, may proceed to investigate and determine the matters involved in such application without further or formal hearing. [File No. 70-3149]

NARRAGANSETT ELECTRIC CO.

SUPPLEMENTAL ORDER REGARDING SALE OF PREFERRED STOCK

DECEMBER 17, 1953.

The Commission, by order dated December 3, 1953, having granted and permitted to become effective the application-declaration of The Narragansett Electric Company ("Narragansett"), a public-utility subsidiary company of New England Electric System, a registered holding company, proposing the issuance and sale by Narragansett of 150,000 shares, -- Percent Series, $50 par value cumulative preferred stock, subject to reservations of jurisdiction with respect to the results of competitive bidding under Rule U-50 and all fees and expenses to be paid in connection with the proposed transaction; and

Narragansett having on December 17, 1953, filed a further amendment to its application-declaration herein setting forth the action taken by it to comply with the requirements of Rule U-50, and stating that, pursuant to the invitation for competitive bids, the following bids have been received:

| Group headed by— | Annual dividend rate (per cent) | Price to Company (dollars per share) | Annual cost to Company (per cent) |
|---|---|---|---|
| Kidder, Peabody & Co. and Stone & Webster Securities Corp.. | 4.64 | 50.20 | 4.6215 |
| Blyth & Co., Inc. and Harriman Ripley & Co., Inc. | 4.64 | 50.14 | 4.6270 |
| Lehman Bros. and Goldman, Sachs & Co. — | 4.72 | 50.6499 | 4.6594 |
| Union Securities Corp. and Smith, Barney & Co.... | 4.72 | 50.5739 | 4.6664 |
| White, Weld & Co..... | 4.72 | 50.4077 | 4.6818 |

[1] Exclusive of accrued dividends from Dec. 16, 1953.

The amendment having further stated that Narragansett has accepted the bid of the group headed by Kidder, Peabody & Co. and Stone & Webster Securities Corporation, as set forth above, and that the preferred stock will be reoffered to the public at a price of $51.125 per share, plus accrued dividends from December 16, 1953, resulting in an underwriting spread of $0.925 per share or an aggregate of $138,750; and

The record having been completed with respect to the fees and expenses incurred or to be incurred in connection with the proposed transactions, and it appearing that such fees and expenses are estimated as follows:

| | |
|---|---|
| Fee for registration of the preferred stock under the Securities Act of 1933 | $780 |
| Federal original issue stamp tax | 8,250 |
| Rhode Island fee re increase in capital stock | 7,500 |
| Services of New England Power Service Co. (an affiliated service company) performed at cost | 18,000 |
| Printing costs of the registration statement, prospectus, exhibits and other related documents | 12,000 |
| Printing of the preferred stock certificates in definitive form | 1,000 |
| Services of Lybrand, Ross Bros. & Montgomery, independent public accountants | 1,100 |
| Services of Edwards & Angell, counsel | 4,020 |
| Services of the transfer agent and registrar with reference to the registration and issue of preferred stock certificates | 2,000 |
| Mailing costs, advertising public invitation for bids, filing fees and qualification under Blue Sky Laws, and miscellaneous (including provision for reimbursement of out-of-pocket expenses in connection with the services described above) | 3,970 |

It also appearing that the fee and expenses of Milbank, Tweed, Hope & Hadley, counsel for the purchasers of the new preferred stock, which are to be paid by said purchasers, are estimated at $6,500 and $500, respectively; and

The Commission having examined the record in the light of said amendment, and observing no basis for imposing terms and conditions with respect to the price to be received for said preferred stock, the dividend rate and the underwriters' spread and it appearing to the Commission that the above fees and expenses are not unreasonable if they do not exceed the amounts estimated, and it appearing that jurisdiction heretofore reserved over the results of competitive bidding and over all fees and expenses should be released:

*It is ordered*, That jurisdiction heretofore reserved to consider the results of competitive bidding with respect to the issuance and sale of the new preferred stock and over all fees and expenses to be paid in connection with the proposed sale of said stock, including the fee and expenses of counsel for the purchasers of the new preferred stock, be, and the same hereby is, released and that such application-declaration, as amended, be, and the same hereby is, granted and permitted to become effective forthwith, subject, however, to the terms and conditions prescribed by Rule U-24.

By the Commission.

[SEAL] ORVAL L. DUBOIS, *Secretary.*

[File No. 70-3166]

ELECTRIC BOND AND SHARE CO.

ORDER AUTHORIZING SALE BY PARENT AT COMPETITIVE BIDDING OF SECURITIES OF SUBSIDIARY

DECEMBER 17, 1953.

Electric Bond and Share Company ("Bond and Share"), a registered holding company, having filed an application-declaration pursuant to sections 9, 10 and 12 (d) of the Public Utility Holding Company Act of 1935 ("act") and Rule U-44 (a) and U-50 promulgated thereunder with respect to the following proposed transactions:

Bond and Share heretofore filed with the Commission its Final Comprehensive Plan as finally amended July 7, 1953 (the "Plan"), under section 11 (e) of the act. The Plan was approved by orders of the Commission dated February 20, 1953, and July 15, 1953, and by order of the United States District Court for the Southern District of New York dated July 16, 1953.

The Plan proposed, among other things, that Bond and Share would dispose of certain of its holdings of common stock of United Gas Corporation ("United Gas") by capital distribution, dividend distributions and rights offerings to the Bond and Share stockholders. Provision was also made that the remainder of the shares of United Gas stock to be disposed of under the Plan should be disposed of by Bond and Share in such manner and on such terms as it deemed appropriate within two years after the effective date of the Plan which was July 16, 1953. Bond and Share now holds 1,755,053 shares of United Gas common stock (being approximately 13.5 percent of the outstanding shares of such stock).

Bond and Share now proposes to sell at public offering after receiving competitive bids 100,000 shares of its present holdings of United Gas common stock plus such additional shares not exceeding 15,000 as Bond and Share may acquire during the course of stabilizing operations to be effected by Bond and Share in connection with the proposed sale. Bond and Share presently proposes to publish its notice of public invitation for bids not later than December 18, 1953 and to receive bids not earlier than 3:45 p. m., on December 21, 1953. Bond and Share proposes to comply with the provisions of Rule U-50 of the Commission with the exception that it requests that the Commission reduce the 10-day period provided by sub-division (b) of that rule to the extent necessary to permit Bond and Share to carry out the time schedule just described respecting the publication of its invitation for bids and the receipt of bids.

Bond and Share requests permission from the Commission to purchase not more than 15,000 shares of United Gas common stock for the purpose of stabilizing the market for that stock on the New York Stock Exchange. It is contemplated that such stabilizing purchases may commence immediately upon the issuance of the order of the Commission relating to this application-declaration and that such purchases will be effected at a price (exclusive of a commission) not in excess of the last preceding sale price of the United Gas common stock on the New York Stock Exchange. It is further contemplated that such stabilizing purchases may continue up to the receipt by Bond and Share of bids for the shares of United Gas common stock herein proposed to be sold. As above indicated all shares of such stock purchased for stabilizing purposes will be sold by Bond and Share together with the 100,000 shares of United Gas stock proposed to be sold as herein provided.

Bond and Share requests that the Commission's order with respect to the foregoing transactions recite that such transactions are necessary or appropriate to the integration or simplification of the holding company system of which Bond and Share is a member and are necessary or appropriate to effectuate the provisions of section 11 (b) of the act, all in accordance with the meaning and requirements of the Internal Revenue Code, as amended, including section 1808 (f) and Supplement R thereof.

Due notice having been given of the filing of the application-declaration, and a hearing not having been requested or ordered by the Commission, and the Commission finding with respect to said application-declaration that the applicable standards of the act and the rules are satisfied and that it is not necessary to impose any terms or conditions other than those set forth below, and that the 10-day period as provided for in Rule U-50 may be shortened to the extent requested, and the Commission deeming it appropriate that said application-declaration be granted and permitted to become effective forthwith, subject to the reservation of jurisdiction hereinafter provided:

*It is ordered*, Pursuant to Rule U-23 and the applicable provisions of the act, that said application-declaration be, and it hereby is, granted and permitted to become effective forthwith, subject to the conditions prescribed in Rule U-24 and to the following additional terms and conditions:

(1) That the proposed sale by Bond and Share of the common stock of United Gas shall not be consummated until the results of competitive bidding shall have been made a matter of record in this proceeding and a further order shall have been issued in the light of the record so completed, which order may contain such further terms or conditions as may then be deemed appropriate;

(2) That jurisdiction be reserved with respect to the fees and expenses incurred or to be incurred by Bond and Share in connection with the proposed sale of stock;

(3) That jurisdiction be reserved to make, to the extent appropriate, further orders, findings and recitals pursuant to Supplement R and section 1808 (f) of the Internal Revenue Code, as amended.

By the Commission.

[File No. 812-850]

INVESTORS DIVERSIFIED SERVICES, INC.

NOTICE OF FILING OF APPLICATION FOR ORDER APPROVING INCENTIVE PAY PLAN

DECEMBER 17, 1953.

Notice is hereby given that Investors Diversified Services, Inc., of Minneapolis, Minnesota, ("IDS"), a registered face-amount certificate company, has filed an application pursuant to section 17 (d) of the Investment Company Act of 1940 and Rule N-17D-1 of the rules and regulations promulgated thereunder for an order of the Commission permitting it to effect an incentive pay plan for the benefit of its district managers, sales representatives and divisional office secretaries who are directly and indirectly offering for sale and selling face-amount certificates and other securities for which applicant is the underwriter, under which proposed payments are to be made on or about October 1, 1954, based on business done during the year 1953. The proposed plan is similar in purpose, terms and conditions to like plans in effect for the year 1952 and previous years.

IDS, which is controlled by Alleghany Corporation, a holding company, is also registered with the Commission as a broker under the provisions of the Securities Exchange Act of 1934. It is the underwriter and distributor of securities issued by three wholly owned face-amount certificate companies; Investors Syndicate Title & Guaranty Co., Investors Syndicate of Canada, Ltd., and Investors Syndicate of America, Inc., the latter a registered face-amount certificate company under the act, and of securities issued by Investors Mutual, Inc., Investors Stock Fund, Inc., and Investors Selective Fund, Inc. registered open-end investment companies; and Investors Mutual of Canada, Ltd., an open-end investment company, all of which were organized and promoted by IDS.

The purpose of the proposed incentive pay plan is to reward the employees of IDS for their ability in obtaining what the applicant refers to as "quality business." For the most part, the plan gives weight to sales made that are not liquidated or delinquent. The performance of individuals is proposed to be measured against the national performance of IDS and incentive payments are proposed to be made to each individual who qualifies under the terms of the plan with respect to period of employment and the sale of a certain minimum amount of securities.

Rule N-17D-1, promulgated under section 17 (d) of the act, provides, among other things, that it shall be unlawful, with certain exceptions not applicable here, for any affiliated person of a registered investment company or of any company controlled by any such registered company to participate in, or effect any transaction in connection with any bonus, profit-sharing or pension plan in which any such registered or controlled company is a participant unless an application regarding such plan has been granted by the Commission.

For a more detailed statement of the matters of fact and law asserted, all interested persons are referred to said

application which is on file in the office of the Commission in Washington, D. C.

Notice is further given that any interested person may, not later than January 5, 1954, at 5:30 p. m., submit to the Commission in writing any facts bearing upon the desirability of a hearing on the matter and may request that a hearing be held, such request stating the nature of his interest, the reasons for such request and the issues, if any, of fact or law proposed to be controverted, or he may request that he be notified if the Commission should order a hearing thereon. Any such communication or request should be addressed: Secretary, Securities and Exchange Commission, 425 Second Street NW., Washington 25, D. C. At any time after said date, the application may be granted as provided in Rule N-5 of the rules and regulations promulgated under the act.

By the Commission.

[SEAL] ORVAL L. DUBOIS, *Secretary.*

## TITLE 7—AGRICULTURE

### Chapter IX—Production and Marketing Administration (Marketing Agreements and Orders), Department of Agriculture

HANDLING OF MILK IN CERTAIN MARKETING AREAS

ORDER TERMINATING SPECIFIED TERMS OF CERTAIN ORDERS

Pursuant to the applicable provisions of the Agricultural Marketing Agreement Act of 1937, as amended (7 U. S. C. 601 et seq.), hereinafter referred to as the "act", and of certain orders and orders as amended, as specified below, regulating the handling of milk in respective marketing areas, hereinafter referred to as the "orders", it is hereby found and determined that:

(a) The terms "Borden Co., Greenville, Wisconsin"; "Borden Co., Black Creek, Wisconsin" and "Carnation Co., Jefferson, Wisconsin" where they appear in the lists of plants (headed "Present Operator and Location", "Company(ies) and Location(s)" or "Concern and Location") and included in the following orders appearing in Title 7 of the Code of Federal Regulations, do not tend to effectuate the declared policy of the act:

Chicago, Part 941; Cincinnati, Part 965; Cleveland, Part 975; Columbus, Part 974; Dayton-Springfield, Part 971; Detroit, Part 924; Fort Smith, Part 976; Kansas City, Part 913; Knoxville, Part 988; Lima, Part 995; Louisville, Part 946; Memphis, Part 918; Milwaukee, Part 907; Minneapolis-St. Paul, Part 973; Muskegon, Part 985; Nashville, Part 978; Neosho Valley, Part 928; North Texas, Part 943; Oklahoma City, Part 905; Paducah, Part 977; Puget Sound, Part 925; Rockford-Freeport, Part 991; St. Louis, Part 903; San Antonio, Part 949; South Bend-La Porte, Part 967; Springfield, Part 921; Stark County, Part 963; Toledo, Part 930; Tri-State, Part 972; Tulsa-Muskogee, Part 906; and Wichita, Part 988.

(b) Notice of proposed rule making, public procedure thereon, and 30 days prior notice of the effective date hereof are impracticable, unnecessary and contrary to the public interest in that (1) the operators of said plants are not now reporting and in the future will not report prices at the said plants and for this reason prices at the said plants are not being used in any of the computations affecting the specified orders; (2) the continuance of these designations no longer serves any useful purpose; (3) the essential purpose of this termination order is to give to all interested persons notice that prices at said plants are no longer being used in any computations set forth in any of the specified orders; (4) this termination order has no material effect upon any person and does not require of any person substantial or extensive preparation prior to its effective date

*It is therefore ordered*, That the terms "Borden Co., Greenville, Wisconsin"; "Borden Co., Black Creek, Wisconsin" and "Carnation Co., Jefferson, Wisconsin" where they appear in the lists of plants (headed "Present Operator and Location", "Company(ies) and Location(s)" or "Concern and Location") and included in the specified provisions of the following orders, appearing in Title 7 of the Code of Federal Regulations, be and they hereby are terminated:

| *Orders* | *Specified provisions* |
|---|---|
| Part 941—Milk in the Chicago, Ill., marketing area. | § 941.52 (c) (1). |
| Part 965—Milk in the Cincinnati, Ohio, marketing area. | § 965.50 (a). |
| Part 975—Milk in the Cleveland, Ohio, marketing area. | § 975.60 (a). |

PART 913—MILK IN THE GREATER KANSAS CITY MARKETING AREA

ORDER AMENDING THE ORDER, AS AMENDED, REGULATING HANDLING

§ 913.0 *Findings and determinations.* The findings and determinations hereinafter set forth are supplementary and in addition to the findings and determinations previously made in connection with the issuance of the aforesaid order

and of each of the previously issued amendments thereto; and all of said previous findings and determinations are hereby ratified and affirmed, except insofar as such findings and determinations may be in conflict with the findings and determinations set forth herein.

(a) *Findings upon the basis of the hearing record.* Pursuant to the provisions of the Agricultural Marketing Agreement Act of 1937, as amended (7 U. S. C. 601 et seq.), and the applicable rules of practice and procedure, as amended, governing the formulation of marketing agreements and marketing orders (7 CFR Part 900), a public hearing was held upon certain proposed amendments to the tentative marketing agreement and to the order, as amended, regulating the handling of milk in the Greater Kansas City marketing area. Upon the basis of the evidence introduced at such hearing and the record thereof, it is found that:

(1) The said order, as amended, and as hereby further amended, and all of the terms and conditions thereof, will tend to effectuate the declared policy of the act;

(2) The parity prices of milk as determined pursuant to section 2 of the act are not reasonable in view of the price of feeds, available supplies of feeds, and other economic conditions which affect market supply of and demand for milk in the marketing area, and the minimum prices specified in the order, as amended, and as hereby further amended, are such prices as will reflect the aforesaid factors, insure a sufficient quantity of pure and wholesome milk, and be in the public interest; and

(3) The said order, as amended, and as hereby further amended, regulates the handling of milk in the same manner as, and is applicable only to persons in the respective classes of industrial and commercial activity, specified in a marketing agreement upon which a hearing has been held.

(b) *Determinations.* It is hereby determined that handlers (excluding cooperative associations of producers who are not engaged in processing, distributing or shipping milk covered by this order amending the order, as amended, which is marketed within the Greater Kansas City marketing area) of more than 50 percent of the milk which is marketed within the said marketing area, refused or failed to sign the proposed marketing agreement regulating the handling of milk in the said marketing area, and it is hereby further determined that:

(1) The refusal or failure of such handlers to sign said proposed marketing agreement tends to prevent the effectuation of the declared policy of the act;

(2) The issuance of this order amending the order, as amended, is the only practical means, pursuant to the declared policy of the act, of advancing the interests of producers of milk which is produced for sale in the said marketing area; and

(3) The issuance of this order amending the order, as amended, is approved or favored by at least two-thirds of the producers who, during the determined representative period (August 1953) were engaged in the production of milk for sale in the said marketing area.

*Order relative to handling.* It is therefore ordered that on and after the effective date hereof the handling of milk in the Greater Kansas City marketing area shall be in conformity to and compliance with the terms and conditions of the aforesaid order, as amended, and as hereby further amended, and the aforesaid order, as amended, is hereby further amended as follows:

1. Delete § 913.10 and substitute therefor the following:

§ 913.10 *Pool plant.* "Pool plant" means an approved plant other than the plant of a producer-handler:

(a) During any delivery period within which an amount of milk equal to 15 percent of more of such plant's receipts of milk from dairy farmers who meet the specifications (other than delivery to a pool plant) of § 913.7 is disposed of from such plant as Class I milk on routes operated in the marketing area;

(b) During any delivery period of September, October, November, December, January, or February within which an amount of milk equal to 30 percent or more of such plant's receipts of milk from dairy farmers who meet the specifications (other than delivery to a pool plant) of § 913.7 is transferred in bulk to a plant described in paragraph (a) of this section. Any such plant which is a pool plant in each of the delivery periods of September, October, November, December, January, and February shall be a pool plant for each of the following months of March, April, May, June, July, and August, regardless of the quantity of milk then disposed of to other pool plants, if a written request for pool plant status for such six months' period is received from the operator of such plant by the market administrator before March 1; or

(c) (1) During any delivery period within which such plant is operated by a cooperative association, and 75 percent or more of the milk delivered during the delivery period by producers who are members of such association is received at the pool plants of other handlers.

(2) If a handler operates more than one approved plant, the percentage requirements of this definition shall apply to the combined receipts and disposition of such multiple plant operation except that no plant which was not an approved plant during each of the preceding delivery periods of September through February shall be a pool plant as a part of such multiple plant operation during any of the delivery periods of March through August unless such multiple plant operation qualified under paragraph (a of this section for pool plant status for such delivery period.

(Sec. 5, 49 Stat. 753, as amended; 7 U. S. C. and Sup. 608c)

Issued at Washington, D. C., this 18th day of December 1953 to be effective on and after the 1st day of February 1954.

[SEAL] JOHN H. DAVIS,
*Assistant Secretary of Agriculture.*

[F. R. Doc. 53-10671; Filed, Dec. 23, 1953; 8:50 a. m.]

## PART 927—MILK IN THE NEW YORK METROPOLITAN MARKETING AREA

### DETERMINATION OF EQUIVALENT OF PRICES PAID AT CERTAIN MIDWESTERN CONDENSERIES

Pursuant to the provisions of the Agricultural Marketing Agreement Act of 1937, as amended (7 U. S. C. 601 et seq.), and to the applicable provisions of the order, as amended, regulating the handling of milk in the New York metropolitan milk marketing area (7 CFR Part 927), hereinafter referred to as the "order", it is hereby found and determined as follows:

1. Prices are no longer being reported for the condenseries formerly operated by the Borden Company at Greenville and Black Creek, Wisconsin, and by the Carnation Company at Jefferson, Wisconsin.

2. In accordance with § 927.45 it is hereby determined that the average of the prices paid by the remaining midwestern condenseries, as reported by the United States Department of Agriculture, are equivalent to and comparable with the prices heretofore announced by the market administrator for the 18 condenseries pursuant to § 927.46 (a) (8).

3. Notice of proposed rule making, public procedure thereon, and 30 days prior notice of the effective date hereof are impracticable, unnecessary and contrary to the public interest in that (1) the operators of said plants are not now reporting and in the future will not report prices at the said plants and for this reason prices at the said plants are not being used in any of the computations affecting the order; (2) the essential purpose of this determination is to give to all interested persons notice that prices at said plants are no longer being used in any computations set forth in the order; (3) this determination has no material effect upon any person and does not require of any person substantial or extensive preparation prior to its effective date.

(Sec. 5, 49 Stat. 753, as amended; 7 U. S. C. 608c)

Issued at Washington, D. C., this 18th day of December 1953, to become effective immediately.

[SEAL] JOHN H. DAVIS,
*Assistant Secretary.*

[F. R. Doc. 53-10672; Filed, Dec. 23, 1953; 8:50 a. m.]

## PART 959—IRISH POTATOES GROWN IN THE COUNTIES OF CROOK, DESCHUTES, JEFFERSON, KLAMATH, AND LAKE IN OREGON, AND MODOC AND SISKIYOU IN CALIFORNIA

### APPROVAL OF PROPOSED BUDGET OF EXPENSES AND RATE OF ASSESSMENT

Notice of proposed rule making regarding rules and regulations relative to a proposed budget of expenses and rate of assessment, to be made effective under Marketing Agreement No. 114 and Order No. 59, as amended (7 CFR Part 959), regulating the handling of Irish potatoes grown in the counties of Crook, Deschutes, Jefferson, Klamath, and Lake in the State of Oregon, and Modoc and Siskiyou in the State of California, was published in the FEDERAL REGISTER (18 F. R. 7323) on November 19, 1953. This regulatory program is effective under the Agricultural Marketing Agreement Act of 1937, as amended (48 Stat. 31, as amended; 7 U. S. C. 601 et seq.).

After consideration of all relevant matters presented including the budget of expenses and rate of assessment set forth in the aforesaid notice, which rules and regulations were adopted and submitted for approval by the Oregon-California Potato Committee, established pursuant to said marketing agreement and amended order, the following rules and regulations are hereby approved.

§ 959.206 *Budget of expenses and rate of assessment.* (a) The expenses necessary to be incurred by the Oregon-California Potato Committee, established pursuant to Marketing Agreement No. 114 and Order No. 59, as amended (§§ 959.1 to 959.88), to enable such committee to carry out its functions pursuant to the provisions of the aforesaid marketing agreement and amended order during the fiscal year ending June 30, 1954, will amount to $14,400.00;

(b) The rate of assessment to be paid by each handler who first ships potatoes shall be one-fourth of one cent ($0.0025) per hundredweight handled by him as the first handler thereof during said fiscal year; and

(c) The terms used in this section shall have the same meaning as when used in Marketing Agreement No. 114 and Order No. 59, as amended (§§ 959.1 to 959.88).

(Sec. 5, 49 Stat. 753, as amended; 7 U. S. C. and Sup. 608c)

Done at Washington, D. C., this 18th day of December 1953, to become effective 30 days after publication hereof in the FEDERAL REGISTER.

[SEAL] JOHN H. DAVIS,
*Assistant Secretary of Agriculture.*

[F. R. Doc. 53-10674; Filed, Dec. 23, 1953; 8:50 a. m.]

[Docket No. AO-160-A-14-R01]

## PART 961—MILK IN THE PHILADELPHIA, PENNSYLVANIA, MARKETING AREA

### ORDER AMENDING THE ORDER, AS AMENDED, REGULATING HANDLING

§ 961.0 *Findings and determinations.* The findings and determinations hereinafter set forth are supplementary and in addition to the findings and determinations previously made in connection with the issuance of the aforesaid order and each of the previously issued amendments thereto; and all previous findings and determinations are hereby ratified and affirmed, except insofar as such findings and determinations may be in conflict with the findings and determinations set forth herein.

(a) *Findings upon the basis of the hearing record.* Pursuant to the provisions of the Agricultural Marketing Agreement Act of 1937, as amended (7 U. S. C. 601 et seq.), and the applicable rules of practice and procedure governing the formulation of marketing agreements and orders (7 CFR Part 900), a public hearing was held at Philadelphia, Pennsylvania, on August 12–13, 1952, January 28, 1953, February 24–27, 1953, and March 5–6, 1953, upon proposed amendments to the tentative marketing agreement and to the order, as amended, regulating the handling of milk in the Philadelphia, Pennsylvania, marketing area. Upon the basis of the evidence introduced at such hearing and the record thereof, it is hereby found that:

(1) The said order, as amended, and as hereby further amended, and all the terms and conditions of said order, as amended, and as hereby further amended, will tend to effectuate the declared policy of the act;

(2) The parity prices of milk produced for sale in said marketing area as determined pursuant to section 2 of the act are not reasonable in view of the price of feeds, available supplies of feeds, and other economic conditions which affect market supply of and demand for such milk and the minimum prices specified in the order, as amended, and as hereby further amended, are such prices as will reflect the aforesaid factors, insure a sufficient quantity of pure and wholesome milk and be in the public interest; and

(3) The said order, as amended, and as hereby further amended, regulates the handling of milk in the same manner as and is applicable only to persons in the respective classes of industrial and commercial activity specified in a marketing agreement upon which a hearing has been held.

(b) *Additional findings.* It is hereby found and determined that good cause exists for making effective not later than January 1, 1954, this order amending the order, as amended. This action is necessary in the public interest to reflect current marketing conditions. Accordingly, any delay in the effective date of this order beyond the aforesaid date, will seriously impair orderly marketing of milk in the Philadelphia, Pennsylvania, marketing area. The provisions of the said amendatory order are well known to handlers, the public hearing having been held on dates set forth under paragraph (a) of this section, a recommended decision having been issued on August 20, 1953, and the decision of the Secretary on December 8, 1953. Reasonable time under the circumstances has been afforded persons affected to prepare for its effective date. Therefore, it would be impracticable, unnecessary, and contrary to the public interest to delay the effective date of this amendatory order 30 days after its publication in the FEDERAL REGISTER (See sec. 4 (c) Administrative Procedure Act, 5 U. S. C. 1001 et seq.).

(c) *Determinations.* It is hereby determined that handlers (excluding cooperative associations of producers who are not engaged in processing, distributing or shipping the milk covered by this order amending the order, as amended, which is marketed within the Philadelphia, Pennsylvania, marketing area) of more than 50 percent of the milk which is marketed within the said marketing area, refused or failed to sign the proposed marketing agreement regulating the handling of milk in the said marketing area, and it is hereby further determined that:

(1) The refusal or failure of such handlers to sign said proposed marketing agreement tends to prevent the effectuation of the declared policy of the act;

(2) The issuance of this order amending the order, as amended, is the only practical means pursuant to the declared policy of the act of advancing the interests of producers of milk which is produced for sale in the said marketing area; and

(3) The issuance of this order amending the order is approved or favored by at least two-thirds of the producers who during the determined representative period (October 1953) were engaged in the production of milk for sale in the said marketing area.

*Order relative to handling.* It is therefore ordered that on and after the effective date hereof the handling of milk in the Philadelphia, Pennsylvania, marketing area shall be in conformity to and in compliance with the terms and conditions of the aforesaid order, as amended, and as hereby further amended, and the aforesaid order, as amended, is hereby further amended as follows:

1. Delete § 961.6 (c) and substitute:

(c) Any other plant from which milk is supplied to a pasteurizing or bottling plant described in paragraph (b) of this section: *Provided*, That any such other plant shall not be included in this definition during any month in which there is shipped from the plant only Class II milk as defined in § 961.31 or during any of the months of October, November, December, and January in which shipments are made from the plant on less than 11 days, or during any other month in which shipments allocated to Class I are not more than 25,000 pounds, to such pasteurizing and bottling plant or to a plant or plants supplying such pasteurizing or bottling plant.

2. In § 961.43 delete the 2d proviso and substitute: "*And provided further*, That for Class I milk disposed of in an area where the handling of milk is regulated by another order of the Secretary the price effective under such other order shall apply, except that for Class I milk disposed of in the New York metropolitan milk marketing area, the price shall be the Class I–A price pursuant to the New York order less such payment as is required on such milk pursuant to the New York order."

(Sec. 5, 49 Stat. 753, as amended; 7 U. S. C. 608c)

Issued at Washington, D. C., this 18th day of December 1953, to be effective on and after the 1st day of January 1954.

[SEAL] JOHN H. DAVIS,
*Assistant Secretary of Agriculture.*

[F. R. Doc. 53-10673; Filed, Dec. 23, 1953; 8:50 a. m.]

# TITLE 14—CIVIL AVIATION

## Chapter I—Civil Aeronautics Board

### Subchapter A—Civil Air Regulations

[Supplement 3]

### PART 40—SCHEDULED INTERSTATE AIR CARRIER CERTIFICATION AND OPERATION RULES

MISCELLANEOUS CAA RULES

On April 13, 1953, the Civil Aeronautics Board adopted a revision of Part 40 containing major changes in the certification and operation rules applicable to domestic scheduled interstate air carriers. On October 21, 1953, the Administrator of Civil Aeronautics published in 18 F. R. 6670, rules which he proposed to adopted for the purpose of implementing the Board's revised Part 40. Interested persons were afforded an opportunity to submit written data, views, or arguments. Consideration has been given to all relevant matter presented.

This supplement sets forth the rules which the Administrator is adopting to implement revised Part 40. In the interest of safety in air commerce, the supplement is made effective on the effective date of revised Part 40. Compliance with the effective date provision of section 4 of the Administrative Procedure Act would be impracticable, and therefore is not required.

The following rules are hereby adopted:

§ 40.12–1 *Application for air carrier operating certificate (CAA rules which apply to § 40.12)*—(a) *General.* (1) The holder of a certificate of convenience and necessity shall apply to the appropriate regional administrator for an air carrier operating certificate at least 30 days prior to the date proposed for beginning scheduled interstate air transportation within the continental limits of the United States. The application shall be prepared in loose-leaf form, on white paper approximately 8'' x 10½'' in size, and using one side of the sheet only. The application shall be executed by a duly authorized officer or employee of the applicant having knowledge of the matters set forth therein, and shall have attached thereto two copies of the appropriate written authority issued to such officer or employee by the applicant.

(2) Two copies of the application, and of subsequent amendments thereto, shall be filed with the Regional Administrator having jurisdiction over the area in which the principal office of the air carrier is located. When any facility or service directly affecting the operation of the air carrier concerned is furnished by other than the applicant or the Federal Government, at least two copies of the contract or working agreement concerning such facilities or service shall be submitted with the application. In this connection, if formal contracts covering such facilities or service have not been completed, letters showing agreement between the contracting parties will be accepted until copies of the formal contract are obtainable.

(b) *Format of application.* The application shall be in the form of a letter and shall contain the information outlined below:

To: Regional Administrator, Civil Aeronautics Administration.

In accordance with section 604 of the Civil Aeronautics Act of 1938, as amended, and the Civil Air Regulations, application is hereby made for an Air Carrier Operating Certificate.

Give exact name and full post office address of applicant.

Give the name, title, and post office address of the official or employee to whom correspondence in regard to the application is to be addressed.

SECTION I. *Operations.* A. State whether the type of service proposed is for the carriage of passengers, goods, or mail, or a particular combination thereof. If the type of service is not the same for each route or portion thereof, specify the type of service for each route or portion of a route.

B. State whether the type of operation proposed is day or night, visual flight rules, instrument or over-the-top, or a particular combination thereof. If the type of operation is not the same for each route or route segment, specify the type of operation for each route or route segment.

SEC. II. *Schedule.* A. Submit a proposed schedule plan (or plans if seasonal changes or differences in equipment are involved) indicating the following:

1. Block to block time and mileage between scheduled stops.
2. Ground time at each intermediate and terminal stop.

B. Specify the basis upon which the proposed schedule has been computed, indicating the following:

1. Cruising speed and altitude.
2. Percentage of horsepower.
3. Direction and velocity of prevailing winds.

SEC. III. *Route.* A. Submit a map suitable for aerial navigation on which are shown the exact geographical track of the proposed routes, and information with respect to terminal and intermediate stops, available landing areas, and radio navigational facilities. This material will be indicated in a manner that will facilitate identification. The applicant may use any method that will clearly distinguish the information, such as different colors, different types of lines, etc. For example, if different colors are used, the identification will be accomplished as follows:

1. Airway routes: Black.
2. Direct routes: Green.
3. Terminal and regular intermediate stops: Orange circle.
4. Alternate landing fields or areas: Purple circle.
5. Other available landing fields or areas; Yellow circle.
6. Indicate the location and normal operating range of all radio navigational facilities to be used in connection with the proposed operation.

B. *Airports.* Furnish the following information with regard to each regular, alternate, refueling, and provisional airport to be used in the conduct of the proposed operation.

1. Name of airport.
2. Location (by coordinates, and by name of nearest city or town, and direction and distance thereto).
3. Class of airport or landing area (municipal, commercial, military, private or marked auxiliary).
4. Altitude above sea level.
5. Dimensions in linear feet of landing space available.
6. If hard-surfaced runways are provided, give number, direction, length and width of each and indicate type of surfacing.
7. Obstructions (list adjacent obstructions, giving height and location, or attach appropriate C. G. A. L. charts if available).
8. Airport lighting (include beacon, auxiliary beacon, boundary lights, floodlights, etc., and any emergency lighting equipment; and by whom operated).
9. List refueling facilities available.
10. Is airport control tower provided and by whom?
11. Itemize radio navigational facilities provided and indicate the operating agency.
12. Does runway gradient exceed 2 percent? If so, state gradient.
13. What provisions are made for protection of passengers during loading and unloading at scheduled stop airports?
14. Prevailing winds?
15. Where necessary, are adequate snow removal facilities available?

C. *Weather reporting.* 1. Outline the weather service proposed to be used for dispatching over each route; the source, if other than a United States Weather Bureau Station; list in detail the location and agency in control of stations furnishing reports for each service; the frequency and method of collection and dissemination of weather information. Outline available terminal and route forecasting services, the type of maps and the intervals at which they are made each day.

2. Where it has been determined that additional weather reporting services will be required of the U. S. Weather Bureau for the type of operation involved, the air carrier will apply in writing to the appropriate Weather Bureau Regional Office. The request for the weather reporting services considered essential should be made coincidental with this application to the Civil Aeronautics Administration.

3. For operations within the continental limits of the United States, if other than a U. S. Weather Bureau Station, show proof of U. S. Weather Bureau approval of the service and specify the meteorological facilities available, the number of personnel and the duties of each, such as the making of weather maps, forecasts, observations, etc.

D. *Airway lighting.* List in detail all airway lighting on the routes other than those airway lighting facilities owned and operated by the Civil Aeronautics Administration if application includes request for night VFR operation.

SEC. IV. *Radio facilities—A. Communications.* List company radio ground communication facilities installed, proposed to be installed, and those available to, but not owned by applicant, for each route. The expected communication coverage of all MF and HF ground facilities should be provided in map form. In the case of VHF, the expected coverage at exemplary altitudes should be outlined. Aircraft reporting and general change points, and frequencies should be specified either on the maps or as an attachment. (If owned by other than applicant, attach 2 certified copies of operating agreement.) List the following details for each station:

*Transmitters.* List the following information in regard to each transmitter:

1. Make and model number.
2. Remotely or locally controlled.
3. Types of emission and antenna power for each type of emission.
4. Number of frequency channels provided and actual frequencies in kilocycles proposed to be used.
5. Method of frequency change (quick shift or manual tuning).
6. Primary power source, voltage, phase, etc., and whether commercial source or locally generated.
7. Auxiliary power source.
8. Functional purpose of transmitter. If transmitter is used for more than one function, list in order of primary and secondary functions as—

a. Radiotelephone plane to ground primary purpose and radiotelephone point to point secondary purpose, or

b. Radiotelephone point to point primary purpose and standby radiotelephone plane to ground secondary purpose, etc.

*Receivers.* 1. List each receiver by type of model number and state its primary function, i. e., plane-to-ground guard, point-to-point C. W. or point-to-point radiotelephony.

2. List frequency range of each receiver and state which frequencies in each receiver are crystal controlled, if any.

3. Describe receiver installation to show number of receivers locally controlled and number remotely controlled.

B *Radio navigational facilities.* List each ground radio navigational facility, other than those operated by the United States Government, to be used in the conduct of the proposed operations (if privately owned ground radio navigational facilities are to be used and are owned by other than the applicant, attach two certified copies of the operating agreement pertaining to the use of such facilities). List the following information with respect to each facility:

1. Type of facility, i. e., ILS, GCA, Non-Directional Radio Beacon LF and VHF Radio Ranges, Loran, etc.
2. Estimated effective range (in miles).
3. Coordinates and location with respect to field or landing area.
4. Power supply, i. e., commercial or locally generated.
5. Auxiliary power supply.
6. Operating frequency or frequencies.

C. *Aircraft radio equipment.* List and describe the aircraft radio equipment installed in each aircraft by:

1. Type number.
2. Manufacturer.
3. Frequency range.
4. Operating frequencies.
5. Emergency power supply.
6. Antenna system.

SEC. V. *Weather minimums.* A. Submit in detail the proposed ceiling and visibility limitations for take-off for instrument flight and let-down-through at each regular, alternate, refueling, and provisional airport. Differentiate between daylight and darkness in the listing, and where more than one type of aircraft is to be utilized, and a differential of limitations exists, indicate proposed limitations for each type of aircraft.

B. Submit for each proposed scheduled stop and alternate airport a detailed flight procedure for instrument approach and let-down-through and where specific procedures are necessary because of terrain or traffic conditions, submit a detailed flight procedure for take-off and climb (such procedure should be set up on the basis of the ceiling and visibility minimums proposed.)

C. The above information may be submitted on Forms ACA-511 of the air carrier's proposed operations specifications.

SEC. VI. *Aircraft.* A. List the following information, as applicable, for each aircraft to be used in the proposed operations:

1. The name of the manufacturer.
2. Certification basis and category.
3. Manufacturer's model number.
4. Name of the manufacturer and type number of engines.
5. Name of manufacturer and type number of propellers.
6. N registration number and aircraft designation.
7. Type of service in which aircraft will be used (carriage of persons, property, mail, or combination thereof).
8. Will aircraft be used in regular or reserve service?
9. What type of operation (day, night, visual flight rules, instrument (over-the-top)) will be conducted with this aircraft?
10. List each route or portion thereof over which this aircraft is to be operated and the maximum gross weight proposed for each route or portion thereof.
11. What is the service ceiling of each type aircraft with one engine inoperative?
12. List and describe installation and location of all lifesaving equipment and emergency supplies carried aboard each aircraft, such as life rafts, life preservers, portable emergency transmitters, Very pistols, and emergency rations. (If the same equipment is not carried during all seasons of the year, and on all routes, list and explain the difference.)

SEC. VII. *Maintenance: Aircraft, engines, and accessories.* A. Furnish an organization chart indicating the authority and the duties of the maintenance and inspection personnel employed by the applicant and/or any other person with whom arrangements have been made for the performance of maintenance and inspection functions.

B. Furnish a schedule of overhauls, inspections and checks and the time limitations for such functions which will be performed on each type of aircraft to include the airframes, powerplants, propellers and appliances. The schedule should be sufficiently detailed to indicate all of the overhauls, inspections and checks which will be performed on all components of each type of air carrier aircraft. The schedule should be listed under the following general headings:

1. Aircraft components:
   a. Wings.
   b. Fuselage.
   c. Empennage.
   d. Landing gear.
   e. Wheels and brakes.
   f. Center section (when applicable).
   g. Nacelles.
   h. Control System.
   i. Hydraulic system.
   j. Accessories (aircraft).
   k. Fuel and oil system (aft of firewall).
   l. Fuel tanks.
   m. Cabin pressurizing and heating systems.
2. Engine components:
   a. Engine.
   b. Accessories (engine).
   c. Propellers.
   d. Fuel and oil system (forward of firewall).
   e. Oil tanks.
3. Instruments:
   a. Flight instruments.
   b. Aircraft and engine instruments.

(If any of the components listed are overhauled on an "on condition" overhaul basis, describe the procedures used to control the continued airworthiness of such components.)

When maintenance functions are performed by outside agencies, copies of the maintenance agreement regarding the extent of such services to be furnished should be attached to the application, as provided for in subparagraph (a) (2) of this section. The agreement should specify that services furnished should conform to the standards approved for the operator, the air carrier operations specifications, aircraft maintenance, and complies with all requirements of the Civil Air Regulations.

C. Indicate and define the type of maintenance operations (overhauls, inspections, and checks) that will be accomplished at each terminal, intermediate and overnight stop, relative to the following:

1. Disassembly and overhaul of aircraft components, engines, propellers, instruments, and accessories (aircraft and engine).
2. Periodic inspection and check of aircraft components, engine, propellers, instruments, and accessories (aircraft and engine).
3. Routine inspection of aircraft components, engines, propellers, instruments, and accessories (aircraft and engine).
4. Spare part and component replacements at intermediate and overnight stops.
5. Refueling.

D. Indicate the number of certificated, non-certificate airmen (repairmen/mechanics), and helpers, etc. including their company designation (foreman, inspectors, crew chiefs, etc.), located at the main overhaul base and each terminal and intermediate stop.

E. Indicate the distribution of the following items of spare equipment:

1. Aircraft (list quantity, make, and model).
2. Engines (list quantity, make, and model).
3. Propellers (list quantity, make, and model).
4. Instruments (list quantity, make, and model).

F. For each terminal, and intermediate stop at which refueling operation will be performed, describe the following:

1. Number, type (elevated or underground), and capacity of each fuel and oil storage tank.
2. List octane ratings of fuels available.
3. List S. A. E. rating or viscosity of oil available.
4. List facilities and methods for the detection and prevention of fuel contamination.
5. Outline method and procedure with reference to recording water checks.
6. Type of covered container used to convey oil from storage tank to aircraft.
7. Outline method and procedure of grounding aircraft in protection of fire.

G. For each terminal and intermediate stop, describe the following facilities:

1. Hangars and/or work docks provided for the protection from the elements for aircraft and personnel performing maintenance operations:
   a. Number, size, and type.
   b. Dimensions and number of square feet available for aircraft storage.
   c. Dimensions and number of square feet available for shop space.
   d. Dimensions of hangar doors and/or capacity of work docks.
   e. Number of largest sized aircraft of applicant which may be housed.
2. Equipment for ground handling of aircraft, as may be required for the proposed operation.
3. Tools, fixtures, test equipment, and other necessary shop apparatus necessary for the maintenance operations performed.

SEC. VIII. *Maintenance: Electrical and electronic equipment.* A. Briefly, describe the functional operation of the electrical/electronic maintenance organization, indicating the number and scope of responsibility of supervisory personnel and the number and distribution of qualified mechanics and inspectors. Indicate the number, company designation (foreman, inspectors, lead men, etc.), and location of all certificated airmen (certificated repairmen or certificated mechanics) who are directly in charge of electrical electronic maintenance activities.

B. Indicate the following with respect to aircraft radio equipment maintenance procedures:

1. Overhaul or bench check periods of aircraft radio equipment and station at which accomplished.
2. Periodic inspection and check periods of aircraft radio equipment and stations at which accomplished.
3. Equipment replacement at intermediate and overnight stops.

C. Indicate whether overhaul, periodic inspection, and routine inspection of aircraft electrical equipment are under the jurisdiction of the radio maintenance department or other department such as aircraft, engine, or accessories maintenance department.

D. Indicate the following with respect to aircraft electrical equipment procedures:

1. Overhaul or bench check periods of aircraft electrical equipment and stations at which accomplished.
2. Periodic inspection and check periods of aircraft electrical equipment and stations at which accomplished.
3. Routine inspection periods of aircraft electrical equipment and stations at which accomplished.

E. Indicate the distribution of the following items of spare equipment:

1. Radio equipment (list quantity, make, and model).
2. Electrical equipment (list quantity, make, and model).
3. Other electronic equipment (list quantity, make, and model).

F. If "on condition" overhaul of electrical/electronic is utilized, describe the bench check or major inspection procedures used to control performance tolerances and fixed period overhaul of components subject to wear and deterioration as a function of time in service.

(c) *Operations specifications.* The operations specifications proposed by the carrier as required by § 40.18 applicable to the intended operation shall be attached to the letter of application in paragraph (b) of this section for an air carrier operating certificate. (See § 40.18–1.)

§ 40.18–1 *Original issuance and amendment of operations specifications (CAA rules which apply to § 40.18 (a))*—(a) *Original issuance of operations specifications.* The air carrier's original application for the issuance of operations specifications shall be included with its letter of application for an air carrier operating certificate (see § 40.12–1). Details concerning appropriate forms, number of copies, etc., will be furnished either by the local CAA Air Carrier District Office or by the CAA Regional Office having jurisdiction over the area in which the air carrier will establish its principal operations base.

(b) *Amendment of operations specifications.* Applications to amend operations specifications shall be submitted by the air carrier to the appropriate local Aviation Safety Agent at least 15 days prior to the proposed effective date of such amendment, unless the Aviation Safety Agent approves a shorter filing period. The information required by § 40.12–1 in connection with the original application for an air carrier operating certificate shall, insofar as applicable, be furnished in support of an application to amend an air carrier's operations specifications.

§ 40.18–2 *Form of application for issuance of initial or revised Operations Specifications, Aircraft Maintenance (CAA rules which apply to § 40.18 (a)).* (a) Applications by the air carrier for new or amended Operations Specifications, Aircraft Maintenance, shall be made on Operations Specifications Form ACA–1014 or equivalent.

(b) Those pages of the Operations Specifications, Aircraft Maintenance, which contain the list of aircraft components, inspections, checks and overhauls, and time limitations therefor, shall be prepared by the air carrier on a Form ACA–1014 or equivalent. Such pages shall be prepared to permit insertion in a suitable loose-leaf binder. Each page shall be consecutively numbered and identified as an Operations Specification, Aircraft Maintenance.

(c) The air carrier shall list the aircraft components and the overhauls, inspections, checks, and time limitations therefor, either on separate pages in the Operations Specifications, Aircraft Maintenance, or together on the same pages. If listed separately, the overhauls, inspections, and checks shall be appropriately and thoroughly identified, by number and/or nomenclature, to include any applicable abbreviations. The list of individual aircraft components shall show proper reference to the overhauls, inspections, or checks by means of the applicable number, nomenclature, or abbreviation thereof. When so listed, it shall mean that such components are overhauled, inspected, or checked at the times identified in the Operations Specifications.

(d) Four copies of the application[1] and attachments shall be submitted to the assigned agents, the first copy of the application bearing the signature of a duly authorized representative of the air carrier. Approval or disapproval shall be indicated on the first and second copies of the application and attachments which will be returned to the air carrier. The air carrier shall, in turn, indicate receipt in the space provided on the second copy and return it to the assigned agent.

§ 40.18–3 *Form of application for issuance of initial or revised Operations Specifications, Aircraft Weight and Balance Control (CAA rules which apply to § 40.18 (a)).* (a) Applications by the air carrier for new or amended Operations Specifications, Aircraft Weight and Balance Control,[2] shall be made on Operations Specifications Form ACA–1014 or equivalent.

(b) Four copies of the application shall be submitted, the first copy of the application bearing the signature of a duly authorized representative of the air carrier. Approval or disapproval of the carrier's application shall be indicated on the first and second copies of the application which will be returned to the air carrier. The air carrier shall, in turn, indicate receipt in space provided on the second copy and return it to the assigned agent.

§ 40.70–1 *Deviations (CAA rules which apply to § 40.70 (a)).* An application for any deviation shall include all supporting data and shall be forwarded to the CAA Aviation Safety District Office charged with the over-all inspection of the air carrier's operations.

§ 40.90–1 *Performance data (CAA rules which apply to § 40.90).* Performance data published by the Administrator to determine performance requirements in relation to the airports to be used and the areas to be traversed are set forth in figures 1 through 10[3] and paragraph (b) of this section. For the purpose of determining performance data, figures 1, 3, and 6, "paved runway" shall mean paved with asphalt or concrete. Figures 2, 4, and 7 shall be used for all other runway surfaces, except in individual cases where the Administrator finds that a particular runway surface justifies the use of the paved runway data or a specific correction factor. Data based on flight tests conducted under the supervision of CAA Aircraft Engineering Division and approved by the Administrator may be used in lieu of the published data. An application for any deviation shall include all supporting data and shall be forwarded to the CAA Aviation Safety District Office charged with the over-all inspection of the air carriers' operations.

[1] Application for initial time limitations applicable to new aircraft, engines, propellers or appliances, not previously used in air carrier service may require Washington concurrence prior to final issuance by the CAA regional office, and therefore should be submitted as soon as possible, but not later than 15 days prior to the date that the aircraft or component is to be placed into service.

[2] The Operations Specifications, Aircraft Weight and Balance Control may combine weight control procedures common to more than one aircraft or they may separate weight and balance procedures specifically adapted to a particular aircraft type and model.

[3] The charts are presented in graph form for selected values. Other values may be determined by interpolation or extrapolation, provided the operating and structural limitations are not exceeded. The following examples are given to explain the use of figures 1 through 10:

*Example 1.* Figure 8 is used in the following manner: (a) Determine the wind velocity and wind angle relative to the runway. (In the example illustrated in figure 8, for Runway 27, and a wind from WNW at 25 m. p. h., the relative wind angle is 22°.)

(b) Enter the chart with the above information at point A.

(c) Enter chart at point B using the existing effective runway length and project a line horizontally.

(d) Project a vertical line from point A to intersect line from point B.

(e) At point C, the intersection of these two lines, read the effective runway length available for zero wind. This figure, after being corrected for runway gradient, is used with the appropriate take-off or landing chart to determine the maximum permissible gross weight. It should be noted that a reverse of this procedure will furnish information on the actual runway required if the zero wind runway required is known for a given gross weight.

(f) By projecting a line horizontally from point A to point D, the crosswind component can be determined.

*Example 2.* Operating conditions for take-off:

Aircraft = DC–3 S1C3G.
Airport = Elevation = 4,000'.
Effective runway length = 3,300 feet (paved).
Runway gradient = +1.2 percent.

The equivalent runway length due to gradient =

$$S=\frac{SG}{\left[1+\left(\frac{S_G 92 \sin a}{V_2^2}\right)\right]}$$

$$=1+\frac{3{,}300}{\frac{(3{,}300\times 32.2\times 2\times .012)}{(98\times 1.467)^2}}$$

$$=2{,}938 \text{ feet.}$$

Due to the positive, or uphill, gradient effect, the zero gradient runway length is 2,938 feet. This figure, versus the airport elevation is used with figure 3 to determine the allowable gross weight for take-off. It will be noted that this runway length/airport elevation combination is outside the range of values plotted on the chart. Therefore, under a zero wind condition, operations from the runway in question would be impracticable due to the weight restriction.

If a 25 m. p. h. headwind component exists, the use of figure 8 indicates a zero wind runway length of 3,800 feet. This figure is predicated on $1.05V_{mc}$=92 m. p. h. Since figure 10 indicates $1.05V_{mc}$(92 m. p. h. TIAS) = 97.6 m. p. h. TAS (use 98) at an elevation of 4,000 feet, the distance of 3,800 feet must be multiplied by a correction factor from figure 9. The factor in this example, (25 m. p. h. headwind component and $1.05V_{mc}$=98 m. p. h. TAS), is 1.018 giving a corrected zero wind runway distance of 3,800 feet × 1.018 = 3,868 feet. By referring to figure 3, it is found that this zero wind runway length will permit a take-off at a weight of 24,200 pounds.

If the take-off was to be made in the opposite direction, the benefit of the downhill gradient on the accelerate distance would result in a zero gradient runway length of 3,770 feet. This would permit a take-off at a weight of 24,200 pounds, with zero wind. Figure 3 indicates that 3,970 feet of runway is required to permit take-off at a maximum gross weight of 25,200 pounds. Figure 8 indicates that a headwind component of 3 m. p. h. will give the desired zero wind runway length of 3,970 feet to permit take-off at the maximum gross weight.

*Example 3.* Operating conditions for landing: Same as in example 2, except that § 40.93 does not require consideration of gradient in detailing the landing limitations.

Referring to figure 6, we find that a 3,300-foot paved runway at an elevation of 4,000 feet, permits a landing gross weight of 22,600 pounds, in a zero wind condition. If a 25 m. p. h. headwind component is forecast, we find by reference to figure 8 that the zero wind runway length becomes 4,300 feet. In this example, the distance of 4,300 feet is predicated on $1.3V_{s_0}$=92 m. p. h. Therefore, by reference, figure 10, $1.3V_{s_0}$ is found to be 98 m. p. h. at 4,000 feet and by reference to figure 9, it is found that the correction factor is 1.018, resulting in a zero wind runway length of 4,300 × 1.018 = 4,377 feet. Figure 6 indicates that this zero wind runway length will permit landing at the maximum gross weight.

§ 40.91–1 *Take-off limitations (CAA rules which apply to § 40.91).* (a) Figures 1, 2, 3, 4, 8, 9, and 10 shall be used in determining take-off limitations.

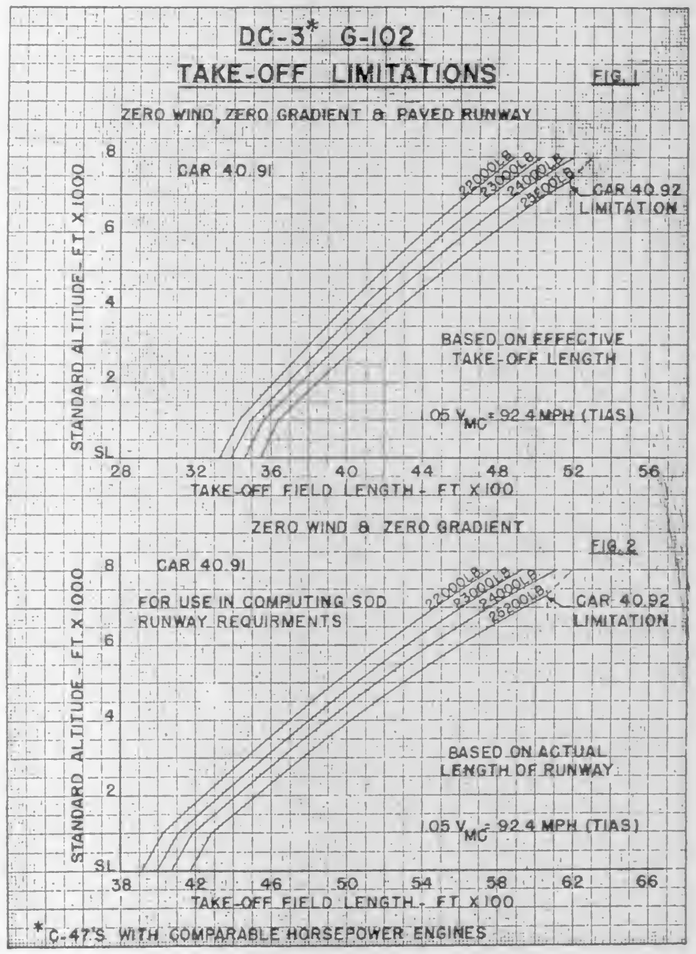
(b) If the gradient of the runway exceeds ½ percent, the effect of the total gradient shall be accounted for. The effect of gradient may be calculated from the following formula, or other methods by which the effects of gradient can be accurately computed:

$$S_G=S\left[\frac{1}{1-\left(\frac{2Sg\sin a}{V_2^2}\right)}\right]$$

Where:
$S_G$ = length of ground run with gradient (required or available).
$S$ = length of ground run without gradient (required or available).
$g$ = acceleration of gravity = 32.2 (ft/sec²).
$V_2$ = climb out speed, feet per second, true air speed.
$a$ = angle of grade with horizontal, uphill +, downhill −.

Where runways with gradient are of such length that the gross weight would be reduced, the following equation will be more useful in determining the zero gradient runway length to be used in determining the permissible gross weight from figures 1, 2, 3, and 4:

$$S=\frac{S_G}{1+\left(\frac{S_G g^2\sin a}{V_2^3}\right)}$$



(c) The maximum allowable take-off weight from sod runways shall be the lesser gross weight as determined by application of the effective length to the appropriate take-off table (fig. 1 or 3) and by application of the actual runway length to the corresponding take-off table (fig. 2 or 4). Figures 1 and 3 are used to determine the maximum allowable gross weight which will permit the aircraft to take off within the effective runway length, while figures 2 and 4 are used to determine the maximum allowable gross weight which will permit the particular aircraft to be accelerated and brought to a full stop within the actual length of available runway.

§ 40.92–1 *En route limitations (CAA rules which apply to § 40.92).* Figure 5 shall be used in determining the en route limitations. An application for approval of "drift-down" procedures shall include all supporting data. The application will be forwarded to the CAA Aviation Safety District Office charged with the over-all inspection of the air carrier operations.

§ 40.93–1 *Landing distance limitations (CAA rules which apply to § 40.93).* (a) Figures 6, 8, 9, and 10 shall be used in determining landing distance limitations on paved runways.

(b) Figures 7, 8, 9, and 10 shall be used in determining landing distance limitations on sod runways.

§ 40.205–1 *Requirement of protective breathing equipment in nonpressurized cabin airplanes (CAA rules which apply to § 40.205 (b)).* Protective breathing

equipment for the flight crew shall be required in nonpressurized cabin airplanes having built-in carbon dioxide fire extinguisher systems in fuselage compartments (for example, cargo or combustion heater compartments); except that protective breathing equipment will not be required where:

(a) Not more than five pounds of carbon dioxide will be discharged into any one such compartment in accordance with established fire control procedures, or

(b) The carbon dioxide concentration at the flight crew stations has been determined in accordance with § 4b.484–1 and found to be less than 3 percent by volume (corrected to standard sea-level conditions).

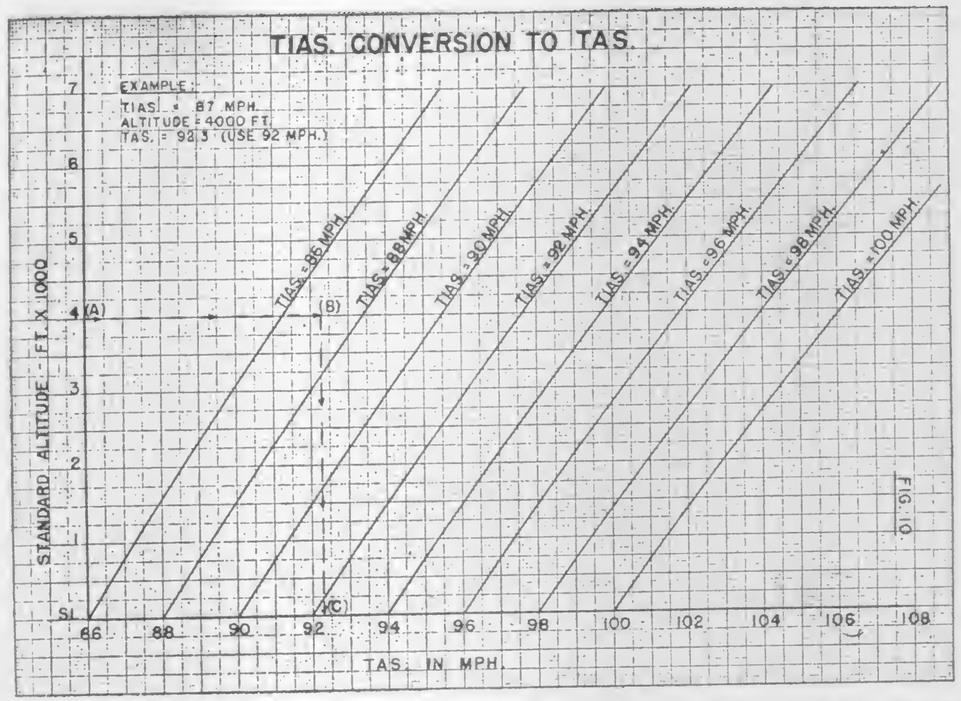
§ 40.302–1 *Pilot check—proficiency requirements (CAA rules which apply to § 40.302 (b)).* The following items are required by the Administrator to determine the proficiency of the pilot-in-command:

(a) *Equipment examination (oral or written).* (1) The equipment examination shall be pertinent to the type of aircraft to be flown by the pilot-in-command and may be given (i) in the air carrier's ground school, (ii) during a routine line check under the supervision of an authorized company check pilot, or (iii) during the proficiency check.

(2) The examination shall at least contain questions relative to engine power settings, airplane placard speeds, critical engine failure speeds, control systems, fuel and lubrication systems, propeller and supercharger operations, hydraulic systems, electric systems, anticing, heating and ventilating, and pressurization system (if pressurized). A record should be maintained in the pilot's file which will indicate the date, condition under which equipment examination was given, and grade received.

(b) *Taxiing, sailing, or docking.* Attention shall be directed to the manner in which the pilot-in-command conducts taxiing, sailing, or docking with reference to the taxi instruction as issued by airport traffic control or other traffic control agency, and taxi instruction which may be published in the air carrier's operations manual, and general regard for the safety of the air carrier's and other equipment which may be affected by taxiing, sailing, or docking operation.

(c) *Run-up.* Attention to detail in the use of cockpit check list and cockpit procedure shall be observed on all proficiency flights.



(d) *Take-off.* For those air carriers authorized take-off minimums of less than 300–1, the pilot being examined shall whenever practicable execute a take-off solely by reference to instruments, or at the option of the check pilot, a contact take-off may be made following which instrument conditions shall be simulated at or before reaching 100 feet with the subsequent climb conducted solely by reference to instruments. The check pilot shall observe the pilot's ability to maintain a constant heading during the take-off run, his proficiency in handling power, flap and gear operation during the critical period between take-off (off ground) and reaching five hundred feet. Should it become necessary for the check pilot to give assistance after becoming airborne, the maneuver shall be considered as unsatisfactory.

(e) *Climbs and climbing turns.* Climbs and climbing turns shall be performed in accordance with the airspeeds and power settings as prescribed by the air carrier or those set forth in the "Airplane Flight Manual." The use of proper climb speeds and designated rates of climb shall be considered in determining the satisfactory performance of this phase of the proficiency flight.

(f) *Steep turns.* Except as provided hereinafter, steep turns shall consist of at least forty-five degrees of bank. The turns shall be at least 180° of duration, (but need not be more than 360°). Smooth control application, and ability to maneuver aircraft within prescribed limits, shall be the primary basis for judging performance. When information is available on the relation of increase of stall speeds vs. increase in angle of bank, such information shall be reviewed and discussed. As a guide, the tolerance of 100 feet plus or minus a given altitude shall be considered as acceptable deviation in the performance of steep turns. Consideration may be given to factors other than pilot proficiency which might make compliance with the above tolerances impractical. For example, where the range of vision from the safety observer's position is obstructed in certain types of aircraft while in a steep left turn, the degree of left bank in such instances may be reduced to not less than thirty degrees.

(g) *Maneuvers (minimum speeds).* Maneuvers at minimum speeds shall be accomplished while using the prescribed flap settings as set forth in the Airplane Flight Manual. In addition, attention shall be directed to airplane performance as related to use of flaps vs. clean

configuration while operating at minimum speeds. Attention shall be directed toward the pilot's ability to recognize and hold minimum controllable airspeed to maintain altitude and heading, and to avoid unintentional approaches to stalls.

(h) *Approach to stalls.* Approach to stalls shall be demonstrated from straight flight and turns, with and without power. An approach to stall shall be executed in landing or approach configuration. The extent to which the approach to stall will be carried and the method of recovery utilized shall be dictated by (1) the type of aircraft being flown, (2) its reaction to stall conditions, and (3) the limitation established by the air carrier. Performance shall be judged on ability to recognize the approaching stall, prompt action in initiating recovery, and prompt execution of proper recovery procedure for the particular make and model of aircraft involved.

(i) *Propeller feathering.* Propeller feathering or the assimilation thereof shall be accomplished in accordance with instructions set forth by the air carrier and be exercised at sufficient altitude to insure adequate safety for the performance of the operation. The pilot's ability to maintain altitude, directional control, and satisfactory airspeed shall be the desired prerequisites in accomplishing this maneuver. The manner in which the pilot manages his cockpit during propeller feathering shall also be noted.

(j) *Maneuvers (one or more engines out).* When performing maneuvers (one or more engines out) the aircraft shall be maneuvered with a loss of fifty percent of its power units, such loss to be concentrated on one side of the aircraft. The loss of these power units may be simulated either by retarding throttles or by following approved feathering procedures. The pilot-in-command shall be required to maintain headings and altitude and to make moderate turns both toward and away from the dead engine or engines. Proficiency shall be judged on the basis of the pilot's ability to maintain engine-out airspeed, heading and altitude; to trim the airplane; and to adjust necessary power settings.

(k) *Rapid descent and pull-out.* This maneuver shall consist of the following steps: While the aircraft is in the appropriate holding configuration and being flown at a predetermined altitude, it will be assumed that the aircraft has arrived at a navigational fix and is cleared to descend immediately to a lower altitude. (The lower altitude shall be one which permits a descend of at least 1,000 feet.) Upon reaching the lower altitude, the aircraft shall be recovered from the rapid descent and flown on a predetermined heading and altitude for a predetermined period of time. At the end of the time interval, an emergency pull-out shall be executed which will involve a change of direction of at least 180°. Performance shall be judged on the basis of ability to establish a rapid descent at constant airspeed, stopping the descent at the minimum altitude specified without going below it, holding heading and altitude, and smooth pull-up and climb.

(l) *Ability to tune radio.*[1]

(m) *Orientation.*[1]

(n) *Beam bracketing.*[1]

(o) *Cone identification.*[1]

(p) *Loop orientation.*[1]

(q) *Approach procedures.* An approach procedure shall be made in the aircraft on the let-down aid for which the lowest minimums on a system-wide basis are authorized and include, where possible, holding patterns and air traffic control instructions which might be used by the pilot in day-to-day operations. If at the time of the proficiency flight the let-down aid affording the lowest minimums is not in operation at the point the check is given, the landing aid which affords the next lowest minimums on a system-wide basis shall be used. Where a particular air carrier is authorized landing minimums based on instrument landing systems and ground control approach, the predominant landing aid on a system-wide basis shall be utilized. In some cases a particular air carrier may be authorized its lowest landing minimums on a let-down aid

[1] Paragraphs (l), (m), (n), (o), and (p) of this section shall be accomplished in a satisfactory manner either during (1) a routine line check under the supervision of an authorized company check pilot, (2) in a simulated or synthetic trainer, or (3) during the proficiency flight. A record shall be maintained in the pilot's file which shall indicate the date, method utilized, and grade received in the performance of these items.

which is not installed and operating at locations where the air carrier's pilots are based. It shall be the responsibility of the air carrier in this case to conduct proficiency flights at locations where such an aid is installed and operating. All other approaches which a particular operator may be authorized to use, such as ADF, LF/MR range, VOR, and VAR shall be made and may be conducted in a simulator or other approved type trainer. A record shall be maintained in the pilot's file which will indicate the date that these approaches were performed and the grade received. If these approaches (ADF, LF/MR range, VOR, and VAR) are not performed in a simulator or other approved type trainer, they shall be accomplished on the proficiency flight.

(r) *Missed approach procedures.* (See paragraph (s) of this section.)

(s) *Traffic control procedures.* Missed approach procedures and traffic control procedures shall be accomplished in a manner satisfactory to the authorized check pilot. The degree of satisfactory or unsatisfactory performance shall be predicated on the pilot's ability to (1) maneuver the aircraft while performing these procedures, (2) follow instructions either verbal or written which may be pertinent to the accomplishment of these procedures. Paragraphs (r) and (s) of this section may be accomplished while performing paragraph (q).

(t) *Cross-wind landing.* A cross-wind landing shall be performed when practicable. Traffic conditions and wind velocities will dictate as to whether a cross-wind landing is practicable. Performance shall be judged on the technique used in correcting for drift on final approach, judgment in the use of flaps, and directional control during roll-out.

(u) *Landing under circling approach conditions.* Landing under circling approach conditions shall necessitate a path of flight around the landing area which will require not more than a 180° turn but not less than a 90° turn. The pilot shall be judged on the basis of altitude and airspeed control and his ability to maneuver under the minimum ceiling and visibility conditions prescribed.

(v) *Take-offs and landing (with engine(s) failures).* If it is consistent with safety, traffic patterns, local rules and laws, a simulated engine failure shall be experienced during take-off. The simulated failure shall occur at any time after the aircraft has passed the $V_1$ speed pertinent to the particular take-off and when practicable before reaching 300 feet. When performing the landing, the aircraft shall be maneuvered to a landing while utilizing 50 percent of the available power units. The simulated loss of power shall be concentrated on one side of the aircraft. The pilot's ability to satisfactorily perform this maneuver shall be evaluated in the manner stated under paragraph (i) of this section.

(w) *Judgment.* The pilot shall demonstrate judgment commensurate with experience required of a pilot-in-command of air carrier aircraft.

(x) *Emergency procedures.* The emergency procedures shall be applicable to the type of aircraft being flown and in accordance with the emergency procedures prescribed by the air carrier. A record shall be maintained in the pilot's file which will list the emergency procedures accomplished, date performed, and grade received.

(y) *Additional training.* If performance of any of the above items is unsatisfactory in the judgment of the check pilot he may, at his discretion, give additional training to the pilot during the course of the proficiency check. If after such training, the pilot being checked is still unable to demonstrate satisfactory performance to the check pilot, he shall not be used in scheduled operation until such time as he shall have demonstrated proficiency.

§ 40.406–1 *Take-off and landing weather minimums (CAA rule which applies to § 40.406 (b)).* (a) Whenever the latest weather report, furnished by the U. S. Weather Bureau or a source approved by the Weather Bureau contains a visibility value specified as a runway visibility for a particular runway of an airport, such visibility shall be used for straight-in instrument approach and landing or take-off for that runway only. The terminal visibility as reported in the main body of such weather report shall be used for instrument approach and landing or take-off for all other runways.

(b) The ceiling value reported in the main body of such weather report shall constitute the ceiling for both circling and straight-in instrument approach and landing or take-off for all runways.

(Sec. 205, 52 Stat. 984, as amended; 49 U. S. C. 425. Interpret or apply secs. 601, 604, 605, 608, 52 Stat. 1007, 1010, 1011; 49 U. S. C. 551, 554, 555, 558, 559)

This supplement shall become effective January 1, 1954.

[SEAL] F. B. LEE,
*Administrator of Civil Aeronautics.*

[F. R. Doc. 53–10489; Filed, Dec. 23, 1953, 8:45 a. m.]

## Chapter II—Civil Aeronautics Administration, Department of Commerce

[Amdt. 53]

### PART 610—MINIMUM EN ROUTE IFR ALTITUDES

#### MISCELLANEOUS AMENDMENTS

The minimum en route IFR altitudes appearing hereinafter have been coordinated with interested members of the industry in the regions concerned insofar as practicable. The altitudes are adopted without delay in order to provide for safety in air commerce. Compliance with the notice, procedures, and effective date provisions of section 4 of the Administration Procedure Act would be impracticable and contrary to the public interest, and therefore is not required.

Part 610 is amended as follows:

1. Section 610.13 *Green civil airway No. 3* is amended to read in part:

| From— | To— | Minimum altitude |
|---|---|---|
| Cleveland, Ohio (LFR) | Parkman (INT), Ohio | 2,300 |
| Parkman (INT), Ohio | Youngstown, Ohio (LFR) | 2,500 |
| Brecksville, Ohio (FM) | Parkman (INT), Ohio (eastbound only) | 2,700 |

2. Section 610.14 *Green civil airway No. 4* is amended to read in part:

| From— | To— | Minimum altitude |
|---|---|---|
| Columbia, Mo. (LFR) | St. Peters (INT), Mo | 2,000 |

3. Section 610.220 *Red civil airway No. 20* is amended to read in part:

| From— | To— | Minimum altitude |
|---|---|---|
| Cleveland, Ohio (LFR) | Akron, Ohio (LFR) | 2,000 |
| North Royalton, Ohio (FM) | Akron, Ohio (LFR) (southeast-bound) | 2,000 |
| Lansing, Mich. (LFR) | Flint, Mich. (LF/RBN). | 2,300 |

4. Section 610.231 *Red civil airway No. 31* is amended to eliminate:

| From— | To— | Minimum altitude |
|---|---|---|
| Stanton, Minn. (LF/RBN). | Red Wing (INT), Minn. | 2,400 |

5. Section 610.231 *Red civil Airway No. 31* is amended by adding:

| From— | To— | Minimum altitude |
|---|---|---|
| Stanton, Minn. (LF/RBN). | LaCrosse, Wis. (LFR) | 2,600 |

6. Section 610.281 *Red civil airway No. 81* is amended to eliminate:

| From— | To— | Minimum altitude |
|---|---|---|
| Cadillac, Mich. (LF/RBN). | Lansing, Mich. (LFR). | 2,700 |

7. Section 610.303 *Red civil airway No. 103* is added to read:

| From— | To— | Minimum altitude |
|---|---|---|
| Skilak [1] (INT), Alaska | Middleton Island, Alaska (LF/RBN). | 9,000 |

[1] 6,100′—Minimum crossing altitude at Skilak (INT), southeast-bound.

8. Section 610.306 *Red civil airway No. 106* is added to read:

| From— | To— | Minimum altitude |
|---|---|---|
| Scott Bluff, Nebr. (LFR). | North Platte, Nebr. (LFR). | 5,800 |

9. Section 610.307 *Red civil airway No. 107* is amended by adding:

| From— | To— | Minimum altitude |
|---|---|---|
| Stanton, Minn. (LF/RBN). | Red Wing (INT), Minn. | 2,400 |

10. Section 610.603 *Blue civil airway No. 3* is amended to read in part:

| From— | To— | Minimum altitude |
|---|---|---|
| White Pond (INT), Mich. | Cadillac, Mich. (LF/RBN). | 3,200 |

11. Section 610.611 *Blue civil airway No. 11* is amended to read in part:

| From— | To— | Minimum altitude |
|---|---|---|
| Cleveland, Ohio (LFR). | Perry, Ohio (LF/RBN). | 2,500 |

12. Section 610.638 *Blue civil airway No. 38* is amended to read in part:

| From— | To— | Minimum altitude |
|---|---|---|
| Gustavus, [1] Alaska (LFR). | Haines, Alaska (LF/RBN). | 9,400 |
| Haines, Alaska (LF/RBN). | Whitehorse, [2] Canada (LFR). | 10,300 |

[1] 7,000′—Minimum crossing altitude at Gustavus (LFR), Northeast-bound.
[2] For that airspace over U. S. territory.

13. Section 610.662 *Blue civil airway No. 62* is amended to read in part:

| From— | To— | Minimum altitude |
|---|---|---|
| Salem, Mich. (VAR). | Dunham Lake (INT), Mich. | 2,700 |
| Dunham Lake (INT), Mich. | Flint, Mich. (LF/RBN). | 2,300 |

14. Section 610.1001 *Direct routes; United States* is amended by adding:

| From— | To— | Minimum altitude |
|---|---|---|
| Newton (INT), Kans. | North Fork, Kans. (LF/RBN). | 3,000 |
| Hutchinson, Kans. (LF/RBN). | Newton (INT), Kans. | 3,000 |

15. Section 610.6002 *VOR civil airway No. 2* is amended to read in part:

| From— | To— | Minimum altitude |
|---|---|---|
| Lansing, Mich. (VOR) via N. alter. | Howell [1] (INT), Mich. via N. alter. | 2,900 |
| Howell [1] (INT), Mich. via N. alter. | Detroit, Mich. (VOR) via N. alter. | 2,500 |

[1] 2,500′ Minimum crossing altitude at Howell (INT), westbound.

16. Section 610.6006 *VOR civil airway No. 6* is amended to read in part:

| From— | To— | Minimum altitude |
|---|---|---|
| Cleveland, Ohio (VOR). | Chagrin Falls (INT), Ohio. | 2,900 |
| Chagrin Falls (INT), Ohio. | Youngstown, Ohio (VOR). | 2,500 |
| Cleveland, Ohio (VOR), via N. alter. | Youngstown, Ohio (VOR), via N. alter. | 2,600 |

17. Section 610.6033 *VOR civil airway No. 33* is amended to read in part:

| From— | To— | Minimum altitude |
|---|---|---|
| Philipsburg, Pa. (VOR). | Bradford, Pa. (VOR). | 4,000 |
| Bradford, Pa. (VOR). | Buffalo, N. Y. (VOR) | 4,500 |

18. Section 610.6034 *VOR civil airway No. 34* is amended to read in part:

| From— | To— | Minimum altitude |
|---|---|---|
| Rochester, N. Y. (VOR). | Bellona (INT), N. Y. | 3,000 |
| Bellona (INT), N. Y. | Binghamton, N. Y. (VOR). | 3,500 |

19. Section 610.6040 *VOR civil airway No. 40* is amended to read in part:

| From— | To— | Minimum altitude |
|---|---|---|
| Flint (INT), Mich. | Milford [1] (INT), Mich | 2,300 |
| Milford [1] (INT), Mich. | Detroit, Mich. (VOR). | 2,500 |

[1] 4,000′—Minimum reception altitude.

20. Section 610.6043 *VOR civil airway No. 43* is amended to read in part:

| From— | To— | Minimum altitude |
|---|---|---|
| Columbus, Ohio (VOR). | Tiverton (INT), Ohio (Int. 152° mag. rad. Mansfield, Ohio (VOR), and 53° mag. rad. Columbus, Ohio (VOR)). | 2,500 |
| Tiverton (INT), Ohio | Fredricksburg (INT), Ohio. | [1] 4,200 |
| Fredricksburg (INT), Ohio. | Canton (INT), Ohio (Int. 135° mag. rad. Cleveland, Ohio (VOR) and 296° mag. rad. Youngstown, Ohio (VOR)). | [1] 5,000 |
| Canton (INT), Ohio | Youngstown, Ohio (VOR). | 2,500 |

[1] 2,500′—Minimum terrain clearance altitude.

21. Section 610.6045 *VOR civil airway No. 45* is amended to read in part:

| From— | To— | Minimum altitude |
|---|---|---|
| Waterville, Ohio (VOR). | Henrietta [1] (INT), Mich. | 2,300 |
| Henrietta (INT), Mich. | Lansing, Mich. (VOR). | 2,300 |

[1] 3,000′—Minimum reception altitude.

22. Section 610.6072 *VOR civil airway No. 72* is amended to read in part:

| From— | To— | Minimum altitude |
|---|---|---|
| Bradford, Pa. (VOR). | Elmira, N. Y. (VOR). | 4,500 |

23. Section 610.6084 *VOR civil airway No. 84* is amended to read in part:

| From— | To— | Minimum altitude |
|---|---|---|
| Lansing, Mich. (VOR). | Flint (INT), Mich. | 2,400 |

24. Section 610.6090 *VOR civil airway No. 90* is amended to read in part:

| From— | To— | Minimum altitude |
|---|---|---|
| Lansing, Mich. (VOR). | Howell (INT), Mich | 2,900 |
| Howell (INT), Mich. | Milford [1] (INT), Mich | [2] 4,000 |

[1] 4,000′—Minimum reception altitude.
[2] 2,500′—Minimum terrain clearance altitude.

25. Section 610.6116 *VOR civil airway No. 116* is amended to read:

| From— | To— | Minimum altitude |
|---|---|---|
| Erie, Pa. (VOR) | Bradford, Pa. (VOR). | 4,000 |
| Bradford, Pa. (VOR). | Stonyfork (INT), Pa. | 4,500 |
| Stonyfork (INT), Pa. | Wilkes-Barre, Pa. (VOR). | [1] 5,000 |

[1] 4,500′—Minimum terrain clearance altitude.

(Sec. 205, 52 Stat. 984, as amended; 49 U. S. C. 425. Interpret or apply sec. 601, 52 Stat. 1007, as amended; 49 U. S. C. 551)

These rules shall become effective December 29, 1953.

[SEAL] F. B. LEE,
*Administrator of Civil Aeronautics.*

[F. R. Doc. 53–10694; Filed, Dec. 23, 1953; 8:52 a. m.]

# TITLE 19—CUSTOMS DUTIES

## Chapter I—Bureau of Customs, Department of the Treasury

[T. D. 53399]

### MISCELLANEOUS AMENDMENTS TO CHAPTER

To eliminate obsolete material, correct discrepancies, clarify certain provisions, and for other reasons specially indicated,

the Customs Regulations are amended as follows:

Except as otherwise specially indicated, the authorities for the respective amendments are those cited in 19 CFR Chapter I for the respective sections that are being amended.

PART 3—DOCUMENTATION OF VESSELS

1. The citation of authority for § 3.2 is amended to read "R. S. 161, secs. 2, 3, 23 Stat. 118, as amended, 119, as amended, R. S. 4132, as amended, sec. 22, 41 Stat. 997, R. S. 4136, as amended, 4214, as amended, secs. 2, 9, 39 Stat. 729, as amended, 730, as amended, sec. 27, 41 Stat. 999, as amended; 5 U. S. C. 22, 46 U. S. C. 2, 3, 11, 13, 14, 103, 802, 803, 883."

2. Section 3.19 (a) (1) is amended to read as follows:

(1) In the case of an individual, a native-born, derivative, or naturalized citizen of the United States;

3. Section 3.28 is amended by inserting "and new" after "Rebuilt" in the heading, by deleting paragraphs (a) and (c), by redesignating paragraph (b) as (a), and by adding the following new paragraphs:

(b) When application is made by a vessel owner to a collector of customs to note the place and date of rebuild of a vessel on its marine document or to document as a new vessel a vessel constructed in whole or in part from an old vessel, the applicant shall submit through the collector to the Commissioner of Customs a certificate of specifications outlining the work performed on the vessel and describing the extent to which old materials used were taken up, refitted, and reset, or the extent to which parts of the old hull in its intact condition were used or built upon. The application shall be accompanied by accurate sketches or blueprints illustrating the extent of the work performed when such sketches or blueprints are available. If the application is to have the vessel declared to be a new vessel, such application shall be accompanied by a certificate of the builder on customs Form 1261. The Commissioner of Customs shall decide whether the vessel is to be considered repaired, rebuilt, or new.[1]

(c) A rebuilt vessel shall retain its name and official number and the date and place of rebuild shall be noted on its marine document. Upon a finding under this section that a vessel is new, an application shall be submitted for the award of an official number and all other requirements applicable in the case of any new vessel shall be met before a marine document is issued.

4. In order to eliminate the requirement for the filing of an authenticated copy of the certificate of death of the owner of any interest in a vessel in a case in which there is an administration of the estate establishing the fact of the owner's death, § 3.32 is amended by revising paragraph (c) to read as follows:
